THERE was full opportunity and ample time for the examination of these fleeces, and the marked difference in the uniformity of those that won and those that did not only goes to prove how essentially necessary it is that such exhibitions, not only for this, but for every other breed, should be encouraged and increased as much as possible.

THE value of the fleece in an important item in the receipts of all who are flockmasters, and

Our illustration above is of the Pen of Crossbred Longwool Sheep with which Mr. S Linton, junr., of Posso, Peebles, won a First Prize at the recent Smithfield Club Show. They were by a Border Leicester ram out of a Cheviot ewe, were 19 months 3 weeks old on December 1st, and weighed at the Smithfield Show 7 cwt. 12 lb.

if by care and selection the value of those fleeces can be increased, it means a greater chance of profit being realised.

IT is the same with wool as with mutton, and, in fact, with every other commodity, that the better the produce is the better is the price realised; and further, the prime quality of any commodity has always this other great advantage, that no matter how depressed the market for it may be, such quality always commands a readier and better sale than that which is ranked second grade, or inferior.

Hampshire Down Sheep Breeders' Association.

The report presented at the annual meeting of the Hampshire Down Sheep Breeders' Association stated that during the year 41 new members had been elected, making the total number of members (after allowing for withdrawals upon dispersion of flocks, deaths, &c.) 442, or a net increase of 20. The total number of sheep entered in Volume 18 was 237,377, viz.:—172,225 breeding ewes, 61,883 stock ewe tegs, 3,269 rams (975 of which were registered singly), making a total of 237,377. The number of new flocks registered was 43, and old flocks recorded 371, total 417, or a net increase of 14. The association still showed progression, both as regarded membership, which extended to 19 English counties and Ireland, and the number of sheep registered. The issue of export certificates during the year had increased, 541 having been issued in respect of animals for export to widely different foreign countries and colonies, a fact which testified to the increasing popularity of the Hampshire Down as an early maturity, good wool, and prime mutton-producing class of sheep.

The shepherds' prize competition for rearing the largest percentage of lambs and ewe tegs had again given very general satisfaction, the average breed of lambs in those flocks entered for competition being 115·35 per cent., with an average loss of 1·84 per cent., and the average percentage of loss on tegs entered in the competition only ·33. The flock prize competition, for which the sum of £60 was voted as prize money by the council, had not met with that support which the enterprise merited, the total entries in the three classes numbering only thirteen, and a portion of the prizes in each class had to be withheld for lack of sufficient entries under the rules.

The annual statement showed a net balance in hand of £187 4s. 9d., with no arrears whatever and no outstanding liabilities, and £900 invested in Consols, total £1,087 4s. 9d., as against £1,043 18s. 3d. in 1906.

The Colouring of Show Sheep.

The report and balance-sheet having been adopted, Mr. Notley proposed "That the present practice of colouring Hampshire Down sheep for exhibition purposes is highly detrimental to the best interests of the breed, and therefore ask the council to take immediate measures to put an end to the practice." He said it was generally recognised that stock should be sent to shows in such a condition that the judges might be able to judge them fairly. He did not think sheep should be artificially coloured so as to impede the judges in their decisions as regarded the quality of the stock. Perhaps he was going to make a rather strong assertion, but he should not make an assertion he could not prove, and he said that Hampshire Down sheep were put into the show ring so artificially coloured that it was literally almost impossible for a judge to tell the colour of a sheep's skin and the texture of the wool. Not only that, but the amount of powder colouring put on the back of a sheep materially interfered with the natural touch of the sheep. If anyone demurred to his remarks he would quote facts to prove them. The same thing applied to the sale ring. Their ram lambs at the present time were put into the sale ring so highly coloured from surface to skin, and so thickly powdered with colouring, that even some of their own ram breeders, and the association's authorised judges, had bought rams and had to discard them as useless. He thought they would all agree with him that the Hampshire Down Breeders' Association should alter this state of affairs, and that it was to the advantage of the breed that it should be altered. A system that allowed one of their own experts to be taken in ought to be abolished.

Mr. W. J. K. Waters seconded the resolution, and said he did so from a buyer's point of view. Unless they examined a ram before it came into the ring they were deceived. They often found dark wool about a ram, which they would not have had at any price. If the colour had not been put on the sheep they could have detected it with the naked eye.

Mr. Flower said, as one of those who had been exhibiting in the show ring for a long time, he thought he had a right to say something on this matter. He was sorry to hear Mr. Notley assert that anyone had been robbed. They had recently had this matter before the National Sheep Breeders' Association, of which he had been chairman during the past year. The matter of colouring show sheep was discussed, and it was decided that members, whoever they were, had a right to show their sheep in the way they thought best. A rider was added to the resolution to the effect that they deprecated, and he thought everyone did, excessive colouring. He thought they ought to be able to show their sheep as they liked, and he would ask Mr. Notley to go into the show and look at the cattle. Let him look at the Herefords. Was not the comb and the oil brush used?

Mr. Notley: They are not painted.

Mr. Flower said colouring was not painting sheep. The man who painted his sheep was a rogue, and he did not mind saying so. If they went to Shire horse shows they would see the animals covered with sawdust. They knew for what reason that was done, but it was not stopped. Let them go to pig shows. Were not pigs oiled?

Mr. Notley: We dare not colour them.

Mr. Flower: Do you oil them? One thing applies as well as another. Proceeding, Mr. Flower contended that they had a right to show their stock in the best way they could, and he did not believe that any of them wanted to take in a buyer. He saw a South American buyer that day—one of the best buyers he had got—and he told him (Mr Flower) that they liked to see sheep coloured, because it made them look uniform. He thought this motion required a good deal of consideration before it was carried.

Mr. Cary Coles said that this was not a new question. It came before them ten years ago, and it had since come before the National Sheep Breeders' Association. The broad principle which Hampshire Down breeders had gone on hitherto—and he thought that it was a right one—was that so long as a man coloured his sheep so as to show them to better advantage, and did nothing to defraud the public, he had a perfect right to do so. In every commercial undertaking a person who exposed his goods for sale was allowed to do so to the best advantage, but if they stopped the colouring of sheep they would prevent sheep breeders from showing their sheep to the best advantage. He was prepared to go with Mr. Notley if anyone put so much powder on the sheep so as to hide the dark wool. But was that general? If it was, he was happy in having had no experience of it. He should vote against the motion.

Mr. Kerr said he thought previous speakers had wandered a little beyond the subject. This resolution had nothing to do with the sale of sheep. It referred to the exhibition of sheep, and he should not for a minute support any action being taken which would interfere with the liberty of the individual. The individual farmer must colour his sheep if he liked, or leave them uncoloured. He thought the whole question was, was colour an aid to the judges in deciding which was the best sheep? Would any gentleman in that room conscientiously say that colouring was an aid to the judges in the discharge of their serious and at times very heavy duties? He said it was not, and therefore he thought the association should put a stop to the colouring of exhibition sheep. If they did so, he thought it would be doing a great deal of good to the breed. As representing a pretty extensive exhibitor of the Hampshire Downs, he was prepared to say that he should welcome the day when the colouring of sheep would be done away with. (Applause.)

The resolution was carried by 16 votes to 13.

The secretary said the resolution would now go before the council for consideration.

Ear Marking.

The president said the council had decided to adopt an official tattoo ear-mark, which would come into force in the early spring. In the first year the marking would be done at the expense of the association, but afterwards as might be decided.

Mr. W. J. K. Waters asked how many sheep they were going to mark, and the secretary replied the whole of the flock the first year, and afterwards the lambs of each year.

Mr. W. J. K. Waters: And have you considered who is to pay for the marking next year?

The Secretary: That is to be decided by the council later.

Various votes of thanks concluded the meeting.

At a council meeting prior to the annual meeting it was resolved to give prizes, as last year, at the Royal and Bath and West Shows, viz., £28 and £10 respectively.

The date for the next council meeting was fixed for Monday, January 13, at Salisbury.

Transactions in Store Stock.

(Reported to the Department of Agriculture and Technical Instruction for Ireland.)

At Clifden Fair, co. Galway, held on December 18, there was a smaller fair than usual; good demand for conditioned Polled cattle and a good all round clearance effected. All cattle weighed upon entry to the sale ring if desired. Full particulars to be sent to—

IRELAND'S, Auctioneers.

Norwich, Norfolk.

The Joint Board of the Pig Breeders' Societies.

A meeting of the joint board of the Pig Breeders' Societies was held by permission of the Smithfield Club in the Stewards' Room, Agricultural Hall, Islington, when in the absence of the chairman Mr. Hayter presided. Mr. Chamberlain, from the Board of Agriculture, also attended.

The secretary stated that he forwarded the resolution passed at the last meeting, recommending an area of half a mile to be drawn round any outbreak of swine fever, and the movement of swine entirely prohibited in that area, and the communication had been acknowledged. It was pointed out to Mr. Chamberlain that the pedigree breeders were the greatest sufferers through the regulations, and that it was very rarely that swine fever broke out on their premises.

Mr. Chamberlain said that it was a difficult matter to make a given radius, as it might take a part of more than one petty sessional division. The matter was receiving the attention of the board, and he hoped that shortly considerable modifications would be made in the movement orders, and that there would be less difficulty in getting licences.

After some discussion and queries which Mr. Chamberlain replied to, a vote of thanks was given to him for attending, and to the council of the Smithfield Club for the use of the room.

National Pig Breeders' Association.

A meeting of the council of the above association was held by permission of the council of the Smithfield Club in the Prince's Saloon, Agricultural Hall, Islington, the president-elect, Mr. Frost, presiding. The Finance Committee reported that they had elected Mr. Howard Taylor chairman. The balance in hand is £62 9s. 2d., and subscriptions outstanding £10 10s. Accounts for payment to the end of the year amount to £36. It was resolved that the secretary be empowered to take steps for the collection of subscriptions outstanding after January 1, 1908.

The Editing Committee reported the election of Mr. Ibbotson as chairman. They had granted prefixes to Messrs. Briant, Carter, Scarth Combe, Harvey Foster, A. Johnson, and Measures. They recommend no alteration in the conditions of entry for Vol. XXV., and that the Herd Book for the coming year be again printed by the Wilts County Mirror Company. They arranged to meet at Derby on February 10, 1908, to receive the entries for Vol. 24. Report was adopted.

The council confirmed the resolution passed at the annual meeting that on and after January 1, 1908, the charge for registering a prefix and affix should be £1 0s.

With regard to the resolution for classes for boars under eighteen months, it was agreed to give the prize money for those classes, as the R.A.S.E was giving the prize money for the classes of the same age.

Nineteen new members were elected.

The report of the special meeting of the editing Committee, called to consider Sir Oswald Mosley's protest against the entry at several shows of Mr. F. W. Gilbert's boar, Mickleover Monster, was read. After hearing considerable evidence they were reluctantly compelled to decide that the protest was sustained.

The next meeting was arranged for Wednesday, March 4, 1908, at the Bingley Hall, Birmingham.

For Sale.
PRIZE BRED POLLED ANGUS COWS, BULLS, and HEIFERS.
Finest Strains. Inspection Invited.
GEORGE HOYLES,
Skidby Manor, near Hull.

GEORGE HOYLES
SKIDBY MANOR, HULL.

Breeder of Pure Lincoln Long Wool Sheep.
Lustrous Fleeces. Good Constitutions.
SUITABLE FOR HOME AND ABROAD. STOCK FOR SALE.

Sale of Lord Durham's Fat Stock.

The sale of the Earl of Durham's fat stock at Bowes House Farm, Fence Houses, near Durham, on Monday, attracted, as usual, a very large number of buyers, for his lordship's stock enjoys a reputation which long since established his sale amongst the front-rank gatherings of the kind in the North. The reputation was fully maintained, for a close and critical inspection of both cattle and sheep led to nothing but favourable comments on their condition from those best qualified to judge. Included in the cattle were four beasts which were shown by Lord Durham at the recent Christmas shows at York and Leeds, and all of which took honours in their class, and these were the objects of much admiration, followed later by spirited competition in the ring, where they brought the top prices of the sale.

There were West Highland steer and a black Angus steer, both of them first in their classes at York and Leeds, for which, after keen competition, the representative of the West Stanley Stores became the purchaser of both at £42 10s. and £45 respectively. Another prize-winner, a blue-grey heifer, was sold to the buyer of the Chester Stores for £30; whilst a fine black cross-bred steer, second in his class at York, was knocked down for £38 10s. to Mr. Graham, of Colliery Row, Fence Houses.

The Shorthorn steers numbered twenty-two, and were an all round useful lot, which varied in price from £27 15s. for a grand roan down to £20 5s. The total realised for the lot was £524 5s., which worked out at an average of £23 16s. 9d. Following these were ten Shorthorn heifers, a smaller lot, which brought £19 17s. 6d. all round, the total being £198 15s.

The blue greys, a lot of solid-looking "all-beef" animals, brought good average prices, both for steers and heifers. The steers, twenty-one in number, averaged £21 15s. 9d., and the heifers, a lot of twenty-four, a trifle over £22 8s. The "kylies," always a favourite section from their shaggy heads and solid looks, also did well, the steers averaging over £20 and the heifers over £18 each. The total for cattle, which excepting the special beasts, were computed to have brought from 8s. to 8s. 3d. a stone all round, was £2,332. The sheep brought capital prices all through, and it was estimated that the average price of mutton was about 9d. per lb. The grand total was £3,466 5s.

SOCIETIES.

The Royal Lancashire Agricultural Society's New Headquarters.

The new headquarters of the Royal Lancashire Agricultural Society—Derby House, Winckley Square, Preston—were opened on Wednesday by the Earl of Derby in the presence of a large and representative gathering of agriculturists and others. Derby House is a substantial building, providing accommodation which was sadly needed for the secretarial staff, and it affords a becoming residence for the secretary, who is a tenant so far as his residential portion is concerned. There was a pleasant little ceremony at the opening. Mr. White presented the Earl of Derby with a gold key to admit the council and friends invited to the ceremony, and Lord Derby, in opening the door, wished the society success, expressing intense appreciation of the fact that the house was to be named Derby House.

Luncheon was then served in what will be the future council room, and about seventy sat down. These included the Earl of Derby, who presided, Sir Gilbert Greenall, the Lord Mayor of Liverpool, the Mayor of Preston, and the Mayor of Bolton.

After the loyal toasts had been honoured, Mr. Harcourt E. Clare submitted "The House of Stanley." Lord Derby had, he said, shown in the management of his estates an example to every landowner in the country. If the large estates of the land were managed like those of Lord Derby, and men in his position recognised their duties to the public as he and his family did, we should have heard very little of Socialism, which was the outcome of a deep sense of injustice at the abuse of power and the neglect of the wealthy to take their share in their responsibilities to the public, and to assist and alleviate the sufferings of the poor. With regard to Lord Derby's family's association with that society, an ancestor of his presided at a meeting in 1767 of a society from which the present society sprang.

The toast was drunk with enthusiasm.

Lord Derby, in acknowledgment, said that it had always been the hope of his family to be thoroughly identified with the interests of the great county with which they were associated. Referring to the red rose which had been presented to him, he remarked that the Red Rose was the tie which bound them together, and it was something nearer and dearer than a tie merely of interest or acquaintanceship. It was very well expressed by the remark of a farmer who welcomed him back on his return from Canada with the words, "For 200 years our families have been together, and never a scrap of paper." It was a homely expression and a sincere one.

His lordship spoke highly of Mr. Bohane's work for the society, and then brought to the meeting's notice the claims of the Royal Agricultural Society of England in Lancashire. He explained that owing to deaths and other causes the number of Lancashire members had been much diminished. He could understand that for a period not long ago there was hesitation to hold membership, but now the policy of reverting to the old country meetings had proved so successful he would ask Lancashire agriculturists to allow their names to be put forward as members of the Royal Agricultural Society, which carried with it many privileges, and would justify them in having delegates on the council who could claim the attention from the National Society which the county deserved and which, no doubt, it would receive from its most excellent representatives.

Mr. G. Norris Midwood proposed the "Town and Trade of Preston," to which the Mayor replied, and then followed the presentation by Lord Derby of the Honorary Life Vice-President membership of the society (enclosed in silver caskets) on the Mayor of Bolton and Mr. C. E. Linaker.

Mr. White proposed "The Visitors," and explained that the occupation of the new premises was really very little additional cost to the society. He expressed the universal regret at the absence of Mr. Windham Hale, and also of the Lord Mayor of Manchester, expressing the hope and belief that the society would have a successful show at Manchester next year. He coupled with the toast the names of the Lord Mayor of Liverpool and Sir Gilbert Greenall. Of the latter he said he had done much to improve the agriculture of the country, and had restored prosperity to the Royal Agricultural Society of England.

The Lord Mayor of Liverpool replied, and Sir Gilbert Greenall, who had quite a demonstration on rising to reply, paid a tribute to the great work, Mr. Bohane, the secretary of the Royal Lancashire Society, had accomplished. Referring to the Royal Agricultural Society and its success in such a purely rural district as Lincoln, he said it spoke volumes for the future of agriculture and the increasing interest taken in pedigree stock. When the Royal show visited that part of the world—which it desired to do in the near future, with their help—it hoped to put before the public such an exhibition as would outrival anything done in the annals of agricultural shows. That should be to the mutual advantage both of the Royal Lancashire and the Royal Society. There ought not to be a falling off in the membership of the Royal Society of England in a county like Lancashire. The Royal trusted that in its next visit the County Society would be at one with it, and that both would work together.

On the motion of the Earl of Derby, the health of the secretary, Mr. Bohane, was heartily drunk, and this concluded the proceedings.

Prior to the opening ceremony a meeting of the council of the society was held, at which the secretary announced the gift of an engraving of His Majesty the King, to which the Royal autograph had been graciously attached. The picture had been given by Mr. Philip Park, and was placed in the new permanent abode of the society behind what would be always the seat of the chairman. On either side of it are the portraits of the Earl of Derby and the late Earl of Lathom.

The business was mostly formal. Mr. John White was re-elected chairman, and Mr. Windham Hale, whose unavoidable absence was much regretted, vice-chairman of the council. Mr. Richard Webster, who has done yeoman service for the society in many capacities, and especially on the Showyard and Works Committee, was made deputy vice-chairman and ex-officio a member of all committees.

Glasgow.

The Glasgow Agricultural Society met some time ago to consider its financial position in view of a proposal to wind up its affairs. A scheme, as reported in these columns at the time, was then suggested by Colonel Mackenzie of getting the debenture-holders to waive all claims for past and future interest, on the understanding that the directors would pay as dividend from time to time what the society could afford. At a subsequent meeting Colonel Mackenzie reported that the great majority of the holders had fallen in with his scheme, and he asked a postponement to allow him to get into communication with those standing out. The adjourned meeting was held in Glasgow on Wednesday, when Mr. John Watson, the secretary, in the absence of Colonel Mackenzie, reported that all the debenture-holders, except those representing about £300, had agreed to the scheme. Only one holder, representing £100 of the total, had refused definitely to accept the scheme. Mr. James Rodger, Keir Mains, Dunblane, who presided, said that after hearing that report it would be inadvisable to rush into the idea of winding up the society. It was agreed to adjourn the meeting till January 8, when a further report will be submitted.

Thereafter the annual meeting of members was held. Mr. W. Watson Murray, Catter House, Drymen, presided. The annual report, which had been printed and circulated, dealt with the financial position, and the scheme discussed at the adjourned extraordinary general meeting, and contained the announcement that the annual stallion show had been fixed for February 4 and 5, and the summer show for May 6 and 7.

The chairman moved its adoption. Referring to the extraordinary general meeting, he said he thought Colonel Mackenzie's scheme would be carried through successfully. They had heard a great deal about the financial position of the society, but he was one of those who were extremely hopeful that the arrangements that had been almost completed with the debenture holders, would result in the affairs of the society being put upon a very much stronger financial footing.

The report was adopted. The Duke of Montrose was re-elected president, and Lord Newlands and Sir Hugh Shaw Stewart were appointed vice-presidents, whilst Mr. John Watson was re-elected secretary and treasurer.

Highland.

The 1908 show at Aberdeen was one of the chief topics discussed at the last meeting of the directors of the Highland and Agricultural Society. It was reported that the prize money offered from the society's funds for the show would be allocated as follows:—Cattle, £818; horses, £771; jumping, £149; sheep, £440; swine, £94; poultry, £170; dairy produce, £30; medals, &c., £20; forestry, £20; and Prince of Wales' gold medals; total, £2,512. This sum shows an increase over the Aberdeen 1902 show of £133, but a decrease from Edinburgh 1907 show of £493.

The committee recommended, and it was adopted, that the very highly and highly commended awards should remain as at present, but that the judges be allowed to give as many commended awards as they thought the classes deserved, thus bringing the awards into line with those of the Royal.

It was reported that the milk records committee had considered the movement in Ayrshire for the setting up of an independent body for conducting separate milk records among Ayrshire cattle. The proposal was to transfer the work to the Ayrshire Cattle Herd Book Society. The representatives of the Ayrshire Society had met the committee of the Highland and Agricultural Society, and the secretary of the latter (Mr. James Macdonald) had explained that it was an essential condition to the work being handed over that those breeders of Ayrshire who were not members of the Cattle Herd Book Society should be admitted to a voice in the management. That had been conceded very cordially. The proposa was agreed to.

Yorkshire.

The secretary, in presenting his annual report at the Yorkshire Agricultural Society's annual meeting, referred to the Barnsley Show and the local arrangements. He said that no better evidence of the goodwill and energy displayed by that local committee could be given than that Barnsley, with a population of only about 45,000 people, handed over to the society a local fund of £1,318 19s. 1d. The accounts had not yet been audited, but the estimated financial result is a profit of over £200. For the first time in the history of the society the show was held on Thursday, Friday, and Saturday. The idea of keeping the show open on a Saturday was undoubtedly unpopular with exhibitors, but the council felt that owing to Barnsley being a mining district, and the railway communication inconvenient, they must largely depend on the local population, and they were advised that Saturday was the most convenient day. In justice to the railway companies it must be stated that no complaints have been received at the society's office with regard to the return of stock.

The thanks of the society, he added, were due to the Duke of Northumberland, who kindly allowed his interesting specimens of forestry exhibits to be sent. The loss on the sale of timber used in the construction of the buildings was 35 per cent., or 4 per cent. less than that of last year, but 2½ per cent. above the average. The council decided to carry over a part of the timber, of the value of £547 9s. 7d., less £109 10s. depreciation, which is now stored at Barnsley.

The secretary added that the council had decided to revert to the old practice at Halifax of holding the show on Wednesday, Thursday, and Friday. The council had also agreed to hold an exhibition of poultry.

The report was adopted.

Sir Savile Crossley was elected president for the ensuing year, whilst a cordial vote of thanks was accorded the retiring president, Lord Halifax, who was also elected a vice-president.

A letter was read from Mr. Alfred Rowntree, Field House Dairy, Kirkby Overblow, in which he said he wished the council to consider the weighing and testing of milk. "As you are aware," he wrote, "very valuable work is being done by the Highland and Agricultural Society and others in the south-west of Scotland in weighing and testing milk. We have a large number of dairy herds in Yorkshire, and I think the time has come for something of this sort to be done here if we are to face foreign competition successfully."

The secretary said the council were asked to do something in the same direction by the Agricultural Education Committee. The investigations now being made by the Highland Society as to the cost of the production of milk were of a very valuable and interesting character.

The matter was referred to the council for consideration.

Mr. George Scoby suggested that the council should arrange for a sale by auction of horses, cattle, sheep, and pigs on the second or third day of the show, as at the Royal, remarking that he believed it would prove of great benefit to exhibitors.

The Hon. H. W. Fitzwilliam regarded the suggestion as well worthy of consideration and believed the institution of such sales by the committee would prove very valuable.

The chairman, Lt.-Col. H. F. Dent, promised that the suggestion should receive the full consideration, of the committee, as should also a suggestion by Mr. Dixon, of Leeds, that exhibitors in the Yorkshire honey classes should not be limited in the number of hives shown.

Royal Cornwall.

At the last meeting of the council of the Royal Cornwall Agricultural Association it was decided to hold their next show at Helston on Wednesday and Thursday, June 11 and 12, 1908.

On the recommendation of the committee appointed to revise the schedule it was decided that on the entry forms provision should be made for certificates by exhibitors that the cattle exhibited are entered, or eligible for entry, in their respective herd-books. Viscount Falmouth is to be asked to alter the description in his special classes for Devon bulls so as to read "belonging to a resident Cornish tenant farmer," and in the heifer class "bred by and the property of a Cornish tenant farmer." The value of prizes for Guernsey and Jersey cows is to be increased.

In the sheep department there is to be a reduc-

tion of two classes for other Longwools than South Hams, those to remain being for rams of any age and pens of three yearling ewes. The prizes for yearling South Ham rams are to be advanced.

Regarding the offer of the president (the Duke of Leeds) to give £10 for special prizes, Mr. C. Rows moved, and it was carried, that this sum should be devoted to crossbred dairy cows or heifers, the property of Cornish tenant farmers. Seeing that the dairy industry had been given so much attention lately, and that it was one of the most remunerative departments of agriculture, they should do their best to encourage it.

In the horse department, the alterations included the addition of a class for two and three-year-old harness horses, to be led or shown in hand, and an addition was made to the prizes in the pig class for sows of the Black breed farrowed since 1904.

The regulations were altered to the effect that all animals exhibited must be the *bonâ-fide* property of the exhibitor at the date of entry, and it was also agreed that provision be made for weighing riders, there having been in the past, said Mr. J. de Cressy Treffry, considerable wrangling, a great deal of trouble about weight in some of the jumping competitions, and there had been unpleasantness between competitors on occasions because some had not carried the weight specified.

Regarding remounts, the committee recommended that there should be classes for cavalry horses, draught horses, and cobs on the second day of the show, and that the association should offer in prizes a similar amount to that which might be offered by the Government, who would probably offer from £5 to £9.

Mr. J. de Cressy Treffry said that the officer in charge of the Southern Command thought Cornwall would be a good recruiting ground for horses, and favoured the introduction of classes such as were recommended. The horses should be from four to six years of age, undocked ones would be preferred; but light, mealy-coloured horses were not required. Cobs should be able to carry 14 stone, cavalry horses 16 stone, and draught horses should be active, fit to carry a man postillion, trot with a load, and gallop upon favourable ground. Prizes would be withheld unless the total entries was ten. The remount officer attending the show might claim cavalry horses at prices not exceeding £40, draught horses £42, and cobs £30.

The Lancashire Federation

The annual meeting of the Lancashire Federation of Agricultural Societies, which now embraces thirty-three agricultural societies in Lancashire and the West of Yorkshire, took place on the 12th inst., when there were present the representatives of five important Cheshire societies, namely, Wirral and Birkenhead, the Cheshire, the Mid-Cheshire, Altrincham and Adlington Societies, and these are to be added to the federation if rules can be agreed on.

Sir Lees Knowles proposed that the above societies be accepted as members, but said that it was necessary, in order to have a complete federation of the societies of Lancashire and Cheshire, that the rules should be revised. They were at present framed on the one-day show system, and some of the societies that wished to join held two-day shows. The Cheshire and the Adlington societies had agreed to the rules, but Altrincham, Wirral, and Mid-Cheshire desired that certain amendments should be made. He proposed that the rules should be referred to a sub committee, consisting of two members of each of the five Cheshire societies and two of the Lancashire Federation. The committee would have to consider the question of proportionate representation and voting powers, according to number of members or the value of the money prizes awarded. It was also suggested that there should be the maximum representation on the Federation Council, and the societies' representatives should be nominated by name. Subject to an agreement the Cheshire societies were willing to join.

Mr. E. G. Parkes confirmed Sir Lees Knowles's statement.

Mr. Thompson suggested that the name of the Federation should be Lancashire, Cheshire, and Yorkshire. The Yorkshire societies joined without asking for any privileges, and conformed to the whole of the rules in force at the time.

Sir Lees Knowles thought that to add Yorkshire would be a large order at present. He moved the formation of the committee as indicated, and Mr. E. G. Parker seconded, and it was carried.

On the motion of Mr. Kenworthy, the Radcliffe May Day Society and the three Cheshire societies were elected members, the latter subject to the revision of the rules.

The name of the Federation was also changed to the Lancashire and Cheshire Federation of Agricultural Societies.

The annual report, presented by Mr. Birtwistle, was very satisfactory, and, on the motion of the chairman, it and the balance-sheet, which showed a nice credit balance, were adopted.

The Mayor of Bolton proposed the re-election of Sir Lees Knowles as president, and this was seconded by Mr. T. Thompson and carried with applause. Sir Lees acknowledged the honour of being elected president a second year in succession. The previous presidents had been the Earl of Derby, the Earl of Ellesmere, and Mr. Victor Cavendish.

Mr. Edward Boham, secretary of the Royal Lancashire Agricultural Society, was re-elected vice-president; Mr. Hodgkinson, of Chorley, chairman; and Councillor Hargreaves Murphy, of Padiham, vice-chairman, whilst Mr. Birtwistle was re-elected secretary, and heartily thanked by the meeting for his devoted services.

AGENTS, SITUATIONS WANTED.

WANTED, AGENTS for the SALE of NATURAL Ammoniacal and Phosphatic GUANOS and hi.hclass Chemical Manures. All analyses and dry condition guaranteed.—Apply to DANIEL DE PASS & CO. 1, Fenchurch Buildings, Fenchurch Street, London, E.C.

Seasonable Topics.

Diaries. ON the table before us as we write there are two books—one full, and the other as yet unwritten in. They are diaries, and while one contains records of the daily events on the farm during the past year, the other is intended for the same purpose in 1908. The filled book is about to be put away on a shelf by the side of a number of others belonging to past years, but this does not mean to say that it has served its purpose and will be needed no more. On the other hand, these old diaries are extremely useful for the purpose of reference, and are frequently appealed to when points of argument need settlement. We know, of course, that many farmers keep no records of their work, and yet jog along all right, but we recommend a diary all the same, because apart from any utility value it is interesting to be able to turn up the records of past seasons and see how they compare with the one that is present. We strongly recommend young farmers to keep diaries, as it is a useful means of education. While one is a learner or probationer, there is someone else to organise and take the responsibility, but when the young farmer comes to have a place of his own, and has to think and act for himself, he will find no reference books more useful than the diaries he kept (if he did keep them) during the years that he occupied a position as a learner. The cost of a diary is trifling, the keeping of it is merely a matter of habit, and the facts that are recorded in the book from day to day may prove to be interesting, useful, perhaps even valuable in the future.

The Cost of Ploughing. ON one of the few fine days we have enjoyed of late we journeyed some miles through an arable country, and noticed the various ploughing operations as we passed along. Ploughing here, there, and everywhere; it would appear as if there was nothing else to do, but the general anxiety to be getting on with the work was evidence of the extent to which it has been delayed owing to the excess of moisture. In one field we noticed a couple of horses doing the work, nor did they appear at all distressed, but a little further on there were three drawing a plough of similar character, and they seemed to be working harder. Still further on, the ploughing teams consisted of four horses, and before the end of the day we discussed ploughing with a farmer who has to employ five horses for the operation. This was all within the limits of one county, and showed the various degrees of stiffness in regard to the soil; but, as the five-horse team man pointed out, how much more his arable crops cost him to the acre than in the case of the individual who can plough comfortably with a pair of horses. Just so, and it is well to allow for these differences when changing farms, and calculate accordingly, for the more horses that are required for ploughing and other cultural operations, the heavier, of course, is the labour bill. One may easily go wrong in overlooking these calculations and thinking that the stiff land farm can be worked with the same horseflesh as the one where the medium is more easily worked.

Drains. ONE thing that every farmer ought to know is just exactly where the drains are on his land, supposing the latter is drained, and it is a part of his duty to see that the mouths of the above are kept open and clear, so that they can properly perform the functions for which they are intended. In the first place, as to the location of drains, there are scores of cases in which no plan or record was ever kept when they were put in, and unless there happens to be an old labourer about who helped to put the pipes in, nobody knows anything at all about them. A case of this kind came before our notice recently, when the soddened state of a field known to be drained made it desirable that the pipes should be examined, but in the first place, they had to be found, and this object was effected after a considerable amount of guessing and the spending of time in digging useless holes that might have been avoided had a proper plan of the drains been kept. Then as regards attention to drains, this wet autumn has found out the defaulters. The pipes are out of sight; too often they are also out of mind until a time of excessive rain comes, and the water is not carried away. By keeping the mouths of main drains clear one can always tell whether there is any obstruction, but for the want of giving timely attention to the above matters, many drains have ceased to be of any use, and the farmer suffers through the ills that are the direct result of land being sour and waterlogged.

A WINTER WOODLAND SCENE.

A Sigh for Frost. IF there is any truth in the old adage that a green Christmas makes a fat churchyard then the sacred enclosure should stand a chance of "swelling wisibly," as Sam Weller would put it, but experience seems to show that churchyards are not affected much by the greenness or otherwise of Christmas. Nevertheless a spell of frost, if it were not too long and severe, would do a lot of good just now. It would clear the air and invigorate one's energies, for there can be no doubt that long spells of rain and gloom have depressing effects on human feelings. And apart from personal impressions yards are bunged up with manure which it is impossible to get out if one is unable to utilise the King's highway. Dung carting is essentially work for frosty weather, because under these conditions the strain on the horses is reduced to a minimum, and one has the satisfaction of knowing that roads and turf are not being ruined by the sinking of the wheels. Again farmers have stuck to the ploughing of stubbles, very often where natural conditions were most unfavourable, but with the hope that when frost came the turned up ridges would be exposed to its beneficial influences, and a good tilth for later sowing would be obtained. Just so, and now the land is ready we wait for the frost. We not unusually get a pinch in January, but even now our expectations are to be realised.

The Appearance of Wheat Crops. THE problem in the autumn was how to get the sowing done, and the calculations of many a farmer was upset by the perversity of the weather, but nevertheless, by hook or by crook many managed to get this sowing done, and considering the conditions under which a good deal of need went in, the results are so far better than one might have expected. We have seen a good many pieces of wheat of late where the seed germinated well, and there is a good plant now discernible in the rows. The growth looks very green and tender, but this appearance would be quickly changed if we happened to get a sharp pinch of frost. On the whole, however, those farmers who took advantage of their opportunities and were able to get their wheat in fairly early, have no

reason to complain of springing corn as it stands in the rows, and given fair conditions between now and the spring, the outlook is promising.

Starting Afresh.

DIFFERENT localities have different customs, and in that famous milk-producing district which comprises parts of Staffordshire and Derbyshire, farmers find themselves without servants from Christmas to New Year's Day, for this is the one week in the year that the lads and lasses claim as their own. Years have passed since we first knew the above district and the conditions of farming have almost entirely changed from cheesemaking to milk selling. Female labour in the homesteads is not half what it used to be, but true to the traditions of their forebears, the farm lads shoulder their bundles and trudge off on Christmas morning. Perhaps they are leaving and seeking service elsewhere, or they may be "stoppin' agen," which means that they have agreed to another year's service, but in any case Christmas week is their own to do as they like and spend in their own way. Nor does time hang heavily, for the holiday week is the season of "Gaby's Markets," as the hiring fairs are called, and though the actual hiring is small compared to what it used to be, the inevitable showman caters for the amusement of his clients and gets a fair share of the hard-earned money of the farm lads. On New Year's Day you see them going back to the old places or starting afresh at new ones, less merry than they were a week before, and lighter, of course, in pocket, but with a sense of satisfaction that they have had a good time and after another year on the mill the holiday week will come round again.

Agricultural Politics.

BY A LOBBYIST.

A Fine Type of County M.P.

I do not know that Colonel Alan Gardner, the dead M.P. for South Herefordshire, can altogether be described as an agricultural politician—he did not definitely associate himself with the Pro-Agrarians. As, however, a brother of Lord Burghclere and a son-in-law of Lord Blythe, he had distinct affinities with the agricultural interest. With Lord Blythe's anxieties and ambitions he was known to be in close and intelligent sympathy. Between the two, indeed, there was a bond of generous personal comprehension that must deepen the heaviness of the affliction which has fallen upon his lordship. The colonel was—I am, however, not dealing with his political professions—an ideal county member. A sportsman—in this field he had a national reputation, loving the open air and all that belonged to it, knowing enough of farming to be able to interpret its purposes with practical sympathy, anxious to revive village life by associating with it an attractiveness which should prostrate the more lurid allurements of the town; he could play the *rôle* of the country gentleman with native grace and unaffected hospitality. Had the Liberal representation of the counties always this type of fine-hearted personality—you cannot, of course, always have so much picturesque and sporting hardihood in your politician—associated with it, not a few of those who now denounce it would be half reconciled to the faith. Colonel Alan Gardner was in many things the personal and political antithesis of not a few of those who wear the garb he carried with such personal distinction.

* * *

The Housing Bill and the Villages.

One of the unsatisfactory features of the political situation is the comparative indifference of the villages and of rural organisations to the forthcoming Housing Bill. This indifference is unhealthy. That that measure will vitally affect the villages is evident from two incidents. The first is that at the many conferences on housing which have been recently held under the auspices of pseudo-philanthropic (but really political) organisations, great stress has been placed on the necessity of the new policy applying to the villages. Ere Dr. Macnamara, the Secretary of the Local Government Board, accepted office, he made this one of two most insistant demands; and the Local Government Board will be the parent of the measure. The second incident is that Mr. John Burns, in seeking material on which to base his measure, has made frequent excursions into villages, where he has conducted investigations with his characteristic independence and keen-sightedness. How then will the villages be affected under the Bill? Will there be a coercive power, as in the case of the Small Holdings Act, brought to bear upon rural councils, district councils, and county councils, who, fearing the expense of the new policy, may hesitate to act? If there is to be a power, will it be invested in a bureaucratic executive, acting through the agency of travelling inspectors? Will those inspectors themselves be compelled to put themselves into motion if a few of the discontented villagers appeal to them? What are to be the powers of borrowing? Over what period is repayment to be extended? What will be the rate of interest? Will the rent demanded be of a practical and paying character, and relieve the local authority of the fear of the policy being a continuous burden on the rates? Will the cottager be allowed to pay a rent sufficient to finally yield him the destinction of ownership? These are questions of vital moment to the villages. I pray they be no longer neglected.

* * *

Small Holdings and the New Economy.

There is one point in Mr. W. J. Malden's excellently designed letter in your issue of December 16 to which I should like to recur. "Farming," quothed he, "ruined wholesale by Free Trade, will not be rescued retail by small holdings. When the seam of theory pervading small holdings has passed away, and the matter has been tested, it will not be found that small holdings have solved the problem of the land, unless there is security given to the small holder that he has not to combat the foreigner on the terms at present existing." Well, I am one of those who refuse to believe that under any conditions small holdings would be a universal agrarian panacea. We do not cure earthquakes with a Morrison's pill. We may be small holdingsites without believing they will banish economic pneumonia as well as economic gout. Is it, however, even pretended that this new scheme will enable "the small holder . . . to combat the foreigner on the terms at present existing?" The small holder will be a food-producer. "It is," undeniably declares Mr. Chaplin, "no part of the policy advocated by Mr. Chamberlain or Mr. Balfour to increase the price of food." But, will be the retort, the suggested import duty will not raise the price of food. Both the Chamberlains *père et fils* have, however, emphasised that this price-of-food fear is simply a bogey, and that, even if the new economy does raise the price of food, it will enable the worker to enjoy a higher standard of life because of his enhanced wages. Hence we have it that the new economy may raise the price of food. Mr. Balfour, however, bluntly says—and the Marquis of Lansdowne agrees—that any tax must be an infinitesimally small one, and that it must press with the least possible effect on the great army of food-consumers, the workers. Wherein, then, will there be such a security for the small-holder—the food producer whose food products will be in many cases raw material, which under Mr. Balfour's scheme is really to be un-taxed—as will enable him to successfully combat the foreigner?

* * *

Can We Compensate the Farmer?

The mere fact is that the Tariff Reform meditated by Mr. Balfour is not the Tariff Reform desired by its advocates among the farmers. Mr. Malden's letter—the most lucid exposition of the farmers' case which has yet appeared in the MARK LANE EXPRESS—is a significant illustration of this. "I do not suppose," says he, "that farmers, as a whole, mind particularly how they get it, if they get their industry to be regarded." But is their industry to be regarded? "I cannot see," pursues Mr. Malden, "why 'Lobbyist' should take it for granted that if Britain enters into business transactions with her colonies she is bound to make a bad bargain." Neither do I believe that *Britain* is bound to make a bad bargain. But a concession has to be given to the colonies, and that concession is to be at the expense of the agrarian industry. The colonies have to be bribed to give a favoured position to British industrialism in her markets; and the only possible bribe under existing conditions must be at the expense of the British food-producer. My objection is not to Protection as a principle. My objection is to the sacrifice of the British farmer in order to make a joyful holiday for urban industrialism. Is it possible to prevent even the possibility of this danger? Is it possible to so frame an economic scheme of Preference that the British farmer shall be placed under conditions which shall mean the safeguarding of his own markets? I put this last question—if the colonies can send us wheat at 10s. per qr. less than they do now, will it be any consolation to the ruined British wheat grower to be told that, after all, his foreign competitor has been rebuked? I am also not arguing—I beseech Mr. E. Belcher to heed this point—against Preference as a principle, I am arguing against Preference as a possible penalty of one class only, and that class the farming class.

* * *

Why Not a Separate Economic Concession?

Let us indulge to the full in our patriotic ideals of a welded Empire, but can we rid the realisation of this ideal of the prospect of a penalty to the farmers? Can we not if you will in some way compensate the farmer for his possible exploitation. I admit, to use Mr. Malden's phraseology, "it is not the colonial statesmen who are going to settle this matter; they will only get what we give." Let us not, however, forget that the recent brusque non-acceptance of the Colonial conditions has been denounced as unpatriotism, and that it has been propounded as a first duty of British statecraft to give the most sympathetic and maternal reception to those conditions. The first anxiety of maternity is sacrifice for its offsprings. And remember that the ambition of those offsprings is the possession of the British produce-markets. Can we wisely encourage our offsprings? Can we wisely rebuke the foreigner, whilst safeguarding ourselves? So far from asking the farmer to be acquiescent in modern conditions—to lie more quiet from fear lest he be hurt, I am asking him to see that those conditions are fair to be himself. A sacrifice may be necessary to save the colonial markets for British urban industrialism; but if it is to be the farmer, it is at the least the duty of friendly publicists to see that he only accepts the penalty with open eyes. If the penalty is inevitable cannot—this point I place before our prescient friend, Mr. Malden—the new economists consent to some compassionate compensating State-concession? Why should not the British farmer be regarded as deserving of distinctive treatment? This is not beyond the possibility of statesmanship. This distinctive treatment might remove all objection to a policy of tariff-reform based on a policy of colonial preference.

* * *

Is the Girding Necessary?

Frankly, I must confess that the promulgated intentions of the Government for the next session are Gargantuan in their character. Should, however, those intentions be sneered at and jeered at even by a critic who assumes the *nom-de-guerre* of "Wamba"? True, a gentleman adopting this description may deem himself entitled to wear the motley. Is it well, however, when the vital interest of the calling of which I am sure he is an honoured member, may be at stake? My epitome of the intentions of Earl Carrington and Mr. Burns was due to none of the mystic power possessed by a well-rubbed Aladdin's lamp. They were due to the statements made by these statesmen during the three or four days preceding the publication of my article. I suppose that the original "Wamba" hadn't the opportunity of reading newspapers. It is, however, unwise on the part of his descendant to simulate the ignorance of his forbear. And, after all, is the anxiety of Earl Carrington—I leave alone Mr. John Burns—to introduce a Milk Bill, to deal with the horse-breeding problem, and to relieve the burdens on agricultural land worthy this Wambaesque girding. "Wamba" may not agree with the Land Tenure Act; he may belabour the Small Holdings Act, though Mr. Chaplin thanked its author for it.

FARMING IN 1907.

Farmers have experienced distinctly better times during the past twelve months. The season climatically has not been a favourable one, but what is more important, prices for all descriptions of farming produce with the exception of beef have left a bigger margin for profit. The year opened very variable, and all farming operations were in a forward condition in the spring time. Easter itself was most remarkable for brilliant weather, but this foretaste of summer was extremely short, and wet and cold alternated until September, which at all events in the South of England did a good deal to redeem the harvest from total loss. In the North, however, crops were not secured in such good condition, and on high-lying farms much of it was rendered absolutely useless by rain and snow.

The Price of Wheat.

The salient feature of 1907 has been the continued and maintained increase in the price of wheat. The growth in values has not been confined to any particular variety, but has covered all milling sorts. The increase, which as far as one is able to judge will go on during the immediate future, is attributed to the increased consumption of bread and the growth in the population of bread-eating peoples, and here undoubtedly is the crux of the situation.

The area devoted to wheat it is true has been expanding, but its growth has not kept pace with the increase in the population of the world. The cause of the low prices which ruled during the nineties was the bringing into cultivation of the immense areas of virgin soil in the United States. These areas are now beginning to lose some of their accumulated fertility, and it is found necessary in order to maintain the bulk of their produce and a fair yield to adopt a system of farming more akin to that with which we are accustomed in this country, and to drop the plan of continuous wheat cropping which was the general practice a decade ago.

Another feature of the American situation is the enormous growth of the population in the United States. Many of the most reliable authorities in America state that within the next few years the United States will cease to be an exporting wheat nation. There are still large areas suitable for wheat growing in Canada to come under the plough; but, on the other hand, we are assured on reliable authority that the use of bread is spreading in the Far East to such an extent as is not realised in this country.

In Japan the use of wheaten bread has become popular during the past few years, and we understand, and the source of our information is the Chinese Embassy, that the way in which the Chinese are taking to wheaten bread is remarkable. In fact, the Chinese authorities are, we believe, making considerable inquiries on an experimental farm outside Pekin with a view of ascertaining the best varieties of wheat and other cereals to cultivate in their fertile alluvial soil.

The values of English wheat and flour have progressively grown during the year. At the end of last December the Imperial average price of English wheat per quarter was as low as 26s., and this discouraging figure was continued until May, when prices jumped up 2s. 9d. per qr. This figure continually increased until the beginning of November, when there was a slight relapse, due in great measure to causes outside the wheat market. The poor condition in which the corn reached the markets, together with the financial troubles all over the world, led to the depression of values, but this temporary relapse was foreseen by many in the trade, and it is the general opinion that the check is only a temporary one, and with the turn of the year we shall find that the market will again become stronger.

The figures relating to the price of flour are equally significant and eloquent of the rise in values. The basis upon which we have constructed our table is by taking the London top price for the end of each month, and it will be seen that there is an increase of 9s. per sack of 280 lb. during the past twelve months.

The table below will show the fluctuations during the year, and will serve as an excellent guide in forming an opinion as to the present state of the market.

Prices of English Wheat and Flour.

	Wheat, per qr.	Flour, London top price per sack of 280 lb.
	s. d.	s. d.
December, 1906	26 0	28 0
January, 1907	25 2	28 0
February ,,	26 10	28 0
March ,,	26 8	28 0
April ,,	26 10	28 0
May ,,	29 7	31 0
June ,,	31 2	31 0
July ,,	32 11	31 0
August ,,	33 10	31 0
September ,,	31 8	35 0
October ,,	35 9	38 0
November ,,	34 7	37 0

The future prospects in the wheat and flour trade are much brighter for the English farmer. On all hands it is pretty generally admitted that values are likely to go still higher, and that once again it is the turn of the arable farmer as compared with the live stock feeder. The low values of the nineties, as far as it is humanly possible to foresee, will never return. It may be that farming in England will again become a profitable industry, and the general increase in prices will put a stop to the outcry against rural depopulation. As to the effects of dearer bread on our great cities and towns we need not enter here, but the substantial increase in the price of food must greatly affect the industrial position during the next few years.

Crop Areas.

There has been a decrease of 22,645 acres in the area under crops and grass as compared with last year. The acreage under wheat continues to get smaller, and this year denotes a further shrinkage of no less than 130,208 acres; barley has been sown on 39,072 fewer acres than in 1906, and rye has decreased by 3,597 acres, but oats continue to grow in popularity and show the big increase of 80,010 acres.

Increased acres are to be noted in peas and beans, the latter being grown on 20,870 more acres than in 1906, whilst peas have increased by 12,159 acres; but there are big decreases in potatoes and turnips and swedes, potatoes being 17,000 acres less than in 1906, whilst the acreage under the other two crops has fallen away to the extent of 27,889 acres.

Mangolds, on the other hand, show an increase of 18,600 acres, and now cover 450,063 acres, whilst kohl rabi, cabbages, vetches and tares, and lucerne all show increases.

Clover and rotation grasses for hay occupy 2,250,371 acres, and not for hay 2,240 657, the former being an increase of 58,784 and the latter a decrease of 8,502 acres, whilst permanent grass covers for hay shows an increase of 151,928 acres, and not for hay a decrease of 118,419 acres when compared.

Produce of Crops.

The estimated yields of the various farm crops afford a very fair opportunity of forming an opinion as to the farming position. Wheat yielded rather less than a year ago on a substantially decreased acreage, but the estimated yield of 33⅜ bushels to the acre was about 2½ bushels over the decennial average. Barley was a slightly larger crop per acre than last year, and much better than the usual average, while the yield of oats is estimated at no less than 43 bushels to the acre, as against 40 last year, which in its turn was slightly over the average.

Beans yielded at about the usual rate, but the crop was a larger one owing to the increased area, but peas, on the other hand, whilst above the average, were hardly so good as last year.

Potatoes have proved a most disappointing crop in more ways than one; the keeping qualities of this year's tubers are poor, while the yield was not only less than last year, but considerably below the average.

The farm root crops have generally been favourable; roots are not very large, but their feeding qualities are excellent and above the average. Turnips and swedes have not yielded quite so heavily as last year, but they are distinctly above what is the usual crop. Mangels have done better, and show an improvement on last year and the ten years average, giving nearly 20 tons to the acre.

The hay crop, although variable, was generally a heavy one, and gave a much greater weight than a year ago; much of it was, however, of poor quality, and it will need other foods in addition to it to bring up its feeding value. Hay from permanent pasture is estimated to have yielded at the rate of 27¼ tons to the acre, which is over 3 tons above the expected weight, and altogether the excess of the hay crop from permanent pasture only is over 1,300,000 cwt. more than in 1906. Clover, sainfoin, hay, &c., gave nearly 33 tons to the acre, and was just about as much in excess as that previously mentioned; the all-round increase in this crop is estimated at over 500,000 cwt. The following table throws an interesting light on our crops, both as to area and produce:—

Acreage and Yield of Principal Crops.

	Acres.	Produce.	Yield per Acre.
		qr.	bushels.
Wheat	1,625,488	6,901,166	33·97
Barley	1,712,166	7,545,056	35·26
Oats	3,122,936	16,800,265	43·04
Beans	309,761	1,328,669	34·50
Peas	166,138	722,691	29·44
		tons.	tons.
Potatoes	548,921	2,977,910	5.43
Turnips and swedes	1,563,031	22,059,972	14·11
Mangels	450,063	8,935,456	19·85
		cwt.	cwt.
Hay from clover, &c.	2,250,371	3,703,621	32·97
,, ,, perm. grass	4,936,823	6,719,257	27·23

Numbers of Live Stock.

Among live stock, the most striking feature is the increasing popularity of sheep and pigs, for of the former there are 696,143 more than in 1906, and of pigs 313,347 more, but both horses and cattle show big declines, horses numbering 12,274 less than in 1906, and cattle a decrease of no less than 98,337 when compared with last year.

The official figures in 1907 and 1906 are appended, and afford some interesting details:—

	1907.	1906.	+ Increase − Decrease
Cattle	6,912,519	7,010,856	− 98,337
Horses	1,556,407	1,568,681	− 12,274
Sheep	26,116,503	25,420,360	+ 696,143
Pigs	2,636,808	2,323,461	+ 313,347

Meat Prices.

The increase in prices that has been so marked for agricultural produce has not extended to live stock. Throughout the year there has been plenty of grass, but owing to the wet season a great deal of it was only of poor quality. The keen competition from abroad both in chilled meat and cattle landed on the hoof in England prevents any improvement in values.

Beef has been a most disappointing trade throughout the year, and during the last few months, as will be seen from the figures below, prices have been barely maintained. While all other stock have been moving in the markets, beef has remained under a cloud.

Sheep have met with a buoyant trade throughout the year, and store ewes for grazing were eagerly sought after through August and September, and at the end of the latter month

Photo by THE SHEEP FOLD IN WINTER. [*J. T. Newman.*

Some of Sir R. Cooper's Shropshire Lambs Folded on Thousand Headed Kale.

practically every sheep or lamb was caught up with a keenness seldom seen at the fag end of the season at prices up to 5s. more than was prevalent a year ago. Mutton throughout the year generally maintained the level of prices, and feeders of sheep have had a much better season than those dealing with cattle.

The pig trade, almost without exception, throughout the year has been brisk. In the early spring there was a slight decline, and again during the last few weeks prices have been unsteady, but generally there has been good business at fair rates.

The following figures show the prices of beef and mutton at the Metropolitan Market at the end of each quarter, quotations per 8 lb., sinking the offal:—

	Beef.				Mutton.

Animal Diseases.

The health of all farm animals during 1907 as far as those diseases shown by the Board of Agriculture are concerned has been satisfactory. Foot-and-mouth disease, rabies, and pleuro-pneumonia have not made an appearance, and it is to be hoped that the spores of these diseases will not reach our stock by importation. Anthrax, unfortunately, has been rather more prevalent this year as regards the number of outbreaks, while glanders, which largely originates in the towns, spreads to and is the source of considerable loss in the country. Glanderous horses are only too frequently sent from the big towns to the country, and it is extremely difficult to prevent this very contagious disease from spreading. Sheep scab has been more troublesome than a year ago, but fortunately it is nothing like so rife as recently as 1904. Compulsory dipping will no doubt eventually very much lessen if not altogether eradicate the ravages of this troublesome pest.

Swine fever seems to be getting from bad to worse, and already this year there have been 2,250 outbreaks, in consequence of which 10,784 swine have been slaughtered as diseased or exposed to infection. These figures are nearly double the number of outbreaks which occurred last year, and 4,000 more swine are implicated. It is quite evident that the very stringent regulations introduced and carried out by the Board of Agriculture have not only failed to stem the tide of the disease, but have also pressed unduly upon the intelligent pig-keeper who considers cleanliness will do a great deal to ward off swine fever. Lord Carrington, speaking during the Smithfield week, said that he was giving the swine fever orders his personal attention, so that we may hope very shortly a revised code will come into operation which will place pig-keeping upon a different basis.

Pedigree Stock Sales: Cattle.

The demand for pedigree stock by home and foreign breeders has been well maintained this year, and generally good prices have been realised for stock intended for Argentina, Australia, and America.

The Shorthorn has worthily maintained its place as the national breed, and on three separate occasions 1,000 guineas has been made by auction for a bull—viz., at Birmingham, Perth, and Lincoln. First place in the average list falls to Mr. W. Duthie, whose record sale of seventeen bull calves for an average of £409 16s. 3d., with the top price of 700 guineas, will want a lot of beating. Lord Calthorpe at Elvetham secured £91 14s. for thirty-four head, 250 guineas being the top price. The annual series of Riby sales was continued, and Mr. H. Dudding's excellent average of £91 8s. 2d., with prices ranging from 370 guineas, shows how much his fine cattle were appreciated. An excellent average of £90 18s. 1d. was realised by Mr. J. Harris for forty-nine head, several animals making well over the century, and others reaching up to 200 guineas for bulls and 285 guineas for females. At the Earl of Northbrook's sale 325 guineas was made for a heifer, followed by other prices of almost as high a range, and the bulls ranged down from 200 guineas. Another notable sale of very high class cattle was that of Earl Manvers; here fifty-five made an average of £82 5s. 1d., a specially good average for so large a number, bulls ranging from 300 guineas and cows from 250 guineas. The joint sales have been very successful, and at the head of this section stands the sale at the Royal Show with a general average of £87 5s. for 115 head, bulls making up to 1,000 guineas and females to 210 guineas.

For Lincolnshire Red Shorthorns the best average of the year was Mr. R. Chatterton's £43 10s. 4d. for sixty-six head. Several of those sold at this sale went for export, some two or three going to South Africa. Of Aberdeen-Angus there have not been any considerable number of sales. Colonel G. Smith-Grant's average of £40 2s. 4d. for twenty-nine head was the best. The joint sales as a whole gave satisfactory results; at Aberdeen 300 guineas for a yearling heifer, 260 guineas for a two-year-old heifer, and 160 guineas for a bull was realised, and at the former yearling heifers made up to 500 guineas and cows to 200 guineas.

Herefords have experienced a fine demand for export. Mr. John Tudge heads the average list for home sales with one of £41 19s., bulls making 200 guineas and cows 70 guineas. At the March sale at Hereford 105 head averaged £36 15s., bulls making from 130 guineas, two-year-old bulls from 158 guineas, and yearling bulls from 125 guineas. The Devon cattle sales have been very good, Mr. Kidner's herd of fifty making an average of £42 17s. 6d., and Mr. E. Baldock's £27 for forty-eight head.

Among Jerseys, Dexters, and Ayrshires, Mr. Brutton realised the best home sale average of the year, £23 5s. 9d. for thirty-one head, bulls making 42 guineas and cows 64 guineas, the top-priced female of the year, but it was at Dr. Watney's sale where the top-priced bull of the season was found; this animal made 90 guineas. The Ayrshires sold well, as did also the Dexters and Kerries, cows making up to 60 guineas and bulls to 27 guineas.

Horses.

Shire horses have sold well throughout the year, and an encouraging feature is the likelihood of a good export trade developing with South America. The best average of the year was realised at Dunsmore by Sir P. A. Muntz; at this sale fifty-one head gave an average of £148 18s., and amongst the prices realised were 460 guineas for a two-year-old stallion, the top price of the age in 1907; brood mares, 520 guineas, likewise the top price of the year; whilst three-year-old fillies went to 400 guineas, two-year-old fillies to 240 guineas, and yearling fillies to 180 guineas. Mr. W. Everard, of Bardon Hill, took the second place in the average list with £137 15s. for thirty-one head. The top price of the sale—440 guineas for a three-year-old filly—was the best price of this age in 1907, as was also 400 guineas realised for a two-year-old filly and 230 guineas for a yearling filly, brood mares making up to 310 guineas and yearling stallions 210 guineas. Third in the average list stands that highly successful sale held on behalf of His Majesty the King. Here forty-five head averaged £124, and foremost amongst the individual prices made was 825 guineas, the top price of the year, for mature stallions, 290 guineas for yearling stallions, a price none other of its age equalled during the year. Mr. J. Morton's average for twenty-seven head was £111, brood mares making up to 270 guineas and stallions 260 guineas. Mr. L. Salomon's sale, at Norbury, for forty-five head gave an average of £89 15s. 9d., the two-year-old fillies making up to 400 guineas, brood mares 220 guineas, and yearling fillies 185 guineas.

Amongst the many excellent prices realised at the sale at the Shire Horse Show the top price was 660 guineas for two-year-old stallions, those a year older making up to 320 guineas, and mature stallions up to 310 guineas. The best price for mares was 200 guineas, for a four-year-old mare, others of this sex making from 150 guineas.

Clydesdales have sold well, for at a joint sale held at Perth a series of very satisfactory prices was realised, including 345 guineas for brood mares, 320 guineas for yearling stallions, 300 guineas for yearling fillies, 115 guineas for a filly foal, and 320 guineas for two-year-old stallions. The average for this important sale was an excellent one, £83 5s. 6d. for seventy-four head.

Hackneys have had a successful season, and amongst the leading prices there are many worthy of note. From these we select the following:—Stallions, 500 guineas, Mr. T. B. Sykes, the top price of the year. This breeder also occupied a similar place of distinction for two-year-old and yearling stallions, 120 guineas and 95 guineas. Mr. R. G. Heaton's sale gave 400 guineas for stallions, 450 guineas for brood mares, and 350 for three-year-old fillies, the latter two being top prices of the year. Messrs. F. J. Batchelor and A. Benson's joint sale gave top price of the year for the breed, 750 guineas for a two-year-old filly, whilst at Sir G. Greenall's sale 180 guineas, the best price of the year for yearling fillies, was realised.

Harness horses have been in large request. Amongst the leading prices were 250 guineas at Mr. A. Morton's and Mr. T. B. Sykes' sales, 200 guineas at Mr. J. Makeague's, 230 guineas at Mr. Burdett-Coutts', and 225 guineas at Mr. R. G. Heaton's.

Among the Hunter sales may be mentioned 460 guineas for Viscount Castlereagh, 400 guineas for Mr. C. B. Farmer and Captain the Hon. F. Guest. Quite a number made from 300 to 350 guineas. Polo ponies have been in demand, made ponies commanding very high prices. Amongst those noted were several ranging from 300 guineas. Ponies have been also in keen request. Amongst the prices secured for breeding ponies are 195 guineas for a brood mare at Sir G. Greenall's sale, the same breeder also making 135 guineas for another of the same description. Mr. P. Smith realised 200 guineas for a three-year-old filly, and Mr. J. Makeague 62 guineas for a stallion.

Sheep.

A good trade for pedigree sheep has been experienced throughout the year, and prices, although not of a record-breaking character, have been profitable. Taking the Down breeds first, for Oxford Downs the best sale of the year was Mr. J. Treadwell's fiftieth annual sale at Winchendon, where in addition to making the top price of the yearling rams of this breed for the season (150 guineas) he secured an average of £22 17s. for fifty-nine head; a second lot of thirty-five made £12 8s. 3d. at Kelso. Mr. H. W. Stilgoe's Oxford Fair average, £16 6s. 10d. for sixteen, with 41 guineas for top price, was a good sale, as were also Mr. Elliott's two Kelso sales, where averages of £15 1s. 7d. and £13 14s. for nineteen and twenty head respectively were realised. Mr. J. T. Hobbs' Maiseyhampton annual sale was very satisfactory, the fifty-nine gave an average of £14 1s. 7d., with 43 guineas for top price. The feature of the Southdown sale season was the two highly successful combination sales held at Chichester. Some of the best prices of the year were made at Mr. C. H. Berner's dispersal sale, £15 for four tooth ewes and £7 for flock ewes. The best average for yearling rams was that made by Sir J. Wernher at Chichester, 37 guineas, and the top price of the year was 42 guineas for one of Mr. Elmer Speed's at Chichester August sale. The Hampshire Down sale season has been in every respect thoroughly successful. At the Royal Show yearling rams went from 55 guineas downwards. Mr. James Flower headed clear ahead of all competitors the record for ram lambs set with £57 12s., top price 140 guineas, followed by Mr. A. F. T. Drake with an average of £36 15s., and top price of 100 guineas. The best price for ram lambs during the year was 210 guineas realised by the Marquis of Winchester, whose forty-six sold at that sale gave the excellent average of £19 7s., the only double-figure average of this section in 1907.

Longwool sheep have been in keen request. The Lincoln demand has not been in general so good as last year, but for the best sheep there was no falling off. Mr. Dudding's notable average of £94 12s. 3d. for forty-eight head, with a top price of 900 guineas, is a case in point; then at Lincoln came an average of £42 14s. for fifteen from Mr. C. E. Howard's, with 96 guineas as top price. Messrs. Dean's average was £37 5s. 6d. for fifty head, the top price being 300 guineas, another proof of the keen demand for the best. Mr. J. E. Casswell's Lincoln average was pretty close up, £32 17s. 3d. for twenty. Leicesters have experienced a larger export demand than has been the case for some time. The top price for rams was 96 guineas; Mr. Megginson, whose sale average (£8 18s. 3d.) is the best noted. Among Cotswold sales Mrs. Dixon's average at Heampton Green (£12 5s.) is the best for yearling rams; Mr. W. Houlton's 25 guineas was the top price for this age.

Among Shropshires the best ram sale of the year was at the Royal Show, where forty-one head gave an average of £30 2s. 3d., the best price being 100 guineas, the top sale price of the season; it was also at this sale that the best prices of the season for yearling ewes (22 guineas) and ewe lambs (10 guineas) were realised. Romney Marsh, Devon, South Devons, Dorset have all found buyers at good prices at about average values.

Pigs.

Large and Middle Whites have been well sought after. Sir Gilbert Greenall's first sale was the best of the season. At it 101 head gave the excellent average of £8 9s. 2d., the best price being 20 guineas. Another excellent sale was Mr. R. R. Rothwell's, at which an average of £8 5s. 6d. was realised for sixty-six head; the best price was 35 guineas for a boar, the top price of the season for a male of this breed. Two sales of the Middle White breed are worthy of note—Mr. A. Brown's, at which twenty-eight head realised an average of £8 10s. 11d., and the first one held in connection with the Royal Agricultural Show, at which a dozen head realised the average of £11 11s. 1d.

Berkshires have been more than usually successful. The first one held at the Royal Show, at which quite a number of the exhibits were purchased for abroad, gave the notably good average of £15 2s. 6d. for twenty-six head, boars making up to 53 guineas and sows up to 24 guineas. Of the home sales, Mr. G. T. Inman's was clear ahead of all others. Here not only was the best average of the year realised, £11 4s. for 112 head, but quite a number of individual prices seldom equalled before, such as 80 and 48 guineas for boars, 41 and 35 guineas for sows, and 20 guineas for gilts. Mr. A. Brown's sale gave an average of £7 14s. 6d. for eighty-eight head, with top prices of 33 and 30 guineas for boars and sows respectively. Lord Calthorpe's twenty-eight realised an average of £12 7s. 9d., the highest average of the year, with 28 and 25 guineas the top prices for boars and sows respectively.

Agricultural Shows.

The summer shows were only summer in name, the effect of the wet and broken weather being apparent on the agricultural shows of the past year. Generally speaking, those in the South of England suffered the most, from being held earlier than is customary in the North. The season opened with the meeting of the Oxfordshire Society at Banbury, and visitors to this fixture will long have recollections of the wet and mud experienced. The red soil around Banbury was churned up by the traffic and the persistent rain, and visitors took away with them a liberal coating on boots and clothes as a souvenir. The Somerset County Show, at Wells, opened on the second day of the Oxford fixture, and those whose business compelled them to visit both were agreeably surprised when they reached Somersetshire.

The following week was notable for no less than five county exhibitions, and, with the exception of the Devon County, wet and showery weather made things rather uncomfortable as well as affecting the gates. Subsequent to this, the Bath and West Show at Newport had a disastrous experience as regards the weather, but the attendance was of an average character, although had the weather been better the last day would probably have constituted a record. The showyard when the exhibition was opened to the public was veritably a sea of mud, and when H.R.H. the Prince of Wales visited the show on the second day the rain was pouring down in such a manner as we have been only too familiar with this summer.

The Royal Show at Lincoln has resulted in a further great success, and over £5,000 net profit has been added to the assets of the society. The exhibition, held as it was in the centre of the best agricultural district in England, was of a national character, and fortunately His Majesty, who is the patron of the society, brought with him fine weather, and during the week the gate money, as will be seen from the profit on the show, rolled in to the society's coffers in a most satisfactory manner. Among the extra attractions which were added to the show was a horticultural exhibition, which evidently hit the popular taste.

The Royal Lancashire Show at Bolton added another to the already long list of successes achieved by this society, while the Great Yorkshire Show at Barnsley, although somewhat ungetatable for exhibitors, was satisfactory in all other respects.

The International Horse Show, although not purely agricultural in the narrowest meaning of the word, was a remarkable success and achieved great popularity. It, too, gave a much-needed fillip to the horse trade just at a time when it was rather in the background in consequence of motor competition.

Items.

Barley and oats have both been dearer than a year ago, but the increase has been nothing like so great as in the case of wheat. Barley is approximately 3s. and oats 1s. 6d. up per qr.

The last three months of the year have been uncommonly wet, and interfered greatly with the harvest in Scotland. Potatoes were particularly affected by this unfortunate weather.

The wet season resulted in a particularly good milk yield, and the make of cheese was considerably above the average. Markets for dairy produce, however, were inclined to be easier.

The lambing season passed off successfully. The number of doubles were satisfactory, and there were not many losses among ewes. Wool continues to sell well, and prices, although less than a year ago, were far above those ruling within recent years.

In Parliament a number of Bills have been passed dealing with Agriculture. The most important is the Small Holdings Act, which in most peoples' opinion is somewhat of an experimental measure. The passing of the Butter Bill has put an end to the grievance which has long been felt by agriculturists, while the Dogs Act has also met agricultural necessities.

At a meeting of the Newcastle Farmers' Club held on the 21st inst. it was stated that the club proposed to give £40 in prizes, of which £33 had already been subscribed, at the Royal Show next year, the amount being raised by voluntary subscriptions. It was decided that the prize money be divided between Shorthorn cattle and Border-Leicester sheep, to be confined to tenant farmers in Northumberland and Durham. The prize will be awarded to the best animal in each of the two classes. At the same meeting it was agreed to send the following resolution to Lord Carrington, President of the Board of Agriculture and Fisheries, and to the county councils of Northumberland and Durham:—"That the provisions of the Lighting of Vehicles Act are injurious to farmers, and so far as possible the by-laws of county councils should be framed so as to give all possible latitude to farmers within the vicinity of their own farms."

FARM.

The Rent of Agricultural Land during the Nineteenth Century.

At a recent meeting of the Royal Statistical Society an interesting paper, "An Inquiry into the Rent of Agricultural Land in England and Wales during the Nineteenth Century," was read by Mr. R. J. Thompson, assistant head of the Intelligence Branch of the Board of Agriculture. The paper was based on statements obtained for the purpose from a number of estates, as well as on other available records, and showed the average rent of 70,000 acres during each year of the nineteenth century, and 120,000 acres from 1816 to 1900. For more recent years a greater amount of information was procurable, and the rent of 400,000 acres was given from 1872 to 1900.

The figures brought together showed that the rent of farms in England and Wales advanced by probably 40 per cent. in the first twenty years of the nineteenth century. After 1820 a period of depression ensued, followed in 1840 by the beginning of an upward movement, which continued with little intermission till 1878. Several successive bad seasons, culminating in 1879, resulted in a serious depression, which was continued under the influence of a severe fall in prices until the close of the century.

A careful comparison of the records of rent with the income tax returns, and with prices, leads to the conclusion that the average rent of agricultural land in England and Wales in 1900 was 34 per cent. below the maximum of 1877, 30 per cent. below the level of 1872, and 13 per cent. below the figure of 1846. The average rent of farm land in 1900, said Mr. Thompson, appeared to be about 20s. per acre, and this was subject to charges for repairs, improvements, &c., and many other expenses, which amounted on the average to 35 per cent, so that the net rent after payment of charges, probably averaged some 13s. per acre. Moreover, besides a payment for the bare soil, rent represented a payment for the landlord's capital invested in the farm in the form of buildings, fences, drainage, &c. This, at a very moderate estimate, based on actual facts, averaged not less than £12 per acre. Interest on this at 3½ per cent. amounted to 8s. 5d., and when this was deducted from the net rent of 13s. per acre it left only 4s. 7d per acre as representing on the average the rent of the "natural and indestructible powers of the soil." This was probably a lower figure than at any time in the previous hundred years, and it would seem that the progress of agricultural knowledge, the development of the country, the increase in markets, and the better equipment of farms have not resulted, in the face of reduced prices, in obtaining as great a surplus as was got some seventy or eighty years earlier.

Mr. Thompson concluded by suggesting that it was in a return to the conditions of earlier times, to a more even distribution of the land in a larger number of holdings, that they might anticipate more profitable results from the utilisation of the soil. The medium farm, with a reasonable proportion of still smaller holdings, he said, favoured and encouraged the growth of products which could be produced as cheaply and as well in this country as abroad.

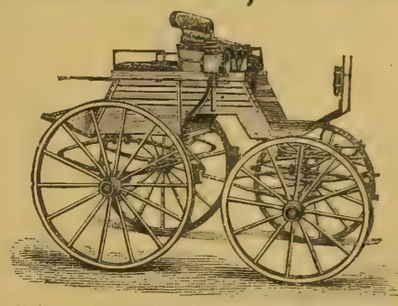
In milk, dairy produce, eggs, pigs, calves, poultry, vegetables, and fruit, the farmers of this country were at no disadvantage as regards climate or soil compared with their principal competitors, while they had the advantage of nearness to markets; and it was probably true that a greater proportion of the soil of Great Britain could be advantageously devoted to these products than was the case at present, without interfering with large farms which, from soil or situation, were especially suitable to the growth of grain, beef, mutton, or wool.

Mr. William Bravington, of Woburn Hill, Addlestone, a well-known Surrey agriculturist, died on Monday. For sixty-four years he was a member, and part of that time chairman, of the Chertsey Agricultural Association.

Trade Notice.—An embrocation which has won distinct success in the treatment of all skin diseases in horses, cattle, dogs, and all domestic animals, is "The Huntsman's Improved Lotion," manufactured by Messrs. C. Mitchell and Co., 14, Fetter Lane, London, E.C. It at once allays the irritation caused by mange, eczema, &c., and speedily effects a cure with little trouble, and at a small cost; a fact which is borne out by its extensive use in the principal training and livery stables, kennels, and on large farms in all parts of the kingdom, whilst it has proved a speedy healing specific for cuts, wounds, burns, &c. Horses affected with itching of legs and withers, sore shoulders, sore backs, chapped heels and treads, are said to quickly recover by the application of the Huntsman's Improved Lotion, which contains nothing of a deleterious nature, and is perfectly safe and simple to apply. Any of our readers who would like to try it can obtain a sample post-free from Messrs. Mitchell and Co. on forwarding them a P.O. for 1s. 6d.

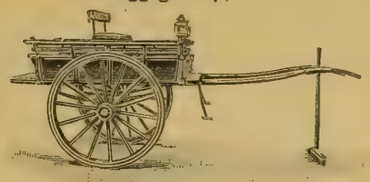
THE
COUNTRY GENTLEMEN'S ASSOCIATION, LTD.

Increase of Subscription to New Members joining after January 1, 1908.



THE Directors of the Country Gentlemen's Association, Ltd., have resolved that on and after January 1, 1908, the subscription for membership for new members shall be one guinea per annum, to include the "Country Gentlemen's Estate Book" yearly, the "Estate Magazine" monthly, and all other members' privileges, instead of 10s. 6d. per annum as heretofore.

The subscription for existing members, and all who join before December 31 next will continue at the latter figure. Subscriptions from new members will now be accepted for 1908.



Full particulars of the advantages of joining the Association will be forwarded to ladies or gentlemen on application to

WILLIAM BROOMHALL,
Managing Director.
24 and 25 St. James Street, London, or
127 St. Vincent Street, Glasgow.

Nottinghamshire Notes.

KING FOG reigned supreme in this district on Monday and Tuesday, but the weather on Christmas Day and Boxing Day was all that could be desired by holiday-makers, while it was also greatly appreciated by farmers. The air was clear and there were slight drying winds. Grave fears are being expressed by many tenant farmers respecting their crops of wheat. A large acreage was what might with truth be said to have been "mauled" in, and for two or three weeks it has rained almost every day. On strong clay land much of the seed has gone rotten and will have to be sown again. The high prices which wheats have commanded this back-end prompted many to make an extra effort to get a larger area sown with this cereal, but the constant rains have decreed otherwise, and from careful inquiries made in this county I find that there has actually been less wheat sown this autumn than was the case a year ago.

SIR JOHN and Lady Robinson, of Worksop Manor, have for the thirty-second consecutive year entertained to dinner in Nottingham 800 old men and about 700 aged women—all, in fact, being over sixty-five. Among those present on the platform along with Sir John Robinson to give the old folks a hearty welcome was Mr. Thomas Richardson, of Oxton, who is seventy-eight years of age, and looked as hale and hearty as a man of fifty.

MR. RICHARDSON at one time farmed over 1,000 acres, and his family between them for over twenty-five years cultivated about 10,000 acres. The old veteran is still able to hold the gun, and considers that he shoots even better now than he did thirty years back, especially at rabbits. During the whole of his life Mr. Richardson has abjured tea, and has rarely partaken of coffee, it being at least forty years since he tasted the latter beverage. For breakfast he still adheres to the English yeoman's tankard of ale—something over a pint—in an old-fashioned mounted "cup."

EXERCISE, plain and substantial food, fresh air, and a mind free from worry is what Mr. Richardson attributes his good health. He is the third of eleven brothers, the youngest of whom now alive is seventy years of age, while his father reached the great age of ninety.

MANSFIELD Agricultural Society have not had the best of luck this year, for I notice from their annual balance-sheet just issued that they have only £11 12s. 6d. in hand, against £78 19s. 9d. a year ago. The prize money awarded at the last show totalled £221 8s. 6d. It has been decided to hold the next exhibition at Mansfield on Whit Monday, while the secretary (Mr. George Cox) has been granted a honorarium of £20 for his services.

THE article in the "Mark Lane Express Annual" on the "Spread of Farmers' Societies" has aroused a good deal of interest, not only in this locality, but in several districts in England and Scotland. The reference to the Midland Farmers' Co-operative Society (Nottingham) has already brought several letters relative to how it is worked, and similar associations in other counties are likely to follow.

BY-THE-BY, I may say that a meeting is shortly to be held in Lincolnshire for the purpose of forming a branch of the Midland Farmers' Co operative Society. The place selected is Horncastle, and the president (Colonel L. Rolleston, D.S.O., Watnall Hall) informs me that he is confident of it becoming a large concern in the course of a few more months New members are constantly joining, and when the end of the first trading year is reached, I understand that the balance-sheet will be a surprise-packet to friend and foe alike.

THE next article in the MARK LANE EXPRESS, under the heading of "Midland Farmers at Home," will deal with the Nottingham Corporation's model farm buildings at Bulcote. Accompanying the article will be given a photograph of Alderman J. White, the chairman of the Nottingham City Council Farm Committee.

APPLICATIONS for land under the Small Holdings Act have exceeded all expectations in the county of Nottingham, and what at one time looked as though another useless Act had been placed on the Statute Book promises to be one of the greatest successes so far as agriculture is concerned—that has been known for many years. Several members of the Nottinghamshire County Council are working most assiduously in the interests of labourers and others who desire to become small holders, and I am told by one member that an interesting report will be presented at the next meeting of the council on the subject.

DURING the present month local horse breeders have done good business, many typical specimens of the Shire breed having been sold to foreign buyers at highly remunerative prices, as the following list will show:—Mr. G. Harrison, of Norwell, has sold a colt named Propeller by Four Hundred Bonny Boy for export to the Argentine; Mr. Dook, of Sutton-on-Trent, was the breeder of a bay two-year-old colt by Maximum called Duke of Lincoln, his new home being in the United States of America; Mr. Goulding, of East Leake, bred Tattlebrook Bouncing Girl by Kingston Royal Albert, which is going to America; Mr. Simpson, of Hawksworth, was the breeder of the colt named Dreadnought by Coalfield Tom and the filly Lioness by Lincoln Lion, both going to the U.S.A. Another colt by Lincoln Lion, the property of Mr. Todd, Kirkby Green, near Lincoln, named Lord Lyon is for the Argentine. Mr. Palmer, of Bollam, near Retford, has sold Brave Lion by Lincoln Lion for America; Mr. J. H. Marshall, of Marnham Hall, bred the colt Dapple Tom by Stroxton Tom, which has been sold to the Iowa State College, U.S.A.

THOUGH the above list is a fairly long one, I have received further particulars of other sales, viz.:—Mr. Davenport, of Knapthorpe, has sold the colt Caunton by Locomotion, its destination being the Argentine; Mr. Weightman, of Avesham, near Newark, Merry Lass, a four-year-old by Stroxton Tom; Mr. Gale, Kneesall, bred Bellfounder by Whitstone Ring of Bells; Mr. B. Farrow, of Hawton, near Newark, bred Yeoman Ben by Headon Yeoman; Mr. J. C. Fisher, Crow Park, near Sutton-on-Trent, bred Kingfisher by Matchless Waiter, and all these are for export to America Mr. Simpson, of Fledboro', bred Fortitude, which is for the Argentine. All these horses were purchased by Messrs. J. Forshaw and Sons, of Carlton-on-Trent, who in turn sold them to the foreign buyers. It shows clearly that we have some good Shires in the lace county, and it once more proves that it pays farmers to breed the best animals.

MR. HENRY SMITH, jun., of Cropwell Butler, has disposed of two Middle White boars by Holywell Vulcan for export to Buenos Ayres, and also fifteen Lincoln ram hoggs.

I UNDERSTAND that Mr. T. S. Morris, who for several years has been an assistant in the Newcastle Estate Offices at Worksop, has been appointed estate manager to Mr. W. E. and Lady Eleanor Dennison, Ossington Hall, near Newark, and will enter upon his new duties on Wednesday, January 1. R. K.

December 28, 1907.

Northern Notes.

A GREAT grievance is about to be removed in East Yorkshire—we refer to the withdrawal of the Movement of Swine Orders, which have been in force about two years. The Orders, Lord Carrington has stated, in a letter dated the 20th inst. to Mr. Luke White, M.P., will cease to be in force on January 5, and henceforth there will be no restrictions. Mr. White has been most persistent in pursuing the subject, and in conferring with the officials of the Board of Agriculture, and it was evident from the account he last gave of his interview with the president that some drastic alteration would shortly be made. For a long time in one of the most extensive pig-breeding districts of the North the trade has been harassed beyond measure. Buying and selling in the public markets is reduced to a minimum. The smaller dealers have suffered the most pecuniarily, while cottagers and drovers have been deprived in part of their weekly incomes, obtained in times past from the feeding and tending of swine. Whereas thousands of pigs used to pass through our markets, the numbers during the last two years represented but a fraction of the previous volume of trade. The anomaly of the situation is that while pigs could only be removed under licence from markets that were kept scrupulously clean with water and lime, inn yards where the conditions were dreadfully insanitary, were used promiscuously. The Board of Agriculture for years have attempted the impossible, for swine fever is no more eradicable than are measles in the human species.

THE proposal to form an Agricultural Parliamentary party was on the agenda of the Newcastle Farmers' Club at their meeting on the 21st. The secretary, in a statement he made on the subject, observed that all that could be done at present was to record a pious opinion on the matter. But that suggestion, mild as it was, does not appear to have been adopted. Mr. Carrick spoke to the effect that the formation of such a party was undesirable, and his opinion must have carried great weight, as no motion was apparently submitted to the meeting.

THE butchers in the North make a great display at Christmas-time, and it seems astounding where all the flesh meat goes, taking into account the vast quantities of game and poultry that are also provided to meet the special demands of customers. Even in small towns, where the purveyors have a country round (among the villages) the beasts and sheep slaughtered are so numerous as to be almost beyond belief, if we had not confidence in the veracity of the tradesmen.

ABNORMALLY fat animals are hardly anywhere to be seen. The miners who years ago would have nothing but the fattest of mutton, now distinctly favour small lean joints and beefsteak, and though butchers give heavy prices for a prize ox, their sole object is advertisement, they are bound to lose money over their purchase, as many stones of "blubber" are eventually deposited in the tallow candle-maker's vats. Much of this may afterwards be sold as rendered "suet." One knows a candle-maker who sends many hundredweights of this rendered fat to a wholesale house. It is bought in as tallow, and goes out in blocks of sweet suet. If purchasers of margarine and remade "butter" consumed nothing more objectionable, there could not be the slightest cause for complaint.

WHILE some farmers think Parliament does not initiate sufficient legislation in their interests, others hold a contrary opinion. The other day the farmers' representative of the Cleveland district—from whence splendid milk is obtained—were discussing a variety of questions, among them being that of Parliamentary representation. One speaker confessed that he hardly knew what to make of this topic, but thought when so many prominent agriculturists had supported the question, that it must in their opinion be necessary. His idea was, however, that farmers would be better left alone by legislators for a time.

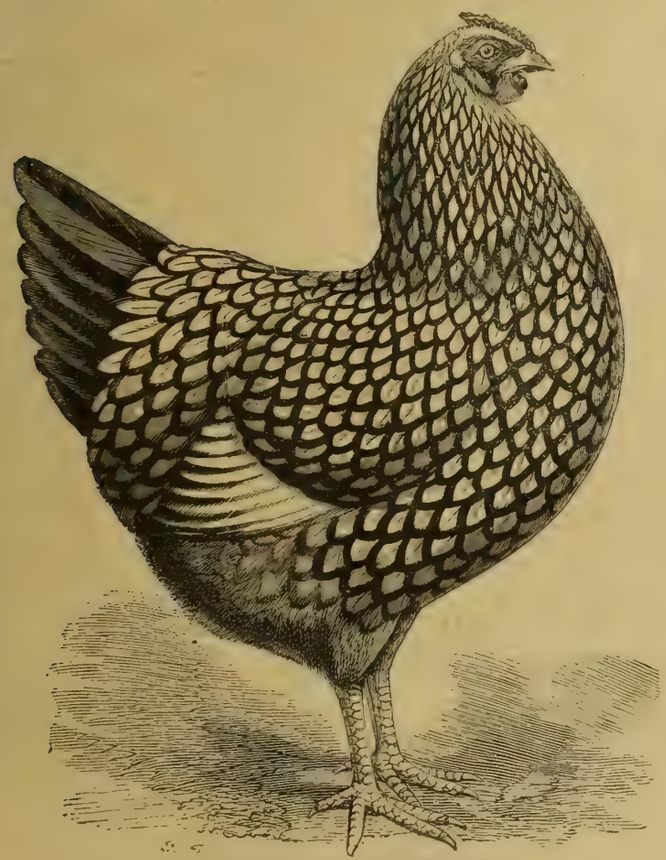
THE question of an Agricultural Party has come to stay—at any rate, for a while; everybody concerned with farming is talking about it, and whenever so much thought is concentrated upon a question there is usually something in it of more than surface importance.

THE chief need of the British agriculturist today is to be placed upon fair competitive terms with the foreigner; and another very important point is that of combination in the mutual interest. Co-operation in purchase is growing, as the small farmers become educated in the principle of standing by their neighbours for their common good. They are "cutting out," as they call it, "the black-bag man," and sharing his expenses and profits among themselves.

THERE appears to be land hunger among the poor as well as among the small capitalists. Small holdings are in great demand in Lancashire and Yorkshire. Applications are pouring into the county councils "wholesale," and a wide change will be gradually effected in the greatest of our national industries. The settlement of thousands of people on the land in small farms will set many trades going, and cause money to be spent in channels where otherwise it would not be.

AS I write this last line the promise of a "green" Christmas is upset. The woods and fields are sparkling with rime which thickens as the day advances. None but the healthy youth desire an "old-fashioned" Christmas; the farmers do not desire frost and snow at the present juncture, they have been glad to escape the terrors of an early winter. For weeks they have been troubled with water-logged land and folds on which sheep could not be left over night, and some flocks have had to be removed entirely for a time.

December 26, 1907.



POULTRY.

The Silver-Laced Wyandotte.

The Wyandotte is the most popular of the American breeds we have in this country. They were first imported into England early in the eighties, and the first of the variety to reach our shores was the Silver-laced, the original Wyandottes. Since then many varieties of the Wyandotte have appeared, but the Silver-laced holds its own as one of the prettiest of fowls.

The Silver Wyandottes were "made" by judicious crossings of Silver-spangled Hamburghs and Light Brahmas, and it is interesting to note that one of the characteristics of the Brahmas has been transmitted in a very marked manner to all the progeny of these various matings, as the yellow skin is found in all the birds, and this favours the American point of view as one of the birds' particular features.

It is easy to see which was the stronger fowl used in its production by the results obtained, as the identity of the Brahma is strong in this direction, as seen by the size and shape of the present-day Wyandotte.

A SILVER WYANDOTTE HEN.

The breeding of high-class Laced Wyandottes is work for fanciers rather than for poultry keepers, as it requires much experience in their mating to produce birds of the highest standard of excellence. There are, however, many flocks of birds kept for egg production, and these give a good deal of pleasure to their owners, as they are very pretty fowls besides being capital layers.

The general characteristics of all varieties of the Wyandottes are the same, the broad short head being well defined. The rose comb is close fitting to the head, the spike or leader curving down at the back. The shape of the body is full and deep, but very "cobby," and they have short, strong, yellow legs.

The Wyandottes are the least broody of all the brown egg-laying breeds, and they have longer periods between wanting to sit, while some of them do not come broody at all. Their eggs are not above the average size, but they lay well in the winter months, when an egg, whether large or small, commands a good price. Eggs which have white shells always look smaller than they really are, while, on the other hand, brown-shelled and tinted eggs look larger, so that Wyandottes are classed as profitable egg producers.

How to Get Winter Eggs.

In order to compete with the foreigner and take his proper position in the egg market, the British farmer must be able to guarantee an all-the-year-round supply. The big shopkeeper will naturally accept only such contracts as will ensure regular and constant supplies, and if the home producer cannot do this for him he cannot be blamed for turning to the foreigner.

To obtain a proper footing in the home market, and to retain a fair proportion of the £6,750,000 sterling which is annually paid out of this country for Continental eggs, the question of winter egg production must be carefully studied. Breeding and feeding are the two essentials.

"Breeding for eggs" is no newspaper catch phrase, but is being successfully carried out by many keen-headed farmers who have grasped the importance of the situation. Each year the best layers are selected and reserved for stock purposes. There is no need to employ an elaborate system of trap-nesting. Intelligent observation will soon pick out the "business" hen. The breeding birds and the layers should be run in separate flocks, as each requires different management to obtain the required results. With the laying flock eggs must be fed for, but with the breeding stock fertility is of more consequence than quantity. For breeding purposes strong, healthy one-year-old hens mated with early-hatched, vigorous cockerels bring best results.

Good sound food, not too stimulating in nature, must be fed, together with a liberal daily ration of greenstuff. Cabbages and vegetables cut in halves and distributed over the fields for the hens to peck at will give them occupation and exercise, and so prevent moping and laziness. The lazy hen is not worth her keep—activity means fertility, and produces strong healthy chickens that are no trouble to rear.

The laying flock needs slightly different treatment. When eggs are the object in view, more stimulating diet is necessary. To produce layers the farmer must commence early and seek to build up in his growing chickens strong frames and healthy bodies. The pullets must not be allowed to lay too soon, or strength and development will be sacrificed. Should they show signs of laying too early, they can be retarded by being turned out on to a big grass range, fed on grain alone, and having their quarters shifted every now and again. By these means they can be brought to full maturity, and to a condition to stand a forcing diet and the strain of excessive egg-production.

When the pullets have reached this stage, feeding for eggs can be commenced. If we require the hen to lay out of her natural season, it is at once apparent we must supply artificially that which her nature is deficient in. In the summer, when insect life is abundant, the hen can find all the animal food she requires for the production of eggs, but during the winter, when no longer obtainable under natural conditions, animal food must be given in other ways.

Feed stuffs are found by analysis to contain three principal groups of elements—viz, albuminoids, carbohydrates (including fat), and mineral salts.

The first, which takes its name from albumen, derived from the Latin term for the white of an egg, builds up tissue and supplies waste; the second produces warmth, and the last-named helps to strengthen the frame and build up the bones.

The egg contains almost as much albuminoids as of fats, whereas wheat, oats, and their products contain, roughly speaking, only a proportion of one in four or five. From this it will be seen that some ingredient containing a high proportion of albuminoids must be added to the ordinary food in order to produce the necessary elements for the formation of eggs. Dry meat meal contains 71·2 per cent. of albuminoids, and thus supplies exactly what is required.

Green cut bone may also be fed with advantage, containing as it does a heavy percentage of albuminoids, and supplying also both fat and mineral salts for the shell. It does not take a great deal of green bone to make a full feeding for a flock of hens. A knuckle bone weighing 2½ lb. is sufficient for forty fowls, allowing 1 oz. per day for each bird. This will be given about noon, and will take the place of the same weight of grain, which will be deducted from the evening feed.

To sum up the feeding for the day the following programme will be found both economical and productive of a full egg-basket when the prices of eggs rate high.

In the morning as soon as it is light a soft mash, composed of five parts middlings, two parts bran, and one part meat meal. The constituents should be thoroughly mixed in a dry state, and then moistened to a crumbly consistency with warm water.

This must be fed with care in order to avoid over-feeding and consequent inactivity. A pinch of salt added to the mash will aid digestion and so prevent bowel troubles.

About 10 a.m. green food.

At noon, cut bone.

In the evening, about an hour before roosting time, a ration of wheat—a lady's handful for each fowl at a rough calculation—well scattered over the grass, so that every bird is obliged to hunt for its meal.

This treatment, backed up by warm, dry, clean roosting houses, a supply of grit, and pure water, will go a long way towards making the keeping of poultry as profitable as it undoubtedly should be.

B. F.

Some Important Points in Poultry Keeping.

It is well for everyone who has the management of fowls to observe habits of cleanliness in connection with all the utensils employed.

Fowls, to be profitable, require suitable food, sharp grit, plenty of exercise, and clean quarters.

Fowls will not relish a feed of soft food, however good it is, if it is fed to them in dirty troughs. It is essential that the drinking vessels are kept perfectly clean.

Although the water may be tipped out, and fresh water supplied every few days, the troughs will be found slimy if they are not thoroughly scrubbed out with a hard brush once a week. It is necessary that plain-shaped troughs should be used, so there will be no difficulty in scrubbing them out.

Where there are cases of colds in the runs, a little disinfectant should be added to the water used for scrubbing the troughs out.

Many cases of roup can be prevented by attention to this detail, as where fowls have bad colds they infect the drinking water by allowing saliva from their beaks to escape into the drinking water, then the next birds which take water from the trough are affected.

A piece of camphor about the size of a large walnut should be placed in each drinking vessel if there is any disease about the place. One piece answers for a fortnight if it is replaced in the vessel each time the water is renewed.

The General Committee of the newly-formed Blackpool Agricultural Society have decided that the show be held on July 22 and 23, and a deputation has been appointed to wait on the corporation as to the terms on which the New Road site for the show can be obtained.

Lincolnshire Notes.

ON the 20th I attended a meeting of the committee of the Lincolnshire Farmers' Union. I was singularly impressed. We are often told that farmers are notoriously unbusinesslike. The committee of the Lincolnshire Farmers' Union is making a reputation for real business capacity. It comprises some of the shrewdest and most intelligent men cultivating the soil of Lincolnshire to day, kept well informed by the most intelligent of secretaries, and presided over by a farmer who has learnt his lessons in many parts of the world, and who has no superior for the keenness of his insight, and I almost said the infallibility of his judgment. At any rate, I do not believe any body of men could have more sensibly disposed of the number of legal cases which came before the committee on that day. The F.U. must have saved its members many a bright sovereign in law costs since it took up the responsibility of giving them legal aid. It must be of the greatest value to be able to submit one's case to a party of the sharpest wits and the ripest experience in the agricultural community of the county.

AMONGST other matters which the Union discussed was that of tuberculosis in cattle. I have several times expressed my opinion that farmers or butchers have little hope of help from the Government in this most difficult of questions. I have urged that they have the remedy in their own hands by establishing an efficient indemnity fund, which the nation would of course pay in the increased price of meat. But they do not seem to see the matter in that light. The Lincoln and Boston butchers have an inefficient indemnity fund, which Mr. Robinson says is bankrupt again and again, and they are hoping with the aid of the farmers to hold on until the Government comes to the rescue. Well, it is another way out of it, but the slowest and the dearest way in my opinion.

EARL CARRINGTON has definitely promised to attend the annual dinner. It will be good news for many a Lincolnshire farmer who has longed through several disappointments for his lordship's advice and inspiration. No doubt the Ministers of Agriculture, both present and past—for Lord Onslow is coming too—will discuss all these thorny problems. If I might be allowed a suggestion, I hope they will also give us their advice on the subject of the registration of corn samples, which, in spite of its intrinsic virtue, seems to hang fire a little still.

WE want to know down in this part what to make of the following:—Last week there was a remarkable sale of growing crops of barley, oats, and wheat at Branston Fen, on the farm of Mr. Henry Berry. The crops were disposed of at the following rates to Mr. John Pocklington, of Heckington:—Nine acres of barley, £1 12s. 6d.; 6 acres of winter oats, £1 15s.; 10 acres of white oats, £3 5s.; 19 acres of white oats, £14; and 9 acres of wheat (part in stack), £14. The purchaser, Mr. Pocklington, is arranging to commence harvest operations as soon after Christmas as possible, and there is not the least doubt that most of the crops will be harvested in the year 1908. We want to know whether it should be described as an early harvest or a late one. Would the Mark Lane expert please enlighten us?

MR. WINFREY, M.P., last week replied to Mr. Chaplin's criticisms of Earl Carrington's small holdings estate in the Spalding district. Mr. Chaplin's complaint was as to the "lamentable lack" of cottage accommodation on the small holdings. Mr. Winfrey's reply is that he found that out of the total of 970 acres of land of Earl Carrington's there were no less than eighteen residences, so that if they divided the land into 50-acre holdings there would be a residence and buildings for every holder—which would bear very favourable comparison with any other estate in the Eastern Counties or even in the whole of England, so far as the number of residences to the amount of land were concerned. Mr. Chaplin, in advising the landlords not to follow Lord Carrington's example, told them that he spoke from no small experience. But he asked them, who was the superior landlord in the matter? Earl Carrington, who had made his estates so successful, or Mr. Chaplin, who was publicly declaring that owing to the agricultural depression he had gradually lost a great part of his estates. This criticism from Mr. Chaplin looked like "green-eyed jealousy."

MESSRS. DICKINSON, RIGGALL, AND DAVY, of Louth, have sold by private treaty to Mr. R. E. Caudwell, of Holbeach Marsh, the Pyes Hall estate of the late Mr. Coates, Sharpley, for £14,000.

TO all my readers a happy New Year. If it comes up to the splendid record of 1907, with all its threats and all its disappointments, 1908 will do well. It will do wonderfully well. We shall always remember how well September saved the situation and converted impending disaster into record prosperity.

December 27, 1907.

LINCOLNSHIRE FARMERS' UNION.

BRIGG.

An enthusiastic meeting in connection with the Brigg Branch of the Lincolnshire Farmers' Union was held recently, Mr. T. Ford, of Redbourne, presiding. Mr. G. A. Bellwood, J.P., of Bishop Norton, vice-chairman of the Union, in a practical and earnest speech pointed out the necessity of combination amongst farmers, for they as a class had to contend with other organisations on their business side. Politically the necessity of farmers' unions was still greater. The late Lord Salisbury when Prime Minister had told them to "help themselves." He had nothing to say against either landlords or labourers, but any organisations they formed must be on the basis of the farmer. The Lincolnshire Union, although only three years old, had already a membership of 3,000. The Union rendered valuable services to its members. They had settled many cases, taking one even to the High Courts. At the recent General Election they had pressed their programme on the candidates, but they knew no party; they were farmers first and politicians afterwards.

The Union had seriously considered the question of insurance and excessive railway charges. In many cases Lincolnshire farmers had to pay 1s. a quarter more for carriage than some of the farmers in the other eastern counties. They intended to bring pressure to bear on railway companies, and were determined to be treated fairly. The General Election had taught them a severe lesson, for they saw "Labour" sending members to Parliament, yet the 11,000 Lincolnshire farmers, and the 250,000 farmers in England did not send one direct representative to the House of Commons. He hoped the farmers in the Brigg District would join them, for "Unity was Strength."

The Rev. T. Hamilton, vicar of Skellingthorpe, in an eloquent and earnest address, urged upon the farmers of the country to form one great Union, to which they could appeal for support and legal advice when necessary. The rev. gentleman also advocated agricultural technical schools and model farms, where practical farming could be taught to the sons of farmers. They should take a leaf out of the book of the Irish tenant farmers, and form a Parliamentary Party; they would then soon get what they wanted.

Mr. H. W. Palmer, secretary to the Lincolnshire Farmers' Union, in the course of his address, said the number of branches in connection with the Union had this year increased from sixteen to twenty-one, and they were already going outside the borders of their own county.

HORNCASTLE.

The annual general meeting of the Horncastle branch of the Lincolnshire Farmers' Union was held on the 21st inst. Mr. H. Taylor Sharpe in the chair.

Mr. Howard came from the Central Committee in the unavoidable absence of Mr. Palmer (the general secretary) and addressed the meeting. He touched on the small membership of the Horncastle branch, and impressed upon those present the necessity of trying to persuade others to join the Union. In the course of an interesting address he alluded to the great benefit that several members had obtained in cases of dispute and damage from legal advice and aid given by the Union, and also referred to the suggested insurance scheme, the proposed agricultural party in the House of Commons, small holdings, and the rating question.

Mr. G. E. Read strongly advocated an insurance scheme for the Union.

Mr. Dunham asked if the Union could give any assistance towards inducing the railway authorities at Horncastle to give more help to farmers in loading and unloading goods at the station.

It was resolved that a letter be written by the secretary to the station-master at Horncastle asking that the desired help be given to farmers.

The following officers were re-elected:—Chairman, Mr. W. T. Sharpe; vice-chairman, Colonel Ellwood; hon. secretary, Mr. W. Searby.

BOSTON.

On Wednesday evening the members of the Boston Branch of the Lincolnshire Farmers' Union held a dinner, followed by their annual meeting, and gave a hearty send-off to their late hon. assistant-secretary, Mr. T. A. Marris, who is leaving England on January 3 to devote himself to agriculture in Canada. The president of the Branch, Mr. Joseph Bowser, J.P., was in the chair, and when the officers for the ensuing year were chosen he was unanimously re-elected to the position he has so successfully occupied during the past year.

Mr. Crawford was unanimously elected secretary, and, in expressing his thanks, said he hoped that by this time next year the members would be numbered by their hundreds.

For the office of hon. assistant secretary in place of Mr. T. A. Marris, resigned, Mr. Sharp was unanimously elected, whilst the whole of the committee were re-elected.

At the dinner Mr. Hansard proposed the toast of "The Boston Branch," and said he had experienced the struggles and difficulties of farming in the past, and knew what it was to have two or three "downs" to one "up." Many remedies were suggested for the difficulties that farmers had to contend with, but the only remedy he believed in was to help themselves. (Applause.) He coupled the toast with the name of Mr. E. Crawford, secretary for the Boston Branch, and Mr. Crawford briefly replied.

The toast of "The Town and Trade of Boston," was proposed by Mr. F. Bowser, and acknowledged by the Mayor, who referred to the approaching departure of Mr. Marris. The latter had, he said, been for some years connected with Boston in various capacities, and belonged to a family the members of which were highly respected by the inhabitants. Continuing, he said that all present, whether professional men, merchants, or engaged in any kind of trade, sincerely desired that agricultural matters should be on the up-grade rather than on the down-grade. It was a matter of great satisfaction to them when they saw cheerful countenances instead of the gloomy ones to which they had been accustomed years ago (Hear, hear.)

Mr. Dennis proposed "The Lincolnshire Farmers' Union," of which he said the Boston branch was not the least, or the least progressive. The agricultural industry was the one upon which all other industries hung, and yet it had been a neglected industry, and had been sacrificed on the altars of the manufacturing industries from the repeal of the Corn Laws until the present day. But at last the farmers were coming to the conclusion that if they wanted help they must help themselves. If they intended to improve their position they must pledge their Members of Parliament representing agricultural districts to support the industry which benefited the people whom they represented. Combination was the only way. If they did not do something for themselves they need not look for legislation in their behalf. (Hear, hear.)

Mr. Colin Campbell, chairman of the Union, whose name was coupled with the toast, referred in his speech to the proposed agricultural party, and said he thought personally that it would be impossible to form an independent agricultural party and send members into Parliament themselves. If they brought pressure to bear on the candidates before the General Election they might get them to do what they wanted. Their great strength lay in being independent of party politics. Mr. Campbell went on to speak of the forthcoming motor-car legislation. Speaking at a later stage with regard to the suggested scheme of mutualinsurance for the members of the Union, he said that those at headquarters did not consider such a scheme feasible. They had therefore gone to a tariff insurance office, and would soon be in a position to give every paying member a reduction of 5 per cent. on his insurance premium, while very substantial benefits would accrue to the Union itself. (Applause.)

The toast of the evening, the health of Mr. T. A. Marris, was proposed by the chairman, who said he was very sorry their late assistant secretary was going to leave them, but hoped it was for his benefit, and that he would make as many friends in the new country to which he was going as he had in this country. The speaker had only been associated with Mr. Marris in connection with that Union. He had been with him at large meetings, where he had found him most enthusiastic, and at small ones, where he had found him most encouraging. He hoped when he went to his new home he would find agriculture prosperous in that country. It had been intended to make Mr. Marris some presentation that evening, but owing to circumstances over which they had no control it had been impossible to finish it and present it that night, and it would be handed to him in due course by a small committee. (Applause.)

Mr. Sharp read the following testimonial, which had been drawn up to be signed by the chairman, and as many of the members as possible.

"We, the undersigned members of the Lincolnshire Farmers' Union, desire to express our regret at the resignation of Mr. T. Arthur Marris, the honorary secretary of the Boston and District branch of this Union, which is rendered necessary by his decision to emigrate to Canada; and at the same time we wish to testify our appreciation of the value of the services he has rendered to the cause by his steady attention to the business of the Union, and the courtesy he has at all times ex-

tended to the members; and we hereby wish him success in the new career he has chosen.

"J. Bowser, Chairman of Boston Branch."

The toast was heartily drunk to the tune of "He's a jolly good fellow."

Mr. Marris, in reply, thanked the mayor, the chairman, and Mr. Caister for the kind things they had said about him. The services he had rendered to the Union had been very small, and he considered them a very great pleasure. He was sure Mr. Sharp would always find them the same so long as he had Mr. Crawford as a colleague and Mr. Bowser as a chairman. It was not without regret that he found himself obliged to sever his connection with the Union. It had always surprised him that such an organisation had not been started before, but since it had started it had been the death of auctioneers. (Laughter.) It was so very seldom that a farm was sold up that it had killed the auctioneers. (Laughter.) He did not complain; he had had a good time in Boston, and had always had nearly enough for his little wants, but he thought that by going to another country he might do better. (Applause.) They had to work out there, but if they did they got paid. He thanked them for the testimonial, and was sure that that testimonial, which was signed by men known all the world over, would be useful to him in his new venture. (Applause)

Mr. Nash proposed the toast of "The Chairman," and said he was sure the prosperity of the Boston Branch was due to the capable hands the business was in. (Hear, hear.)

In the course of his reply, Mr. Bowser referred to the burden of local taxation on the farmers, the desirability of corn registration, and the subject of small holdings, deprecating the idea of sending men on to the land who did not know anything about farming. Anything he could do for that Union, or for the benefit of agriculture in general he would always be pleased to do. (Applause.)

RETFORD.

The annual meeting of the Retford Branch of the Lincolnshire Farmers' Union was held at Retford on the 21st inst. Mr. Samuel White, South Leverton, was unanimously re-elected chairman, and presided throughout. Mr. White said he should continue to do his best on behalf of the Union, and no one could do any more. He wished they were making faster progress, but it was not always the rush at first succeeded in the end. The Union appeared to be established on a firm basis, and he thought greater things would be acomplished in the future. Mr. W. Skinner, Lound, was appointed vice-chairman in the place of Mr. T. Bescoby, who expressed a wish to retire; Mr. J. C. Smalley was re-elected secretary, each speaker bearing testimony to the highly efficient manner in which he had discharged his duties.

The chairman said he wished to report that Sir Frederick Milner was in every way in agreement with the programme of the Union, and he was also glad to say that Mr. F. Newnes, M.P., was in favour of their objects, and desired to become a honorary member of the branch. This was most satisfactory in every way, and no one could find any fault with what they were doing. (Hear, hear.)

Mr. Palmer gave a brief account of the progress of the Union in Lincolnshire and adjoining counties. It was impossible to tell one-quarter of what the Union was doing, but he mentioned a few cases of legal aid which had been of great benefit to members. The old branches were in a flourishing condition, and new ones had been started at Peterborough, Doncaster, Melton Mowbray, in the Isle of Axholme, and at Spalding. There was a strong move by the Central Chamber of Agriculture in regard to the independent agricultural party. That awakening had been brought about by the energy of the Union. The Central Chamber presented a report, which had been discussed by the Union, and the idea was to form an independent agricultural party. He hoped it would not be said they were opposed to it. Let them bring forward a tenant farmer for Parliament, who should keep together the party men on either side who represented agriculture, and let them know when anything relating to agriculture was coming up, and keep them to their pledge given to the agricultural programme. The Union had not been asleep, and whatever else might be said it could not be denied that they had awakened the country to the fact that there was such an industry as agriculture. (Applause.)

Mr. Smalley stated that during the year the membership of the Retford Branch of the Union had increased from 47 to 132, and good work had been done in the villages, four meetings having been held, which had resulted in an increased membership. He thanked the members of the committee for their assistance. He should like to receive more help from the members, as the district was too large for one man to get through in his spare time.

On the motion of Mr. Skinner, seconded by Mr. White, it was unanimously resolved: "That the Retford Branch of the L.F.U., whose members are large ratepayers, view with alarm the great increase in the cost of county roads, and do not agree with the use of tarmac, which is detrimental to the highest interests and excessively expensive."

It was decided to ask the Central Committee to press forward item three in the parliamentary programme:—"That large grants shall be paid by the Imperial Exchequer towards the maintenance of all public roads."

CORRESPONDENCE.

Agricultural Politics.

SIR,—Regarding your contributor Lobbyist's intricate arguments denouncing any alteration in the tariff system of the United Kingdom, I would like to ask him what *is his alternative?*

In her competition with powerful commercial rivals Great Britain can no longer afford to handicap herself by giving them 25 per cent start, and as they will not adopt Free Trade and join her at "scratch," why does not the British Empire unite against them, establish Free Trade between its different component parts, and impose a high tariff against all foreign competitors, each portion bearing its share of the defence of the Empire both in men and money? Otherwise, what good are our Colonies to the Mother Country, except that she prevents other nations from possessing them.

What all this has to do with farming is that agriculture cannot regain prosperity unless the other industries of the country are also prosperous, then farmers may demand fair treatment.

Any scheme to benefit the British farmer, or any other class, must be part and parcel of a plan to benefit the community.—Yours, &c.,

Christmas Day, 1907. A. J. R.

Out of Curiosity.

SIR,—Some time ago when you gave an illustration of what is probably the oldest stack of wheat in the world, and informed your readers that the stack had been kept intact because the owner had made a vow not to sell the corn under a certain price, your readers wondered what manner of man Mr. Selby must be; but his letter of December 16 makes one wonder still more, because he there says that the above statement is incorrect, and he keeps the stack as a curiosity and nothing else. Fancy keeping a corn stack as a curiosity! Not a very profitable one, I should say, and most people would prefer to sell the stack and invest its value at five per cent. But surely the ancient corn stack was not always a curiosity? In its early years, before it became famous on account of its age, there must have been reasons other than the one mentioned by your correspondent why it was not threshed out and utilised. Of course, if Mr. Selby came into possession of the stack after it had fame thrust upon it on account of its age, one can understand him keeping it as a curiosity; but if the statement made at the time the stack was illustrated is incorrect, it would be interesting to know the reason why it was not threshed out long before it got old and became a curiosity.—Yours, &c., LUX.

December 27, 1907.

Farming in North Lincolnshire.

SIR,—Things are going smoothly on the farm, if it be rather wet. We thrash barley when we can, and strange to say we have a fair yield, contrary to expectations, for does it not say in the text books that we cannot have corn without sun? Our opinions alter: solar heat is not required.

As to prices, wheat at 36s. and barley at 30s. is an improvement, though still a miserable price for the former. Beef at 7s per 14 lb. for Christmas quality is not enough, but the foreigner, who pays no rates and taxes, rules the market. Mutton is higher luckily, but we sell little at present.

Potatoes were scarce and dear, and then Continental caused a slump, since which it has been very difficult to move many.

Potato-land wheat was sown later than usual, and in a sodden soil. The latter rains have destroyed much in some districts; indeed, some fields are quite covered.

But to leave farming, I wish to let you know that it is Christmas up here, and our genial feelings supervene, and I wish the Editor of the MARK LANE EXPRESS a happy time and a prosperous New Year, and with you I couple your readers. NORTH LINDSEY.

During the last few weeks the estates of Lord Penrhyn and Mr. Assheton Smith, of Vaynol, in South Carnarvonshire, have been under the hammer, and they realised £150,000. In almost every instance the tenants, aided by grants from the county council, have purchased their farms, and now practically the whole of South Carnarvonshire belongs to tenant farmers. Both Lord Penrhyn and Mr. Assheton Smith gave the tenants every encouragement to buy their farms.

Questions and Answers.

FARM.

Manuring Grass Land.—I am hoping to use the manure from the house and stables (three horses and a pig) on my grass land. Should I add to this to increase its usefulness?—S. T.

ANSWER: You can utilise this manure from your house and stable by pouring it on the land with great advantage, as liquid manure is an excellent source of plant food, and there is nothing you need add to the liquid to increase its value. Indeed, if it is very strong it might be an advantage to dilute it somewhat with water, so as to make it cover a larger area. Whether the manure will be sufficient for the land depends on the extent of it, and also its condition, but, as a rule, something more than liquid manure is needed in order to get a good growth of grass. If the land is in good heart, and has been fairly well manured in recent years, probably the liquid manure, which is really a stimulant, would be sufficient to insure a good growth of grass; but if the herbage is thin and poor, we would suggest that you give in addition a dressing of basic slag at the rate of 5 or 6 cwt. to the acre.

VETERINARY.

Calves with Diarrhœa.—Can you please tell me the cause of newborn calves having diarrhœa, also a remedy for same? They are taken from the mothers as soon as born, and are fed with warm milk and water.—Reg.

ANSWER: We can tell you the cause, but you must separate the "diarrhœa in calves" from which your calves suffer from the diarrhœa associated with indigestion and the diarrhœa due to gastro-intestinal catarrh, and look on it as an infectious disease. It is one of a group of epizootic diseases due to pasteurella. When "scour" is present from birth, or the calves are practically born scouring, the pasteurella organisms gain access through the open umbilicus. There is no "remedy" in the sense you obviously understand it. It is of no use giving anything to the calves. The pharmacopœia has been racked for a remedy without success, and even if one were found the youngsters would be dead before it could be got to act. Years ago, long before the cause was discovered, this form of "white scour," which also affects foals, lambs, pigs, and puppies in about the order named, was known as infectious dysentery of young animals—dysenteria neonatorum—but shortly before his death the actual cause was elucidated by M. Nocard in Ireland. The only remedy is prevention, and this lies in absolute disinfection of the premises and perfect sterilisation of the navel at birth. Would you like to know more about it?—M.R.C.V.S.

LEGAL.

A Responsibility Question.—Can a man possessing a freehold house, leasehold property, &c., turn over all his possessions and responsibility to his wife?—T. H

ANSWER: You can get rid of all your possessions to your wife, but your responsibilities are quite a different matter. If you have creditors, notwithstanding the settlement of gift, they can sue you and make you bankrupt, and follow the property within certain limits of time. You will be also liable in respect of other responsibilities. The transfer of your possessions is quite an easy matter.—BARRISTER-AT-LAW.

Liability for Dilapidations.—We have some leasehold property, and on June 4 the solicitors of the ground landlord sent us in a list of things that were wanting to be done; painting the outsides was one, and that was done last year. It is weekly, and we hold the lease over seventy years. They gave us three calendar months. The two houses are in good repair and good tenants. Before the three months we wrote, as well as our builder, stating all was done but the painting of the outside, which was done last year. Only this week we got a lawyer's letter charging over £5, saying other little things are wanting to be done, but not saying what. If not paid a writ will be served forthwith. Please say if we are liable. We are paying for them through our building society. READER.

ANSWER: The solicitor, no doubt, sent you in a notice of dilapidations, which, I understand, you have practically complied with. How far you have done so I am unable to say, and I should be sorry to advise you unless I knew a great deal more of the facts. If you desire to contest the matter it would be advisable for you to obtain the services of a solicitor.—BARRISTER-AT-LAW.

POULTRY.

Scab on Ear Lobe.—I have a Black Minorca cockerel that has a kind of scab on ear lobe. Would you kindly tell me through your valuable paper the cause and how I could remove it as I want to show it [illegible] zine ointment, but that seems too drastic [illegible] it comes again.—M. L.

ANSWER: In all probability the scab is the result of a peck on the lobe. First of all, it should be moistened with [illegible] and after it is quite pliable, the whole can be carefully removed, when [illegible] with boric powder for a few days will restore the lobe to [illegible]. Minorcas which are [illegible] in the open merely have [illegible] as the weather affects them [illegible].

Mating Black Leghorns.—I have a cockerel and seven pullets (brother and sisters), seven months old, which I wish to mate together. I should be glad if you will let me know when to put cockerel with pullets, as I want [illegible]. One or two of the pullets are [illegible]. G. F.

ANSWER: It is a great mistake to mate brothers and sisters together [illegible] are required for [illegible], as the stamina of the produce is seriously affected. These pullets could be profitably mated at the end of this month with an unrelated cockerel.

Fertilisers and Feeding Stuffs.

Basic Slag for Light Soils.

The special advantage of applying basic slag in liberal quantities to poor pastures on clay has been recognised from the time of the first use of the fertiliser.

The great improvement in the quality of the herbage that can be thus obtained is now so generally known as to need no comment, but a few words about the application of slag to the lighter class of soils may not be out of place.

In consequence of the result of numerous experiments and observations the use of slag has been gradually extending, and it is now being applied with marked benefit to hay lands and pasture on light soils, but on such soils it must be used in conjunction with potash salts. This is a point to be kept well in mind and acted upon.

Clay soils contain naturally an abundant supply of potash, which the free lime in the slag renders available, but in light soils potash is naturally deficient, and therefore in the treatment of such land it must be added, in order to enable the slag to act beneficially.

The two fertilisers co-operate and supplement one another in the encouragement of the clovers and fine grasses of pastures. On light lands slag without potash produces little effect, and similarly potash without phosphoric acid is of small avail.

The neglect of this consideration has been frequently the cause of disappointment with the results obtained.

The Calculation of Equivalent Manurial Values.

By George Cawkwell Phillips.

(*The first part of this address appeared in our last issue.*)

This value can only be assessed on the quantity of certain chemical elements possessing fertilising qualities equivalent to the same elements present in commercial manures of equal value, hence the term "full equivalent manurial value."

The problem which the valuer has to solve is this :—

What proportion of the total weight of the food used passes into the manure which the outgoer leaves behind ?

Chemical analyses and careful observation alone can give the solution.

Hence the need of the chemist and the necessity for tables which will inform the valuer on this point, and be accepted as of reliable authority.

It seems to be generally conceded that in this respect the revised table prepared by Messrs. Voelcker and Hall furnishes all that could be desired, having been compiled from the analyses of a great variety of feeding stuffs, the conducting of a number of practical experiments, and the ascertaining of the unit values of the three chief manurial constituents—viz., nitrogen, phosphoric acid, and potash—deduced from the average price of these elements in a large number of manures in ordinary use.

It should be distinctly understood that the prices per unit of the various constituents dealt with in the tables are not the prices of any one commercial commodity, but they are in each case abstract figures deduced from the price current of a great variety of commodities on the market, each of which contains a greater or less quantity of the chemical elements named in the table.

These figures will probably need revision from time to time, just as the bank rate controlled by the governors of the Bank of England rises or falls. This revision should not be made by individual valuers, but be controlled by some properly constituted governing body invested with Parliamentary powers and responsibilities.

In accepting Messrs. Voelcker and Hall's table as a standard of value *pro tem*, we must never lose sight of the fact that only half the full manurial value of the nitrogen and three-fourths of the phosphoric acid are taken as "the full equivalent manurial value" of such elements as go into the farmyard manure left on the holding, and from which no crop has been taken.

Where one crop has been taken the "full equivalent manurial value" is further reduced by taking one-half of the first half, and so on with each crop taken by the outgoer after the application of the farmyard manure.

In order to make this point perfectly clear, I have compiled an entirely new form of Voelcker and Hall's table. The figures are exactly the same as in their table, but by being differently arranged I venture to think that the valuable information supplied by them will appeal more clearly and forcibly to the average valuer, and more especially to those who are not continually occupied in this kind of work, or well acquainted with agricultural chemistry.

I have also added for comparison (1) the table of Lawes and Gilbert as originally published and revised by them; (2) the scale adopted by the Central Chamber of Agriculture; and finally, with the kind assistance of the Editor of the Mark Lane Express, (3) the prices current at the present time of the various feeding stuffs mentioned in the tables.

In this table each feeding stuff heads a vertical column which contains all the information relating to it, and as the valuer has to deal with only one food at a time he will find it much easier to run his eye down the one column than having to trace a number of figures along a horizontal line, and then refer for comparison to several other tables.

Another point for consideration is this :—The figures in the table do not give the sum of money which is to be awarded to the outgoer as the "full equivalent manurial value" of the feeding stuffs consumed on the holding, but only the calculated theoretical value. For instance, say that 10 tons of decorticated cotton cake had been consumed in the last year of the term, the table gives its theoretical value as under :—

	Total value.	Proportion of value in dung.
One ton contains—	£ s. d.	£ s. d.
6·90 per cent. nitrogen at 12s. .....=	4 2 10	
Half of this is left in the dung		2 1 5
3·10 per cent. phosphoric acid at 3s.....=	9 4	
Three-quarters of this is left in the dung		7 0
2·0 per cent. potash at 4s. =	8 0	
All this is left in the dung		8 0
		2 16 5
Multiply by tons of food used		10
Total theoretical value of 10 tons of decorticated cotton cake, in farmyard manure, on or in the holding, and from which no crop has been taken.....	£28 4 2	

If this quantity had been used in the year before the last and one crop taken afterwards the theoretical value would be one-half the above amount, viz :— £14 2 1

If two crops had been taken only ... £7 1 0

If three crops had been taken only £3 10 6

If ten tons had been used in each of the four last years the claim would be as under :—

	£ s. d.
In the last year.....	28 4 2
In the year before the last	14 2 1
Two years before the last	7 1 0
Three years before the last	3 10 6
Total claim for four years.....	£52 17 9

The Act requires that the full manurial value shall be paid to the outgoer, and if it be an ascertained fact based upon practical experiments made by reputable chemists that manures applied to land four years back give evidence of their presence in the soil, then I take it that the assigned values given to the third and fourth years before the last must be brought into the calculation, and local associations of valuers are acting *ultra vires* in ignoring them. This is why the word *full* is added to the words "equivalent manurial value."

(*To be continued.*)

When Experimental Stations Were Started.

In a quiet little German village the foundation for the first institution for agricultural research under direct Government control and aid was founded about fifty years ago. This was the experimental station organised at the village of Moerkern. At the present time there are in Germany upwards of seventy such stations, guiding and helping the farmers in every branch of agriculture.

It will be noted that the German Government, wise and far-seeing in agricultural questions, started and supported the institution, but in this country some years earlier the celebrated Rothamsted Experimental Station had been founded by the private enterprise and patriotic instinct of Mr. Lawes, afterwards Sir John Bennet Lawes. The Rothamsted station is the best known of all such institutions, and the reports of the results there obtained are carefully studied by scientific agriculturists all over the world.

Latterly a good many other experimental stations have been started in England, and receive grants of money from Government, but on a scale quite inadequate to the importance of the subject and insignificant compared with the amounts expended by other countries.

The first experimental institution in America was established in 1875, and has proved the pioneer of a movement which has advanced enormously the agricultural development of the country.

Within the short period of twenty-five years a number of institutions with similar aims and objects have sprung up and extended through nearly every State of the country. The small original staff of four has gradually increased until it now numbers nearly seven hundred, and the amount annually expended on the work has grown from a few thousand dollars to more than a million dollars, with an elaborate equipment which must represent a money value of millions

The American Government, like the German Government, have always acted on the wise principle that money judiciously expended on the advancement of agriculture was the wisest investment a country could make.

Essential Elements of Food.

In a recent issue we directed attention to the difference of the digestive powers of cattle and pigs, and this leads us to the remark that in feeding animals we should aim at giving such food as is suitable to the species of animal, and even to the individual animal. The food should have the proper digestibility and palatableness to which the species, through a series of generations, has become accustomed. The essential constituents must be present and in the proper ratio to suit the animal's needs.

If food be insufficient, the animal has to draw on its own fat and flesh, which are naturally digested in the body and sent into the blood-stream to make good the deficiency.

Overfeeding, when it exceeds what the animal can retain as fat and flesh, causes digestive disturbances.

In every animal a portion of the food remains undigested, and by its presence helps the bowels to perform their duties regularly. This undigested balance is sometimes called the ballast of the food and is essential to the health of the animal.

Professor Osborne, of the University of Melbourne, in referring to the usefulness of this bulk or ballast, points out that a rabbit fed on pure protein (albuminoids), carbohydrates, fat, salt, and water, will die of inflammation of the bowel, but will live if indigestible material (say, horn shavings) be added to its food. Carnivorous animals require little ballast, but that little is essential. Grazing animals eat enormous masses of material which escape digestion, and they have special digestive mechanisms to deal with this residue. The coarse fibres in fodders are only feebly digested and even the fine cellulose of vegetable cells only partially so. The silica of plants is also feebly absorbed. If a herbivorous animal be given a fodder poor in fibre or with fibres too finely chopped, digestion is impaired, the contents of the bowel tend to become stagnant and putrefaction by bacteria takes place, giving rise to poisonous products which are absorbed. This is well exemplified in cows that "lose their cud" when placed on a fodder too rich and digestible.

The Life of Trees.

The tree which has been calculated to have the longest life is the cypress, which is estimated to live for about 6,000 years. The cypresses at Oaxaca, in Mexico, are reported to be the oldest trees in the world.

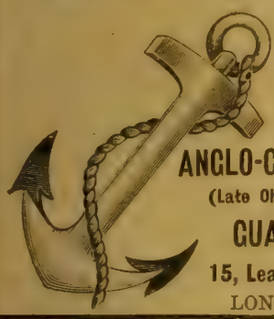
The Yew tree is the next longest liver, attaining the age of 3,000 years.

Then comes the oak with 1,500 years.
The beech with 800 years.
The chestnut with 700 years.
The elm with 500 years.
The larch with 500 years.
The fir with 400 years.

Compound Feeding Cakes.

A good deal of prejudice exists in some minds against the use of compound feeding cakes, and this feeling is justified unless the buyer is careful to get his supplies from firms of reliability and to restrict his purchases to well-known brands; but when these precautions are taken, compound cakes are often a convenient and useful class of food. As the analyst to the Essex County Technical Laboratories remarked in his report, they are, as a rule, well combined and flavoured, and have a composition suitable for the purposes for which they are intended, although the price is often above their nutritive value.

When they can be bought at a fair price from trustworthy people, there is nothing to be said against their use.



We are willing to publish replies in these columns to inquiries relating to the quality and use of fertilisers and feeding stuffs.

THREE RELIABLE CALF MEALS WHICH NEVER DISAPPOINT.

"This 'Cream Equivalent' do smell beautiful, I'] a'most wish I were a Calf."

1. THE "LANCASTER" CALF FOOD.

13/- PER CWT.; OR, IN FOUR CWT. LOTS, 12/6 PER CWT.
Carriage paid to nearest Railway Station.

This Meal does not swell out so far as the "Milk Equivalent," but is much easier to prepare, and is recommended to those who do not personally see to proper preparation.

2. BIBBY'S "MILK EQUIVALENT."

12/6 PER CWT.; OR, IN FOUR CWT. LOTS, 12/- PER CWT.
Carriage paid to nearest Railway Station.

This Meal swells out splendidly, but needs careful preparation. It is, however, a first-class Meal, and probably the most economic in use of all the Calf Meals in the Market.

3. BIBBY'S "CREAM EQUIVALENT."

15/- PER CWT.
Carriage paid to nearest Railway Station.

Is the latest and most popular of our foods; we believe it is the nearest approach to the ideal that has yet been reached in preparations of this kind.

Our new Circular, "How to Rear Calves for the Dairy," will be sent free of cost to any applicant.

ESTABLISHED 1832.

DECEMBER 30, 1907.

Correspondents are requested to address all communications for the Editorial Department to THE EDITOR, "Mark Lane Express," 3, Wellington Street, Strand, London, W.C.

Subscription rates (including postage).—In the United Kingdom: One year, 15s.; Six months, 7s. 6d.; Three months, 3s. 9d. The Colonies and Abroad: One year, 17s. 6d.; Six months, 8s. 9d. Cheques and postal orders to be made payable to the Publisher.

Advertisements, Subscriptions, and business communications should be addressed to THE PUBLISHER, "Mark Lane Express," 3, Wellington Street, Strand, London, W.C.

THE NEW YEAR.

It is our privilige once more to wish our readers a Happy New Year, and we do it in a spirit of sincerity and good fellowship, with an earnest desire that 1908 will turn out to be a year of success and prosperity to the whole of the agricultural fraternity.

As we write the sands are running out with 1907, the bells will soon be ringing out the old and ringing in the new, and the year which twelve months ago we ushered in is like the schoolboy's copybook, filled to the last page, and in turning over the records we find clean leaves and smudged leaves, and work done well side by side with mistakes and blunders.

It is a fair comparison—the past year's work and the filled copybook, and as the schoolboy begins on a new book, so we start in the New Year. It stretches out before us fresh and untried, and with one page open, but we cannot look beyond that. One thing it is well to do—trust the New Year. We are aware of its possibilities both for good and ill, but let us think of the words of Disraeli, and not give way to anticipation of catastrophes which may never come to pass. Our wish is for a Happy New Year, and let us begin then by looking for the happiness. We have enough of the trouble when it comes without anticipating it.

JANUARY CROPPINGS.

The conditions of soil and weather in the first month of the year generally forbid many croppings taking place in January, but occasionally

some soils have been found in a beautifully friable condition meet for barley sowing, and it would not be surprising to hear of some croppings during the month which commences on Wednesday. Some farmers hesitate to sow barley thus early, lest it be killed by the frost or destroyed by wireworm. Others, on the contrary, make it their rule to sow as soon as ever both soil and weather are found perfectly favourable to the operation. Certainly the Brewers' Exhibition competitions have proved that early-sown barley crops may be relied on to yield the best grain for malting, while it has often happened that if an early, favourable condition of things be not embraced, the more natural period for the operation turns out precarious, with perhaps a great difficult in getting the cropping done at all.

Wheat is another grain which has always been put in, more or less, in January, soil and weather being in fitting condition. Owing to the rise in value of that grain, a larger acreage than usual is believed to be in the ground, and possibly, should circumstances and conditions be at all fitting, some material additions may yet be made with spring wheat. The latter, like barley, can scarcely be put in too soon in the New Year if a good seed-bed be obtainable. But a barley crop is always on most soils likely to answer far better than one of spring wheat, unless there be high fertility or abundant manuring.

Where sheep are feeding off swedes and leave rich legacies of droppings behind them, spring wheat sown soon might perhaps be expected to yield satisfactorily. In other cases, of course, chemical fertilisers can be resorted to. But spring wheat has often been sown in the past without this necessary manuring on lands not at all calculated to yield well without it. Fertility must be imparted, if absent, as the condition of success. Past generations of farmers were accustomed to sow the Red Nursery or Talavera varieties when they put in wheat in the first two months of the year, but by cross fertilisation and selection these sorts have been improved upon, and still better kinds are now available for spring cropping.

THE FARMERS' DIARY.

TUESDAY, DECEMBER 31.—Glanville Wootton Great Sale of Live and Dead Stock and of Farm Machinery——Live Stock Sale at Lynn.

WEDNESDAY, JANUARY 1 (NEW YEAR'S DAY).—All the Speculative Markets: The Baltic, The Atlantic, New York Produce Exchange, London and other Stock Exchanges, closed —— Great Annual Prize Barrener Sale at Wincanton —— Duke's Special Live Stock Sale at Dorchester—— Cheese Fair at Oswestry——Cattle Fairs at Congleton, Stockport, Chipping Norton, and Mold——Horse Fairs at Oswestry and Congleton.

THURSDAY, JANUARY 2. — Birmingham Weekly Horse Sales resume——Horse Fairs at Lancaster, Dorking and Montgomery ——Cattle Fairs at Brecon and Montgomery——Sheep Fairs at Dorking and Montgomery.

FRIDAY, JANUARY 3.—Committee on Tuberculosis in Cattle resumes its Sittings——Cattle Fairs at Yeovil and Derby.

SATURDAY, JANUARY 4.—Sheppard's Horse Sales at Leicester resume——Cattle Fairs at Buckingham and Carnarvon.

MONDAY, JANUARY 6.—Tattersall's Horse Sales resume——Cattle Fairs at Bodmin, Plympton, Market Harborough, Aberystwith, and Welshpool —— Horse Fairs at Aberystwith, Welshpool and Market Harborough.

Notes of the Week.

The weather has maintained its reputation for eccentricity right through the year.

A few days ago an acquaintance picked from a hedge near London a bunch of ripe blackberries.

To-day the temperature is like a refrigerator.

Good-bye, Old Year! Welcome, New Year!

Let us, then, be up and doing,
With a heart for any fate;
Still achieving, still pursuing,
Learn to labour and to wait.

Success in the New Year to the independent Agricultural Party.

This is a sunny Boxing Day. According to an old saying a sunny Boxing Day betokens a good financial year.

"Then gold shall be easy to get among the English."

Everyone must have noticed that crosses are a favourite mark on beer barrels. Why?

Because monks were the first brewers of beer, and used the form of a crucifix (a cross) as a sort of trade mark.

It was Bible and beer—and very good wholesome beer they brewed.

Nitro-bacterine is the name of the nitro-culture patented by Professor Bottomley.

Perhaps the Professor or Mr. Stead will explain in what it differs from other nitro-cultures.

"Mama," said little Willie, "we were up at Farmer Crosby's yard watching the eggs in his incubator."

"And did you see anything come out?"

"Oh, yes; Farmer Crosby came out and ran after us."

The British sparrow is a bold and enterprising colonist.

In Australia, says the *New South Wales Gazette*, it presents a problem which calls for immediate and continuous action.

In Nova Scotia there is a flourishing fox farm. It is not the brushes of the animals but the skins that are wanted.

Skins in the green condition are worth from £40 to £50 each.

In 1840 this country, says Sir W. Gilbey, imported 96,000,000 eggs. Last year the number had reached the enormous total of 2,265,000,000.

The labour bill of the English hop growers is over £1,500,000 a year.

If the industry is ruined by foreign importations or other causes, the unemployed problem in Kent will be accentuated in an acute fashion.

And it would be felt in thousands of homes in the East End of London.

In the New Forest pigs have the bad habit of lying down in the roads at night, so it sometimes happens that collisions occur between two kinds of road-hogs.

The animal road-hogs are acting within the legal rights of their owners who have rights of pasturage in the forest.

Berlin requires a quarter of a million Christmas trees to supply the demands of Santa Claus.

Midland Notes.

THIS, in the best of seasons, is usually a dead time, but it is more inactive this year than usual, and the outlook is less bright. Too many of us, instead of looking over more or less green fields, have only great expanses of water to gaze upon. Perhaps that is putting it too strongly; but really the floods this back-end have been very bad—how bad can only properly be realised by those who, like the writer, have had the opportunity of moving about from district to district.

WE expect the slow flowing Avon to be more or less over its low banks each winter. It is long, however, since so many meadows were under water. The Severn valley below Tewkesbury has fared hardly better; the Arrow has been contributing its share to the watery visitation; and the low-lying lands of the Soar Valley in Leicestershire have been looking like a great inland lake. Not only are the fields in this deplorable condition, but many outlying villages have practically been isolated—cut off from their market towns and thrown upon their own resources. You may take a horse or trap along a country road even when it is become a running stream—which indeed some of our most ancient cartways were in the first place—but to walk along it is more than any man can be expected to do. Hence at such times it is always the cottagers who suffer most; and even where the floods do not extend the land is thoroughly waterlogged, so that work in the fields is even less than usual at this time of year. But a touch of winter will change all this, for snow has fallen heavily in many districts.

THE farmers of Warwick and Worcester, Leicester and Stafford, who join to supply Birmingham with milk, will learn with no particular surprise of the city Health Committee's agitation for the closer inspection of cowsheds, &c., outside the urban area. We have heard the same schemes propounded before—not only from Birmingham, and so far the talk has ended in inaction.

ALL the same, this Birmingham movement is an exceedingly important one. The facts are worth recapitulation. The city medical officer—not at any time prone to the methods of the alarmist—reports that, after patient and prolonged investigations, he has found the living germs of tuberculosis in 14 per cent. of the milk sent into Birmingham. The Royal Commission, which has been sitting since 1901, declares that "there is no doubt but that in a certain number of cases the tuberculosis occurring in the human subject, especially in children, is the direct result of the introduction into the human body of the bacillus of bovine tuberculosis, and there can also be no doubt that in the majority at least of these cases the bacillus is introduced through cows' milk." That view is fully accepted by the city Health Committee and by the medical officer. It has been given prominence in the local Press (which exercises more influence in Birmingham than in many large cities), and so far the press has contained nothing on the other side of the question—no hint that the question even has another side.

IN the circumstances the result is inevitable. The public begins to feel itself in danger. It does not know the elementary medical fact that tuberculous germs only, as a rule, develop in an organism which is prepared by weakness to receive them; and it forgets that infinitely more mischief is caused to children by giving them too little milk than by giving them too much. In consequence, the movement for putting under the supervision of the city health inspectors all the cowsheds from which milk is sent into the city, steadily gathers force. And as Liverpool and Manchester, Sheffield and Leeds, have been approached already by the Birmingham authorities, it is extremely likely that the next movement for extended powers of inspection will be a joint one, promoted by these five great corporations, whose influence in Parliament it will difficult to resist.

IN the city of Birmingham itself the corporation veterinary inspector pays monthly visits to each cowshed—there are enough upon the urban area to provide 10 or 12 per cent. of the city's milk—and periodically examines every cow with a view to determining its freedom from disease. It can hardly be said that many rural councils are as thorough in their methods; and the Birmingham agitators find another weapon ready to hand in the latest report of the Local Government Board—a report which comments adversely on the remissness shown by rural councils in adopting and enforcing regulations under the Dairies, Cowsheds, and Milkshops Order of 1885. As country-people themselves, the members of such bodies are generally strongly of opinion that the regulations pressed upon their notice are more troublesome than useful. That, of course, is the reason for their slackness. But it may not be easy to convince a Parliamentary Committee of the correctness of that view.

THERE were one or two matters discussed by the Solihull (Warwickshire) District Council at their last meeting, which have rather more than local interest. One member of the council, it seems, wholly objects to that body cleaning out roadside ditches, on the ground that that duty—and expense—should devolve upon the landowners. As he has laid the facts before the Local Government Board, and objection to various items in the surveyors' accounts is threatened, the upshot of the affair will be awaited with some interest by other rural authorities who have occasionally set their roadmen to the same duty.

December 27, 1907.

HORSES.

Quality—A Definition—Prettiness—A Comparison—Breeding for Quality—Value of Quality—An Example—More Concerning Glanders.

Quality.

WHENEVER the conversation turns upon horses the word "quality" is not long before putting in an appearance. It is perhaps the most useful word in the somewhat limited vocabulary which is available for the description of horses. It is used indiscriminately for praising a horse or for crabbing him. "Look at his quality," says the admirer of some equine wonder, with any number of notes of admiration in his voice. "No quality," says the exponent of the noble art of crabbing, with a sneer which expresses finality.

A Definition.

THERE is no word in such common use amongst horsemen as quality is, yet I question very greatly whether the word means quite the same to any half-dozen men. The way it is used would make it appear that it does not, at any rate. Now, if we go to a dictionary for a definition we are told that quality is "that which makes a thing what it is; property, peculiar power, acquisition, character, rank, superior birth or character." At first sight there does not seem to be much to enlighten us here, though the germ of enlightenment is certainly there. "Superior birth or character" seems in a way to afford the foundation of a definition, though it scarcely goes far enough. Quality in a horse, I take it, is the superior character which, whilst marking its possessor as standing out from the rank and file of his breed, is still consistent with its general attributes. Let me give an illustration. If a heavy horse, such as a Shire or Suffolk Punch, for example, had a head like a Thoroughbred or a Hackney, it would, if my definition is a correct one, be an eyesore; and to say that the head of that horse showed quality would be incorrect, because the head would not be in keeping with the rest of the horse. It would be inconsistent with the rest of his shape and make, and, so to speak, out of drawing.

Prettiness.

QUALITY is not mere prettiness, though the two are often confused. A horse may have any amount of mere prettiness and be of very little value. If one wants to see what a pretty horse looks like there is plenty of opportunity in the drawings and paintings of artists who are not horsemen as well as artists. Their pictures show a weakly, effeminate head, a wonderfully curved neck, legs like those of a deer, and sundry other equine failings which make up a total that it would be difficult to find a market for. Yet there is no getting away from the fact that mere prettiness is what many people do mean by quality if they mean anything at all. And there are some people who are good customers and give good prices, who want in their horses a sort of meritricious prettiness, as well as all the sterling qualities which go to the making of a good horse. In endeavouring to supply the somewhat unreasonable demands of these worthy people there is a danger of missing the substance for the shadow.

A Comparison.

I CAME across a statement the other day which certainly deserves notice. It runs as follows:—"The Shire horse of to-day is, as a whole, deficient in quality, although there are prominent exceptions, but it possesses in a conspicuous degree the characteristic of size. The Clydesdale, on the other hand, is deficient in size, but abounds in quality, activity, and gaiety." I hold no brief for either breed, but I have seen a good deal of both breeds; I have bought and bred both Shires and Clydesdales, and it seems to me that the statement is uncalled for and the comparison between the two breeds unfair. Shire horses have a quality of their own, and if any attempt is made to alter that quality to a quality of another kind it can only be done at the expense of some of the best characteristics of the breed. And the same remark applies to any breed equally with the Shire.

Breeding for Quality.

IT will be within the recollection of many of my readers how a few years ago "mares' heads" predominated in the stallion classes of more than one breed. There was more than one reason for this. One reason for the name, no doubt, was that some stallions of both breeds, if they had not exactly effeminate heads, were at any rate rather weak about the head, and these stallions were so good in other respects that they won a great many prizes. The natural consequence was that they were mated with several of the best mares of the day, and the result was as I have already stated. And so we saw class after class of good-looking colts, a large proportion of which were sadly lacking in masculine character, and those who should have known better talked about their fine quality. A few good judges shook their heads—pointed out that the classes of mares were immeasurably superior to those of the stallions, and talked of the dangers which may happen to a breed if there are many stallions who sire good mares and weak stallions. Another reason of the effeminate stallions we saw was no doubt that, in order to meet a demand, some breeders were trying to breed more to "quality."

Value of Quality.

IT must not be supposed that quality is to be despised. There could scarcely be a greater mistake, for quality is one of the most important characteristics of a horse. What I wish to emphasise is that it is unfair to look for the quality of one breed in another, or to compare the quality of one breed of horses with another. When a comparison is made between a couple of breeds as in the instance quoted, and it is said that one breed shows more quality than another, the meaning really is that it is lighter. It will be noticed that in all cases where comparisons are made as to the quality that different breeds are possessed of, it is always the lighter breed that is said to have the more quality. If the definition of quality that has been given is a correct one, or even if it is approximately a correct one, such a conclusion is on the face of it absurd. The value of quality in a horse it is impossible to over-estimate, because it covers so many things. It is the opposite of coarseness which is always undesirable. And in this connection is to be found support for the definition of quality which I have given. The feather on the legs of a Shire horse or Clydesdale is not necessarily coarse; but if a Thoroughbred or Hackney could show, or did show, any amount of hair on his legs and about his fetlocks, he would at once be put down as lacking in quality.

Our illustration above is of the Pony Mare Ferniehurst Fortuna, winner of the First Prize in the Class for Pony Mares (barren) or Geldings, not over six years old and not exceeding 13 hands, at the Hackney Horse Society's Show this year. Ferniehurst Fortuna is a five-year-old by Sir Horace out of Good Luck, and was bred and exhibited by Mr. G. C. Waud, Ferniehurst, Baildon, Yorks.

An Example.

A LITTLE higher up attention has been drawn to the unfairness of comparing the quality of the Cleveland Bay with the quality of the Yorkshire Coach Horse. An instance of this came to my notice at one of the more important horse shows last year. A gentleman, well known in the horse world, was criticising a class of stallions, and amongst other things he found fault with was the head of a typical Cleveland Bay stallion. "Such a common horse is of no use nowadays," said he; "what we want is a horse with more quality. Our heavy haulage is done by power now. We want our harness horses to look pretty." And much more to the same effect, and he compared the quality of the Cleveland Bay with the quality of the Yorkshire Coach Horse, which, as everyone knows, is the Cleveland Bay with a strong infusion of Thoroughbred blood introduced. Now, setting aside the fact that there are such things as artillery and transport to be horsed, our friend went a little too far in saying there was no use for the Cleveland Bay in the twentieth century,

as he himself admitted somewhat later on. The friend he was talking to did not enter into any argument; he waited till the classes for Cleveland Bay mares and Cleveland Bay fillies came into the ring. The critic was enthusiastic in his praises of some of these mare and fillies. "They were the right sort to breed from" was the opinion he expressed. And then his friend pointed out to him that if it had not been for the stallions he had despised there would not have been the mares that he admired.

More Concerning Glanders.

COLONEL HALL WALKER has had some more to say about glanders, and there is some talk of bringing the prevalence of the disease before the House of Commons. Colonel Hall Walker, however, has perhaps gone a little too far in some of his statements. It was scarcely fair to say that veterinary surgeons do not notify the disease because they have no fee for so doing. Veterinary surgeons are well aware of the dangerous character of the disease, and I am sure that in case of any outbreak they would not fail to do their duty in informing the authorities about it. Colonel Hall Walker speaks as if there had been an outbreak amongst racehorses. I have never heard of such an outbreak, nor have I ever heard of any racehorse suffering from the disease. Of course, a racehorse is as liable as any other horse, and if glanders were to break out in a racing or hunting stable it is impossible to estimate the disaster which might ensue. Colonel Hall Walker has perhaps been rather sweeping in his statements, but he has done good service in calling attention to what is undoubtedly a serious danger, and the whole question of glanders, its nature, its habitat, and the best means of stamping it out, call for immediate inquiry. THE LOOKER-ON.

Major Fife on Horse Breeding.

A very interesting lecture on "Horses" was given by Major W. H. Fife at a recent and well-attended meeting held under the auspices of the Northallerton Agricultural Club. As is well known, Major Fife is a breeder of Thoroughbreds and a buyer of horses for the army, so that his remarks were chiefly devoted to light horses. Dealing first with

Hackneys,

he said there were a great many people who were rather fond of them, and who made a great deal of money out of them. They were usually big, heavy-going animals, and it was a very great pity that they were not better than they were. It was certain that they could be much improved, and if they were he might take an interest in them. He certainly would not breed them in the way they were now bred. He was in Newmarket last week, and saw a string of horses being paraded, but amongst the lot there was only one likely-looking chesnut mare which had natural knee action. In his opinion, if they wanted a horse of that sort they should put a good mare to one of the best Hackney stallions which could be procured, a horse with good shoulders and high stepping action, something like a horse called Chibaboo, which had splendid action. The result would be to breed an animal which would be possessed of skill and endurance, and there was no reason why it should lose its high stepping action, for it was highly important that a horse should have more freedom and less "slaving." The Hackneys that were bred in that way must necessarily have much more freedom.

He found that in buying horses for the Army the Hackneys were the greatest of all bogies that he had to keep clear of, because they were not animals that could get over hard ground and endure hardships in a country like South Africa. It was a great pity that more Thoroughbred blood from specially chosen Thoroughbreds was not more generously infused into the Hackney.

A few years ago he suggested to the Hackney Society that they should give special prizes at the Islington Show for the best and most suitable looking Thoroughbred entire horse with good bone and good shoulders, to mate with their Hackney mares, but his advice was not taken. He, however, believed that a class of this sort, where four or five of the best Thoroughbred stallions were chosen and registered in some form or other in the Hackney Stud Book, would have improved their Hackneys, and they could have bred again from the Thoroughbred cross, and made these foals eligible in their Stud Book.

But if they wanted to get horses with straight knees, then the first cross from a Thoroughbred horse with a Hackney mare would prove a valuable one. But unless the Hackney Society altered their rules, and admitted these cross-bred animals into their books, the horses which were so bred would not sell to the foreigner, because no foreigner would go outside their book to buy horses which were not entered in the book.

Ponies.

Passing on to ponies, Major Fife said that pony breeding was always a very unsatisfactory class of breeding, and was very unreliable, because they never knew what kind of a pony they were going to have. They might get a big horse out of a small pony. Some of them, perhaps, had tried to breed Hunters from ponies, but they were sometimes disappointed. He had seen a good weight-carrying Hunter bred out of a pony. Ponies, however, had come into great demand since the introduction of polo, and they fetched tremendous prices. Ponies which previously sold for £30 apiece were now worth £40, and others which were sold for £25 now made £35 apiece. (Hear, hear.) He had the pleasure in taking part in the first game of polo which was ever played in England. That was in 1871, when the 9th Lancers played a polo match against the 10th Hussars. At that time the game was in its infancy, and he and Mr. Ernest Willoughby—who was now so well known as a starter at race meetings—played in it with ponies which were 13 hands high, and with teams of eight aside. There was a tremendous lot of people to witness this great novelty match, amongst whom were their present King and Queen. Polo had made great progress since then.

A Point for Farmers.

There is one point, added Major Fife, which farmers ought to know, and that is as to the height of the pony they are able to play polo on. The rules state 14 hands 2. If you take him to a polo man he is sure to say he is too small or too large, or not good enough class; but never mind, if you know you have a really good, strong serviceable pony, even although he may be 15 hands, take him, the players know how to get him measured down to the regulation height! First, they will take his shoes off, then cut his feet, perhaps give him nothing to eat for twenty-four hours, and give him such a big gallop just before the measurer arrives, when he looks as dejected and drops his shoulders and bends his (the pony's) knees until down he comes to 14.2. He is registered then, and will never have to be measured again, so they at once proceed to feed the pony up again, put his shoes on, and get him into first-class condition! These "wrinkles" may help you farmers, should you breed polo ponies, to get better prices.

The Cart Horse Demand.

Major Fife next dealt with the breeding of Cleveland Bays and Coach horses, which, he remarked, used to be very much more profitable a great many years ago than it was now. He professed that he was a great admirer of the big cart horse, but of the Coach horse he did not profess to know much, as he had never been on his list. That cart horses were profitable to breed he did not deny—in fact, it was said to be one of the best lines in horse breeding. But with many of the omnibus companies using electric trams and motors it must affect breeders of small cart horses, consequently the supply would be diminished. There must be a much smaller demand for "vanners," or van horses, because a great many business men in London were now using motor vehicles to deliver their parcels, so that it was in every way likely that the demand for second-class horses would diminish. He wished to bring this to their notice, for they must admit that the days of light horses must be of the past.

If they had to breed the best horses, they would not have to spare a little expense in getting the best sires, and they must not spare "ten bob" in getting a horse which was in every way suitable to their mares, for there was a great deal in that. Was it better to get a Thoroughbred stallion for a big cart mare, or get a Thoroughbred mare and mate her with a carting stallion? They must study this question out for themselves. They ought to think carefully of the faults their mares had, also think of the faults that the entire horse had, and try if possible to counteract them. By a judicious selection they would be able to breed better animals than they would otherwise have done.

Hunters.

Coming to Hunters, he said Hunters were a line in which he had had as much experience as in anything else. He obtained his experience in breeding blood and half-bred stock when he resided at Crompton. He began with two Thoroughbred stallions, because in the Yeomanry, with which he was then connected, they had no suitable horses, and these two Thoroughbred stallions were placed in different parts of the country, but the experiment was so successful that seven or eight stallions were provided, and work was found for them all.

One point he was perfectly sure upon, and that was that there were no good results obtained by mating carting mares with Thoroughbred horses; and therefore he did not advise it. His experience of doing this was that invariably the foal bred was either a "trapper" or a "vanner." Once perhaps in a "blue moon" they might get a right going Hunter, but it was very rare. The best thing to do was to have a well bred mare and put her to a well bred Thoroughbred horse with an authentic pedigree; then they might look for good results.

He thought a great mistake was made at the Islington shows by choosing horses which were a great deal too small and quite unsuitable with mares such as he had described. If they took a mare which could carry 14 st. and put her to one of these blood-horses, there was a very great risk of the stock being on the small side, and it was breeding from these small horses which led people to breed from coarse mares. If farmers made up their minds to breed from those big, coarse mares, they were certain to get great, clumsy horses. But if they got speed and power and the best of blood they had a much better chance of breeding Hunters in that way as compared with the other. It was no use breeding secondary horses, because the foreign horses which were imported into the country interfered very much with their sale, as had also the introduction of motor cars, bicycles, and those sorts of pests.

He thought that breeding Hunters was to a certain extent very risky, especially if they did not come out at the top of the tree, but, as everyone knew, the breeding of a first-class Hunter paid very well. He thought there was going to be a great dearth of good horses, especially Hunters, as many more were required nowadays when not only the man hunted, but also his wife and daughters.

Mistakes in Feeding.

In the old days no one could make a horse a good Hunter unless he was a good rider, and knew how to train a horse to become a hunter. In the old way they used to have rough riders, and Lord Midleton produced all the Hunters which were used by the huntsmen at his kennels, so that they had to breed an enormous number of horses, and always had at least half-a-dozen foals under training.

It was a great mistake for a farmer to be in a great hurry to sell his Hunters when they were four-year-olds. There was a much better market for them when they were five-year-olds, and they cost less to keep than when they were foals.

The time to give a sack of corn was when they had young foals, and during their first winter they should be well looked after. Farmers made a great mistake in trying to develop them when they got two or three years old, because it was when they were foals and during their first winter, that they wanted the best food and attention that they could possibly get.

The System of Training

horses was very different from what it used to be. He learnt his first lesson from Professor Galvayne, at Middlesbrough, whose system of breaking in horses was to bring their heads round towards their tails with a halter, and the horse went round until he "gave in," and then anything could be done with him. The horse was allowed to have his kick out, and after that anything could be done with him. Then there was the simple way of fetching him down, which was an easy way of training horses. He remembered that the breaking in of cavalry chargers was a very slow process.

Breeding Blood Stocks.

In conclusion Major Fife said the most interesting thing of all was the breeding of blood stock, because a man could not only come in and cut his cake, but he could still have it. They could sell their blood yearlings and then have the pleasure of watching their career on the turf. If a man had luck, breeding blood stock paid very well, but if he had bad luck he could lose a lot of money. He had had some very rough years, and he had had some good ones, but results were altogether misleading.

AUCTION SALES.

Auctioneers will favour us by sending in their advertisements as early in the week as possible.

Charges for announcements under this heading Six Shillings an inch.

By Messrs. IRELAND.

Norwich, Norfolk.—Ireland's Norwich Hill Auction Mart (established 50 years). Every Saturday. Fat Bullocks and Sheep, Store Sheep. Special Spring and Autumn Store Cattle Sales.

MESSRS. IRELAND solicit consignments for these important weekly sales; best market value assured.

Cattle consigned to Ireland's, Norwich, will be properly fed and carefully attended to.

All cattle weighed upon entry to the sale ring if desired. Full particulars to be sent to—

IRELAND'S, Auctioneers.

Norwich, Norfolk.

It is stated that a single ear of maize won for its grower £1,507 in prizes at the National Corn Exhibition at Chicago, it being adjudged to be the best and most perfect in a competition open to the world. The ear was of the Boone County white variety, and, including the cob, weighed 23 oz. and contained 1,251 grain seeds, all of good proportions. Rather than let such a production get into other hands, the exhibitor himself paid £50 for it at the auction sale, this price being a world's record.

SHEEP.

Notes and Jottings.

OUR notes and jottings this week make the concluding reference for the current year to the great industry specially represented by them. The good wishes that ushered in the year stand on record, the results of the year do so likewise, and a comparison between the two is easily made, and what is the result? Looking broadly at the year as a whole it can be said, without fear of contradiction, that the result must be put down as being one affording satisfaction alike to the breeder and feeder. Of course, some have made more money than others, some have been more successful than others, but taking the interest as a whole, there have been few years when the general result has come out more satisfactorily than that which has been placed upon record during the past year.

THE price for mutton throughout the year has been a good one, as has also been the price for lamb, and taking the general average price realised, it may be safely assumed that no sheep which has been properly kept has left a debit balance to its owner.

THE qualifying term used in the preceding sentence is used with the object of emphasising the fact that there are, and have been, many sheep sold that have not given a profit, but this has been brought about not by reason of the condition of the market, and the prices ruling there, but by sheer bad management, or want of proper care and attention on the part of the owner.

THIS reflection will probably be resented, but be that so or not, no one who moves amongst flock masters in any considerable way can but fail to observe instances in which neglect or careless management has caused heavy losses.

IT is all very well to say "We cannot help it," but it must be helped. For instance, a case of foot-rot in a flock came before the writer's notice not long ago, Practically every sheep in that flock was more or less lame, simply because due care and attention was not given to the first one that dropped lame. Flocks in this condition cannot possibly thrive and develop and make the proper return for the food consumed.

THE wool market of late has given indications of a decided drop in the price. Several flock masters with whom the writer has come into contact, are pulling very long faces and pointing out the fact that something like 2d. or 3d. per lb. fall in the price has taken place during the last few months. Such flockmasters are deserving of no pity, they might have, like many others, sold their wool earlier in the year, at the higher range of price, but instead of so doing they preferred to have what may be very well termed "a little private gamble" on their own account, their idea being that wool would go up in value. Therefore, they decided to risk it, and having come out on the wrong side it is no use grumbling about it.

LOSS, or rather, the reduction in the receipts from the flock by reason of the fall in the price of wool, has been occasioned not by the flock itself, but because the owner of the flock was not satisfied to take the current rates when his clip was ready for sale, but preferred to speculate, or in other words, he preferred to embark in another business, for his own business, in the first case, was a flock owner and not a wool speculator, but by keeping his wool after it was ready for the market, he added the latter business to his occupation.

THE Smithfield carcase test has been referred to in detail, but there is one point in connection with the sheep classes that deserves some further reference. The judges decided that none of the carcases in the Long-woolled Wether lamb class were of sufficient merit to be awarded a prize.

MANY of those who inspected these classes were astonished at the decision, and a great number questioned its correctness. The final court of appeal—*i.e.*, the Auction sale, we think—confirmed the opinion of those who questioned the correctness of the decision of the judges, and we find that one of these carcases that was not considered good enough to be awarded a prize, Messrs. W. Vivers' Cheviot, realised 5s. 2d. per stone. There was no distinction or prize to add to its attraction, or its value, and yet the expert who judged the class considered it unworthy of notice.

GOING on to the next lamb class—*i.e.*, for the short-woolled—we find that the second prize carcase there, having this additional value of being a prize winner, only realised 5*s.* 2d. Now, if a 5s. 2d. carcase in one class is worthy of the second prize, surely a carcase of the same value in another class must be worthy of some note or other, or, at any rate, cannot be so thoroughly bad as to merit the treatment given it by the judges.

THE object in calling attention the matter dealt with in the preceding paragraph is to bring out prominently the danger there is in judges taking so extreme a cause as in this particular case, particularly as they did so without giving any reason for their decision.

ON all hands it is admitted that the carcase test classes at Smithfield are most valuable and most instructive, and it is most desirable that exhibitors should be given every encouragement to continue to support those classes.

The Pen of Hampshire Down Lambs illustrated above is that with which Mr. T. Fowell Buxton, Waters Place, Ware, Herts, won at the recent Smithfield Club Show the First Prize for Hampshire Down Lambs under 12 months old, and was Reserve for the Cup for the best Hampshire Downs. On December 1 they were 10 months and 1 week old, and when shown weighed 6 cwt. 1 qr. 10 lbs.

LOOKING at the prices realised by this class, and comparing them to others of the same age, we find that most of them realised prices of good average value. Looking at them also in another light, we find that they gave a very satisfactory average daily gain alive, fully equal to the average of their breed, and that they actually dressed out at a higher percentage of carcase weight to live weight than did the cross-bred lambs, in which the first and second awards were given.

THE concluding weeks of the year have witnessed one or two important shipments for export; probably one of the best lots of Hampshire Down sheep that have been exported during the past twelve months was that which left Mr. James Flower's flock last week, numbering eight especially good ram tegs. This consignment is said by one who carefully inspected them to have been one of the best representative lots of Hampshire Down sheep that have ever been sent to Chili. That such should be the case there is no reason to doubt, as everyone knows the high merit and quality of the Cholderton flock.

A VERY fine lot of Kent or Romney Marsh sheep numbering thirty ewes and three rams

were despatched, in the same week, from Mr. Arthur Finn's flock at Westbroke. These were sent to a client in Concordia, Argentine, and are the second consignment of this breed that this gentleman has taken from the Westbroke flock, the first lot having given so good satisfaction that he has not only renewed his order, but has taken an increased number.

NUMEROUS other selections have been sent away to different countries beyond the seas from many of our flocks, but specified details of these shipments have not been given. Amongst them have been several from the well-known flock owned by Mr. H. Dudding in Lincoln, and other Lincoln breeders.

Dorset Down Sheep Breeders' Association.

At the second annual meeting of the above association, held at Dorchester, the president, Colonel R. Williams, M.P., submitted the accounts for the past year and the council's report, from which it appeared that there had been a steady increase of membership, the association now numbering over seventy flockmasters, owning nearly 40,000 sheep. The finances of the society were equally satisfactory; the first year closed with a deficit of £9 12s. 8d., and, after paying all expenses, this year closed with a credit balance of £34 10s. 8d., and it was pointed out that from the revenue of these two years the costs of incorporation, amounting to over £60, had been paid.

In moving the re-election of Colonel R. Williams as their president for the ensuing year, Mr. A. O. Symes alluded to the practical support Colonel Williams had always given the association from its commencement, which was only one of many instances in which he had shown his interest in the welfare of agriculture.

The resolution was seconded by Mr. G. Wood Homer, and carried unanimously.

Colonel Williams, in consenting to accept the presidency of the association for another year, thanked the members, and added it was an office he valued and appreciated.

Colonel W. E. Brymer, Colonel E. M. Mansel-Pleydell, and Mr. H. F. Frampton were re-elected vice-presidents, and, as Colonel Simonds (who rendered valuable help in the formation of the association) did not wish to be re-elected, feeling it was a position that should be occupied by a large landowner, it was resolved to ask the Earl of Ilchester if he would accept the office.

Mr. E. B. Duke, the secretary, who was re-elected, reported that four classes for Dorset Down sheep had been arranged at the Bath and West of England Show next year—namely, a class for three ewe lambs, one for three two-teeth ewes, one for three ram lambs, and another for one two-teeth ram, with prizes of £10, £5, and £2 in each class, the total prize money of £68 being raised by a handsome donation of £30 from Colonel Williams, £17 from the funds of the association, and £21 from the Bath and West of England Society. It was also decided to endeavour to obtain a class for three wether lambs at Smithfield, the necessary prize money being offered in the room.

The meeting closed with a hearty vote of thanks to Colonel Williams for presiding that day, and for his generous subscription, which had enabled four classes to be formed at the forthcoming show.

Shortcomings of English Wool Growers.

Speaking at the first annual meeting of the Home Wool Buyers' Association, Mr. F. Willey, president, said the work done had justified the formation of the association. Their object was to see if some means could be devised whereby buyers and sellers of wool could work in greater unison, and thus derive benefits which otherwise it would be impossible to obtain. Their primary object was to induce growers of wool to bring their produce to market in better condition for use by the manufacturer. If that were done growers would benefit by the better price paid for their produce. Already as a result of the action taken by that association he had had letters from Australia and various parts of this country asking his opinion on various phases of the subject. At their last meeting reference was made to some districts in this country which were much at fault because of the manner in which they marketed their wool, and both from personal observation and from reports by others he was glad to be able to say that there had been an improvement in those particular districts, especially the Yorkshire Wolds.

Home growers needed to remember that America was their best customer, and that they could not afford to pay a duty of 6d. per lb. on dirt, straw, and grease. If home grown wool could be sent to the United States of America in the best fashion there would be an increasing demand for it, and as a logical conclusion improved prices paid.

There had always been a desire to get rid of what they in the trade called "tar marks." The tar was used for branding sheep, but when the wool came to be manufactured tar, being an insoluble article, had a very injurious effect. If some device could be invented whereby the sheep could be marked with an effectual brand which would be soluble in water an inestimable benefit would be conferred upon both growers and consumers.

Mr. Alex Willison, president of the Scotch Wool Buyers' Association, said the subject of tar in wool was one of increasing importance in Scotland. The fact was farmers did as their fathers did before them. They pursued their present course not with the intention of deceiving, but because their fathers had done so. As a rule it was carelessness or ignorance of the description of the article they were dealing with. It was a remarkable fact that if there was one part of their business concerning which farmers were wholly indifferent it was with regard to their wool.

Alluding to the question of "daggings," Mr. Willison said that a farmer had been ordered to pay about £10 expenses for supplying a quantity of gray hog wool containing a large number of dags, and when that became more widely known an improvement was anticipated.

Mr. J. W. Collinson, alluding to the subject of tar in wool, said he had had submitted to him various samples of materials by way of substitution for tar for branding sheep, and he thought one of them would meet their requirements. It was a beautiful material, and could be applied by the ordinary means. It was made up in three colours—red, black, and blue—all of which were guaranteed to stand, and it seemed to him that both in its consistency and general character to be just about what they wanted. Experiments were still in progress, and he would report to them later.

CATTLE.

Notes and Jottings.

AT the time of writing we seldom recollect the weather so totally unseasonable, or, to express it in another way, so unsuitable to the season. All the leading fat stock markets and auctions have been filled to repletion with high-class supplies of Christmas beef which the butchers have been, practically, able to purchase at their own prices. Trade has certainly been most disappointing, and animals that are leaving any profit behind to the feeder are few and far between. Butchers have certainly got their premises stocked cheaply, but with the damp, muggy weather which prevailed they were at their wits' end how to proceed.

LOOKING through the various reports of the Christmas Cattle Market at Islington and comparing the numbers forward this year as compared with the past dead-meat days, the falling off in numbers is scarcely credible. However, this is all due to change of commercial principles, and is pretty certain to continue. In these reports there are two or three matters that strike one as needing some little explanation, the greatest of which is perhaps the quotations per stone of the different breeds. To begin with, the Aberdeen Scots are placed at the top, followed by the North Devon contingent, but we find in nearly every report that the majority of buyers in the market consider the Devons fully equal in every point. Why then there should be 4d. per stone difference in the quotations is a little mysterious.

IF you mention this matter to purveyors of Devon beef, they tell you at once that the price they have paid has been fully equal to the prices at which the Scotch are quoted; then we go further, and we find the Herefords and runts of the very best quality are given a still lower quotation; but perhaps the most mysterious comparison of them all is that at Deptford, we find the foreign cattle quoted at just the same figures; this is not as it should be with the best English produced meat. The weights of the different breeds may possibly affect these quotations in a measure, and the same may also be said in the matter of offals, as it is well known some breeds will offal twice the cash amount of others.

THE Royal Agricultural Society is bringing out an admirably comprehensive schedule for the Newcastle-on-Tyne Show, which there is little doubt will be as well patronised as Lincoln last year. It will be a very far cry for some of the breeds to be railed from Cornwall or Devon, or even the Sussex and Channel Island stock up to this northern ground, but breeders may take courage from the fact that there are good through lines from point to point, and by fast trains their animals will be conveyed such long journeys in a shorter time and with less discomfort than they would in a quarter that distance on cross country branches. Northern breeds are pretty certain to be represented, such as the Ayrshire, Highlander, Galloway, which have been but little exhibited from the south.

IF the demand for smalll holdings continues to increase at its present rate some of these breeds are pretty certain to have a good time of it. There are not many breeds better adapted to making a small holding profitable than is the Ayrshire. At all times a hardy and hearty doer, taking care of herself upon medium rations, she will yield pretty well a maximum profit either in milk, butter, or cheese, and she is a comely little cow withal to look at.

THE block test at Smithfield appears, on the whole, to have gone off more favourably than usual. The champion bullock, scaling just over 100 stones, and being of sufficient quality to realise 6s. per stone at this dull time, is proof that feeders are waking up to the art of producing the very best. It was very satisfactory that several different breeds came out almost as favourably as the winners; this is as it should be. It would be very interesting to know by what method of feeding or foods the champion was able to give such a good account.

AMERICA continues to send in enormous supplies to her leading markets; some of these are not the best of quality, indeed very few come under the denomination of "top notchers." It is more than probable that ere long a good market will open up for any of this class of animal on the Continent of Europe, where now an enormous quantity of horseflesh is consumed, and then much more wholesome food will be provided for the working classes.

VETERINARY.

Tetanus or Locked Jaw.

Recently a querist ("J. M.," page 557) wrote concerning a case in which "something like lock-jaw set in," and he concluded with the remark, "there are three others in the same house with it, and I have not removed them, as I did not think it anything infectious."

We need not stay to discuss here the particular malady from which the calf in question suffered, or whether it had locked jaw or not, our object being to show tetanus a specific disease in which direct contagion is possible.

There are very few owners of animals who have not heard of "lock-jaw," and the intense dread of it exhibited by the public generally at once stamps it as a most serious malady—a cut or injury to the thumb, or to the big toe, being sufficient to immediately conjure up visions of a permanent spasm of the voluntary muscles and obstinate fixing of the jaws, and put the injured one and his friends in a most unnecessary state of excitement as to the probable results. Thus tetanus is invariably associated in the popular mind with a wound, but beyond a hazy notion that in some way or another locked-jaw is more likely to supervene in a certain class of wound, or wounds of certain parts, than on others—which is in the main correct—popular knowledge of the disease does not seem to extend, and only very few outside the medical and veterinary professions appear to have grasped the fact that tetanus is a specific contagious disease, notwithstanding the many years that have elapsed since it was first thought that the symptoms resulted from specific blood intoxication, and that it is more than twenty years since the existence of a specific bacillus was demonstrated. It is the absence of any wound in a case of locked-jaw that seems to puzzle many owners of animals who are not exactly up-to-date concerning the etiology of tetanus.

It has always been recognised that locked-jaw was more rife in some districts than others, that there were parts of the country where it was quite unknown in either the traumatic or idiopathic forms into which it used to be divided; that in others it occurred only occasionally, usually in isolated cases traceable to wounds, while in other places tetanus of both varieties was extremely prevalent. The records of human surgery point in the same direction. In certain battles a large percentage of the wounded lying on the field, which used not to be cleared so rapidly in days before the Geneva Cross was so respected, have

(*Continued on page 808*).

Live Stock Record.

DIRECTORY OF BRITISH PEDIGREE STOCK OWNERS.

**** The charge for Advertisements (if set in small type) under classified headings in this section is one penny per word each insertion.*

HORSES.

SHIRES.

BLAGDON SHIRE HORSE STUD. (Established 1879). Proprietor, CLEMENT KEEVIL, Billington, Leighton Buzzard, Beds. (late of Blagdon, Malden, Surrey). High-class animals for sale of all ages and both sexes; also massive sound Stallions to let for the season.

CONCHAR, JOHN, Wylde Green, Birmingham. Breeder of High-class SHIRES and HACKNEYS. Several have been successful in the showyard. Colts and Fillies by the leading Stallions of the day.

CROSS, J. L., Catthorpe Towers, Rugby. Shire Stallions, Mares, &c. Also Red Shorthorn Bulls from milking strains, and Oxford Down Sheep.—Apply F. CAMPBELL, Catthorpe, Rugby.

GRIFFIN, F. W., Boro' Fen, Peterboro'. Shire Stallions, Mares, and Fillies for sale, in natural condition; 40 pedigree mares kept for breeding; every facility to foreign buyers.

JACKSON, R. NEWTON, Blackbrooke, Pontrilas, Hereford. Stud Horses: Lockinge Lord of Misrule and Lockinge Bonny Lad, both by Lockinge Forester, full brother to Lockinge Forest King. Colts and Fillies for Sale.

JOHNSON, WALTER, Hatfield, Doncaster. Stud Horse, Lambton King 16757; Stallions for hire; weighty young Stallions, Mares, and Fillies on Sale.

MUNTZ, FREDERICK ERNEST, Umberslade, Hockley Heath, Warwickshire. Shire Stallions, Mares, Fillies, prize-winners.—Particulars from Mr. JOHN T. B. HARTLEY, Estate Office.

MUNTZ, Sir P. ALBERT, M.P., Dunsmore, Rugby.—SHIRE-BRED STALLIONS, COLTS, MARES and FILLIES. About a hundred of all ages. Prize-winners London and other leading shows. Also high-class Shropshire SHEEP, winners first prize at Royal Agricultural, 1886, second in 1887, and first in 1888.—Apply THOMAS EWART, Dunsmore.

NOTTINGHAM CORPORATION, STOKE FARM.—Shire Stallions, Mares, Fillies, and Geldings of fashionable breeding, including prize-winners, on Sale. Inspection invited, Visitors met.—Address A. AVIS, Stoke Bardolph, Nottingham.

PEARSON, E. E., Brickendonbury, Hertford. Shire Stallions, Mares and Stock for service and sale; prize winners. Stations: Hertford, Great Eastern and Great Northern.—Apply Estate Office, Brickendonbury, Hertford.

ROWELL, JOHN, Bury, Huntingdon. Breeder Shires and Hackneys; Stallions for sale, hire, or service at home; mares and fillies for sale.

WHITEHEAD, Robert, Fashionably bred mares and fillies in natural condition on Sale. Stallion, Bodenham King 17177.—Apply J. M. JOHNSTONE, Hargate Hall, Buxton. Station, and telegrams, Millers Dale.

HACKNEYS, &c.

BENSON, ALFRED, Upper Gatton Park, Merstham, Surrey. Hackney Stallions: Copper King 7764, reserve champion, London Hackney Shows, 1905 and 1906; yearling Colts and Fillies by Copper King and other well-known Stallions for sale. For particulars, pedigrees, &c., apply to T. Hyett.

MOORE, HENRY, Burn Butts, Cranswick, Hull. Pedigree Stud of HACKNEYS, including many prize-winners, yearlings, two years, and others.—Can be seen on application to Henry Moore.

SMITH, THOMAS, Shirley Stud, Hall Green, Birmingham. Breeder of Pedigree Hackneys and Ponies. Owner Hackney Stallion, "Viscount Hopwood" 8686; Pony Stallions, "Pinderfields Horace" 7952, "Shirley King Horace" 9882. Prize winners on sale.

WHITWORTH, ROBERT, Warley Stud, Halifax, and Londesboro' Stud, Market Weighton. Hackney Stallions: Polonius, Edenmynag, Beckingham Squire 8078. Hackneys and Harness Horses always on sale. Matched pairs a speciality.

PONIES.

BEALE, Mrs. A. J., Cacketts, Cudham, Kent. Prize-bred Pedigree Shetlands for sale; three grand Stallions at stud.

MILLER, W. S., Forest Lodge, Brecon, South Wales. Extensive Breeder and Exporter of best class of Welsh Mountain Ponies and Cobs.

CATTLE.

SHORTHORNS.

BELL, CHARLES, Norley Hall, Norley, Cheshire. Shorthorn Bulls for sale, from Kirklevington, Red Rose, Barrington, and Cruickshank tribes. Telegrams "Norley"; railway stations, Acton Bridge and Delamere.

COWLEY Manor Shorthorn Herd, property of James Horlick, Esq. Bulls and Heifers of choicest breeding. Cruickshank and Bates blood, successful in dairy and showyard.—Apply, W. HITCH, Estate Office, Cowley, near Cheltenham.

MOSLEY, Sir OSWALD.—High-class Shorthorns. Home Farm, Rolleston Hall. Bulls and Heifers on sale.—Apply A. E. Beck, Rolleston, Burton-on-Trent.

CATTLE—*continued.*

SHORTHORNS—*continued.*

DUDDING, MR. HY., Riby Grove, Great Grimsby, has for inspection and sale the largest pure herd of SHORTHORNS in the county, which comprise the best Bates, Booth, Cruikshank and Scotch blood. The prize bulls recently used and now in service are Prince Alastair 89647, a noted winner, and sold at the Riby Sale, 1906, for 1,000 gs.; Scottish Daisy Duke 79916, Merry Squire 5th 85626, Stratton Squire 80062, Bapton Favourite 76080, Wanderer's Chief 80210, Royal Pearl 89959, President Pierrepont 92846, Aberdeen 87764, Scottish Standard 97058, and Strowan Butterfly 23rd. In July of last year 51 Shorthorns and 56 Lincoln Rams were sold to average 125 gs. each, realising a total of nearly £14,000. In July this year 53 Shorthorns and 48 Rams averaged over 90 gs. each, with a total of nearly £10,000. Numerous prizes have been won at the leading shows in England by the Riby Shorthorns and Lincoln Sheep. Telegrams: "Dudding, Keelby."

PREECE, JOHN ADNEY, Drayton Home Farm, Thrapston, Northampton.—Herd of 250 Shorthorns, best Bates and Scotch blood; stock Bulls, Duke of Barrington 70th, Primrose Earl 89641, and Royal Baron 93192; Bulls and Heifers for sale.

ROTHWELL, R. R., Much Hoole, near Preston. Pedigree Shorthorns, chiefly Scotch blood. Stock bull Strowan Marquis 13th, winner of many prizes. Young bulls and heifers always on sale.—Apply to D. COLLYER, Estate Office, Miller Arcade, Preston.

WORDSWORTH, Duffcarrig, Gorey, co. Wexford, Ireland. Pedigree Dairy Shorthorns (Cruickshank and Scotch strains). Successful in dairy and showyard. Young Bulls and in-calf Heifers of good colours for sale. Exportation orders executed.

SUSSEX.

BANNISTER, T., Limehurst, Haywards Heath, Sussex (mile from Station, one hour from London). Pedigree Sussex Cattle (descended from the oldest and best strains of blood), unrivalled for their early maturity, the production of the best beef and working oxen, and ability to thrive in all weathers on the roughest fare. Bulls, Cows and Heifers for Sale.

HEREFORDS.

JACKSON, R. NEWTON, Blackbrooke, Pontrilas, Herefordshire. Pure-bred Hereford Cattle, with pedigrees dating back to very early volumes of Herd Book. Bulls and Heifers for Sale at reasonable prices. Shire Horses and Shropshire Sheep.

PULLEY, CHARLES THORNTON, Lower Eaton, Hereford.—Noted prize-winning herd of HEREFORD CATTLE. First prize Royal winners, Protector 19660, 1900; Eaton Champion 21351, 1903; and Ashleaf 3rd, 1905. This herd is headed by Eaton Champion and Glendower 2nd 22196, also a Royal winner. Bulls and Heifers for sale. Also prize-winning Shropshire Sheep.—Apply Mr. HEDLEY JONES, Lower Eaton Estate Office, Hereford.

DEVONS.

BOWERMAN, ALFRED, Capton Williton, Taunton, Breeder of Pedigree Devon Cattle. A speciality for large size, with quality and robust constitutions; colour dark red. Sent to all parts of the world. Prices moderate.

SKINNER, ALFRED C., Pound, Bishops-Lydeard, Somerset. Pedigree Devons, constitution, quality, size, milk; 600 prizes principal shows, many champions; exports most successful; bulls and heifers for sale. Inspection invited.

TRIBLE, ABRAHAM, Halsdon, Holsworthy, North Devon.—Large old-established Herd of big size, strong constitutioned, good milking Devon Cattle. Winners of numerous First and Champion Prizes, R.A.S.E. Champion twice; many exports, all successful. Prices moderate. Tuberculin Test Certificates.

ABERDEEN-ANGUS.

BRIDGES, J. H.—This old-established herd of Aberdeen-Angus cattle of the leading families can be seen at Langshott Home Farm, Horley, Surrey (near Horley Station, L.B. & S.C.R.), and catalogues obtained on application to Mr. Albert Pulling.

CRIDLAN, J. J., Maisemore Park, Gloucester, Erica, Pride of Aberdeen, Lady Ida and other noted tribes. Stock Bulls, Wizard of Maisemore (21,465), Champion and winner of gold medals, 1905; Everwise (24,436), Champion and medal winner, 1907; Bengal of Ballindalloch prize winner, 1906.

HURSLEY PARK HERD OF ABERDEEN-ANGUS CATTLE, the property of Sir George Cooper, Bart., comprising Erica, Pride, Miss Burgess, Lady Ida, Matilda, Jemima of Morlich families. Prizes won during 1906: 7 firsts, 3 seconds, 3 reserves, 1 challenge cup, 2 silver medals, 3 reserve champions. Bulls, Cows, and Heifers for sale.—Catalogues on application to J. E. Thorold, Estate Office, Hursley Park, Winchester.

THE ROCKLIFFE PARK HERD of Aberdeen-Angus Cattle, Ericas and Prides. Stock Bull, Pundit of Preston (17,156), Champion at Highland Show, 1904.—Apply, R. C. SWAN, Rockliffe Park, Darlington.

AYRSHIRES.

WALLACE, JAMES, J.P., Auchenbainzie, Thornhill, Dumfriesshire, Scotland. Breeder of pedigree prize-winning Ayrshire Cattle; hardy, healthy, good milkers; bred for dairy purposes, beauty and style. Bulls and Heifers for sale.

CATTLE—*continued.*

RED POLLS.

CRANWORTH, Rt. Hon. Lord, offers reasonably (from his excellent milking prize RED POLLS, including Champions, both male and female) grand young Bulls, Cows Heifers.—Apply, C. F. STEBBING, Letton, Thetford, England.

JERSEYS & GUERNSEYS.

CARY-ELWES, V., Billing Hall, Northampton. Breeder of Jersey cattle.

FOWLER, P. T., Importer, Watford, Herts. A choice selection of pedigree Jersey and Guernsey Cows, Heifers and young Bulls from prize herds of the Islands; particulars forwarded; inspection invited.

MERTON GRANGE GUERNSEYS.—Property of Frank Hargreaves, Esq. This Herd contains Champion Bull, 1906; also Bull Royal Governor, winner of seven Firsts, and unbeaten 1907. Bulls, Cows and Heifers of best Breeding for Sale.—Telegrams and particulars, W. J. EMPSON, Merton, Gamlingay.

STERN, Sir E. D., Fan Court, Chertsey, Surrey. Herd of pedigree Jersey Cattle. Bulls, Cows and Heifers for sale.

TICHBORNE PARK, GUERNSEY.—Yearling Bulls and Heifers for sale.—Apply, D. MICHIE, Estate Office, Tichborne, Alresford, Hants.

GALLOWAYS.

GRAHAM, ROBERT, Auchengassel, Twynholm, breeder fashionable Galloway Cattle, winners at Royal and Highland Societies Shows. Pedigree Bulls, Cows, and Heifers, also Blue-greys for feeding, for sale. Commissions carefully executed.

KERRIES & DEXTER KERRIES.

CORY, Sir CLIFFORD JOHN, Bart., M.P., Llantarnam Abbey, Monmouthshire. Pedigree Kerries. Championship and other prize-winners, Royal and other Shows.—Llantarnam Station, G.W.R.

RATTRAY, DAVID, Gortnaskehy, Ballybunion, Co. Kerry. Pedigree Prize-winning Herd of Kerries and Dexters. 155 Prizes and Honours won by Cattle from this Herd past three years. Bulls, Cows, and Heifers for sale.

THE DUCHESS OF DEVONSHIRE'S PRIZE-WINNING DEXTER HERD.—During 1904 and 1905 this Herd won more prizes than any other three Dexter Herds combined, including both first and second milking prizes Royal, 1905, and first London Dairy Show, 1906, Bulls, Cows, and Heifers generally for Sale.—CHILD, Compton Place, Eastbourne.

DUTCH.

BROWN, JOHN, Marden Farm, Hertford. Dutch, the best Dairy Cattle in the world. Over 200 head kept. Record, one cow gave 1,615 gallons of milk in 52 weeks. Bulls for sale.

SHEEP.

LINCOLN LONGWOOL.

ANDERSON, JOHN, Barton-on-Humber.—The old Barton Flock of Pure-bred LINCOLN LONGWOOL SHEEP, Flock Book 106. This flock is noted for hard constitutions and fine, lustrous wool. Inspection invited. Telegrams as above.

ATKINSON, T., & SON, North Kelsey, Lincoln. Old-established flock of pure Lincoln Longwools. Rams, Ewes, and Lambs for sale. Noted for great size and long lustrous wool. Have given great satisfaction at home and abroad. Inspection invited

BROCKLEBANK, JOHN, Bassingham, Lincoln (Flock 24). Pure-bred Lincoln Longwool Rams and Ewes. This old flock has been carefully bred for 100 years. Telegrams: Bassingham.

BROOKS, W. J., Stowe Lodge, Weedon, Northants (Registered Flock 165), has for sale Rams and Ewes of best blood.

DRAKES, Wm., Tealby, Market Rasen. Flock No. 72 of Lincoln Longwool Sheep. Rams, Ewes, and Lambs of best blood for sale. Lincoln Red Shorthorns. Prices moderate.

DUDDING, MR. HY., Riby Grove, Great Grimsby, Lincolnshire, has always for inspection and sale the largest flock of pure Lincoln Longwool Sheep in the county, and many prize-winners. They are famous for great size, fine wool, and 150 years' good breeding, and at the home Sales have made the highest prices on record. In July, 1906, 51 shearling rams sold to average £151 each, the record price being made for a single ram, namely, 1,450 gs., and on two other occasions have rams made 1,000 gs. The wonderful success of the Riby sheep at the Royal Show, Lincoln, 1907, and at the Home Sale in July when 48 rams averaged over £94 each, proves that the Riby blood leads the way Champion and premier prizes have been secured in all the leading exhibitions throughout the world. Telegrams "Dudding, Keelby."

MONEY, FRED, Silk Willoughby, Sleaford. Flock 323; established over a century. Four Rams from this flock fetched over £1,300 in the Argentine, February, 1903, one making £700, the record for a single ram in Buenos Ayres. Rams for sale. Inspection invited.

(Continued on page 808.)

SHEEP—*continued.*

LINCOLN LONGWOOL—*continued.*

SMITH, HENRY, jun., Cropwell Butler, Nottingham. Lincoln Longwool Flock No. 7, winner of £2,361 in prizes. Champion pen Lincolns, Smithfield Show, 1896; Association Championship, Leicester, 1897; Association Championship for pen of 3 Shearling Rams, Yorkshire, 1900; Championship, Rutland, 1902, 1903, 1904, 1905, and 1906. Rams, Ewes, and Lambs for sale. Station: Bingham, G.N.R.

LEICESTERS.

SIMPSON BROS., Pilmoor House, Hunmanby, Yorkshire, Breeders of Leicesters (Flock No. 2 in Leicester Book), have always for inspection or sale Rams and Ewes. These Sheep are of great size with heavy fleeces, and include Royal Winners.

HAMPSHIRE DOWNS.

THE CHILMARK FLOCK OF REGISTERED HAMPSHIRE DOWNS.—Owner JAMES FLOWER, Chilwark, Salisbury. Leading Flock in Prize Records. Champions at home and abroad. Since 1894, out of 11 years competing, "The Salisbury Fair Challenge Cup" won eight times, thrice second, with pens of 8 ram lambs; a marvellous record. Prizes taken yearly at the Royal past 13 years; Champions in 1901-02-03-05-06. At the Royal at Derby, 1906, every First Prize, two Seconds, and the Champion were won; an unequalled success!! Champions Birmingham, 1905, over all breeds, Reserve in 1906. Breed Cup and Reserve Champion Short-wools, Smithfield, 1904-05-06. Highest average past 13 years. Bridford Fair, Aug. 12, 100 Ram Lambs, annual sale. Selections for Sale.

COLES, CARY, Manor House, Winterbourne Stoke, Salisbury. Registered HAMPSHIRE DOWNS. Prize-winners Royal, leading English and foreign shows Salisbury Fair, 1900, 1901, 1902, 1904 and 1906, 25 gs. challenge cup. Chicago, 1901, all Champions and firsts for rams and ram lambs. St. Louis Exhibition, 1904, 10 sheep exhibited—all won class prizes, besides grand champions, reserve grand and champions. Annual ram sale August, 1907.—Extraordinary records: Twin ram lambs let for 205 and 120 guineas. Ninety averaged £21 10s. Selections always for Sale.

DIBBEN, JOHN HERBERT, Bishopstone, Salisbury. Breeder of Pure Hampshires. Annual Sale in August, at Salisbury, of 100 Rams and Ram Lambs. Flock consists of 800 Ewes.

OVEY, R. L., Hernes, Henley-on-Thames.—Pedigree HAMPSHIRE DOWN FLOCK, Reg. Vol. IV. Prize-winners leading shows last five years.

STEPHENS, H. C., Cholderton, Salisbury. Registered Hampshire Down Flock; purest and best blood; a leading flock in all prize competitions. True to type and character; hardy constitution, great size, and good wool. The Ewes are kept on the highlands of Salisbury Plain, and are thoroughly hardy. The Cholderton flock is individually numbered, and full pedigrees of Rams and Ewes recorded in the Hampshire Down Flock Book. Rams and Ram Lambs always on Sale.—Apply, JAS. G. KERR, Estate Office, Cholderton, Salisbury.

OXFORD DOWNS.

ADAMS, GEORGE, Royal Prize Farm Flock, Faringdon, Berks. Pure Oxford Down Sheep, Shearling Rams, Ram Lambs, Ewes and Ewe Lambs for Sale. Special arrangements with foreign buyers. Many first prizes at R.A.S.E. and other shows during past 25 years, including 2 first, 2 second, and 4 other prizes, World's Fair, Chicago, and 7 firsts, 4 seconds and champion at Royal Bath and West, Royal Counties, etc., this year.

COWLEY MANOR FLOCK, property of James Horlick, Esq. Pedigree Oxford Downs of best and purest strains. Ewes and Rams for sale privately. Rams sold annually, Cirencester. Prize-winners Royal, Bath and West, and leading Shows.—Apply, W. HITCH, Estate Office, Cowley, near Cheltenham.

HOUGHTON, J. H., Western Farm, Asfordby, Melton Mowbray. 300 Ewe Flock of Pedigree Registered Oxfords. Sales Sept., at Nottingham, Melton, Edinburgh, &c. Ewes and Rams privately in autumn. Many prizes. Inspection invited.

STILGOE, H. W., Adderbury, Banbury. Annual Ram Sale at Oxford. Others on Sale privately; also Ewes. Many First and Champion prizes.

TREADWELL, JOHN, Upper Winchendon, Aylesbury.—Oxford Down Sheep. Annual Ram Sales first Wednesday in August. Prizes won at R.A.S.E. 24 years in succession. Ewes for Sale.

WHITE, JOHN, Ham Court Farm, Bampton, R.S.O., Oxon. Pedigree Oxford Down Sheep of best and purest strains for Sale. Foreign and home buyers invited to inspect.

SOUTHDOWNS.

COOPER, ALLAN, Norton, Bishopstone, Lewes. Registered Southdown Flock, No. 70; trade marked; hardy constitution and good wool. This flock of 520 ewes is kept on its native hills. Rams, ewes and lambs for sale.

SHROPSHIRES.

CORBET, Sir WALTER, Bart.—Registered flock of Shropshires of oldest and purest strains. Noted for true type and first-rate wool. Have won numerous prizes at Bath and West, Shropshire and West Midland, Royal Lancashire, Wirral and Birkenhead, etc. Can be seen at any time on application to Reginald Astley, Acton Reynold, Shrewsbury.

SHEEP—*continued.*

SHROPSHIRES—*continued.*

NOCK, EDWARD, Harrington Hall, Shifnal. Salop, owner of the old Sutton Maddock Pedigree Shropshire Flock. Founded 1832. Winner of prizes at most of the leading shows in England, U.S.A., and Canada.

WENSLEYDALES.

UNDERLEY WENSLEYDALES (Blue-faced) from the best blood obtainable. Successfully exhibited.—Apply, G. G. ROBINSON, Bailiff, Underley Farm, Kirkby Lonsdale.

PIGS.

LARGE WHITES.

CHARLES SPENCER, having taken over the Holywell Manor, St. Ives, Hunts, herd of Large and Middle White Pigs, which won 12 prizes and reserves with 11 exhibits at Derby Royal, will price any of them.

FULWOOD HERD LARGE WHITE YORKSHIRES, property R. R. Rothwell. 200 head bred from winners at leading shows.—Apply to D. COLLYER, Estate Office, Miller Arcade, Preston.

HUGHES, ALFRED, Packwood Grange, Knowle, near Birmingham. Select Herd of Pedigree Large White Yorkshire Pigs, bred from prize-winners. Young Boars and Gilts for Sale at moderate prices.

KIRBY BEDON HERD of Pedigree Large White Pigs of prize-winning strain. Grand young Boars and Gelts for sale at moderate prices. Hardy constitution, size and bone a speciality.—For particulars apply W. MITCHELL, The Vale, Kirby Bedon, near Norwich. Two miles from Trowse Station, G.E.R.

LARGE WHITE PIGS.—Boars and Gilts, eligible for Herd Book; also registered Oxford Down Sheep, descended from Prize-winners. At moderate prices.—J. PHIPPS SMITH, Salford Priors, Evesham.

NOTTINGHAM CORPORATION, STOKE FARM. Herd of Large White Pigs. The oldest and largest Herd in Notts County. Over 100 Breeding Sows kept. Upwards of 600 to select from. Boars and Gilts at moderate prices. Inspection invited.—Apply ARTHUR A. AVIS, Stoke Bardolph, Nottingham.

OWTRAM, HERBERT H., Newland Herd Pedigree Large White Yorkshires, winners many prizes, Champion Cup and Medal; Boars, Gilts, in-pig Sows for sale—FARM BAILIFF, Newland Hall, Bay Horse Station, Lancaster.

SPALDING HERD of Pedigree Large Whites, young stock and in-pig Gilts for Sale. All bred from great winners.—ALFRED W. WHITE, "Hillegom," Spalding.

THE NEWNHAM HALL HERD of Large and Middle White Yorkshire Pigs is one of the largest and oldest herds of pure-bred pigs in the United Kingdom Prices moderate. Inspection invited.—NEVILLE J. HINE Newnham Hall, Baldock, Herts.

THE WATFORD HERD of Large White Yorkshire Pedigree Pigs of the choicest breeding. 100 to choose from. Correspondence invited. Grand young breeding stock always on Sale.—Apply R. AYRE, Bushey Lodge Farm, Watford, Herts (15 miles from London).

WALTON HERD of Pedigree PIGS, owned by Sir Gilbert Greenall, Bart., Walton Hall, Warrington. Large and Middle White Yorkshires, unsurpassed for purity of breed, size and general excellence, as proved by the numerous Championship and Class Prizes won at all the leading shows. A choice selection of Boars and Sows for sale; stock carefully shipped.—Apply to Mr. W. BAINBRIDGE, Walton House, Warrington.

MIDDLE WHITES.

DEWHIRST, A., Ryecroft Farm, Dudley Hill, Bradford. Pedigree Large and Middle White Pigs also a few Berkshires of the choicest breeding. The following prizes have been won in 1902 by pigs bred by myself: 2 champion prizes for the best pig in the show, 36 firsts, 25 seconds, and 6 thirds, with numerous reserves and V.H.C. Send 2 stamps for Illustrated Book.

THE CATTON HERD of Prize-winning MIDDLE WHITE PIGS, property of J. E. Breeze, Edingale, Tamworth. Stock Boar Castlecroft Mikado, 1st Park Royal, 1st Bath and West. Gelts and Boars on Sale. Prices moderate.—Apply BAILIFF, Raddle Farm, Edingale, Tamworth.

LARGE BLACKS.

BANNISTER, T., Limehurst, Haywards Heath. Sussex (mile from Station, one hour from London). Pedigree Large Black Pigs of the best strains of blood, noted for their docility and for the production of a large proportion of lean meat. Good selection of Boars, unrelated Gilts, and in-pig Sows for Sale at reasonable prices.

CATTON HERD OF PRIZE-WINNING LARGE BLACK PIGS.—Stock Boar Trevisguite Excelsior 1487, 1st Devon County, 2nd and Reserve Champion Royal Show, 1906; pigs kept in hardy natural condition; gelts and boars always on sale.—Apply, J. E. Breeze, Edingale, Tamworth. Stations: Croxall, 2½ miles (M.R.); Alrewas, 3½ miles (L.N.W.).

PEDIGREE LARGE BLACKS.—Select Herd-bred from choice Prize Winners. Young Boars and Gilts for sale, moderate prices.—H. J. CLARKE, The Slade, Roughley, Sutton Coldfield.

PIGS—*continued.*

LARGE BLACKS—*continued.*

HASKETON CHAMPION PRIZE HERD OF LARGE BLACK PIGS.—This herd has won the Royal championship three out of four times, and is the only herd having won the breed challenge cup. Record: 47 firsts, 37 seconds, 11 thirds, 126 prize-winning cards; the herd this year being the winners of 14 firsts, 6 seconds, 2 thirds, championship and silver cup in five shows. Gelts and Boars at moderate prices consistent with quality. Exportation a speciality.—Apply, C. F. MARRINER, Hasketon, Woodbridge, Suffolk.

WHEN Breeding, breed from the best Pedigree Large Black Prize-winning Pigs. TREVEGLOS HOPEFUL II., winner of First prizes and R.A.S.E. Silver Challenge Cup, 1907, beating all other Cup winners; also 1st Prize Bath and West, Newport; 1st Royal Counties, Maidenhead; 1st Royal Cornwall, Liskeard; 1st Devon County, Bideford; also 1st prize at the Royal Show, Lincoln, for Boar and Reserve for Champion prize. Boars and Sows for Sale of the above strain at moderate prices.—Apply to JOHN WARNE, Treveglos Farm, St. Mabyn, R.S.O., Cornwall.

BERKSHIRES.

CARNARVON, the Earl of.—Prize winning Pedigree Herd. BOARS and GELTS, eligible Herd Book. Prices moderate.—Apply W. T. HALL, Highclere Farm, Newbury.

CORY, CLIFFORD J., M.P., LLANTARNAM ABBEY, MONMOUTHSHIRE.—Pedigree Boars and Gelts.

CRIBB, ARTHUR LEWIS, Well End Lodge. Shenley, Barnet, Breeder of PEDIGREE BERKSHIRE PIGS. Young stock from noted strains, and eligible for Herd Book, for sale at moderate prices.

READING CORPORATION.—150 Pedigree Berkshire Pigs, leading prize-winning strains, from son of Champion Mikado 10433 and prize-winner Domino 11323; inspection invited.—Apply, Mr. T. Chettle, Manor Farm, Reading, Berks.

STALL PITTS HERD OF PEDIGREE BERKSHIRES. One of the Oldest Herds. Unsurpassed for true character, size, and quality. Choice selection of Boars and Sows on offer at moderate prices.—J. LAWRENCE, Stall Pitts, Shrivenham, Berks.

TAMWORTHS.

PEDIGREE TAMWORTHS, the property of C. HOWARD TAYLOR, Middlewood Hall; a few good young Boars and Gilts for sale.—Apply, Hampole Priory, Doncaster.

BORROWFIELD & COLSTON HERDS.

The property of R. MILLINGTON-KNOWLES
Colston Bassett Hall, Notts.

LARGE WHITE YORKSHIRES.

The following First Prizes, Championships, and Medals have been obtained by pigs **BRED** in these Herds in 1907:
1st and Champion, Gold Medal, R.A.S.E., Lincoln.
1st & Champion, President's Medal, Highland, Edinburgh.
1st Welsh National, Aberystwyth.
1st Bath and West Newport; 1st Royal Counties.
1st Nottingham; 1st Suffolk; 1st Norfolk.
1st Derby.
1st Hereford and Worcester; Special Prize Lincoln Agricultural Society; 1st Great Yorkshire; 1st Newark.
A number of additional Firsts and other Prizes have also been gained at the above Shows.
At the St. Louis Exposition, U.S.A., in 1904, the Champion Boar, and the Grand Champion of the Exposition were bred at Colston Bassett.
The Foreign and Home trade has largely increased during 1907.—GILBERT H. ELLIOT, Estate Office, Colston Bassett, Notts.

For Sale.
PRIZE BRED POLLED ANGUS COWS, BULLS, and HEIFERS.
Finest Strains. Inspection Invited.
GEORGE HOYLES,
Skidby Manor, near Hull.

GEORGE HOYLES
SKIDBY MANOR, HULL.
Breeder of Pure Lincoln Long Wool Sheep.
Lustrous Fleeces. Good Constitutions.
SUITABLE FOR HOME AND ABROAD. STOCK FOR SALE.

been found when visited to have tetanus in a severe form, and it has been noted that certain injuries in particular districts, especially wounds the result of crushing, and those contaminated with soil from cultivated lands, are liable to it. This soil association is important to the agriculturist, and perhaps explains the losses in certain districts of from 20 to 40 per cent. of newly-born animals, more especially lambs, from tetanus. The umbilicus at birth, and for some time after, is nothing more than an open wound, and if it admits the germs which set up specific arthritis or general blood poisoning, why not the bacillus of tetanus, if it is present in the soil? There are whole districts, not only in this but in Continental countries, where tetanus is very common from pricks in shoeing, "gathered" nails, quittors, and wounds of the limbs, and where it is often the sequel to surgical wounds, especially those inflicted in castration and docking, all of which point to a local prevalence of the germ. Smith ("Veterinary Hygiene") says:—"It is clearly proved that the organism which produces tetanus lives in the soil, and from the fact of its being an anærotic parasite it would appear to develop at some distance from the surface. The liability of equines to tetanus may depend entirely on the greater facilities for infection from the soil—as, for example, in wounds of the feet—than exists in man."

Tetanus used to be distinguished as traumatic and idiopathic-traumatic when associated with a palpable wound, and idiopathic when no wound could be found—and some to whom knowledge of the contagiousness of the disease has not penetrated still obstinately stick to these distinctions, although they are precisely alike in character, development, symptoms, and results. In by-gone times the case recorded by "J. M." would have been described as one of idiopathic tetanus, because there was no apparent wound or record of injury. The idiopathic form, not being associated with any wound or injury that could be detected, was attributed in the horse to hardship or excessive work, or, in the case of animals turned out, to exposure to inclement weather. There were always being met with cases in which none of these conditions prevailed, and when neither injury nor exposure could be held to account for it, then these first suggested the possibility of tetanus being specific in its character.

M.R.C.V.S.

(To be continued.)

Improvement of Quality.

The interest aroused at the recent conference at Wye College by the paper on the raising of new varieties, read by Mr. Arthur Amos, coupled with the evident desire of brewers to obtain hops richer in the necessary constituents than the average growths now available, induces me to present to my readers some extracts from a paper on "Improving the Quality of Hops" read at a meeting of the American Brewing Institute, New York, by Dr. W. W. Stockberger, of the U.S. Department of Agriculture. This gentleman, whose close attention to the matter is proved by his remarks previously quoted in these columns, has conferred a favour upon me by sending me, with his compliments, an advance copy of his address, from which the following paragraphs are taken :—

"The men of to-day are witnessing the passing of the widespread belief that the production of new and improved varieties of cultivated plants is a process accompanied by much mystery and to be accomplished only by those possessing some magical power over the laws of Nature. With the passing of this belief comes the knowledge that the laws of Nature governing the production of larger, stronger, and better varieties of plants, while as yet very imperfectly understood, are still capable of very successful application at the hands of every careful and thoughtful agriculturist. As evidence in support of this statement may be cited the improved strains of practically all the cereals, besides forage plants, fruits and vegetables which have been developed during recent years. But it must be frankly admitted that, with all this progress, the hop has been practically neglected. Although in value it ranks fourteenth in the list of agricultural crops of the United States, the attempts which have so far been made to improve it have either been sporadic in nature, or conducted on so small a scale that they have had no effective bearing on the industry at large. It is an optimism certainly justifiable which predicts that in the domain of hop culture as broad opportunities exist for development and improvement along the lines just indicated as in that of any other cultivated plant."

"The question of first importance in undertaking the amelioration of the hop plant is the establishment of an ideal—a criterion of quality or value which shall serve as a guide to the agriculturist in his efforts towards improvement. The lack of this is largely responsible for the prevailing loose and indefinite ideas among hop growers as to the characteristics of a hop of high quality. In a large measure the standards of the farmer have been derived from the dealers to whom he sold his crop, or from traditions existing in the community in which he lives."

The Question of a Uniform Standard.

"In determining the quality of marketable hops, each consumer has been a law unto himself, with the frequent result that individual preference instead of intrinsic value decides the choice. Thus it actually occurs that a hop rejected by one consumer will be readily purchased by another—a state of affairs which is directly responsible for the sentiment sometimes voiced among growers that, 'No matter how inferior the hops may be, someone will be found to buy them.' Also growers have justly complained that the man who did, by extra labour and expense, aim to produce a higher quality of hops, received no better price for them than the grower whose maxim apparently is, 'Quantity, not quality.'

"The knowledge that the real merits of his hops would be determined by standard methods of valuation would furnish the strongest incentive to the grower to strive to increase the worth of his product."

"This question of a uniform standard is by no means a new one, and as is well known, presents a series of difficult and unusual obstacles. Nevertheless, as it lies at the very beginning of progress in hop culture for both agriculturist and technologist, it must be solved, if only in a tentative manner; for under existing conditions it is not always easy to put analytical results obtained by one technologist in comparison with those of another, and it is usually difficult to draw from these results inferences which may serve as reliable guides to the agriculturist in so manipulating the culture of the plant that the undesirable characteristics will be diminished, and the desirable and useful ones augmented.

"The Society of Brewers' Chemists of the United States of America has fully discussed the subject of hop analysis, and an able committee has been appointed to investigate the methods of analysis and valuation, with a view to devising some efficient means of standardising hops. When this committee has made its report, another very important step will have been made in the development of the industry, for no one facter has so retarded progress in hop improvement as lack of agreement as to what constitutes quality, and what are the elements entering into the constitution of a superlative hop."

The Constituents of Hops for Brewing.

Dr. Stockberger foresees as the logical results of these inquiries a better understanding of the part played in brewing by each of the useful constituents of the hop. This knowledge will affect the questions of soil and fertilisers, and will probably throw light upon the question of the water used in the brewing copper, as it has been found that water containing carbonates of lime and magnesia extracts too much resin from the hops, imparting a coarse flavour to the beer. He goes on to say :—"We should also, by these investigations, have a more complete knowledge of the functions of the hop resins, bitter principles and volatile oils, in order that their relation to quality may be constantly considered during the process of drying or curing on the kiln. It is quite generally conceded that the so-called soft resins of the hop are alone valuable, the hard resins being worthless for brewing purposes, yet the average grower knows little or nothing of these resins, and frequently contrives to dry his hops at a temperature so high that a portion of the essential oil is volatilised, and a considerable quantity of the valuable soft resin is oxidised and converted into the hard, worthless form. There is here an opportunity for immediate improvement in the quality of hops, since these resins are of such signal importance; but until they are recognised in grading quality, so that the man who carefully dries his hops will realise a higher price for them, growers will be slow to try to increase the content of soft resins."

"The aroma of hops is regarded as residing in the volatile oils, the definite properties or qualities of which have not yet been subjected to thoroughgoing investigation. Different varieties of hops differ in aroma, but as yet no one has discovered the differences in chemical composition to which the variations in aroma are probably due. Since the volatile oil is not a simple substance, but rather a mixture of compounds, it is possible that the differences in aroma are due to the varying proportions in which the constituents of the oils are mingled. Some preliminary work on hop oils from different sources has yielded very promising results, and an extensive comparative study of the relations of the volatile oil to quality in hops of different geographical origin is now in progress. When we can say to the grower that a certain variety of hops produces a more desirable quality of bitter resin or oil than another, or that a certain fertiliser or method of culture will give a higher yield of these constituents, and hence make his product of greater value, both to himself and the consumer, then will we have sure and definite additional grounds for directing hop improvement."

"The prevalance of lice and mould in hops is a constant menace to the consumer, and the occurrence of these pests likewise entails great loss to the hop grower. Investigators have for some time devoted considerable attention to the cultivation of economic plants which are resistant to parasites and fungoid diseases. By analogy from many cases among other cultivated plants, we may expect to find certain individuals among the better varieties of hops, with constitutions resistant to the attacks of mould, and capable, further, of transmitting their immunity to their descendants. By careful and judicious selection, therefore, it seems probable that a race or strain of hops may be produced which will have a very high degree of resistance to mould and other attacks, and so ensure a crop in great measure, at least, free from these troubles.

Principles of Selection.

"The principles of selection can be applied for many other purposes than that of securing plants resistant to disease or other unfavourable growth conditions. Very important results may be obtained in improving both quality and productiveness of the hop plant by these means. Every hop yard contains some plants which bear more heavily than others. New plants produced by cuttings taken from the plants of superior productiveness retain this important characteristic which is transmitted unchanged to all the progeny of the first mother plant."

Dr. Stockberger confirms the truth of this doctrine by certain instances of the production of varieties, now well established, which have originated by apparent accident, and regrets that the significance of such possibilities of improvement is practically unrealised by growers.

He says further :—"A consideration of the advantages to be gained through the process of selection of superior individuals, must naturally take into account the important subject of the breeding of pure races with which it is closely allied. Because of certain natural characteristics, the hop is a plant particularly well adapted to the purposes of the plant breeder. The male and female flowers are borne on separate individuals, the latter alone forming the hops of commerce. The pollen from the male flowers is carried about by the wind or by insects, so that in a yard where both male and female plants occur, indiscriminate hybridising will take place naturally. The seeds produced as the result of this crossing will, when sown, give rise to seedlings strongly predisposed to variation; in fact, they manifest this tendency to so great a degree that the hop grower rarely resorts to seed propagation to secure new plants. Ordinarily, therefore, the hop is propagated vegetatively by root cuttings, by which means relative stability and uniformity of the new plants are secured, and the characteristics and qualities of the mother plant are transmitted with but little change."

Variations of Plants.

"Through the discoveries of Mendel, and the brilliant experiments of Dr. Vries, the laws of Nature respecting the variations of which plants are capable, are now in some measure understood, and their intelligent application is yearly increasing the importance and value of agricultural crops. The production of new races by hybridising or cross breeding, and the possibilities of improvement that lie therein, are beginning to receive the attention which their merit deserves. By this means a composite breeding can be effected, whereby the desirable qualities of two or more individuals may be united in one plant. Thus in the case of the hop there is no apparent reason why the quality of fine aroma may not be combined with that of heavy bearing, earliness of ripening, with richness of resins, or mild and pleasant bitter, good flavour and yield, with disease resistance. Some of the qualities are purely morphological, such as growth, yield, size of cones, &c., while others are more properly termed chemical.

"It is no doubt futile to attempt to produce a plant which shall have all these qualities developed to the highest degree, yet some of the most valuable of Burbank's productions have been secured by uniting in one plant, through repeated hybridizations, the superior points of a number of selected ancestors. Numerous other investigators have found that hybrids often excel both parents in the vigour of their growth and the abundance of their flowering. At all events the union of characters that are correlated—that is, those whose variation becomes the primary cause for the variation of another character—may be brought about within certain limits, and plants may be produced which will combine quality with quantity of production to a very favourable degree."

"It is very desirable to make a careful study of the suitability of each variety of hop for the various conditions of climate, soil, and culture in the various hop-producing areas, for not only do the varieties vary in adaptability to various localities, but strains and races within the variety show important differences in this respect. Frequently when cuttings are taken from one situation to another with different physical conditions, the new plants springing therefrom are so changed in appearance from the mother plants that their relationship would hardly be suspected. The characteristic time of ripening and the yield, however, remain practically unchanged. This indicates that these points are hereditary and transmittable, and that those which have been modified in the new situation are probably subject to change, whenever there is variation in the physical surroundings. That these factors have not been sufficiently considered in hop culture is evident from the current practice of indiscriminate distribution of cuttings without regard to variety, the conditions under which they were grown, or the suitability of the new surroundings for the development of strong and vigorous plants."

"There has now been pointed out in this paper the opportunity for improving hops by curing at lower temperatures, by a study of the nature and conditions of resin formation, by the breeding of disease-resistant types, by selection of the best and most productive varieties, and by the breeding of pure and pedigree races. The ground has been gone over already in a preliminary way, plans are formulated, and the foundations are laid for work along these lines. Its development in the future will depend upon the funds provided, and especially upon the co-operation and support offered by those whom the work is designed to benefit."

The concluding words of Dr. Stockberger's paper refer of course to the Bureau of Plant Industry over which he presides in the U.S. Department of Agriculture. Although the researches referred to will be applicable primarily to American hop growing, they will doubtless include many hints that will be useful to English planters.

SOCIETIES.

Essex.

The fiftieth annual report and balance sheet presented at the last meeting of the council of the Essex Agricultural Society proved most satisfactory. The report stated that the number of the members was now 792, as against 756 last year. The accounts showed gross receipts during the year (including balance of £507 8s. brought forward) to have been £5,450 15s. 9d., and the payments (including £500 invested in consols) £4,936 6s. 1d., leaving a balance on the society's current account of £514 9s. 8d.

The appeal from the council to the members to give increased subscriptions in order that the prize list for the Jubilee Show might be considerably augmented met with a most satisfactory response, a total sum of £460 19s. having been received in consequence.

As a result the council were in the happy position of being able to inform the members that as the show was such a financial success they have been able to invest a sum of £500 in consols, and thus strengthen the position of the society.

The receipts were:—Balance at bankers on current account, £107 8s; balance at bankers on deposit, £400; subscriptions, £841 7s.; donations, specials, and grants, £410 11s; value of cups and medals, £149 5s.; grant from L. Committee, £325 13s. 6d.; entry and shedding fees, £854 2s. 11d; horse boxes, £52; jubilee fund, £460 19s.; admission receipts, £1,154 6s. 6d.; grand stand receipts, £339 12s. 7d.; affiliation fee, £1 1s.; refreshment premium, 1906, £30; ditto, 1907, £35; luncheon tickets (per contra), £44 8s; sale of old shedding, £107 19s. 6d.; fire insurance bonus, £7 0s. 7d; sale of timber, £70; dividend on £948 5s. 7d. Consols, £22 10s. 4d.; interest on deposit, £13 14s. 7d.; miscellaneous, £23 16s. 3d. Total, £5,450 15s. 9d.

The expenditure was as follows:—Prizes, £1,962 7s.; medals for field trials, £22 9s.; hire of show ground and trial grounds, £122; show ground expenses, £1,202 9s. 2d.; advertising, printing, and stationery, £379 15s. 5d.; grants and affiliation fees, £38 3s.; police (pay, travelling expenses, and refreshments), £75 7s. 1d.; band and military display, £51; fares, transport, and expenses for the band, £30 19s. 9d.; refreshments, £97 10s. 9d.; Wright Brothers' 1906 account, £64 18s. 8d.; judges' accommodation and travelling expenses, £70 5s.; pig entry fees returned, £22 5s.; rent of field at Bishops Stortford, £5; purchase of £603 5s. 2d. consols, £500; secretary's petty disbursements, £86 19s. 6d.; miscellaneous, £24 11s. 9d.; auditors, £5 5s.; secretary's salary, £150; honorarium to secretary, £25; balance on current account, £114 9s. 8d.; balance on deposit, £400. Total, £5,450 15s. 9d. The secretary stated that several subscriptions had come in since the accounts were closed.

A letter was read from the Town Council of Colchester, stating that the corporation had unanimously passed a resolution that in their view the society should be invited to hold their show for 1908 at Colchester, and they had appointed a small committee to consider the preliminary arrangements. A further letter was read from the Mayor of Colchester (Mr. Wilson Marriage), stating that the committee had been successful in finding a very suitable site for the show on June 10 and 11, at Colchester. The mayor added that the society might be assured Colchester would do all it was possible to receive the society in a worthy manner.

The chairman, Mr. C. E. Ridley, proposed that the council had great pleasure in accepting the invitation to hold the 1908 show at Colchester, and the resolution was carried unanimously.

A further letter from Mr. Wilson Marriage suggested that it was the custom to invite the representative of the borough to act as president. The secretary said that Sir Weetman Pearson, M.P., had been written to, and had replied, stating he would have much pleasure in accepting the invitation.

The secretary said the Essex Master Bakers' Association, who had held bread competitions the last few years, were anxious something should be done to stimulate wheat-growing in the county. They suggested prizes should be offered for Essex wheat, that it should be milled on the ground, and made into bread, but he understood there would be a difficulty about the milling.

The chairman did not think the bread competitions they had had as a rule had done good to either the bakers, farmers, millers, or anybody. Perhaps the competitions increased interest in the show, and brought people there. He did not see why they should not give prizes for the best Essex wheat.

Mr. Geo. Courtauald did not see why they should confine a competition as suggested to Essex wheat only. Could they not extend the sphere of competition? It would be the greater glory if Essex wheat were pronounced to be better than wheat grown outside the county.

The chairman said that Essex wheat was now one of the best for certain goods.

Colonel W. N. Tufnell proposed that the society should give prizes for Essex grown wheat, and the motion was carried.

Annual Meeting.

The annual meeting was then held. Mr. Ridley again presided, and announced that the council had accepted an invitation to hold the 1908 show at Colchester, and he proposed that Sir Weetman Pearson, M.P., who was willing to act, should be elected president.

The Hon. James Round seconded the proposal, remarking he was quite sure it would give great satisfaction, not only to the people of Colchester, but especially to the Mayor of Colchester, who was taking a very great personal interest in the matter.

The resolution was carried.

Colonel W. N. Tufnell proposed a hearty vote of thanks to the retiring president, Sir Walter Gilbey, observing that Sir Walter took a great deal of interest in the show, which was the most successful they had had.

The chairman seconded, remarking that he knew it was a matter of great congratulation to Sir Walter that not only was the show a success so far as numbers was concerned, but he was much pleased with the quality. The motion was carried.

The report of the balance-sheet was adopted on the proposal of Colonel Tufnell.

The chairman thought the financial accounts were so satisfactory that there were very few remarks to make about them.

Mr. J. Christy considered that for some years they had been spending too much money in prizes. He thought they would get just as much money, and just as much competition, if they were a little more careful in prizes. He noticed in some of the open classes they gave double the amount of money compared with some county classes.

The secretary mentioned that it was only in one case that more money was given in the open classes, and that was a specific sum given for a certain purpose.

Mr. Vere W. Taylor remarked that whenever they increased their prize list they had added value to the show. It was the greatest mistake possible to cut down the prize list.

Mr. Christy: I do not mean to cut down the prize list. We keep on increasing.

Mr. Vere Taylor: And increase our show.

Devon.

At a meeting of the Devon Agricultural Association at Exeter, on the 13th inst., the report of the Site Sub-Committee, who visited Plymouth on November 21 and inspected the Mount Gold site, the greater part of which belongs to the mayor and corporation of Plymouth, was presented. It stated that was the only site offered them for the show, although another was suggested. Having regard to the hearty invitation which the Plymouth Corporation had given the society, the committee thought it would be an ill-compliment to the association to go and see another site, and they therefore were unanimous in recommending that the corporation's site should be accepted as being a very good one. The Plymouth people were evidently taking the matter up with great warmth, and they had every reason to believe that, weather permitting, they would have a good and profitable show. The report was adopted.

The Prize Sheet Committee reported that, having carefully gone through the prize-list, they suggested the following alterations should be adopted:—Thoroughbred agricultural stallions, prizes to be increased to £6, £4, and £2; stallion foaled before Jan. 1, 1905, entries to be confined to stallions registered in the county register; special prize of £8 for best stallion in the agricultural classes be omitted; an additional class to be added for agricultural mares, "for the best mare registered in the county register with foal at foot or within three months of foaling, served in 1907 by a registered stallion, prizes £8, £5, and £2." In the pony classes it was suggested that a class be provided for a mare or gelding, not exceeding 13 2 hands high, and that the class for a mare or gelding not exceeding 12½ hands high be omitted, as well as the jumping class for mare or gelding, the property of a tenant farmer farming not less than 50 acres in Devon. It was further proposed that consolation jumping prizes should be offered on the third day of the show.

The committee recommended that the offer of Captain Morrison-Bell be accepted, with thanks, for a five-guinea cup for the best South Devon or Devon Longwool ram in the show, to be won two years in succession by the same exhibitor to become his property, or three years at intervals; also that the offer of Mr. J. Bayly be accepted, with thanks, for a special prize of a silver cup for the best mounted non-commissioned officer, and a money prize of £2 for the best mounted private, open to the Royal 1st Devon Imperial Yeomanry and the Royal North Devon Hussars.

Mr. J. S. Ford said a meeting of the local Prize Sheet Committee was held at Plymouth on the previous day, when the question of offering local prizes was considered. Several cups had been promised, and the Finance Committee were prepared to devote a liberal sum for local prizes.

Colonel Moore Stevens urged that greater prominence should be given the Devon breed of cattle by giving prizes for good milking beasts as well as for good representatives of the breed.

Mr. Bond said what the local committee desired was suggestions as to how best to use the money which was available. In addition to money prizes, about £50 or £60 worth of cups had been offered.

Mr. Morgan said they wanted to establish in their milking herds quality as well as quantity, and the only way they could do it was by having separate classes.

It was eventually decided that the secretary should place himself in communication with the local committee at Plymouth, with the view to the local prizes being offered to the best advantage, and suggesting in particular that prizes should be offered for the best milking cow of North Devon and of South Devon.

FARMS, BUSINESSES, &c., TO BE SOLD OR LET.

BAXTER, PAYNE, & LEPPER, LAND & ESTATE AGENTS, AGRICULTURAL VALUERS, SURVEYORS, & AUCTIONEERS.
Special Agents for
DAIRY, FRUIT, STOCK AND MARKET GARDEN FARMS.

UTILITY BOOKS.

Price 6d. each net; post free 7d.

Each book of the series is written by a practical man. In almost every case the writer makes the whole or a material part of his living from the subject of which he treats. Therefore the directions are plain and are based on accurate knowledge.

No. 1.—Out-Door Carpentry. By S. Walter Newcomb.—Deals with useful, as well as decorative structures—with plans, sketches, and details for doors, gates, stiles, fences, seats, summer-houses, dog-kennels, chicken coops, window-boxes, greenhouses, &c. Designs of some fifty subjects. D.

No. 2.—Gardens and Grounds: How to Lay Out and Arrange. By T. W. Sanders, F.L.S., F.R.H.S., &c.—Suggestions for laying out, planting, and improving the small plot, or the country grounds of several acres. The best aspects and positions, considering appearance with economy of space, labour and expense. With plans and sketches

No. 3.—Heating and Ventilation of Houses. By C. F. Townsend, F.C.S.—Intended to enable anyone, in any house, to secure full supply of fresh air without chilling draughts. Economy and existing conditions are first considerations.

No. 4.—Utility Fowl Houses and Appliances. By H. Francklin.—With about forty measured drawings and plans, and with concise instructions, not only for home construction, but for guidance in purchasing for the fowl-yard. Treats of ventilation, site, aspect, &c., of houses; the laying out of large and small runs, construction of nest boxes, coops, &c.

No. 5.—Utility Fowl Feeding and Management. By H. Francklin.—The requirements of fowls from birth to maturity, feeding stuffs, and how to use them for feeding of chickens, hens for summer and winter laying, and for the fattening of surplus stock, The management of fowls in large or small numbers, the selection of breeding stock, the management of the sitting hen, the keeping of accounts, and many other factors in successful poultry farming.

No. 6.—Utility Fowls: Their Selection, Improvement and Diseases. By H. Francklin.—The breeds most suitable for confinement or a free range; crossing, and the improvement of mongrel stock. Turkeys, guinea fowl and water fowl are spoken of.

No. 7.—Incubating and Rearing Utility Fowls. By H. Francklin.—Water-tank and non-moisture incubators; brooders and brooder-houses, with hints, instructions, and precautions for the hatching and rearing of fowls for profit.

Utility Fowls. Nos. 4, 5, 6, and 7 together, bound in handsome cloth, price 2s. 6d. net; postage 3d. The best guide for the poultry keeper; and an excellent present for a beginner.

No. 8.—Propagating Plants: By Seeds, Cuttings, Layers, Grafts, Buds, &c. By D. S. Fish, of the Royal Botanic Gardens, Edinburgh.—Propagation of all classes of plants, by many methods, with lists of those suitable for the various treatments, hints on the preparation of seed beds, &c. Many illustrations.

No. 9.—Hardy Perennials. By D. S. Fish, of the Royal Botanic Gardens, Edinburgh. Illustrations and plans from the Author's Sketches. All information necessary for selecting hardy perennials and for arranging borders, wild gardens, water gardens, &c.

No. 10.—Utility Rabbits. By a practical Rabbit Farmer. Simple enough for the boy who keeps but one or two rabbits, yet sufficiently thorough for the man who wishes to make a living from a trade which is almost entirely in foreign hands.

No. 11.—Cold Greenhouses and Frames. By D. S. Fish, of the Royal Botanic Gardens, Edinburgh.—How to secure foliage and bloom through the whole year. Lists of most useful plants, with brief description and cultural directions.

No. 12—Carnations, Pinks and Picotees. By E. Hasler Potter, F.R.H.S.—Simple and sufficient directions for raising pinks, selfs, bizarres, flakes, fancies, picotees, winter flowering, malmaison, and marguerite carnations from seeds, cuttings, or layers, and for their culture for exhibition flowers, cut blooms, &c.

No. 13.—Spring Gardening. By H. Francklin—Deals with the aspects of out-door Spring gardening; wild woodland, border walks, edgings, bulbs in grass and under trees, flowers in orchards, bog gardens, rooteries, walks, arches, bedding, house decoration, &c.

No. 14—Hardy Fruits. By E. Hasler Potter, F.R.H.S. Full instructions for growing all British fruits.—Propagation, culture, manuring, watering, training, pruning, gathering the fruit, and storing. With diagrams of fruit trees, forms of trees, &c.; also recipes for cooking fruit. D.

No. 15.—Keeping a Dog. By A. Nicol Simpson, F.Z.S.—Written clearly and concisely, for the keeper of one or two dogs as pets, companions, or guardians of the yard.

No. 16.—Rose-Growing. By D. Grant McIver, A.R.H.S.—The whole elementary art and practice of rose-growing, for garden glory, for cut blooms, or for perfect exhibition specimens. Preparation of ground, site and aspect, when and how to plant, propagation, roses in the greenhouse, roses for exhibition, lists of varieties, and a complete, concise rosarian's calendar.

No. 17.—Chrysanthemums. By E. Hasler Potter, F.R.H.S.—Directions for treating the principal varieties of chrysanthemums, annual or perennial, indoors or out-of-doors, for pleasure, profit, or show. With special suggestions for the town man who can only give attention at night and morning.

No. 18—Bulb Culture. By D Grant McIver, A.R.H.S.—Directions for growing all kinds of bulbs under glass and out-of-doors. Also for many tuberous (&c.) rooted plants which are familiarly called "bulbs." Lists and illustrations.

No. 19.—The Vegetable Garden Calendar. By D. S. Fish, of the Royal Botanic Gardens, Edinburgh.—Gives, in twelve openings, graphic charts of the vegetable garden for each month. Each chart shows at a glance what crops should be in the ground, what should be yielding produce, what proportion of space should be occupied by each, and what operations should be in hand. Many illustrations.

No. 20.—Goats for Profit. By a practical Goat and Rabbit Farmer. Selection and purchase, housing (with working plans), breeding and the treatment of young kids, feeding, grooming, milking, uses of the milk, making of butter and cheese, killing and dressing kids, training goats to harness, treatment of their diseases, etc.

No. 21.—Garden Operations. By Wm. F. Rowles.—Digging, trenching, preparing for seed, sowing, thinning, planting, ridging, earthing, hoeing, weed-killing, staking, protecting, harvesting, tools and make-shifts, water-supply, watering, lawn-making, mowing, rolling, making paths and beds, and many other operations. The how, the when, and the why clearly explained.

No. 22.—Pruning, Training and Trimming Trees and Shrubs. By D. Grant McIver, A.R.H.S.—Explains and illustrates the whole art of using knife and shears in a garden. D.

Price 6d. each net; post free, 7d.

Nos. 16 to 21 also in cloth, price 1s. each, net: post free, 1/2

No. 23.—To Manure at a Profit.
Every Farmer his own Experimenter. By H. B. M. Buchanan, B.A. (Cantab), Author of the "Country Readers," and joint Author of "Lessons on Country Life," and J. J. Willis, Superintendent of the Rothamsted Field Experiments. L.

No. 24—Profitable Hobbies. By H. Snowden Ward. Gives advice on the cultivation of hobbies, and how to turn them to profitable account. The book is illustrated throughout, and deals with such subjects as wood-carving, photography, collecting, grangerising, drawing and designing, marquetrie staining, metal working, glass blowing, art enamelling, stone-cutting and polishing, the keeping of pets, etc., etc.

THE FARM.

No. 44.—The Agricultural Annual and "Mark Lane Express" Almanac.
The Farmers' Red Book. Brimful of Facts and Figures relating to the Farm and Markets. Compiled by well-known Writers on Agricultural Subjects. Profusely illustrated. 272 pp., 8vo. Price 1s., by post 1s. 4d. Published early in December each year. L.

LIVE STOCK.

No. 47.—Rational Pig-Keeping.
To Ensure Profit. Revised Edition. By W. J. Malden, late Principal Colonial College, Hollesley Bay, Suffolk; Superintendent Royal Agricultural Society's Experimental Farms, Woburn; Professor of Agriculture, Downton College; Agricultural Superintendent, Royal Dublin Society, etc., etc. Illustrated. Dealing with Principal Breeds, Selection of Stock, Housing, Foods, Breeding, Management, etc. In paper, price 1s., by post 1s. 3d.; in cloth, price 2s., by post 2s. 3d. L.

No. 48.—Goat-Keeping for Amateurs.
A practical Manual on the Management of Milch Goats. By H. S. Holmes Pegler. Illustrated with four full-page plates, and other engravings. In paper, price 1s.; by post, 1s. 2d.

No. 49.—Horse Buying and Management.
A Practical Handbook for the Guidance of Amateurs in Buying a Horse, with Illustrations as to its After-management. By Henry E. Fawcus. Illustrated. In paper, price 1s.; by post, 1s. 2d. G.

No. 51.—Diseases of Horses.
Their Causes, Symptoms, and Treatment. For the Use of Amateurs. By Hugh Dalziel. In paper, price 1s.; by post, 1s. 2d. Cloth gilt, price 2s.; by post, 2s. 2d. G.

No. 52.—Book of the Pig.
The Selection, Breeding, Feeding, and Management of the Pig; the Treatment of its Diseases; the Curing and Preserving of Hams, Bacon, and other Pork Foods; and other information appertaining to Pork Farming. By Professor James Long. Fully illustrated with Portraits of Prize Pigs, Plans of Model Piggeries, &c. New and Revised Edition. In cloth gilt, price 6s. 6d.; by post, 6s. 10d. G.

No. 52d.—Live Stock Handbooks.
Illustrated. Cloth gilt, lettered, 3s. 6d. each, post free 3s. 10d.; or the Set of 5 vols., 17s. 6d., carriage free. V.
1.—Sheep: Breeds and Management. By John Wrightson M.R.A.C., F.C.S., &c.
2.—Light Horses: Breeds and Management. By W. C. A. Blew, M.A., and others.
3.—Heavy Horses: Breeds and Management. By Dr. George Fleming, C.B., F.R.C.V.S., and others.
4.—Cattle: Breeds and Management. By William Housman.
5.—Pigs: Breeds and Management. By Sanders Spencer. V

GARDENING.

No. 65.—Multum-in-Parvo Gardening.
Or, How to Make One Acre of Land produce £620 a year, by the Cultivation of Fruits and Vegetables; also, How to Grow Flowers in Three Glass Houses, so as to realise £176 per annum clear Profit. By Samuel Wood, Author of "Good Gardening," &c. Sixth Edition. Crown 8vo, sewed. 1s. C. L.

VEGETABLES AND FRUIT.

No. 70.—Tomato-culture for Amateurs.
A Practical and very Complete Manual on the Subject. By B. C. Ravenscroft. New Edition. Illustrated. In paper, price 1s., by post, 1s. 2d. G.

No. 70a.—Mushroom Culture.
A Practical Handbook on Growing Mushrooms in Houses, Sheds, Cellars and Boxes as well as in Beds in the open. By W. J. May. Second Edition. Illustrated. In paper, price 1s., by post, 1s. 2d.

POULTRY.

No. 76.—Paying Poultry.
A Handbook for all Interested in Poultry keeping Illustrated. 164pp. 8vo. In paper, price 1s., by post 1s. 2½d.; in cloth, price 2s. 6d., by post 2s. 9d. L.

No. 77.—Popular Poultry-Keeping.
A Practical and Complete Guide to Breeding and Keeping Poultry for Eggs or for the Table. By F. A. Mackenzie. Second Edition, with Additional Matter and Illustrations. In paper, price 1s., by post 1s. 2d. G.

No. 79.—Profitable Poultry Farming.
Describing in detail the Methods that give the Best Results, and pointing out the Mistakes to be avoided. By J. H. Sutcliffe. Illustrated. In paper, price 1s.; by post, 1s. 2d. G.

BEES.

No. 81.—Book of Bee-Keeping.
A very Practical and complete Manual on the Proper Management of Bees, especially written for Beginners and Amateurs who have but a few Hives. By W. B. Webster, First-class Expert, B.B.K.A. Fully Illustrated. In paper. Price 1s., by post 1s. 2d.; in cloth, price 1s. 6d.; by post 1s. 8d. G.

FERTILISERS AND FEEDING STUFFS.

No. 84.—Artificial Manures.
How to Make, Buy, Value, and Use. A Hand-Book for Agriculturists, Chemical Manure Manufacturers, Gardeners, and others concerned in similar pursuits. By Alfred Sibson, F.C.S., Consulting and Analytical Chemist, Author of "Agricultural Chemistry," "Everyday Chemistry," "Food, Feeding, and Manure," "A Lecture on Superphosphate," &c. Late (for eight years) Assistant Professor of Chemistry in the Royal Agricultural College, Cirencester, and First Assistant in Dr. Voelcker's Private Laboratory. Formerly Student of the Royal College of Chemistry and the Birkbeck Laboratory of University College. Revised and Rewritten by the Author and A. E. Sibson, F.C.S. Third Edition. 143 pp. 8vo. In cloth. Price 1s., by post 1s. 2½d. L.

FODDER.

No. 87.—Fodder Crops.
Uses. By C. G. Freer Thonger, M.R.A.C., F.C.S. 58 pp. 8vo. In paper. Price 1s., by post 1s. 1½d. L.

ACCOUNT BOOKS.

No. 106.—Utility Poultry-keepers' Account Book.
A very Useful Book for Amateur Poultry-keepers, showing at a glance the Daily, Weekly, Monthly, and Yearly Statement of Profit or Loss Account. By A. Hunt. Second Edition. In stout boards, price 2s., by post 2s. 3d. L.

No. 107.—Jee's Milk Book.
An Account Book for Farmers, Dairymen, and Consumers, showing Profit or Loss at the end of each Week; can be used for a period of three years. Price 2s., by post 2s. 3d.

LAW.

No. 108.—Law for the Householder. By a Barrister-at-Law. A book written for the layman and not for the lawyer, its object being to supply ready information to the householder, on matters of direct personal interest to himself. In paper, price 1s., by post, 1s. 2d.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

So little summerlike has been the weather for the last four or five weeks that it seems almost incredible that we should have already reached the year's half-way house. Such is none the less the case, and we have a six months' weather record to consider.

1907.	Rainfall (inches)	Warmth (deg.).	Sunshine (hours).	Character of month
Jan....	1·01	39·0	40	Dry & cold
Feb....	1·02	42·0	55	Dry & cold
March	·81	48·0	152	Dry & sunny
April...	3·10	48·0	105	Wet & cold
May ...	2·5	51·0	151	Wet & cold
June ...	2·30	54·0	180	Damp & gloomy
Half yr.	10·74	47·0	683	Backward

The half-year figures are of course totals for rain and sun, and an average for the temperature. The rainfall has not been excessive for the whole period under notice, the temperature has, however, been below the mean and sunshine has been deficient, so that evaporation has been less than usual, and consequently the rainfall has had more than its customary effect on the surface of the land.

The final and definitive report of the Indian Office on the Indian wheat crop of 1907 puts the yield at 39,987,600 qr. of 480 lb. per qr., which, according to current rate of wants for food and seed, leaves 9,987,600 qr available for exportation. Of this total there have been already shipped 858,000 qr., leaving 9,129,600 qr. in hand and available for export in the remaining ten months of the Indian shipping year. The opinion of the Baltic and of Mark Lane is that the Government figures are about twice the truth—i.e., that for the remainder of the Indian shipping year 4½ to 4¾ million qr. may be expected to be shipped. Time will show which view is correct.

London averages for June have been :—

	Wheat.	Barley.	Oats.
	s. d.	s. d.	s. d.
June 4	32 10	25 11	21 5
,, 11	31 2	25 6	22 1
,, 18	31 5	25 1	—
,, 25	32 7	—	20 6
June 1907.....	32 0	25 6	21 4
June 1906.....	31 2	23 7	20 11
Rise on the year	10	1 11	5

The June average for Household flour shows 6d. advance in May.

If we disregard the Board of Trade return of 36s. from Canterbury—which strikes us as obviously an error—the wheat gradient this week will be :—

Mark Lane.....	32s. 7d. per qr.
Peterborough ...	30s. 6d. ,,
Range.....	2s. 1d. per qr.

The range in barley has been small :—

Nottingham	25s. 8d. per qr.
Ipswich	24s. 1d. ,,
Range.....	1s. 7d. ,,

Oats exceed 20s. at all markets, and are in very good request for a Midsummer period :—

Doncaster	21s. 8d. per qr.
Salisbury	20s. 4d. ,,
Range.....	1s. 4d. ,,

The sales of English wheat at the statute markets since harvest have been as follows :—

This season... 2,532,000 qr., at 27s. 0d. per qr.
Last ,, ... 2,840,000 qr., at 28s. 6d. ,,

The comparatively small deliveries of this season are much remarked.

The sales of English barley have been :—

This season ... 3,363,000 qr., at 24s. 3d. per qr.
Last ,, ... 3,198,000 qr., at 24s. 5d. ,,

The barley season is over, but the old crop holds out better than it did last year.

The sales of English oats are :—

This season ... 1,149,000 qr. at 17s. 11d. per qr.
Last ,, ... 900,000 qr. at 18s. 4d. ,,

Imports last week into the United Kingdom were as follows :—

Wheat, 752,000 qr. : an enormous supply and nearly a record.

Flour, 119,000 sks. : a fair supply.

Barley, 13,000 qr. : one of the smallest weekly quantities recorded for many years.

Oats, 94,000 qr. : a very moderate arrival.

Maize, 158,000 qr. : two-thirds of an average.

Since September 1 arrivals from abroad have included 17,168,000 qr. of wheat, 90,460,000 qr. of maize, 4,900,000 qr. of barley, and 4,052,000 qr. of oats. The arrivals of foreign flour have been 4,555,000 sacks.

Rice remains steady at 8s. 6d. per cwt. for Bassein cargoes, which with wheat at 7s. 5d. per cwt. off stands, shows that the Asiatic product is now considerably the dearer food. The price of beet sugar has declined 2d. per cwt. on the week, and now stands at 9s. 9d. instead of 9s. 11d. Another article which has given way a little is linseed oil, for which £27 15s. per ton is quoted, against £28 a week ago.

The supply of wheat on passage shows a slight diminution on the week, and is as follows :—

Californian.....	240,000 qr.
American	290,000 ,,
Russian	265,000 ,,
Indian.....	363,000 ,,
Argentine	820,000 ,,
Australasian	800,000 ,,
Various	40,000 ,,
Total	2,818,000 qr.

Of flour, 210,000 sacks are on passage. The expectations of spring corn are as follows.—Barley, 175,000 qr. (of which 105,000 qr. are Roumanian); oats, 90,000 qr. (of which 65,000 qr. are Russian); maize, 925,000 qr. (of which 450,000 are American and 300,000 qr. (round corn); and linseed, 371,000 qr. (of which 215,000 qr. are Argentine).

Shipments last week were :—From America, 210,000 qr. of wheat, 125,000 qr. of maize, and 92,000 sacks of flour; from Argentina, 338,000 qr. of wheat, 209,000 qr. of maize, and 74,000 qr. of linseed; from Russia, 209,000 qr. of wheat, 88,000 qr. of barley, 42,000 qr. of oats; and 100,000 qr. of maize; from Roumania, 206,000 qr. wheat, 20,000 qr. of barley, 3,000 qr. of oats, and 470,000 qr. of maize; from India, 114,000 qr. of wheat, and 475,000 qr. of linseed; and from Australasia, 6,000 qr. of wheat.

The shipping period, August 1 to June 30, is complete, but the figures are not all to hand. Allowing the many items to come in at the rate of the preceding week, the total shipments of breadstuffs will work out as follows :—

From the United States ...	...	14,100,000 qr.
,,	Canada	2,970,000 ,,
,,	Argentine.....	11,000,000 ,,
,,	Russia	10,500,000 ,,
,,	Roumania	8,000,000 ,,
,,	Bulgaria & Turkey	1,500,000 ,,
,,	India	3,100,000 ,,
,,	Australasia	2,500,000 ,,
,,	Other Countries ...	1,000,000 ,,
Total ...		54,670,000 qr.

For the like period in the previous shipping season 55,550,000 qrs. of bread stuffs were shipped, so that no excess is to be charged to the present season. This is, in fact, the main point. The sources of supply whence increased quantities have been forthcoming are the United States, La Plata, and India, while Russia, Roumania, and Bulgaria show a decline. The figures for Australasia and Canada are without material change. The above totals include flour as wheat.

THE BALTIC.

The wheat cargo trade has recovered some little tone, and holders are less discouraged from a week ago. Transactions include Black Sea at 34s. 6d. per 492 lb., Azoff at 33s. per 492 lb.; Australian at 34s. 9d. per 480 lb., Argentine at 33s. 6d. per 480 lb., White Karachi at 34s. 3d. per 492 lb., Red Karachi at 33s. 9d. per 492 lb., No. Northern Manitoba at 35s 3d per 480 lb, and No. 2 Manitoba at 34s. 3d. per 480 lb.

Maize cargoes are 3d. dearer from their lowest point of reaction : 23s. 9d. is now paid for Argentine, 24s. 6d. for Odessa, and 23s. 6d. for American, all per 480 lb.

Other cargoes (except barley) include Smyrna beans at 34s per 480 lb., Argentine oats at 17s. 9d. per 304 lb., Manitoba oats at 19s. 6d. per 320 lb., and Saigon rice at 7s. 6d. per cwt.

On the trade in barley cargoes, which has been rather perplexing of late, *Beerbohm's List* sheds some useful light in the following remarks :—

"The demand for near cargoes of grinding barley continues to be good for the Continent, but United Kingdom buyers are not very numerous, owing to the high prices asked. The Continent has taken two steamers of Morocco barley loading and prompt at 23s. 9d United Kingdom price, and Hamburg has paid 23s. 6d. for a quantity of Kurachi June-July shipment, but for the United Kingdom little has transpired; 24s. is asked for six option cargoes June-July shipment, but 21s. has been accepted for July-August new crop shipments, and 20s. is the best actual bid for September-October shipment. The reports of greatly improved crop prospects in Russia, owing to the bountiful rainfall of the past fortnight have checked the disposition to speculate in these distant shipments at prices which are above the average of former years at the opening of a season. It should be remembered, in this connection, however, that the Russian crop was a very late sown one this year, and a late sown crop is seldom a good one. Old crop reserves, moreover, are evidently so exhausted that it will probably take some considerable period before what may be called a normal level of price is reached. Old Russian barley is, indeed, so scarce that there are only about 6,000 qr. now afloat for the U.K., Bristol being the destination. Persian f.a.q. ex ship is quoted at 22s. 9d. to 23s., Kurrachee at 24s. 6d. per 400 lb."

LONDON HAY TRADE.

Saturday.—The trade has continued in a very dull and depressed condition. Fresh arrivals are not large, but with a heavy accumulation owing to slow clearance, supplies have been more than ample to meet the very poor demand. With the continued unsettled weather preventing haymaking, there is at present no signs of the short supply and sharper demand generally prevailing at this time, and it is hoped that a change for better weather will soon take place, as nothing taxes the selling power of salesmen so much as a quantity of badly got stuff, which, besides is as a rule, unprofitable both to grower and dealer.

We note the arrival of several lots of new lucernes and hays, which have been disposed of for about the nominal sum of 55s per ton. Prime mixtures and clovers are the only qualities which still manage to find ready buyers; but best hays being in fair supply, are a very poor trade, while middling and plainer sorts of all kinds are in large supply, and most difficult of sale. Straw is in good supply, and finds a quiet demand at about last week's values. In the foreign market business is at a standstill, and although importers are ready to meet buyers' views at lower prices, it is even then almost impossible to do business even at the reduction.

Prices ruling are about as follow:—English best meadow hay, 77s 6d per ton; good meadow hay, 70s to 73s per ton; plain hays, 62s 6d to 67s 6d per ton; best clovers 90s to 92s 6d per ton; good clovers, 80s to 87s 6d per ton; inferior clovers, 72s 6d to 77s 6d per ton; best mixtures, 92s 6d per ton; good mixtures, 80s to 87s 6d per ton; plain mixtures, 72s 6d to 77s 6d per ton; seconds hays, clovers, and mixtures, 55s to 60s per ton; wheat straw, 22s to 25s per load; oat straw, 25s per load; barley straw, 26s per load, all ex rail London. Foreign Canadian mixture, none; first quality Dutch hay, 60 to 65s per ton; second quality Dutch hay, 57s 6d; French and Dutch clovers, 80s per ton. These prices are by barge delivered alongside a London Thames wharf.

CHEESE.

Glasgow, Wednesday. — Liberal arrivals of cheese, the floors being well covered. Cheddars, 56s to 58s; Dunlops, 55s to 57s per cwt. Canadian, June made cheese, are being offered, trade not disposed to buy, and in the meantime the price is 56s to 57s.

Highbridge, Tuesday.—There were 36 tons of cheese pitched, and all was cleared. Best Caerphilly dairies realised up to 46s 6d per ton, secondary dairies 44s to 45s, and other dairies 40s to 43s. A few inferior lots failed to reach 35s. Cheddars :—Prime old, from 67s to 73s; new ditto, 58s to 68s 6d; truckles, old and ripe, from 67s 6d to 69s; new ditto, 56s to 61s; doubles, 55s to 57s.

Newport, Wednesday.—About 8 tons pitched, a good attendance, and a brisk demand. Quotations :—Caerphillies, 30s to 44s per cwt; fancy dairies, 40s to 46s; Derbies, 60s to 62s; truckles, 56s to 63s; doubles, 60s.

Seven Years Grain Averages.

(OFFICIAL.)

Wheat	28s. 10d. per 480 lb.
Barley.....	25s. 4d. per 400 lb.
Oats.....	18s. 11d. per 312 lb.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English steady, but quiet, at late rates; supplies limited. Foreign firmly held at full prices, but only small business passing. No. 1 Northern Manitoba, ex ship, held at 35s 6d; No. 2 at 34s 6d; No. 1 hard Manitoba at 36s 6d; choice white Karachi at 33s 3d; red Karachi at 33s; Persian, landed, at 31s 6d; River Plate at 35s to 36s 6d; Australians at 35s 9d. Flour firm, quiet. Maize dull, prices tending in buyers' favour. Mixed American, ex ship, to arrive, held at 23s 9d to 24s; Odessa, ex ship, at 23s 6d to 23s 9d; landed at 24s to 24s 3d. Barley firm, quiet. Danubian, landed, held at 26s; Persian, ex ship, at 22s 9d; landed at 23s 6d. Oats dull, easier tendency. River Plate quoted at 18s 6d to 18s 9d; South Russian, 38 lb, 18s 7½d. Arrivals:—June 22-25: Foreign wheat, 29,040 qr; oats, 85,360 qr; maize, 8,080 qr; flour, 31,600 sacks.

Mark Lane, Friday.—Wheat: English firm on small supplies. Whites quoted at 34s, 36s; reds at 33s, 35s. Foreign firmly held at 3d to 6d advance, but not active. Northern Manitoba, ex ship, held at 36s 6d; No. 2 at 35s 6d; No. 1 hard Manitoba at 37s 6d; choice white Karachi at 53s 6d; red Karachi at 33s 3d; Australian, landed, at 36s; La Platas at 35s, 37s. Flour firm, but quiet. Hungarian quoted at 35s, 35s 6d; Minnesota Patents, at 27s, 28s. Maize firmly held at full prices. Odessa, ex ship, quoted at 22s 9d; mixed American, ex ship, at 24s, 24s 3d. Barley firm, quiet, supplies very small. Danubian, landed, quoted at 26s; Persian, ex ship, at 22s 9d, 23s; landed at 23s 6d, 23s 9d. Oats steady, quiet. 18 7½d asked River Plata, and 18s 6d South Russians (38 lb), both ex store.

COUNTRY.

Ashford, Tuesday.—Trade recovered from the temporary depression of a week ago, and wheats were again quoted at from 33s to 35s; very few samples were offered. Barley rather dearer at 27s to 29s. Maize also dearer, making 25s to 27s. Grinding barley, foreign, made 26s to 27s; Mazagan beans, 29s to 31s; white oats, 22s to 25s; black oats, 21s to 23s; tick beans, 32s to 33s; grey peas, 30s to 32s. Flour unchanged.

Banbury, Thursday. — Wheat, white (new), 31s to 32s per qr; red (new), 31s to 32s per qr; barley, 26s to 30s per qr; beans, 31s to 32s per qr; oats, 20s to 25s per qr; peas, 29s to 34s per qr.

Berwick, Saturday. — Small attendance, with little grain on offer. Trade all round unaltered.

Birmingham, Thursday. — There was not much business doing at the market, but there were more inquiries, which betoken a better trade in the near future. Quotations: Foreign wheats, No. 1 Northern Manitobas 36s 9d per 496 lb, Bristol; River Plate, 33s to 35s 6d per qr, and Russian, 32s 6d to 34s per qr at Sharpness. Both Bessarabian and Plate maize were offered at 25s per 480 lb at Sharpness; grinding barley, 25s 6d per 400 lb at Sharpness. English wheats were scarce, and made from 12s 9d to 13s per 186 lb, delivered; oats, 22s 6d to 23s per 312 lb; beans, 13s per bag (196 lb), delivered.

Bury St. Edmunds, Wednesday.—A moderate supply of wheats on offer, and the trade was firm at last week's prices of 32s 6d to 33s per qr delivered. The last year's crop is getting near the end, and holders are very slow to part. Oats 22s to 24s per qr for fine qualities. Beans 30s to 31s. Linseed cakes a steady trade for forward sales. Middlings dear and scarce at £6 10s to £7, bran £4 15s to £4 17s 6d.

Canterbury, Saturday.—Best 65 lb samples of English corn were selling to-day at 37s, an advance of 1s on the week. The range in values is now from 35s to 37s. English barley is firm at from 27s to 29s, but the business is not large; oats are very steady at from 20s to 25s; grey peas, 31s to 33s; tick beans, 31s to 34s. The oat crop is looking distinctly unsatisfactory, and the prospects of the cereal crops generally are not up to those of last year.

Carlisle, Saturday.—Small supply of oats in our market to-day. Good demand at last week's prices, 24s per 336 lb.—Thomas Robinson.

Chester, Saturday.—English grain of all kinds fully maintained last week's values. Indian corn of prime quality not plentiful, and for such the prices quoted a week ago were repeated. New red and white wheat fetched from 4s 10d to 5s per 75 lb. Grinding barley, 3s 9d to 4s per 64 lb; old beans, 6s to 6s 6d, and new, 5s 6d to 5s 9d per 80 lb; old oats, 3s to 3s 4d, and new, 2s 10d to 3s per 46 lb; Indian corn, feeding, old, 13s 6d to 13s 9d, and new, 13s to 13s 3d per 240 lb; old round corn, 13s 6d to 14s.

Colchester, Saturday. — Wheat, small supply, at 1s advance.—Colin Taylor, King and Co., Ltd.

Coventry, Friday.—Wheat in only small supply, and prices showed an advance of about 6d per qr on last week's rates. Spring corn of all kinds was very scarce, and recent figures were easily realised. Quotations: Wheat, 11s 6d to 12s 6d per 186 lb; barley, 28s to 34s per 448 lb; oats, 23s to 26s per 352 lb; beans, 12s 3d to 13s 6d; peas, 12s to 14s.

Derby, Friday.—The supply of wheat was exceedingly small, and business was done at the full prices of last week. New white wheat, 36s to 37s; new red, 34s to 35s; grinding barley, 23s to 24s; old beans, 36s to 37s; new, 34s to 36s; oats, 24s to 25s.

Devizes, Thursday.—The trade for wheat is firm at last week's prices, and there is no alteration in the price of other corn. Best wheat, 16s to 17s; secondary, 15s to 16s; malting barley, 24s to 30s; feeding, 22s to 24s; old oats, 20s to 24s; beans, 16s 6d to 18s; fine flour, 26s to 28s; extra fine, 30s to 34s.

Doncaster, Saturday.—English wheat was shown sparingly, and business was in small compass. Prices firm, and 3d per load dearer on the week. Foreign met with a steady trade, and all descriptions were 9d per qr dearer on the week. Oats firm, with a moderate trade. Maize and beans at fully late prices.

Dorchester, Saturday.—After a week of very cold, unsettled weather to day broke bright and fine, with a decidedly improved temperature. The result was that every one was soon busy in the hayfield, both with the scythe and the reaper, and, tedding operations proving so successful, a considerable quantity of hay—a good deal of which had been down quite a week—was got together, but not, of course, in the best of condition, a good deal of it being badly discoloured from long exposure in the rain. The attendance at the corn market was consequently very limited, and there was an equally short supply of samples. A very firm tone pervaded business, and holders of wheat generally asked an advance of 6d to 1s per qr., which was only in necessitous cases conceded. Grinding barley continues very scarce, and sellers demanded 1s more, which buyers, as a rule, declined to give. Oats ruled very firm, as did maize; and, with a steady demand, feeding stuffs were also sold for full values.

Glasgow, Wednesday.—There was the usual attendance. Wheat and flour steady at late rates. Maize and corn the turn dearer, and to-day's price shows an advance of 1½d per boll on both since last Wednesday. Barley unaltered—practically none on spot. Oats steady. Beans and pease unchanged. Bran and thirds unaltered on the week. Oatmeal quietly steady.—Gibson and Clark.

Gloucester, Saturday. — English wheat in nominal supply: Reds, 32s to 33s; whites, 33s to 34s. Foreign wheat firm; Plates, 34s 9d to 36s; Russians, 32s 6d to 34s. Plate maize, 25s 3d to 25s 6d; flat, 24s 3d; new, Bessarabian, 25s. Barley, 25s. Oats, 21s to 21s 6d.

Grantham, Saturday.—The Royal Show at Lincoln had an adverse effect upon the attendance. Wheat was rather dearer on the week, commanding 33s to 34s per qr; oats, 21s to 23s; beans, 32s to 33s per qr.

Hereford, Wednesday.—Small attendance of buyers, and very few samples on offer. Wheats found reluctant buyers at 4s per bushel. Maize was quiet but steady. Nothing doing in barleys. Oats difficult to sell at recent rates. Wholesale quotations:—Wheat, 3s 10d to 4s per 62 lb; barley, 3s 3d to 3s 9d per 56 lb; oats, 2s 6d to 2s 10d per 40 lb; beans, 3s 9d to 3s 11d per 65½ lb; maize, 3s 3d to 3s 6d per 60 lb.

Ipswich, Tuesday.—Very little corn on offer. Wheat steady at late rates; reds, 32s to 33s per 504 lb. Maize 3d per qr dearer. Oats firm. Beans and peas unaltered.

Leeds, Tuesday.—We have to report a complete change in the wheat trade, which from depression has suddenly turned to firmness and activity, and prices have recovered quite 9d per qr from the rates current last Tuesday. There is an improved consumptive demand to-day, holders in many cases standing out for 1s per qr advance. Maize 3d to 6d; beans 3d dearer; oats rather easier.—Dunns and Co.

Leeds, Friday.—Although prices were against them on Tuesday, millers still bought sparingly. With more favourable reports of harvest weather conditions, no further advance for either English or foreign wheats took place. There was a fair demand at late rates, best runs closing at 30s. Maize was firmer, Plate making 25s and Odessa 24s. Foreign malting barely was dearer, closing at 30s. Other articles were unchanged.

Leicester, Saturday.—Fair attendance of buyers and dealers, with moderate supplies of home-grown wheats, which met a slow sale. Red wheats, 33s to 35s per 36 stones; white, 34s to 36s per 36 stones; grinding barley, 29s to 31s per 32 stones; beans firm rates; fine oats, 22s to 24s per 24 stones.

Lincoln, Friday.—A small attendance owing to the Royal Show, and trade practically at a standstill. Both English and foreign wheat quotably firm, the latter at an advance of 6d to 1s. Feeding stuffs firm and unaltered.

Chichester, Wednesday.—Small attendance and very little trade transacted. New white wheat 32s 6d to 33s 6d; new red ditto, 32s 6d to 33s 6d; grinding barley, 25s 9d to 26s 6d; oats, English, 19s to 23s; beans, 32s to 33s; maize, 23s 6d to 25s 6d, flour, 24s to 28s.

Manchester, Thursday.—Wheat: English, 6d per qr., and foreign, 1d to 2d per cental higher on the week. Flour unchanged. Indian corn shows a little change to occasionally ½d higher. Oats very firm. Barley: English scarce and practically cleared; beans and peas quiet and unchanged. Bran about 3d to 6d per load lower.

Newcastle-on-Tyne, Saturday.—We had a very quiet demand for wheat at our to-day's market. Prices, however, were firmly held at 6d per qr advance over last Saturday's quotations for foreign sorts. English qualities unchanged. Oats of all descriptions firm at late quotations. A slow demand for beans and peas; holders, however, were firm at fully late rates. Maize steady at last Saturday's prices; the demand, however, was not active.—Joseph Pollard and Co.

Newark, Wednesday. — Trade dull; prices stationary. Quotations: Red wheat, 33s to 33s 6d; grinding barley, 27s; white oats, 23s to 23s 6d; old beans, 33s per qr.

Newport, Wednesday. — Trade was quiet. Barley advanced 6d on the week. Oats, brown maize, and flour were unchanged. Flat maize dearer.

Northampton, Saturday.—The attendance, was below the average with a very small supply of corn on offer, prices of which were almost unchanged, wheat making an advance of 6d per qr. New wheat, 31s to 32s; barley, 26s to 29s; white oats, 24s to 25s; black oats, 23s to 24s; beans from 31s to 32s; peas, 30s to 32s; flour, 26s to 30s.

Norwich, Saturday.—The wheat supply continues very small, and there is little business passing. Foreign wheat is dearer to the extent of 6d to 1s per qr. Values, 33s to 33s 6d delivered. Averages: Wheat, 1,459, £1 11s 0¾d; barley, 44, 24s 1½d; oats, 207, 20s 3¼d.

Nottingham, Saturday.—Wheat but little English offering, and held for 6d to 1s advance; foreign 6d dearer. Grinding barley firm. Oats and beans in small supply, values well supported. —Robt. Hubble.

Peterborough, Saturday.—The weather has been finer this last week, and farmers are busy amongst the hay, so we have had a very small market. Wheat making about 6d per qr more than last week. Oats firm but quiet. Wheat, 32s to 33s; oats, 22s to 23s; beans, 31s to 33s.—Thos. Hill and Son.

Preston, Saturday.—There was a fair attendance. Local grown wheat and other grain were scarce, and buyers were willing to pay a slight advance for what was offered. Flour firm. Quotations: Wheat, white,new, per windle of 220 lb, 13s 9d to 15s; ditto red, 13s 6d to 14s 6d; oats, old, per bushel, 3s 3d to 3s 4d; beans, per windle, 16s 6d to 17s.

Reading, Saturday.—The attendance was below the average, and there was but little disposition to trade. Prices: Wheat, 32s 6d to 34s; oats, 21s to 22s; English barley 28s; peas, 30s to 34s; beans, 31s to 36s; hay, 80s per ton; mangels, 16s per ton in place; oat straw, 42s per ton; barley straw, 38s per ton; flour, current rates.

Retford, Saturday.—Small supply of wheat, and a dull trade, at practically unaltered prices—32s to 33s per qr. All kinds of grain for feeding purposes dear, and values were well maintained, maize making 26s to 27s; English beans, 32s; black oats, 20s to 21s; and white ditto, up to 22s per qr.

Ripon, Thursday. — Wheat prices show an upward tendency. Small show of samples, and little business passing. Wheat, 30s to 32s; ditto foreign, 34s to 38s 6d; grinding barley, 25s to 26s; oats, 23s to 25s; round maize, 26s to 27s; flat ditto, 25s to 26s per qr

Sheffield, Tuesday.—Following the temporary decline of a fortnight ago, wheat has had a sharp upward turn through fear of a short crop caused by the late and cold spring. Various grades were quoted 9d to 1s per qr higher than last week. Maize firm at a slight increase over last Tuesday's rates. Beans, peas, and oats all firm, and without change. Quotations:—Wheat, white, new, 32s 6d to 33s; ditto red, new, 32s 6d to 33s per 504 lb; oats, black, 22s 6d to 23s; ditto white, 23s 6d to 24s per 336 lb; peas, grinding, 33s 6d to 34s; ditto blue, 75s to 90s per 504 lb; beans, English new, 35s 3d to 35s 6d per 532 lb; barley, grinding, 26s to 26s 6d; ditto malting, 28s to 32s per 448 lb;

Indian corn, small, 25s 9d to 26s; ditto Plate, 25s 9d to 26s; ditto flat, 25s to 28s per 480 lb.

Stamford, Friday.—Small attendance, of farmers owing to Royal Show, Quiet trade, no material alteration in prices. Wheat, 30s 6d to 31s; beans, at 31s 6d to 32s; oats, 21s to 22s; peas and barley scarce.

Stockton, Wednesday.—Practically no local wheat was showing, owing to unsettled weather. Foreign wheat market very firm, and making 9d to 1s advance on the week. Maize 3d and 6d dearer. Oats unchanged.

Sunderland, Saturday.—Limited supply of grain. Wheat held for rather more money. Spring corn unchanged. Arrivals coastwise.—Oats, 172 qr; beans, 118 qr; foreign, nil.—E. and F. Richardson.

Tunbridge Wells, Friday.—White wheat, 32s to 33s; red ditto, 31s to 32s; barley, 26s to 32s; grinding ditto, 23s to 25s; oats, English, 22s to 24s; rye, 24s to 25s; peas, 32s to 37s; beans, 32s to 37s; tares, 42s to 48s; maize, 22s 6d to 24s.

Wisbech, Saturday.—Small attendance at market. An odd sample or two of grain offering. Wheat firmly held for 1s. advance. Reds, 33s per 504 lb. Spring corn firm at late rates.—James Fletcher.

Wolverhampton, Wednesday.—There was a fair attendance, but business was quiet, and here were no alterations in last week's rates.

Worksop, Wednesday.—Poor attendance. Moderate show of grain, which was firm at last week's prices. White wheat, 33s to 34s; red wheat, 32s 6d to 33s 6d; barley, 27s to 29s; white oats, 22s 6d to 24s; black oats, 21s 6d to 23s; maize, 26s to 27s 6d; beans, 34s to 36s per qr.

York, Saturday.—Wheat was scarce, and as advanced 6d per qr on the week. Fine white 32s to 33s, red and mixed 31s to 32s per qr of 36 stones; feeding barley, 27s to 28s per qr of 32 stones. Oats firm, without any change in price; White Tartary, 20s to 21s, ditto black, 21s to 22s 6d, white Garton, 22s 6d to 24s per qr of 24 stones; rye, 27s; beans, 32s per qr of 36 stones.

FOREIGN.

Hamburg, Saturday.—During the early part of the week we had still cold, rainy, and stormy weather, but since yesterday it is more genial, reviving the hopes of farmers for the result of their crops. According to the official report, rye, barley, and oats look well in Germany, white wheat will be a deficient crop, and meadows are not so productive as last year. Potatoes look promising. Wheat was in fair demand, but closed quiet, 79 to 80 kg River Plate is offering at 32s to 33s; Australian at 33s 6d per 480 lb; Walla Walla, 33s 6d to 34s per 500 lb ex ship; 9 10 15 Odessa to Nicolaieff rye is offering at 32s to 32s 6d; fine American Northern at 33s per 480 lb ex ship. The growing crop of barley is making satisfactory progress. Stocks of malting are cleared. Offers of feeding barley continue scarce, and spot parcels of 60 to 61 kg. South Russian are selling at 25s to 25s 6d, August shipments are held at 20s 6d, September 19s 9d to 20s per 400 lb, c.i.f. Hamburg. Maize in fair demand; kiln-dried mixed American is selling at 24s 9d to 25s 3d; Danubian afloat at 22s 6d per 480 lb, c.i.f. Hamburg.—John Tatlock.

Hamburg, Saturday.—Prospects of our coming crop of malting barley remain quite satisfactory, and the reports from the principal districts in Germany are rather cheerful, but fine sunny days are now required, whilst the weather remains somewhat unsettled. In Austria and Hungary the weather has been far more favourable, and although the quantity will hardly reach an average, the quality will make this good if the present favourable weather continues, but harvest will probably be somewhat later than usual.—F. M. Th. Duhne.

Five Years' Comparative Averages.

(OFFICIAL.)

Comparative statement of grain sales and prices at the Statute markets for the week ending June 29, and for the corresponding week in each of the years from 1903 to 1906:—

FEEDING STUFFS.

Mark Lane, Monday.—Linseed Cakes.—Imports of foreign continue extremely light, but amply sufficient to meet the demand which is of the smallest possible description; at the same time, there is no indication of lower values, as both home manufacturers and shippers maintain a very firm attitude. Russian sell quietly at late rates. East India seed pures have been sold at 2s. 6d. less money. Fine seedy Calcuttas make last week's prices. London made find a dull sale although attractively offered. Cotton Cakes—Egyptian come to hand sparingly, and with only small stocks in warehouse, holders ask full prices, but English makes may be bought on slightly easier terms. Decorticated—London made pures meet a free sale, also Digestive meal, while American brands remain neglected. Rape Cakes quiet but firm. East India remain unchanged. Maize Germ Meal.—Nothing offered in white American, but English makes are held above the marked. Maize gluten meal is in good request. Rice Meal.—Landed lots of Rangoon are nominally quoted, while for shipment no fresh business of importance is reported. Locust beans make full prices. Dried brewers' grains are unaltered. Nitrate of soda is without change.

—H. Jones Langar and Co.

Hull, Tuesday.—Linseed: Plate linseed weak and full 6d per qr lower, spot nominal 43s 9d, afloat and June-July 44s, July-August 44s 6d Duluth; 44s 6d June-July. Libau and for Riga steady, 44s 0d prompt and July, 44s October-November. Cottonseed: There is hardly any business to report in old Egyptian excepting a little spot, for which holders accepted £8 1s 3d, June £8 2s 6d, and July £8 5s the nominal values. November-January sold at £7s 3s 9d, but no buyers now at over £7 2s 6d. Oils.—Cottonseed oil: The market is dull. Linseed oil: 25s 9d spot, 24s 6d July-August, 23s 6d September-December. Cottonseed oil: 30s 6d spot, 30s June-August, 28s September-October, 24s November-April: Crude oil: 28s 6d spot, 28s July-August, 26s September-October, 22s 6d November-April. Rape, brown, Jamba naked, 32s 6d spot. Oilseed cakes: A steady market for all kinds at previous rates, but the demand is very quiet as is usual at this time of the year.—Kilgilley, Maxsted & Co.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Ample and varied supplies of fruit and greenstuffs on offer, the demand being fairly brisk. Quotations for English produce:—Grapes, 9d to 3s; cherries, 3s 6d to 7s 6d; gooseberries, 2s to 2s 6d per half-sieve; peaches, 2s 6d to 15s per dozen; green figs, 3s to 6s; nectarines, 2s to 12s 6d per dozen; tomatoes, 4s to 5s per 12 lb; strawberries (Southampton), 1s to 2s per basket; ditto (Kent) 2s to 4s per peck; mushrooms, 6s to 10s per 12 lb; green peas, 5s to 6s per bag; ditto, 3s to 4s 6d per bushel; English beans, 6d to 8d per lb; broad beans, 2s to 2s 6d per bushel; cabbage, 3s to 4s 6d per tally; spinach, 9d to 1s; beetroots, 1s 6d to 2s per bushel; spring onions, 1s to 1s 6d per dozen bunches; vegetable marrows, 4s to 6s; endive, 1s 6d to 1s 9d per dozen; cucumbers, 3s 6d to 5s per flat; cos lettuce, 6d to 9d per score; horse-radish, 10s to 15s per dozen bundles; mint, 1s to 1s 6d; leeks, 1s 6d to 2s; carrots, 2s 6d to 3s 6d; turnips, 2s 6d to 3s 6d per dozen bunches; potatoes, 5s 6d to 8s per cwt.

POULTRY AND GAME.

Smithfield, Saturday.—Fairly good supply and demand. Prices:—Surrey and Sussex fowls, 3s 6d to 5s 3d; Lincolnshire fowls, 2s to 3s; Essex fowls, 2s to 3s; Irish fowls, 1s 8d to 2s 6d; goslings, 4s 6d to 5s 6d; country ducks, 2s 3d to 3s; Aylesbury ducks, 2s 9d to 3s 3d; quails, 6d to 1s; ptarmigan, 8d; feathered pigeons, 8d to 10d; Bordeaux pigeons, 11d to 1s 2d; tame rabbits, 1s 2d to 1s 4d; wild rabbits, 6d to 8d; live hens, 1s 6d to 2s each; Australian rabbits, 6s 6d to 7s 6d per doz.

WOOL.

London, Saturday.—English—per pk. of 240 lb.—Fleeces, South Down hoggs, £15 to £15 5s; half-bred hoggs, £13 10s to £14; ditto wethers, £13 to £13 15s; Kent fleeces, £12 5s to £13 5s; South Down ewes and wethers, £14 to £14 10s; Leicester ewes and wethers, £12 10s to £13. Colonial—per lb.—Vic., scoured super., 2s 2d to 2s 3d; scoured, good, 1s 11½d to 2s 1d; scoured, average, 1s 10d to 1s 11d; greasy, average to fair, 1s 1½d to 1s 2½d; N.S.W., scoured, average, 1s 9½d to 1s 10½d; greasy, average, 1s to 1s 1d; S. Aus., greasy, average, 10d to 11d; N.Z., scoured, average, 1s 10d to 1s 11d; greasy, average, 11d to 11½d; Cape, scoured, super., 1s 9½d to 1s 10½d; fleece, average, 9½d to 10½d; greasy, average, 8½d to 9½d; Natal, scoured, 1s 5½d to 1s 6½d; greasy average, 8½d to 9d. Crossbreds—grs.—Vic., good to super., 1s 3½d to 1s 4½d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s 1d to 1s 2d; coarse, 10½d to 11½d.

Canterbury, Saturday.—Factors continue to offer 11d to 11½d per lb for Kent fleeces, with lamb wool at 8d, but there is not much business resulting.

Halifax, Saturday.—For wool there is but a small business passing, chiefly to cover present needs, with little or no disposition to look far ahead. Home-grown wools are very quiet, and in some cases are not quite firm.

WET AND DRIED GRAINS.

Mark Lane, Monday.—Wet Grains: Prices remain about the same, and business has been done at 12s and 13s ale, and 9s. to 9s 6d porter per ton. Pressed white distillery meal is firm at 32s 6d per ton on rail, London. Dried Grains.—The demand continues fairly brisk and prices are firm at—Distillers, 105s; ale, 92s 6d to 95s; mixed, 85s to 87s 6d; and the same prices for monthly deliveries, June to September, on rail, London. Calcutta rice meal, 85s; rice germ, 97s 6d; oat feed, 70s to 72s 6d; American cane treacle in good demand, 87s 6d per ton, on rail, London.—Hamlyn and Co.

SEEDS.

Mark Lane, Monday.—There is more movement on the market, on account of the unpropitious weather we are experiencing. Tares unchanged. Rye scarce. Mustard firm. Rape extraordinarily scarce and high in price. Peas rather more inquiry. Grass seeds firm. Clovers, more especially whites and trefoils, held for more money. Prospects of the new crops are against fine qualities.—John Picard and Co.

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, Monday, 3 p.m.

The market to-day was firmer from the close of June, and the poor crop reports from Canada and the United States of America, as well as the decline in French and German prospects, caused all holders, not actually pressed for cash, to take up a very confident position. The price of English wheat had a somewhat wider range than heretofore, as on the one hand good prices are eliciting special offers of fine grain, and on the other hand the excellent London demand for chicken wheat causes that type to reach the capital with more freedom than usual so late in the season. Maize was firm at currencies. Barley was dearer than ever for Russian, but English was neglected. Oats were against sellers of 304 lb. kinds, but were very firm for all heavy descriptions. Rye was firm at the recent rise; beans and peas also were a firm market.

CLOSE OF THE MARKET.

THE MARKET CLOSED WITH AN IMPROVED BUSINESS IN WHEAT.

THE FLOUR TRADE.

MARK LANE, Monday, 3 p.m.

London millers to-day took up a slimg position and the cash prices given below were, viz., strictly demanded. Country flour was quiet, but had a steady sale at the reduction allowed last week. American flour was quite as dear as at the June markets so, too, was Hungarian. Barley meal rather dearer on the week, and a small use was quoted on Rye flour and meal Rice bran and meal was in good supply, but the price was fully supported. Middlings pollard and bran were quite firm, and though the sales in July are never brisk, more business doing than at this time last year. The London position for foreign flour is considered to be strong as Liverpool prices for American and Hungarian are a good shilling per sack above what millers and importers in London are quoting. New York telegraphs flour at 21s. 6d. per sack for the ordinary sound type "spring wheat clears."

THE BALTIC.

Monday, 1 p.m.

State of Trade.

Wheat buyers and sellers are somewhat at issue, but only about 6d separates them, so that a fair business for July looks like being done. Maize cargoes are steady. Barley is very firm. Cottonseed favours buyers for all dates, but linseed is fairly steady, and rapeseed continues both firm and dear.

Business Done.

Wheat.—Entre Rios, 35s per per per 480 lb, on passage; Buenos Ayres, 34s 6d per 480 lb, arrived; Baruso, 34s per 480 lb, on passage; Rosario, 34s 6 d per 480 lb, on passage; Barletta, 34s 9d per 480 lb, on passage; best Manitoba, 35s 3d per 480 lb, on passage; White Karachi, 34s 3d per 492 lb, July shipment; Red Karachi, 34s per 492 lb, July shipment; Red Karachi, 33s 9d per 492 lb, August shipment; Blue Stem, 35s per 500 lb, due in August; Walla Walla, 34s per 500 lb, due in August; Australian, 34s 6d per 480 lb, due.

Maize.—Argentine, 23 6d per 480 lb. on passage; American, 23s 6d per 480 lb, arrived; Galatz, 23s 9d per 480 lb, July shipment; Odessa, 23s 9d per 480 lb, July shipment.

Barley.—Azoff, 22s per 400 lb, July shipment; Azoff, 21s 3d per 400 lb, September shipment.

Oats.—No. 2 Manitoba, 19s 6d per 320 lb, prompt shipment; Petersburg, 18s 3d per 304 lb, prompt shipment.

Peas.—White Calcutta, 33s 9d per 504 lb, prompt shipment.

Linseed.—Calcutta, 44s 6d per 410 lb, prompt shipment.

Poppyseed.—Indian, 55s 3d per 377 lb, September shipment.

Cottonseed.—Bombay, 6s per cwt, prompt shipment.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour.—The market has firmed up this week, and there is more business passing in flour. Grain—Both round and flat corn are scarce on spot, at 3d per boll advance. Manitoba oats very plentiful, but in good demand. Beans and pease rather firmer. Oatmeal very scarce. Mill Stuffs.—There is an excellent demand for bran and thirds. Winter wheat patents, 27s 6d to 28s per 280 lb; spring wheat patents, 28s to 28s 6d per 280 lb; American corn, 14s 1½d to 14s 3d per 280 lb; round corn, 14s 1½d to 14s 3d per 280 lb; grinding beans, 18s 7½d to 18s 9d per 280 lb; white pease, 18s 6d to 19s 6d per 280 lb; broad bran, 95s to 97s 6d per ton; medium bran, 87s 6d to 90s per ton; fine thirds, 120s to 122s 6d per ton; common thirds, 97s 6d to 100s per ton; American oilcake, 145s per ton.—McKinnon and McDonald (Glasgow).

Flour.—Trade continues quiet with only a moderate demand; there are indications however of greater firmness in prices.—Greenhill Bros. (Belfast).

Offals.—The demand for bran is rather quiet, no change however to report in prices.—Greenhill Bros. (Belfast).

Flour has been firm to-day at an advance of 3d to 6d on the week—T. S. Medill and Sons, Ltd.

Milling Offal.—The demand remains good and prices firm, with bran occasionally 2s. 6d. per ton dearer.—John Bawcomb and Co.

Moderate arrivals of wheat. Trade firm Manitoba 1s per qr higher. Flour firm. Barley unchanged. Oats and round 3d per qr lower.—Coventry and Shepbard.

TERM MARKET.

Wheat is firmer for future delivery. Maize unchanged. Latest prices are:—

Wheat, Red Winter, July delivery	7s. 0d.	per cental		
,, ,, Aug.	,,	7s. 1d.	,,	
,, ,, Sept.	,,	7s. 3d.	,,	
,, ,, Oct.	,,	7s. 4d.	,,	

Maize, Mixed American, July to Oct. delivery, 4s. 11d. per cental.

There are buyers of Canadian peas for August delivery at 6s. 7d. per cental; sellers at 6s. 8d. London Corn Trade Association prices for wheat cargoes to-day (on arrival) were 34s. 6d per 492 lb. for white Karachi, and 34s. for red Karachi.

PROVISIONS.

London, Monday.—The arrivals of bacon last week were:—From Ireland, 2,205 bales; and from foreign ports, 16,202 bales. The lower prices for bacon stimulated the demand, and the market closed steadier, quotations ranging—Irish, 56s to 60s up to 67s; Danish, 56s to 59s up to 64s; Canadian, 54s to 57s up to 61s. Butter.—The butter market was steady. French, 94s to 102s; Danish, 108s to 110s; Russian, 72s to 96s; Dutch, 98s to 100s; Irish, 88s to 103s; Victorian, 76s to 98s; New South Wales, 86s to 96s; Queensland, 76s to 92s; New Zealand, 94s to 100s. Lard.—Lard was a slow market. Irish, 46s to 58s; Danish, 47s to 50s; American, 42s 3d to 45s 6d.

HOPS.

Borough, Monday.—There is a rather better feeling on this market. Owing to the unkindly weather, the reports from the plantations are unfavourable.—W. H. and H. Le May.

Worcester, Saturday.—Hops make steady progress as a rule, although the bine is rather irregular and with apparently more blight which has to be kept in check. Holders still hold off their hops, or ask rather too much money which prevents business. There is enough doing to take up any lots on offer at late rates.—Charles Faram and Co.

Canterbury, Saturday.—The hop plant is backward, owing to the absence of sunshine.

POTATOES.

Borough, Saturday.—A moderate inquiry prevailed for the good supply Jersey, 7s to 7s 6d; Cherbourg 6s to 6s 6d; St. Malo, 7s; Teneriffe, 6s to 7s per cwt.

Carlisle, Saturday.—The supply was small, and a quick clearance resulted. Old potatoes, 9d to 10d; new ditto, 1s to 1s 4d per stone.

Doncaster, Saturday.—New potatoes: St. Malo and Guernseys, 7s 6d to 8s 6d per cwt; retail, 10 lb and 12 lb for 1s. Old potatoes scarce, and late prices prevailed.

Goole, Wednesday.—The attendance was very small. The supply of old potatoes is about exhausted. Jersey new potatoes are firm. English potatoes will not be on the market for a few weeks.

Lancaster, Saturday.—There was a good supply, which met a ready sale at 6d to 9d per stone.

Manchester, Saturday.—Potatoes: Yorkshire, 18s; Cheshire, new, unwashed, 17s 6d to 18s 6d; washed, 18s to 21s; Lincolns, 16s to 18s per load; Irish, 7s to 7s 6d; Jersey, 8s to 8s 6d per cwt.

Preston, Saturday.—There were no old potatoes, and the first local new potatoes were on offer; 20s. to 22s. per load of 240 lb was about the average, although some sellers sold at 17s, while others commanded 25s.

Spitalfields, Saturday.—Good supplies were in moderate request. Jersey, 7s to 7s 3d; St. Malo, 7s to 7s 6d; Cherbourg, 6s to 6s 6d; Teneriffe, 6s per cwt.

Stockton, Wednesday.—Old potatoes, £5 per ton; Jerseys, 8s 6d; 6s. per cwt.

Worksop, Wednesday.—No old potatoes on offer New potatoes, 8s 6d to 9s per cwt.

York, Saturday.—Practically no trade in old potatoes. New home grown potatoes made 2s per score pounds, or 2s per hamper.

HAY AND STRAW.

Birmingham, Friday.—Small supply, trade quiet. Hay, £3 5s to £3 10s per ton; straw, 2s 4d per cwt.

Derby, Friday.—Best old clover, 90s to 100s; new, 80s to 90s; best old hay, 90s to 100s; new, 80s to 90s; second ditto, 65s to 70s; wheat straw, 60s to 70s; pressed ditto, 50s to 60s; chop straw, 55s to 65s; peat moss, 35s to 40s.

Hereford, Wednesday.—Trade in hay and straw very low indeed without quotable change in prices.

Lancaster, Saturday.—Meadow hay, 6d; clover, 6½d; wheat straw, 4½d; oat straw, 4d per stone.

Leeds, Tuesday.—There is a fair demand in the warehouses at the following prices:—Clover hay, 7½d; meadow hay, 7d; wheat straw, 5d; oat straw, 5d; and rye straw (retail) 7d to 8½d per stone; green clover, 3½d per bundle.

Lincoln, Friday.—Prime hay and seeds, £4; secondary ditto, £3 5s to £3 10s; straw about 40s per ton on the ground.

Manchester, Friday.—Old hay, 4½d to 6d; old clover, 5½d to 6½d; wheat straw, 3½d; oat, ditto, 3d to 3½d per stone of 14 lb.

Newcastle, Tuesday.—Old land hay from £3 12s 6d to £4 4s per ton; new land hay from £4 5s to £4 7s 6d; wheat straw from £1 to £1 3s per load; oat straw, from £1 to £1 3s.

Sheffield Tuesday.—Moderate supplies, and a small attendance of farmers. Trade quiet at about late prices. Choice old seeds, £5 to £5 5s; ditto hay, £4 10s to £4 15s; straw, £2 15 to £5; green clover, 13s to 21s per ton.

Whitechapel, Saturday.—Light arrivals received quiet support, at late rates: Best clover, 84s to 97s 6d; inferior ditto, 75s to 80s; specially-picked hay, 90s; good ditto, 80s to 87s 6d; inferior ditto, 65s to 70s; mixture and sainfoin, 82s 6d to 90s; straw, 28s to 34s per load.

BUTTER.

(Price per lb.)

Altrincham: 1s 1d to 1s 3d Appleby: 8½d to 10d. Barnstaple: 1s. Berwick: 6d to 11d. Birmingham: 1s to 1s 2d. Camelford: 10d and 11d. Carlisle: 10 to 11d. Chester: 1s 1d. Dartmouth: 10d to 1s. Devizes: 1s 2d to 1s 3d. Doncaster: 11d to 1s. Dorchester: 9d to 1s. Evesham: 10d to 1s Kidderminster: Lancaster: 1s. to 1s 1d. Lincoln: 10d to 11d. Market Drayton: 11d to 1s. Otley: 1s 4d per 24 oz roll. Penrith: 8d to 11d. Penzance: 8½d to 10d. Retford: 1s. Ripon: 1s 2d to 1s 3d per 24 oz roll. Scarborough: 10d to 1s. Shrewsbury: 10d to 1s. Spalding: 0d. TO-DAY'S MARKETS.

CATTLE.

Metropolitan Market, Islington.

	Monday, July 1, 1907. British.	Total.	Monday, July 2, 1906.
Beasts	750	750	610
Sheep and Lambs	6,600	6,600	7,460
Calves	10	10	10
Pigs	—	—	—
Milch Cows	35	35	30

Quotations per 8 lb. (sinking the offal).

ENGLISH.

	Inferior. s. d.	Second. s. d.	First. s. d.
Beasts	2 6	3 8	4 8
Sheep	4 10	5 8	6 4
Lambs	5 8	6 4	7 0
Calves	—	—	—
Pigs	—	—	—

Milch cows, per head, £16 to £22 10s.

British arrivals include as follows:—Scotland, nil; Eastern Counties, 251; Midland, Home, and Western Counties, 459; Devon, 10; Ireland, 30.

We note a decrease of 100 head in the number of beasts offered for sale to-day compared with Monday last, the season for grass-fed cattle being now in full swing; the majority of the supplies consisted of this class of beasts. Trade throughout the day was of a slow nature, rates favouring the buyers to the extent of from 1d. to 2d. per 8 lb. in value. The Irish arrivals were considerably smaller, and consisted only of 30 Waterfords. These shared in the slow trade, but notwithstanding this in some cases a slight advance on last Monday's prices was obtained. Fat butchering cows and bulls were fairly steady both in regard to tone and value.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day. s d	s d	Monday, July 2, 1906. s d	s d
Scotch	—	—	—	—
Devons	4 6 to 4	8	—	—
Herefords	4 6 to 4	8	4 6 to 4	8
Norfolks	4 6 ex 4	8	4 2 to 4	4
Runts	—	—	—	—
Lincolns	4 2 to 4	4	3 10 to 4	0
Black Polled Dublins	—	—	—	—
Irish	4 2 to 4	4	—	—
Canadian	—	—	—	—
Fat cows	3 8 ex 3	10	3 4 to 3	6

There was a decrease of 520 in the number of sheep and lambs penned compared with Monday last. Trade throughout the day ruled of a slow and dragging nature; nevertheless, late values were maintained for all grades of English sheep. Scotch descriptions, on the other hand, were 2d. per 8 lb. lower. For Irish sheep, the season for which has just commenced, prices were fairly steady. There was a limited inquiry for lambs, nevertheless no decline in value can be noted. The supply included 300 Scotch, 200 Irish, and 1,456 from the Eastern Counties.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

	To-day. s. d.	s. d.	Monday, July 2, 1906. s. d.	s. d.
8 st. Scotch	5 10 to 6	0		
7½ to 8 st Downs	6 2 to 6	4	5 8 to 5	10
9 st. Downs	6 0 to 6	2	5 6 to 5	8
10 st Halfbreds	5 6 to 5	8	5 2 to 5	4
10 st Yorkshires	—		—	
12 st Lincolns	—		—	
10 st Irish	5 10 to 6	0	5 0 to 5	2
10 st Down Ewes	3 10 to 4	0	4 0 to 4	2
11 st Halfbred ditto	3 8 to 3	10	3 10 to 4	0
5 st Grass Lambs	6 10 to 7	0	7 0 to 7	2
6 st Halfbreds ditto	6 6 to 6	8	6 0 to 6	2

Calf trade not worth noting. No pigs on the market.

London (Central), Monday.—Supplies good; trade remains slow. Beef, English, 3s 9d to 4s; Scotch, 4s to 4s 8d; American, 3s 7d to 3s 10d; refrigerated hindquarters, 3s 8d to 4s. Mutton, English wethers, 4s 6d to 5s; ewes, 3s 4d to 3s 8d. Lambs, 5s to 6s; Scotch tegs and wethers, 5s 6d to 5s 10d; ewes, 3s 4d to 3s 8d. Veal, 3s 4d to 4s 8d. Pork, 3s 4d to 3s 10d per stone.

FOREIGN.

Deptford, Monday.—No market was held here to day. On Saturday, 1,950 beasts from the United States were offered for sale and met with a firm and steady trade at an advance in value. The best on offer were quoted at from 4s 3d to 4s 5d, ex 4s 6d; seconds, 4s to 4s 2d per 8 lb (offal given in).

Trade in the West.

As a consequence of keep being still so plentiful everywhere, only very moderate supplies of stores are just at present coming to hand, a good many finding it unnecessary to sell whilst they have so much surplus feed available. The effect of this is to keep trade buoyant for most things, milch beasts as well as barreners continuing to command outside values, particularly nice-class young heifers with a character for good milking properties, which are making just now from £17 to £21 10s. apiece for those having calves at their side, others of a plainer grade ranging from £12 10s. to £16 10s.; whilst in-calvers may be quoted from £14 to £11 10s.; yearlings, £5 to £7; and two-year-old heifers, £9 10s. to £11 5s. A few stock bulls are marketing at £7 5s. to £13 for anything of good promise. Barreners readily command the full rates lately current, those maturing early making up to £30 per pair and over down to £22 or £23, and others in less forward condition from £17 5s. to £21; old cows, £10 to £15 10s.

Sheep are keeping fairly steady at recent currencies, but although there has been no improvement in the supplies offering during the past week, we consider that prices are for some classes scarcely as buoyant as they have been of late; but at the same time we hardly feel justified in giving prices as quotably lower, which they can hardly be said to be, though there has been a little less animation in sales. The best Down ewes now make 46s. to 52s., ranging downwards to as low as 35s. or 36s. for distinctly ordinary grades, which every dealer is not exactly inclined to buy. But with the great summer sales of ewes now so soon to open, flockmasters are looking forward with every confidence not only to selling at the full prices now current, but even anticipate doing better at the later sales. This, however, will depend largely upon later harvest prospects, which largely affect the trade, and are by no means at present of an encouraging character; in fact,

Prices of fat stock all round, in spite of the distinctly bad outlook, keep steady, and as a rule are fairly well maintaintd, though we have no advance to quote either in beef or mutton. Some of the fat bullocks now coming to hand, particularly the steers and heifers, are of perfect finish, and the quality such as it would be diffieult to surpass. For animals of this stamp purveyors have to pay quite 12s. per score (or from £16 to £24 apiece); but secondary grades, in which we include fat cows, are obtainable on easier terms—10s. to 10s. 6d. or 10s. 9d. (or from £14 to £18 each); fat bulls selling rather quietly for coarse weights at 8s. 6d. to 9s. Calves rule firm up to 9d per lb. (from £5 10s. to £6 10s. being the top range now for best finished lots); seconds, 8d. to 8½d. some of the fat sheep now coming out, both ewes and wethers, are of considerable weight, and prices range for these from 50s. to 65s. apiece (or from 8d. to 8½d. per lb., shorn); aged ewes, 7d. to 7½d. Lamb meets a steady demand, especially for the best, which are making 42s. to 55s. apiece (or 11d. to 11½d. per lb.), and seconds, 32s. to 40s. (or 10d. to 10½d). Pigs are finding a very good inquiry, both for porkers and baconers, the former ranging this week from 42s. to 58s. (or 10s. 6d. to 11s.), and baconers 62s. to 95s. (or 9s. to 10s);

LIVE STOCK AND MEAT TRADE REVIEW

Written Specially for the "Mark Lane Express.")

Trade in London.

At the Islington cattle market on the chief market day of the week there was a decrease in the number of beasts offered for sale. For both prime and second quality fat cattle trade opened very slowly, and though no marked decline in value can be noted, concessions had to be made occasionally to effect sales. The majority of the supply still arrived from the Eastern counties. However, the numbers from the Midlands ran them very close on account of the grass-fed season having now commenced. The Irish consignment consisted of 18 Dublins (a few of which were choice black polled cattle) and 40 Waterfords. These latter shared in the poor trade experienced, and were quoted lower in number. Fat butchering cows and bulls were stronger in number, and met with less inquiry. Nevertheless, late rates governed most transactions. On Thursday sales were confined to fat butchering cows and bulls, trade for which was of a steady nature. A few fat beasts were held back in the lairs, but met with absolutely no inquiry.

At the Foreign Cattle Market, Deptford, rates on the whole were fairly steady, the arrivals consisting of consignments from the United States and Canada. The total number on offer at both markets was 4,910, as against 4,372 during the previous week, consisting of 890 British (decrease 110) and 4,020 foreign (increase 648). The following were the top rates obtained per 8 lb. (sinking the offal):—90 to 95 stone Herefords, 4s. 8d. ex 4s. 10d. ; 90 stone Norfolks, 4s. 8d. ex 4s. 10d. ; 100 stone Shorthorns, 4s. 2d. to 4s. 4d. ; 90 stone Dublin (Black Polled), 4s. 4d. to 4s. 6d. ; 95 stone Waterfords, 4s. to 4s. 2d. ; 90 stone fat cows, 3s. 8d. ex 3s. 10d.

The sheep trade at Islington on Monday, with an increase in the supply, ruled of an extremely slow and dragging nature, last week's values being impossible to realise, except in the case of ewes, all other grades being quoted at a decline of 2d. per 8 lb. On Thursday a further fall in value had to be accepted to effect sales in most cases. Lambs shared in the poor trade experienced, the choicest grass-fed descriptions making 4d. less than on the previous Monday, with a further fall of 2d. on Thursday ; 212 Canadian sheep were offered for sale at Deptford, but were not quotable. The total number penned at both markets was 9,182, as against 8,150 during the previous week, showing an increase of 1,032. Best pens made per 8 lb. as follows (sinking the offal):—7½ to 8 stone Downs, 6s. 2d. to 6s. 4d. ; 8 stone Scotch, 6s. to 6s. 2d. ; 9 stone Downs, 6s. to 6s. 2d. ; 10 stone ditto, 5s. 10d. to 6s. ; 10 stone Halfbreds, 5s. 6d. to 5s. 8d. ; 10 stone Down ewes, 3s. 10d. to 4s. ; 5 stone fat grass lambs, 6s. 10d. to 7s. ; 6 stone Half-bred ditto, 6s. 6d. to 6s. 8d.

Calves numbered 90 head, and met with a slow trade, only the very choicest making our top quotation ; the best on offer were quoted at from 5s. 6d. to 5s. 8d. per 8lb. (offal given in).

LONDON.

Islington, Thursday.—There was a small market, and attendance limited. No bullocks were included in offerings, and trade of fat slaughtering cows and bulls, though steady, was slow. Fat cows ranged from 2s 8d to 3s 8d, and fat bulls from 2s 6d to 3s 4d. Trade for sheep ruled dull, and prices were disposed to favour buyers. Best Down tegs, 6s 2d to 6s 4d ; 10-st cross-breds, 5s 6d to 5s 8d ; large wethers, 5s 2d to 5s 4d ; small Down ewes, 3s 10d to 4s ; 11-st crossbreds, 3s 8d ; lambs, 7s for best kinds. There was a nominal market for milch cows. The clearance was slow for calves, and the best barely fetched 3s 8d per stone.

Central Market, Friday.—Fair supplies and bad trade. Prices will probably finish lower. English beef, 3s 10d to 4s ; Scotch sides, 4s to 4s 2d ; shorts, 4s 2d to 4s 6d ; Deptford and Liverpool killed, 3s 7d to 3s 10d ; refrigerated hindquarters, best, 3s 8d to 3s 10d ; ditto seconds, 3s 6d to 3s 7d ; ditto forequarters, 2s 4d to 2s 5d ; inferior beef, 2s 2d to 2s 10d ; mutton, Scotch wethers, 5s 4d to 5s 6d ; ditto tegs, 5s 8d ; ditto ewes, 3s 6d to 3s 8d ; English wethers, 4s 8d to 5s 4d ; ditto ewes, 3s 6d to 3s 8d ; Dutch sheep, 4s 8d to 5s ; South American sheep, Antwerp killed, 4s ; English lamb, 5s 8d to 6s 8d ; German lamb, 5s 8d to 6s 8d ; veal, 3s 4d to 4s 8d ; English pork, 3s 4d to 3s 8d ; Dutch ditto, 3s 4d to 3s 6d per 8 lb.

COUNTRY.

Ashford, Tuesday.—Beef rather easier owing to large supply. Best, 4s 8d to 4s 10d ; secondary, 4s 4d to 4s 6d. Mutton again very dear ; Down wethers made 6s to 6s 6d ; Kent wethers, 5s 6d to 6s ; ewes, 4s 2d to 4s 6d Lamb made 8s to 9s. Veal, 5s to 5s 6d. Pork remained cheap.

Basingstoke, Wednesday. —At Raynbird and Sons' sale-yard there was a good attendance to meet a supply of 42 fat beasts, 81 calves, 447 fat sheep and lambs, 130 fat store pigs, and 130 head of dairy and store cattle, which realised the following prices :—For fat beasts there was a good trade, and every lot sold, two-year-old Shorthorn steers making up to £18, eighteen-moths old ditto, £14 5s to £16 15s ; heifers, £17 11s ; cows, £11 to £17 ; Devon steers to £22 10s ; two year-old ditto, £18 5s ; two-year-old Polled steers, £15 15s to £18 15s Milch cows of good class were inquired for, and high prices were realised for them, heifers and calves making from £10 5s to £21 15s ; cows and calves, £14 to £21 15s ; secondary sorts a dull trade. Store cattle sold well, most of the lots on offer changing hands at satisfactory prices. Fat calves met a brisk trade at late rates, the best realising from 60s to £5 12s 6d ; smaller do., 20s to 57s 6d ; Fat pigs a dull trade, it being difficult to dispose of the few taken on offer realising from 28s to 42s 6d. Store pigs were cleared with a fair demand, making up to 25s ; fat sheep and fat lambs met a good inquiry at late rates, the exception being a few pens of wethers which were held beyond the buyers' idea of value ; eighteen months old down wethers and ewes made from 54s to 61s 6d ; smaller, 46s to 52s ; Down ewes, 44s to 52s 6d ; old and inferior, 35s to 40s ; Shropshire ewes to 47s ; six months old Down lambs, 44s to 52s ; smallar, 36s to 42s ; three months' old sucking lambs, 34s to 40s ; cross-bred ditto to 35s 6d. Prime Devon beasts, 7d to 7½d ; Shorthorns, 6½d to 7d ; bulls, cows, and inferior, 5½d to 6d ; best sheep, 9d to 9½d ; second class, 8d to 8½d ; old ewes, rams, and inferior, 6½d to 7½d ; fat sucking lambs, 10d to 12d ; fat calves, 7d to 8½d per lb ; fat porkers, 8s to 9s per score.

Berwick, Saturday.—There was a substantial falling off in the numbers of cattle. Calves, £5 5s to £6 ; heifers, £7 15s to £10 ; stirks, £7 10s to £10 15s ; two-year-olds, £11 15s to £13 ; three-year-olds, £13 to £14 15s ; Shorthorn bulls, £11 10s.

Birmingham, Thursday.—Fair supply ; fair trade. Quotations : Beef, 5d to 6¾d per lb ; mutton, 6½d to 8½d per lb ; lamb, 9½d to 10d per lb ; veal, 7d to 8d per lb ; bacon pigs, 10s per score ; cutting pigs, 10s per score ; sows, 7s 8d per score.

Bristol, Thursday.—To day beef was plentiful, but demand rather less than usual, and business dull at slightly less prices for best qualities, 60s to 62s per cwt values of secondary sorts, remaining at 58s. Mutton and lamb were in moderate supply, but trade quiet. Quotations were unchanged, except for lamb, which sold at 9½d to 10d. Pigs were more numerous than of late, and prices unaltered.

Calne, Friday.—Present prices of pigs :—In lots of not less than ten, on rail within 100 miles, 1s. per pig extra for delivery by road. Prime stores, 6 sc. 10 lb to 8 sc. 10 lbs, 9s 6d per score ; 8 sc. 11 lb to 9 sc , 9s 6d per score ; 9 sc. 1 lb to 9 sc. 10 lb, 9s 3d ; 9 sc. 11 lb to 10 sc. 10 lb, 8s 9d. Pigs outside these limits at their value.—C. and T. Harris and Co., Ltd.

Canterbury, Saturday.—A fair offering of horned stock, some of which did not sell. Yearlings changed hands at from £6 to £9 ; two-year-olds up to £13 ; cows and calves, £14 to £18 5s. Only a few sheep were offered, wether tegs were quoted from 38s 6d to 45s 6d ; some old ewes made from 30s to 38s, and a lot of two-year-old wethers made 38s 6d.

Carlisle, Saturday.—Buyers were numerous, and a good demand was experienced. Small heifers £11 10s to £15 10s ; summering heifers, £11 10s to £15 10s ; heifers to £17 10s each.

Chester, Thursday.—Supplies exceeded the demand, and prices asked were too high to encourage a large business. Best lots sold readily, and the market was a dragging one, and many lots were left unsold at the close. Milch cows, £17 to £22 ; calvers, £15 to £20 ; barrens, £10 to £14 ; heifers, £9 to £15 ; stirks,, £5 to £9 each

Doncaster, Saturday. — Average supply of cattle and a moderate attendance, though trade was not brisk. Milch beasts, £18 to £22 ; bullocks, £12 to £17 ; heifers and drapes, £11 to £15 ; stirks, £9 to £11 ; young stores, £6 to £9 each. Fair supply of sheep, and trade slow. Prices from 44s to 50s each.

Dublin, Thursday.—Choicely finished cattle in brisk demand at last week's prices, other sorts, though not quotably lower, were difficult to place. Sheep of all grades met a fair trade and an early clearance effected. The unfavourable weather and large increase in lambs helped buyers to secure their lambs on better terms. Cattle—Live weight (best), 34s to 36s per cwt. Choice Angus crosses up to 38s per cwts. Secondary sorts, 30s to 33s 6d per cwt. Mutton, dead weight, 6¾d to 8¾d per lb. Lambs, 25s to 44s each.—Ganly, Sons nd Co.

Edinburgh, Wednesday.—Owing to the season of the year sheep were in small numbers, very few sold ; cross hoggs, 31s to 33s 6d. Cows, stiff trade, Shorthorns, £28 to £26 15s ; cross, £18 to £25 ; Ayrshires, £13 10s to £20 5s. Cattle, fair trade, bullocks to £14 ; stirks to £12 ; bulls to £8 10s

Glasgow, Wednesday.—Average numbers of cattle marketed, and demand, although brisk, was a shade quieter ; prime handy sorts commanded most attention, and made good prices : —Top, 65s to 67s ; secondary, 62s to 63s per cwt. Good show of sheep and lambs, and demand ruled a shade slower ; ewes exposed in large numbers, consequently made less money. Best mutton, 10d to 10½d ; secondary, 9½d to 9¾d per lb ; lambs, 10d to 1s per lb.

Hereford, Wednesday.—Store cattle went off slowly, but beef, a large supply, met with a firm brisk trade. Best quality bullocks and heifers realised 6d to 6¾d per lb., fat cows 5d to 5½d. Not so much demand for store calves, and veal was cheaper, ranging from 7d to 8d. Sheep sold somewhat lower, wethers at 8d to 8¾d, fat ewes 6d to 6½d. Fat lambs a firm trade, the choicest making nearly 10d, the average ranging from 8d to 9½d. Pork was selling Dell at 5½d to 6d. No bacons.

Leicester, Saturday.—Full consignments of home-bred stock. Buyers were well represented, but trade ruled sluggish, and many lots were left unsold. Choice milch cows, £18 to £19 ; good lots, £16 to £17 ; secondary, £14 to £15 ; Shorthorn cattle, £11 to £16 10s ; choice Irish cattle, £17 to £18 5s ; good medium lots, £12 10s to £14 10s ; Welsh cattle, £10 to £15 ; young stock, £5 to £8 each.

Lincoln, Friday.—A holiday market. Horned stock were in limited supply. Young beasts, £8 to £9 ; strong ditto, £10 to £12 ; milch cows, £17 to £21 each.

Manchester, Friday.—Beef : First class, 6½d ; second class, 5½d to 5¾d ; third class, 4½d to 4¾d. Mutton : First class Cheviots, Scotch, 9d ; others, 8½d ; second class, 7½d to 8½ ; third class, 6½d to 7d. Veal : First class, 7d ; second class, 6d to 6½d ; third class, 5d to 5½d. Lamb : First class, 9½d ; second class, 8½d to 9d per lb.

Newcastle, Tuesday.—Trade for cattle was firmer all round, and prices were in favour of sellers by 3d to 6d per stone. Quotations :—Good medium weight cattle, 8s 9d to 9s ; strong heavy heifers, 8s 6d to 8s 9d ; strong heavy steers, 8s 6d to 8s 9d ; second-class heifers and steers, 8s to 8s 3d ; coarse and inferior, 6s 9d to 7s per stone, sinking the offal. The sheep trade was firmer, with prices ½d higher, except for rams, which were down ½d. Lambs were also quieter, and 1d down. Quotations :—Choice young sheep, 9½d to 9¾d ; strong heavy, 8¾d to 9¼d ; ewes, 6d to 6½d ; rams, 5d to 5½d ; lambs, 10d to 11d per lb. Trade for calves was quieter, with ½d drop ; veal, 5d to 7½d per lb.

Newport, Wednesday. — A large supply of calves, sheep, and lambs. A good attendance of buyers, and there was a keen demand all round. Best beef, 6¾d to 7d per lb ; seconds, 6½d to 6¾d ; cows, 4¾d to 5¾d ; best wether mutton, 8¾d to 8¾d ; ewes, 6½d to 7d ; lamb, 9½d to 10d ; calves, 7d to 11d ; porker pigs, 10s 6d to 11s per score.

Norwich, Saturday.—Prices for best fat cattle remained unchanged at 8s, but other qualities were 3d per stone dearer. Veal calves, mostly of second quality, fetched 8s 6d per stone. The quality of sheep was fairly good, best mutton making 9d, and other qualities 7d to 8¾d per lb. There was a good show of fat pigs, but trade was slower, porkers making only 6s 3d, baconers 6s, and sows 5s per stone. Store cattle met a slow trade, being mostly small cattle of rather poor quality, three-year-olds made £15 to £16 10s, others £10 10s to £13, and yearlings £6 10s to £9 10s per head. Rearing calves were poor, and trade was slower at 20s to 40s per head. Store ewes were not very good quality, but some good lambs were shown, and trade for these was rather slow and dear. Shearlings made from 55s to 60s, others from 30s to 53s, and lambs from 25s to 39s per head. Trade for store pigs remained unchanged at 12s to 28s per head.

Nottingham, Saturday.—Shorter supply of stock, and trade was slow. Best in-calf cows made £17 10s to £21 ; heifers, £13 to £17 10s ; strong heifers and steers, about £15 10s each. Younger stock sold at about 5 guineas each, and calves, of which there was a small show, realised 55s each.

Preston, Wednesday.—Prices were well maintained, and supplies were good. Scotch heifers, 7¾d; Irish (grass), 7d; young cows, 6½d; young bulls, 6½d; secondary bulls and cows, 5½d to 5d. Hoggs, 9½to 9¾d; choice ewes, 8½d; heavy ewes and tups, 6¾d to 7½d; prime lambs, 10½d; secondary ditto, 10d; calves, 7½d per lb.

Retford, Saturday.—Fair inquiry for milch beasts of first class quality, which were scarce, and worth up to £20; secondary, £16 to £18; steers and heifers, £10 to £12; yearlings, £6 to £8; and calves, 35s to 45s per head.

Romford, Wednesday.—Fair supply of fat beasts; trade slow. Best animals, 4s 4d to 4s 8d; middlings, 4s to 4s 2d per stone. Calves in short supply; trade about the same at 5s 4d to 5s 6d per stone. Sheep in average supply; trade rather slow. Best small sheep, 5s 10d to 6s 4d; large, 5s 4d to 5s 8d per stone. Ewes in fair supply; trade slow, at 4s to 4s 4d per stone. Lambs in fair supply; trade slow at 6s 6d to 7s 2d per stone. No store beasts on offer. Slow trade for small milch cows. Good supply. Small supply of pigs; trade slow; small porkers, 3s 8d to 4s; large hogs, 2s 8d to 3s per stone.

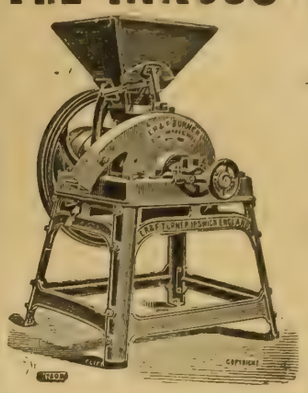
Sheffield, Tuesday.—A meagre supply of cattle, and a moderate business, the best milch beasts making up to £21; young stock £14 to £15 10s.

Shrewsbury, Tuesday.—Small supply of store cattle, and usual quantity of fat stock. Store cattle and store pigs slow trade; otherwise trade good. Quotations:—Beef, 6½d to 7d per lb; mutton (wether), 9d per lb; ewes, 7d to 7½d per lb; lamb, 10d per lb; veal, 7½d to 8d per lb; porket pigs, 10s per score; bacons, 9s to 9s 6d per score.

Stockton, Wednesday.—Bbest cattle were a small supply, and trade was slow and firm at 8s 6d to 9s per stone, whilst secondary sorts sold at 6s 6d to 7s 6d per stone. Lambs made 10½d to 11d per lb; young sheep, 9½d; ewes, 6½d to 7d; tups, 6d to 6½d. The pig trade was quiet and steady, small porkers making 7s to 7s 6d per stone; mediums, 6s 6d to 7s; sows, 5s 9d to 6s.

Truro, Wednesday.—Attendance very good, business fairly brisk. Fat bullocks, 56s to 60s per cwt; barreners and store bullocks, 40s to 45s; cows and calves, £10 to £14 each; rearing calves, 20s to 37s 6d; wethers, 7½d to 8d per lb; ewes, 5½d to 6d; lambs, 8d to 9d; pigs, 10s to 40s each; beef, 6d to 8d per lb; mutton, 6d to 8½d; amb, 9d to 10d; veal, 6d to 8d; pork, 6d to 8½d; pork carcases, 5d to 5½d.

Wolverhampton, Wednesday.—Fair supply and trade. Beef 5½d to 7½ per lb; mutton, 6½d to 9d per lb; lamb, 9d to 9½d per lb; veal, 6½d to 8d per lb.



Worksop, Wednesday.—Small supply of stock. Beef met an active trade; best qualities to 8s 3d; secondary, 7s 3d to 7s 9d per stone; best Southdown wethers and cross-breds, to 9½d; ewes, 6½d to 7½d; veal, 8½d; lamb, 9½d to 10½d per lb.

LIEUT.
JAMES'S HORSE BLISTER,

Manufactured by R. J. JAMES, Grandson of the inventor, and made by him for Lieut. JAMES in his lifetime

After 50 Years' general use by the Public in Veterinary Practice, this Blister is proved to be efficient in the following cases:—

Inflamed Lungs, Bronchitis, Strangles, Roaring, Sore Throat, Coughs, Inflamed and Contracted Feet, Splint, Incipient Spavin, Ringbones, Cu b, Poll Evil, Thorough-Pins, Wind Galls, and in the Bursal Enlargment of Joints, &c; and in all cases where Blistering is usually applied is well known, and its celebrity has extended to all the leading Studs throughout the world. It also has marvellous effects on Cattle and Dogs.

USED IN HIS MAJESTY'S CAVALRY REGIMENTS

UNSOLICITED TESTIMONIAL:—

From M. Fitzgerald, late Captain, 16th Lancers, Royal Military Riding School, 9, Gloucester Crescent, Hyde Park, W.—To R. J. James, Retford, Notts.

"Having had 25 years' experience amongst Horses, I have never found any Blister so effective, and yet so harmless to the hair, as Lieut. James's Blister."

Sold in 1oz. Pots, 1s. 6d. each; 2oz. Pots, 2s. 9d.; 4oz. Pots, 5s.; half pound Pots, 9s.; and 1 pound Pots, 16s. By all Medicine Vendors.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The promise of the growing wheat in England has not increased since July came in, but except in a few southern counties there is still time for a recovery. Kerning is a process which three successive weeks of sun and dry air will satisfactorily accomplish, and there is no reason as yet to despair of the cereal crops in this country. But with respect to France the situation is much more grave. The weather from the 1st to 5th inst. inclusive was marked by quite an exceptional depression of temperature, and with the wheat about a fortnight more advanced than it is in England, the nights with 46 deg. not exceeded, and the days which only reached 60 deg. of temperature, must have been most prejudicial. The German reports are much worse from a fortnight ago and then they were bad. The temperature in Berlin has been lower than in either London or Paris and there is little reason for supposing that rural Germany has had more genial weather than the capital. The Russian reports are of very poor promise in the chief wheat-producing regions.

The wheat gradient this week is as follows:—

Canterbury	35s. 8d.	per qr.
Doncaster	30s. 3d.	,,
Range	5s. 5d.	per qr.

We do not think Canterbury prices very trustworthy. London averaged 32s. 1d. per qr.

The barley gradient is as follows:—

Reading	26s. 0d.	per qr.
Cambridge	24s. 6d.	,,
Range	1s. 6d.	,,

This moderate gradient is much more in accord with recognised facts of current trade.

The gradient for oats is thus returned:—

Doncaster	21s. 10d.	per qr.
Chelmsford	19s. 3d.	,,
Range	2s. 7d.	,,

The price at Chelmsford is remarkably low for English oats at this juncture.

The sales of British wheat at the statute markets since September 1 have been below those of the preceding season. Prices have not been satisfactory, though since May they have been mending:—

This season ... 2,555,000 qr, at 26s. 11d. per qr.
Last ,, ... 2,855,000 qr., at 28s. 10d. ,,

The sales of British barley have been liberal, and the price, though moderate, an improvement on last season:—

This season ... 3,364,000 qr., at 24s. 3d. per qr.
Last ,, ... 3,193,000 qr., at 23s. 11d. ,,

The sales of British oats have been so large that the growers have had to accept a little less money

This season ... 1,155,000 qr. at 18s. 0d. per qr.
Last ,, ... 902,000 qr. at 18s. 4d. ,,

Imports last week were as follows:—
Wheat, 528,000 qr.: a large supply.
Flour, 118,000 sks.: a moderate supply.
Barley, 10,000 extremely small arrival.
Oats, 108,000 qr.: moderate imports.
Maize, 302,000 qr.: a full average supply.

With the publication on the evening of the 5th inst. of the always belated London granary returns we are able to take stock of the wheat holdings in the chief ports of the country at the mid-year. Stock returns from the various ports on July 1 compare as follows for the past three years:—

	July 1, 1907. Qr.	July 1, 1906. Qr.	July 1, 1905. Qr.
London	105,000	64,590	116,429
Liverpool	750,413	447,200	407,637
Manchester	133,616	85,708	56,770
Hull	104,984	204,434	194,299
Gloucester	149,631	98,070	131,067
Bristol	143,782	104,955	145,662
Tyne	75,993	106,571	73,845
Glasgow	4,667	10,849	34,992
Leith	120,000	131,448	130,700
Dublin	72,800	69,607	73,023
Belfast	4,600	23,300	18,500
Londonderry	4,000	4,700	5,500
Fleetwood	29,624	49,546	18,030
Limerick	90,000	75,000	40,000
Total	1,789,140	1,475,978	1,446,184

London returns of other staples than wheat thus compare with a year ago:—

	July 1, 1907.	July 1, 1906.
Flour sacks	134,000	310,000
Barley, qrs.	25,000	62,000
Oats ,,	284,000	358,000
Maize ,,	38,000	48,000
Linseed ,,	14,000	14,000
Beans ,,	6,000	6,780
Peas ,,	4,710	6,300

There are now on passage to the United Kingdom 2,808,000 qr. of wheat, a total of 308,000 qr. above the average, yet seeming very moderate when compared with the colossal quantities on passage in May. Details are as follows:—

Californian	240,000 qr.
American	265,000 ,,
Russian	239,000 ,,
Indian	429,000 ,,
Argentine	710,000 ,,
Australasian	800,060 ,,
Various	30,000 ,,
Total	2,813,000 qr.

Of flour only 192,000 sacks are on passage, of barley only 192,000 qr., and of oats only 810,000 qr. All these are very small quantities for the season. Of maize, on the other hand, a good quantity is in prospect:—

American	300,000 qr.
Argentine	400,000 ,,
Russian	275,000 ,,
Total	975,000 qr.

London arrivals for the first half of 1907 have been as follows, the figures in thousands—thus the first item, "270," is 270,000:—

1907.	Wheat. qr.	Barley. qr.	Oats. qr.	Maize. qr.	Flour. Sacks.
Jan.	270	95	209	182	257
Feb.	170	30	131	149	305
March	273	55	138	233	215
April	549	39	225	74	208
May	219	76	282	211	284
June	474	14	140	177	237
Half Year 1907	1915	309	1125	1026	1506
Half Year 1900	1734	364	1665	988	1807

The increase in wheat arrivals (at the expense of flour) is good for London millers. The decreased arrivals of oats and barley largely outweigh the very slight increase in maize.

American shipments last week were much below expectation, and the formidable visible supply of wheat, 804,900 qr. against 229,000 qr. a year ago, is very slow in getting into motion. The new winter wheat is on sale at the markets of Baltimore and New Orleans, St. Louis, and Charleston, but holders of the old crop stocks profess absolute confidence in the situation. The actual exports from Amreica last week were 185,000 qr. of wheat, 9,000 qr. of barley, 60,000 qr. of oats, 168,000 qr. of maize, and 180,000 sacks of flour.

Argentina sent off 120,000 qr. of wheat, 221,000 qr. of maize, 40,000 qr. of linseed, and 6,000 qr. of oats. Though these are not small totals, they seem modest compared with La Plata's exports in June.

Russia shipped 143,000 qr. of wheat, 36,000 qr. of barley, 40,000 qr. of oats, and 140,000 qr. of maize, while Roumania, Bulgaria, and European Turkey sent off 96,000 qr. of wheat, 16,000 qr. of barley, and 450,000 qr. of maize. India shipped 127,000 qr. of wheat and 69,000 qr. of linseed, Australasia 57,000 qr. of wheat

LONDON HAY TRADE.

Saturday.—At last we have to report a great falling off in supplies, and trade in consequence is evincing a slightly better feeling; especially is this noticeable in prime qualities of all kinds, which are a good 2s. 6d. per ton dearer, middling and inferior sorts, however, still remain in poor demand at about previous quotations. It has been so far, with the stormy and unsettled weather, a most disastrous season for haymaking, and but little has been made in anything like a good condition, holders, therefore of stocks of good old stuff are very much firmer and are not disposed to sell unless at an advance on previous prices. What the after effect of a large crop of badly got hay will have is as yet unfathomable, but the large bulk, however it may be made, must tend to keep prices on a low level.

New stuff is not coming along very fast, values of fairly got lucernes and hay being about 55s per ton, but we hear of one or two lots of clover apparently secured in good condition, for which the very fair price of about 80s to 85s per ton has been realised. Straw is coming in much smaller quantities, and is in consequence finding a better trade at slightly higher values. In the foreign market the demand shows no improvement; shipments have not been over large, but importers find great difficulty in effecting sales, even at the present low prices.

Prices ruling are about as follow:—English best meadow hay, 80s to 82s 6d per ton; good meadow hay, 70s to 77s 6d per ton; plain hays, 62s 6d to 67s 6d per ton; best clovers, 92s 6d to 95s per ton; good clovers, 82s 6d to 90s per ton; inferior clovers, 72s 6d to 80s per ton; best mixtures, 92s 6d to 95s per ton; good mixtures, 80s to 87s 6d per ton; plain mixtures, 72s 6d to 77s 6d per ton; seconds hays, clovers, and mixtures, 55s to 62s 6d per ton; wheat straw, 24s to 26s per load; oat straw, 26s per load; barley straw, 26s per load, all ex rail London. Foreign: Canadian mixture, none; first quality Dutch hay, 60s to 65s per ton; second quality Dutch hay, 57s 6d per ton; French and Dutch clovers, 80s to 82s 6d per ton. These prices are by barge delivered alongside a London Thames wharf.

THE BALTIC.

Wheat cargoes are held for an advance, but buyers are disinclined to accept the situation. Prices actually paid have included 36s. 3d. per 480 lb. for South Australian, 36s. 3d. per 480 lb. for Victorian, 35s. 6d. per 480 lb. for Argentine, 33s. per 492 lb. for Azof, 34s. per 492 lb. for Odessa Ghurka, and 36s. 3d. for per 480 lb. for No. 1 Northern Manitoba.

Maize cargoes are steady. Sales have included Odessa at 23s. 9d., Galatz at 23s. 3d., Argentine at 23s. 6d., and American at 23s., all per 480 lb.

Barley cargoes are cheaper for futures; 20s. 6d. per 400 lb. accepted for October shipment of Russian and 28s. 6d. per 448 lb. for September shipment of Californian. Other cargo sales include Smyrna beans at 33s per 480 lb., and for Ferozepore rapeseed at 53s. 9d per 416 lb..

East Indian Wheat.—Prices for cargoes arriving under the London Corn Trade Association are as follows (new and old terms), viz.:—Choice white Kurrachee 34s. 9d new terms, 34s old terms; soft red Kurrachee 34s. 3d new terms, 33s. 6d. old terms. The committee has decided to quote rejection prices for "old terms" up to and including July shipments, but not later.

The arrivals of grain and seed-laden vessels at ports of call from June 30 to July 7 have been nine, as will be seen by the following table:—

Cargo.	Total.	Arg. Republic.	Australia.	Total Last Week.	Total since January 1, 1907.	Total same time, 1906.
Wheat	7	2	5	8	150	162
Maize	—	—	—	1	5	3
Barley	—	—	—	—	4	3
Linseed	2	2	—	2	9	19
Valonea	—	—	—	—	1	3
Sundries	—	—	—	—	—	2
Total	9	4	5	11	169	192

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English firmly held at 6d advance. Whites quoted at 35s to 36s 6d; reds at 34s 6d to 36s. Foreign firm, and American held for 1s advance; other sorts 6d to 1s. No. 1 Northern Manitoba, ex ship, held at 37s 6d; No. 2 at 36s 6d; No. 1 hard Manitobas at 37s; choice white Karachi at 34s; Australians landed, at 36s 6d; South Russians at 33s to 37s; La Plata, 35s to 36s. Flour firm, but quiet. Hungarian held at 35s to 36s; Minnesota patents at 27s 6d to 28s 6d; Iron Dukes at 22s 6d to 22s 9d. Maize firmly held at full prices. Mixed American, landed, held at 24s 6d; Odessa, landed, at 24s. Barley steady, quiet. Azoff-Black Sea, landed, quoted at 25s; Persian, ex ship, at 22s 9d, landed at 23s 3d to 23s 6d. Oats steady, inactive. La Plata held at 18s 3d to 18s 6d; South Russian, 38 lb, at 18s 3d to 18s 9d.

Mark Lane, Friday.—Wheat: English held for 6d advance; whites quoted at 35s to 36s 6d; reds at 34s 6d to 36s. Foreign firmly held, with a fair business passing at 6d advance. No. 1 Northern Manitoba held at 38s; No. 2 at 37s; No. 1 hard Manitoba at 39s; choice white Karachi at 33s 9d to 34s; Australian, landed, at 36s 6d; South Russian at 33s to 37s; La Platas at 36s to 37s. Flour firm, and held for 6d advance, but quiet; Minnesota Patents quoted at 27s 6d to 28s 6d; Iron Dukes at 22s 9d to 23s. Maize firm, quiet; mixed American, ex quay, quoted at 24s 6d to 24s 9d; Odessa at 24s. Barley steady, quiet; Azoff-Black Sea, landed, quoted at 25s; Persian, ex ship, at 22s 9d; landed at 23s 3d. Oats steady, unchanged; La Platas and South Russians (38 lb), held at 18s 3d to 18s 6d, as per sample.

COUNTRY.

Ashford, Tuesday.—Trade was very quiet all round, farmers being busy haymaking, and moreover having mostly sold out. Wheats were, however, dearer, making 34s to 37s; barley, 27s to 29s; white oats, 22s to 25s; black oats, 21s to 23s; tick beans, 32s to 33s; Mazagan beans, 29s to 31s; maize, 25s to 27s; grey peas, 30s to 32s; foreign barley, 26s to 27s per qr.

Banbury, Thursday.—Wheat, white, 31s to 32s per qr; red 31s to 32s per qr; barley, 26s to 30s per qr; beans, 31s to 32s per qr; oats, 20s to 25s per qr; peas, 29s to 34s per qr.

Berwick, Saturday.—A moderate attendance, with little grain on offer. Prices nominally unchanged.

Birmingham, Thursday.—Fair attendance, and a good inquiry for wheat and feeding stuffs. Foreign wheats were about 1s dearer on the week; English unchanged. Grinding barley 6d higher, maize firm, and oats and beans unaltered. Quotations: Foreign wheats, No. 1 Manitobas 37s 9d per qr, Bristol; River Plate, 35s to 37s 6d per qr, Sharpness; English wheat, 12s 6d to 13s 6d per bag; grinding barley, 25s 6d per qr, Sharpness; Odessa maize, 24s; Bessarabian maize, 24s 6d per qr; Liverpool prime fat maize, 5s 3½d per cental, Manchester; English oats, 23s to 24s per qr; English beans, 13s per bag.

Brighton, Thursday.—Slow trade at last week's prices. Small attendance. Barley, 28s to 32s; grinding ditto, 26s to 27s; oats, English, 20s to 23s; peas, 31s to 32s; beans, 33s to 34s.

Bristol, Thursday.—English wheat very scarce on our market to-day, 6d to 1s advance being asked. Foreign wheat very firm at 9d to 1s more money on the week. Maize slightly in favour of buyers. Barley strong, values fully maintained. Oats unchanged. There is more disposition to buy flour, and new contracts are being entered into.—Grace Brothers.

Bury St. Edmunds, Wednesday.—Wheat: Farmers are holding on rigidly to what small stocks they have left, and are making full prices to millers, who find themselves out of stock. Useful reds made 33s to 33s 6d per qr on the line. Grinding barley very scarce and firm at 27s 6d to 28s 6d per qr. Oats in small supply and firm at 22s 6d to 24s per qr. Maize steady and unchanged: Odessa 25s to 25s 6d per qr. Other feeding corns firm.

Cambridge, Saturday.—There was a poor attendance, only a few wheats offering, which made up to 35s per 504 lb in the mill. Spring corn unchanged.

Canterbury, Saturday.—Not very much business doing, prices being high. Wheat supplies continue scarce, and the tendency is for a further advance. Some 64 lb wheat has changed hands at 36s 6d on rail, and an offer of 38s has been refused for an extra good sample; sales of 65 lb lots continue to be reported at 37s. English barley is still making from 27s to 29s; oats from 20s to 25s; grey peas are quoted from 31s to 33s; tick beans at 32s to 34s 6d dearer; Mazagans, 30 to 32s per qr.

Carlisle, Saturday.—Small supply of oats in our market to-day. Good demand at last week's prices, 24s per 336 lb.—Thomas Robinson.

Chester, Saturday.—Since last week there has been an improved demand due to the weather and to a falling short in the pastures in many places. English wheat scarce at late rates. Beans and barley quiet at fully maintained prices, and oats 1d to 2d dearer. Quotations: Wheat, 4s 10d to 5s per 75 lb; grinding barley, 3s 9d to 4s per 64 lb; beans, new, 5s 6d to 5s 9d; old 6s to 6s 6d per 80 lb; oats, new, 2s 11d to 3s 2d; old, 3s 2d to 3s 6d per 46 lb; Indian corn, new, 13s to 13s 3d; old, 13s 6d to 13s 9d per 240 lb; round corn, old, 13s 6d to 14s per 240 lb.

Chichester, Wednesday.—Good attendance, but little trade in grain, farmers being inclined to hold. A brisk business was done in feeding stuffs. New white wheat 32s to 33s 6d; new red ditto, 32s to 33s 6d; grinding barley, 25s 9d to 26s 6d; oats, English, 19s to 23s; beans, 32s to 33s; maize, 23s 6d to 25s 6d, flour, 24s to 28s.

Colchester, Saturday.—Wheat firm. Small supply of oats. Beans, no samples showing.—Colin Taylor, King and Co., Ltd.

Coventry, Friday.—Only a poor attendance. Scanty supply of wheat, and sellers were enabled to obtain about 6d per qr more money. There was scarcely any barley on offer at all. Beans and oats were in limited supply, and made quite extreme values. Wheat, 11s 9d to 12s 6d per 186 lb; barley, 28s to 34s per 448 lb; peas, 12s to 14s; new beans, 12s 3d to 13s 6d per 196 lb; oats, 24s to 26s 6d per 352 lb.

Exeter, Friday.—Fairly good attendance; trade not very brisk. English and foreign wheat remained dearer. English wheat, 4s to 4s 1½d; superfine flour, 25s to 27s; fine, 23s to 25s.

Gloucester, Saturday.—English wheat 1d per bushel dearer; reds, 4s 2d; whites, 4s 3d. Fair inquiry for foreign wheat at about 1s per qr advance. Plate maize 3d cheaper, at 25s; flat unchanged at 24s 3d; new Bessarabian unchanged at 25s. Barley unchanged at 26s per qr. Oats unchanged.

Derby, Friday.—Wheat continued in very limited supply, and prices were fully as high as last week. No alteration in the quotations for spring corn. Quotations: Wheat, new white, 36s to 37s; new red, 34s to 35s; barley, grinding, 23s to 24s; beans, old, 36s to 37s; new, 34s to 36s; oats, 24s to 25s.

Devizes, Thursday.—The trade for wheat during the past week has been very firm, and prices show a rise of 6d per sack. Best wheat, 16s to 18s; secondary, 15s to 16s; malting barley, 24s to 30s; feeding, 22s to 24s; old oats, 20s to 24s; beans, 16s 6d to 18s; fine flour, 26s to 28s; extra fine, 30s to 34s.

Doncaster, Saturday.—Attendance very small. English wheat is nearly exhausted, very little being shown. Trade almost nil, and prices advanced 3d per load. Foreign was dearer all round. Indians 9d per qr higher, and Plate wheat 1s more. Oats firm at late rates, and a slow demand. Beans advance 1s 6d per qr, but little doing, and other things quiet and unchanged.

Dorchester, Saturday.—In consequence of the clashing of the sheep and wool fairs to-day there was a greatly restricted attendance at the Corn Exchange, and of the few who did look in they made but a brief stay, all being anxious to get away as quickly as possible so as to avail themselves of a fine day to get on with their hay, much of which in this part of the country has been badly damaged from the long exposure in the rain, a good deal of the crop being completely spoilt. Business to-day, owing to the unfavourable outlook for the corn crops, was very firm, especially for wheat, which was held for a still further advance of 6d per qr on home-grown and 1s on foreign. Oats were likewise held for extreme values, whilst grinding barley and also maize were worth from 3d to 6d more. All feeding stuffs were held at prices adverse to buyers. Flour steady and inactive.

Dublin, Friday.—Foreign wheat strong, and advancing; spot 6d to 9d dearer; good demand. Maize a fair inquiry, 3d to 6d rise. Irish wheat quiet. Oats firmly held; blacks 12s to 13s, whites 12s 6d to 13s 6d. Flour firm, with a higher tendency.

Edinburgh, Wednesday.—Wheat firm at 6d per qr dearer, average, 32s 3d. Barley unaltered, average, 27s 6d. Oats slow, average 25s 10d; 6d down. Flour prices raised 6d per sack.

Glasgow, Wednesday.—Wheat the turn dearer. Flour unchanged on the week. Maize steady at late rates. Corn firm, with sellers holding for 1½d per boll advance since last Wednesday. Oats firm. Barley unchanged. Beans steady. Peas, 1½d per boll dearer. Bran and thirds nominally unaltered. Oatmeal quietly steady.

Glasgow, Friday.—Market quiet but steady, and prices nominally unaltered since Wednesday.

Grantham, Saturday.—Fair attendance. Supplies limited, and business quiet. Wheat quoted, 33s to 34s; oats, 22s to 23s; and beans, 32s per qr.

Hereford, Wednesday.—Very small attendance of farmers. English wheats moved off slowly at last week's prices. English oats dull but firm. Maize from 6d lower to 6d higher, according to quality. Nothing doing in beans. Wholesale quotations:—Wheat, 3s 10d to 4s per 62 lb; barley, 3s 3d to 3s 9d per 56 lb; oats, 2s 6d to 2s 10d per 40 lb; beans, 3s 9d to 3s 11d per 65½ lb; maize, 3s 3d to 3s 6d per 60 lb.

Ipswich, Tuesday.—Very little wheat on offer; trade firm, and prices rather dearer. Reds, 33s to 33s 6d per 504 lb. Oats rather easier. Maize quiet. Beans 6d per qr cheaper. Peas unaltered.

Leeds, Tuesday.—The continued cool damp weather has its influence on the trade, which steadily gains strength, and only the large imports keep prices in check to a certain extent. With a decreasing quantity on passage, and reduced shipments, wheat ruled exceedingly firm to-day at 6d per qr advance on the week. Maize quiet and unchanged. Beans steady. Oats rather dearer.—Dunns and Co.

Leeds, Friday.—With the upward tendency in prices of wheat during the last fortnight, millers have abandoned their waiting policy in expectation of lower rates, and are placing orders freely for both English and foreign, finest qualities being the turn over Tuesday's quotations. There was a good demand for flour, at 29s to 30s per sack. Maize was firm, Plate making 25s and Odessa 24s. Other articles unchanged.

Leicester, Saturday.—Good average attendance of buyers and dealers, with small supplies of home-grown wheats, which met a dragging sale at firm rates. Red wheats, 34s to 35s; white wheats, 35s to 36s per 36 stones; barley, 29s to 31s per 32 stones; beans firm at 31s to 34s per 38 stones; oats, 23s to 25s per 24 stones.

Lincoln, Friday.—Better attendance, and English wheat in improved demand at an advance of 1s per qr on the week. Foreign also 1s dearer. Oats firm and unchanged. Beans 3d dearer.

Maidstone, Thursday.—The very unsettled state of the weather seems to indicate the probability of a late harvest, so that stocks of wheat running low, holders obtained about 1s per qr advance from last week. Barley continues dear in comparison with the cost of it the last year or two, which necessarily makes a rise in the value of milling offals not agreeable to cattle feeders. Oats of English growth are at a high figure; foreign a slow sale except at a deduction which for the most part is resisted by dealers. Maize is firm, and buyers find it not easy to obtain at former rates. In all other grain a strong tone manifest.

Manchester, Thursday.—English wheat 1s per qr, and foreign 2d to 2½d per cental higher on the week. Flour firm to 6d per sack dearer. Indian corn 1d per cental higher. Beans and peas firm. Foreign barley 1d per bushel higher. Oats firm at full rates. Bran and thirds unchanged.

Newark, Wednesday.—Business was quiet; wheat firmer; other kinds about the same as last week. Quotations: Wheat, white and red, 33s to 34s; malting barley, 28s to 30s; grinding ditto, 26s to 27s; white oats, 22s to 23s; black ditto, 23s to 23s 6d; beans, 32s 6d to 34s per qr.

Newcastle-on-Tyne. Saturday.—Wheat holders were firm at an advance of 6d per 504 lb; buyers, however, held off. Maize firm at late rates, with a fair consumptive demand. Oats steady, and last week's prices fully maintained. Beans and peas remain steady; demand, however, not active.—Joseph Pollard and Co.

Newport, Wednesday.—Trade was quiet. Barley, flat and brown maize, and oats, were unchanged on the week. Flour 6d per sack dearer. No English wheat on offer.

Northampton, Saturday.—Attendance was much below the average; prices remained firm, and scarcely any wheat was on offer. Oats and beans were unchanged. Prices: Wheat, 33s; barley, 26s to 29s; white oats, 21s to 23s; black oats, 20s to 22s; beans, 30s to 32s; peas, 29s to 31s; flour, 28s to 30s.

Norwich, Saturday.—The supply was exceedingly small, and farmers were able to make an advance of 1s to 1s 6d per qr, values now being 33s delivered. Owing to haysel, no trade for feeding stuffs. Averages: Wheat, 867 qr, £1 10s 8½d; barley, 32 qr, £1 5s 0½d; oats, £1 0s 9½d.

Nottingham, Saturday.—Very few samples of English wheat offering, both it and foreign 1s higher. Grinding barley held for 6d advance. Oats and beans but few offering, and values supported.—Robt. Hubble.

Peterborough, Saturday.—The weather has been very showery all the week, and but little progress made with the hay crop. The little wheat at market to-day made from 6d to 1s more money. Oats and beans rather steadier. Wheat, 33s to 34s;

oats, 22s to 23s; beans, 31s to 33s.—Thos. Hill and Son.

Preston, Saturday.—Wheat prices have continued their upward tendency during the week, and prices have advanced 4d per cental. To-day's market was moderately attended, but nothing was brought forward by farmers. Quotations were rather better. Oats firm. Flour 6d per qr dearer. Quotations: Wheat, white, new, 13s 9d to 14s 6d per windle of 220 lb; ditto red, 13s 6d to 14s; oats, old, 3s to 3s 3d per bushel; beans, 16s to 16s 6d per windle of 220 lb.

Reading, Saturday.—The attendance was on the small side, and business was below the average. Wheat ranged from 33s to 36s per qr; barley, 26s to 28s; oats, 19s to 22s; beans, 34s to 37s; peas, 29s to 32s.

Retford, Saturday.—With about an average supply of wheat, and a fair attendance, trade was inactive at 32s to 35s per qr. Grain for feeding was scarce, but there was no life in the demand, and quotations showed no change.

Ripon, Thursday.—Small show of local samples, which made late rates. Business quiet. A moderate attendance of farmers. Prices:—Wheat, 30s to 32s; ditto foreign, 34s to 38s 6d; barley, grinding, 25s to 26s; oats, 23 to 25s; maize, round, 26s to 27s; ditto, flat, 25s to 26s per qr.

Sheffield, Tuesday.—With every prospect of a late harvest, both in America and this country, prices continue on the upward grade, and wheat gained a further 6d per qr on the week. Maize firm and unchanged from last week. Beans, peas, and oats maintain late rates. Quotations:—Wheat, white, new, 33s to 33s 6d; ditto red, new, 33s to 33s 6d per 504 lb; oats, black, 22s 6d to 23s; ditto white, 23s 6d to 24s per 336 lb; peas, grinding, 33s 6d to 34s; ditto blue, 75s to 90s per 504 lb; beans, English, new, 35s 3d to 35s 6d per 532 lb; barley, grinding, 26s to 26s 6d; ditto malting, 28s to 29s per 448 lb; Indian corn, small, 25s 9d to 26s; ditto Plate, 25s 9d to 26s; ditto flat, 25s to 28s per 480 lb.

Shrewsbury, Saturday.—Quotations:—New wheat, 14s 3d to 14s 6d per 225 lb; new oats, 14s to 15s per 225 lb; peas, 15s 6d to 16s per 225 lb; beans, 14s 6d to 15s per 240 lb.

Stamford, Friday.—The market was very thinly attended, and business was difficult to transact. Wheat advanced fully 1s per qr on the week, 33s 6d being the prevailing quotation, superior sample realising 34s per qr. Oats unchanged, at 21s 6d to 22s. Beans 31s 6d to 32s per qr. No inquiry for barley or peas.

Stockton, Wednesday.—Practically no English wheat showing. Foreign wheat better inquiry, and prices were quoted 6d and 9d dearer on the week. Oats steady. Maize unchanged on the week.

Sunderland, Saturday.—Little grain offering. Wheat sold at fully 1s per qr advance. Barley and oats rather firmer. Arrivals coastwise.—Wheat, 879 qr; foreign, nil. — E. and F. Richardson.

Tunbridge Wells, Friday. — Quotations; White wheat, 32s to 33s; red ditto, 31s to 32s: barley, 26s to 32s; grinding ditto, 23s to 25s; oats, English, 22s to 24s; rye, 24s to 25s; peas, 32s to 37s; beans, 32s to 37s; tares, 42s to 48s; maize, 22s 6d to 24s.

Warwick, Saturday.—Very few samples of grain offering, and buyers holding off. Prices unchanged.

Winchester, Saturday.—English and foreign wheat fully 6d dearer. Barley 6d, and maize occasionally 6d advance. Oats unaltered. Flour steady at late rates.—Fear, Colebrook and Co., Ltd.

Wisbech, Saturday.—A short supply of grain. Wheat advanced 6d per qr. Reds, 33s 6d per 504 lb. Oats very firm, 22s 6d to 23s per 336 lb. Beans, 32s to 34s per 532 lb.—James Fletcher.

Worksop, Wednesday. — Poor attendance. Small show of grain. White wheat, 33s to 34s; red wheat, 32s 6d to 33s 6d; barley, 27s to 29s; white oats, 23s 6d to 24s; black oats, 21s 6d to 23s; maize, 26s to 27s 6d; beans, 34s to 36s per qr.

Yeovil, Friday.—Home-grown wheat in small supply, and sold at 1s advance on last week. Foreign wheat made from 9d to 1s 3d more money, and grinding barley from 3d to 6d. Best English wheat, 32s 6d to 35s; secondary, 29s 6d to 31s 6d; foreign, 35s to 37s 9d; malting barley, 25s to 30s; feeding (English), 22s to 24s 6d; grinding (foreign), 26s to 26s 3d; English white oats, 22s 6d to 23s 6d; black, 21s 3d to 22s; winter beans, 31s 6d to 32s 6d; spring, 30s 6d to 31s 6d; rye, 25s 6d to 26s 6d; vetches, 7s 6d to 8s 6d per bushel. Fine flour sells at 26s 6d per sack, and other grades in proportion.

York, Saturday. — Wheat was very scarce, and made an advance of 1s on the week. Fine white 32s 6d to 33s 6d, red and mixed 32s to 32s per qr of 36 stones; feeding barley, 26s to 28s per qr of 32 stones. Oats firm, White Tartary, 20s to 21s, ditto black, 21s to 22s 6d, white Garton, 22s to 24s per qr; beans, 32s per qr of 36 stones.

FOREIGN.

Hamburg, Saturday. — The unseasonable weather is causing anxiety for the growing crops; anyhow, harvest will be a late one. Market quiet. In view of lower prices for autumn deliveries, holders of rye, feeding barley, and oats get nervous, and buyers act with caution; prices tend in buyers' favour, while wheat remains firm in value, prices being considered comparatively low. 79 to 80 kg River Plate is selling at 32s 6d to 33s per 480 lb; Walla Walla is held at 34s 6d per 500 lb, ex ship here. 60 lb new Saale wheat, September-October delivery is quoted at 34s to 34s 6d per 504 lb., f.o.b. Rye less inquired after, 9 10/15 South Russian, afloat is offering at 31s 6d to 31s 9d; fine Taganrog, on the spot, at 32s 3d; Danubian, afloat, at 31s per 480 lb c.i.f. Hamburg; 9 10/15 South Russian, September-October shipment, 28s 3d to 28s 6d, c.i.f. The growing crop of barley looks promising in the Saale district, and only sunshine is now required to bring it to perfection. The same is reported from Bohemia and Moravia, where more land than in previous years was sown with barley. Feeding barley less inquired after; spot parcels, from scarcity, firm. 60 61 kg. South Russian afloat is offering at 24s 9d to 25s; July, 22s 6d; August, 19s; and September-October, 19s 6d per 400 lb, c.i.f. Hamburg. Danubian maize, afloat, is held at 22s 3d; Odessa, 22s 9d; American mixed, kiln-dried, 25s; River Plate, 23s 6d per 480 lb, c.i.f.—John Tatlock.

CORN STATISTICS

Weekly London Averages.

An account of the Quantities and Prices of British Corn bought on the London Market and in the area within five miles from the Royal Exchange during the week ending Tuesday, July 2, 1907:—

POTATOES.

Borough, Saturday.—There was a fair inquiry for the good quantity to hand. Quotations: New: English, 6s to 7s; Cherbourg 6s to 6s 6d; St. Malo, 7s; Jersey, 7s per cwt.

Carlisle, Saturday.—Fair supply and a good demand. Old potatoes, 10d; new ditto, 1s 4d to 1s 6d per stone.

Doncaster, Saturday.—Good supply and a brisk trade. Prices slightly easier, and 8s per cwt; 10 lb to 12 lb for 1s. No old potatoes

Goole, Wednesday. — Small attendance and practically no business was transacted. No new potatoes were shown.

Lancaster, Saturday.—Fair supply of new potatoes, and a ready retail trade at 1d to 2d per lb.

Manchester, Saturday. — Potatoes: Yorkshire, 18s; Cheshire, new, 12s to 14s; Lincoln, new, 16s to 18s per load; Irish, 7s to 7s 6d; Jersey, 7s 6d to 8s per cwt.

Preston, Saturday.—New potatoes came forward for sale with much more freedom, and though at the opening farmers obtained £1 per load of 240 lb, prices came down rapidly afterwards, and 14s to 16s 6d was the average. The continued closing of the "chip" potato shops was in a measure responsible for this.

Spitalfields, Saturday.—Supply submitted was accorded moderate support. English, 6s to 6s 6d; St. Malo, 7s to 7s 6d; Jersey, 7s 6d; Cherbourg, 6s 6d per cwt.

Stockton, Wednesday.—Old potatoes, £6 per ton; Jerseys, 8s 6d; midds, 6s. per cwt.

Worksop, Wednesday.—New potatoes, 8s to 8s 9d per cwt.

York, Saturday.—No old potatoes on offer. New sorts met with a steady trade at 6s 6d to 7s per qr of 6 stones.

HOPS.

Worcester, Saturday.—The wet cool weather has not had a good effect on the hop plant, and in some places an increase of blight is reported. This had the effect of stiffening the pretensions of growers. There is rather more inquiry, but so far buyers do not care to give over late rates. Yearlings are also more in request.—Charles Faram and Co.

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, Monday, 3 p.m.

The crop prospects have deteriorated since the close of June, and holders of old grain are inclined to stand out for advanced prices. The rise in English wheat is 6d. to 1s., and for nearly all foreign sorts a full 1s. advance is required. The enormous imports of the last fortnight of June have been quietly absorbed. Rye is again 1s. dearer in this country as there is quite a rye famine on the continent.

Maize, barley, and oats are obtainable for the prices of Friday last, but there is not the least pressure on sale at these prices. Beans, peas, and tares rather favour sellers, but oilseeds, under the pressure of very heavy importations, are obtainable at some reduction. Of this we give a separate and detailed report elsewhere.

BRITISH GRAIN (*Off the Stands*).

July 8.

CLOSE OF THE MARKET.

THE MARKET CLOSED DECIDEDLY FIRMER FOR ALL CEREALS; THE SEASON DOES NOT "PICK UP," AND APPREHENSIONS AS TO THE HARVEST ARE BECOMING REALLY SERIOUS.

THE FLOUR TRADE.

MARK LANE, Monday, 3 p.m.

The finest flour, whether London or Hungarian, is still obtainable at June's closing prices, but Town Whites and Town Households are held at some advance; which between those who ask 1s and those willing to sell at 6d more money we may arrange at 9d improvement on the week. Whole meal is firm, and with a good sale for the time of year; but the price is not raised.

Country flour is held for 1s. more money both for patents and for ordinary roller whites Nearly all the usual sales of foreign flour are held for 1s. more money than formerly. There is a firm trade for middlings, pollard, barley meal, and rice meal, while rye meal is 1s. per cwt. dearer from a fortnight ago. The market for oatmeal is quiet, but the consumption is rather larger than usual at a midsummer period.

THE BALTIC.

Monday, 1 p.m.

State of Trade.

Wheat cargoes are held for 6d. advance from Saturday, but buyers resist the rise. Maize is firmly held, but not quotably dearer. Cargoes of barley and cottonseed for autumn shipment are cheaper to buy. Oats are an uneven trade: anything near at hand commands a good price, rather dearer in fact from Saturday, but remoter futures are 3d. down.

Business Done.

Wheat.—Rosario, 36s per 480 lb, on passage; New South Wales, 36s 6d per 480 lb, on passage; No. 1 Northern Manitoba, 35s 9d per 480 lb, on passage, and 36s 6d August shipment; good Russian Azima, 35s 6d per 492 lb, prompt shipment; Red Karachi, 34s 9d per 492 lb, August shipment.

Maize.—Argentine, 23s 9d per 480 lb. August shipment.

Barley.—Karachi, 23s per 400 lb, August shipment.

Oats.—Baltic, 15s 3d per 304 lb, October shipment.

Linseed.—Duluth, 41s 6d per 416 lb, October shipment; Argentine, 42s 3d per 416 lb, arrived; Argentine, 42s 9d, August shipment; Riga, 43s, August shipment.

Rapeseed.—Brown Calcutta, 51s 6d, per 416 lb, August shipment.

Cottonseed.—Egyptian, £7 17s 6d per ton, due; Egyptian, £7 3s 9d per ton, November shipment; Indian, £5 17s 6d per ton, August shipment.

GRAIN AND FLOUR FACTORS REPORTS.

Flour. — Strong American markets have improved the flour market, and more business is passing at full prices to 6d per sack advance. Grain.—Round and flat maize are in sellers' favour. Scotch and Irish oats are unchanged, but Manitobas are 1½d to 3d per boll lower. Beans and peas very firm, although demand is small. There is a good inquiry for oatmeal. Mill Stuffs.—Bran and thirds firm with an upward tendency. Winter wheat patents, 27s 6d to 28s per 280 lb; spring wheat patents, 28s to 28s 6d per 280 lb; American corn, 14s 3d per 280 lb; round corn, 14s 1½d to 14s 3d per 280 lb; grinding beans, 18s 7½d to 18s 9d per 280 lb; white pease, 18s 9d to 20s per 280 lb; broad bran, 97s 6d per ton; medium bran, 90s per ton; fine thirds, 120s to 122s 6d per ton; common thirds, 100s per ton; American oilcake, 145s per ton.—McKinnon and McDonald (Glasgow).

Flour.—The demand continues steady, and for some qualities an advance of 6d to 1s per sack is being quoted.—Greenhill Bros. (Belfast).

Offals.—Prices for bran firm, and the demand fairly good.—Greenhill Bros. (Belfast).

Milling Offal.—There is a good all-round demand, especially for middlings, which are again 2s. 6d. per ton dearer. Bran and pollards unchanged.—John Bawcomb and Co.

Flour has met a quiet demand to-day at about late prices. Forward offers from America continue restricted and at prices beynd buyers' ideas—T. S. Medill and Sons, Ltd.

Wheat arrivals are liberal. The trade is steady, and prices are 1s per qr higher. Flour is 6d per sack dearer, Maize 3d, and oats 3d to 6d per qr dearer. Barley firm.—Coventry and Sheppard.

TERM MARKET.

There is no change in maize futures, which are freely offered for delivery any month from July to October at 5s. per cental, and for which there are bona-fide offers at 4s. 11d. The difference separating buyers and sellers is therefore slight.

Wheat futures show some excitement for next cereal year dates of delivery, and are as follows:—

Wheat, Red Winter, July delivery	7s. 5d.	per cental		
,, ,,	Aug.	,,	7s. 6d.	,,
,, ,,	Sept.	,,	7s. 7d.	,,
,, ,,	Oct.	,,	7s. 10d.	,,

The New York cable is as follows:—Red winter wheat, 35s 9d per qr; No. 1 Northern spring wheat, 39s 7d; maize, 23s 5 per qr; flour 21s 6d. per sack.

OIL SEEDS.

Mark Lane, July 8.—At last the effect of large arrivals in July cannot be denied, both linseed and cottonseed being decidedly cheaper on the week. Poppyseed, however, is 1s dearer, and rapeseed is quite firm.

HAY AND STRAW.

Birmingham, Friday.—Small supply, trade quiet. Hay, £3 5s to £3 10s per ton; straw, no quotations.

Derby, Friday.—Clover, best old, 90s to 100s per ton; new, 80s to 90s; hay, best old, 90s to 100s; new, 80s to 90s; second new, 65s to 70s; straw, wheat, 60s to 70s; pressed, 50s to 60s; chop, 55s to 65s; peat moss, 35s to 40s.

Hereford, Wednesday.—Trade is stagnant, with values notquotably changed.

Lancaster, Saturday.—Meadow hay, 6d; clover, 6½d; wheat straw, 4½d; oat straw, 4d per stone.

Leeds, Tuesday.—Old hay is held for full prices, as the variable weather tends to check the progress of the in-gathering of the new crop. The following are the ruling quotations:—Clover hay, 7½d; meadow hay, 7d; wheat straw, 5d; oat straw, 5d; and rye straw (retail) 7d to 8½d per stone; green clover, 3½d per bundle.

Manchester, Friday. — Hay, 5d to 6½; clover, 5½d to 6½d; straw, wheat, 2½d; oats, 2¾d to 3d per stone.

Newcastle, Tuesday.—Old land hay from £3 10s to £4 4s per ton; new land hay, £4 4s to £4 5s; wheat straw, £1 to £1 3s per load; barley straw, 19s; oat straw, £1 to £1 3s.

Nottingham, Wednesday. — Fair supply, which met with a good demand for best qualities. Quotations:—Inferior to good hay, 65s to 80s; prime dito, 90s to 100s; inferior to good clover, 75s to 85s; prime ditto, 95s to 100s; wheat straw, 45s to 55s per ton.

Sheffield Tuesday.—Trade continues slow at prices slightly in favour of buyers. Choice old seeds, £4 10 to £5; choice meadow hay, £4 5s to £4 10s; straw, £2 15 to £3; green fodder, 18s to 20s per ton.

Whitechapel, Saturday.—A small assortment to hand received fair support at current prices. Best clover, 84s to 97s 6d; inferior, 75s to 80s; specially picked hay, 90s; good, 80s to 87s 6d; inferior, 65s to 70s; mixture and sainfoin, 82s 6d to 90s; straw, 28s to 34s per load.

WET AND DRIED GRAINS.

Mark Lane, Monday.—Wet Grains: Prices remain about the same, with a slightly easier tendency, and business has been done at 11s 6d to 12s 6d ale, and 9s to 9s 6d porter, per ton. Pressed white distillery meal is firm at 32s 6d per ton on rail, London. Dried Grains.—The demand continues fairly brisk and prices are firm at—Distillers, 105s; ale, 92s 6d to 95s; and mixed, 85s to 87s 6d; and the same prices for monthly deliveries, June to September, on rail, London. Calcutta rice meal, 85s; rice germ, 97s 6d; oat feed, 70s to 72s 6d; American cane treacle in good demand, 87s 6d per ton, on rail, London.—Hamlyn and Co.

TO-DAY'S MARKETS.

CATTLE.

Metropolitan Market, Islington.

	Monday, July 8, 1907. British.	Total.	Monday, July 9, 1906.
Beasts	750	750	580
Sheep and Lambs	6,470	6,470	8,080
Calves	20	20	10
Pigs	—	—	—
Milch Cows	40	40	50

Quotations per 8 lb. (sinking the offal).

ENGLISH.

	Inferior. s. d.	Second. s. d.	First. s. d.
Beasts	2 6	3 8	4 8
Sheep	4 8	5 6	6 2
Lambs	5 8	6 4	7 0
Calves	4 0	4 8	5 8
Pigs	—	—	—

Milch cows, per head, £16 to £23.

British arrivals include as follows:—Scotland, nil; Eastern Counties, 166; Midland, Home, and Western Counties, 542; Devon, 10; Ireland, 32.

We note to-day precisely the same number of beasts as were offered for sale on Monday last, the majority of which, as usual at this season of the year, were consigned from the Midland counties. Trade opened and continued throughout the day of a slow nature. Nevertheless late values were fairly well maintained. The Irish consignment consisted entirely of Waterfords, to which also the foregoing remark applies. Fat butchering cows met with a limited demand from both town and country buyers, consequently a slight decline on last Monday's rates was inevitable. A clearance will not be made in this part of the market to-day.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day. s. d.	Monday, July 9, 1906. s. d.
Scotch	—	—
Devons	—	—
Herefords	4 6 to 4 8	4 4 to 4 6
Norfolks	4 6 ex 4 8	4 2 to 4 4
Runts	4 6 to 4 8	4 0 to 4 4
Lincolns	4 2 to 4 4	3 10 to 4 0
Irish	4 2 to 4 4	—
Canadian	—	—
Fat cows	3 8 ex 3 10	3 4 to 3 6

There was a decrease of 130 in the number of sheep and lambs penned compared with Monday last For all grades of both wethers and ewes a slow trade prevailed, with a decline in value for most of the former. Scotch sheep were in smaller numbers, and met with more inquiry, consequently sellers were able to both ask and obtain an advance of 2d. per 8 lb. on last week's currencies. Irish descriptions shared in the general decline. The lamb trade also ruled of a slow nature, nevertheless all sales were based on last Monday's prices. A clearance will not be made.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

	To-day. s. d.	Monday, July 9, 1906. s. d.
8 st. Scotch		
7½ to 8 st Downs	6 0 to 6 2	5 8 to 5 10
9 st. Downs	5 10 to 6 0	5 6 to 5 8
10 st Halfbreds	5 6 to 5 8	5 2 to 5 4
10 st Yorkshires	—	—
12 st Lincolns	—	—
10 st Irish	5 8 to 5 10	5 0 to 5 2
10 st Down Ewes	3 10 to 4 0	4 0 to 4 2
11 st Halfbred ditto	3 8 to 3 10	3 10 to 4 0
5 st Grass Lambs	6 10 to 7 0	6 10 to 7 0
6 st Halfbreds ditto	6 4 to 6 6	5 8 to 5 10

The calf trade with a small supply ruled of a slow nature, the best on offer being quoted at from 5s. 6d. per 8 lb. (offal given in). No pigs were offered for sale.

London (Central), Monday. — Slow but steady trade; offerings moderate. Beef, English, 3s 10d to 4s; Scotch, 4s to 4s 10d; American, 3s 8d to 4s; refrigerated hindquarters, 3s 5d to 3s 10d. Mutton, English wethers, 4s 8d to 5s; ewes, 3s 6d to 3s 8d. Lambs, 5s to 6s; Scotch tags and wethers, 5s 4d to 5s 8d; ewes, 3s 6d to 3s 8d. Veal, 3s 8d to 5s. Pork, 3s 6d to 3s 10d per stone.

FOREIGN.

Deptford, Monday.—Beasts, 570. To-day's supply consisted of 450 beasts from the United States and 120 from Canada. Trade for which ruled of a firm and steady nature at late rates. The best States on offer were quoted at from 4s 4d to 4s 6d; seconds, 4s 2d to 4s 4d; Canadians, 4s 2d to 4s 4d; seconds, 4s to 4s 2d per 8 lb (offal given in). On Saturday 2,109 beasts from the United States were offered for sale and met with a fairly steady inquiry, late currencies governing all transactions. The best States on offer were quoted at 4s 4d to 4s 6d; seconds, 4s 2d to 4s 4d; Canadians, 4s 2d to 4s 4d; seconds, 4s to 4s 2d per 8 lb (offal given in).

SEEDS.

Mark Lane, Monday.—The continuance of the abnormal weather we are experiencing this summer is causing extreme firmness among holders of stocks held over. Tares without change. Rye scarce. Mustard firm. Rape practically exhausted. Peas continue in good demand. Grass seeds and clovers very firmly held. Sellers careless pending definite news of the new crops.—John Pickard and Co.

PROVISIONS.

London, Monday.—The arrivals of bacon last week were:—From Ireland, 1,827 bales; and from foreign ports, 15,623 bales. There was a good demand for bacon last week, and prices were advanced—Irish, some 2s to 3s; Danish, some 1s to 3s. Quotations ranged:—Irish, 61s to 63s up to 70s; Danish, 59s to 62s up to 65s; Canadian, 56s to 59s up to 61s. Butter was a quiet market. French, 94s to 102s; Danish, 108s to 110s; Russian, 74s to 96s; Irish, 86s to 103s; Victorian, 80s to 96s; New South Wales, 84s to 96s; Queensland, 80s to 92s; New Zealand, 94s to 100s. Lard.—Lard market was quiet. Irish, 46s to 58s; Danish, 47s to 50s; American, 43s to 45s.

HOPS.

Borough, Monday.—The market is quiet, in spite of the adverse conditions of the weather. The low temperature is now having a very prejudicial effect on the hop plant, its growth is checked, and the appearance very weak, especially in the Golding grounds on the rock and chalk in Mid and East Kent. The Fuggles on the clays in the Weald and Sussex are stronger. The aphis blight is giving some trouble in all districts, and at this period it is far more dangerous than May or June attacks. The imports of hops from September 1 to June 30, 1907, were 204,297 cwt.; for the previous corresponding period, 173,412 cwt. The exports of hops from September 1 to June 30, 1907, were 11,041 cwt.; for the previous corresponding period, 19,542 cwt. So the imports increase and the exports decrease; this is the result of our present so called free trade.—W. H. and H. Le May.

Canterbury, Saturday.—A little more business is passing, and prices tend to improve.

Cereal Years' Prices.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

Notwithstanding a decrease in the number of beasts offered for sale on the first market day of the week, a slow trade was experienced, rates favouring the buyers to the extent of 2d. per 8lb. for most grades of both prime and second quality cattle. Irishdescriptions were slow of sale, but were slightly firmer in regard to value, the supplies from this country consisting entirely of Waterford cattle. The majority of the consignments consisted of grass fed beasts from the Midlands, the season for which is now fully established. Fat butchering cows ruled of a fairly steady nature, anything choice showing an upward tendency, whilst fat bulls were governed by late currencies. On Thursday, as usual, only fat cows and bulls were on offer, trade for which ruled of a steadyn ature at Monday's values.

At the Foreign Cattle Market, Deptford, markets were held on Wednesday and Saturday only, trade ruled of a firm and steady nature with an upward tendency in value. The total number on offer at both markets was 3,552 as against 4,910 during the previous week, consisting of 790 British (decrease 100) and 2,762 foreign (decrease 1,258). The following were the top rates obtained per 8 lb. (sinking the offal):—90 to 95 stone Herefords, 4s. 6d. to 4s. 8d.; 90 stone Norfolks, 4s. 6d. ex 4s. 8d.; 100 stone Shorthorns, 4s. 2d. to 4s. 4d.; 95 stone Irish, 4s. 2d. to 4s. 4d.; 90 stone States, 4s. 4d. to 4s. 6d.; 95 stone Canadians, 4s. 2d. to 4s. 4d.; 90 stone fat cows, 3s. 8d. to 3s. 10d.

The sheep trade at Islington on Monday, ruled of a slow and dragging nature for both wethers and ewes; however, no decline on late values was noticeable; on the other hand, Scotch descriptions were quoted 2d. per 8lb. lower. Irish sheep, the season for which has just commenced, though slow of sale, were steady in regard to prices. Lambs were in fair average supply, and met with a somewhat limited inquiry; nevertheless no decline in value can be quoted. On Thursday, for sheep, both wethers and ewes, Monday's prices governed all transactions, whilst the lamb trade was firmer with an advance of 2d. per 8 lb. in value. The total number on offer was 8,180, as against 9,182 during the preceding week. No sheep were offered for sale at Deptford. The following were the top rates obtained per 8 lb. (offal given in):—7½ to 8 stone Downs, 6s. 2d. to 6s. 4d.; 8 stone Scotch, 5s. 10d. to 6s. 2d; 9 stone Downs, 6s. to 6s. 2d.; 10 stone Irish, 5s. 10d. to 6s.; 10 stone Downs, 5s. 10d. to 6s.; 10 stone Halfbreds, 5s. 6d. to 5s. 8d.; 10 stone ewes, 3s. 10d. to 4s.; 5 stone at grass lambs, 6s. 10d. to 7s.; 6 stone Halfbred ditto, 6s. 6d. to 6s. 8d.

Calves numbered 70 head, and met with a slow trade, the best on offer being quoted at from 5s. 6d. to 5s. 8d. per 8lb. (offal given in).

Trade in the West.

Store stock generally continues to command a good price, and with by no means excessive supplies glutting the market, as at some seasons, there is no immediate prospect of prices suffering any serious check—at least, as far as we can judge at present—this being almost a dead certainty as regards both milch beasts and barreners, the two chief classes of stock on which the attention of the public is generally centred. Dairy cows are only coming to hand in just sufficient quantity to cover the demand, and, with good class heifers anything but plentiful, there is every likelihood of buyers of this particular class of milchers having still for some time to pay the full rates now ruling—£17 10s. to £21 or £22 for young deep-milking heifers with calves at their side, whilst reliable cows with calves are making from £14 to £18, and occasionally even more. Of course there are cows to be bought for less, even as low as £11 or £12; but then this only applies to the very oldest and poorest class. Grazing cattle, as might be expected with keep everywhere so abundant, also keep very buoyant in price, especially young bullocks, and from what we have been able to glean from the most recent transactions, it seems that, where sold singly, graziers often make a better price than where sold in pairs; but this is by no means a general experience. The more serviceable grades of barreners—young animals in a forward condition—are making from about £23 or £24 up to £29 per pair, whilst in several cases where graziers have disposed of single bullocks they have made as much as £15 and even £16 apiece. There still continues to be an equally good inquiry for the younger class of stores both stirks and yearlings—for which full currencies are obtainable, and whilst pastures afford such abundant keep as is now the case, there is absolutely no reason to anticipate any decline in value.

The sheep trade just now is of all-absorbing interest, and the generally-recognised shortage that exists affords good ground for the belief that values, if they do not reach the standard some think they may do, will be well maintained, and that the prospect of any very great bargains in the coming sales is very remote indeed. This was amply demonstrated at Blandford on Thursday, when the first of the great Dorset sheep fairs followed on Saturday by a still larger one at Dorchester, was held, when in spite of continued unfavourable weather, keen competition ruled for the sheep, consisting of over 10,000 head, principally Hampshire Downs, with a sprinkling of the growingly-popular Dorset Downs, and a good trade was done, the best registered Hampshire ewes making 50s. to 58s. each, and seconds 43s. to 48s. 6d.; unregistered ewes, 45s. to 49s.; registered Dorset Down ewes, 44s. to 50s.; Hampshire Down wether lambs, 35s. to 41s.; mixed lambs, 33s. to 36s.; fat wether lambs, 45s. to 50s. 6d.; Southdown ewes, 40s. to 44s.; Southdown rams, 2 guineas to 4 guineas. Altogether business came up to best anticipations as a rule.

The fat stock markets continue to be fairly well supplied all round, though the deliveries are by no means excessive, or very rarely so. And, speaking generally, the quality and condition of present supplies, both of beef and mutton, as well as a good proportion of the lamb, leaves little better to be desired. Of course, there are the plainer qualities, but the demand for these is restricted to a very limited circle of purveyors. Good quality heifer and steer beef commands a high price—11s. 6d to 12s. per score (or from £17 to £26 apiece for nice Devons and Norfolks) realised at Wimborne on Tuesday; but fat cows only attract certain buyers for the poorer districts, for which they are paying quite 1s. to 2s. per score less than the better finished beasts; and there is a sufficiency of buyers to clear existing stocks. Mutton is rather easier for the ordinary runs, but choice wethers and tegs still make up to 8½d. and over out of their wool. Ewes of medium weight may be quoted up to 8d., but coarse old qualities are only making 7d. to 7½d. Calves meet a steady sale at unchanged rates—8½d. to 9d. Lambs, for the choicest grades, sell from 10½d. to 11½d. (or up to 63s. each). Pigs rule steady at practically unchanged values.

Trade in Scotland.

The number of fat cattle on offer has been rather larger, and while a considerable proportion were of good quality, some were too early sent to market. The best descriptions met an active trade at prices quite equal to the high quotations of the previous week, but some of the secondary cattle made the turn less money. Sheep have been shown in average numbers. Anything of a good class commanded previous rates. Ewes rather dearer, except for the very heavy weighted lots. An exceedingly large supply of lambs, the best class of which met a good trade, but secondary were about 2s. a head less. Calves a good show, and slightly dearer. Pigs also shown in larger numbers, and they met a better trade. Very few store sheep on offer, and of a very indifferent class all over, and these met a quiet trade. For the time of year there was a full average supply of cattle. Anything of good quality got fairly well sold without change in prices, but a considerable number of the secondary descriptions and stirks could not be cashed. Milch cows, except for the very best class, met a dull market at less money. Quotations:—Top price of cattle per live cwt., 43s. 9d.; current, 39s. 6d. to 41s.; mutton, 9½d. to 11d. per lb.—John Swan and Sons, Ltd.

LONDON.

Islington, Thursday. — To day's supply of beasts consisted entirely of fat butchering cows and bulls, trade for which ruled fairly steady, all sales being governed by last Monday's values. Top prices paid per 8 lb: Fat cows, 3s 8d to 3s 10d; fat bulls, 2s 9d to 3s 3d. De rease of 270 in number penned in sheep market. Sheep trade ruled rather slow, but last Monday's prices governed all transactions. Lambs met rather more inquiry and made 2d per 8 lb more money. Best pens made per 8 lb as follows: 7½ stone to 8 stone Down sheep 6s 2d to 6s 4d; 9 stone ditto, 6s to 6s 2d; 10 stone half-breds, 5s 6d to 5s 8d; 10 stone Down ewes, 3s 10d to 4s; 5 stone fat grass lambs, 7s to 7s 2d; 6 stone half bred ditto, 6s 8d to 6s 10d. Calf trade slow, but steady at late rates. Quotations per 8 lb, sinking the offal: Beasts, 2s 9d to 3s 10d; sheep, 3s 10d to 6s 4d; calves, 4s to 5s 8d; lambs, 5s 10d to 7s 2d.

Central Market, Friday.—Fair supplies and trade slow but firm for best beef:—English beef, 3s 10d to 4s; Scotch sides, 4s to 4s 2d; shorts, 4s 4d to 4s 8d; Deptford and Liverpool killed, 3s 8d to 4s; refrigerated hindquarters, best, 3s 8d to 3s 10d; ditto seconds, 3s 5d to 3s 7d; ditto forequarters, 2s 4d to 2s 6d; inferior beef, 2s 2d to 3s; mutton, Scotch wethers, 5s 4d to 5s 8d; ditto tegs, 5s 8d; ditto ewes, 3s 6d to 3s 8d; English wethers, 4s 8d to 5s; ditto ewes, 3s 6d to 3s 8d; Dutch sheep, 4s 8d to 5s; English lamb, 5s to 6s; German lamb, 5s to 5s 4d; veal, 3s 8d to 5s; English pork, 3s 6d to 3s 10d; Dutch ditto, 3s 6d to 3s 10d per 8 lb.

COUNTRY.

Ashford, Tuesday.—Beef trade dull at a reduction of 2d per stone, best not exceeding 4s 8d. Mutton, too, was 2d cheaper. Down wethers making 6s to 6s 4d; small Kents, 5s 6d to 6s; and barrens, 4s to 4s 4d. Lambs made 7s to 8s; veal, 5s to 5s 4d. Pork cheap, best not exceeding 3s 8d.

Bath, Wednesday.—There was a fair supply and a good attendance, and prices ruled as follows:—Fat steers, £19 to £21 10s; heifers and calves, £12 to £17 15s; fat wethers, 57s 6d to 67s 6d; fat lambs, 40s to 42s; calves, 22s to 120s.

Berwick, Saturday.—Attendance of farmers and buyers small, and trade dull. Calves, £5 15s to £6 10s; heifers, £7 to £10 10s; stirks, £7 10s to £10 15s; two-year-olds, £12 to £13 10s; three-year-olds, £13 to £15; Shorthorn bulls, £9 to £11 10s.

Birmingham, Thursday. — Fair supply of beasts and sheep; small supply of pigs; trade slow for beasts and sheep, and fair for pigs. Quotations: Beef, 5½d to 7d per lb; mutton, 6½d to 8½d per lb; lamb, 9½d to 10d per lb; bacon pigs, 10s per score; cutting pigs, 10s per score; sows, 7s 8d per score.

Bristol, Thursday.—Beef was plentiful, but demand not brisk, and prices of secondary qualities fell to 57s per cwt. Good average business was done in mutton and lamb, which were offered in moderate quantity. Quotations: Ewes, 6d to 6½d per lb; lambs, 9d to 10d per lb. Pigs, were again scarce, and values unaltered.

Calne, Friday.—Present prices of pigs:—In lots of not less than ten, on rail within 100 miles, 1s. per pig extra for delivery by road. Prime stores, 6 sc. 10 lb to 8 sc. 10 lbs, 9s 6d per score, 8 sc. 11 lb to 9 sc, 9s 6d per score; 9 sc. 1 lb to 9 sc. 10 lb, 9s 3d; 9 sc. 11 lb to 10 sc. 10 lb, 8s 9d. Pigs outside these limits at their value.—C. and T. Harris and Co., Ltd.

Canterbury, Saturday.—One lot of 100 tegs ranged from 36s 6d to 42s 6d, and another lot of 80 wether tegs, strong in condition, ranged from 40s to 46s 6d. Some broken-mouthed ewes, with lambs, sold as low as 29s 6d. Sussex steers were making from 10 guineas up to £15 5s.

Carlisle, Saturday.—Small attendance of buyers, and a slow trade Cattle for wintering, £7 10s to £10 10s; ditto for feeding, £12 10s to £15 10s each.

Chester, Thursday. — Sharper inquiry all round, and a quick trade for best store and dairy cattle. Business slackened later, but on the whole trade showed some improvement on last week. A quiet inquiry for sheep. Quotations:—Milch cows, £17 to £22; calvers, £15 to £19; barrens, £10 to £14; heifers, £9 to £15; stirks, £5 to £9.

Chichester, Wednesday.—A good attendance of buyers, and trade for fat sheep was brisk at fully late rates. There was an exceedingly good supply, and prices were 2s to 3s per head lower. Fat cattle experienced a firm sale without change in values. The best dairy stock was in good demand, but secondary quality cows and heifers met a slow, dragging sale. There was a considerable falling off in the supply of store cattle, and the demand was limited. Quotations:—Prime Down lambs, 7s 6d to 8s 6d; prime Devon steers, 4s 8d

to 5s; Shorthorn steers, 4s 4d to 4s 8d; prime Southdown mutton, 6s 6d to 6s 10d; West country ditto, 6s to 6s 6d; fat ewes, 4s 6d to 5s; veal, 5s to 5s 6d; fat porkers, 3s to 4s per stone; store pigs, 15s to 24s per head.

Colchester, Friday.—Beef made from 4s 6d to 5s—the first-named price being paid for an early consignment of grass-fed beef. Mutton sold at 6d per stone of 8 lb.

Derby, Tuesday.—A busy market. Prices again higher for best quality beasts and sheep, Beests 6d to 7d, calves 8d, sheep 7½d to 9d, lambs, 10d.

Doncaster, Saturday.—Large upply of cattle but buyers scarce and little doing. Milch beasts made £17 to £22; bullocks, £12 to £17; heifers and drapes, £10 to £15; stirks, £9 to £10; and young stores, £6 to £9 each. Good supply of sheep, but trade dull, and no change in prices; hoggs made 46s to 59s each.

Dorchester, Saturday.—Supplies at the cattle market proper were considerably affected to-day by the fair, but the attendance was a good average one. Business ruled steady both at Messrs. Dukes' sale and also at Messrs. Symonds and Sampson's, and a good clearance was readily effected. Milch beasts continued to attract as much attention as ever, the best making £16 10s to £20 each, and others £11 to £15 10s, whilst gracing bullocks sold from £20 to £27 per pair for the more forward lots, and from £16 to £19 for others. Fat beasts met a firm trade at extreme values, some of the neater weights being worth a trifle more; choice steers realised £19 to £23 each, and heifers £17 to £22 (or 11s 6d to 12s per score); fat cows, £13 10s to £16 10s (or 10s to 10s 6d); and bulls, £10 to £14. Mutton trade firm, except in the case of ewes, which rather favoured buyers. Best qualities, 8d to 8½d; seconds, 7d to 7½d. Lamb made unchanged rates, 10d to 11d per lb.

Dublin, Thursday.—There was a much slower trade for beef, and prices for all qualities were on a lower level. Choice bullocks suffered least, but any cattle short of finish had to be sold at a substantial reduction in order to effect business. Best aged wethers and choice mountain sheep in fair request, though at easier prices. Ewes and shipping qualities favouring buyers. Lambs lower all round, especially heavy grades. Cattle—Live weight (best), 32s 6d to 34s 6d per cwt. Extra for choice Angus crosses up to 36s 6d per cwt. Secondary and inferior sorts, 29s to 31s 6d per cwt. Mutton, dead weight, 6½d to 8¼d per lb.; extreme, 3½d per lb.—Ganly, Sons nd Co.

Exeter Friday.—Large supply of fat beasts; maiden heifers and steers, 11s 6d; cows, 10s, many unsold. Larger supply of fat sheep, dull trade; small hoggs, 9d; larger size, 8½d; young sheep sold out; fat ewes 6d, some unsold; fat lambs, 10d to 11d. No keeping sheep in the market and none wanted. Calves, 6d to 7d.

Gloucester.—Messrs. Bruton, Knowles, and Co. report their sales as follows:—Cows and calves, good supply, good trade. Store cattle, short supply, with very little inquiry.

Hereford, Wednesday.—A large supply of fat cattle, but not so many buyers, and prices not quite so firm. Best bullock and heifer beef ranged from 6d to 6½d, a few very prime reaching 6¾d, fat cows made 5d to 6d, fat bulls 4½d to 5d. Store cattle were few, and met with little inquiry. Store calves were fewer. Veal was slightly easier at 7d to 7½d per lb, exceptionally choice 8d. There were more sheep about, and prices were lower at 8d to 8½d per lb for wethers, and 3½d to 6½ for ewes. Fat lambs sold well at late rates, about 8½d to 9d. Porks, a small supply, were in good demand at 5½d to 6d.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report the supply of fat cattle was not quite as heavy, and consisted entirely of yard fed animals. A brisk trade was maintained up to 8s 6d per stone for well finished medium weights. South Coast and Midland counties buyers continue to purchase heavily. Grazing cattle were well represented, but met a slow trade at lower rates. Dairy stock were in fair demand, fresh-calved cows making up to £19 10s. Fat lambs sold freely to 51s, and fat sheep were well competed for, recent values being well maintained. Suffolk Shearlings, 64s to 58s. At the special sale of lambs, 1,600 Suffolks, Southdowns, and half-breds were penned. There was a large attendance of buyers, and a brisk trade at a substantial advance on the prices realised at the corresponding sale last year. Suffolk ewe lambs to 51s 6d, wethers to 38s 6d, half-bred ewe lambs to 39s 6d, wethers to 37s 6d, Southdown wether lambs to 31s 6d, ewes to 30s 6d. Fat and store swine changed hands freely, and recent values being well maintained,

Leicester, Saturday.—Large consignments of home-bred cattle, and buyers were well represented. The stock came to hand in excellent condition, but trade ruled irregular and many lots were left unsold. Choice milch cows, £20 to £22; good lots, £17 to £18; secondary, £14 to £16; three-polled Angus bullocks, £22; Shorthorn bullocks, £14 to £16 10s; Irish &ullocks, £14 to £17 15s; Welsh cattle, £9 to £13 10s; heifers, £8 £12 10s; calves, 20s to 40s each.

Lincoln, Friday. — A small show of horned stock, and a slow demand. Young beasts made £8 to £11; strong ditto, £12 to £13; and milch cows, £17 to £21 each.

Lynn, Tuesday.—Rather large supply of store cattle; trade slow; £7 to £14 each. Fat beasts a fair trade, at 7s 6d to 8s per stone. Small supply of store sheep; trade about the same as of late, 36s to 45s; fat sheep slow trade, 9s to 10s per stone. A few store lambs were offered, and met a fair trade at 30s to 36s each.

Manchester, Friday. — Beef: Firsts, 6d; seconds, 5d to 5½d; thirds, 4d to 4½d. Mutton: Firsts, 8½d; seconds, 7½d to 8d; thirds, 6½d to 7d. Veal: Firsts, 7d; seconds, 6d to 6½d; thirds, 5d to 5½d. Lamb: Firsts, 8½d; seconds, 8d to 8½d.

Newcastle, Tuesday.—So far as medium weights, heifers, and steers were concerned, prices showed a drop of 3d per stone on the week. Medium weight animals made from 8s 6d to 8s 9d per stone, sinking the offal; strong heavy heifers, 8s 3d to 8s 6d; strong heavy steers, 8s 3d to 8s 6d; second-class steers, 8s to 8s 3d; and coarse and inferior, 6s 9d to 7s. Trade for sheep was quiet, and prices in favour of buyers. Choice young sheep, 9d to 9½d per lb; strong heavy sheep, 8½d to 9d; ewes, 6d to 6½d; rams, 5d to 5½d. Calves were in limited supply, 126 being offered, against 169. Veal was quoted at 5d to 7½d per lb.

Norwich, Saturday.—There was a smaller supply of fat cattle; the quality generally was fair and trade good, prices ranging from 0s to 8s. per stone. Veal made 9s per ftene. A good show of sheep met a slightly better trade, the best making up to 9½d, and others 8¼d to 7d per lb. Trade for pigs was a little better, porkers making 6s 6d; baconers, 6s to 6s 3d; and sows, 5s per stone. The best of the store cattle sold readily at from £15 to £16, but younger cattle met a bad trade at from £6 to £10. Rearing calves were cheaper, prices ranging from 18s to 48s. 4,480 sheep of good sheep were shown. The best ewes made from 52s to 63s; others, 42s to 48s; lambs, 28s to 42s. Pigs were of fair quality, and a clearance was effected at prices ranging from 12s to 27s

Nottingham, Saturday.—Smaller supply of stock, and trade was slower. Best milch cows, £16 to £19; heifers, £13 to £17; and calves, 25s to 40s.

Preston, Wednesday.—There were large supplies in all departments, and prices had a lower tendency. Quotations: — Scotch heifers, 7¼d; Irish heifers, 7d; choice young cows and bulls, 6¼d to 6½d; secondary ditto, 5d to 5¾d; hoggs, 9½d; prime ewes, 8d; heavy tups and ewes, 6½d to 7¼d; lambs, 10d; calves, 7¼d per lb.

Retford, Saturday.—The actual sales were few, but the full rates of the previous Saturdry were maintained. Milch cows, £16 to £20; steers and heifers, £10 to £12; yearlings, £6 to £8; calves, 35s to 45s each.

Romford, Wednesd y.—Short supply of fat beasts; trade about the same. Best animals, 4s 6d to 4s 8d; middlings, 4s 2d to 4s 4d per stone. Calves in average supply; trade a little slower at 5s 4d to 5s 6d per stone. Sheep in average supply; trade about the same. Best small sheep, 5s 8d to 6s; large sheep, 5s 4d to 5s 6d per stone. Ewes in large supply; trade slow, at 4s 2d to 4s 4d per stone. Lambs in average supply; trade slow at 6s 4d to 6s 8d per stone. A few store beasts on offer. Fair demand. Good supply of milch cows. Slow trade. Small supply of pigs; trade slow; small porkers, 3s 8d to 4s; large hogs, 2s 8d to 3s per stone.

Sheffield, Tuesday.—A very small show of milch beasts, which changed hands at £18 to £20; young stock, £14 to £16.

Shrewsbury, Tuesday.—Quotations:—Beef, 6¼d to 6¾d per lb; mutton (wether), 9d per lb; ewes, 7½d to 8d per lb; lamb, 9½d to 10½ per lb; veal, 7½d to 8d per lb; porket pigs, 9s 9d to 10s per score; bacons, 9s to 9s 3d per score.

Stockton, Wednesday.—Cattle trade was very slow, best qualities making 8s 6d to 8s 9d per stone, and rougher kinds 6s 6d to 7s 6d. Lambs sold at 10d to 11d per lb; young sheep, 9d; ewes, 7d; and tups, 6d. The pig trade was quiet, and prices showed a reduction of 3d per stone all round.

Thame, Tuesday.—It is quite evident this market is becoming one of the most important distributing centres of this wide agricultural district. Buyers were again in full attendance, many coming from long distances, no doubt on account of the wonderful choice selection of cattle and sheep which regularly come to this market. Beef was a brisk trade throughout, choice bullocks making up to 4s 6d per stone, and fat cows, of which there was a limited supply, met a slightly firmer trade. The sheep pens were again well filled, there being a large number of neat white-faced choice quality sheep penned, late rates were difficult to maintain, but Messrs. Bond and Burrows had a clearing trade, every lot being disposed of. This firm's sale comprised 75 fat beasts, 289 fat sheep, 83 fat and store pigs, and 51 fat and weaning calves. Fat oxen made from £18 to £22; fat heifers, £16 to £20 12s 6d; fat wethers, 50s to 61s; fat lambs, 36s to 48s; fat ewes, 42s to 59s 6d; fat calves, £3 10s to £4 10s; weaning cow calves, 28s to 55s; bull calves, 10s to 48s; bacon hogs, £3 10s to £4 10s; porkers, 28s to 32s; store pigs, 20s to 31s.

Truro, Wednesday.—Attendance very good, business fairly brisk. Fat bullocks, 56s to 60s per cwt; barreners and store bullocks, 40s to 45s per cwt; cows and calves, £10 to £14; rearing calves, 16s to 40s each; wethers, 7½d to 8d per lb; ewes, 5½d to 6d; lambs, 8d to 9d; pigs, 10s 6d to 40s each; beef, 6d to 8d per lb; mutton, 6d to 8½d; lamb, 9d to 10d; veal, 6d to 8d; pork, 6d to 8½d; pork carcases, 5d to 5½d.

Wolverhampton, Wednesday.—Slow trade all round; moderate supply. Beef, 5½d to 7½d per lb; mutton, 7d to 9d per lb; lamb, 9½d to 10d per lb; veal, 7d to 8½d per lb.

Worksop, Wednesday.—Moderate show of stock, with trade good, and very little variation in prices from last week. Best beef, 7s 6d to 8s; secondary qualities 7s to 7s 6d per stone; best Southdown wether and crossbreds 9d to 9½.; ewes, 6½d to 7½d.; veal to 9d.; lamb, 11d to 1s per lb.

Yeovil, Friday.—Fairly good entry which sold readily. Heifers and calves of good quality, £18 10s to £19 7s 6d; secondary, £12 10s to £17 10s; cows and calves, £11 10s to £18 10s; best quality barreners, £12 10s to £14 5s; secondary, £9 to £12; yearling heifers, £6 5s to £8; horn ewes, 43s to 47s 6d; horn wethers, 50s to 55s; horn lambs, 28s to 36s; Down ewes, 39s to 48s; Down wethers, 48s to 54s; Down lambs, 32s 6d to 35s; cross-bred lambs, 33s to 39s.

York, Thursday.—Very little business was done, and trade generally was very bad. What few sales were effected were at about late rates. Calving and milch cows were an average show, and trade for these was fairly good, but below the last market, which was exceptionally good. Some of the best cows made up to £21, the general run being from £15 to £18 10s. The supply of sheep was rather above the average, and a good trade resulted in nearly all the lots being sold. Best twice-crossed sheep made up to 50s, secondary sorts 45s, best Mashams up to 50s, secondary ditto 46s, other sorts about 40s each.

FEEDING STUFFS.

Liverpool, Friday.—Nitrate of soda values are firm, but the trade is quiet, and this likewise applies to all fertilisers. Feeding stuffs are less firmly held in some instances, with an extremely small consumptive demand passing, as is customary at this date.

—H. Jones Langar and Co.

Mark Lane, Monday.—Linseed Cake: The actual consumptive demand is exceptionally small, even for the time of year, but there is more disposition on the part of country dealers to go into stocks for autumn trade, and values in forward positions are fully as dear. Russian in warehouse sell quietly. East India seed pures are quoted unchanged. Fine seedy Calcuttas command full prices. London made attract rather more atten-

tion, being relatively cheaply offered. Cotton Cakes.—Egyptian are getting into a small compass, and with practically nothing available to come along, holders ask full prices, while English remain steady. Decorticated: London made pures meet a free sale, but American not much inquiry. Rape Cakes quiet. Maize Germ Meal.—White American does not offer at the moment, and London manufacturers demand comparatively high rates. Maize gluten meal is in continued good request for export. Rice Meal.—Parcels of Rangoon in warehouse move off slowly with second-hand sellers of steamer lots afloat at late rates. Locust beans are fully as strong. Dried brewers' grains remain quiet but firm. Nitrate of soda is without change.

POULTRY AND GAME.

Smithfield, Saturday. — Good supply and good demand. Goslings, 4s 6d to 5s; country ducks, 2s 3d to 2s 9d; Aylesbury ducks, 2s 6d to 3s 3d; Surrey and Sussex fowls, 3s 6d to 4s 9d; Lincolnshire fowls, 2s 3d to 3s; Essex fowls, 2s to 3s; Irish fowls, 1s 9d to 2s 6d; ptarmigan, 8d; quails, 8d to 1s; feathered pigeons, 8d to 10d; Bordeaux pigeons, 1s to 1s 2d; tame rabbits, 1s to 1s 4d; wild rabbits, 6d to 8d; live hens, 1s 6d to 2s each; Australian rabbits, 6s to 7s 6d per doz.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—An average supply of fruit and vegetables at market, business being fairly brisk. Quotations for English produce:—Peaches, 2s to 12s per dozen; grapes, 9d to 3s; strawberries (Southampton), 9d to 1s 6d per basket; ditto (Kent), 1s 6d to 2s 6d per peck; nectarines, 1s 6d to 12s; green figs, 3s to 6s per dozen; gooseberries, 1s 6d to 2s 6d; cherries, 3s to 7s 6d; black currants, 4s to 5s 6d; red ditto, 5s to 6s per half-sieve; pine-apples, 2s to 4s each; tomatoes, 5s to 6s; broadbeans, 2s 6d to 3s per bushel; spinach, 1s; beetroots, 1s 6d to 2s per bushel; cabbage, 3s 6d to 4s 6d per tally; spring onions, 1s to 1s 6d per dozen bunches; green peas, 3s 6d to 5s per bag; ditto, 2s 6d to 3s 6d per bushel; green beans, 6d to 8d per lb; carrots, 2s 6d to 3s 6d; turnips, 2s to 3s; leeks, 1s 6d to 2s; mint, 1s to 1s 3d; parsley, 1s 6d to 2s per dozen bunches; endive, 1s 3d to 1s 6d per dozen; cos lettuce, 6d to 9d per score; vegetable marrows, 3s to 6s per dozen; mushrooms, 6s to 10s per 12 lb; horseradish, 10s to 14s per dozen bundles; greens, 1s to 1s 3d per bag; potatoes, 6s to 8s 6d per cwt.

WOOL.

London, Saturday.—English—per pk. of 240 lb.—Fleeces, South Down hoggs, £15 to £15 5s; half-bred hoggs, £13 10s to £14; ditto wethers, £13 to £13 15s; Kent fleeces, £12 5s to £13 5s; South Down ewes and wethers, £14 to £14 10s; Leicester ewes and wethers, £12 10s to £13. Colonial—per lb.—Vic., scoured super., 2s 2d to 2s 3d; scoured, good, 1s 11½d to 2s 1d; scoured, average, 1s 10d to 1s 11d; greasy, average to fair, 1s 1½d to 1s 2½d; N.S.W., scoured, average, 1s 9½d to 1s 10½d; greasy, average, 1s to 1s 1d; S. Aus., greasy, average, 10d to 11d; N.Z., scoured, average, 1s 10d to 1s 11d; greasy, average, 11d to 11½d; Cape, scoured, super., 1s 9½d to 1s 10½d; fleece, average, 9½d to 10½d; greasy, average, 8½d to 9½d; Natal, scoured, 1s 5½d to 1s 6½d; greasy average, 8½d to 9d. Crossbreds—grs.—Vic., good to super., 1s 3½d to 1s 4½d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s 1d to 1s 2d; coarse, 10½d to 11½d.

Canterbury, Saturday.—Prices offered for Kent wool continue very disappointing; only the best lots are making 11d, while 7d is all that is offered for lamb wool. Half-breds are quoted at 11d, and Downs at from 12½d to 13d per lb.

Halifax, Saturday.—Home-grown wools show a slightly improving position where there is any change, and there is a fairly good business in the Irish clip. As yet values of new wool have hardly settled down to a firm level, but the tone is good, and wool seems likely to be well held.

CHEESE.

Highbridge, Tuesday.—A good attendance of buyers, and all cleared. Best Caerphilly dairies realised up to 46s 6d per cwt.; secondary dairies, 44s to 46s; and other dairies 40s to 43s. A few inferior lots failed to reach 36s. Cheddars:—Prime old, from 67s to 71s; new ditto, 57s to 61s; truckles, old and ripe, from 68s to 70s; new ditto, 56s 6d to 59s; doubles, 55s to 58s 6d.

Newport, Wednesday.—Eight tons pitched, a good demand, and an average attendance. Quotations:—Caerphillies, 38s to 44s per cwt; fancy dairies, 45s to 47s; Derbies, 56s to 63s; truckles, 58s to 63s; doubles, 60s to 62s.

Glasgow, Wednesday.—The liberal supplies and the continued slow demand are causing stocks of cheese to accumulate. Buyers are tempted to hold off, as Canadians are coming cheaper. Current quotations, 54s to 59s per cwt.

A report issued by the Hungarian Minister of Agriculture, on July 1, shows a satisfactory yield of cereals, due to favourable weather. Reports have been received from only a few districts of damage to late winter crops by heat. Maize and potatoes are satisfactory, as is also sugar beet to a certain extent.

Mr. Henry Smith, jun., Cropwell Butler, Nottingham, purchased at the Royal Show from Mr. Leopold C. Paget, Harewood, Leeds, the Middle White boar, Wharfedale Vulcan, own brother to the reserve number young boar at Lincoln

A severe thunderstorm passed over South Lincolnshire on Tuesday afternoon, and lasted nearly two hours. A bullock belonging to Mr. Frank Cooke, of Torn End Manor, was killed by lightning at Spalding, while it was standing beneath a tree, which was stripped of its bark by lightning. Great hailstones fell in some parts of the fens, and damage was done to the crops. Rain fell in torrents at Spalding, and heavy storms prevailed in South Lincolnshire.

The Secretary to the Board of Agriculture, in reply to a resolution passed by the Nidderdale Agricultural Society respecting compensation under the Swine Fever Regulations, says: "I am to state for the information of the members that the power of the Board to pay compensation for swine slaughtered by their directions in connection with outbreaks or suspected outbreaks of swine fever is limited by statute. Section 16 of the Diseases of Animals Act, 1894, empowers the Board to pay as compensation only one half the value of an animal where it was infected with swine fever, but in other cases the compensation paid is the value of the animal immediately before it was slaughtered.

A SPICE THAT WILL SAVE YOUR DAMAGED HAY.

What in many parts of the country promised to be a record yield, has been endangered as to quality, if not also quantity, by the recent excessive rainfall.

That considerable damage has been done in many districts is already known by the orders which for several days past have been reaching the makers of "PHŒNIX" HAY SPICE, these being accompanied in most instances by an urgent appeal for quick despatch.

This Spice supplies the valuable aromatic flavouring principle of "prime" Hay, and when sown in the ricks imparts a much stronger fragrance, and a specially powerful, attractive, aromatic flavour. Besides this, it increases the value of all Hay, both for feeding and sale, quite 20s. per ton. It gives a pleasant aroma, and is unequalled as a condiment for damaged or inferior feeding stuff. It makes damaged Hay tempting and palatable, more digestible, and makes all animals eat it with a greater relish, and thrive faster on it. It also removes mustiness and all defects, and imparts a good tempting flavour and fragrant smell to "weathered" Hay (even when black and seemingly worthless), and makes cattle eat it as well as the best, and thrive on it admirably.

It is a really efficient Hay Spice, in which all waste is prevented, as it gives to the most inferior, coarse, or damaged Hay a fragrant, tempting smell, and an excellent and appetising taste. One cwt. will dress 20 tons of Hay at a cost of about 1s. per ton.

The "PHŒNIX" HAY SPICE is packed in bags of 112 lbs. each; the price being 20s. per cwt., carriage paid to buyer's station.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

Wheat in Surrey was coming nicely into bloom on the 11th inst., and the two sorts, white and red, were coming into bloom coincidently. A field sown with Durum or Hard Manitoba wheat was not yet in bloom. The weather up to the 10th inst. was exceedingly unpropitious, and in the northern departments of France, where the wheat is in full bloom, thunderstorms on that and the three previous days are stated to have been of the gravest possible consequence. This may well have been so. In England the wheat is blooming under much more genial conditions, and the temperature is at last at a reasonable level for the time of year.

The American crop reports do not indicate very clearly what the yields are likely to turn out, but oats appear to have retrograded in promise, and the wheat is certainly much inferior to the yield of 1906. The fine promise of the growing maize on an increased area may give the United States a record crop of that cereal in October and November next, but August and September are the critical months for maize, and it is too early as yet to form any conclusions of value. The best judges of the wheat crop appear to put at 171,000,000 bushels less than the good yield of last season; that is to say at 565,000,000 bushels. This is not a grave deficiency. In 1904 the yield was 552,500,000 bushels.

The barley crop is put at 160,000,000 bushels, a quantity which is not likely to leave much for export. Rye is put at 320,000,000 bushels, and will also be too small a yield to allow of material exportation. The American hay crop, though smaller than last year, is still put at an enormous total; fifty million tons.

The wheat gradient last week was not at all a steep one, nearly all the markets averaging within a florin of one another:—

Mark Lane	32s. 10d.	per qr.
Norwich	30s. 8d.	,,
Range	2s. 2d.	,,

Barley is cheap in Yorkshire, but fetches a fair price in the Thames Valley:—

Reading	25s. 10d.	per qr.
Doncaster	22s. 4d.	,,
Range	3s. 6d.	per qr.

Oats are fetching fairly good prices at all markets:—

Markham	21s. 5d.	per qr.
Lincoln	20s. 0d.	,,
Range	1s. 5d.	,,

The sales of British wheat since harvest at the 190 statute markets have been rather below the average, but since May the weekly business done has been in excess of that in the like period of last year. Prices for two months past have been well above 30s., but the higher terms ruling from September to March cause the average for the whole period under review to be very unsatisfactory.

This season ... 2,575,000 qr., at 27s. 0d. per qr.
Last ,, ... 2,865,000 qr., at 28s. 7d. ,,

The sales of British barley have shown an increase on the year, while the price has been maintained.

This season ... 3,364,000 qr. at 24s. 4d. per qr.
Last ,, ... 3,199,000 qr. at 24s. 4d. ,,

The sales of British oats have been much larger than usual:—

This season .... 1,159,000 qr. at 18s. 5d. per qr.
Last ,, ... 904,000 ,, 18s. 1d. ,,

The imports of the United Kingdom since September 1 have been smaller than in the previous season with respect to all the leading staples except maize, which, without being in any huge supply, has come to hand to the extent of about 300,000 qr. more than in the former comparison. Last week's imports were as follows:—

Wheat, 500,000 qr.: a good supply.
Flour, 82,800 sks.: a small supply.
Barley, 56,000 qr.: half an average.
Oats, 50,000 qr.: less than half an average.
Maize, 304,000 qr.: a heavy arrival.

Supplies on passage thus compare with the like period of 1906:—

	Mid-July, 1907.	Mid-July, 1906.
Wheat, qr.	2,800,000	3,135,000
Flour sacks	192,000	302,000
Barley, qrs.	192,000	205,000
Oats ,,	81,000	266,000
Maize ,,	1,000,000	1,025,000
Linseed ,,	370,000	173,000
Cottonseed, tons	36,000	29,000
Rice ,,	61,000	35,000

It will be seen that of breadstuffs the probable imports between now and the end of the cereal year are likely to be smaller than last season.

Some leading staples when reduced to the common denomination of the ton show a different level of real value than might ordinarily have been guessed.

	£	s.	d.
Household flour	10	12	9

American shipments last week were quite moderate. They included 132,000 qr. of wheat, 12,000 qr. of barley, 40,000 qr. of oats, 158,000 qr. of maize, and 106,000 sacks of flour.

Argentine shipments showed a falling off in maize and linseed, but were good for the time of year with respect to wheat. Quantities exported were:—Wheat, 130,000 qr.; maize, 172,000 qr.; and linseed, 16,000 qr.

Russian shipments were liberal of maize but smaller than usual of other staples, the actual totals being:—Wheat, 120,000 qr.; barley, 40,000 qr.; oats, 30,000 qr.; and maize, 135,000 qr.

Indian shipments were 151,000 qr. of wheat, 102,000 qr. of linseed, 10,000 tons of cottonseed, and 5,000 qr. of dari. The Roumanian telegram of shipments from Kustendje and the Lower Danube has not yet come to hand.

LONDON HAY TRADE.

Saturday.—There has been a great falling off in supplies during the last few days; at earlier part of week fair arrivals came to hand, but now, with better haymaking weather, farmers are evidently much too busy to think about getting any hay stuff along; trade in consequence is showing considerable firmness, with an all-round improvement in values. Hays are a good 2s. 6d. to 5s. per ton, clovers 2s. 6d. to 5s. per ton, and mixtures 2s. 6d. per ton better; clover also shares in the benefit of smaller arrivals, and are occasionally 1s. to 2s. per load more money. It is to be hoped that the short spell of fine weather will enable farmers to save a part, at least, of their crop in good condition, as nothing seems to depress the hay trade so much as a large bulk of badly got stuff.

A fair quantity of new hay and mixtures is coming to hand, and if in good condition about 53s to 60s a ton has been obtainable. Some new clover has also arrived, for which 80s to 85s per ton is asked, and buyers have been willing to pay this if in sound condition, but the majority is in such a sweated and damaged condition as to be almost unsaleable at any price. In the foreign market shipments have been fair, and with short supplies of English have found a much better demand at advancing prices.

Prices ruling are about as follow:—English best meadow hay, 82s 6d to 87s 6d per ton; good meadow hay, 72s 6d to 80s per ton; plain hays, 65s to 70s per ton; best clovers, 92s 6d to 97s 6d per ton; good clovers, 85s to 90s per ton; inferior clovers, 75s to 81s 6d per ton; best mixtures, 95s per ton; good mixtures, 82s 6d to 90s per ton; plain mixtures, 75s to 80s per ton; seconds hays, clovers, and mixtures, 57s 6d to 65s per ton; wheat straw, 24s to 27s per load; oat straw, 26s to 28s per load; barley straw, 26s to 28s per load, all ex rail London. Foreign: Canadian mixture, none; first quality Dutch hay, 65s to 67s 6d per ton; second quality Dutch hay, 60s to 62 6d per ton; French and Dutch clovers, 82s 6d per ton. These prices are by barge delivered alongside a London Thames wharf.

THE BALTIC.

The wheat cargo trade was firm on the 8th, 9th, 10th, and 11th inst., but on the 12th and 13th, lower prices being called from America, holders were more disposed to meet the views of buyers. Prices made have included No. 1 Northern Manitoba at 35s. 3d. per 480 lb., white Karachi at 34s. 3d. per 492 lb., red Karachi at 33s. 6d. per 492 lb., Argentine at 34s. 9d. per 480 lb., South Australian at 35s 6d per 480 lb., Blue Stem at 37s per 500 lb., Californian at 36s 9d per 500 lb., Walla Walla at 36s per 500 lb., and fine Russian Winter at 35s. per 492 lb.

Maize cargoes have made 23s. 6d. for Argentine, 23s. 9d. for Galatz, 24s. 3d. for Odessa, 24s 6d for Norokossisk, and 24s for Salonica, all per 480 lb. These prices indicate a very steady market, and the large supply on passage is not causing any apprehension, the current inquiry being fully equal to its assimilation as the cargoes arrive

Barley cargoes are dull, with next to nothing doing in 1906 crop. In Russian, for October shipment, about a guinea per 400 lb is obtainable, and Californian is offered at 28s. 6d. per 448lb. for September shipment. Other cargo sales of the week have comprised good Manitoba oats at 20s. 3d. per 320 lb.; Calcutta linseed at 43s 3d. per 410 lb.; Argentine linseed at 42s. 6d. per 516 lb.; Brown Cawnpore rapeseed at 52s. 9d. per 416 lb.; Ferozepore rapeseed at 53s. 6d. per 416 lb.; and Egytian cottonseed at £7 18s. 9d. per ton.

WOOL.

London, Tuesday.—The fourth series of Colonial wool sales were opened this afternoon before a very large attendance. The biddings were good, especially on the part of the home trade, though a fair proportion of the sales went to France and Germany. As regards prices, merinos were unaltered, the finer qualities showing considerable firmness. Fine crossbred were also unaltered, but the medium and coarse qualities were quoted par to 5 per cent. cheaper than the closing rates at the last series. Coarse short slips sold at a reduction of 7½ to 10 per cent. Capes were steady, not sufficient being offered to test the market. The following were the principal prices obtained:—New Zealand: Greasy, 4½d to 13½d; lambs, 7d to 11d; pieces, 6¾d to 10d; slipe, lambs, 8d to 1s 4½d; slipe, greasy, 6½d to 12d; scoured, 12d to 2s; pieces, 8½d to 2s. Queensland: Scoured, 1s 1½d; lambs, 10d to 12½d; pieces, 13d to 14d; slipe, lambs, 10d to 1s 4½d. Punta Arenas: Greasy, 8¼d to 12½d. River Plate: Slipe, 7d to 13½d per lb.

London, Saturday.—English—per pk. of 240 lb.—Fleeces, South Down hoggs, £14 to £15; half-bred hoggs, £13 to £13 10s; ditto wethers; £12 10s to £13; Kent fleeces, £12 5s to £12 10s; South Down ewes and wethers, £13 10s to £14; Leicester ewes and wethers, £12 to £12 10s. Colonial—per lb.—Vic., scoured super., 2s 2d to 2s 3d; scoured, good, 1s 11½d to 2s 1d; scoured, average, 1s 10d to 1s 11d; greasy, average to fair, 1s 1½d to 1s 2½d; N.S.W., scoured, average, 1s 9½d to 1s 10½d; greasy, average, 1s to 1s 1d; S. Aus., greasy, average, 10d to 11d; N.Z., scoured, average, 1s 10d to 1s 11d; greasy, average, 11d to 11½d; Cape, scoured, super., 1s 9½d to 1s 10½d; fleece, average, 9½d to 10½d: greasy, average, 8½d to 9½d; Natal, scoured, 1s 5½d to 1s 6½d; greasy average, 8½d to 9d. Crossbreds—grs.—Vic., good to super., 1s 3½d to 1s 4½d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s to 1s 1d; coarse, 10d to 11d.

Canterbury, Saturday.—Prices remain as from 10½d to 11d for Kent fleeces, 7d for lamb wool, and 5d for locks. Half-bred fleeces are quoted at 11d, and Downs from 1½d to 13d.

Halifax, Saturday.—There is a very good tone about the wool market, and a substantial increase of business on the week. Home grown wools are being taken up freely at improving prices. Irish wools are especially in favour because of the quality, and are fully firm. The prices range from about 12½d for selected wethers up to 13½d for pick hoggs.

Seven Years Grain Averages.

(OFFICIAL.)

Wheat	28s. 10d. per 480 lb.
Barley	25s. 4d. per 400 lb.
Oats	18s. 11d. per 312 lb.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English firm, quiet Supplies very small. Whites quoted at 35s 6d to 37s 6d; reds at 35s to 37s. Foreign firmly held at Monday's full prices, but demand slow. No. 1 Northern Manitoba, ex ship, quoted at 37s 6d; No. 2 at 36s 6d; No. 1 hard Manitoba at 38s; choice white Karachi at 34s 9d; Australian, landed, at 36s 6d to 37s; South Russian at 34s to 37s; La Plata at 35s 6d to 36s 6d. Flour firm, quiet. Hungarian held at 35s; Minnesota patents at 27s to 28s; Iron Dukes at 22s to 22s 6d. Maize firm but quiet. Mixed American, ex ship, quoted at 24s to 24s 3d, landed at 24s 6d; Odessa, ex ship, at 23s 9d to 24s; landed, at 24s 3d to 24s 6d. Barley firmer, but quiet. Azoff-Black Sea, landed, quoted at 25s; Persian, ex ship, at 22s 9d, landed at 23s 3d. Oats firm, quiet. La Plata held at 18s 6d; South Russian, 38 lb, at 18s 6d to 19s; No 2 white Manitoba, ex ship, to arrive, at 20s 7½d, with 20s 6d bidding.

Mark Lane, Friday.—Wheat: English steady, quiet; whites quoted at 35s 6d to 31s 6d; reds, 35s to 37s. Foreign dull, and 3d to 6d lower for American; No. 1 Northern Manitoba, ex ship, held at 37s to 37s 3d; No. 2 at 36s 3d; No. 1 hard Manitoba at 37s 6d to 37s 9d; choice white Karachi, 34s 6d; La Plata, landed, 35s 6d to 36s 6d; Australian at 36s 3d; South Russian at 34s to 37s. Flour dull, easier tendency; Hungarian quoted at 35s; Minnesota Patent at 27s to 28s; Iron Dukes, ex ship, at 22s, landed at 22s 6d. Maize slow, unchanged; mixed American, landed, held at 24s 6d; Odessa at 24s 3d. Barley steady, quiet; Azoff-Black Sea, landed, quoted at 25s; Persian, ex ship, 22s 9d to 23s; landed, 23s 3d to 23s 6d. Oats slow, unchanged; River Plate held at 18s 6d to 18s 9d; South Russians (38 lb) at 18s 3d to 18s 6d.

COUNTRY.

Ashford, Tuesday.—Very few samples of English wheat were on offer, and still fewer were sold. The tendency was firm, but prices did not advance, and in spite of the improved movement in London, flour also was unchanged. Wheat made, 35s to 37s; English barley, 28s to 29s; foreign grinding barley, 26s to 27s; Mazagan beans, 30s to 31s; tick beans, 33s to 34s; maize, 26s to 27s; white oats, 22s to 25s; black oats, 21s to 23s per qr.

Banbury, Thursday.—Wheat, white, 32s 6d to 33s 6d per qr; red 32s to 33s 6d per qr; barley, 27s to 30s per qr; beans, 31s to 32s per qr; oats, 20s to 25s per qr; peas, 29s to 34s per qr.

Berwick, Saturday.—A moderate attendance, with little grain on offer. Prices nominally unchanged.

Birmingham, Thursday.—With a very small attendance there was not much business passing. Foreign wheats remained at last week's prices, excepting Plates, for which sellers asked 6d more money. English wheats were very scarce, dealers requiring from 13s to 13s 6d per 186lb. for same. Plate maize showed a decline of 6d. and Bessarabian 7½d, the latter being sold at 24s 4½d per 480lb at Sharpness. Grinding barley was 6d lower, beans, 13 per 196lb, oats 22s 6d to 23s per 312lb delivered, with a quiet demand.

Bristol, Thursday.—There was but a small attendance on our market to-day, farmers being busy haymaking. The weather is exceptionally fine to-day after the long period of wet. No English wheat offering; foreign firm and unaltered. Maize, barley, and oats unchanged. There has been a continued fair demand for flour at recent values.—Grace Brothers.

Bury St. Edmunds, Wednesday.—There was only a poor attendance. Wheat was in very small supply, and firm at 34s to 34s 6d per qr for useful reds. Feeding corns, cakes, and offals were all firm at last week's prices.

Cambridge, Saturday.—With the improved weather, farmers are now busy with their hay. There was a small attendance, and most limited trade. A few samples of wheat on offer, and made the full prices of last week; 35s into the mill. Oats dull. Beans the turn dearer.

Canterbury, Saturday.—English corn continues to sell well. Choice wheats have again advanced a trifle, 65 lb samples changing hands at 37s 6d. Barley is firm at from 27s to 29s, and oat values are hardening. White samples, scaling 45 lb to the bushel, are making 25s 6d, and 38 lb blacks are worth 21s. Grey peas steady, at from 32s to 33s; and best tick beans are held for 36s per qr.

Carlisle, Saturday.—Small supply of oats in our market to-day. Good demand at late prices; prices, 24s to 24 6d per 336 lb.—Thomas Robinson.

Chester, Saturday.—The demand during the week has been full maintained. All classes of English grain continue firm at last week's rates. No quotable change in mixed maize. Round corn 3d per sack lower. Offals scarce, and the turn dearer. Quotations: White and red wheat, 4s 10d to 5s per 75 lb; grinding barley, 3s 9d to 4s per 64 lb; old beans, 6s to 6s 6d, and new, 5s 6d to 5s 9d per 80 lb; old oats, 3s 2d to 3s 6d, and new, 2s 11d to 3s 2d per 46 lb; old Indian corn, 13s 6d to 13s 9d, and new, 13s to 13s 3d per 240 lb; round corn, 13s 3d to 13s 9d.

Chichester, Wednesday.—Small attendance, Very little on offer and practically no business. New white wheat 35s to 35s 6d; new red ditto, 35s to 35s 6d; grinding barley, 25s 9d; oats, English, 18s to 23s; beans, 32s to 33s; maize, 24s to 25s; flour, 24s to 28s.

Colchester, Saturday.—Wheat small supply at 36s.—Colin Taylor, King and Co., Ltd.

Coventry, Friday.—Farmers busy in the hayfields, and attendance poor. Few samples on offer, and prices remained practically the same as last week. Quotations: Wheat, 11s 9d to 12s 6d per 186 lb; barley, 28s to 34s per 448 lb; peas, 12s to 14s; beans, 12s to 13s 6d per 196 lb; oats, 24s to 26s 6d per 352 lb.

Derby, Friday.—Wheat was in very small supply, and quoted 1s dearer. Spring corn realised the extreme prices of last week. New white wheat, 36s to 37s; new red, 36s; grinding barley, 23s to 24s; old beans, 36s to 37s; new, 34s to 36s; new oats, 24s to 25s.

Devizes, Thursday.—Wheat continues to harden in value, was decidedly dearer. Other corn was unchanged. Best wheat, 16s to 18s; secondary, 16s to 16s 6d; malting barley, 24s to 30s; feeding, 22s to 24s; old oats, 20s to 24s; new beans, 15s 6d to 16s 6d; fine flour, 27s to 30s; extra fine, 32s to 36s.

Doncaster, Saturday.—The market was thinly attended, and a quiet business was passing. English wheat is very scarce, and very little changed hands, the top price being 12s 6d and 13s per load. Foreign wheat was a trifle firmer, with a fair demand. Very limited supply, and small sale for other things, prices being very firm.

Dorchester, Saturday.—Owing to the fair occurring so recently, coupled with the brilliantly fine weather which kept so many farmers at home, there was an exceptionally small attendance at to-day's market and very little business passing. English wheat, the supply of which is practically exhausted, met with very little enquiry at unchanged rates, whilst for foreign a trifle less money was accepted. Barley steady at late rates, and oats were firmly held, despite the easier terms quoted at Mark Lane.

Edinburgh, Wednesday.—Wheat firm, average 32s 6d. Oats slow at late rates, average, 25s 10d, the same as last week. There was no change for flour, which was raised last week 6d per sack.

Exeter, Friday.—Very small attendance; very little trade. Prices all round same as last week. English wheat, 4s 1½d to 4s 3d; superfine flour, 25s to 27s; fine, 23s to 25s.

Glasgow, Wednesday.—Usual attendance at market, business, however, still slow. Wheat and flour steady at late rates. Maize 1½d per boll easier, owing to fresh arrivals. Corn steady, and 1½d dearer on the week. Barley maintains a high price. Oats the turn dearer. Beans unchanged for feeders, but grinders held for 3d per boll advance. Pease steady. Bran and thirds dearer. Oatmeal steady. Other articles unaltered. Market closed until Wednesday next.

Glasgow, Wednesday.—There was the usual attendance at the market to-day. Business, however is still slow. Wheat and flour steady at late rates. Maize, 1½d per boll easier, owing to fresh arrivals. Corn steady, and 1½d per boll dearer on the week. Barley still maintains a high price. Oats the turn dearer. Beans unchanged for feeders, but grinders held for 3d per boll advance. Pease steady. Bran and thirds dearer. Oatmeal quietly steady. Other articles unaltered. Owing to fair holidays the market will be closed on Friday of this week and Monday of next.—Gibson and Clark.

Gloucester, Saturday.—No English wheat offering. Foreign wheat slow, but steady, with an easier tendency. Plates, 35s to 37s; Russians, 32s to 35s 6d; Manitobas, 37s 3d to 37s 9d. Plate maize unchanged at 25s; flat also unchanged at 24s 3d; Bessarabian 6d cheaper at 24s 6d. Barley unaltered at 26s per qr. Oats unchanged.

Grantham, Saturday.—Small attendance. Wheat was in good demand at 1s advance on the week, making 35s per qr. Trade was quiet in other departments, and very little business was done.

Hereford, Wednesday.—A very small attendance. English wheats moved slowly. English oats firm. Maize slow with a tendency to going 6d per qr lower. Wholesale quotations:—Wheat, 3s 10d to 4s per 62 lb; barley, 3s 3d to 3s 9d per 56 lb; oats, 2s 6d to 2s 10d per 40 lb; beans, 3s 9d to 3s 11d per 65½ lb; maize, 3s 3d to 3s 6d per 60 lb.

Ipswich, Tuesday.—Very little wheat on offer; trade firm at an advance of 6d per qr: Prices 33s to 34s; whites to 34s 6d per 504 lb. Grinding barley firm. Oats fully as dear. Beans and peas steady.

Leeds, Tuesday.—There is little improvement in the weather, warmth and sunshine still wanting, and complaints of the crops are increasing, a late harvest being now a certainty. The decline in America has checked the advance and also the demand for wheat, but values have been well maintained, prices being 6d to 9d dearer on the week for foreign, and quite 1s to 1s 3d per qr for English, the supply of which is now very small. Maize, beans, and oats all favour sellers. Flour is 1s per sack dearer on the week.—Dunns and Co.

Leeds, Friday.—With a falling off in arrivals of foreign wheat, shorter supplies of English, and late harvest conditions, Tuesday's advanced prices were fully realised, with a hardening tendency for choice lots. Flour was firmer, best descriptions making 28s to 31s. Maize was firmly held. Plate was firm at 24s to 25s, and Odessa 23s to 24s. Beans, peas, oats, and barley all showed a rising tendency.

Leicester, Saturday.—Good average attendance of buyers and dealers, with small supplies of home-grown wheats, which met a steady sale at firm rates. Red wheats, 35s 6d to 36s 6d; white wheats, 36s to 37s per 36 stones; feeding barley in fair request at firm rates; beans active; fine oats in good demand at 24s to 25s per 24 stones.

Lincoln, Friday.—Very poor attendance, and scarcely sufficient English wheat on offer to test values; foreign slow at unaltered rates. Oats firm, and other feeding stuffs unchanged.

Maidstone, Thursday.—Rather a lull in the wheat trade to-day; the firm tone continues, but millers are very cautious buyers. To force sales a slight reduction would have to be conceded, but holders are not inclined to consent to any abatement in cost. Barley continues quite as dear as recently. Beans or peas are not at all plentiful; the demand for them is kept active, so they move off slowly at the full prices of last week. Oats are steady, as English are such a small stock, and the imports of foreign remarkably moderate. Maize is stiff in value, and fine sorts are dearer. There is no quotable change in other grain, nor in feeding stuffs generally.

Manchester, Thursday.—Wheat, English, 6d to 1s per qr, and foreign 1d per cental higher. Flour advanced 1s per sack on the week. Indian corn ½d to 1d per cental higher. Mixed American scarce on spot. Barley: Foreign steady and unchanged. Oats firm. Beans and peas had an upward tendency. Bran and thirds 6d per load higher.

Newark, Wednesday.—Fair attendance, slow trade; wheat and oats firm. Quotations: Wheat, white and red, 33s 6d to 34s 6d; barley, malting, 28s to 30s; grinding, 25s to 26s; oats, white, 22s 6d to 23s 6d; black, 22s to 23s; beans, 33s to 34s per qr.

Newcastle-on-Tyne, Saturday.—A quiet demand for wheats of all descriptions, and prices slightly in the buyers' favour. Maize held for fully late rates. Oats remain steady at unaltered prices. Beans and peas remain firm, with a fair consumptive demand. Barley remains quiet and prices unaltered.—Joseph Pollard and Co.

Newport, Wednesday.—Trade was quiet. Maize 3d per qr dearer. Barley and oats were unchanged on the week. Flour held well at latest prices.

Northampton, Saturday.—A very small assembly, most farmers in the district being busy with hay harvest. Scarcely any show of grain, and prices hardly changed from last week. Wheat, 33s; barley, 26s to 29s; white oats, 21s to 23s; black oats, 20s to 22s; beans, 30s to 32s; peas, 29s to 31s; flour, 26s to 30s.

Norwich, Saturday.—There were only a few samples of wheat on offer to-day; farmers tried to make an advance on last week, but were unsuccessful; values, 35s per qr, delivered. Business in feeding stuff trade was of the usual summer character, and prices remained firm, especially maize, barley, and linseed and cotton cakes. Averages: Wheat, 439 qr, 30s 10d.

Nottingham, Saturday.—No English wheat offering; foreign held for advance. Grinding barley 3d higher. Beans and oats in very small supply, and held for full rates.—Robt. Hubbld.

Peterborough, Saturday.—We have again had a very small market. The few samples of wheat offering found buyers at about 6d per qr more money than last week. Spring corn unaltered. Wheat, 33s 6d to 34s 6d; oats, 22s to 23s; beans, 31s to 33s.—Thos. Hill and Son.

Preston, Saturday.—Attendance small, and not much business doing. No change in the quotations for locally grown wheat or oats. Quotations: Wheat, white, new, per windle of

220 lb, 13s 9d to 15s; ditto red, 13s 6d to 14s; oats, old, per bushel, 3s 3d to 3s 4d; beans, per windle of 220 lb, 16s 6d to 17s.

Reading, Saturday.—Haymaking operations are now in operation in Berkshire, which would account for a smaller attendance than usual. Business was, however, no worse than during the past few weeks. Prices:—Wheat, 34s to 37s; barley, 26s to 29s; oats, 19s to 23s; beans, 33s to 37s.

Retford, Saturday.—About the usual supply of wheat. Moderate attendance of buyers, and currencies practically the same as before. Maize selling at 26s to 27s; English beans, 32s; black oats, 20s to 21s; and white ditto 22s per qr.

Ripon, Thursday. — Small attendance of farmers and dealers, and little business passing with prices firm at an upward tendency. Prices:—Wheat, 32s to 34s; ditto foreign, 36s to 40s 6d; barley, grinding, 25s to 26s; oats, 23 to 25s; maize, round, 26s to 27s; ditto, flat, 26s to 27s per qr.

Sheffield, Tuesday.—The market showed little change from last week. Foreign wheats are quoted 3d per qr less than their value last week end, but are in advance in price from that of last Tuesday. English wheat scarce, and 6d dearer. Maize unchanged. Beans, oats, and peas firmly held at late prices. Quotations:—Wheat, white, new, 33s 6d to 34s 6d; ditto red, new, 34s to 35s per 504 lb; oats, black, 22s 6d to 23s; ditto white, 23s 6d to 24s per 336 lb; peas, grinding, 33s 6d to 34s; ditto blue, 75s to 90s per 504 lb; beans, English, new, 35s 3d to 35s 6d per 532 lb; barley, grinding, 26s to 26s 6d; ditto malting, 28s to 32s per 448 lb; Indian corn, small, 25s 9d to 26s; ditto Plate, 25s 9d to 26s; ditto flat, 26s to 27s per 480 lb.

Shrewsbury, Saturday.—Quotations:—New wheat, 14s 3d to 14s 9d per 225 lb; new oats, 14s to 15s per 225 lb; peas, 15s 6d to 16s per 225 lb; beans, 14s 5d to 15s per 240 lb.

Stamford, Friday.—Small attendance, farmers being busy in the hayfields. Trade was quiet. Wheats advanced a further 1s on the week, making 34s 6d, oats 21s 6d to 22s, beans 31s 6d to 32s per qr. For barley and peas there was no inquiry.

Stockton, Wednesday.—Local wheat made 33s 6d to 34s per qr. Owing to the unsettled state of the weather foreign wheats were 6d to 9d dearer on the week. Maize steady. Oats very steady.

Sunderland, Saturday.—Grain in short supply. Wheat quiet at last week's prices. Spring corn unchanged. Arrivals nil. — E. and F. Richardson.

Tunbridge Wells, Friday. — Quotations: White wheat, 32s to 33s; red ditto, 31s to 32s: barley, 26s to 32s; grinding ditto, 23s to 25s; oats, English, 22s to 24s; rye, 24s to 25s; peas, 32s to 37s; beans, 32s to 37s; tares, 42s to 48s; maize, 22s 6d to 24s.

Warwick, Saturday. — There was a very meagre attendance at this market. Only a very small amount of business was transacted at prices ruling about the same as last week.

Winchester, Saturday.—English and foreign wheat 6d to 1s advance. Barley, oats, and maize unaltered. Flour steady trade, fully late rates. —Fear, Colebrook and Co., Ltd.

Wisbech, Saturday. — Scarcely any wheat offering from farmers. Needy millers pay 34s per 504 lb for fresh threshed reds. Oats firm, 22s 6d to 23s 336 lb.—James Fletcher.

Yeovil, Friday.—Trade was firm all round, and advances of from 6d to 1s per qr were made for wheat, barley, and oats. English wheat of best quality, 32s 6d to 35s; secondary, 30s to 32s; foreign, 35s 6d to 37s 9d; malting barley, 28s 6d to 31s; feeding (English), 23s to 25s; grinding (foreign), 26s to 26s 3d; Irish black oats, 19s to 20s; Irish white, 21s to 21s 6d; English black oats, 21s 6d to 22s 3d; English white, 23s to 23s 6d; maize, round, 24s 6d to 25s; maize, flat, 24s 3d to 24s 6d; winter beans, 31s 6d to 32s 6d; spring, 30s 6d to 31s 6d; rye, 27s 6d to 28s; vetches, 7s 6d to 8s 6d per bushel. A fairly good trade in flour at the full rates of last week. Meal and offals continue to sell well.

York, Saturday. — Wheat is nearly exhausted in this district, the little on offer selling at last week's prices. Fine white 33s 6d to 34s 6d, red and mixed 32s 6d to 33s 6d per qr of 36 stones; feeding barley, 26s to 28s per qr of 32 stones. Oats rather dearer, White Tartary, 21s to 22s, ditto black, 22s to 23s; white Garton, 23s to 24s per qr of 24 stones; beans, 32s to 33s per qr of 36 stones.

FOREIGN.

Hamburg, Saturday.—Cold and rainy weather continues, most unfavourable for the wheat plant in its present state and endangering all other crops, heavy rains having in many places laid the grain. Hay is spoiling. Market firm for all articles except rye, prices of which tend in buyers' favour. Offers of River Plate wheat are getting scarce. 79/80 kg. Barletta Russo is held at 33s 6d. Hungaro at 32s 6d; 72/73 kg. Danubian at 30s 3d per 480 lb ex ship here. Choice white Kurachee on the spot 32s 6d per 492 lb; 60 lb Saal wheat, September-October 33s 6d per 504 lb f.o.b.; 9 10/15 South Russian rye on the spot and afloat is offering at 30s 9d to 31s per 480 lb ex ship, without meeting much attention. The barley crop looks promising in most parts of Germany, also in Bohemia, Moravia, and North-Western Hungary, while from other parts of Hungary reports are conflicting. Grinding barley again in better demand; South Russian on the spot and near at hand is selling at 25s to 25s 6d; August shipments, 20s 3d to 20s 6d; September October, 19s 9d; Morocco prompt, 23s 3d to 23s 9d per 400 lb, c.i.f. Hamburg. Maize firm; kiln-dried mixed American, 24s 6d; Danubian, afloat, 22s 3d to 22s 6d; River Plate, 23s 6d per 480 lb c.i.f., Hamburg.—John Tatlock.

Hamburg, Saturday.—Barley Report:—The weather remains decidedly cool here, and although it has not rained in torrents lately, there has been some rain almost daily, whilst fine sunny days are urgently needed. So far there are no complaints from our principal barley growing districts, but if weather does not improve, quality is sure to suffer. There are quite cheerful reports from Bohemia, and also in Moravia the crop looks promising but complaint from Hungary does not cease, the quantity will be below the average, and with the present hot weather the quality will likely suffer and become thin.—F. M. Th. Duhne.

CORN STATISTICS

Weekly London Averages.

An account of the Quantities and Prices of British Corn bought on the London Market and in the area within five miles from the Royal Exchange during the week ending Tuesday, July 9, 1907:—

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, Monday, 3 p.m.

The holders of English wheat were as firm as ever, but foreign was not so easily placed as formerly. It must be noted that imported sorts are decidedly dear at present, and that a mid-summer slackness in demand has only been postponed by the cold weather of early July.

Maize to day was firm and barley was steady. Singularly little of the latter staple was to be had. Oats were firm and dearer for English and New Zealand, steady for Manitoba, but weaker for both Argentine and Russian. Beans were a better trade than peas, but in neither was much business done. There was a good sale for small pulse at previous prices.

CLOSE OF THE MARKET.

THE MARKET CLOSED RATHER AGAINST HOLDERS OF BREADSTUFFS, THE WEATHER BEING TRULY SUMMER-LIKE.

THE FLOUR TRADE.

MARK LANE, Monday, 3 p.m.

The attempt of London millers to put the price up seems to have had a bad effect on demand, and the market to-day is not so good as it was a week ago. The Millers' Convention at Exeter resulted in a very colourless resolution being passed. Nothing like a reasonable arrangement was arrived at, either with respect to the weekly output of the London mills or with regard to country consignments for sale in London.

The country flour at Mark Lane to-day was not dearer, the East Anglian firms not having instructed their representatives to endorse the 6d. advance quoted by the London millers. American flour was rather dearer on the week, but with a reduced sale. No decline in Hungarian occurred, and the very high prices asked for that kind seem justified by genuine scarcity. Millers' offals were firm at last week's rise, but sales were not so easily effected to-day as on the 8th and 10th inst.

THE BALTIC.

Monday, 1 p.m.

State of Trade.

Wheat cargoes are sometimes 3d. lower from Saturday, the trade being weakest for American and Indian relatively steady for Argentine and Russian. Barley and oat cargoes for autumn shipment are offered at exceedingly low prices. Maize is firm. Rapeseed and cottonseed cargoes are held for an advance from Saturday, but buyers resist this. Linseed cargoes are steadily held, but there are not many bids made.

Business Done.

Wheat.—White Karachi, 35s 3d per 492 lb, arrived; Red Karachi, 34s 9d per 492 lb, arrived; No. 1 Hard Manitoba, 36s 3d per 480 lb, August shipment; No. 2 Northern Manitoba, 34s 9d per 480 lb, August shipment; Azoff, 34s 6d per 492 lb, September shipment; Walla Walla, 36s per 500 lb, on passage; New South Wales, 38s 9d per 480 lb, on passage.

Maize.—Roumanian, 23s 480 lb, on passage; Argentine, 23s 3d per 480 lb, on passage; Odessa, 24s per 480 lb, on passage; American, 23s per 480 lb, prompt shipment.

Barley.—Azoff, 21s per 400 lb, September shipment.

Oats.—No. 2 Manitoba, 20s 3d per 320 lb, prompt shipment; Roumanian, 15s 9d per 304 lb, October shipment; Riga, 15s 6d per 304 lb, October shipment; White Libau, 15s 3d per 304 lb, October shipment.

Beans.—Panderma, 33s per 480 lb, August shipment.

Peas.—Indian White, 34s per 504 lb, August shipment.

Linseed.—Riga, 42s 3d per 416 lb, August shipment; Duluth, 43 6d per 416 lb, September shipment; Calcutta, 43s 9d per 410 lb, July shipment: Argentine, 42s per 416 lb, July shipment.

Rapeseed.—Yellow Cawnpore, 56s per 416 lb, July shipment.

Cottonseed.—Egyptian, £8 per 2,240 lb, July shipment.

GRAIN AND FLOUR FACTORS REPORTS.

Flour. — Stronger American markets have improved the value of flour about 6d per 280 lb., and there has been more passing. The smart drop, however, reported this morning checks sales. Grain.—Round and flat maize are in sellers' favour. Scotch and Irish oats are unchanged, but Manitobas are 1½d to 3d per boll lower. Beans and pease very firm, although demand is small. There is a good inquiry for oatmeal, which is scarce on spot. Mill Stuffs.—Bran and thirds firm, with an upward tendency. Winter wheat patents, 27s 6d to 29s per 280 lb; spring wheat patents, 28s to 29s per 280 lb; American corn, 14s 3d per 280 lb; round corn, 14s 1½d to 14s 3d per 280 lb; grinding beans, 18s 7½d to 18s 9d per 280 lb; white pease, 18s 9d to 20s per 280 lb; broad bran, 97s 6d per ton; medium bran, 90s per ton; fine thirds, 120s to 122s 6d per ton; common thirds, 103s 4d per ton; American oilcake, 145s per ton. —McKinnon and McDonald (Glasgow).

Flour.—Cross-Channel as well as Belfast millers are experiencing difficulties in making deliveries, owing to labour complications with steam boat owners and carters in Belfast. Prices for their makes of flour are in some cases 6d per sack higher than a week ago. American millers are quoting for shipment at more reasonable figures than has been the case for some time, some of them indicating for shipment prices below what is being asked for similar quality home-made manufacture on spot.—Greenhill Bros. (Belfast).

Milling Offal.—Everything is firm and scarce, especially middlings and pollards which must again be written 2s 6d per ton dearer.—John Bawcombe and Co.

Flour remains quiet, and at our market to-day a moderate trade only was done in spot parcels at last Monday's prices. For shipment offers are still out of range.—T. S. Medill and Sons, Ltd.

TERM MARKET.

The market in maize futures continues to be marked by extreme steadiness, but wheat futures are fluctuating daily with the advices from America. Latest prices are as follows:—

Red American wheat July delivery			7s. 1d.	per cental
,,	,,	Aug. ,,	7s. 2d.	,,
,,	,,	Sept. ,,	7s. 3d.	,,
,,	,,	Oct. ,,	7s. 4d.	,,
,,	,,	Nov. & Dec.	7s 5d.	,,
Mixed American maize delivery any month July to Oct. inclusive			5s. 0d.	,,

EGGS.

(Number per 1s.)

HAY AND STRAW.

Birmingham, Friday. — Small supply; no quotations obtained.

Derby, Friday.—Clover, best old, 90s to 100s per ton; new, 80s to 90s; hay, best old, 90s to 100s; new, 80s to 90s; second new, 65s to 70s; straw, wheat, 60s to 70s; pressed, 50s to 60s; chop, 55s to 65s; peat moss, 35s to 40s.

Lancaster, Saturday.—Meadow hay, 6d; clover, 6½d; wheat straw, 4½d; oat straw, 4d per stone.

Manchester, Friday. — Clover, 6½d to 7d; straw, wheat, 3½d; oat, 3½d per stone.

Newcastle, Tuesday.—Old land hay from £3 5s to £4 5s per ton; new land hay, £4 10s to £5 5s; wheat straw, £1 1s to £1 5s per load; oat straw, £1 to £1 3s.

Nottingham, Wednesday.—Market quiet at following rate:—Inferior to good hay, 70s to 80s; prime dito, 90s to 100s; inferior to good clover, 80s to 90s; prime ditto, 95s to 100s; wheat straw, 45s to 55s per ton.

Sheffield Tuesday.—An average attendance of farmers and fair supplies. Choice oldseeds, £4 15s to £5; choice meadow hay, £4 10s to £4 15s; straw, £2 15 to £3; green fodder, 18s to 19s per ton.

Whitechapel, Saturday.—A light supply met a fair sale at previous prires. Best clover, 84s to 97s 6d; inferior, 75s to 80s; specially picked hay, 90s; good, 80s to 87s 6d; inferior, 65s to 70s; mixture and sainfoin, 82s 6d to 90s; straw, 28s to 34s per load.

POTATOES.

Borough, Saturday.—Good offerings were in good request. Early Puritans, 6s; Early Rose, 5s; St. Malo, 5s 6d; Cherbourg 4s 6d; Jersey, 5s 6d per cwt.

Carlisle, Saturday.—The supply was small, and a brisk demand was experienced. Old potatoes, 9d to 10d; new ditto, 1s 4d to 1s 6d per stone.

Goole, Wednesday.—Few lots of potatoes were shown. New potatoes will not be ready for a week or so.

Lancaster, Saturday.—Potatoes, 1d per lb.

Malton, Saturday.—Fair show of new potatoes, which sold at 1s to 1s 4d per stone, and 10d to 1s for imported lots.

Manchester, Saturday.—Potatoes: Cheshire, new, 12s to 15s per load; Jersey, 7s 6d to 8s per cwt.

Preston, Saturday.—With the new crop of potatoes coming forward more readily, there was an easier tendency, and quotations were 14s to 15s per load of 240 lb.

Retford, Saturday.—New potatoes 1s per stone.

Spitalfields, Saturday.—Trade proved generally quiet with supplies of English increasing. Early Rose, 4s 6d to 5s; early Puritans, 5s; British Queens, 5s to 5s 6d; St. Malo, 5s; Cherbourg, 3s 6d to 4s; Jersey, 5s per cwt.

York, Saturday.—New potatoes, 5s to 5s 6d per four score hamper, and 4½d per stone; smaller sorts rather cheaper.

PROVISIONS.

London, Monday.—Bacon: The arrivals of bacon last week were:—From Ireland, 2,167 bales, and from foreign ports, 16,377 bales. There was a steady trade for bacon last week, and prices for secondary Irish were advanced 2s, Danish, 1s to 2s. Quotations ranged:—Irish, 63s to 65s up to 70s; Danish, 61s to 63s up to 67s; Canadian, 57s to 59s up to 64s. Butter: The butter market was slow. French, 94s to 102s; Danish, 108s to 110s; Russian, 74s to 96s; Irish, 86s to 103s; Victorian, 84s to 98s; New South Wales, 84s to 96s; Queensland, 82s to 92s; New Zealand, 90s to 100s. Lard.—The lard market was slow. Irish, 46s to 55s; American, 42s 9d to 44s 9d; Danish, 44s to 50s.

SEEDS.

Mark Lane, Monday.—There is very little movement on the market as is usual at this time of the year. Tares unchanged. Rye quiet. Mustard firm. Rape scarce and high. Peas without movement. Grass and clover seeds in narrow compass and firmly held.—John Picard and Co.

TO-DAY'S MARKETS.

CATTLE.

Metropolitan Market, Islington.

	Monday July 15, 1907. British.	Total.	Monday, July 16, 1906.
Beasts	730	730	810
Sheep and Lambs	6,140	6,140	7,130
Calves	10	10	20
Pigs	—	—	—
Milch Cows	40	40	40

Quotations per 8 lb. (sinking the offal).

ENGLISH.

	Inferior. s. d.	Second. s. d.	First. s. d.
Beasts	2 6	3 8	4 8
Sheep	4 8	5 6	6 4
Lambs	5 8	6 4	7 0
Calves	—	—	—
Pigs	—	—	—

Milch cows, per head, £16 to £22 10s.

British arrivals include as follows:—Scotland, 10; Eastern Counties, 140; Midland, Home, and Western Counties, 517; Devon, 10; Ireland, 53.

We note to-day a decrease of twenty head in the number of beasts offered for sale compared with Monday last, the majority of which consisted of grass-fed beasts from the Midland counties. For both prime and second quality English a slow trade prevailed at late currencies, a few choice beasts occasionally making an advance on our top quotation. The Irish consignment consisted of 32 Waterfords, these sharing in the slow trade prevailing, and 21 stores which were quoted at from £11 to £11 10s per head (two and a-half-year-old heifers). There was a limited country demand for fat cows and bulls, last week's values governing all transactions. A clearance will not be made.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day. s d		s d	Monday, July 16, 1906. s d		s d
Scotch	—		—	—		—
Devons	—		—	—		—
Herefords	4 6	to	4 8	4 6	to	4 8
Norfolks	—		—	4 2	to	4 4
Runts	4 6	to	4 8	4 0	to	4 4
Lincolns	4 2	to	4 4	3 10	to	4 0
Irish	4 2	to	4 4	—		—
Canadian	—		—	—		—
Fat cows	3 8	to	3 10	3 4	to	3 6

There was a decrease of 330 in the number of sheep and lambs penned compared with Thursday last. Trade for all descriptions of both wethers and ewes was of an exceedingly dull and dragging nature, choice small weights only making late rates, heavier descriptions being very unsaleable. Scotch sheep were in fair average supply, and, being small handy weights, sold well at an advance of 2d. per 8 lb. On the contrary, Irish were in larger supply, and shared in the slow trade prevailing. Lambs also met with a sluggish inquiry, all sales being based on last week's currencies. The prospects of a clearance being effected is extremely doubtful. The supply included 300 Scotch, 500 Irish, and 792 from the Eastern Counties.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

	To-day. s. d.		s. d.	Monday, July 16, 1906. s. d.		s. d.
8 st. Scotch	6 2	to	6 4	5 10	to	6 0
7½ to 8 st Downs	6 0	to	6 2	5 8	to	5 10
9 st. Downs	5 10	to	6 0	5 6	to	5 8
10 st Halfbreds	5 6	to	5 8	5 2	to	5 4
10 st Yorkshires	—			—		
12 st Lincolns, half-breds	—			4 10	to	5 0
10 st Irish	5 8	to	5 10	4 10	to	5 0
10 st Down Ewes	3 10	to	4 0	4 0	to	4 2
11 st Halfbred ditto	—			—		
5 st Down Lambs	6 10	to	7 0	7 0	to	7 2
6 st Halfbreds ditto	6 6	to	6 8	5 10	to	6 0

Calf trade not worth noting or quoting. No pigs on the market.

London (Central), Monday. — Moderate trade, supplies being fair. Beef, English, 3s 10d to 4s; Scotch, 4s 2d to 4s 8d; American, 3s 9d to 3s 11d; refrigerated hindquarters, 3s 10d to 4s. Mutton, English wethers, 4s 4d to 5s; ewes, 3s 4d to 3s 10d. Lambs, 5s 4d to 5s 10d; Scotch tegs and wethers, 5s 4d to 5s 8d; ewes, 3s 6d to 3s 10d. Veal, 3s 8d to 4s 8d. Pork, 3s 8d to 4s per stone.

FOREIGN.

Deptford, Monday.—To-day's supply compared with Monday last showed an increase of 315 head, and consisted of 683 from the United States and 200 from Canada. Trade ruled of a fairly steady nature, however; sellers were obliged to accept a decline of 1d per 8 lb on last Saturday's currencies. Top prices paid per 8 lb are as follows (sinking the offal):—States, 4s 4d to 4s 6d seconds, 4s 1d to 4s 3d; Canadians, 4s 2d to 4s 4d; seconds, 3s 10d to 4s. On Saturday 1,800 beasts from the United States were offered for sale, and met with a firm and steady trade at an advance in value. Besides the above, 800 more were withheld. The best on offer were quoted at 4s 5d to 4s 7d; seconds, 4s 2d to 4s 4d.

FEEDING STUFFS.

London Monday.—Linseed Cakes. — Trade even for this time of year is pareicularly quiet, but there is still a fair business doing in cakes to store for the autumn demand in order to take advantage of the low spot prices at present ruling.

Cotton Cake: Stocks of Egyptian made are now getting small, and with no immediate prospects of fresh arrivals, are firmly held at full prices. London made unchanged.

Decorticated Cotton Cake and Meal: These both go slowly into consumption at last quotations.

Linseed: Market is a little higher on the week on account of smaller shipments.

English Linseed Cake,	ex mill	7	5	0	to 7	7	6
Indian Calcutta Linseed cake,	ex quay	7	7	6	to 7	10	0

Russian	33 to 35

WET AND DRIED GRAINS.

Mark Lane, Monday.—Wet Grains: Prices remain about the same, with a slightly easier tendency due to warmer weather and haymaking, and business has been done at 11s to 12s ale, and 9s to 9s 6d porter per ton. Pressed white distillery meal is firm at 32s 6d per ton on rail, London. Dried Grains.—The demand continues fairly brisk and prices are firm at—Distillers, 105s; ale, 92s 6d to 95s; and mixed, 85s to 87s 6d; and the same prices for monthly deliveries, June to September, on rail, London. Calcutta rice meal, 80s; rice germ, 97s 6d; American cane treacle in good demand, 87s 6d per ton, on rail, London. Kiln dried sea-damaged Australian wheat from 20s per qr.—Hamlyn and Co.

HOPS.

Borough, Monday.—The reports from the plantations speak of an increase of vermin, but fine weather generally makes the market weak; consequently there is less inclination to do business to-day, but holders are firm, stocks being very small.—W. H. and H. Le May.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

The number of beasts on both market days at Islington was precisely the same as on the previous week. The supply on the first day was chiefly drawn from the Midland counties. The Irish arrivals were small, and consisted entirely of Waterfords. Trade for fat beasts was of a somewhat slow nature, though no alteration in regard to value can be noted. This remark also applies to the Irish trade. Fat butchering cows and bulls were in fair average numbers, and met with a limited inquiry from both town and country buyers, 2d. per 8 lb. decline in value having to be accepted to effect sales. On Thursday sales were confined to fat butchering cows and bulls, Monday's prices governing all transactions.

At the Foreign Cattle Market, Deptford, rates on the whole, ruled of a firm and steady nature, as also was the trade. The supply consisted of shipments from the United States and Canada. The total number on offer at both markets was 3,803, as against 3,552 during the previous week, consisting of 700 British and 3,013 foreign (increase 251), these latter comprising 2,893 from the United States, and 120 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal):—90 to 95 stone Herefords, 4s. 6d. to 4s. 8d.; 95 stone Runts, 4s. 6d. to 4s. 8d.; 90 stone Norfolks, 4s. 6d. ex 4s. 8d.; 100 stone Shorthorns, 4s. 2d. to 4s. 4d.; 95 stone Irish 4s. 2d. to 4s. 4d.; 90 stone States, 4s. 4d. to 4s. 6d.; 95 stone Canadians, 4s. 2d. to 4s. 4d.; 90 stone fat cows, 3s. 8d., ex. 3s. 10d.

In the sheep market at Islington there was an increase in the supply, and meeting with no corresponding increase in the demand, trade ruled dull and heavy, and in many transactions a decline of 2d. per 8 lb. had to be accepted to effect sales. On the other hand, Scotch descriptions were in smaller numbers, and met with more inquiry, consequently an advance of 2d. per 8 lb. was asked and obtained. Irish sheep shared in the general decline. Lambs, though slow of sale, were firm in regard to value. On Thursday trade ruled of a quiet nature with a downward tendency in value though not sufficient to warrant our quoting any lower prices, whilst lambs were difficult to vend even at a decline of 4d. per 8 lb. The total number on offer was 8,420, as against 8,180 during the previous week, showing an increase of 240. The following were the top rates obtained per 8 lb. (sinking the offal):—7½ to 8 stone Downs, 6s. to 6s. 2d.; 8 stone Scotch, 6s. to 6s. 2d; 9 stone Downs, 5s. 10d. to 6s.; 10 stone Irish, 5s. 8d. to 5s. 10d; 10 stone Downs, 5s. 8d. to 5s. 10d.; 10 stone Halfbreds, 5s. 6d. to 5s. 8d.; 10 stone Down ewes, 3s. 10d. to 4s.; 5 stone fat grass lambs, 6s. 10d. to 7s.; 6 stone Halfbred ditto, 6s. 4d. to 6s. 6d.

The calf trade ruled of a slow nature, and numbered 90 head, the best on offer were quoted at from 5s. 6d. to 5s. 8d. per 8lb. (sinking the offal). No pigs were offered for sale.

Trade in the West.

Now that harvest time is getting within measurable distance, the precarious state of the weather is naturally giving rise to feelings of the gravest anxiety as to the growing crops in the minds of our agricultural friends, who are beginning to lose all hope of any improvement, this feeling being accentuated by much of the wheat showing signs of blight. The weather, however, underwent a great change for the better during Thursday. All the more forward-condition graziers—either heifers or steers—continue to find a ready sale at remunerative pricers to sellers in consequence of the good return fat bullocks are just now making—for these two special classes of beasts £24 to £31 or £32 being the range at present for anything like meaty bullocks, and graziers find some difficulty in getting their demands fully met. Young cows sell up to £17 or £18 for really serviceable milchers likely to do duty in the dairy for another season or two; older animals are less wanted, and can be acquired at any price ranging from £14 £15, down to as low as £10 or £11 for milked-out bullocks. Good class stirks also sell very freely from £9 or £10, up to £13 and £14 for very promising animals, whilst yearlings range from £6 up to £7 10s. Sheep, which in spite of so much wet, are keeping unusually sound, are just now attracting a good deal of attention on the part of buyers.

The fat stock markets show but little tendency to lower values. Beef, for one thing, is decidedly dearer than it was, and when we find steers, selling up to £27 apiece, for not particularly heavy bullocks, this rather savours of Christmas than of midsummer values. But such is a fact, and plenty of the ordinary runs of heifers and steers are now making from £20 up to £24 or £25 apiece (fully 12s. per score and more for the best weights) whilst the more ordinary runs sell from 11s to 11s 6d., and fat cows at 10s. to 10s. 6d.; there being nothing in the way of beef at all worthy of the name procurable under 10s. Wether mutton is exceedingly dear, but some classes of ewes rather favour buyers—that is, for coarse heavy weights. The choicest quality wethers now make 6s. to 6s. 6d. per stone, and the coarse weights 5s. 4d. to 5s. 10d. Well-finished lambs are meeting a steady sale at 6s. 10d. to 7s. per stone, and seconds 6s. 4d. to 6s. 8d. Calves from scarcity command fully late rates for the best finished animals; but plainer calves are a trifle lower. Pigs of the better class sell from 9s. 6d. up to 10s. 9d. per score; but coarse weights must not be quoted more than 8s. to 9s.

Trade in Scotland.

The number of fat cattle on offer has been rather larger. The best qualities made as nearly as possible previous prices, but a considerable proportion of those on offer, being short of quality, sold at from 10s. to 15s. per head less. Sheep in rather larger numbers. A steady demand was experienced for those adapted for shop purposes, and they made fair prices, but secondary were cheaper. Ewes were in fair demand, without change in price. An exceedingly large supply of lambs on offer, and they suffered an average fall of 2s. per head. There was the largest and best show of calves for a considerable time, and they were just the turn cheaper. Pigs a small show, and more money realised. Owing to the Highland Society Show there was only a small supply or store cattle. With a moderate attendance of buyers a dull trade was experienced, and a considerable number of those on offer were left over. Milch cows a fair show, and they met a good trade. Quotations:—Top price of cattle per live cwt., 42s. 6d.; current, 38s. to 40s.; mutton, 7d. to 9½d. per lb.—John Swan and Sons, Ltd.

Trade in Ireland

The supply of cattle and sheep at last Dublin's Thursday market was again very large, there being 2,946 cattle—an increase of 183 on the week—and 10,874 sheep, an increase of 1,770. The attendance of buyers, too, was large. In the cattle department really well-finished beasts maintained the late good currencies, but heifers were more difficult to dispose of, and a good many were returned unsold. The average tone of the market opened rather quietly, but improved somewhat as the day wore on. The average top run of prices ranged from 31s. to 34s. (live weight). The approximate dead weight prices would be:—Prime heifer and ox beef 57s. 6d. to 60s., and a few extra good lots 62s. to 64s. per cwt.; good second-class beef 52s. 6d. to 56s., and inferior beef 46s. to 50s. per cwt. Really well-finished bullocks commanded late prices, but heifers were more difficult to dispose of. Rough cattle hard to sell.

There was a fair trade done in wether mutton at from 7½d. to 8½d., and suitable ewes made from 7d. to 7½d., but owing to cautiousness of buyers it was difficult to maintain the prices of last week, and buying for the shipping trade was done at slightly cheaper prices. There was, however, a large trade done in sheep worth from 36s. to 56s. each. Early in the day large lambs sold very weak, good ewes at from 30s. to 38s., and large fat ones, 40s. to 42s. each. Thin, small sized lambs sold for 12s. each upwards. Veal of prime quality sold at from 8d. to 9d. per lb. freely; rough calves, from 4½d. per lb. upwards, but very slowly. Milch cows of good quality were in request, and strippers sold freely, where of good shape and make, from £17 to £20; new milch cows, from £15 to £17. Business for store cattle is still very good, and many sales were made at the weekly auction sale.

At the Pig Market there was a good attendance of both shipping and home buyers. For really good swine there was a decline of from 1s. to 2s. per cwt., while the reduction was more on lean kine. The clearance of unsuitable pigs was late and disappointing. Choice light-weight bacon pigs, 51s. to 53s. per cwt.; inferior pigs, 38s. to 40s. per cwt.

LONDON.

Islington, Thursday.—To day's supply of beasts consisted entirely of fat butchering cows and bulls, which met a slow trade at Monday's values. Top prices paid per 8 lb: Fat cows, 3s 8d; extreme, 3s 10d; fat bulls, 2s 9d to 3s 3d. Trade for sheep ruled slow for both wethers and ewes, nevertheless, Monday's prices governed all transactions, whilst lambs, on the other hand, were difficult to vend, even at a decline of 4d per 8 lb. Best pens made per 8 lb as follows: 7½ to 8 stone Down sheep, 6s to 6s 2d; 9 stone ditto, 5s 10d to 6s; 10 stone ditto, 5s 8d to 5s 10d; 10 stone half-breds, 5s 6d to 5s 8d; 10 stone Down ewes, 3s 10d to 4s; 5 stone fat Down lambs, 6s 6d to 6s 8d. Calves were in full supply, and ruled slow at late currencies. Quotations per 8 lb, sinking the offal: Beasts, 2s 9d to 3s 10d; sheep, 3s 10d to 6s 2d; calves, 4s to 5s 8d; lambs, 5s 6d to 6s 8d.

Central Market, Friday.—Fair supplies and trade slow:—English beef, 3s 10d to 4s; Scotch sides, 4s 2d to 4s 4d; shorts, 4s 4d to 4s 8d, extreme, 4s 10d; Deptford and Liverpool killed, 3s 8d to 4s; refrigerated hindquarters, best, 3s 9d to 3s 11d; ditto seconds, 3s 7d to 3s 8d; ditto forequarters, 2s 6d to 2s 8d; inferior beef, 2s 2d to 3s; mutton, Scotch wethers, 5s 6d to 5s 8d; ditto tegs, 5s 8d; ditto ewes, 3s 6d to 3s 10d; English wethers, 4s 10d to 5s 4d; ditto ewes, 3s 6d to 3s 10d; Dutch sheep, 4s 8d to 5s; English lamb, 5s 8d to 6s 4d; veal, 3s 8d to 4s 8d; English pork, 3s 8d to 4s 8d; Dutch pork, 3s 6d to 3s 10d per 8 lb.

COUNTRY.

Ashford, Tuesday.—Trade dull, buyers being fewer. Good beef sold readily at 4s 8d to 4s 10d, but secondary was heavy. Mutton 2d per stone cheaper, Downs being quoted up to 6s 2d, and small neat Kent's to 5s 8d; while ewes ranged between 4s and 4s 4d. Veal made up to 5s 4d. Lamb and pork unchanged.

Berwick, Saturday.—Attendance of farmers and buyers very small, and trade quiet. Heifers, £8 10s; stirks, £7 10s to £10; two-year-olds, £11 10s; three-year-olds, £14 15s; Shorthorn bulls, £12.

Birmingham, Thursday.—Small supply of beasts sheep and pigs; trade good for pigs, but slow for beasts and sheep. Beef, 6½d to 6¾d, a few at 7d per lb; mutton, 6½d to 8½d per lb; lamb, 9d to 9½d per lb; bacon pigs, 10s per score; cutting pigs, 10s to 10s 3d per score; sows, 8s per score.

Bristol, Thursday.—At market beef was not so plentiful as usual, and with a limited demand trade was dull at highest prices of 62s per cwt for best qualities, and 58s for secondary. Mutton and lamb were offered in considerable quantity, and an average amount of business was transacted at increased values. Light Down wethers, 8¾d per lb; prime wethers, 8½d; heavy, 7¾d; ewes, 6d to 6½d; lambs, 9½d to 10d. Pigs were again scarce, porkers being firm at 10s 9d per score, and baconers advancing to 10s.

Calne, Friday.—Present prices of pigs:—In lots of not less than ten, on rail within 100 miles, 1s. per pig extra for delivery by road. Prime stores, 6 sc. 10 lb to 8 sc. 10 lbs, 10s per score, 8 sc. 11 lb to 9 sc. 10 lb,, 9s 6d per score; 9 sc. 11 lb to 10 sc. 10 lb, 9s. Pigs outside these limits at their value.—C. and T. Harris and Co., Ltd.

Canterbury, Saturday.—The first of the store lambs are now being offered; some rough specimens were sold to-day at 16s per head. There was, otherwise, not much business doing. Yearling bullocks are making from £7 to £8, and cows and calves from £14 5s. to £16 10s per head.

Carlisle, Saturday.—Small attendance of buyers, and a quiet trade. Wintering heifers made £6 10s to £10 10s, and feeding cattle to £15 each.

Chester, Thursday.—Trade was much quieter on the whole, though prices remained about the same as last week. Prices: Milch cows, £18 to £22; calvers, £15 to £19; barrens, £10 to £12; heifers, £9 to £14; stirks, £6 to £9; sheep, 18s to 32s.

Derby, Tuesday.—All classes of fat stock were dear. Beasts 6d to 7d, calves 8d, sheep 7½d to 9d lambs 10d. to 11d per lb.

Doncaster, Saturday.—Very small supply of cattle, and a poor attendance of buyers. Trade

ruled slow. Milch beasts, £17 to £22; bullocks, £12 to £17; heifers and drapes, £11 to £15; stirks, £8 to £10; young stores, £7 to £8 each. Fair supply of sheep, but little doing at late rates. Hoggs 46s to 54s; lambs, 20s to 31s each.

Dorchester, Saturday.—The cattle was a very small affair to-day, Messrs. Ensor and Son at their repository sale having a very light offer in all departments. Prices of what there was on sale ruled fairly firm, and we have nothing lower to report either for fat or store things. Store cattle met a very good sale, from £15 15s to £20 being the range for good class heifers, and £11 10s to £14 15s for cows. Grazing cattle may be quoted at about the same. In beef heifers ranged from £16 10s to £20 each (or 11s to 11s 6d per score), and cows from £13 10s to £15 15s (or 10s to 10s 6d). Mutton keeps very short, and prices, as a rule, are well maintained, more especially for the choicer grades. Lamb is practically unaltered in value.

Dublin, Thursday.—A quieter trade for all classes of cattle at a slight reduction all round, though demand was well sustained, and a fair clearance effected. Best suitable sheep for home use more difficult to place, shipping qualities favouring buyers. Lambs, owing to favourable weather, were in good demand, but in order to effect sales, sellers had to accept less money for all grades. Cattle—Live weight (best), 32s to 34s per cwt. Secondary and inferior sorts, 29s to 31s 6d per cwt. Mutton, dead weight, 6d to 8d per lb; extreme, 8¼d per lb.—GANLY, SONS AND CO.

Exeter, Friday.—Very small supply of beasts, as farmers are haymaking. Steers and maiden heifers, 12s; cows, 10s 6d. Hoggs sold freely at 9d, and ewes very bad sale at 6d. Best quality lambs, 10d to 11d; calves, 7d.

Gloucester.—Messrs. Bruton, Knowles, and Co. report their sales as follows:—Cows and calves and store cattle very short supply all round with little demand.

Hereford, Wednesday.—Fair supply of fat cattle, but no alteration in the trade. Best bullock and heifer beef made from 6d to 6½d per lb, some prime animals reaching 6¾d, fat cows 5d to 5½d. Veal a large supply, and went a trifle cheaper at 7½d to 8d; store calves slow. Sheep a moderate supply, and trade fairly firm, wethers realising 8d to 8½d, fat ewes 6d to 7d. Fat lambs ranged from 8½d to 10d. Porks a short supply, and made 5d to 5½d easily.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report a heavy supply of fat cattle, all of which were yard fed. Trade was brisk, and prices firm up to 8s 6d per stone. South Coast buyers were present, and made considerable purchases. Grazing cattle were well represented. Those with condition were in good demand, but young animals were not so much in request, and prices ruled lower. Shorthorn heifers two years old to £12 12s; six home bred steers, 18 months, £10; twelve, £6 to £9 10s; roan North Country steers, 14 months, to £8 10s; yearlings and calves, £7; to £5 5s. At the special sale of dairy stock 55 cows and heifers were offered; those fresh calved or near were in fair demand; cows to £19 10s; heifers with calves to £17 5s; in calf to £15 10s; fat lambs dear to 49s; fat sheep were a good trade and values well maintained; Suffolk Shearlings to 63s 6d; half-breds to 60s; Southdowns, 51s; fat ewes to 60s; lambs and ewes sold freely; Suffolk ewe lambs to 42s 6d; wethers to 37s 6d; half-breds to 35s. Fat swine were short. Heavy pigs were sharply competed for, but medium weights were not so brisk.

Leicester, Saturday.—Moderate supplies of stock after the fair, and buyers were poorly represented. Trade quiet all round. Good milch cows, £18 to £20; secondary, £14 to £15; Shorthorn bullocks, £12 10s. to £16; Welsh cattle, £9 to £12; young stock, £4 10s to £7 10s each. Calves met a dull trade.

Lincoln, Friday.—Fair consignment of horned stock, and a moderate demand. Young beasts £7 to £9; strong ditto, £11 to £13; milch cows, £17 to £21 each.

Lynn, Tuesday.—An average show of fat beasts sold at late rates, from 7s to 7s 9d per stone. A few stores, with very little trade, making from £6 to £12 each. Fat sheep average show, and trade slow, making from 9s to 9s 6d per stone; a few stores met late rates, from 45s to 52s. Store lambs 28s to 33s; fat lambs 30s to 40s each.

Manchester, Friday. — Beef: First class, 5¾d; second class, 4¾d to 5¼d; third class, 3¾d to 4½d. Mutton: First classs, 8½d; second class, 7¾d to 8¼; thirds, 6¼d to 7d. Veal: First class, 7d; second class, 6d to 6¼d; third class, 5d to 5¼d. Lamb: First class, 8½d; second class, 7¾d to 8¼d per lb.

Newcastle, Tuesday.—Cattle trade was a shade heavier, and prices declined 3d for all the better qualities. Prime cattle of medium weight made 8s 3d to 8s 6d; strong heavy heifers, 8s to 8s 3d; strong heavy steers, 8s to 8s 3d; second-class, 7s 9d to 8s; coarse and inferior, 6s 9d to 7s per stone, sinking the offal. Sheep trade was quiet, but prices were the same except for lambs, which were ½d to 1d down, and ewes fell ½d to ½d. Quotations:—Choice young sheep, 9d to 9½d; strong heavy sheep, 8½d to 9d; choice lambs, 9½d to 9¼d; second-class lambs, 8½d to 9d; ewes, 5½d to 6d; rams, 5d to 5½d per lb. Calves were a slightly larger supply, 141 compared with 126. Trade in veal was good at an advance of 1d, prices running from 6d to 7½d per lb.

Newport, Wednesday.—A shorter supply of cattle, sheep, and lambs. A large supply of calves. A good attendance of buyers, and there was a rather better trade all round. Best beef, 6¾d to 7d per lb; seconds, 6½d to 6¾d; cows, 5d to 5½d; best wether mutton, 8¼ to 8¾d; ewes, 7d to 7½d; lamb, 9d to 9½d; calves, 7d to 8½d; porker pigs, 10s 6d to 11s per score.

Norwich, Saturday.—Fat cattle were in small supply, and the quality was poor. Grass-fed beasts made 8s per stone, and other qualities sold well at from 7s to 7s 9d. Veal calves, which were mostly of second quality, sold up to 9s per stone. A very small show of sheep, but the quality was good, all the best making over 9d per lb; other qualities from 7d to 8½d. Fat pigs were of good quality, and trade was brisker, all being sold. Bacon pigs made 6s 3d to 6s 6d; porkers 6s 7d; and sows, 5s 3d per stone. Small show of store cattle, principally of second quality. Trade was slow, prices ranging generally from £6 to £10 10s; one lot, however, made £16 per head. Calves were of better quality, and sold at from 20s to 50s per head. Sheep, ewes, and lambs were of good quality. Shearlings made from 55s to 65s; older animals from 30s to 52s; and lambs 25s to 40s per head. Pigs, which were mostly small, and of fairly good quality, made from 11s to 22s 6d each.

Nottingham, Saturday.—Average show of milking stock, trade for best cows being slow at £17 to £20, while in-calf heifers realised £13 to £17 each. Small supply of store beasts, which sold fairly briskly; strong heifers and steers realised £10 to £14, and younger beasts £6 to £9. Calves made 25s to 45s each.

Preston, Wednesday.—Excellent supplies of cattle, sheep, and calves. Prices for choice animals were well maintained. Scotch heifers made 7d, Irish ditto 7d, local ditto 7d to 7¼d, hogg sheep 9¼d, choice ewes 7¾d, heavy tups and ewes 6d to 7d, choice lambs 10d, secondary ditto 9¼d, calves 7d per lb.

Retford, Saturday.—The value of milch beasts fully maintained the best selling at £18 to £20, and secondary £15 to £17 each. Young stock showed no material change, two year-old steers and heifers making £10 to £12; yearlings, £6 to £8; calves, 35s to 45s each.

Romford, Wednesday.—Average supply of fat beasts; trade slow. Best animals, 4s 6d to 4s 8d; middlings, 4s to 4s 2d per stone. Calves in average supply; trade about the same at 5s 4d to 5s 6d per stone. Sheep in large supply; trade slow. Best small sheep, 5s 8d to 6s; large, 5s 4d to 5s 6d per stone. Ewes in average supply; trade slow, at 4s 2d to 4s 4d per stone. Lambs in average supply; trade slow at 6s 4d to 6s 8d per stone. A few store beasts on offer. Slow demand. Good supply of milch cows. Slow trade. Small supply of pigs. Trade slow. Small porkers, 3s 8d to 4s; large hogs, 2s 8d to 3s per stone.

Sheffield, Tuesday.—More milch beasts than last week, and a brisker trade. The best made £19 to £21 10s; younger beasts, £14 to £16 10s.

Shrewsbury, Tuesday. — Small supply of small stock, with a slow trade. Usual quantity of fat cattle, which met a good demand. Calves, sheep, and pigs usual trade. Quotations:—Beef, 6¾d to 7d per lb; mutton (wether), 9d to 10d per lb; ewes, 7d to 8d per lb; lamb, 9d to 10d per lb; veal, 7¼d to 8d per lb; porket pigs, 10s per score; bacons, 9s 3d to 9s 6d per score.

Stockton, Wednesday.—There was about the usual supply of best cattle, which made 8s 3d to 8s 6d per stone, whilst rougher kinds sold at 6s 6d to 7s per stone. Lambs made 10d to 11d per lb; young sheep, 9d; ewes, 7d; and tups, 6d. The pig trade was dragging, but last week's prices were maintained, nice porker pigs making 7s 3d per stone; mediums, 6s 9d; and sows, 6s.

Thame, Wednesday.—There was again a splendid show of all description of stock, and it was by far the largest market, so far, held this season. The quality of the cattle was excellent, a great many bullocks being pitched, especially some crossbred Herefords from Mr. Frank Chowns, of Tetworth, which made up to £27 apiece. With a very full attendance of buyers, there was a selling trade throughout of all descriptions of beef, practically every lot changing hands at prices most satisfactory to the graziers. Sheep and lambs still continue to sell well. Bacon and pork in request, whilst there is a good demand for veal. Messrs. Bond and Burrows' sale comprised 112 fat beasts, 194 fat sheep, 70 fat and weaning calves, and 113 fat and store pigs. Fat oxen made from £16 to £27; fat heifers, £14 to £22; fat wethers, 45s to 60s; fat ewes, 42s to 54s; fat lambs, 36s to 45s; fat calves, £3 10s to £4 5s; weaning cow calves, 30s to 50s; bull calves, 10s to 42s; bacon hogs, £3 to £5; porkers, 30s to 48s; store pigs, 12s to 26s.

Truro, Wednesday.—Attendance very good, business fairly brisk. Fat bullocks, 56s to 60s per cwt; barreners, 40s to 45s; store bullocks, 40s to 45s; cows and calves, £10 to £14 each; rearing calves, 16s to 38s; wethers, 7d to 7½d per lb; ewes, 5d to 5½d; lambs, 8d to 8½d; pigs, 9s 9d to 42s each; beef, 6d to 8d per lb; mutton, 6d to 8½d; lamb, 9d to 10d; veal, 6d to 8d; pork, 6d to 8½d; pork carcases, 5d to 5½d.

Wolverhampton, Wednesday. — Moderate supply. Fair trade for beasts; trade slow for sheep and lambs. Beef, 5½d to 7d per lb; mutton, 7d to 9d per lb; lamb, 9d to 9½d per lb; veal, 7d to 8d per lb.

FEEDING STUFFS.

Liverpool, Friday.—Fertilisers are as usual quiet. Feeding stuffs are in very limited demand, but there is a moderate inquiry the last few days, and values rule fairly steady.

—H. JONES LANGAR AND CO.

Mark Lane, Monday.—Linseed Cake: The favourable change in the weather of the last few days kept the country busy, consequently the markets are poorly attended, and the demand purely of a retail character, values, however, are well maintained, and in some cases rather more money is asked. Russian are quiet and unchanged. East India seed pures are still quoted at late rates. London made sell rather more freely. Fine seedy Calcuttas are without alteration. Cotton Cake.—Stocks in warehouses are practically exhausted, but a small parcel just arrived can be had on slightly easier terms, while English remain unaltered. Decorticated: London made pures continue to sell freely, although American are little sought after. Rape cakes unchanged. Maize Germ Meal.—With no White American to be had, London manufacturers are able to hold their prices of last week, but little business is passing thereat. Maize gluten meal is very scarce, with ready buyers in any position. Rice Meal.—Values are unchanged, and parce's in warehouse still offer at last week's quotations, while passage lots are also unchanged. Locust Beans.—Scarce and very firm. Dried brewers' grains are rather more inquired after. Nitrate of soda is rather easier:—

POULTRY AND GAME.

Smithfield, Saturday.—Fairly good supply and demand. Goslings, 4s 6d to 5s 6d; country ducks, 2s to 2s 6d; Aylesbury ducks, 2s 6d to 3s; Surrey and Sussex fowls, 3s to 4s 3d; Lincolnshire fowls, 2s to 3s; Essex fowls, 2s to 2s 9d; Irish fowls, 1s 8d to 2s 4d; quails, 1s; feathered pigeons, 8d to 10d; Bordeaux pigeons, 1s to 1s 2d; tame rabbits, 1s 2d to 1s 6d; wild rabbits, 5d to 8d; live hens, 1s 6d to 1s 9d each; Australian rabbits, 6s 6d to 7s 6d per doz.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—An improved demand for a good supply of fruit and vegetables. Quotations for English produce:—Grapes, 8d to 3s; strawberries (Southampton), 9d to 1s 6d per basket; ditto (Kent), 2s to 3s per peck; green figs, 3s to 5s; nectarines, 2s to 12s per dozen; gooseberries, 2s to 3s 6d; black currants, 4s 6d 6s; red ditto, 4s to 5s; cherries, 3s 6d to 7s 6d per half-sieve; peaches, 2s to 12s per dozen; raspberries, 5s to 6s per dozen punnets; tomatoes, 5s to 6s; vegetable marrows, 3s to 5s per dozen; spinach, 1s; beetroots, 1s 6d to 2s per bushel; cucumbers, 4s 6d to 5s 6d per flat; turnips, 2s 6d to 3s; carrots, 2s 6d to 3s 6d; mint, 1s to 1s 6d; parsley, 1s 6d to 2s per dozen bunches; endive, 1s 3d to 1s 6d per dozen; cabbage, 3s to 4s per tally; green peas, 3s to 4s per bag; ditto, 2s to 3s per bushel; onions, 5s to 6s per cwt; spring ditto, 1s to 1s 6d per dozen bunches; mushrooms, 6s to 10s per 12 lb; broad beans, 2s per bushel; horseradish, 10s to 15s per dozen bundles; potatoes, 5s 6d to 7s 6d per cwt.

HOPS.

Worcester, Saturday.—The last three days have been more suitable for hop growing, but have developed any latent vermin which will have to be washed away. There has been rather more enquiry, and some business has resulted at slightly improved prices, but buyers and sellers are reserved at present. Stocks of 1906 hops are now very much reduced. A few yearlings and older hops have also been sold.—Charles Faram and Co.

Canterbury, Saturday.—The bine is backward, but will be helped materially by the warmer weather should it continue. Meanwhile a rather more healthy demand is experienced on the market.

CHEESE.

Glasgow, Wednesday.—Arrivals more liberal, but only a moderate business passing, owing to the holidays, which begin this week end. Prices are unchanged.

Highbridge, Tuesday.—A good attendance of buyers, and all cleared. Best Caerphilly dairies realised up to 48s per cwt; secondary dairies, 45s 6d to 47s; and other dairies 42s to 44s. A few inferior lots failed to reach 40s. Cheddars:—Prime old, from 57s to 59s; truckles, old and ripe, from 68s to 70s; new ditto, 56s 6d to 59s; doubles, 54s to 57s.

Newport, Wednesday.—Eight to nine tons pitched, a good demand, and an average attendance. Quotations:—Caerphillies, 36s to 45s per cwt; fancy dairies, 46s to 48s; Derbies, 56s to 64s; truckles, 58s to 62s; doubles, 58s to 60s.

Mr. Frank Grainger, the well-known farmer and breeder, of Boston Spa, met with a nasty accident whilst at Peterborough Show on Thursday. He was standing behind a horse, which suddenly lashed out and knocked him down. He was attended to by the ambulance nurse and removed to Peterborough Infirmary, where it was found that he had received a compound fracture of the thigh. Happily he is going on as well as can be expected.

Dublin Store Cattle Sales.

Mr. Gavin Low sold over 1,000 head store cattle of the different breeds and ages, &c., on the 4th inst. at 50, Prussia Street, Dublin. The animals included many horned and Polly bullocks in forward condition, as were also Aberdeen-Angus and Hereford crosses, likewise a number of very choice young cattle. There was a fairly numerous attendance of buyers from this side of the Channel and from home counties. Trade throughout the sale ruled comparatively even, but prices were on a lower basis than at Mr. Low's recent sales to the extent of about 3s. per cwt. Forward Shorthorn crosses, two and a half and three years, realised from £12 2s. 6d. to £14; Pollies, same ages, £12 to £14 17s. 6d.; Aberdeen-Angus crosses, £11 15s. to £13 15s; Hereford crosses, £10 10s. to £15 5s.; yearlings from £6 10s. to £9 12s. 6d.

Transactions in Store Stock.

(Reported to the Department of Agriculture and Technical Instruction for Ireland.)

At the Macroom Fair, co Cork, held on July 9, there was a small supply of cattle; demand fair. Calves, 2nd class, £3 10s. to £4; yearlings, 1st class, £7 10s. to £8 5s.; 2nd class, £5 17s. 6d. to £7 2s. 6d.; 3rd class, £4 12s. 6d. to £5 10s.; two-year-olds, 1st class, £10 to £11; 2nd class, £7 15s. to £9 10s.; 3rd class, £6 5s. to £7 7s 6d.; springers, 1st class, £17 5s. to £17 15s.; 2nd class, £12 15s. to £14 10s.; 3rd class, £9 12s. 6d. to £11. Average supply of lambs; fair demand for any in condition. Lambs, 1st class, 27s. 6d. to 30s.; 2nd class, 22s. to 26s.

At O'Brien's Bridge Fair, co. Clare, held on July 8. Small supply of cattle; demand moderate. Springers scarce and selling well. Yearlings, 2nd class, £6 5s. to £7 15s.; two-year-olds, 1st class, £11 to £12 10s.; 2nd class, £8 15s. to £10 12s. 6d.; springers, 1st class, £16 to £17 10s.; 2nd class, £12 to £15 10s. Small sheep fair; demand good. Lambs, 1st class, 31s to 33s 9d; 2nd class, 27s 6d to 30s; one-year-old and over, 2nd class, 42s. to 45s.

The twenty-fifth annual convention of the Incorporated National Association of British and Irish Millers took place at Exeter last week, commencing on Thursday and extending until Friday, a well-arranged programme of both business and pleasure being carried out successfully. Mr. W. R. Mallett, of Exeter, the president of the association, in the course of his presidential address called attention to the chaotic condition of the trade, and the great decrease in the production of wheat in England, combined with the great increase in the consumption, and in the importation of foreign wheat, and he moved the following resolution:—"That concerted action to improve the trade be taken, and that national uniformity of flour sales contracts be attained as a first step thereto."

At the half-yearly meeting of the Eastern Counties Farmers' Co-operative Association held on Thursday at Ipswich, Mr. E. J. Cheney, chairman of the committee, reported that the Association's prospects had never looked more rosy, and it was the old story of unprecedented progress and success which he had to report to them. On December 31 last the membership was 452, the acreage concerned 143,900, the nominal capital £3,598 5s., and the sales for the twelve months £126,996 1s. To-day the membership was over 600, the nominal capital £4,600, the acreage concerned 184,000, and the sales for the six months ending 30th of last month came to over £84,500, or at the rate of approximately £170,000 a year. In the corresponding six months last year they amounted to £58,400, so that their trade showed an increase of some 44 per cent. over the like period of last year. The pig sales for the past six months amounted to some £31,350, and 112,768 had been sold in the first four months through the newly established egg depôt. They were still a long way off the time when they could ensure the regularity of supply which was absolutely essential if the producer and consumer were to be brought into direct touch with one another. That such a time would come, there was no possibility of doubt.

The prospectus of the Aberdeen and North of Scotland College of Agriculture for Session 1907-8, which will commence October 16 and last until March 18, has now been issued, and shows that a most comprehensive scheme of agricultural education is carried on at this college. The courses of study are arranged to enable students to gain (*a*) the degree of Bachelor of Science in Agriculture, (*b*) the University Diploma in Agriculture, and (*c*) the National Diploma in Agriculture. Full particulars of the courses, together with conditions of entry, fees, &c., are given in the prospectus, copies of which can be had on application to the secretary, Mr. G. Hendry, County Buildings, Aberdeen.

Printed and Published by the Proprietors, at the Offices, 8, Wellington Street, Strand, London W.C.—July 15, 1907

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The past five or six days have been all that the cereals could require, and the still, close air of days like Friday and Saturday was especially favourable to the deposit of pollen from the flowering plant upon the stigma which receives the fertilising dust. The growth of the straw is about completed, but a fortnight of steady sunshine is needed to harden the grain within the ear. There are a few farmers in East Kent and in Sussex under the Downs who hope to get a wheat field or so in sheaf before the Bank Holiday, but nearly all the harvest engagements which are being made in the home counties are for the week beginning the Monday from the Bank Holiday, i.e., August 12. Most East Anglian farms will begin wheat harvest on August 19, but north of the Humber matters are more backward. The few fields of rye in Essex and elsewhere will be ripe in a fortnight from now, and early sown winter oats may also be cut before July is out. The French wheat harvest is now in full swing all along the Loire, and in Germany it is in progress on both sides of the Rhine from Cologne to the Swiss frontier. In France hot and fine weather has prevailed since the 12th, but Germany has had a wonderful rainfall, seven inches in as many days; the great change in temperature west and north of Germany has apparently induced this violent precipitation of moisture. The crops have been much laid. It is clear that neither France nor Germany this year will have as much wheat as they had in 1906, but the extent of the diminution is not yet at all easily guessable.

In Hungary the harvest is nearly over, the estimated yield of wheat being as follows:—

1907	14,650,000 qr.
1906	23,950,000 ,,

These figures do not include Austria, the Tyrol, Bohemia, Croatia, or Bosnia, to which five regions fully 7,000,000 qr. may be assigned bringing up the total production under the sceptre of Francis Joseph to 21,650,000 qr.

The Roumanian wheat crop turns out to be gravely deficient, a fact which, however, had been foreseen since June. The estimated result is:—

1907	6,500,000 qr.
1906	13,750,000 ,,
Seven years' average	9,000,000 ,,

The Roumanian home wants do not exceed 4,000,000 qr., but the great surplus of 1906 will make the export surplus of the next twelve leading months appear very small by comparison.

A long and confused official telegram from Russia adds practically nothing to our knowledge of the wheat crop there, but the exportable surplus is put by trade estimates at 10,000,000 qr., against 12,000,000 qr. last year, 19,000,000 qr. in the preceding season, and 22,000,000 qr. in the bumper year 1904-5. The average surplus of Russia is put at 16,000,000 qr. for the last ten years.

The markets in England are naturally inclined to go back a bit under the genial sunshine, but the situation is one of considerable intrinsic firmness for wheat, and also for barley. The price of heavy oats should keep up, but Russia and Argentina are competing for the command of the market for 304 lb. qualities. Maize, with 1,110,000 qr. on passage, is naturally a little hard to maintain in price.

The wheat gradients are now small, as no markets report any sellers under 30s. per qr.:—

Mark Lane	33s.	10d. per qr.
Bridlington	30s.	10d. ,,
Range	3s.	0d. ,,

The barley gradients are even slighter than those of wheat:—

Reading	26s.	0d. per qr.
Salisbury	24s.	9d. ,,
Range	1s.	3d. per qr.

Oats continue to sell at remunerative prices in all parts of England:—

Mark Lane	25s.	1d. per qr.
Peterborough	20s.	5d. ,,
Range	1s.	0d. ,,

No rye average is published, but 28s. is about the mean of present values.

The sales of British wheat at the statute markets since harvest have been moderate, and if the Board of Agriculture estimate of the crop yield was right the surplus in farmers' hands must be larger than usual. There are, however, few farmers who admit any such surplus.

This season ... 2,595,000 qr., at 27s. 1d. per qr.
Last ,, ... 2,873,000 qr., at 28s. 8d. ,,

The sales of English barley have been liberal, and bear out the official estimate.

This season ... 3,365,000 qr. at 24s. 3d. per qr.
Last ,, ... 3,199,000 qr. at 24s. 4d. ,,

The sales of oats have much exceeded the average.

This season ..... 1,163,000 qr. at 18s. 1d. per qr.
Last ,, ... 905,000 ,, 18s. 5d. ,,

The imports of the United Kingdom last week were as follows:—

Wheat, 592,000 qr.: much above the average.
Flour, 90,100 sks.: less than usual.
Barley, 61,000 qr.: a very small supply.
Oats, 108,000 qr.: about an average.
Maize, 249,000 qr.: 25 per cent. above the mean.

The total imports of breadstuffs since September 1 have been:—

Wheat	18,797,000 qr.
Flour	4,031,000 ,,
Total	22,828,000 qr.

The supply of wheat on passage is about an average.

Californian	260,000 qr.
American	220,000 ,,
Russian	295,000 ,,
Indian	550,000 ,,
Argentine	540,000 ,,
Australasian	700,000 ,,
Various	30,000 ,,
Total	2,535,000 qr.

The quantity of flour on passage is only 162,000 sacks of spring corn, the chief expectations are as follows:—

	Maize.	Barley.	Oats.
	qrs.	qrs.	qrs.
From Russia	200,000	20,000	30,000
,, Roumania	215,000	25,000	10,000
,, America	300,000	40,000	5,000
,, Argentina	370,000	—	40,000
,, Various countries	30,000	30,000	12,000
	1,155,000	115,000	97,000

The expectations of maize are now considerable, and 25s. is a magnet powerful to draw supply from all quarters of the globe.

Other supplies on passage include 350,000 qr. of linseed, 49,000 qr. of rapeseed, 50,000 tons of cottonseed, and 62,000 tons of rice.

The American (New York) cable is as follows:—"Wheat, red winter, 34s. 3d. per qr.; spring, 38s. 7d. per qr.; flour, 21s. 9d. per sack; maize, 22s. 8d. per qr. Freights: London, 1s. 4d. per qr.; Liverpool, 1s. per qr." Paris on Saturday closed at 46s. per qr. for wheat, and 34s. 9d. per sack for flour, while Berlin quoted 43s. 10d. per qr. for wheat and 30s. 8d. per qr. for maize.

The shipments of North America last week were not at all heavy of any article, The items were:—wheat, 131,000 qr.; barley, 7,000 qr.; oats, 15,000 qr.; maize, 132,000 qr.; and flour, 95,000 sks.

The shipments of South America last week were large of maize but moderate of other articles, actual totals being:—Wheat, 129,000 qr.; maize, 345,000 qr.; linseed, 65,000 qr.; and oats, 42,000 qr.

Russia shipped largely of maize, otherwise this region did not do anything special:—Wheat, 135,000 qr.; barley, 190,000 qr.; oats, 22,000 qr.; and maize, 200,000 qr. Roumanian shipments last week were 125,000 qr. wheat, 34,000 qr. of barley, 10,000 qr. of oats, and 400,000 qr. of maize.

India was a free shipper, 162,000 qr. of wheat, 102,000 qr. of linseed, and 19,000 qr. of rapeseed being exported.

Australia shipped 17,000 qr. of wheat, New Zealand 5,000 qr. of oats, and Persia 10,000 qr. of barley. No shipments of cereals were by Egypt, Asia Minor, Chili, or Japan.

THE BALTIC.

Wheat cargoes are well held considering how much the weather is against the trade. Sales include Californian at 36s. 6d. per 500 lb., Blue Stem at 36s. 3d. per 500 lb., La Plata at 34s. 9d. per 480 lb., South Australian at 35s 6d per 480 lb., Black Sea at 34s. 9d. per 492 lb., White Karachi at 35s. 3d. per 492 lb., and Red Karachi at 34s. 6d. per 492 lb.

Maize cargoes have been a little difficult to sell at old prices, and on Saturday a certain inclination to meet buyers' views resulted in 23s. 3d. being accepted for Yellow La Plata, 24s. 3d. for Novorossisk, and 23s. for American, all per 480 lb.

Barley cargoes are scarce. A solitary one from Karachi has made 24s. per 400 lb. For Oct. shipment more moderate prices prevail, 21s. 6d. being asked by Russian shippers, 21s. 3d. offered. Other cargo sales of the week included Manitoba oats at 20s. per 320 lb.; Bombay poppyseed at 56s. 3d. per 377 lb.; Calcutta linseed at 42s 9d. per 410 lb.; Panderma beans at 32s. 6d. per 480 lb; and White Calcutta peas at 33s. 9d. per 504 lb.

The London Corn Trade Association Executive has made up the following standards for April shipments, viz.:—

Wheat.—Choice White Kurrachee, Soft Red Kurrachee, Choice White Bombay.
Lentils.—Bombay.
Pease.—White Calcutta.
Barley.—Kurrachee.

The East Indian wheat rejections of the same association are as follows (new and old terms), viz.:—

Choice White Kurrachee, 35s. 6d., new terms, 4 per cent. barley; old terms, 34s. 9d.; soft Red Kurrachee, 35s., new terms 4 per cent. barley; old terms, 34s.

N.B.—The committee has decided to quote rejection prices for "old terms" up to and including July shipments, but not later.

The arrivals of grain and seed-laden vessels at ports-of-call for the week were 6 wheat (1 Buenos Aires, 1 Concepcion, 1 Port Wakefield, and 3 Sydney); 1 maize (Rosario); 1 linseed (Buenos Ayres); total, 8.

The sailings of grain and seed-laden vessels from ports-of-call for week were 9 wheat (3 Antwerp, 1 Belfast, 1 Cardiff, 1 Cork, 2 Dunkirk, and 1 North Shields); 2 maize (1 Southampton and 1 Tralee); total, 11.

Since January 1, 1907, the total arrivals have been 164 wheat, 1 flour and wheat, 3 barley and wheat, 3 barley, 6 maize and 10 linseed.—Total, 187.

Last year during the same time the arrivals were 166 wheat, 2 barley and wheat, 1 barley, 3 maize, 1 locust beans, and 21 linseed.—Total, 194.

LONDON HAY TRADE.

Saturday.—The trade during the past week has presented a very firm appearance, with farmers taking every advantage of the spell of fine weather to secure every bit of hay possible. The markets have been almost bare of supplies, and in consequence there has been keen competition amongst buyers. Salesmen have been paying fancy prices for whatever has been on offer, contracts having to be kept supplied whatever the value of the stuff may be. In some instances a rise of 5s per ton has been easily obtainable, the trade, however, do not at present seem to be feeling much benefit of the high values, as it is almost impossible to do much fresh business with customers at the present increased rates.

A fair proportion of the arrivals are now consisting of new stuffs, and for new hay in good condition about 60s to 65s per ton is easily obtainable, new mixture making about 70s to 77s 6d, and new clover 80s to 87s 6d per ton. Straw is also coming along much slower, and finds a much better sale at bettter prices. In the foreign market shipments have been very short, and importers have been able to effect sales at slightly better figures.

Prices ruling are about as follow:—English best meadow hay, 85s to 90s per ton; good meadow hay, 75s to 82s 6d per ton; plain hays, 70s per ton; best clovers, 92s 6d to 100s per ton; good clovers, 85s to 90s per ton; inferior clovers, 80s to 82s per ton; best mixtures, 95s to 97s 6d per ton; good mixtures, 85s to 92s 6d per ton; plain mixtures, 80s per ton; seconds hays, clovers, and mixtures, 60s to 67s 6d per ton; wheat straw, 26s to 28s per load; oat straw, 28s per load; barley straw, 28s per load, all ex rail London. Foreign: Canadian mixture, none; first quality Dutch hay, 67s 6d per ton; second quality Dutch hay, 62s 6d per ton; French and Dutch clovers, 82s 6d to 85s per ton. These prices are by barge delivered alongside a London Thames wharf.

Seven Years Grain Averages.

(OFFICIAL.)

Wheat	28s. 10d. per 480 lb.
Barley	25s. 4d. per 400 lb.
Oats	18s. 11d. per 312 lb.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English steady, quiet at about late rates; supplies limited. Foreign held for Monday's closing prices, but demand very limited; No. 1 Northern ex ship held at 37s, No. 2 at 36s; La Plata landed at 35s 6d, 36s 6d; South Russian ex ship at 33s 6d, 37s, landed at 34s, 37s; Australian at 36s 6d to 37s. Flour steady quiet; Hungarian held at 35s; Minnesota patents at 27s, 28s; Australian at 24s, 24s 6d. Maize dull, easier tendency; Odessa landed quoted at 24s; Mixed American at 24s 3d, 24s 6d. Barley steady, quiet, supplies very small; Azoff-Black Sea landed held at 25s, 25 6d; Persian ex ship at 23s, landed at 23s 3d, 23s 6d. Oats dull, easier tendency; La Plata 18s 6d asked, 18s 3d would buy; 38 lb South Russian held at 18s 3d to 18s 6d as per sample.

Mark Lane, Friday.—Wheat: English steady, quiet, supplies very limited; whites quoted at 35s 6d to 37s 6d; reds at 35s to 37s. Foreign steadily held at about late rates, but inactive; No. 1 Northern Manitoba, ex ship, quoted at 36s 9d to 37s; No. 2 at 36s to 36s 3d; choice white Karachi at 34s 6d; red Karachi at 34s; Australian, landed, at 36s 3d to 36s 6d; La Plata at 35s 6d to 36s 6d. Flour slow, unchanged; Kansas patents held at 25s to 26s 6d; Iron Dukes at 22s to 22s 6d. Maize dull, and in small request; mixed American quoted at 24s to 24s 6d; Odessa at 23s 9d to 24s 3d; Galatz-Foxanian, 23s to 23s 6d. Barley firm, quiet; Azoff-Black Sea quoted at 25s to 25s 6d; Persian at 22s 9d to 23s. Oats dull, easier tendency; La Plata quoted at 18s 6d; South Russians (38 lb) at 18s 3d to 18s 6d.

COUNTRY.

Ashford, Tuesday.—Trade very quiet, and very little wheat offered by farmers, who are busy in hayfields. The general feeling was firm, and late quotations were maintained, wheats making 34s to 37s; English barley, 28s to 29s; foreign grinding barley, 26s to 27s; oats, black, 21s to 23s; ditto, 22s to 25s; grey peas, 32s to 33s; maize, 25s to 27s; Mazagan beans, 30s to 31s; tick beans, 33s to 34s per qr. Flour—White, 32s; seconds, 29s; scaling, 28s per sack

Banbury, Thursday.—Wheat, white, 32s 6d to 33s 6d per qr; red 32s to 33s 6d per qr; barley, 27s to 30s per qr; beans, 31s to 32s per qr; oats, 20s to 25s per qr; peas, 29s to 33s per qr.

Berwick, Saturday.—There was a large attendance, with few samples of grain. Wheat, 30s to 31s 6d; oats, 26s to 27s.

Birmingham, Thursday. — The attendance was a very thin one, and the amount of trade done was very limited. Foreign wheats were 6d easier, but buyers did not respond. English wheats were very scarce, and realised from 12s 6d to 13s per 186lb delivered. English oats and beans were unchanged in value, but were not much enquired for. Bessarabian maize was on offer at 24s 6d per 480 lb at Sharpness. Galatz-Foxanian at from 23s 6d to 23s 9d per qr at Bristol. Grinding barley was unaltered at from 25s 6d to 26s per 400 lb at Sharpness.

Brighton, Thursday.—Slow trade and small attendances. Prices as last week. Barley, 28s to 32s; grinding ditto, 26s to 27s; oats, English, 20s to 23s; peas, 30s to 31s; beans, 32s to 34s.

Bury St. Edmunds, Wednesday.—A very small market and little doing. Wheats unaltered at 34s to 35s. Feeding stuffs slow at late rates.

Cambridge, Saturday. — The wheat trade during the week has been steady with values fully maintained. With splendid weather, farmers have now completed their hay harvest. In many places the crops have been very good. At this market there were a few more samples of wheat offering, which were a turn in sellers' favour. Wheat 35s per 504 lb into the mill. Spring corn dull.

Canterbury, Saturday.—Trade for the small supplies remaining continues very firm. English wheat, scaling 64 lb to the bushel, has been selling at 37s delivered in, and English barley is now quoted from 28s to 29s. Oats move off quietly at from 21s to 26s, and tick beans are making from 32s to 34s 6d, 67 lb lots being bid for 36s; Mazagans, 30s to 32s 6d per qr; and grey peas, 32s to 33s per qr.

Carlisle, Saturday.—Very small supply of oats in our market to-day. Good demand at top prices; 24s to 24 6d per 336 lb.—THOMAS [illegible].

Chester, Saturday.—There was a quiet market with a small attendance of farmers. A generally increasing demand is being experienced, due to the falling off in the condition of pastures. Prices for English grain were fully maintained. Wheat and barley were exceedingly scarce. Maize was 3d per sack dearer. Quotations: Red and white wheat, 4s 10d to 5s per 75 lb; new grinding barley, 3s 9d to 4s per 60 lb; old beans, 6s to 6s 6d, and new, 5s 6d to 5s 9d per 80 lb; old oats, 3s 2d to 3s 6d, and new, 2s 11d to 3s 2d per 46 lb; old Indian corn, 13s 6d to 13s 9d, and new, 12s 9d to 13s per 240 lb; round corn, 13s 3d to 13s 9d.

Chichester, Wednesday. — Fair attendance and slow trade. New white wheat, 35s to 35s 6d; new red ditto, 35s to 35s 6d; grinding barley, 25s 9d; oats, English, 18s to 23s; beans, 32s to 33s; maize, 24s to 25s; flour, 24s to 28s.

Colchester, Saturday.—Wheat and oats quiet, with small supply.—COLIN TAYLOR, KING AND CO., LTD.

Coventry, Friday.—Very few farmers at market, and the show of grain was practically nil. There was a general firmness of prices, with good demand for spring corn. Quotations: Wheat, 11s to 12s 6d per 186 lb; barley, 28s to 34s per 448 lb; peas, 12s to 14s; beans, 12s to 13s 6d per 196 lb; oats, 23s 6d to 26s 6d per 352 lb.

Derby, Friday.—Wheat in small supply, and sales were effected at rather reduced rates. Spring corn unaltered. Quotations: Wheat, new white, 36s to 37s; new red, 33s to 35s; grinding barley, 23s to 24s; beans, 34s to 36s; oats, 24s to 25s.

Devizes, Thursday.—The trade for wheat has again been firmly maintained during the week, and the full prices of last Thursday are easily realised. Other corn unchanged. Best wheat, 17s to 18s; secondary, 16s to 16s 6d; malting barley, 24s to 30s; feeding, 22s to 24s; old oats, 20s to 24s; new beans, 15s to 16s 6d; fine flour, 27s to 30s; extra fine, 32s to 36s.

Doncaster, Saturday.—The market was thinly attended. Little English wheat offered, and hardly sufficient to test prices, but still full rates of last week were made, English being 12s 6d per load. Foreign was also firm, and Indian spot wheat was 6d dearer owing to scarcity. Oats and beans also firm at a moderate demand.

Dorchester, Saturday.—The corn market was again very thinly attended as a result of farmers being still busily engaged with their hay, which is being made under exceptionally favourable conditions—far different to what agriculturists had made up their minds for. Home-grown wheat seems to be practically exhausted, as there was none offering to-day, whilst foreign was firmly held at late values. Both barley and oats, from shortness of supplies, commanded outside values—in fact, more money had in some cases to be paid for the former. Maize was well held for full prices. With keep everywhere plentiful, there was a falling off in the demand for feeding stuffs, values of which, however, remained practically unchanged.

Dublin, Friday.—Foreign wheat steady at late rates. Irish wheat quiet. Oats firm. Whites, 12s 6d to 13s 6d; blacks 12s to 13s.

Exeter, Friday.—Trade rather slow. Scarcely any English wheat, extreme prices being wanted; foreign, shade easier. Barley firm; maize, 6d cheaper; oats, unchanged; flour, steady. English wheat, 4s 3d to 4s 6d; superfine flour, 25s to 27s 6d; fine 24s to 26s.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange to-day, and a holiday feeling still prevails. Wheat quiet and unchanged on the week. Flour on spot not quotably altered in price. Spot stuff more difficult to sell, owing to easier quotations from the other side. Other articles of the trade quiet and unchanged.—GIBSON AND CLARK.

Glasgow, Friday. — Wheat practically unchanged. Flour steady, with only retail business passing. Corn 1½d per 280 lb cheaper. Maize in good supply at 13s 10½d to 14s 1½d per boll. Other articles of the trade nominally unchanged.

Gloucester, Saturday. — Farmers are haymaking, and English wheat too scarce to test values. Foreign wheat neglected, occasionally 3d lower; Plates, 35s to 37s; Russians, 32s to 35s 6d; Manitobas, 37s 3d to 37s 9d. Plate maize, 3d down, 24s 9d; flat unchanged, 24s 3d; Bessarabian, 24s 6d. Barley unchanged, 26s. Oats—Black, 20s 6d to 21s; white, 22s to 23s.

Grantham, Saturday.—Owing to the hay harvest, the attendance was small, and very little corn was offered. Wheat was worth from 34s to 35s; oats made 22s to 23s; and beans 32s to 33s per qr.

Hereford, Wednesday.—No samples of English grain on offer. Foreign wheats were from 3d to 6d lower. English oats were steady, and maize was slightly dearer. Wholesale quotations:—Wheat, 3s 10d to 4s per 62 lb; barley, 3s 6d to 4s per 56 lb; oats, 2s 6d to 2s 10d per 40 lb; beans, 3s 10d to 4s per 65½ lb; maize, 3s 3d to 3s 6d per 60 lb.

Ipswich, Tuesday.—Very little wheat on offer; trade firm and fully as dear. Reds, 34s to 34s 6d; whites, T, 34sper 503 lb. Grinding barley firm and rather dearer. Oats quiet; maize steady; beans 3d per qr dearer.

Leeds, Tuesday.—The change to fine hot weather has its usual effect on the trade, and for the moment the damage sustained by the crops seems forgotten, notwithstanding the small shipments and reduced quantity on passage. With a limited consumptive demand foreign wheat of all descriptions is 3d to 6d lower on the week, English from scarcity maintaining full prices. Maize and other feeding stuffs unchanged.—DUNNS AND CO.

Leeds, Friday.—With better home harvest prospects and the American markets steadier, millers were again restricting orders to present requirements, both English and foreign wheats closing at Tuesday's prices, with an easier tendency. Flour was in fair demand, mostly for medium qualities, ranging from 24s to 28s. Maize was steady, choice Plate making 25s, and Odessa 24s. Foreign oats were rather dearer. Beans, peas, and barley were unchanged.

Leicester, Saturday.—Small attendance, with restricted supplies of home-grown wheats, which sold slowly at steady rates. Red wheats, 34s to 36s; white wheats, 36s to 37s per 36 stones; grinding barley steady; beans firm; fine oats, 24s to 25s per 24 stones.

Lincoln, Friday.—Small attendance, farmers being busy in the hayfields. English wheat in small supply, not sufficient to test values coming forward; foreign wheat firm. Trade in feeding stuffs quiet and unaltered.

Manchester, Thursday.—English wheat quiet and unchanged; foreign very quiet, at about 1d per cental lower on last week. Flour unchanged. Indian corn: Prime sorts in better demand; mixed American, ½d per cental higher. Oats very firm at late rates. Barley dull and unchsnged. Beans and peas steady. Bran and feeding stuffs easier.

Newark, Wednesday. — Small attendance; farmers busy with hay. Wheat dearer; other prices firm. Quotations: Wheat, red and white, 34s 6d to 35s 6d; barley, malting, 28s to 30s; grinding, 25s 6d to 27s; oats, white, 22s 6d to 23s 6d; black, 22s to 23s; beans, 33s to 34s per qr.

Newcastle-on-Tyne, Saturday. — A slow demand for wheat at our to-day's market at last Saturday's quotations. Maize remains steady at late rates. Beans and peas firm, and in the favour of sellers. Oats remain unchanged in values; the demand, however, was slow.—JOSEPH POLLARD AND CO.

Newport, Wednesday.—Oats a trifle dearer. Maize and wheat unchanged. Flour, 26s 6d per sack. Sharps very firm, at £6 per ton, and bran £4 10s.

Norwich, Saturday.—The wheat supply is small, and prices are slightly higher, 35s 6d being made in one or two instances, but 35s is the general value. There is a quiet demand in the feeding stuff trade; prices are steady; linseed and cotton cakes are firm, and there is a very short supply. English oats at 22s to 22s 6d per qr.

Nottingham, Saturday.—English wheat about cleared; foreign held for 3d to 6d advance. Grinding barley firm. Oats and beans but few offering, and full rates maintained.—ROBT. HUBBLE.

Oxford, Saturday.—The attendance has been poor, and business was slow, wheat being quoted at 33s 6d to 34s on rail.

Preston, Saturday. — The change in the weather, which has been so long desired, has caused an easier tendency in values of wheat. Crops do not seem to have suffered as much as was feared from the continuous wet and cold weather. All kinds of cereals have been in demand during the week at last week's prices. To-day's market was sparsely attended, farmers being busy in the hayfields. Quotations: Wheat, white, new, per windle of 220 lb, 13s 9d to 15s; ditto red, 13s 6d to 14s; oats, old, per bushel, 3s 3d to 3s 4d; beans, per windle of 220 lb, 16s 6d to 17s.

Reading, Saturday.—There was a fair attendance, but hardly an average trade at the following prices:—Wheat, 33s to 35s; oats, 20s to 23s; barley, 25s to 29s; beans, 31s to 33s; peas, 30s to 32s; tares, 5s per bushel; best old hay, 90s per ton.

Retford, Saturday.—Thin attendance. Small supply and business limited. Wheat scarce and considerably dearer at 34s to 35s per qr. Grain for feeding purposes kept well up to the mark. Grinding barley quoted at 27s; maize, 26s to 27s; good white oats fully 24s; secondary, 22s.; and black oats, 21s to 23s.

Ripon, Thursday.—Owing to farmers being busy haymaking the market was almost deserted. Wheat, 32s to 34s; wheat, foreign, 36s to 40s 6d; barley, grinding, 25s to 26s; oats, 24s to 25s; maize, round, 26s to 27s; ditto, flat, 26s to 27s per qr.

Sheffield, Tuesday.—The reaction in prices of wheat has not developed further, and quotations are firm at last week's rates, with a slight upward tendency. Plate maize 3d per qr easier, but other sorts continue unchanged. Quotations:—Wheat, white, new, 33s 6d to 34s 6d; ditto red, new, 34s to 35s per 504 lb; oats, black, 22s 6d to 23s; ditto white, 23s 6d to 24s per 336 lb; peas, grind-

ing, 33s 6d to 34s; ditto blue, 75s to 90s per 504 lb; beans, English, new, 35s 3d to 35s 6d per 532 lb; barley, grinding, 26s to 26s 6d; ditto malting, 28s to 32s per 448 lb; Indian corn, small, 25s 9d to 26s; ditto Plate, 25s 6d to 25s 9d; ditto flat, 26s to 27s per 480 lb.

Shrewsbury, Saturday.—New wheat, 14s 3d to 14s 9d per 225 lb; new oats, 14s to 15s per 225 lb; peas, 15s 6d to 16s per 225 lb; beans, 14s 6d to 15s per 240 lb.

Stamford, Friday.—Fine weather for hay harvesting caused a small attendance of farmers. Wheats 34s 6d, oats 22s 6d to 23s, beans up to 32s 6d per qr.

Stockton, Wednesday.—Owing to haymaking there was no local wheat on offer. With finer weather the foreign wheat market had an easier tendency, and prices were 6d lower on the week. Oats steady, and maize 3d dearer on the week.

Sunderland, Saturday.—Little grain offering. Wheat steady and unchanged in value. Barley and oats quiet. Arrivals nil. — E. and F. Richardson.

Tunbridge Wells, Friday. — Quotations: White wheat, 32s to 33s; red ditto, 31s to 32s; barley, 26s to 32s; grinding ditto, 23s to 25s; oats, English, 22s to 24s; rye, 24s to 25s; peas, 32s to 37s; beans, 32s to 37s; tares, 42s to 48s; maize, 22s 6d to 24s.

Warwick, Saturday. — There was a very meagre attendance at this market. No English wheat was on offer. Feeding stuffs very slow. Prices very much the same as last week.

Winchester, Saturday.—English and foreign wheat quiet, but unchanged. Barley and oats unaltered. Round maize 6d easier. Flour steady at late rates.—Fear, Colebrook and Co., Ltd.

Wisbech, Saturday.—Small attendance at market. Little grain offering. Prices unchanged. Red wheat, 34s per 500 lb; oats 22s 6d to 23s per 336 lb; beans, 32s to 34s per 532 lb.—James Fletcher.

Worksop, Wednesday. — Small attendance. Trade slow. White wheat, 33s to 34s; red wheat, 32s 6d to 33s 6d; barley, 27s to 29s; white oats, 22s 6d to 24s; black oats, 21s 6d to 23s; maize, 26s to 27s 6d; beans, 34s to 36s per qr.

Yeovil, Friday.—Trade continues firm, with not much business passing. English wheat, best, 17s to 18s; secondary, 16s to 16s 6d; foreign, 3d to 6d per qr lower. Grinding barley (foreign), 25s to 26s 6d; feeding (English), 26s to 27s; malting, 31s to 32s; brewing, 27s 6d to 29s 6d. Oats, Irish black, 19s to 20s 3d; white, 21s to 21s 6d; English black, 22s 6d to 23s; white, 23s 6d to 24s; spring beans, 31s to 32s 6d; winter, 32s to 33s; rye, 27s 6d to 28s 6d; winter tares, 39s to 42s 6d; spring, 43s to 45s; round maize, 23s 3d to 24s; flat, 24s 3d. Flour, meals, and offals selling well at last week's rates.

York, Saturday.—Very small attendance, and little wheat was on offer, which made about late rates. Fine white quoted 33s 6d to 34s 6d, and mixed 32s 6d to 33s 6d per qr of 36 stones; feeding barley, 26s to 28s per qr of 32 stones. Oats firm at late rates. White Tartary made 21s to 22s, black, 22s to 23s; white Garton, 23s to 24s per qr of 24 stones; beans, 32s to 33s per qr of 36 stones.

FOREIGN.

Hamburg, Saturday.—Weather slightly improved, but a constant summer temperature is still wanting and, considering the local disasters in many districts of Germany caused by floods and hailstorms, a satisfactory result of the harvest cannot be expected. Offers of wheat being scarce, full prices must be granted. 79/80 ko. River Plate is held at 33s to 33s 9d.; 72/73 Ko Danubian at 30s 6d to 31s; Walla Walla and Australian at 33s to 34s per 480 lb. ex ship; 60 lb Saal wheat, September-October delivery, 32s to 33s. per 504 lb f.o.b. There is a little better demand for rye near at hand; 9 10/15 South Russian is selling at 31s to 31s 3d; No. 2 Northern American is held at 32 per 480 lb ex ship here. The crop of barley in Northern Germany is not likely to turn out the same good results as last year, and it remains to be seen what effect the late storms had on the crops in other parts of Germany and Austria-Hungary. Grinding barley firm, 60/61 ko South Russian on the spot is selling at 25s 3d; parcels afloat are held at 24s; Augusd, 20s 6d to 20s 9d; September-October, 20s; Morocco, 23s 3d to 24s per 400 lb, c.i.f. Hamburg. Maize quiet; Danubian and Odessa, afloat, 22s 3d; River Plate, 23s to 23 3d; kiln-dried mixed American, 23s 9d to 24s per 480 lb c.i.f., Hamburg.—John Tatlock.

Hamburg, Saturday.—Barley Report:—At last there is an improvement in the weather, and we have had little rain this week, but the temperature is ungenial and cool—no real summer weather. We receive continually satisfactory reports from our principal barley-growing districts, and also from Austria, principally Bohemia, they are quite cheerful, whilst from Hungary the reports are somewhat conflicting however. I have received the first samples of new mercantile barley, and these show really nice quality, tender in colour and good in corn, but Chevaliers will not be ready before a fortnight.—F. M. Th. Duhne.

CORN STATISTICS

Weekly London Averages.

An account of the Quantities and Prices of British Corn bought on the London Market and in the area within five miles from the Royal Exchange during the week ending Tuesday, July 16, 1907:—

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, Monday, 3 p.m.

The holders of English wheat made no concessions to-day, despite the fine weather having materially advanced crop propects. The small reserves of the old crop will all be wanted, and firm holding is fully justified. Foreign wheat was a little weak for Argentine, but quite firm, if dull, for most kinds. Maize was sometimes 3d. cheaper, but that was the extent of the decline. Foreign barley was hardly on offer, and English was practically off the market.

Oats were 3d. lower for all but fine heavy sorts, which by reason of their scarcity were quoted as dear as ever. Beans were dull, but steady. Indian peas rather favoured buyers. Factors are already beginning to take their holidays so as to be back in town by the time that new crop samples begin to arrive. Nothing, however, of any consequence is expected for a clear month from now.

CLOSE OF THE MARKET.

THE MARKET CLOSED VERY QUIETLY, BUT WITH ABSOLUTELY NO DISCOURAGEMENT AMONG THE LEADING HOLDERS.

THE FLOUR TRADE.

MARK LANE, Monday, 3 p.m.

The trade in London flour to-day was mainly of a cash description, as the prices were favourable to cash buyers, but unduly high for credit and delivery. Country flour was sometimes 6d cheaper on the week. Hungarian flour was not quite so dear as formerly, though very high prices are still asked for the favourite brands.

The holders of American flour showed rather more willingness to meet the ideas of bakers, but prices were not, as a rule, altered in quoted values and market circulars sent out by holders. The sale of pollard, bran, and middlings was decidedly good for a July market, and full prices were made; sometimes, indeed, exceeded, for the actual stock in hand is small, and where early delivery was requisite preferential prices had to be paid.

THE BALTIC.

Monday, 1 p.m.

State of Trade.

The market is against sellers of barley and oat cargoes for autumn shipment, and it is definitely lower for cargoes both of linseed and rapeseed. On the other hand, it is dearer for cottonseed and poppyseed cargoes, and is steady both for wheat and for maize.

Business Done.

Wheat.—Rosario 34s 3d per 480 lb, on passage; Manitoba, 36s per 480 lb, August shipment; White Karachi, 35s per 492 lb, on passage; Black Sea, 34s per 492 lb, on passage.

Maize.—American, 23s per 480 lb, on passage; Galatz, 24s per 480 lb, August shipment; Argentine, 23s 6d per 480 lb, August shipment; Odessa, 23s 9d per 480 lb, on passage.

Barley.—Azoff, 21s 3d per 400 lb, October shipment; Karachi, 23s 9d per 400 lb, August shipment; Persian, 21s 3d per 400 lb, August shipment.

Oats.—Archangel, 17s 6d per 304 lb, July shipment; Manitoba, 20s 3d per 320 lb, on passage; Manitoba, 20s per 320 lb, prompt shipment; Manitoba, 19s 9d per 320 lb, September shipment; Roumanian, 15s 9d per 304 lb, September shipment; Roumanian, 15s 6d per 304 lb, October shipment; Baltic, 15s per 304 lb, October shipment.

Beans.—Smyrna, 32s 9d per 480 lb, August shipment.

Linseed.—Duluth, 42s 3d per 416 lb, Sept. shipment; Bombay, 47s per 416 lb, August shipment; Argentine, 42s 6d per 416 lb, arrived.

Rapeseed.—Ferozepore, 55s per 416 lb, on passage; Jamba, 41s 3d per 416 lb, Sept. shipment.

Cottonseed.—Egyptian, £8 5s per 2,240 lb, on passage.

Poppyseed.—Indian, 56s per 377 lb, Oct. shipment.

Sesame.—Indian, 58s 6d der 416 lb, Nov. shipment.

TERM MARKET.

The market in futures is firm for wheat, but uncertain for maize. The latest prices made are:

Wheat, 7s. 3d. per cental July delivery.
,, 7s. 4d. ,, Aug. and Sept. delivery.
,, 7s. 5d. ,, Dec. delivery.
Maize, 5s. 0d. ,, July ,,
,, 4s. 11d. ,, Sept. ,,

The wheat is Red American (winter), the maize American (flat), but other grades can be bought at parities as fixed by the Term Market executive. There were no sales of wheat for October and November delivery, or of maize for August delivery.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour.—The smart drop in American wheat quotations has brought out some c.i.f. offers from America of New Crop Winters and Kansas at reasonable prices, but buyers here are difficult to find, the brilliant weather having also something to do with this. Grain.—Round and flat maize are in sellers' favour. Oats easier. Beans and pease firm with small demand. Oatmeal is still scarce on spot, and in good demand. Mill Stuffs.—Bran and thirds firm, with an upward tendency. Winter wheat patents, 28s to 29s per 280 lb; spring wheat patents, 27s 6d to 29s per 280 lb; American corn, 14s 1½d to 14s 3d per 280 lb; round corn, 13s 9d to 13s 10½d per 280 lb; grinding beans, 18s 7½d to 18s 9d per 280 lb; white pease, 18s 9d to 20s per 280 lb; broad bran, 97s 6d per ton; medium bran, 92s 6d per ton; fine thirds, 120s to 122s 6d per ton; common thirds, 103s 4d per ton; American oilcake, 145s per ton.—McKinnon and McDonald (Glasgow).

Flour.—With some slight fluctuations during the week, prices again stand pretty much the same as a week ago. By the continuance of the strike traders are much inconvenienced by the serious delays in the execution of orders.—Greenhill Bros. (Belfast).

Offals.—Demand for bran here has rather declined, influenced to some extent by the continuance of the strike.—Greenhill Bros. (Belfast).

Milling Offal.—The chief features are the scarcity and high prices obtainable, especially for middlings, which must be reckoned 5s per ton up on the week. Pollard 2s 6d per ton dearer. Bran unchanged.—John Bawcombe and Co.

Flour has been in limited request to-day with prices tending easier. American offers, though still beyond buyers' reach, are more reasonable than of late.—T. S. Medill and Sons, Ltd.

WET AND DRIED GRAINS.

Mark Lane, Monday.—Wet Grains: Prices remain about the same, with a slightly easier tendency due to warmer weather and haymaking, and business has been done at 11s to 12s ale, and 9s to 9s 6d porter per ton. Pressed white distillery meal 32s 6d per ton on rail, London. Dried Grains.—The demand continues fairly brisk and prices are firm at—Distillers, 105s; ale, 92s 6d to 95s; mixed, 85s to 87s 6d; and the same prices for monthly deliveries, July to September, on rail, London. Calcutta rice meal, 80s; rice germ, 97s 6d; American cane treacle in good demand, 87s 6d per ton, on rail, London. Kiln dried sea-damaged Australian wheat from 20s per qr.—Hamlyn and Co.

HOPS.

Borough, Monday.—The market remains extremely firm, stocks being in such a small compass. The reports from the plantations speak of vermin being still troublesome, and washing is general.—W. H. and H. Le May.

POTATOES.

Borough, Saturday.—Arrivals were on a good scale, and a fair demand prevailed. Early Rose, 5s; Puritans, 5s; Duke of Yorks, 4s 6d; British Queens, 4s 6d per cwt; Dutch, 4s per bag.

Carlisle, Saturday. — The supply of old potatoes was very small. Quiet trade at 9d to 10d; new potatoes, 1s 4d to 1s 6d per stone.

Doncaster, Saturday. Good supply, and fair inquiry at 5s to 5s 3d per cwt.

Goole, Wednesday.—Potatoes are not quite ready in this district. Selby potatoes are making 10s per load.

Lancaster, Saturday.—New local potatoes, 1d to 2d per lb.

Malton, Saturday.—Good show of new potatoes, imported making 9d and home-grown 1s 3d to 1s 6d per stone.

Manchester, Saturday.—Potatoes: Cheshire, new, 8s 6d to 11s per load; Bedford, 5s 6d to 6s per cwt; Jersey, 6s to 7s per cwt.

Preston, Saturday.—The supply of new potatoes are now coming forward more plentifully. The price realised was 15s per load of 240 lb.

Retford, Saturday.—Large supply at 10d per stone.

Spitalfields, Saturday.—Heavy consignments received poor support. Early Rose, 4s; Epicure, 5s. per cwt; Early Puritans, 75s to 85s; British Queens, 90s to 100s per ton.

Stockton, Wednesday.—Lincolnshires, 6s 6d to 7s per cwt.; Midlands, 5s; St. Malos, 6s 6d; Dutch rounds, 5s to 5s 6d per cwt.

Whitby, Saturday.—Potatoes, home-grown, 1s 4d; Jersey, 1s per stone.

Worksop, Wednesday.—Good supply. Best potatoes, 13s 6d to 14s 6d per load of 18 stones.

York, Saturday.— Plentiful supply of new potatoes, with a fair demand at from 5s to 5s 6d per hamper of four score lb.

HAY AND STRAW.

Birmingham, Friday. — Small supply of hay; no quotations obtained.

Derby, Friday.—Clover, best old, 90s to 100s; new, 80s to 90s; hay, best old, 90s to 100s; new, 80s to 90s; seconds, 65s to 70s; wheat straw, 60s to 70s; pressed straw, 50s to 60s; chop straw, 55s to 65s; peat moss, 35s to 40s.

Hereford, Wednesday.—Few transactions during the week at practically the same prices as during the last three months—viz, hay, 55s to 65s in stack, and straw, 30s to 35s in bulk.

Lancaster, Saturday. — Meadow hay, 6d; clover, 6½d; wheat straw, 4½d; oat straw, 4d per stone.

Leeds, Tuesday.—A steady trade is passing in the warehouses for hay and straw, fair supplies being on offer. The improvement in the weather has enabled farmers to proceed with the hay harvest, and the outlook is more satisfactory than recently. Quotations rule as follows:—Clover hay, 7½d; meadow hay, 7d; wheat straw, 5d; oat straw, 5d; and rye straw (retail), 7d to 8½d per stone; green clover, 3½d per bundle.

Lincoln, Friday.—Short supply of hay and straw, and a quiet trade. Best hay and seeds, £4 per ton on the ground; secondary ditto, £3 15s; straw, 35s per ton at the stack.

Manchester, Friday.—Hay, 6½d to 6½d; clover, old, 7d; new, 5½d; straw, oat, 3½d per stone.

Newcastle, Tuesday.—Old land hay from £3 10s to £4 7s 6d per ton; new land hay, £4 10s to £5 7s 6d; wheat straw, £1 3s to £1 4s per load.

Nottingham, Wednesday.—Fair supplies on offer, and trade quiet at the following rates:—Inferior to good hay, 75s to 85s; prime ditto, 90s to 100s; inferior to good clover, 75s to 85s; prime ditto, 95s to 100s; wheat straw, 45s to 55s per ton.

Sheffield, Tuesday.—Small attendance of farmers, owing to haymaking, and small supplies. Seeds, choice, £4 15s to £5; meadow hay, £4 10s to £4 15s; straw, £2 15 to £3; green fodder, 17s to 18s per ton.

Whitechapel, Saturday. — Arrivals were small, and the demand proved fair, at recent rates. Best clover, 84s to 97s 6d; inferior ditto, 75s to 80s; specially picked hay, 90s; good ditto, 80s to 87s 6d; inferior ditto, 65s to 70s; mixture and sainfoin, 82s 6d to 90s; straw, 28s to 34s per load.

SEEDS.

Mark Lane, Monday.—The wonderful improvement in the weather is rapidly making up the lost leeway, and prospects of the new crops. Clovers, grasses, and trifolium are improving. Stocks held over being exceptionally light; prices are well maintained. Tares unchanged. Rye quiet. Mustard firm. Rape exceptionally scarce. Peas without movement.—John Picard and Co.

TO-DAY'S MARKETS.

CATTLE.

Metropolitan Market, Islington.

	Monday July 22, 1907. British.	Total.	Monday, July 23, 1906.
Beasts	810	810	890
Sheep and Lambs	6,420	6,420	7,730
Calves	20	20	10
Pigs	—	—	—
Milch Cows	40	40	30

Quotations per 8 lb. (sinking the offal).

ENGLISH.

	Inferior. s. d.	Second. s. d.	First. s. d.
Beasts	2 8	3 10	4 10
Sheep	4 6	5 4	6 4
Lambs	5 8	6 4	7 0
Calves	4 2	4 10	5 8
Pigs	—	—	—

Milch cows, per head, £16 to £23.

British arrivals include as follows:—Scotland, nil; Eastern Counties, 91; Midland, Home, and Western Counties, 611; Devon, 10; Ireland, 98.

We note to-day an increase of 80 head in the number of beasts offered for sale compared with Monday last, due to larger consignments from the Midland counties and Ireland, these latter comprising 41 Dublins (some of which were choice Black-polled cattle), 36 Waterfords, and 21 stores, two and a-half year old heifers, which were quoted at from £11 to £11 10s. per head. Irish fat beasts were firm in regard to value. For both prime and second quality English beasts, a slow trade was experienced. Nevertheless, an upward tendency in value was noticeable in many cases. Fat butchering cows and bulls met with less country demand. Prices, however, were firm. A clearance will be made.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day. s. d.	Monday, July 23, 1906. s. d.
Scotch	—	—
Devons	—	4 6 to 4 8
Herefords	4 8 to 4 10	4 4 to 4 6
Norfolks	—	4 2 to 4 4
Runts	4 6 to 4 8	4 2 to 4 4
Lincolns	4 2 to 4 4	3 8 to 3 10
Irish	4 4 to 4 6	—
Canadian	—	—
Fat cows	3 8 to 3 10	3 4 to 3 6

There was an increase of 280 in the number of sheep and lambs penned compared with Monday last. Trade opened and continued throughout the day of a slow and dragging nature partly due to the inclement weather experienced in the early morning, wether sheep ruling 2d. per 8 lb. lower in value than on Monday last; ewes, on the other hand, were in smaller supply, and met with more inquiry, consequently an advance of 2d. per 8 lb. was quotable. Both Irish and Scotch descriptions, though slow of sale, maintained late rates, this remark also applying to the lamb trade. A clearance is expected to be made. The supply included 200 Scotch, 480 Irish, and 879 from the Eastern Counties.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

	To-day. s. d.	Monday, July 23, 1906. s. d.
8 st. Scotch	6 2 to 6 4	5 10 to 6 0
7½ to 8 st Downs	5 10 to 6 0	5 6 to 5 8
9 st. Downs	5 8 to 5 10	5 4 to 5 6
10 st Halfbreds	5 4 to 5 6	5 0 to 5 2
10 st Yorkshires	—	—
12 st Lincolns, half-bred	—	—
10 st Irish	5 8 to 5 10	4 10 to 5 0
10 st Down Ewes	4 0 to 4 2	4 0 to 4 2
11 st Halfbred ditto	3 10 to 4 0	3 10 to 4 0
5 st Down Lambs	6 10 to 7 0	6 10 to 7 0
6 st Halfbreds ditto	6 6 to 6 8	5 10 to 6 0

The calf trade, with a small number on offer, ruled of a slow nature at late rates; the best on offer were quoted at from 5s. 6d. to 5s. 8d. per 8 lb. (sinking the offal).

No pigs on the market.

London (Central), Monday.—Slow trade, moderate supplies. Beef, English, 3s 8d to 4s; Scotch, 4s 2d to 4s 8d; American, 3s 7d to 3s 11d; refrigerated hindquarters, 3s 8d to 4s. Mutton, English wethers, 4s 8d to 5s; ewes, 3s 4d to 3s 8d. Lambs, 5s to 6s; Scotch tegs and wethers, 5s 4d to 5s 8d. Veal, 3s 4d to 4s 8d. Pork, 3s 4d to 3s 10d per stone.

St. Ives (Hunts), Monday.—Beasts, 293; sheep and lambs, 2,356; pigs, 479; horses, 20. Fat and store cattle, fair trade; fat and store sheep, and pigs, good demand; milch cows, fair prices, £14 to £22. Prices:—Beef, 7s 6d to 8s 3d; mutton, 8s 2d to 10s 6d; lamb, 9s to 11s; pork, 6s 9d to 7s 6d.

FOREIGN.

Deptford, Monday.—Beasts 545. To-day's supply compared with Monday last showed a decrease of 338 head, and consisted of shipments from the United States. Trade ruled of a fairly steady nature, only middling qualities cattle being consigned. The best on offer were quoted at from 4s 3d to 4s 5d; seconds, 4s to 4s 2d per 8 lb (offal given in). On Saturday 1,363 beasts from the United States and 237 from Canada were offered for sale. Trade ruled of a firm and steady nature at good money. The best States on offer were quoted at from 4s 4d to 4s 6d; seconds, 4s 1d 4s 3d. Canadians, 4s 2d to 4s 4d; seconds, 3s 10d to 4s 1d per 8 lb (offal given in). Besides the above 480 more were withheld from sale.

Liverpool, Monday.—Fewer cattle in market tofday. Good demand for best qualities at fully last week's rates. Middling sorts slightly lower. Sheep and lambs supply about same. Demand very slow for both, and to effect sales considerable reduction in values was accepted; beef, 6½d to 5d; mutton, 8½d to 6d; lamb, 9d to 8d. At market 916 cattle and 9,106 sheep

FEEDING STUFFS.

London Monday.—Linseed Cakes. — There is no particular change to report in the trade, though London made are tending a little dearear, and foreign in comparison continue too dear to find ready buyers for forward delivery.

Cotton Cake: Egyptian made remain scarce, and with London made are unchanged in price.

Decorticated Cotton Cake and Meal: Business continues slow at last week's quotations.

Linseed.—With heavy shipments from both Plate and Calcutta, market is weaker.]

PROVISIONS.

London, Monday.—Bacon: The arrivals of bacon last week were:—From Ireland, 1,801 bales, and from foreign ports, 13,863 bales. There was a steady trade for bacon throughout the week, and certain brands of Irish and Danish were quoted somewhat dearer. Official quotations range:—Irish, 62s to 65s up to 67s; Danish, 63s to 65s up to 69s; Canadian, 58s to 62s up to 64s. Butter: The butter market was quiet. French, 94s to 102s; Danish, 108s to 110s; Russian, 74s to 96s; Dutch, 100s to 102s; Irish, 86s to 103s; Victorian, 84s to 98s; New South Wales, 81s to 96s; Queensland, 82s to 92s; New Zealand, 94s to 100s. Lard.—Lard was a steady market. Irish, 40s to 54s; Danish, 46s to 50s; American, 43s to 45s 3d.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

The supply of beasts on the chief market day of the week at Islington was slightly smaller owing to shorter arrivals from the Midland counties, which consisted chiefly of Herefords, Runts, and Lincoln Shorthorn, this class of cattle always forming the majority of our supply at this season of the year. Trade for both prime and second quality English beasts ruled of a slow nature, nevertheless late currencies governed most transactions. The Irish consignment consisted of thirty-two Waterfords and twenty-one stores; these latter consisted entirely of two-and-a-half-year-old heifers, which were quoted at from £11 to £11 10s. per head; the former shared in the slow trade experienced, and were eventually disposed of at late values. A few choice quality English cattle made an advance on our top quotation.

On Thursday sales were confined to fat cows and rough cattle at Monday's prices. At the Foreign Cattle Market, Deptford, on all three market days, with a fair supply, trade ruled of a firm and steady nature. The total number of offered for sale at bothmarkets was 3,533, as against 3,803 during the preceding week, comprising 770 British (decrease 20) and 2,763 foreign (decrease 250), these latter consisting of 2,326 from the United States, and 437 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal):—90 to 95 stone Herefords, 4s. 6d. to 4s. 8d.; 95 stone Runts, 4s. 6d. to 4s. 8d.; 100 stone Shorthorns, 4s. 2d. to 4s. 4d.; 95 stone Irish 4s. 2d. to 4s. 4d.; 90 stone States, 4s. 4d. to 4s. 6d.; 95 stone Canadians, 4s. 2d. to 4s. 4d.; 90 stone fat cows, 3s. 8d., ex. 3s. 10d.

The sheep trade, as usual, was entirely confined to the Islington market: trade for both wethers and ewes was of a slow nature at late values, whilst Scotch descriptions met with more inquiry, and, being of neat, handy weights, sellers were able to obtain an advance of 2d. per 8 lb. Irish, on the other hand, were slow of sale at late currencies. Lambs were in average supply, but met with a somewhat limited demand; nevertheless sellers based all sales on last week's prices. On Thursday wether sheep ruled firm in regard to value, whilst lambs were difficult to vend at a decline of 4d. per 8 lb.

The total number penned was 8,070, as against 8,420 during the previous week. Best pens made per 8 lb. as follows (sinking the offal):—7½ to 8 stone Downs, 6s. to 6s. 2d.; 8 stone Scotch, 6s. 2d to 6s. 4d; 9 stone Downs, 5s. 10d. to 6s.; 10 stone Irish, 5s. 8d. to 5s. 10d.; 10 stone Downs, 5s. 8d. to 5s. 10d.; 10 stone Halfbreds, 5s. 6d. to 5s. 8d.; 10 stone Down ewes, 3s. 10d. to 4s.; 5 stone fat grass lambs, 6s. 10d. to 7s.; 6 stone Halfbred ditto, 6s. 6d. to 6s. 8d.

Calves numbered 70 and met with a slow trade, the best on offer being quoted at from 5s. 6d. to 5s. 8d. per 8lb. (offal given in).

Trade in the West.

The change for the better which has taken place in the weather has come as a great relief to those agriculturists generally, who, after the "catching" time of which they have recently had such unpleasant experience, have put forth the most strenuous efforts to get in their hay, a large breadth of which, we are glad to know, has been stacked in even better condition than many ever thought would be the case. Milch beasts continue to be a good deal sought after, heifers particularly, for which we may quote from £16 10s. to £21 10s. as the range of present currencies, whilst cows sell at all prices from £16 down to as low as £8 or £8 for animals which in a very brief space will become barren. With plenty of pasture keep everywhere the supply of good class graziers hardly meets the demand, most people being now in want of this peculiar class of bullock, especially as the beef trade is keeping so good, consequently sellers are asking high rates for anything at all fresh, and from £22 up to £29, or £30 per pair is readily obtainable, with a quick sale at the price, though the plainer grades sell somewhat less freely at from £16 up to £20 or £21. All the younger grades of cattle likewise sell well, and prices are well maintained for anything showing the least sign of promise. Store sheep, as we previously hinted, are showing every sign of holding their own in point of price, which will be readily understood by the trade when we state that regular draft Down ewes are now making from 46s. to 52s. each, and secondary grades 33s. to 45s.; two-tooths, 46s. to 48s. 6d.; mixed ewes, 40s. 6d. to 42s.; grazing ewes, 34s. to 36s.; wether lambs, 32s. to 42s. 6d.; chilver lambs, 36s. 6d. to 40s.; and mixed lambs, 26s. 6d. to 38s. And all the sheep now coming out of any of the fairs and markets command a ready sale at the currencies above quoted, and, speaking generally, the market for all kinds of stores has seldom exhibited a healthier tone than is now the case.

And the fat stock business is exhibiting equally satisfactory features, one reason for which may be attributed to the by no means excessive supplies just at present coming to hand, particularly of mutton, which has seldom ever come so sparingly to hand at this season of the year. A good deal of the beef offering, especially the Devons and Norfolks, is of excellent finish, both steers and heifers, and this will account for the good prices ruling, Devons making £16 19s. to £26 each; Norfolks, £20 to £22 10s.; and cross-breds, from £20 10s. to £24 15s.; and fat cows, £13 to £18; for best qualities, from 4s. 8d. to 5s. per stone, and 4s. 2d. to 4s 6d. for seconds. Mutton, in spite of short supplies, has shown scarcely so much buoyant as of late, except for the choicer grades of wethers and tegs, which bring outside values—namely, 6s. to 6s. 6d. (or from 52s. to 62s. 6d. each); ewes, 4s. 2d. to 4s. 6d. (or from 48s. to 49s.); best Down lambs make rather more money—namely, 6s. 10d. to 7s. 2d., and occasionally more for special weights (or from 46s. to 55s. 6d.); other qualities, 6s. 4d. to 6s. 8d. Good veal calves meet a firm trade at the full rates lately current, the better-finished lots fetching rather more than has been the case of late.

Trade in Ireland

There was a very good attendance of buyers at last Dublin's Thursday market, but a still quieter feeling prevailed than at the previous market. The late hot and dry weather had a good deal to say to this. The cattle market opened tediously, and it was some time before any business at all was done, and then only a very moderate amount at a reduction of about 1s. per cwt. on last day's figures. In the general run cattle changed hands at from 32s. to 32s. 6d. for the general run of good cattle, but occasionally up to 34s. and 35s. per cwt. (live weight) for very choice animals. Ordinary beasts could be had at about 27s. per cwt. Business was slack generally, but a fair clearance was accomplished at a pretty early hour. There were 2,651 beasts on the market, being a falling off of nearly 300 on the week. Best heifer and ox beef was worth from 57s. 6d. to 60s., and extra quality up to 64s. per cwt.

The bulk of to-day's business was for export requirements. Sheep sold badly, owing to the hot weather, and the day's market being nearly 1,400 below that of last week, reduced the market to a moderate compass. For home requirements there was a slow and cautious trade, practically confined to light-weight sheep. Heavy sheep were difficult to dispose of.

There was a good inquiry for hoggets for London and southern English county districts, but the Manchester and Liverpool inquiry was cautious, on bad reports.

Prime wether mutton was worth from 7¼d. to 8d. per lb.; prime ewe, 6½d. to 7¼d.; and inferior mutton, about 6d. per lb. Hoggets, suitable for the English markets, sold at from 54s. to 66s. each for best heavy, and from 36s. to 48s. for small and medium-weight sheep. Large fat lambs were worth from 33s. to 44s. each, and small to middling ones from 24s. to 32s. each. Veal sold very well, choice bringing from 8d. to 9d., and other calves selling from 4½d upwards.

The Pig Market was not extensively supplied with stock, and with a good company of shippers and local pork butchers, a good business was done at fully 2s. per cwt. advance on the previous market, and the market was finished up at an early hour. Store pigs met with a particularly active inquiry at better rates. Light-weight baconers and porkers, 53s. to 54s. per cwt.; inferior pigs, from 35s. per cwt.

LONDON.

Central Market, Friday.—Fair supplies and trade very slow, with a drooping tendency in prices:—English beef, 3s 8d to 4s; Scotch sides, 4s 2d to 4s 4d; shorts, 4s 4d to 4s 8d, extreme, 4s 10d; Deptford and Liverpool killed, 3s 7d to 3s 11d; refrigerated hindquarters, best, 3s 10d to 4s; ditto seconds, 3s 8d to 3s 9d; ditto forequarters, 2s 7d to 2s 9d; inferior beef, 2s 8d to 3s; mutton, Scotch wethers, 5s 4d to 5s 8d; ditto tegs, 5s 8d; ditto ewes, 3s 4d to 3s 6d; English wethers, 4s 8d to 5s; ditto ewes, 3s 4d to 3s 8d; Dutch sheep, 4s 6d to 5s; English lamb, 5s to 6s; veal, 3s 4d to 4s 8d; English pork, 3s 6d to 3s 10d; Dutch ditto, 3s 4d to 3s 8d per 8 lb.

Islington, Thursday. — To day's supply of beasts consisted entirely of fat cows and bulls from the south-western counties, trade for which ruled fairly steady, last Monday's values governing all transactions. Top prices paid per 8 lb: Fat cows, 3s 8d; extreme, 3s 10d; fat bulls, 2s 9d to 3s 3d. Sheep trade, though slow, was firm in regard to value, with a slight upward tendency for wethers, though not quotably so. Lambs, however, were difficult to vend, even at 4d per 8 lb less money. Best pens made per 8 lb as follows: 7½ to 8 stone Down sheep, 6s to 6s 2d; 9 stone ditto, 5s 10d to 6s; 10 stone ditto, 5s 8d to 5s 10d; 10 stone half-breds, 5s 6d to 5s 8d; 10 stone Down ewes, 3s 10d to 4s; 5 stone fat grass lambs, 6s 6d to 6s 8d. Calf trade slow. Quotations per 8 lb, sinking the offal: Beasts, 2s 9d to 3s 10d; sheep, 3s 10d to 6s 2d; calves, 4s to 5s 8d; lambs, 4s 6d to 6s 8d.

COUNTRY.

Ashford, Tuesday.—There was a fair trade for beef at full rates, best animals making 4s 8d to 5s per stone. Mutton, however, was depressed, and all sheep 2d per stone cheaper; Downs sold up to 6s; small Kents to 5s 8d; large Kents to 5s; and ewes to 4s 4d. Lamb cheaper. Pork a little dearer.

Bath, Wednesday.—There was a small supply, and prices ruled as follows:—Fat ewes made 50s 6d to 33s; fat lambs, 47s 6d to 32s; fat steers, £21 10s to £19; fat heifers, £17 to £14 15s; fat calves, 90s downwards.

Berwick, Saturday.—The supply comprised 166 beasts—80 less than the previous week. Attendance of farmers and buyers small, and trade quiet. Heifers, £10 10s; stirks, £7 10s to £11.

Birmingham, Thursday.—Small supply of beasts, sheep, and pigs; trade slow for beasts and sheep. Quotations:—Beef, 5½d to 6½d, a few at 7d per lb; mutton, 6½d to 8½d per lb; lamb, 9d to 9½d per lb; bacon pigs, 10s to 10s 3d per score; cutting pigs, 10s 3d per score; sows, 8s to 8s 3d per score.

Bristol, Thursday.—The market was rather smaller and less active than usual. Beef, which was in limited quantity, was in little request, and the price of best qualities fell slightly, the present quotation being 60s to 62s per cwt. Mutton and lamb were in good supply, and trade was quiet at about late rates, heavy wethers selling at 7½d per lb, compared with 7¾d last week. Pigs were more numerous than of late, and porkers were quoted at 10s 6d per score instead of 10s 9d.

Canterbury, Saturday.—There was a further offering of store lambs at to-day's market, which met a fair inquiry. One run of exceptionally strong animals made from 24s 6d to 30s per head; others sold at from 15s 6d to 24s; and some half-breds changed hands at 25s 6d; useful wether tegs, 44s 6d; and young ewes and lambs, 45s per couple. There was only a small offering of horned stock; yearlings were quoted from £7 to £9, and cows and calves at from £14 10s to £19.

Carlisle, Saturday.—Very small supply of cattle on the Sands, numbering about 150. Small attendance of buyers, and a quiet trade. Wintering cattle £6 10s to £14 for heifers for finishing off.

Chester, Thursday. — Owing to the spell of fine harvest weather the attendance was very small, and the supplies of stock were considerably below the average. Trade was slow. Quotations:—Milch cows, £18 to £22; calvers, £15 to £18; barrens, £10 to £12; heifers, £9 to £14; stirks, £6 to £9; sheep, 18s to 32s each.

Chichester, Wednesday.—The supply of fat cattle was considerably lighter, and competition was keen at advanced prices. A very strong demand prevailed for the best class fresh calved cows and heifers, and prices rose fully 30s to 40s per head. There were more store cattle forward, but trade was dull and dragging. Quotations:—Prime Down lambs, 7s 6d to 8s 6d; prime Devon steers, 4s 8d to 5s; Shorthorn steers, 4s 4d to 4s 8d; prime Southdown mutton, 6s 6d to 6s 10d;

West-country ditto, 6s to 6s 6d; fat ewes, 4s 6d to 5s; veal, 4s 8d to 5s 2d; fat pigs, 3s to 4s per stone; store pigs, 15s to 24s per head.

Colchester, Saturday.—Beef made from 4s 6d to 4s 8d, and mutton 6s per stone of 8 lb. Pork was dearer, and veal more moderate in price.

Derby, Tuesday.—A full supply of beasts and sheep, including many rough sorts. Choicest sorts again sold well. Beasts, 6d to 7d, calves, 8d, sheep, 7½d to 9d, lambs, 10d. to 10½d per lb.

Doncaster, Saturday.—Only a moderate supply of cattle and sheep, and a poor attendance of buyers. Prices unchanged except for milch beasts, which were £1 per head less than last week at £17 to £22; bullocks made £12 to £17; heifers and drapes, £11 to £15; stirks, £7 to £9; and hogg sheep, 44s to 50s each.

Dorchester, Saturday.—The cattle was only moderately supplied to-day either at Messrs. Duke's sale or that of Messrs. Symonds and Sampson. The attendance was confined almost exclusively to those having business in the market, farmers in many cases being too busy at home in the hay field to come to market or even to send in their stock. As regards business, dairy beasts were scarce and dear, best heifers and calves selling from £17 to £20, and seconds, amongst which were many useful cows, £11 to £16 5s. Barreners in limited supply, and selling from £19 to £26 per pair. A good inquiry for fat beef, prices for the best of which showed some improvement, which can hardly be said to be the case with the rougher grades. Best heifers made £19 to £23 each, and steers £19 to £22 (or 11s 6d to 12s per score for the best weights); fat cows, £15 to £17 (or 10s to 11s); only the coarser weights affected by the heat. Mutton found a very short offer, and prices were practically unchanged, fat ewes selling from 44s to 47s 6d each (or 7d to 8d per lb); whilst a few lambs brought 34s 6d to 36s each (or 10d to 11d per lb).

Dublin, Thursday.—Demand for cattle was slow and hesitating, with prices moving rather in favour of buyers, particularly for unfinished beasts, some of which had to be returned to pastures. Handy, suitable sheep for home and export purposes in request at a shade less money; heavy qualities lower and difficult to place owing to extreme heat. Lambs of all grades, though in fair demand, had to be sold at prices favouring buyers. Cattle—Live weight (best), 32s to 34s per cwt; secondary and inferior sorts, 29s to 31s 6d per cwt. Mutton, dead weight, 6½d to 8d per lb; lambs, 22s to 38s.—Ganly, Sons and Co.

Edinburgh, Wednesday.—Larger supply of cattle and sheep met a good demand at fair prices. Half-bred sheep sold to 44s; Cheviots, 38s; Black-faced hoggs, 27s; best polled bullocks sold to £17 10; horned cattle, £9 10s; smaller kinds to £10 15s; Ayrshire cows made up to £18; Irish cows £21 5s; Shorthorns, £25; black polled cows, £19 15s; crosses, £19 15s.

Exeter, Friday.—Smaller supply of fat cattle, owing to haymaking. Steers and maiden heifers, 12s; cows, 10s to 10s 6d. Very large supply of sheep and lambs. Small hoggs and shorn lambs, readily sold at 9d; ewes, sold out at 6d; fat lambs, in wool, 10½d to 11d; rams, 4½d to 5d; calves, 7d.

Glasgow, Wednesday.—Small show of cattle; demand good. Prime handy grades and other classes, owing to warm weather, met very slow sale. Top, 62s to 64s; secondary, 57s to 60s per cwt. Fair numbers of sheep penned, but owing to fair holidays trade ruled slow; prime hogs, fair inquiry; heavy ewes almost unsaleable. All classes of lambs met a fair inquiry; best mutton, 9¾d to 10½; secondary, 9½d to 9¾d per lb; lambs, 10d to 11d per lb.

Gloucester, Saturday.—Messrs. Bruton, Knowles and Co. report their sales as follows:—The supply in to-day's market was exceedingly short, farmers being busy with haymaking. A few cows and calves sold fairly well.

Hereford, Wednesday.—A quiet market, the supplies being moderate, and the demand small. Beef trade was the firmest of any, best bullock and heifer maintaining late rates up to 6¼d and 6¾d per lb, fat cows 5¼ to 5½d. Store calves a weak trade, and veal made less money at 7½d top. Sheep were in smaller supply, and easier at 8d to 8½d for wethers, fat ewes 6d to 7d, and fat lambs 8½d to 9d, a few perhaps realising 9½d. Porks were a small supply, and down in price.

Leicester, Saturday.—Moderate consignments of home-bred stock. Buyers were poorly represented, and trade ruled flat. Choice milch cows, £18 to £20; secondary sorts, £14 to £17; Shorthorn bullocks, £11 to £16; Irish bullocks, £12 10s to £18; Welsh cattle, £9 to £12; heifers, £10 to £14; young stock, £5 to £8 each.

Lincoln, Friday.—A small consignment of horned stock, and a slow trade. Young beasts, £8 to £11; milch cows, £17 to £21 each.

Lynn, Tuesday.—Fat beasts average show, trade at late rates, 7s 6d to 8s per stone. Very few stores, trade slow, making from £6 to £14 each. Fat sheep average show, about 9s 6d to 10s per stone; few stores from 45s to 50s each. Store lambs made from 28s to 35s each; fat lambs from 30s to 40s each.

Manchester, Friday. — Beef: First class, 5¾d; second class, 4¾d to 5¼d; third class, 3¾d to 4¼d. Mutton: First classs, 8¼d; second class, 7¼d to 7¾d; third classs, 6¼d to 6¾d. Veal: First class, 6¼d; second class, 5¼d to 6d; third class, 4½d to 5d. Lamb: First class, 8¼d; second class, 7½d to 8d per lb.

Newcastle, Tuesday.—Trade for cattle was firm, with prices unchanged. Prime medium weights made 8s 3d to 8s 6d; strong heavy heifers, 8s to 8s 3d; strong heavy steers, 8s to 8s 3d; second-class cattle, 7s 9d to 8s; coarse and inferior, 6s 9d to 7s per stone, sinking the offal. Sheep and lambs were a rather smaller supply. Trade was a shade firmer, with a ½d improvement for choice sheep and ½d for strong sheep. Quotations:—Choice young sheep, 9d to 9½d; strong heavy, 8¾d to 9¼d; choice lambs, 9¼d to 9½d; second-class lambs, 8¾d to 9d; ewes, 5½d to 6d; rams, 5d to 5½d per lb. Calves were a slightly smaller supply. Trade in veal was fair at 6d to 8d per lb.

Newport, Wednesday.—A medium supply of cattle, sheep, calves, and pigs. A good attendance of buyers, and there was a very good trade all round. Best beef, 6¾d to 7d per lb; seconds, 6¼d to 6½d; cows, 5d to 5¼d; best wether mutton, 8½d to 8¾d; ewes, 6¼d to 7d; lamb, 9d to 9¼d; calves, 7d to 8¼d; porker pigs, 10s 6d to 11s 6d per score.

Norwich, Saturday.—About 350 fat cattle were shown, of only fair quality; trade was good, the best animals making slightly more than 8s; second quality, 7s 9d; cows 7s per stone; and veal calves 8s per stone. 480 fat sheep of good quality shown; there was more life in the trade, first quality mutton making slightly over 9d, and other grades from 7d to 8¼d per lb. Fat pigs were quite a holiday market; good porkers made 6s 9d; baconers, 6s to 6s 6d; and sows, 5s per stone. There was a poor show of store cattle; one good lot made about £18, but the rest were small cattle, which only fetched from £6 to £11 10s. Rearing calves were few in number and of only fair quality; prices were down from last week, ranging from 20s to 40s per head. 4,470 store sheep on offer; trade was slow and dear, the best ewes making 66s, and others from 33s 6d to 56s 6d. Lambs were of good quality, but sold slowly at prices ranging from 28s to 40s. Store pigs were a small show, but of good quality, and sold at from 12s to 25s.

Nottingham, Saturday.—Small supply of stock, and not so many customers as usual. Prices were about the same as last week; best milking cows, £17 to £20; in-calf heifers, £13 to £17. There was a small supply of store beast, which sold fairly briskly; strong heifers and steers, £10 to £14; and younger beasts, £6 to £9. Calves made 25s to 45s each.

Preston, Wednesday.—Good supplies, but trade ruled rather slow, and prices were a shade easier. Irish heifers, 7d; local cattle, about 7d; prime young cows and bulls, 6¼; inferior, 5d to 5½d; hoggs, 9½d; young ewes, 8d; heavy ewes and tups, 6½d to 7d; choice lambs, 9¾d; coarse ditto, 9d; calves, 7d per lb.

Retford, Saturday.—Store cattle of first-class quality made good prices. Prime milch beasts were worth from £20 to £22; secondary, £16 to £18; two year-old steers and heifers, £10 to £13; yearlings, £6 to £8; and calves, 35s to 45s per head.

Romford, Wednesday.—Average supply of fat beasts; trade about the same. Best animals, 4s 6d to 4s 8d; middlings, 4s 2d to 4s 4d per stone. Calves in average supply; business slower, at 5s 2d to 5s 4d per stone. Sheep in large supply; trade slow. Best small sheep, 5s 8d to 6s; large, 5s 2d to 5s 4d per stone. Ewes in average supply; trade slow, at 4s 2d to 4s 4d per stone. Lambs in short supply and dearer, at 6s 4d to 6s 8d per stone. A few store beasts on offer; slow demand. Better trade for milch cows; good supply. Small supply of pigs; trade slow. Small porkers, 3s 8d to 4s; large hogs, 2s 8d to 3s per stone.

Sheffield, Tuesday. — A moderate show of milch cattle, which met with a fair sale, the best making £19 to £20; rougher lots, £15 to £16 10s.

Shrewsbury, Tuesday. — Small supplies, especially store cattle, farmers being with their hay. Good attendance of buyers. Trade in fat stock good. Quotations:—Beef, 6¼d to 7¼d per lb; mutton (wether), 9d to 9¼d per lb; ewes, 7¼d to 8d per lb; lamb, 9d to 9¼d per lb; veal, 7d to 8d per lb; porket pigs, 10s per score; bacons, 9s to 9s 3d per score.

Stockton, Wednesday.—A small show of the best cattle, which made 8s to 8s 6d per stone, trade being slow, whilst rougher kinds made 6s 6d to 7s per stone. Lambs sold at 10d per lb, young sheep 9d, and ewes 7d. The pig trade was quiet, small porkers making 7s 6d per stone, mediums 7s, and sows 6s 6d.

Thame, Tuesday.—No doubt on account of the fine weather many farmers did not attend this market on Tuesday last, and consequently the supply of stock was on a smaller scale. There was a very satisfactory attendance of buyers, but it was difficult to maintain late rates for cattle. Choice quality beef was cleared, but cows were in little demand. Trade showed a decided revival, and a choice consignment of store lambs from W. A. W. Musgrave, Esq., were eagerly sought after. Veal and pork continue to sell well. Messrs. Bond and Burrows' sale comprised 84 fat beasts, 219 fat sheep, 70 fat and weaning calves, and 85 fat and store pigs. Fat oxen made from £17 to £21 10s; fat heifers, £14 to £20 10s; fat wethers, 50s to 58s 6s; fat ewes, 45s to 55s 6d; fat lambs, 32s to 43s 6d; fat calves, £3 5s to £5; weaning cow calves, 30s to 52s; bull calves, 18s to 44s; bacon hogs, £3 5s to £4 4s; porkers, 30s to 42s; store pigs, 12s to 26s.

Truro, Wednesday.—Attendance fair, business fairly brisk. Fat bullocks, 56s to 60s per cwt; barreners, 40s to 45s; store bullocks, 40s to 45s; cows and calves, £10 to £15 each; rearing calves, 16s to 37s 6d; wethers, 7½d to 8d per lb; ewes, 5d to 5½d; lambs, 7½d to 8d; pigs, 10s to 45s each; beef, 6d to 8d per lb; mutton, 6d to 8½d; lamb, 8d to 9d; veal, 6d to 8d; pork, 6d to 8½d.; pork (carcases), 5d to 5½d.

Wolverhampton, Wednesday.—Fair supply all round; trade slow. Beef, 5½d to 7d per lb; mutton, 6½d to 9d per lb; lamb, 9d to 9½d per lb; veal, 7d to 8d per lb.

Worksop, Wednesday.—Very small supply of stock, and a small attendance of farmers. Trade was good. Best beef, 8s to 8s 6d per stone; secondary, 7s 6d to 8s; best Southdown wether and crossbreds, 8½d to 9d; ewes, 6½d to 7d.; lamb, 10d to 11d; veal, 9d per lb.

Yeovil, Friday.— Heifers and calves made from £16 10s to £19 10s for best, and from £11 10s to £15 for secondary; cows and calves, £11 to £17 10s; barren heifers, £11 10s to £13 5s; stirk heifers, £9 10s to £10 10s; yearlings, £5 17s 6d upwards; wether sheep, 42s to 57s 6d; ewes, 40s to 51s; lambs, 28s 6d to 37s 6d.

York, Thursday.—The market was almost devoid of buyers, farmers taking advantage of the fine weather to get in their hay. Fully 1,200 sheep were penned, but there was a very slow demand, and the recent high prices were hardly maintained. Twice-crossed shearlings made up to 50s; best Mashams, 48s; secondary up to 44s; smaller sorts, 38s to 42s. There was a comparatively small show of English and Irish store cattle, but trade was slow, and prices were in favour of buyers. The few sales effected were at £1 to £2 per head less money.

FEEDING STUFFS.

Liverpool, Friday.—With the genial summer weather now prevalent, agriculturists are busy with the ingathering of the hay crop, and there is little or no demand for feeding stuffs; values are firm and are annexed.

—H. Jones Langar and Co.

Mark Lane, Monday.—Linseed Cakes: With a continuance of fine weather, and farmers naturally very busy haymaking, markets are quite neglected for the moment, but values are firm and unchanged at last week's quotations. Russian can still be had at £7 to £7 2s. 6d. in mats and £7 5s. to £7 7s. 6d. in bags. East India seed pures are held at £7 3s. 9d. to £7 5s. Fine seedy Calcuttas, with little offering, command £7 7s. 6d. to £7 10s. London made are in more request at £7 5s. to £7 7s. 6d. Cotton Cakes.—With small stocks and little more inquiry, prices are well maintained at £4 13s. 9d. to £4 17s. 6d. for Egyptian in bags, while £4 15s. to £4 17s. 6d. is still asked for English makes, and Bombays at £4 1s. 3d. Decorticated: London-made pures move off freely at £7 2s. 6d. to £7 5s., and special digestive meal at £5, but American meet little inquiry at £6 15s. for cake and £6 12s. 6d. to £7 for meal, according to quality. Rape Cakes rather easier. East India, £4 15s. to £4 17s. 6d. Maize Germ Meal. — White American is still unobtainable on this market, English makes therefore maintain their prices of £5 15s. to £5 17s. 6d. with little business passing. Maize gluten meal is only obtainable in small lots, although there are ready buyers in any position at £5 15s. to £5 17s. 6d. Rice Meal.—Parcels in warehouse are still offered at £4 13s. 9d. to £4 15s., whilst a trifle less money would be accepted for lots on passage. Locust beans continue scarce and very firm at £5 10s. for whole, and £5 15s. for kibbled. Dried brewers' grains met a steady sale at £4 15s. for ale, and £4 10s for mixed. Nitrate of soda is the turn easier at £10 17s. 6d. to £11.

—Pinnock Bros., 30, Mark Lane, E.C.

CHEESE.

Glasgow, Wednesday.—A holiday feeling still prevails, and business small at unaltered values. Demand for season much under average. Canadians still considered better value, as they arrive in good condition. Best home Cheddars, 57s to 60s; Dunlops, 55s to 59s; Canadians, 55s to 57s per cwt.

Highbridge, Tuesday.—There were 38 tons of cheese; a large attendance of buyers; a brisk trade, and all was cleared. Best Caerphilly dairies realised up to 51s per cwt.; secondary dairies, 47s 6d to 50s; and other dairies, 41s 6d to 44s. A few inferior lots failed to reach 40s. Cheddars:—51s 6d to 60s; truckles, 56s to 58s; doubles, 52s 5d to 54s 6d.

Newport, Wednesday. — About 10 tons pitched, a good demand, and a fair attendance. Quotations:—Caerphillies, 42s to 49s per cwt; fancy dairies, 49s to 50s; Derbies, 54s to 62s; truckles, 56s to 65s; doubles, 58s to 61s.

EGGS.

(Number per 1s.)

Altrincham: 10. Appleby: 12 and 13. Barnstaple: 14. Berwick: 1s to 1s 6d per doz. Birmingham: 11 and 12. Camelford: 14. Carlisle: 11 and 12. Chester: 11 and 12. Dartmouth: 1s to 1s 2d per doz. Derby: 10 and 11. Devizes: 14 to 16. Doncaster: 12 to 13. Dorchester: 11½d. to 1s 2d per doz. Evesham: 10d to 1s 0½d per doz. Hereford: 12 to 15. Ipswich: 12 to 14. Kidderminster: 11. Lancaster: 12. Lincoln: 12 and 13. Market Drayton: 12 and 13. Penrith: 12 and 13. Penzance: 8½d to 10½d per doz. Plymouth: 12. Retford: 1s 8d per score. Ripon: 11 to 13. Scarborough: 11. Shrewsbury: 12 and 13. BUTTER.

(Price per lb.)

Altrincham: 1s 2d to 1s 3d. Appleby: 9d to 11d. Barnstaple: 1s to 1s 1d. Berwick: 9d to 1s. Birmingham: 1s 2d to 1s 3d. Camelford: 11d. Carlisle: 10d to 11d. Chester: 1s. Dartmouth: 10d to 1s. Derby: 1s to 1s 2d. Devizes: 1s 3d to 1s 4d. Doncaster: 1s to 1s 1d. Dorchester: 9½d to 1s 1d. Evesham: 10d to 1s. Hereford: 11d to 1s 1d. Ipswich: 1s to 1s 2d. Kidderminster: 1s 2d. Lancaster: 1s to 1s 1d Lincoln: 10d to 1s. Market Drayton: 1s. Penrith: 9d to 11d. Penzance: 8½d to 10d. Plymouth: 11d to 1s. Retford: 1s. Ripon: 1s 6d to 1s 9d per 24 oz roll. Scarborough: 1s 1d. Shrewsbury: 11d to 1s. Spalding: 11d. Stamford: 10d to 1s. Stockport: 1s to 1s 2d. Stockton: 10d to 1s 1d. Totnes: 1s to 1s 1d. Truro: 8½d to 10d. Worcester: 10d to 1s 2d. Worksop: 11d to 1s 1d. York: 11d to 1s.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Plentiful supplies of fruit and vegetables on offer, the demand being brisk. Quotations for English produce:—Grapes, 8d to 3s; strawberries, 2s to 3s per peck; raspberries 5s to to 6s 6d per dozen punnets; peaches, 1s 6d to 10s 6d per dozen; nectarines, 1s 6d to 10s; green figs, 3s to 5s per dozen; cherries, 3s to 7s; black currants, 4s to 6s; red ditto, 3s 9d to 4s 6d per half-sieve; green beans, 6d to 7d per lb; tomatoes, 3s 6d to 4s 3d per 12 lb; onions, 5s to 6s per cwt; mushrooms, 6s to 8s per 12 lb; spinach, 9d; beetroots, 1s 6d to 2s per bushel; carrots, 3s to 3s 6d; turnips, 2s 6d to 3s; parsley, 1s 6d to 2s; mint, 1s 3d to 1s 6d per dozen bunches; endive, 1s 6d to 1s 9d per dozen; cos lettuce, 6d per score; cucumbers, 4s to 6s per flat; green peas, 3s to 4s per bag; broad beans, 1s to 1s 3d per bushel; horseradish, 10s 6d to 15s per dozen bundles; cabbage, 3s to 4s per tally; cauliflower, 2s to 3s per dozen; vegetable marrows, 3s to 5s per dozen; potatoes, 3s 6d to 6s 6d per cwt.

POULTRY AND GAME.

Smithfield, Saturday.—Fairly good supply and demand. Prices: Surrey and Sussex fowls, 3s to 4s 6d; Lincolnshire fowls, 2s to 3s; Essex fowls, 1s 9d to 2s 9d; Irish fowls, 1s 6d to 2s 3d; quails, 1s; feathered pigeons, 8d to 9d; Bordeaux pigeons, 10d to 1s 2d; goslings, 4s to 5s; country ducks, 2s to 2s 6d; Aylesbury ducks, 2s 3d to 3s; tame rabbits, 1s 2d to 1s 6d; wild rabbits, 6d to 8d; live hens, 1s 6d to 2s each; Australian rabbits, 6s to 7s 6d per doz.

WOOL.

Canterbury, Saturday.—Kent fleeces very firm, but no improvement in prices. Best lots 11d per lb.; lamb wool, 7d; locks, 5d; half-breds, 11d. Downs maintain improvement of a week ago, 12d to 13d per lb.

HOPS.

Canterbury, Saturday.—There is improvement in development of the bine, but nights continue none too warm. Fresh fly continually arriving, and washing is generally resorted to. Little business doing on hop market.

TO HOP FACTORS.—Wanted Situation as TRAVELLER. —J. Selby, Fern Villa, Seal, Chart.

Lincolnshire Notes.

AT last! It may be the anticyclone, it may be a hot spell from the Atlantic, or it may be a new arrangement of sun spots. Who cares, so long as it is the summer. Long expected come at last; come just in time to save the harvest and to relieve our despair. No more we talk of finishing off the crops with a harvest oi watercress, no longer discuss the advantages of wet storage. We are too busy. The haymakers are at it for all they are worth, and if they have not done wonders during the last few days they are not worth much.

AMONGST other things the finer weather, if it stays, will give the bees a chance. It is a little they have had to bless themselves with this year so far. Wet weather, we are told, is fatal to the gathering of the honey. The rain washes the pollen from the flowers, and to some extent destroys the scent; it kills the energy of the bee, even if it does not drown him out of existence; and altogether we are told that this will be the worst season the Lincs beekeepers have had. That is, unless the busy buzzers can make up for lost time when the heather is in bloom. All this sounds very disheartening. Another profitable Lincs industry sacrificed to the Meteorological Moloch. But the sunshine is a great tonic. With a continuance of the Italian skies under which I am revelling just now, I should not be at all surprised if things do not come all right after all. They generally do somehow.

THE Lincolnshire Curly Coated pigs have jumped into fame, thanks to the brave show which they made at the Royal Society's exhibition at Lincoln, and to the favourable things which have been written of them both before and after the event. It is just possible they may lay the foundation of a great Colonial herd. A preliminary sale of pigs has been arranged to be held on August 28, at Boston, and another on October 9, and the association is applying for special classes at the next Royal Show. Judging by the opinions of the experts, there is a great future before the Lincolnshire Curly Coats.

THE two big county stock sales to which I made preliminary reference last week, were all the success that could possibly have been hoped from them. At Mr. Dudding's Riby Grove sale many handsome prices were realised, particularly for the animals that were secured for exportation. But whilst the Argentine secured the plums of the market, one was glad to see that the Royal Show winning ram remains in the county. Messrs. S. E. Dean and Sons will make good use of him, I dare say, and will find a way of making him earn the 900 guineas which they gave for him, I doubt not. He is worth the money.

THE dispersal of the stock of Messrs Dean and Sons' Heath House farm at Nocton did not yield any such fancy prices. The top priced cow was 310 guineas Its purchaser again hailed from South America whither went a good many other fine bargains in cattle flesh. The average prices were not equal to Mr. Dudding's, but who will say that £72 for cows and £45 for bulls is not profitable breeding. The highest priced ram fetched 300 guineas, which was paid by Mr. F. G. Battle on behalf of Senor Ezcurri, of South America, and which was the champion in its class at the Royal. Mr. Dudding made two purchases at 100 guineas and 105 guineas, and Lincolnshire well held its own in the rest of the competition. Fifty-two rams made an average of £37, which again is good business. There is money in well-bred stock to-day if there never was.

STILL pursuing its busy propaganda, the Farmers' Union has three meetings booked for the next few weeks. To-day (Tuesday) it will be at Market Rasen, where Mr. C. Holdershaw, J.P., presides over a meeting to be addressed by Mr. E. W. Howard, the vice-chairman, and the Rev. T. Hamilton, the chaplain. The three subjects for discussion are—organisation in general, the Small Holdings Bill, and the Lighting Bill in particular. Doncaster is to be invaded on the 27th and Peterborough on the 10th August. The time is evidently coming to talk of many things, and amongst them the position and status of the Lincolnshire Farmers' Union. It will have to think of a change of name. Its present one is getting too parochial.

MR JOHN EVENS, of Burton, whose noted herd is achieving world-wide fame, has received a tangible memorial of his successes at the Royal Show. His landlord is Lord Monson, who on Thursday celebrated the birth of a son and heir at Burton Hall. During the proceedings his lordship presented Mr. Evens with a silver tankard, a copy of the Georgian tankard which the tenantry gave his lordship and Lady Monson on the occa- of their marriage.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The Government report on the growing crops indicates that wheat is below an average promise. Of barley, the information which is put before us from St. James's Square is very indecisive. Oats are regarded as a healthy and vigorous crop in East Anglia, and as an average in Sussex, Somerset, and Wales. On the other hand, North of England reports are not encouraging. The potato crop is said to promise well in East Anglia, Berks, Hants, Surrey, Dorset, and Shropshire, but the reports from Wales and North of England are adverse. We hear of bligh t in Kent, Sussex, and Cornwall, and of disease in Pembroke and Lincoln. The root crops, on the whole have done well, but there are considerable exceptions, including the whole west of Scotland, the English Lake District, and Devon. Hay is a big crop of very poor quality. Of fruit crops, plums promise the best yield; pears are regarded as a mediocre crop. Apple reports vary much; they are good from a few districts, but are bad from mid-Kent, Durham, Hereford, Worcester, and Devon.

Speaking of them generally, the Board of Agriculture reports suffer from vagueness. The wheat and barley crops promise a large yield of straw so far as we ourselves can see and learn, but are already somewhat badly lodged and are likely to be lacking in quality, wheat especially. Oats, with a fine August, will be the best of the white crops, but they are not able to do wholly without sun, and the weather continues to be largely lacking in that vital element. Beans, peas, and rye are better than the more important crops.

The French harvest has been terribly interfered with by storms of rain and wind, and in Germany the downpours have been torrential. It is certain that both these countries will be very considerable importers of wheat in the next cereal year. The French needs will not be on the scale of the German, but France is sometimes not a buyer at all, so that when she enters the arena her influence always seems to be much felt. Italy will need about 5,000,000 qr. of foreign wheat, for which she will look to Roumania in vain. She will, therefore, buy largely of Russia, and in doing so enter into competition with both England and France. These items in the Continental outlook cannot safely be ignored by the British markets.

The latest news from America points to a total wheat crop in the United States of about six hundred million bushels, which is just seventeen million quarters below the production of 1906. The American farmers are said to be forming an alliance to hold wheat for 32s. per quarter, but whether "dollar wheat," as the phrase goes, will be the rule in 1907-8 or not depends very materially on the railway companies transporting it to the seaboard. Into the hold which railway trusts in the States have on farmers we cannot now go, but we fear that the control is very considerable and wide-reaching.

The sales of British wheat at the statute markets since harvest have been as follows:—

This season ...	2,610,000 qr.,	at 27s. 3d. per qr.
Last ,, ...	2,881,000 qr.,	at 28s. 8d. ,,

The price should have been higher, not lower, than last season, for the offerings were less and quality most certainly not inferior.

The sales of British barley have been as follows:—

This season ...	3,365,000 qr.	at 24s. 3d. per qr.
Last ,, ...	3,199,500 qr.	at 24s. 4d. ,,

Barley holders have done better, proportionately speaking, than those of wheat.

The sales of British oats have much exceeded the average, and the price has been fairly satisfactory:—

This season	1,667,000 qr.	at 18s. 2d. per qr.
Last ,, ...	1,007,000 ,,	18s. 6d. ,,

The imports of the United Kingdom last week were as follows:—

Wheat, 354,000 qr.: a fair supply.
Flour, 72,000 sks.: a very small arrival.
Barley, 35,000 qr.: a third of an average.
Oats, 66,500 qr.: much less than usual.
Maize, 297,000 qr.: considerably more than usual.

The imports of breadstuffs since harvest have been:—

Wheat	19,140,000 qr.
Flour	4,091,000 ,,
Breadstuffs	23,231,000 qr.

Changes in prices since January 1 have not been unsatisfactory:—

Wheat, now.....	32s. 6d.	per qr.
,, then.....	26s. 0d.	,,
Rise	6s. 6d.	,,
Barley, now.....	24s. 6d.	per qr.
,, then.....	23s. 11d.	,,
Rise	0s. 7d.	,,
Oats, now.....	21s. 1d.	per qr.
,, then.....	17s. 3d.	,,
Rise	3s. 10d.	,,

The uniform advance is particularly a good feature. The low averages for the period September 1—July 27 will be seen to be a product of over-eager sales from September 1 to December 31, 1906. We hope this warning will not be lost upon farmers in September, October, November, and December of this year.

The wheat gradient this week is as follows:—

Mark Lane	34s. 5d. per qr.
Doncaster	31s. 10d. ,,
Range ...	2s. 7d. ,,

The London average is the best this year.

The barley gradient is:—

Mark Lane.....	27s. 6d. per qr.
Reading	24s. 9d. ,,
Range	2s. 9d. per qr.

Oats keep an excellent price in every county:—

Doncaster	22s. 1d. per qr.
Lincoln	20s. 6d. ,,
Range.....	1s. 7d. ,,

Our expectation of rice on passage having fallen to 41,000 tons, the spot market is firmer from a week ago. Total imports into the United Kingdom since January 1 have been 901,000 tons, against 923,000 tons last season. Stocks, therefore, are probably below the average.

Of wheat the quantity on passage is as follows:—

Californian.....	220,000 qr.
American	220,000 ,,
Russian	295,000 ,,
Indian.....	550,000 ,,
Argentine	540,000 ,,
Australian	690,000 ,,
Various	15,000 ,,
Total	2,530,000 qr.

This is almost exactly an average expectation.

Of flour 174,000 sacks are on passage.

Of barley the supply afloat is extremely small.

Russian	15,000 qr.
Roumanian	11,000 ,,
American	70,000 ,,
Asiatic	31,000 ,,
Total.....	127,000 qr.

Of oats only 79,000 qr. are on passage.

The quantity of maize in sight, however, is heavy, the details being as follow:—

American	275,000 qr.
Argentine	375,000 ,,
Russian	150,000 ,,
Roumanian.....	250,000 ,,
Turkish	90,000 ,,
Indian, &c.....	15,000 ,,
Total.....	1,155,000 qr.

Shipments from America last week were very moderate, the chief items being:—Wheat, 179,000 qr.; barley, 2,000 qr.; oats, 60,000 qr.; maize, 240,000 qr.; and flour, 107,500 sacks.

Argentina shipped 267,000 qr. of maize, 100,000 qr. of wheat, 29,000 qr. of linseed, but only 6,000 qr. of oats.

Russia sent off 161,000 qr. of wheat, 43,000 qr. of barley, 60,000 qr. of oats, and 101,000 qr. of maize. From Roumania 62,000 qr. of wheat and 307,000 qr. of maize were exported; from India 176,000 qr. of wheat and 46,000 qr. of linseed; and from Australia 29,000 qr. of wheat, 15,000 sacks of flour, and 5,000 qr. of peas.

LONDON HAY TRADE.

Saturday.—The general shortage of supplies from all sources still continues, and with stocks almost exhausted the trade presents a very firm appearance. There is apparently still a large quantity of hay to be saved, and until this is cleared up supplies must keep at a very low ebb. Although the market is very firm, prices show little or no change on last week's advance in values, but there is keen competition for whatever is on offer.

The arrivals of old crop seem to be dwindling fast, and we notice that a large proportion of the present supplies consist of this season's crop, for which very fair prices have been obtainable, new clovers in good condition realising about 80s to 85s per ton; new mixture, 75s to 80s per ton; new hay, 65s to 70s per ton. Considering the weather farmers had up to a fortnight ago, it is surprising to notice, how such a large quantity is arriving in an apparently sound condition. Straw is also coming along in very short supply, and prices here again show a small advance. In the foreign market shipments continue very short, and importers are finding a good trade at present values.

Prices ruling are about as follow:—English best meadow hay, 85s to 90s per ton; good meadow hay, 75s to 82s 6d per ton; plain hays, 70s per ton; best clovers, 95s to 100s per ton; good clovers, 85s to 90s per ton; inferior clovers, 80s to 82s 6d per ton; best mixtures, 95s to 97s 6d per ton; good mixtures, 87s 6d to 92s 6d per ton; plain mixtures, 80s to 85s per ton; seconds hays, clovers, and mixtures, 62s 6d to 70s per ton; wheat straw, 26s to 28s per load; oat straw, 26s to 28s per load; barley straw, 26s to 28s per load, all ex rail London. Foreign: Canadian mixture, none; first quality Dutch hay, 67s 6d; second quality Dutch hay, 62s 6d to 65s per ton; good French hay, 65s to 67s 6d per ton; French and Dutch clovers, 85s per ton. These prices are by barge load delivered alongside a London Thames wharf.

THE BALTIC.

Wheat cargoes are in very small request, but holders are not disposed to take less money, the Continental crop reports being decidedly below the average, while the home crop is very late. Transactions include S.W. Russian (Bessarabian) at 34s. 6d. per 492 lb., Fine Azima at 35s. per per 492 lb., Blue Stem at 36s. per 500 lb., White Karachi at 34s. 6d. per 492 lb., Red Karachi at 34s. per 492 lb., Argentine at 33s 9d per 480 lb., No. 1 Hard Manitoba at 36s. 3d. per 480 lb. American Red Winter is held above buyers' ideas.

Maize cargoes are firmer, despite the large supply on passage. A cargo of mixed American sold on Saturday for 23s. 3d. per 480 lb., and one of Argentine for 22s. 9d. per 480 lb.

Barley for autumn shipment is offered at 6d. decline, 20s. 6d. per 400 lb. for Russian. Other cargo sales include black Libau oats at 17s. per 304 lb.; Panderma beans at 32s. 6d. per 480 lb.; white Calcutta peas at 33s. 9d. per 504 lb.; Calcutta linseed at 42s. 6d. per 410 lb.; brown Cawnpore rapeseed at 54s. 9d. per 416 lb.; and Egyptian cottonseed at £8 5s. per 2,240 lb.

The London Corn Trade Association c. f. and i. quotations, for the settlement of rejections and difference in weights on wheat under Rule No. 4 of the Association East Indian wheat contracts, are as follows, viâ Canal:—

Crop 1906.—Choice White Karachi, 35s. 6d.; Soft Red Karachi, 35s; new clean terms, but 4 per cent. barley.

Choice White Karachi 35s., soft red Karachi 34s. 3d., old terms.—July 26.

N.B.—The committee has decided to quote rejection prices for "old terms" up to and including July shipments, but not later.

WET AND DRIED GRAINS.

Mark Lane, Monday.—Wet Grains: Prices remain about the same, with a slightly easier tendency, owing to heavier brewings, and business has been done at 11s to 12s ale, and 9s to 9s 6d porter per ton. Pressed white distillery meal 32s 6d per ton on rail, London. Dried Grains.—The demand continues fairly brisk and prices are firm at—Distillers, 105s; ale, 92s 6d to 95s; mixed, 85s to 87s 6d; and the same prices for monthly deliveries, July to September, on rail, London. Calcutta rice meal, 80s; rice germ, 97s 6d; American cane treacle in good demand, 87s 6d per ton, on rail, London. Kiln dried sea-damaged Australian wheat from 20s per qr.—Hamlyn and Co.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English steady, quiet, unchanged prices. Foreign steadily held, at Monday's prices, but demand very small. No. 1 Northern Manitoba, ex ship, he'd at 37s; No. 2 at 36s; choice white Karachi at 34s 6d; red Karachi at 34s; Australian, landed, at 36s 6d; La Plata at 35s 6d to 36s 6d. Flour steady, quiet. Maize dull, easier tendency. Odessa, ex ship, quoted at 23s, landed at 23s 6d to 23s 9d; mixed, landed at 24s. Barley quiet. Azoff-Black Sea, landed, quoted at 24s 9d; Persian at 22s 6d to 23s. Oats dull, easier tendency. La Plata quoted at 18s; South Russian, 38 lb, 17s 6d to 18s.

Mark Lane, Friday.—Wheat: English firm, but quiet. Foreign steadily held at late rates, but demand not active. No. 1 Northern Manitoba, ex ship, quoted at 37s to 37s 3d; No. 2 at 36s; choice white Karachi at 34s 6d; red Karachi, 34s; Australian, landed, at 36s 6d; La Plata 35s 6d to 36s 6d. South Russian, 34s to 37s. Flour steady, quiet. Maize dull, easier tendency; Odessa, ex ship, quoted at 22s 9d to 23s; new La Plata, ex ship, due to-day, at 23s; mixed American, landed, at 24s. Barley steady, quiet; Azoff-Black Sea, landed, held at 23s 6d to 24s 9d; Persian, 22s 6d to 23s. Oats firmly held, but not active; La Plata quoted at 18s; South Russian (38 lb), 17s 6d to 18s.

COUNTRY.

Ashford, Tuesday.—The attendance was limited, farmers having little corn to offer and being busy with their hay. Quotations were nominally unchanged, wheat making 34s to 37s; English barley, 28s to 29s; foreign grinding barley, 26s to 27s; tick beans, 33s to 34s; Mazagan beans, 30s to 31s; flat and round maize, 25s to 27s; white oats, 22s to 25s; black oats, 21s to 23s; grey peas, 32s to 33s per qr.

Berwick, Saturday.—Little or no grain on offer. Prices unchanged.

Birmingham, Thursday.—A very meagre attendance here, and trade exceptionally slow. Sellers of foreign wheats ask last week's prices, but would concede a little to force sales. There was very little English wheat on the market, which made from 12s 6d to 12s per 186 lb delivered. Feeding stuffs met with a feeble demand, prices favouring buyers. English oats and beans were unchanged in value.

Cambridge, Saturday.—During the week the wheat trade has been firm, at about the previous week's rates. At this market there were a few wheats offering, and prices favoured buyers by about 6d on the week—34s to 34s 6d per 504 lb on rail being bid. A few beans in farmers' hands.

Canterbury, Saturday.—This market remained fairly firm, but trade was by no means brisk; 65 lb wheat made 38s, an advance of 6d on the week. Barley ranged from 27s to 29s; 45 lb white oats, 25s 6d; 38 lb black oats, 21s; Mazagan beans, 30s to 32s; tick beans, 32s to 35s 6d; grey peas, 31s to 33s per qr.; tares in small supply, 5s 6d to 6s 6d per bushel.

Colchester, Saturday.—Wheat 6d cheaper. Oats and beans steady.—COLIN TAYLOR, KING AND CO., LTD.

Coventry, Friday.—Attendance small, and thin supply of wheat, last week's prices being fairly well maintained. Oats firm at late advance. Beans and peas quiet without change. Quotations: Wheat, 12s to 12s 9d per 186 lb; barley, 28s to 34s per 448 lb; peas, 12s to 14s; beans, 12s to 13s 6d per 196 lb; oats, 24s to 26s per 352 lb.

Derby, Friday.—A good supply and a moderate demand. White new wheat, 38s to 39s per 36 stones; red new wheat, 37s to 38s; malting barley, 31s to 32s per 32 stones; grinding ditto, 29s to 30s; old beans, 35s to 36s; new ditto, 35s to 36s; old oats, 25s to 26s per 24 stones; new ditto, 24s to 25s.

Devizes, Thursday.—There has been no alteration in the price of wheat during the week, but the trade is firm. Other corn unaltered. Best wheat, 17s to 18s; secondary, 16s to 16s 6d; malting barley, 24s to 30s; feeding, 22s to 24s; old oats, 20s to 24s; new beans, 15s to 16s 6d; fine flour, 27s to 30s; extra fine, 32s to 36s.

Doncaster, Saturday.—Scarcely any English wheat on offer, but prices very firm and 3d per load dearer; top price 14s 6d per load. Foreign wheat continues firm, but met a slow trade. Oats were firm to 6d per qr. more, with a small show. Maize was a shade easier. Other feeding stuffs unchanged.

Dorchester, Saturday.—Only a limited attendance again to-day, haymaking operations still keeping many at home. Very small offer of corn, wheat supplies practically exhausted. Home grown, owing to shortage, has receded but little from recent currencies, but foreign rather favours buyers. Barley slightly easier, and both oats and maize were obtainable for less money. Beans and peas firm. Flour trade inactive at late currencies.

Exeter, Friday.—Fairly good attendance, trade very slow. Quotations: English wheat, 4s 3d to 4s 4d; superfine flour, 25s to 27s 6d; fine 24s to 25s.

Glasgow, Wednesday.—Wheat and flour quiet, and prices unchanged since last Wednesday. Indian corn is 1½d cheaper on the week, and maize is 1½d dearer. Foreign oats the turn in buyers' favour, owing to large arrivals. Other articles of the trade unchanged in price at late rates.—GIBSON AND CLARK.

Glasgow, Friday.—Market quiet, and prices practically unchanged, with the exception of foreign oats, which are 1½d cheaper since Wednesday.

Gloucester, Saturday.—English wheat 6d cheaper. Reds, 33s to 33s 6d; whites, 33s 6d to 34s. Foreign wheat 3d cheaper: Plates, 35s 3d to 36s 3d; Russians, 33s to 35s. Plate maize, 9d down, at 24s; flat 3d cheaper, at 24s; Bessarabian 6d down, at 24s. Barley 3d cheaper, at 25s 9d. Oats 6d down; Black, 20s to 20s 6d; white, 22s to 22s 6d.

Grantham, Saturday.—A very small market, with prices about the same as last week. Wheat, 35s to 36s; oats, 22s to 23s 6d; beans 32s to 33s per qr.

Hereford, Wednesday.—No samples of English grain on offer, values nominally unchanged; foreign grain also dull. Quotations:—Wheat, 3s 10d to 4s per bushel of 62 lb; barley, 3s 3d to 3s 9d per 56 lb; oats, 2s 6d to 2s 10d per 40 lb; beans, 3s 9d to 3s 11d per 65½ lb; maize, 3s 3d to 3s 6d per 60 lb.

Ipswich, Tuesday.—Scarcely any wheat on offer; trade steady at late rates. Reds, 34s to 36s per 504 lb. Grinding barley firm and fully as dear. Maize rather easier. Oats steady. Beans and peas unaltered.

Leeds, Tuesday.—Weather again cool and less settled. The wheat trade throughout the past week has ruled inactive but very steady. Millers are buying from hand to mouth, and merchants are by no means anxious sellers. Crop reports from the Continent of Europe are far from favourable. Shipments continue moderate, and harvest will undoubtedly be late; all this tends to keep the trade firm. Maize, 3d to 6d lower; beans and oats quiet.—DUNNS AND CO.

Leeds, Friday.—English wheat was scarce and firmly held at Tuesday's highest quotations. Foreign was fairly plentiful, with an easier tendency. Flour was in good demand, mostly for medium qualities, up to 28s, best runs making 31s. Maize was lower. Plate and Odessa closed at 24s. Feeding malting barley favoured sellers, prices ranging from 28s to 31s. Feeding barley, 26s to 28s. Beans, peas, and oats were unchanged.

Leicester, Saturday.—Moderate attendance, very small supplies of home-grown wheat. Prices ruled firm, but trade was very slow. Red wheats, 35s to 36s; white wheat, 36s to 37s per 36 stones; feeding barley steady and firm; beans steady; fine oats in active demand at 24s to 25 per 24 stones.

Lincoln, Friday.—A very moderate attendance, and trade correspondingly slow. Wheat an extremely small supply, and rates about the same as last week. English wheat about 35s delivered. No barley trade reported. Few oats on offer at about last week's rates, ranging from 22s to 24s.

Maidstone, Thursday.—The return of sunshine has had the usual effect on the trade, and although the show of wheat samples were but scanty, sales were not lively, and a reduction of 6d per qr where pressed was the result. Barley continues dear, as the supplies are remarkably short. The cost of English oats is unusually high, and they are very firm business. Foreign are weaker than recently. Beans and peas are not much in request, although so few on offer. Maize can be bought at rather under the figures of last week. Most descriptions of feeding stuffs move off at quite as much money as when last reported.

Manchester, Thursday.—English and foreign wheat practically unchanged and closed firm at last week's prices. Flour slow and unchanged. Indian corn showed little change generally, although European grades were occasionally 1½d more money. Cheshire oats 1d to 2d per bushel dearer and little done. Little barley was offered. Beans and peas steady. Bran and thirds easier.

Newark, Wednesday.—Very small attendance; prices firm, but little doing. Quotations: Wheat, red and white, 33s to 35s 6d; barley, malting, 28s to 30s; grinding, 25s to 26s; oats, white, 23s to 23s 6d; black, 22s to 22s 6d; beans, 33s to 34s per qr.

Newcastle-on-Tyne, Saturday.—A very quiet trade prevailed at our to-day's market for wheat. White qualities favoured buyers. Red qualities, however, was firm at last Saturday's prices. Maize firm at late rates. Peas and beans remain firm at unchanged prices; demand, however, was limited. Oats steady; unchanged in values. Barley remains quiet at unchanged prices.—JOSEPH POLLARD AND CO.

Northampton, Saturday.—Hardly any business was done by the very small attendance at the Exchange this morning. Prices remained firm and for the most part unchanged. Wheat, 34s to 34s 6d; barley, 28s 6d to 30s; white oats, 22s 6d to 23s 6d; black oats, 22s 6d to 23s 6d; beans, 31s to 33s; peas, 30s to 32s; flour, 26s to 30s.

Norwich, Saturday.—The market was a repetition of last week, there being a small supply. Values were about 35s per qr delivered, 35s 6d being paid in some instances. There was a very quiet demand in the feeding stuff trade, and prices were steady. Millers' offals, owing to scarcity, were 5s per ton dearer. Linseed and cotton cakes were firmer at last week's prices.

Nottingham, Saturday.—No English wheat offering. Foreign held for full rates. Grinding barley firm. Oats small supply, 6d higher. Beans firm.—ROBT. HUBBLE.

Peterborough, Saturday.—The weather has been rather unsettled during the past week, and harvest comes only on slowly. Very little corn of any kind offering on our market to-day, and prices nominally remain as last quoted. Wheat, 33s 6d to 34s 6d; oats, 22s to 23s; beans, 31s to 33s.—THOMAS HILL AND SON.

Preston, Saturday.—The market for wheat has been featureless during the week, and values have been hardly so good. To-day's market was only sparsely attended, and no wheat or other grain was offering by farmers, who are busy in the hayfields. Wheat, white, new, 13s 9d to 15s per windle of 220 lb; ditto red, 13s 6d to 14s; oats, old, 3s 3d to 3s 4d per bushel; beans, 16s 6d to 17s per windle of 220 lb.

Reading, Saturday.—There was rather a better attendance, with a trifling improvement in trade prices. Wheat, 33s to 36s; barley, the trade in which is practically at a standstill, 28s to 30s; oats, 20s to 23s; peas, 29s to 31s; beans, 33s to 37s.

Retford, Saturday.—Scarcely any locally-grown wheat on offer, and prices kept firm, with a stiffening tendency, at 34s to 35s per qr. All kinds of grain for feeding purposes were higher in value, especially oats, best white selling at 24s to 25s; ditto black, 22s 6d to 23s; Indian corn, 26s to 27s; grinding barley, 28s; English beans, 32s to 33s. Beans, oats, and barley are looking well. Wheat generally only moderate.

Ripon, Thursday.—No local wheat on offer. Foreign wheat unchanged. Grinding barley firm at 6d per qr dearer. An average attendance. Wheat, 33s to 34s 6d; wheat, foreign, 36s to 40s 6d; barley, grinding, 26s to 27s; oats, 24s to 25s; maize, round, 26s to 27s; ditto, flat, 26s to 27s per qr.

Sheffield, Tuesday.—Quiet market. English wheat and some classes of foreign are quoted 6d per qr higher, and the whole tone is firm. Maize quoted at last week's prices. Beans rather dearer. Peas, oats, and barley unchanged. Miller's offals in good demand at full prices. Quotations:—Wheat, white, new, 34s to 35s; ditto red, new, 34s 6d to 35s 6d per 504 lb; oats, black, 22s 6d to 23s; ditto white, 23s 6d to 24s per 336 lb; peas, grinding, 33s 6d to 34s; ditto blue, 75s to 90s per 504 lb; beans, English, 35s 6d to 36s 6d per 532 lb; barley, grinding, 26s to 26s 6d; ditto malting, 28s to 32s per 448 lb; Indian corn, small, 25s 9d to 26s; ditto Plate, 25s 6d to 25s 9d; ditto flat, 26s to 27s per 480 lb.

Shrewsbury, Saturday.—New wheat, 14s 6d to 15s per 225 lb; new oats, 14s to 15s per 225 lb; peas, 15s 6d to 16s per 225 lb; beans, 14s 6d to 15s per 240 lb.

Stamford, Friday.—Business very limited. Small attendance. Wheat quoted 34s to 34s 6d, oats 22s to 22s 6d, and peas 32s to 32s 6d per qr. No change in peas and barley.

Stockton, Wednesday.—There was no local wheat showing. Foreign wheat trade was slow, and prices unchanged from last week. Maize 3d to 6d easier, oats steady.

Sunderland, Saturday.—Farmers being busy with their hay, there was little business passing, and there is no change to note in the value of wheat, barley, and oats. Arrivals coastwise:—Oats, 207 qr.; foreign, nil.—E. AND F. RICHARDSON.

Warwick, Saturday.—A very small amount of business was transacted. No English wheat was on offer, and the prices were similar to those of last week.

Winchester, Saturday.—English wheat scarce but quiet. Foreign unchanged. Barley easier for forward positions. Maize and oats unaltered. Flour steady at late rates.—FEAR, COLEBROOK AND CO., LTD.

Wisbech, Saturday.—Thin attendance and little doing at market. Prices firm generally.

Fresh thrashed wheat, 34s to 35s per 504 lb; oats, 22s to 23s per 336 lb; beans, 32s to 34s per 532 lb.—James Fletcher.

Worksop, Wednesday.—Very small attendance, and few samples of grain on offer. White wheat, 33s to 34s; red wheat, 32s 6d to 33s 6d; barley, 27s to 29s; white oats, 22s 6d to 24s; black oats, 21s 6d to 23s; maize, 26s to 27s 6d; beans, 34s to 36s per qr.

Yeovil, Friday.—Home-grown wheat sold at at from 17s 6d to 18s 3d; foreign, 3d dearer; English white oats, 23s to 24s; black ditto, 22s to 23s; Irish black, 19s 6d to 20s; ditto white, 21s to 21s 6d; malting barley, 30s to 32s; brewing, 27s 6d to 29s 6d; feeding (English), 26s 6d to 27s 6d; grinding (foreign), 25s 6d to 26s 6d; rye, 27s to 28s 6d; tares, winter, 39s 6d to 43s; ditto spring, 42s 6d to 46s; beans, spring, 30s to 32s 6d; winter, ditto, 31s 6d to 33s; maize, flat, 24s 6d; ditto round, 24s Flour values well maintained.

York, Saturday.—Wheat is nearly exhausted, and prices range from 34s to 35s per qr. of 36 stones. Feeding barley, 27s to 28s per qr of 32 stones. Oats firm at late rates. White Tartary, 2-0 to 21s; black, 21s to 22s 6d; and white Garton, 23s to 24s per qr of 24 stones. Beans, 32s 6d to 33s per qr of 36 stones.

FOREIGN.

Hamburg, Saturday.—We have now mostly dry weather, but a higher temperature and more sunshine is desirable for the maturing of the crops. According to present opinions wheat will turn out 25 per cent. below an average, rye near an average, barley, oats, and potatoes full crops, if the weather does not again take an unfavourable turn. Market quiet for feeding barley and maize and lower, while wheat maintains its value; rye ready for shipment is in fair demand. Fine 79/80 ko. River Plate wheat is selling at 33s 3d to 33s 9d; 74/78 ko Danubian is held at 32s; Australian, at 33s to 33s 9d per 480 lb; new red Saal wheat, September-October delivery, is offering at 34s per 504 lb f.o b. South Russian rye on the spot is selling at 30s 9d to 31s 6d; Danubian is offering at 30s 9d to 31s per 480 lb ex ship here, 9 10/15. South Russian September-October shipment has been sold at 28s 3d per 480 lb c.i.f. Hamburg. Cutting of barley has commenced in Hungary, and promises to turn out a good crop in Slovakia, while in more southern districts dry weather has prevented a full development of the grain. From Austria and Germany reports continue satisfactory, though harvest will be two or three weeks later than usual. Grinding barley quiet and lower; 60 to 61 ko South Russian July shipment 23s 9d, August 19s 9d to 20s, September-October 19s 6d to 19s 9d, Marocco July shipment 23s 3d to 23s 6d per 400 lb c.i.f. Hamburg. Maize meets a slow sale; Danubian and Odessa, afloat, 21s 9d to 22s; River Plate, 22s 3d; mixed American, August, 23s 6d; kiln-dried, 23s to 23s 3d; per 480 lb c.i.f. Hamburg.—John Tatlock.

CORN STATISTICS

Weekly London Averages.

An account of the Quantities and Prices of British Corn bought on the London Market and in the area within five miles from the Royal Exchange during the week ending Tuesday, July 23, 1907:—

	Imp. Quar.	Bus.	Total Amount. £ s. d.	Av. Price per qr £ s. d.
Wheat	128	2	220 12 6	1 14 5
Barley	64	6	89 0 0	1 7 6
Oats	—	—	—	—

Imports of Foreign and Colonial Corn.

Statement of the quantities of Foreign and Colonial Corn Imported into the United Kingdom in the week ended Saturday, July 27, 1907:—

Wheat	2,522,900 cwts.
Wheat-flour	200,300 ,,
Barley	123,300 ,,
Oats	319,500 ,,
Maize	1,501,000 ,,

And in the corresponding weeks of previous years, viz.:—

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, Monday, 3 p.m.

Wheat prices at the Exchange to-day were not changed for either English or imported descriptions. Millers are for the most part able to tide over for a fortnight, and by that time crop prospects will be giving a more decided lead one way or the other. Barley was so scarce that previous prices were obtained without difficulty, though the inquiry was small. Oats were 3d. cheaper for light foreign sorts, but not for English or other good types. Maize was maintained at the currencies of the 22nd.

The inquiry was good for the season, though the speculative element was almost entirely absent. Beans and rye are firm, and in sellers' favour. Peas were quiet, and rather cheaper for Indian. Carols were in some request at 10s. 6d. per ton for good Italian and Portuguese. Butter beans had buyers at 24s. per cwt., sorghum at a guinea per quarter, and good Dutch carraways at 34s. per cwt.

THE FLOUR TRADE.

MARK LANE, Monday, 3 p.m.

London makes were 3d. to 6d. cheaper on the week for cash, the inquiry being poor and millers busy desirous of effecting some clearance before August bank holiday. Country flour was 6d. cheaper for common sorts, but not for patents. Foreign flour was scarce, and prices were in consequence maintained, but holders' views are a good deal above those of bakers', who, accordingly, are confining nearly all their patronage to the London and country mills.

Locust bean meal sold steadily at 140s. for the very best, which might be rather called bean flour. Coarser ground was quoted 120s. to 130s. per ton. Rice middlings made 95s. to 96s. per ton. Ground rice 10s. to 12s. per cwt. For oatmeal there was less demand, and 2s. 6d. per ton was allowed off previous quotations. We may quote Aberdeen at £13 10s., and Calmila at £14. Brose meal was quiet at 30s. per sack, and American oat flour at £13 per ton.

CLOSE OF THE MARKET.

THE MARKET CLOSED VERY QUIETLY, BUT WITH FULL CONFIDENCE AMONG HOLDERS.

THE HOLIDAYS.

On Monday next the following markets will be closed:—Mark Lane, the "Baltic" (London), the "Atlantic" (Liverpool), the London and Liverpool Term Markets, the County Corn Exchanges of Sleaford, Ludlow, Darlington, Stamford, Camborne, Wendover, and St. Ives, and the London markets for hay, straw, and vegetable produce at Stratford, the Borough, and the railway depôts. But the August Holiday, unlike those of Easter and Christmas, is not prolonged. The London Saturday markets will not be shut, and business resumes at the "Baltic" and elsewhere on Tuesday morning.

THE BALTIC.

Monday, 1 p.m.

State of Trade.

The demand for cargoes is slack, and operators are not expected to do much before the Bank Holiday is over. The forward prices for barley and oats are in favour of purchasers, but wheat and maize futures reveal much intrinsic strength.

Business Done.

Wheat.—Northern Manitoban, 35s 3d per 480 lb, prompt shipment; Victorian, 35s per 480 lb, on passage; Victorian, 37s per 480 lb, September shipment; New South Wales, 34s 9d per 480 lb, on passage; Californian, 36s per 500 lb, prompt shipment; Rosario, 34s 3d per 480 lb, prompt shipment; Baruso, 35s per 480 lb, August shipment.

Maize.—American, 23s per 480 lb, on passage; Argentine, 22s 9d per 480 lb, on passage; Galatz, 23s 3d per 480 lb, on passage.

Barley.—Persian, 20s 9d per 400 lb, September shipment; Russian, 20s per 400 lb, October shipment.

Oats.—Black Liban, 16s per 304 lb, October shipment; Archangel, 17s per 304 lb, on passage; White Sea, 17s 3d per 304 lb, on passage; Manitoba, 19s 6d per 320 lb, August shipment.

Linseed.—Bombay, 44s per 416 lb, August shipment

Rapeseed.—Yellow Guzerat, 59s 3d per 416 lb, August shipment.

Cottonseed.—Egyptian, £7 3s 9d per 2,240 lb, January shipment, new crop.

TERM MARKET.

The prices quoted for futures are not materially changed from a week ago. Latest calls have been:—

Wheat.

American Red, 7s. 2d., per cental August delivery.
,, ,, 7s. 3d. ,, Sept. ,,
,, ,, 7s. 4d. ,, Oct. ,,
,, ,, 7s. 5d. ,, Nov. ,,

Maize.

American Mixed, 4s. 1d. per cental for any month's delivery August to November inclusive.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour.—The declining American markets and fine weather here causes buyers to look on who do not require to purchase for immediate use. Grain.—America and European maize are the turn lower. Manitoba oats are plentiful, and pressed for sale. Beans and pease scarce and firm. Oat-still inquired for. Mill Stuffs.—Bran and thirds maintain full prices. Winter wheat patents, 28s to 29s per 280 lb; spring wheat patents, 27s 6d to 29s per 280 lb; American corn, 13s 10½d to 14s per 280 lb; round corn, 13s 10½d to 14s per 280 lb; grinding beans, 18s 9d per 280 lb; white pease, 19s to 19s 9d per 280 lb; broad bran, 97s 6d per ton; medium bran, 92s 6d per ton; fine thirds, 122s 6d per ton; common thirds, 102s 6d per ton; American oilcake, 142s 6d to 145s per ton.—McKinnon and McDonald (Glasgow).

Flour.—Trade upon the whole quiet, and prices rather easier. The continuance of the labour disputes is affecting the general trade of the city seriously, especially in the delivery of goods and in despatch to the interior. The settlement arranged up to the present is only of a partial nature.—Greenhill Bros. (Belfast).

Offals.—Demand for bran quiet, but prices continue firm. The labour disputes in the city have been partially settled, and it is hoped may be completed in course of a few days.—Greenhill Bros. (Belfast).

Milling Offal.—The present price of middlings, although very high, is easily obtainable, the demand exceeding the supply. Bran and pollard also scarce, with bran 2s 6d to 5s per ton dearer.—John Bawcomb and Co.

Flour.—There has been a rather better inquiry for flour to-day, but the scarcity of offers has made business disappointing. Prices show no change on the week.—T. S. Medill and Sons, Ltd.

Moderate arrivals of wheat, and a quiet trade at prices of last Monday. Flour steady. Maize unchanged. Barley and oats 3d. per qr. lower.—Coventry and Sheppard.

POULTRY AND GAME.

Smithfield, Saturday.—Fair supplies met with a good demand. Prices: Surrey and Sussex fowls, 3s to 4s; Lincolnshire fowls, 2s to 3s; Essex fowls, 2s to 3s; Irish fowls, 1s 8d to 2s 3d; goslings, 4s 6d to 5s; country ducks, 2s to 2s 6d; Aylesbury ducks, 2s 3d to 3s 9d; quails, 1s; feathered pigeons, 8d. to 10d; Bordeaux pigeons, 11d to 1s 2d; tame rabbits, 1s 2d to 1s 6d; wild rabbits, 6d to 7d; live hens, 1s 6d to 1s 9d each; Australian rabbits, 6s to 7s 6d per doz.

HAY AND STRAW.

Birmingham, Friday. — Small supply of hay. Trade quiet. Old hay, £4 per ton; new hay, £3 5s per ton. Straw: no quotations.

Hereford, Wednesday.—Trade stagnant, and prices remain unaltered.

Lancaster, Saturday. — Meadow hay, 6d; clover, 6½d; wheat straw, 4½d; oat straw, 4d per stone.

Leeds, Tuesday.—A moderately active business in hay and straw is proceeding in the warehouses at steady prices. Fair progress was made with the ingathering of the new hay crop last week, but the recent thunder showers in various districts have rather checked operations in the hayfields. Quotations rule as follows:—Clover hay, 7½d; meadow hay, 7d; wheat straw, 5d; oat straw, 5d; and rye straw (retail), 7d to 8½d per stone; green clover, 3½d per bundle.

Lincoln, Friday.—Small supplies and a slow trade. Best old hay and seeds, £3 10s to £4 per ton on the ground; secondary ditto, £3; straw, £3 per ton at the stack.

Manchester, Friday.—Hay, new, 4½d to 5½d; clover, old, 6¾d to 7¼d; new, 5½d to 5¾d; straw, wheat, 3½d to 3¾d; oat, 3d to 3½d per stone.

Newcastle, Tuesday.—Old land hay, £3 10s to £4 10s per ton; new land hay, £4 10s to £5 7s 6d; wheat straw, £1 3s to £1 5s per load; oat straw, £1 4s to £1 5s.

Nottingham, Wednesday.—Small supplies on offer, and trade quiet at the following rates:—Inferior to good hay, 70s to 85s; prime ditto, 90s to 100s; inferior to good clover, 75s to 85s; prime ditto, 95s to 100s; wheat straw, 45s to 55s per ton.

Sheffield, Tuesday.—Moderate supplies, and a fair trade. Choice old seeds, £5 to £5 10s; meadow hay (old), £4 to £4 10s. No straw on offer.

Whitechapel, Saturday.—Lighter supplies available, experienced a good demand at current rates. Best clover, 84s to 97s 6d; inferior ditto, 75s to 80s; specially picked hay, 90s; good ditto, 80s to 87s 6d; inferior ditto, 65s to 70s; mixture and sainfoin, 82s 6d to 90s; straw, 28s to 34s per load.

POTATOES.

Borough, Saturday.—Supplies were on a good scale, and business moved slowly. Early Rose, 80s; Puritans, 70s; Duke of Yorks, 60s to 70s; Epicures, 60s to 65s; British Queens, 60s to 65s per ton; Dutch, 2s 6d to 3s per cwt.

Berwick, Saturday.—There is a large supply of new potatoes, for which a evry brisk demand is being experienced, but as prices are so varied no fixed quotations can be given.

Carlisle, Saturday.—Fair supply and a steady demand at 1s 4d to 1s 6d per stone for new sorts.

Doncaster, Saturday. Good supply and a fair demand at 4s per cwt; retail, 14 lb to 16 lb for 1s.

Goole, Wednesday.—There are no local potatoes ready yet, but the supplies of Lincolnshires are very good. Lincolnshires made 7s 9d, and Selby 8s 9d per load of 250 lb.

Lancaster, Saturday. — Potatoes, 7d per stone.

Malton, Saturday.—Supplies too limited for definite wholesale quotations. Home-grown, 1s 2d to 1s 4d per stone; imported 10d to 1s.

Manchester, Saturday.—Potatoes: Cheshire, new, 5s 6d to 7s per load; Bedford, 5s to 6s per cwt.

Preston, Saturday.—New potatoes, 10s per load of 240 lb.

Retford, Saturday.—New potatoes, 8d per stone.

Spitalfields, Saturday. — A poor demand prevailed for the plentiful supplies. Early Rose, 70s; Early Puritans, 70s to 75s; British Queens, 70s to 85s; Duke of Yorks, 70s to 75s; Epicures, 70s per ton.

Stockton, Wednesday.—Lincolnshires, £5 10s per ton; St. Malo, 6s 6d; Dutch rounds, 4s 6d per cwt.

Whitby, Saturday.—Potatoes, home-grown, 1s 8d per stone.

Worksop, Wednesday.—Good supply. Best potatoes made 12s 6d to 13s 6d per load of 18 stones.

York, Saturday.—Large supply, which met with a firm demand at 4s 6d to 5s per hamper of four score lb.

SEEDS.

Mark Lane, Monday.—Very little business passing in agricultural seeds. New French trifolium is easier; buyers here expect English to be quite as good and cheaper. Samples of new Bohemian white clover now offering are quite up to the average. Demand for rape and mustard seed small. Blue peas unchanged—John Pickard and Co.

TO-DAY'S MARKETS.

CATTLE.

Metropolitan Market, Islington.

	Monday July 29, 1907. British.	Total.	Monday, July 30, 1906.
Beasts	680	680	1,090
Sheep and Lambs	5,010	5,010	7,790
Calves	20	20	20
Pigs	—	—	—
Milch Cows	30	30	30

Quotations per 8 lb. (sinking the offal).

ENGLISH.

	Inferior. s. d.	Second. s. d.	First. s. d.
Beasts	2 10	4 0	5 0
Sheep	4 6	5 4	6 4
Lambs	5 8	6 4	7 0
Calves	3 10	4 2	5 0
Pigs	—	—	—

Milch cows, per head, £16 to £23.

British arrivals include as follows:—Scotland, nil; Eastern Counties, 81; Midland, Home, and Western Counties, 547; Devon, 20; Ireland, 32.

We note to day a decrease of 130 head compared with Monday last, due to smaller arrivals from the Midland counties and Ireland. The supply from the latter country consisting entirely of Waterford cattle, for which a slow trade was experienced at late values. For both prime and second quality English beasts, trade ruled of a slow, but steady nature, last Monday's prices governing all transactions. A few Devons were included in the supply, and commanded our top quotation. Owing to there being so few country buyers present, fat butchering cows and bulls were difficult to vend, sellers being obliged to accept a decline of 2d. per 8 lb. in value. A clearance is not expected to be made.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day. s. d.	Monday, July 30, 1906. s. d.
Scotch	—	—
Devons	4 10 to 5 0	4 4 to 4 6
Herefords	4 8 to 4 10	4 4 to 4 6
Norfolks	—	4 2 to 4 4
Runts	4 6 to 4 8	4 2 to 4 4
Lincolns	4 2 to 4 4	4 4 to 4 6
Irish	4 2 to 4 4	4 4 to 4 6
Canadian	—	—
Fat cows	3 6 to 3 8	3 4 to 3 6

There was an decrease of 1,410 in the number of sheep and lambs penned compared with Monday last. For all grades of wether sheep a firmer trade was experienced, with a rise in value to the extent of 2d. per 8 lb., whilst ewes were quoted at last Monday's rates. Both Scotch and Irish sheep were in fair average supply, and met with a steady trade. Lambs, on the other hand, met with less demand; nevertheless, late currencies governed all transactions. The supply included 200 Scotch, 420 Irish, and 856 from the Eastern Counties. A clearance is fully expected to be made in this part of the market.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

	To-day. s. d.	Monday, July 30, 1906. s. d.
8 st. Scotch	6 2 to 6	4 5 6 to 5 8
7½ to 8 st Downs	6 0 to 6	2 5 6 to 5 8
9 st. Downs	5 10 to 6	0 5 4 to 5 6
10 st Halfbreds	5 6 to 5	8 5 2 to 5 4
10 st Yorkshires	—	—
12st Lincolns, half-bred	5 6 to 5	8 4 10 to 5 0
10 st Irish	5 6 to 5	8 5 0 to 5 2
10 st Down Ewes	4 0 to 4	2 4 2 to 4 4
11 st Halfbred ditto	3 10 to 4	0 4 0 to 4 2
5 st Grass Lambs	6 10 to 7	0 7 2 to 7 4
6 st Halfbreds ditto	6 6 to 6	8 6 0 to 6 2

Calves were in small supply and met with a very poor trade; the best on offer being quoted at from 4s 10d to 5s per 8 lb. (sinking the offal).

No pigs on the market.

London (Central), Monday. — Trade remained slow; offerings being liberal. Beef, English, 3s 8d to 4s; Scotch, 4s 2d to 4s 10d; American, 3s 6d to 3s 11d; refrigerated hindquarters, 3s 8d to 4s. Mutton, English wethers, 4s 8d to 5s 2d; ewes, 3s 4d to 3s 10d. Lambs, 5s 8d to 6s 4d; Scotch tegs and wethers, 5s 6d to 5s 8d; ewes, 3s 4d to 3s 10d. Veal, 3s 4d to 4s 8d. Pork, 3s 6d to 3s 10d per stone.

FOREIGN.

Deptford, Monday.—Beasts 1,122. To-day's supply compared with Monday last showed an increase of 877 head, and consisted entirely of shipments from the United States. Trade ruled of a slow nature, at a decline of 1d per 8 lb in values. The best on offer were quoted at from 4s 2d to 4s 4d; seconds, 3s 10d to 4s per 8 lb (offal given in). On Saturday 1,720 beasts from the United States and 200 from Canada were offered for sale, and met with a slow trade at late rates. Besides the above 600 States beasts were withheld from sale. The best States on offer were quoted at from 4s 3d to 4s 5d; seconds, 4s to 4s 2d. Canadians, 4s to 4s 2d; seconds, 3s 10d to 4s. A consignment of Canadian sheep was received, numbering 740 head, 340 of which were offered for sale, but met with no demand.

Liverpool, Monday. — Larger supply of stock in market to-day. Demand better for cattle and prices firmer. Sheep and lambs met a firmer trade, particularly lambs, which recovered about 2s per head on last week's fall in values. Beef, 6¾d to 5d; mutton, 8½d to 6d; lamb, 9½d to 8½d. At market 105, 1,055 cattle and 9,853 sheep.

FEEDING STUFFS.

London Monday. — Linseed Cakes. — The market is without any fresh feature, remaining very firm for spot cakes, and the considerable premium asked or forward delivery checks business for that position.

Cotton Cake: Egyptian made remain very scarce and dear. London makes are unchanged.

Decorticated Cotton Cake and Meal: These both move off slowly at last week's prices.

Linseed.—Owing to liberal shipments values have receded, though market closes firmer on the week.

English Linseed Cake, ex mill	7 5 0	to	7 10 0
Calcutta Linseed cake, ex quay	7 7 6	to	7 10 0
American Western Linseed Cake.....ex quay	—		—

PROVISIONS.

London, Monday.—Bacon: The arrivals of bacon last week were:—From Ireland, 2,030 bales, and from foreign ports, 13,733 bales. There was a steady quiet trade for bacon last week, and prices ranged:—Irish, 64s to 65s up to 72s; Danish, 62s to 65s up to 69s; Canadian, 56s to 60s up to 64s. Butter: The butter market was seady. French, 94s to 102s; Danish, 110s to 114s; Russian, 74s to 98s; Dutch, 100s to 102s; Irish, 84s to 103s; Victorian, 84s to 98s; New South Wales, 84s to 98s; Queensland, 82s to 94s; New Zealand, 94s to 100s. Lard.—Lard was a slow market. Irish, 46s to 54s; Danish, 48s to 50s; American, 46s to 48s.

HOPS.

Borough, Monday.—There is a small consumptive trade doing, and prices are exceedingly firm. Stocks are in a very small compass. The reportsfrom the plantations all speak of a continuance of vermin, and washing is general. The bine has made fair progress during the past week. —W. H. and H. Le May.

Great Yorkshire Show at Barnsley.

The "Mark Lane Express" Stand will be No. 179, where we shall be pleased to see all our friends and readers attending the Show.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

The supply of beasts on the chief market day of the week at Islington was slightly larger owing to heavier arrivals from the Midland Counties, the majority; as usual at this season of the year, consisted of grass-fed beasts, chiefly Herefords and runts. Trade, taken as a whole, was of a slow nature, this being due to the heavy fall of rain, nevertheless prices showed a decided upward tendency. The Irish consignment consisted of 41 Dublins (amongst which were some choice black polled cattle), 36 Waterfords, and 21 store cattle. These latter consisted entirely of two and a-half year old heifers, and were quoted at from £11 to £11 10s. per head. Irish fat beasts were steady in regard to value, as also were fat butchering cows and bulls. On Thursday, Monday's prices goverued all transactions.

At the Foreign Cattle Market, Deptford, the supplies were also larger, and on Wednesday consisted only of middling quality, these of course not making our top quotation. Trade taken as a whole throughout the week ruled firm and steady. The total number on offer at both markets was 4,225, as against 3,533 during the preceding week, consisting of 840 British (increase 70) and 3,385, comprising 3,185 from the United States, and 200 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal):—90 to 95 stone Herefords, 4s. 8d. to 4s. 10d.; 95 stone Runts, 4s. 6d. to 4s. 8d.; 100 stone Shorthorns, 4s. 2d. to 4s. 4d.; 95 stone Irish (Dublins), 4s. 4d. to 4s. 6d.; 90 stone States, 4s. 2d. to 4s. 4d.; 90 stone States, 4s. 3d. to 4s. 5d.; 95 stone Canadians, 4s. to 4s. 2d.; 90 stone fat cows, 3s. 8d. to 3s. 10d.

In the sheep market at Islington there was an increase in the supply of wether sheep, and these meeting with no corresponding increase in the demand, consequently fell in value 2d. per 8 lb., ewes, on the other hand, were short in number and wanted, notwithstanding sellers asking an advance of 2d., all on offer cleared early. Scotch and Irish descriptiuns maintalned late currencies. There was a fair average supply of lambs, for which late currencies governed all transactions. On Thursday, for both wethers and ewes, all sales were based on late values. Lambs, on the other hand, ruled 4d. lower. A small consignment of Canadian sheep were offered for sale at Deptford, but met with no demand. The total number penned at both markets 8,450, as against 8,070 during the preceding week, the supply consisting of 8,110 British and 340 Canadian. Best pens made per 8 lb. as follows (sinking the offal):—7½ to 8 stone Downs, 5s. 10d. to 6s.; 8 stone Scotch, 6s. 2d to 6s. 4d; 9 stone Downs, 5s. 8d. to 5s. 10d.; 10 stone Irish, 5s. 8d. to 5s. 10d.; 10 stone Downs, 5s. 6d. to 5s. 8d.; 10 stone Halfbreds, 5s. 4d. to 5s. 6d.; 10 stone Down ewes, 4s. to 4s. 2d.; 5 stone fat Down lambs, 6s. 10d. to 7s.; 6 stone Half-bred ditto, 6s. 6d. to 6s. 8d.

Calves numbered 70 and met with an extremely slow trade, the best on offer being quoted at from 5s. 6d. to 5s. 8d.; a considerable fall was noticeable on Thursday, the best only making 5s. per 8 lb.

Trade in the West.

With a continuance of favourable weather, though somewhat broken by thunderstorms, business keeps fairly buoyant, and prices generally are well maintained for stores consequent on the comparatively limited supplies now coming out, both of milch beasts and grazing cattle, though the younger classes of stock—both stirks and heifers—are better represented at many markets than graziers for finishing off. The shortness in deliveries is attributed in some measures to stockowners, as a rule, having still plenty of keep on hand; but should there be a prolonged spell of hot, dry weather, as we are having at present, no doubt supplies would then soon become more plentiful from many being glad then to lessen their numbers. Milch beasts have within the last few days taken a slightly dearer turn, say to the extent of from 10s. to 20s. a head, the best now selling from £17 10s. to £20 10s. for young heifers of good character, secondary heifers and cows making £13 to £16 10s., and distinctly plain cows from as low as £9 to £12 15s. Barreners at all forward may be quoted up to £28 or £29 per pair, the fresher condition ones being a good deal in request, whilst more ordinary runs are making £18 to £22. Stirks command a good steady sale from £10 to £12, and yearlings from £6 to £8. Calves for rearing purposes are difficult to procure, and some of the most promising now make 35s. to 45s., and smaller animals 20s. to 32s. A good inquiry still prevails for all classes of store sheep, and, as the promise keeps good for roots of all kinds, this is a factor which will tend to keep prices buoyant, and this they undoubtedly are at present. Good class Down ewes sell up to 67s. a head for picked drafts, a more general run being from 48s. to 50s.; draft ewes selling from 42s. to 46s. or 47s.; wether lambs, 32s to 41s.; cheaper lambs, 34s. to 37s.; and mixed lambs, 28s. to 38s. Already a good number of ram lambs have been disposed of, despite the somewhat early character of the season, the current prices of the bulk being from 4 guineas to 10 guineas. The season of higher prices will no doubt be soon upon us; but so far sheep are selling well both for flock and stock purposes, and there is every prospect of the season finishing quite as auspiciously as it begun, the high prices ruling being all the more satisfactory in face of the decline in the value of wool.

Although the hot weather is not calculated to enhance the value of fat stock as a rule, especially the heavier weights, still we are glad to be able to report trade as in a particularly healthy condition, and, instead of receding, the price of the better-class beef has had a distinctly hardening tendency. Well-finished steers and heifers are just now claiming special attention at prices ranging from £16 up to £23 apiece for the best (or quite 11s. 6d. to 12s. per score); more ordinary runs and good class cows selling from 10s. to 11s.; but coarse heavy beasts are not quite so much in demand, the hot weather making buyers of this class of meat a little more cautious, and we must quote 8s. 6d. to 9s. 6d. as the present range of currencies. Neat handling calves meet a relatively better sale than the heavier weights at from 8½d. to 8¾d per lb.; coarse vealers quieter at 7d. to 7¾d. Mutton, in spite of short supplies, is not a particularly fast trade except in the case of tegs and wethers, which certainly command a good price—8¼d. to 8½d. out of the wool; but coarse heavy ewes cannot be quoted higher than 7d. to 7½d. The better class lambs attract plenty of buyers at from 41s. up to 60s. apiece (or 10d. to 1s. per lb.); secondary grades, 30s. to 39s. (or 10d. to 10½d). Small pigs are the most in demand, and porkers may be quoted as making 10s. to 10s. 6d. per score; baconers, 9s. to 9s. 6d.; and the coarser grades of old pigs, 7s. to 8s.

Trade in Scotland.

The numher of fat cattle on offer has been much under an average, and the general quality fairly good. An active trade has been experienced throughout, and prices have advanced from 10s. to 15s. over the previous week. Fat cows and bulls in short supply and very dear. Sheep and lambs have also been shown in small numbers. Owing to the short supply there has been a better demand at prices on an average 2s. per head higher, with an easy clearance. Fat calves a small show and dearer. Pigs also shown in moderate numbers, and prices fully maintained. There was a small supply of store sheep, and anything of a good class got fairly well sold at satisfactory prices. There was an exceedingly small show of store cattle, but the general quality good. A clearance of this description was effected at quite satisfactory prices. There was a large show of milch cows, and they met a bad trade. Quotations:—Top price of cattle per live cwt., 42s. 9d.; current, 39s. to 41s.; Irish, 36s. to 39s.; mutton, 6½d. to 9½d. per lb.—John Swan and Sons, Ltd.

Trade in Ireland

There was a large attendance of English buyers at last Thursday's Dublin market, besides a large number of home and Irish country buyers as well. Stock showed a good increase, there being sixty-six more cattle, and 882 more sheep than were exposed for sale on the previous Thursday. Business opened rather slowly, but improved as the day wore on to the extent of about 1s. per cwt. on beef of the best qualities, while trade in the plainer descriptions was also more satisfactory, For best beef the dead-weight price ranged from 57s. to 60s., and from 62s. to 64s for a few extra lots of very superior finish; second quality beef from 52s. to 56s., and inferior beef from 48s. to 50s. Coarse and lean cattle, too, sold easier than for some markets past. The top range value (live weight) was from 33s. to 34s., and a few lots up to 35s. per cwt. The beef trade in Dublin on Monday last was, on the whole, very satisfactory.

The sheep trade was not so satisfactory, a much larger market of sheep having a good deal to say to it. Sheep experience a slow trade generally, only good hoggets for export are suitable ewes for home trade being placed satisfactorily. Lambs were down about 2s. per head on the week. Heavy wethers were hard to cash. The best classes of hoggets were a fairly good trade. Best wether mutton sold at about 7d. to 8½d. per lb., best ewes, 6¾d. to 7½d., and coarse sheep about 6d. per lb. The lamb trade suffered from the effect of bad markets on the other side of the Channel, and the lambs bought for export generally sold at a drop of about 2s. per head. Choice home lambs were sold at from 32s. to 43s. each; other sorts at from 24s. to 30s. each.

Veal showed little if any change. The best fed veal was worth from 8d. to 9d. per lb.; coarse calves from 4½d to 7d per lb. Milch cows were worse in price this week, and only tip top milkers made late rates. Store cattle were in good demand at very satisfactory prices. Mr. Gavin Low held a sale of store cattle, which proved very satisfactory. English and home buyers turned up well at the sale, and bought well. The Aberdeen-Angus crosses came in for most competition. Two-and-a-half year olds realised from £11 2s. 6d. to £12 10s. each or about 33s. 6d. per cwt., and three-year-olds from £16 to £18 2s. 6d., or about 33s. 6d. per cwt. A handsome lot of Hereford crosses were sold by Captain Longworth Dames at £15 (or 34s. 6d. per cwt. live weight). Polled cattle of 2 to three years old made from £12 10s. to £15 15s each. For nice horned stock of from two and a half to three years prices ruled between £10 10s. and £14 10s. The sale terminated about 2 o'clock, and the next one will be held by Mr. Low on August 15.

The Dublin Pig Market on Thursday last was a tolerably large one as regarded buyers, but there was a disappointingly small number of pigs on offer. The consequence was that buyers had to pay an advanced price to secure a sufficiency of stock. The rates, however, must be considered artificially inflated, and prices will not last. Best light-weight pigs were worth from 55s. to 57s. 6d. per cwt.; heavy pigs from 50s. to 54s.; coarse, 46s. to 48s.; and stores sold at from 20s. to 60s. each.

LONDON.

Central Market, Friday.—Good supplies; slow demand; mutton and lamb firm. English beef, 3s 8d to 4s; Scotch side, 4s 2d to 4s 4d; shorts, 4s 4d to 4s 8d, extreme 4s 10d; Deptford and Liverpool killed, 3s 6d to 3s 11d; refrigerated hindquarters, best, 3s 10d to 4s; ditto seconds, 3s 8d to 3s 9d; ditto forequarters, 2s 6d to 2s 7d; inferior beef, 2s 6d to 3s; mutton, Scotch wethers, 5s 8d; ditto tegs, 5s 8d; ditto ewes, 3s 6d to 3s 10d; English wethers, 4s 8d to 5s 2d; ditto ewes, 3s 4d to 3s 10d; Dutch sheep, 4s 8d to 5s; English lamb, 5s 8d to 6s 4d; veal, 3s 4d to 4s 8d; English pork, 3s 8d to 3s 10d; Dutch ditto, 3s 6d to 3s 10d per 8 lb.

Islington, Thursday.—Supplies consisted exclusively of fat slaughtering cows and bulls, for which there was a poor trade. The range of quotations was about the same as last Monday, but best prices were exceptional. Fat cows quoted from 3s 2d to 3s 10d; and fat bulls from 2s 8d to 3s 4d. Trade for sheep ruled dull with prices not fully maintained. Best Down tegs were quoted 5s 10d to 6s; 10 stone Downs, 5s 8d to 5s 10d; 10 stone crossbreds, 5s 4d to 5s 6d; large wethers, 5s to 5s 2d; small Down ewes, 4s to 4s 2d; lambs, 6s 8d to 7s. Quotations for calves ranged from 4s 10d to 5s 8d per stone, trade being slow.

COUNTRY.

Ashford, Tuesday.—Beef sold slowly, at last week's rates, best ranging from 4s 8d to 5s. Mutton in large supply, and cheaper, Downs making 5s 6d to 6s; Kent wethers, 4s 8d to 5s 8d, according to size. Ewes made 3s 8d to 4s 4d. Veal made 5s to 5s 4d. Pork was dearer, roasters making 3s 8d to 4s 2d.

Berwick, Saturday.—The number of beasts penned showed a considerable falling off. Holiday market, very few beasts being sold.

Birmingham, Thursday.—Small supply of beasts, sheep, and pigs; trade slow. Quotations:—Beef, 5½d to 6¾d, per lb; Hereford, 7d per lb; mutton, 6½d to 8½d per lb; lamb, 8¾d to 9½d per lb; bacon pigs, 10s to10s 3d per score; cutting pigs, 10s to 10s 3d per score; sows, 8s per score.

Bristol, Thursday. — The market was not largely attended, farmers being busy on the land, and business was dull. Trade in beef, which was in limited supply and demand, was quiet at last week's prices. Mutton and lamb also were offered in smaller quantity, and were in less request than usual, late rates prevailing. Pigs were scarce, and quotations unchanged.

Calne, Friday.—Present prices of pigs:—In lots of not less than ten, on rail within 100 miles, 1s. per pig extra for delivery by road. Prime stores, 6 sc. 10 lb to 8 sc. 10 lbs, 10s per score, 8 sc. 11 lb to 9 sc. 10 lb,, 9s 6d per score; 9 sc. 11 lb to 10 sc. 10 lb, 9s. Pigs outside these limits at their value.—C. and T. Harris and Co., Ltd.

Canterbury, Saturday.—There was a fairly large offering of ewes and lambs. The general range of prices was from 20s to 28s 6d, but an exceptionally fine lot of fat lambs made 39s. Broken-mouthed ewes made from 22s to 26s, and good useful animals from 36s to 42s. A few horned beasts were offered, but met with little demand.

Carlisle, Saturday.—Fair attendance of buyers, and a better trade. Large heifers ready for finishing off, £13 10s to £16 10s; smaller sorts, £7 10s to £9 10.

Colchester, Saturday.—There was a fair amount of stock, which changed hands at about last week's prices.

Derby, Tuesday.—Last week's prices were well maintained, choice beasts and sheep fetching high prices. Beasts, 5½d to 7d; calves, 8d; sheep, 7½d to 9d; lambs, 10d.

Doncaster, Saturday.—Moderate supply of cattle and sheep, and a poor attendance. Fair supply of milch beasts. Average demand, and prices firm. Milch beasts, £18 to £22; bullocks, £12 to £17; heifers and drapes, £11 to £15; stirks, £9 to £11; and young stores, £6 to £9 each. Sheep were dear, and from 42s to 45s each. A few lambs made from 30s to 33s each.

Dorchester, Saturday.—Messrs. Ensor and Son had very short offers at their repository sale to-day, and these were confined entirely to cattle, mutton as a rule finding with no great sale at the week end market. The attendance was quite in keeping with the limited character of the supplies. Milch beasts met a fair trade from £16 to £19 10s for the best, and £13 10s to £15 for seconds. Barreners, which comprised only a very ordinary lot, ranged from £18 to £22 per pair; and a few store bulls found buyers at from £11 to £12 each. Fat bullocks ruled firm from £16 to £18 10s for heifers (or 11s to 11s 6d per score), and cows from £14 10s to £17 or 10s to 10s 6d.

Edinburgh, Wednesday. — Supplies much lighter. Cattle poor supplies, fair demand. Best polled bullocks, £12 10s to £16; cows, steady demand, best Shorthorns, £20 to £25 10s; Ayrshires, £13 to £18 5s; crosses from £18 to £24 10s. Sheep met a fair trade. Cheviot dinmonts, 30s to 37s; half-breds, 40s to 43s.

Exeter, Friday.—Large supply of fat beasts, and only best steers and heifers maintaining 12s. Cows, 10s to 10s 6d; some unsold. Large supply of sheep; small wethers and shorn lambs readily sold at 9d; large size, 8½d; fat ewes, 6d to 6½d; fat lambs, in wool, 10d to 11d. Very little demand for keeping lambs; few breeding ewes on offer, but not a good demand, at 44s to 48s. Few keeping sheep of the Dartmoor class sold; rams 5d, calves 7d.

Glasgow, Wednesday. — Small numbers of cattle marketed, and the demand for prime handy shop descriptions was sharp. Other sorts also experienced a firmer inquiry. Top, 64s to 66s; secondary, 58s to 61s per cwt. Shorter supply of sheep and lambs, consequently prices ruled higher. Prime hoggs and wethers in better request. Lambs also made more money. Best mutton, 10d to 10½d; secondary, 9½d to 9¾d per lb; finest lambs, 9½d to 11d per lb.

Hereford, Wednesday.—Large supply of beef, with dragging trade. Best qualities made 6¾d per lb, and secondary sorts 5d; veal, 9d. Small supply of sheep, trade firm. Wethers, 8d to 8½d; ewes, 6d to 7d; lambs, 9d to 10d. Porks, limited supply, 5d to 5½d. No bacons on offer. Slow trade for store stock.

Leicester, Saturday.—Good supplies of home-bred stock, which came to hand in excellent condition. Buyers were well represented, and trade ruled brisker. Choice milch cows, £19 to £21; good lots, £17 to £18; secondary, £14 to £16; Shorthorn bullocks, £14 to £16; Irish bullocks, £15 to £18 10s; Welsh cattle, £13 to £16 10s; heifers, £10 to £13 10s; young stock, £5 to £8 each. Calves met a slow trade.

Lincoln, Friday.—Horned stock were shown in fair numbers, and the demand was moderate. Young beasts, £7 to £10; and milch cows, £17 to £21; lambs made up to 33s, and drape ewes 32s each.

Lynn, Tuesday.—An average show of fat beasts experienced late rates, 7s 6d to 8s per stone. Stores very few shown, and trade very slow from £6 to £13 each. Fat lambs average show from 9s 6d to 10s per stone. Stores made from 45s to 50s each; several fat lambs realised from 35s to 40s. An average supply of stores made from 28s to 35s each.

Manchester, Friday.—Beef: First class, 5¾d; second class, 4¾d to 5¼d; third class, 3¾d to 4¼d. Mutton: First classs (Cheviots Scotch) 8¼d; others, 8d; second class, 7d to 7¼d; third class, 6d to 6¾d. Veal: First class, 6¼d; second class, 5¼d to 6d; third class, 4¼d to 5d. Lamb: First class, 8¼d; second class, 7¾d to 8¼d per lb.

Newcastle, Tuesday.—Cattle were in lighter supply, and trade was sharper all round, and prices advanced 3d for all except inferior beasts. Quotations:—Prime heifers, 8s 6d to 8s 9d; second class, 8s 3d to 8s 6d; prime steers, 8s 3d to 8s 6d; second class, 7s 9d to 8s; coarse and inferior, 6s 9d to 7s per stone, sinking the offal. Sheep and lambs were a short supply, and trade was much firmer all round, and prices advanced ½d for certain sorts of sheep to 1d for lambs. Quotations:—Choice shearling sheep, 9½d to 10d; strong heavy, 9d to 9½d; choice lambs, 10d to 10¾d; second class, 9½d to 10d; ewes, 6d to 7d; rams, 5½d to 6½d per lb. Calves were a similar supply to last week. Trade for veal was steady at 6d to 8d per lb.

Newport, Wednesday.—A large supply of cattle, sheep, lambs, calves, and pigs. Good attendance of buyers, and there was a brisk trade all round. Best beef, 6¾d to 7d per lb; seconds, 6¼d to 6½d; cows, 5d to 5½d; best wether mutton, 8½d to 8¾d; ewes, 6½d to 7d; lamb, 9d to 9½d; calves, 7d to 8½d; porker pigs, 10s to 11s per score.

Norwich, Saturday.—Trade for fat cattle was hardly so good as last week, the best making 8s, and secondary sorts and cows from 7s to 7s 6d per stone. Veal calves were not of good quality, but sold a little dearer at 7¾d per lb. A short supply of fat sheep, and quality was good, the best mutton selling well at 9½, and secondary at 8¼d, while ewes were cheaper at 6½ per lb. The fat pigs shown were mostly small; trade remained unaltered, all getting sold from 6s to 6s 8d per stone, while sows fetched 5s. The store cattle were all small, and of fair quality; trade was better at from £5 10s. to £12 per head. Rearing calves not as good, but these also met a better trade at from 20s to 50s. A small entry of store sheep; Black faced shearlings made from 58s to 70s, and others from 38s to 56s. Lambs were of a similar quality to last week, and trade remained unchanged at 25s to 40s per head. Store pigs were a small show, and met a sharper trade at from 12s to 26s.

Nottingham, Saturday.—Good supply. In-calf cows, £16 to £19; in-calf heifers, £12 to £13 10s. Small show of calves met with a better trade, making 25s to 45s each. A few store sheep changed hands at 25s to 35s each.

Preston, Wednesday.—Average supplies of stock, with prices a shade easier, except for choice lamb 13s, which were firm. Quotations:—Heifers, local, 7d; ditto, Irish, 6¾d; young cows and bulls, 6d; secondary ditto, 5d to 5½d; choice lambs, 10d; secondary ditto, 9d; hoggs, 8½d; choice ewes, 7¾d; secondary ewes and tups, 6½d to 7d; calves, 7d per lb.

Retford, Saturday.—Fully an average show of store stock, and an improved attendance. A fair amount of business was transacted at last Saturday's rates.

Romford, Wednesday.—Average supply of fat beasts; trade about the same. Best animals, 4s 6d to 4s 8d; middlings, 4s 2d to 4s 4d per stone. Calves in average supply; prices lower, at 5s 2d to 5s 4d per stone. Sheep in large supply; trade lower. Best small sheep, 5s 6d to 5s 8d; large, 5s 2d to 5s 4d per stone. Ewes in average supply; trade about the same, at 4s 2d to 4s 4d per stone. Lambs in average supply; prices unchanged, at 6s 4d to 6s 8d per stone. Fair demand for store beasts. Milch cows in small supply; trade about the same. Pig trade slow. Small porkers, 3s 8d to 4s; large hogs, 2s 8d to 3s per stone.

Sheffield, Tuesday.—Average supply of milch beasts, which met with a good demand. Best cows, £18 to £22; secondary, £12 to £16.

Shrewsbury, Tuesday.—Very little trade in store cattle, but fat stock met with a ready sale. Quotations: Beef, 6½d to 7¼d per lb; mutton (wether), 9d to 9½d per lb; ewes, 7d to 8d per lb; lamb, 9d to 10d per lb; veal, 7d to 8d per lb; porket pigs, 10s per score; bacons, 9s to 9s 3d per score.

Stockton, Wednesday.—An average show of the best quality cattle, which met a slow trade at 8s to 8s 6d per stone, rougher kinds making 6s 6d to 7s. Lambs sold at 10d per lb, young sheep 9d, ewes 7d and 7½d, and tups 6½d per lb. The pig trade was slow and steady, last week's prices being fully maintained.

Thame, Tuesday.—There was a very large all-round entry of stock, it being the largest market held this season. Buyers attended in large numbers, Oxford and neighbourhood being well represented. Trade for cattle was firm, practically every beast changing hands. There was a strong demand for mutton, every pen, with the exception of two, were sold. Fat lamb and veal in demand. Bacon and pork selling steadily. Messrs. Bond and Burrows' sale comprised 82 fat beasts, 429 fat and store sheep and lambs, 77 fat and weaning calves, and 52 fat and store pigs. Fat oxen made from £16 to £23 12s 6d; fat heifers, £13 to £19 12s 6d; fat wethers, 48s to 58s 6d; fat ewes, 45s to 58s; fat lambs, 30s to 42s; fat calves, £3 to £5; weaning cow calves, 30s to 54s; bull calves, 15s to 45s; porkers, 28s to 52s; store pigs, 12s to 28s.

Truro, Wednesday.—Attendance very good, business fairly brisk. Fat bullocks, 56s to 60s; barreners, 40s to 45s; store bullocks, 40s to 45s; cows and calves, £10 to £14; rearing calves, 12s 6d to 32s 6d; wethers, 7d to 8d per lb; ewes, 5½ to 5¾d; lambs, 7d to 8d; pigs, 12s 6d to 42s 6d; beef, 6d to 8d per lb; mutton, 6d to 8½d; lamb, 8d to 9d; veal, 6d to 8d; pork, 6d to 8½d; pork (carcases), 5d to 5½d.

Wolverhampton, Wednesday.—Fair supply; moderate trade all round. Beef, 5½d to 7d per lb; mutton, 6½d to 9d per lb; lamb, 9d to 9½d per lb; veal, 6½d to 9d per lb.

Worksop, Wednesday. — Short supply of stock, but trade was good. Best beef, 8s to 8s 6d; secondary, 7s 3d to 8s; Southdown wether and crossbreds, 8½d to 9d; ewes, 6d to 7d per lb.

FEEDING STUFFS.

Liverpool, Friday.—Fertilisers are quiet and without change in value. Feeding stuffs slow of sale, but prices are firm, and with enquiries for decorticated cotton cakes and limited offerings of prime qualities holders are asking a slight advance.

	Per ton. £ s d	£ s d

—H. Jones Langar and Co.

Mark Lane, Monday.—Linseed Cakes: There is a considerably improved tone in the market, and country dealers assuming that prices have about reached lowest summer level are more inclined to go into stocks, and quotations in consequence have a firmer tendency. Russians are attractively offered at about late rates. East India seed pures make slightly more money. Fine seedy Calcuttas command full prices. Lon-

don made meet a comparatively ready sale. Cotton Cakes.—With only small stocks of Egyptian and the probability of light shipments for some time to come prices remain steady, while English find a dull sale. Decorticated: London-made pures are more inquired after, also digestive meal, with American still neglected. Rape Cakes.—Quiet but firm. Maize Germ Meal.—The market is bare of stocks of White American, but English makes are obtainable in limited quantity. Maize gluten meal is in good request at a slight advance. Rice Meal.—Landed lots of Rangoon are fully as dear, with autumn and winter shipments quoted 2s 6d dearer. Locust beans sell quietly. Dried brewers' grains are unchanged. Nitrate of soda is without alteration.

CHEESE.

Glasgow, Wednesday.—Arrivals large, but buyers few; prices steady; a holiday feeling still exists. Dunlops, 54s to 58s; Cheddars, 58s to 60s per cwt; Canadians in most request.

Highbridge, Tuesday.—A good attendance of buyers and a brisk competition. Best Caerphilly dairies realised up to 48s per cwt.; secondary dairies, 44s to 46s 6d; and other dairies, 38s to 42s. A few inferior lots failed to reach 35s. Cheddars:—53s 6d to 58s 6d; truckles, 55s to 60s; doubles, 52s 5d to 54s 6d.

Newport, Wednesday.—Between 9 and 10 tons pitched, a good demand, and a fair attendance. Quotations:—Caerphillies, 38s to 40s per cwt; fancy dairies, 46s to 47s; Derbies, 50s to 62s; truckles, 56s to 63s; doubles, 58s to 60s.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Ample and varied supplies of fruit and greenstuffs, for which there was a brisk demand. Quotations for English produce:—Peaches, 1s 6d to 10s per dozen; raspberries 3s to 4s per dozen punnets; greengages, 9d to 1s 3d per box; ditto, 6s 6d to 9s. per half-sieve; nectarines, 1s 3d to 10s; green figs, 1s 9d to 4s per dozen; peas, 3s to 4s per half-sieve; cherries, 3s to 8s; gooseberries, 2s 6d to 4s; red currants, 3s 6d to 4s 6d; black ditto, 4s to 5s per half-sieve; apricots, 2s to 3s per peck; tomatoes, 2s 6d to 4s per 12 lb; grapes, 8d to 2s 9d; broad beans, 1s; beetroots, 1s 6d to 2s per bushel; cabbage, 3s to 4s per tally; vegetable marrows, 3s to 4s; endive, 1s 6d to 1s 9d per dozen; green peas, 3s to 4s per bag; ditto, 1s 6d to 2s per bushel; cauliflowers, 2s to 3s per dozen; horseradish, 10s to 15s per dozen bundles; mushrooms, 6s to 10s per 12 lb; cucumbers, 5s to 6s per flat; onions, 1s 3d to 1s 6d per dozen bunches; cos lettuce, 6d to 8d per score; cabbage ditto, 1s 6d per bushel; green artichokes, 2s to 2s 6d per dozen; green beans, 6d per lb; turnips, 2s to 2s 6d; carrots, 2s to 2s 6d; parsley, 1s 6d to 2s; mint, 1s to 1s 3d per dozen bunches; potatoes, 70s to 100s per ton.

HOPS.

Canterbury, Saturday.—Fresh fly is reported. Mould has also made its appearance in many gardens. Prices have been very firm during week, and a good-sized lot changed hands at 80s, and several smaller parcels at 75s per cwt.

ADVERTISEMENTS RECEIVED TOO LATE FOR CLASSIFICATION.

WEDNESDAY, AUGUST 7, 1907.

BUSCOT PARK, BERKS.

Two miles from Faringdon Station, G.W.R.

Messrs. WATERS & RAWLENCE,

In conjunction with Messrs. FRANKLIN & GALE,

Are instructed by Sir ALEXANDER HENDERSON, Bart., to SELL by AUCTION, on the Premises at the Stud Farm, on WEDNESDAY, AUGUST 7, 1907,

50 RAM LAMBS

and

80 CHOICE EWES IN AGES,

from his well-known Registered HAMPSHIRE DOWN

BUSCOT PARK FLOCK.

Since being instructed to conduct the annual Sale of Ram Lambs, &c., from the Buscot Flock, Mr. Rawlence has paid a visit to the Estate, and is able to speak in the highest terms of the Lambs that will be offered; they are of great size, most symmetrical, and of excellent type and character, many of the leading lambs being exceptionally good. The Ewes included in the Sale should also form an additional attraction.

Luncheon at 12 o'clock and Sale after.

Conveyances will meet train at Faringdon Station.

Catalogues of Mr. W. Crosland, Estate Office, Buscot Park, Faringdon, Berks, and the Auctioneers, Salisbury & Wallingford.

Fodder Crops.

Post Free,

1s. 2½d.

W. A. MAY,

"Mark Lane Express" Offices,

3, Wellington Street, Strand, W.C.

By Messrs. SEXTON, GRIMWADE & BECK.

UNRESERVED SALE OF PEDIGREE HACKNEYS.

STUNTNEY HALL, ELY,

One mile from Ely Station, G.E.R.

FRIDAY NEXT, AUGUST 2.

SEXTON, GRIMWADE & BECK are instructed by Mr. Cole Ambrose to SELL BY AUCTION, WITHOUT RESERVE, his highly valuable Stud of

65 PEDIGREE HACKNEYS and HARNESS HORSES,

Including a large number of Piebald and Skewbald Horses, Bays, Chestnuts and Blacks, comprising—

30 MARES AND FOALS.

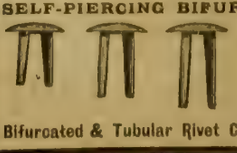
23 HARNESS MARES and GELDINGS.

11 FILLIES, TWO and THREE YEARS OLD.

1 STALLION.

The Horses are bred from the best old Norfolk strains, crossed with the most famous Yorkshire blood. Amongst those to be sold are several that can win in the showyard, and many suitable for harness. The stud can be seen previously to the Sale, and the horses tried in harness by appointment with Mr. Cole Ambrose.

Catalogues of the Auctioneers, Peterborough.



FRUIT RANCHING IN CANADA.

WANTED, a few superior young Britishers, with at least £20 each, to clear the land and earn their own 10-acre ranches. High wages, good society, and excellent climate.

Apply "Ranching," care of British E.T.C. Society, Newington, Liverpool.

Mr. Farmer,—One sees most trumpery efforts made by waggoners to patch up harness, such as piecing straps with boot-laces, and tieing loose buckles on with bits of string. Such attempts are only temporary at the best, and generally speaking risky. In fact, much damage to harness, horses, and carts can be traced to these gimcrack ways of effecting repairs. One cannot expect a farmer to be sending a set of harness to the shop every time a strap gets loose or a buckle comes off, and if the waggoner is anything of a handy man, and has a few Bifurcated Rivets, he can effect these simple repairs himself. The remedy is use

SELF-PIERCING BIFURCATED RIVETS.

Send us 1/- for Box, assorted, and Hand Tool if you are unable to obtain them from your Ironmonger.

Bifurcated & Tubular Rivet Co., Ltd., WARRINGTON.

Printed and Published by the Proprietors, at the Office, 3, Wellington Street, Strand, London, W.C.—July 29, 1907

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The rainfall of July exceeded the average, while the sunshine and warmth were deficient. This is not a good record, yet the splendid spell of perfect weather from the 15th to the 24th did much to advance the growth of the ripening cereals and to redeem the whole month from disaster. The commencement of harvest for wheat since the new century has been as follows:—1906, August 1; 1905, July 25; 1904, August 3; 1903, August 17; 1902, August 11; and 1901, August 6. This year it is probable that a regular commencement will be made on August 12 but not before. Of course a few isolated patches and even specially forward fields are reaped in advance of the general harvest beginning. The cutting of winter oats and of rye will take place in many parishes where they are grown from the 6th inst. In France the wheat harvest has now spread to the region round Paris, but in Normandy and Picardy will not be earlier than in Kent and Sussex. In Germany the harvest is proceeding with difficulty owing to frequent heavy rains. The temperature, however, is so low that there is little sprouting. In Italy the new wheat is not threshing out up to expectation; it looked a bulkier crop that it is turning out.

The Canadian wheat crops (including Manitoba and the North-West) have shown since 1904 a steady increase, the official figures of yesterday being:—

1904	8,500,000 qrs.
1905	13,500,000 ,,
1906	15,400,000 ,,

The present year will, it is to be feared, break this agreeable run of prosperity, but the backwardness of the spring in 1907 has been very exceptional, and the setback is not regarded as like to extend over more than a season. The area under wheat in the Dominion increases year by year when the spring allows time for sowings. Of course the wheat is practically a spring crop, though there is a not unimportant district in Alberta where the grain may safely be confided to the soil before the falling of the winter snows. The cultivation of wheat makes very little progress in British Columbia, possibly on account of the distance from the consuming centres.

The yield of wheat in the United States is thus estimated, and though the Bureau report of the 11th inst. is likely to be of considerable interest, it is not anticipated that it will make much difference in the estimates of the wheat yield. On the barley and oat yields it is expected to throw useful light, and also on the July progress of the maize. The wheat returns are as follows, reduced to English quarters of 480 lb.:—

	Qrs.		Qrs.
1907	76,000,000	1899	68,750,000
1906	91,000,000	1898	84,275,000
1905	85,000,000	1897	66,275,000
1904	66,000,000	1896	53,750 000
1903	77,000,000	1895	58,750,000
1902	85,000,000	1894	58,000,000
1901	93,500,000	1893	40,000,000
1900	65,500 000		

The acreage, of course, has varied, but no doubt is ordinarily felt, as to 1901 having been the busiest year of United States' wheat production.

The imperial wheat average for July shows 8d. advance on June, and is now on the right side of 32s. per quarter, which in America is what they know as "dollar wheat." We could do with dollar wheat as an established institution on this side of the "Herring Pond." The barley average for July is 3d. dearer from that of June, and there is 1d. advance in oats. The small improvement in the latter is due to the June average of 20s. 9d. being already fairly high.

The average price of household flour in London is 6d. dearer on the month, but the July good price of 26s., which is 2s. 6d. upon the year, is a little discounted by the market of 2nd August, at which 3d. decline was allowed. The Paris price for July was 34s. 6d., against 32s. 9d. for June, a price that does not speak at all well of wheat crop prospects in France. In 1903, for example, the price fell from 34s. in June to 31s. 9d. for July.

The average price of red winter wheat at New York for July was 33s. 3d. per quarter, against 27s. 7d. for last season. This is a significant advance. The average price for maize at New York was 29s. 4d., against 19s. 5d. last season.

The sales of British wheat at the statute markets since harvest thus compare with the present season:—

This season ... 2,627,000 qr., at 27s. 4d. per qr.
Last ,, ... 2,889,000 qr., at 28s. 9d. ,,

The sales of British barley show increased deliveries:—

This season ... 3,368,000 qr. at 24s. 4d. per qr.
Last ,, ... 3,199,800 qr. at 24s. 3d. ,,

The sales of British oats show a decided increase.

This season .... 1,170,090 qr. at 18s. 3d. per qr.
Last ,, ... 1,096,000 ,, 18s. 6d. ,,

The imports of the United Kingdom last week were as follows:—

Wheat, 589,000 qr.: a heavy supply.
Flour, 79,300 sks.: a small arrival.
Barley, 35,000 qr: a third of an average.
Oats, 118,500 qr: a full average.
Maize, 351,000 qr.: a very large supply.
Linseed, 35,000 qr.: a full supply.

The wheat gradient last week was as follows:—

Canterbury	37s. 0d. per qr.
Doncaster	32s. 2d. ,,
Range	4s. 10d. ,,

That for barley was more restricted:—

Mark Lane	27s 6d. per qr.
Peterborough	24s. 1d. ,,
Range	3s. 5d per qr.

Oats continue at good prices all over England.

Nottingham	21s. 10d. per qr.
Ipswich	19s. 9d. ,,
Range	2s. 1d. ,,

No averages are published for rye, but 30s. was made in London on July 31.

The supplies of grain, &c, on passage to the United Kingdom on August 1, 1907, 1906, and 1905 thus compare:—

	1907.	1906.	1905.
Wheat, qr.	2,542,000	2,320,000	2,370,000
Flour, sks.	174 000	170,000	90,000
Maize, qr.	1,080,000	1,060 000	1,140,000
Barley, qr.	190,000	170,000	175,000
Oats, qr.	90,000	266,000	350 000
Linseed, qr.	318 000	143,000	239,000
Rapeseed, qr.	21,000	26 000	15,000
Cotton-seed, sks.	47,000	23,000	25,000
Rice, qr.	46,000	20 000	30,000

It will be seen that the totals of wheat, maize, and barley show very little material change on the three years, but that there is a very great falling off in our expectations of oats, and that there is a marked increase on anticipated supplies of linseed, cottoncake and rice. The expectations of flour have been small for now three years in succession.

August shipments from the United States will need to show a marked increase on those of July if America is to resume her usual leading *rôle* in the export trade. In July the completed figures are as follows:—

Wheat	627,000 qr.
Barley	30,000 ,,
Oats	175,000 ,,
Maize	703,000 ,,
Flour	448,000 sks.

As compared with June there is an increase in oats and maize, but a decrease in both wheat and flour, the items in which increase had been anticipated.

The July shipments of Argentina were as follows:—

Wheat	434,000 qr.
Maize	1,053,000 ,,
Linseed	181,000 ,,
Oats	64,000 ,,

These items show a falling off with respect to exports of wheat, linseed, and oats, but of maize there is an increase.

July exports for Russian were as follows:—

Wheat	723,000 qr.
Barley	348,000 ,,
Oats	108,000 ,,
Maize	548,000 ,,

The shipments of maize exceeded anticipation, but in all the other cases exports were less than usual.

The July exports from Roumania are interesting.

Wheat	563,000 qrs.
Barley	58,000 ,,
Oats	23,000 ,,
Maize	1,672,000 ,,

These totals include Bulgaria, and also the Turkish ports on the Euxine, but even so, the total of maize is prodigious. On the other hand, the exports of barley and oats would be very small even if they were confined to Roumania proper.

July exports from the East were as follows:—

	India.	Australasia.
Wheat, qr.	600,000	121,000
Linseed ,,	359.000	—
Barley ,,	15,000	—
Oats ,,	—	18,000

Some minor July items are:—12,000 qr. of rye from Russia, 159,000 qr. of rapeseed from India 29,000 qr. of linseed from the United States and 15,000 tons of cottonseed from India.

LONDON HAY TRADE.

Thursday.—There is a continuance of the general shortage of supplies from all sources, the trade however presents a quieter appearence. Prices of old stuffs are no lower, but there is nothing like the keen demand we have been experiencing for the last three weeks, doubtless the near approach of the holidays has somewhat affected the demand. There is still a fair inquiry for prime old stuff, supplies of which are especially short, and for which top prices are easily obtainable, lower qualities are, however, more difficult of sale. There are large arrivals of the new crop, and the demand has somewhat slackened off, sales being made at slightly lower figures than previously reported.

New clovers in good condition being obtainable at 77s 6d to 80s per ton, mixtures at about 70s to 75s per ton, and hays at 65s per ton. Anything, however, that is at all off in condition has to be sold at much under these quotations. Straw continues in fair demand at about previous rates. In the foreign market shipments are still short, and importers find no difficulty in effecting clearances at full prices.

Prices ruling are about as follow:—English best old meadow hay, 85s to 90s per ton; good old meadow hay, 75s to 82s 6d per ton; plain hays, 70s per ton; best old clovers, 95s to 100s per ton; good clovers, 85s to 90s per ton; inferior clovers, 80s to 82s 6d per ton; best old mixtures, 95s to 97s 6d per ton; good mixtures, 87s 6d to 92s 6d per ton; plain mixtures, 80s to 85s per ton; seconds hays, clovers, and mixtures, 62s 6d to 70s per ton; wheat straw, 26s to 28s per load; oat straw, 26s to 28s per load; barley straw, 26s to 28s per load. Foreign: Canadian mixture, none; first quality Dutch hay, 67s 6d per ton; second quality Dutch hay, 62s 6d to 65s per ton; good French hay, 65s to 67s 6d per ton; French and Dutch clovers, 85s per ton. These prices are by barge load delivered alongside a London Thames wharf.

WET AND DRIED GRAINS.

Mark Lane, Friday.—Wet Grains: Prices remain about the same, and business has been done at 11s to 12s ale, and 9s to 9s 6d porter per ton. Pressed white distillery meal 32s 6d per ton on rail, London. Dried Grains.—The demand continues brisk and prices have advanced to—Distillers, 107s 6d; ale, 95s to 97s 6d; mixed, 90s to 92s 6d per ton on rail, London, at which prices business has been done monthly up to October next. Calcutta rice meal 80s; rice germ, 100s; American cane treacle in good demand, 87s 6d per ton, on rail, London. Kiln dried sea-damaged Australian wheat from 20s per qr.—Hamlyn and Co.

BUTTER.

(Price per lb.)

Birmingham: 1s 3d to 1s 3d. Devizes: 1s 4d and 1s 5d. Evesham: 1s 2d to 1s 2½d. Hereford: 1s 1d to 1s 2d. Kidderminster: 1s 1d. Market Drayton. 1s to 1s 1d. Penarth: 10½d to 1s. Penzance: 9½d to 10d. Plymouth: 1s to 1s 1d. Ripon: 1s 6d and 1s 8d per 24 oz roll. Scarborough: 1s 2d. Spalding: 11d. Truro: 10d to 1s 1d. Wellington (Salop): 11d to 1s. Worksop: 11d.

EGGS.

(Number per 1s.)

Birmingham: 10 to 11. Devizes: 14 to 16. Evesham: 11d to 11½d per doz. Hereford: 12 to 14. Kidderminster: 11. Market Drayton: 11 to 13. Penrith: 11 and 12. Penzance: 8½d to 10½d per doz. Plymouth: 12. Ripon: 11 and 12. Scarborough: 10. Spalding: 12. Stockton: 10. Truro: 9d to 10d per doz. Wellington (Salop): 11 and 12. Worksop: 1s 8d per score.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English steady, quiet, unchanged prices. Foreign dull. Sellers ask Monday's rates, but demand very limited. No. 1 Northern Manitoba, ex ship, held at 36s 9d; No. 2 at 35s 9d; No. 1 hard Manitoba at 37s 6d; choice white Karachi at 34s 9d; Australian, landed, at 37s. Flour dull, unchanged. Hungarian quoted at 35s 6d; Minnesota patents at 27s to 28s; Iron Dukes at 22s to 22s 6d. Maize slow, easier tendency. Odessa, ex ship, held at 22s 9d, landed at 23s 6d Galatz-Foxanian, ex ship, 22s 9d, landed at 23s 3d; mixed American, ex ship, at 33s 6d, landed at 24. Barley steady, quiet. Persian, ex ship, quoted at 22s 10½d; Azoff-Black Sea, landed, at 25s. Oats dull. 18s sellers, 17s 9d buyers, La Plata landed; 17s 9d sellers, 17s 6d buyers, South Russian 38 lb, landed.

COUNTRY.

Ashford, Tuesday.—Very little actual trade was done, but the tone of the market was very firm all round. Sales of wheat at 38s were reported, this being the highest figure reached for a long time. Barley made 28s to 29s; white oats, 22s to 25s; black oats, 21s to 24s; Mazagan beans, 30s to 31s; tick beans, 33s to 34s; maize, 25s to 26s 6d; foreign grinding barley, 26s to 27s per qr.

Banbury, Thursday.—Wheat, white, 33s to 34s per qr; red, 33s to 34s per qr; barley, 28s to 30s per qr; beans, 31s to 32s 6d per qr; oats, 20s to 25s per qr; peas, 29s to 33s per qr.

Birmingham, Thursday.—The attendance at the market was a very small one, and the amount of trade done was very limited. Foreign wheats were practically unchanged on the week but the tendency was in buyers' favour. English wheats were very scarce, and made up to 13s 4½d. per 186 lb delivered. Bessarabian maize was 6d lower. Galatz-Foxanian was unchanged in value, as was also grinding barley. There was no change in the value of English oats or beans.

Chichester, Wednesday. — Few samples on offer, and not much trade. Fair attendance. New white wheat, 35s to 35s 6d; new red ditto, 35s to 35s 6d; grinding barley, 25s 9d; oats, English, 18s to 23s; beans, 32s to 33s; maize, 24s to 25s; flour, 24s to 28s.

Devizes, Thursday.—There has been very little alteration in the price of corn, all descriptions being about the same as last week. The wheat harvest is expected to commence in the district in about a fortnight. In some of the most forward districts of the county winter oats have been cut Best wheat, 17s to 18s; secondary, 16s to 16s 6d; malting barley, 24s to 30s; feeding, 22s to 24s; old oats, 20s to 24s; new beans, 15s 6d to 16s 6d; fine flour, 27s to 30s; extra fine, 32s to 36s.

Glasgow, Wednesday.—There was the usual attendance at the market to-day. Wheat and flour unaltered. Maize and corn steady at late rates. Barley held for extreme prices. Oats pressed for sale, and price to-day shows a decline of 3d per boll. Beans and peas firmly held. Bran and thirds unchanged. Oatmeal steady. Other articles unchanged.—Gibson and Clark.

Hereford, Wednesday. — Small market. English grain unaltered; maize slightly in favour of buyers. Quotations:—Wheat, 3s 10d to 4s per bushel of 62 lb; barley, 3s 6d to 4s per 56 lb; oats, 2s 6d to 2s 10d per 40 lb; beans, 3s 10d to 3s per 65½ lb; maize, 3s 3d to 3s 6d per 60 lb.

Ipswich, Tuesday.—Scarcely any wheat on offer; trade firm at late rates. Reds, 35s to 35s 6d; whites to 36s 6d per 504 lb. Maize 6d per qr. lower. Oats quiet. Malting barley firm. Beans and peas unaltered.

Leeds, Tuesday.—The weather is warmer but showery, causing much delay to the gathering of the hay crop. We have to report another week of quietness in the wheat trade, with slight fluctuations in prices, valuations being practically unchanged on the week, the weather of the day ruling the market, the general tendency continuing firm and healthy. Shipments this week are again moderate and below current European requirements. Maize, 3d lower; beans rather dearer; oats unchanged.—Dunns and Co.

Manchester, Thursday. — English wheat about 6d per qr dearer, and foreign in better demand at full rates. Flour occasionally 6d per sack lower, and Indian corn 1½d to 1d dearer. Barley: Little done. Oats very firm for English, with foreign ½d to 1d higher on the week. English beans about 6d dearer. Peas steady and unchanged; bran and other articles unchanged.

Newark, Wednesday. — Quiet market; supplies again small; prices ruled firm. Quotations:—White and red wheat, , 35s to 36s; malting barley, 28s to 30s; grinding, 25s to 26s; white oats, 23s to 24s; black oats, 22s 6d to 23s; beans, 34s to 34s 6d per qr.

Newport, Wednesday.—Trade was quiet, and prices about the same as last week.

Ripon, Thursday. — Very little local wheat showing, and prices show no change. Round maize is making rather less money. A small attendance of farmers. Prices:—Wheat, 34s to 35s 6d; wheat, foreign, 36s to 40s 6d; barley, grinding, 26s to 27s; oats, 24s to 25s; maize, round, 26s to 26s 6d; maize, flat, 26s to 27s per qr.

Sheffield, Tuesday.—The market was quiet, but prices continue to harden. English wheat and some classes of foreign are quoted 6d per qr higher. General tone is firm. Maize is quoted at last week's prices. Beans rather dearer. Prices:—Wheat, white, new, 34s 6d to 35s 6d; ditto red, new, 34s 6d to 35s 6d per 504 lb: oats, black, 22s 6d to 23s; ditto white, 23s 6d to 24s per 336 lb; peas, grinding, 33s 6d to 34s; ditto blue, 75s to 90s per 504 lb; beans, English, 36s to 36s 6d per 532 lb; barley, grinding, 26s to 26s 6d; ditto malting, 28s to 32s per 448 lb; Indian corn, small, 25s 9d to 26s; ditto Plate, 25s 6d to 25s 9d; ditto flat, 26s to 27s per 480 lb.

Stockton, Wednesday.—There was no local wheat showing. Foreign wheat keeps very slow, and prices show no change on the week. Maize 3d to 6d lower.

Worksop, Wednesday. — Small attendance. Quite a holiday market, with few samples of grain on offer. White wheat, 33s to 34s; red wheat, 32s 6d to 33s 6d; barley, 27s to 29s; white oats, 22s 6d to 24s; black oats, 21s 6d to 23s; maize, 26s to 27s 6d; beans, 34s to 36s per qr.

HAY AND STRAW.

Hereford, Wednesday.—No quotable change in prices is reported.

Leeds, Tuesday. — A steady business is proceeding in old hay in the warehouses, and at present no new hay has been offered. The return of unfavourable weather and thunder showers continue to interfere with the ingathering of the new crop. Prices are firm all round at the following quotations:—Clover hay, 7½d; meadow hay, 7d; wheat straw, 5d; oat straw, 5d; and rye straw (retail), 7d to 8½d per stone; green clover, 3½d per bundle.

Newcastle, Tuesday. — Old land hay from £3 15s to £4 7s 6d per ton; new land hay, £4 10s to £5 7s 6d; wheat straw, £1 3s to £1 6s 6d per load.

Nottingham, Wednesday.—Fair supplies on offer, which met a steady trade at late rates. Quotations:—Inferior to good hay, 75s to 85s; prime ditto, 90s to 100s; inferior to good clover, 80s to 60s; prime ditto, 95s to 100s; wheat straw, 45s to 55s per ton.

Sheffield, Tuesday. — Fair supplies, with average attendance of farmers. Last week's prices were maintained. Choice old seeds, £4 15s to £5; secondary seeds, £4 10s. to £4 15s; green fodder, 18s to 19s per ton.

Whitechapel, Thursday.—A better supply met a good demand at recent rates. Best clover, 84s to 97s 6d; inferior ditto, 75s to 80s; specially picked hay, 90s; good ditto, 80s to 87s 6d; inferior ditto, 65s to 70s; mixture and sainfoin, 82s 6d to 90s; straw, 28s to 34s per load.

FRUIT AND VEGETABLES.

Covent Garden, Thursday. — This day's quotations for English produce:—Apples, 2s to to 4s per half bushel; cherries, Napoleon 7s to 12s; black, 3s to 8s; cranberries, 7s 6d to 9s per case; red currants, 1s 6d to 2s 6d per peck; black ditto, 4s to 5s per half sieve; gooseberries, 2s to 3s per half sieve; green figs, 3s to 5s per dozen; melons, 1s to 2s each; nectarines, 1s 3d to 10s per dozen; peaches, 1s 6d to 10s per dozen; strawberries, 2s to 3s per peck; raspberries, 3s to 4s per dozen punnets; tomatoes, 3s to 3s 9d; onions, 1s to 1s 6d per dozen bunches; beetroots, 1s 4d to 1s 6d; carrots, 2s to 2s 6d per dozen bunches; spring cabbages, 3s to 4s per tally; turnips, 2s to 2s 6d per dozen bunches; green peas, 2s 6d per bag; dtto garden blues, 1s 6d to 2s; broad beans, 1s to 1s 3d per bushel; potatoes, 70s to 100s per ton.

Live Stock Trade in the West.

As haymaking operations, which are being extended over a more than usually prolonged period owing to the "catchy" nature of the weather, still continue to engage attention, stockowners are much too preoccupied for anything else, consequently stores of all kinds are being very much neglected for want of time to sort out those intended for market, and supplies of both milch beasts and barreners are suffering accordingly, another factor contributing to this being the abundance of keep everywhere, which renders the necessity to sell out much less urgent than is often the case, especially in periods of drought. And to these two causes must be assigned the present fairly buoyant state of the trade in stores, but for which prices might have taken a more unsatisfactory turn. Most of the stock now coming out is of a very ordinary stamp, and sellers therefore have all the more reason to be satisfied with the prices they are making. Only in very exceptional cases do really good heifers and calves reach £21, from £16 10s. to £20 being the best prices we can quote for this class of stock, cows with calves selling from £14 to £17 or a trifle over from anything specially recommended as a milcher. Barreners scarcely make such good prices as they have been doing of late; but this may be due in a measure to difference in the class of bullock now offering, many of them being hardly up to the stamp of those sold earlier in the season. Occasionally a few in distinctly fresh condition being from £24 to £28 per pair, but most of those now on the market only make £18 to £22 or £23, whilst many change hands on considerably lower terms. Both stirks and yearlings maintain their value on the market, and, with keep plentiful this class of stock is not at all likely to go a-begging. Sheep, too, continue to meet a ready demand, and, though harvest prospects are giving rise to some little anxiety, seeing the advanced character of the season and the backward condition of much of the corn, prices as yet remain unaffected; but another week or so of stormy weather is bound to tell on the trade, and may lead to a drop in values. But we sincerely hope this will not prove to be the case, though we are bound to admit we are rapidly approaching a critical period as regards the harvesting. Up to the present most of these sheep are realising an advance of from 2s. to 4s. as compared with last year, and this must be a particularly gratifying fact to flockmasters and sheepbreeders generally. Draft Down ewes now make from 40s. to 54s. 6d.; two-tooth ewes, 41s. to 55s. 6d.; four-tooths, 48s. to 53s. 6d.; six-tooths, 46s. to 50s.; grazing ewes, 33s. to 44s.; two-teeth wether sheep, 44s. to 55s.; wether lambs, 37s. to 49s. 6d.; chilver lambs, 30s. 6d. to 41s.; mixed lambs, 25s. to 42s. 6d.; working wether lambs, 33s. to 40s. Ram lambs for stock purposes are likewise selling very well, and the earlier sales now taking place seem to show that not only are last year's values being well supported, but also that breeders on the whole are getting a slightly better return for the outlay to which they have been put in their endeavour to still further improve the character of their sires.

Prices of fat stock have undergone no very great change since our last report. In beef, bullocks of a good class still attract buyers at full values, the best steers and heifers realising £17 up to £23 apiece (or from 11s. 6d. to 12s. per score for the choicest weights); more medium qualities 11s., and fat cows 10s. to 10s. 6d. and very little of what has been offered has remained over unsold. With cooler weather calves have met a slightly better demand at about previous currencies—8½d. to 9d. for the best weights, and 7d. to 8d. for the plainer grades. Mutton continues firm all round, and full prices are being realised, wethers selling up to 60s. each, and over (or 8½d. to 9d), and ewes to 59s. (or 7½d. to 8d). Lamb has been in good consumptive demand, wethers being particularly dear, some of the best drafts realising 46s. to 58s. each (or 11d. to 1s. per lb.), and seconds from 30s. to 43s. or 44s. (or 10d. to 10½d). The weather being also favourable to the pork trade, prices remain exceptionally buoyant at from 44s. to 60s. each (or 10s. 3d. to 10s. 9d. per score), and baconers from 65s. to 95s. (or 9s. 6d. to 10s.), heavier pigs also commanding more attention at 8s. to 9s.

Weekly London Averages.

An account of the Quantities and Prices of British Corn bought on the London Market and in the area within five miles from the Royal Exchange during the week ending Tuesday, July 30, 1907:—

THE MARK LANE EXPRESS SUPPLEMENT FOR THE HOME

Conducted by "PEPITA"

THE NEWEST FASHIONS.

Now that the holiday season has commenced, there is a demand for travelling gowns. The smart gown illustrated in the sketch on this page is of striped Viyella flannel. This does not shrink, and will wash or clean beautifully. The design shewn is in a pale shade of green with white stripes. The collar and cuffs are of white silk edged with dark green flannel and give a very *chic* appearance to the costume.

* * *

Early in the summer and towards its close voiles and all light-weight silk fabrics are most in evidence, but August generally calls for gowns of lace, lingerie, mousseline de soie, point d'esprit, and all such textures that are so fascinatingly pretty and lend so much charm to any outdoor picture. Embroidered linens are also worn on all occasions, but for any formal receptions a linen gown must now be unusually handsome and effective, as linens, both white and coloured, have been worn so much in the morning of late years. The lingerie gowns must also be handsomer and more elaborately made up than ever before, for some change is always necessary from year to year, and the fine tucked, embroidered and lace trimmed batiste frocks have had an unwonted time of popularity, but nothing has yet been found sufficiently attractive to take their place. Once again these embroidered handkerchief linen gowns are being worn over foundations of light silk, and the soft colour underneath shows off the work upon the dress to excellent advantage. Over mauve, light green, pale blue or pink, a lingerie frock is now considered sufficiently handsome for any afternoon entertainment.

* * *

Needless to state, an all lace or an elaborately lace trimmed gown is as desirable a possession as ever; a thing that so evidently represents its true value cannot fail to be longed for. At the same time, there are more net and Marquisette gowns elaborately trimmed with Irish and Valenciennes lace than there are of the all lace costumes, and the reason for this is that lace really needs the contrast of some other material that is not quite so costly. Marquisette is about the most popular of the transparent materials to be combined with effective lace, but chiffon and mousseline de soie and even point d'esprit are also made use of. Point d'esprit trimmed and dotted Swiss, either one trimmed with point d'esprit lace, make a simple style of dress; they are exceedingly pretty, and especially so for rather elaborate morning dresses.

* * *

There is an infinite variety of new gauze textures, and these are all charming for driving, luncheons, etc. Stripe effects as well as checks, plaids, and figures are all noticeable among the transparent fabrics; two toned effects are seen, as well as a colour combination with white, and black and white, with some bright colour introduced in the trimming, is always smart, as well as being extremely serviceable and appropriate on all occasions. There must be more white than black in the material, however, for at this time of year all gowns must be as light and cool in effect as possible. A light green and white stripe is exceedingly attractive, and green is one of the happiest colours for summer, while artists contend that there is no shade more universally becoming. Certainly there is always a great field from which to select, and between the palest and the deepest tints there must surely be one shade for every one.

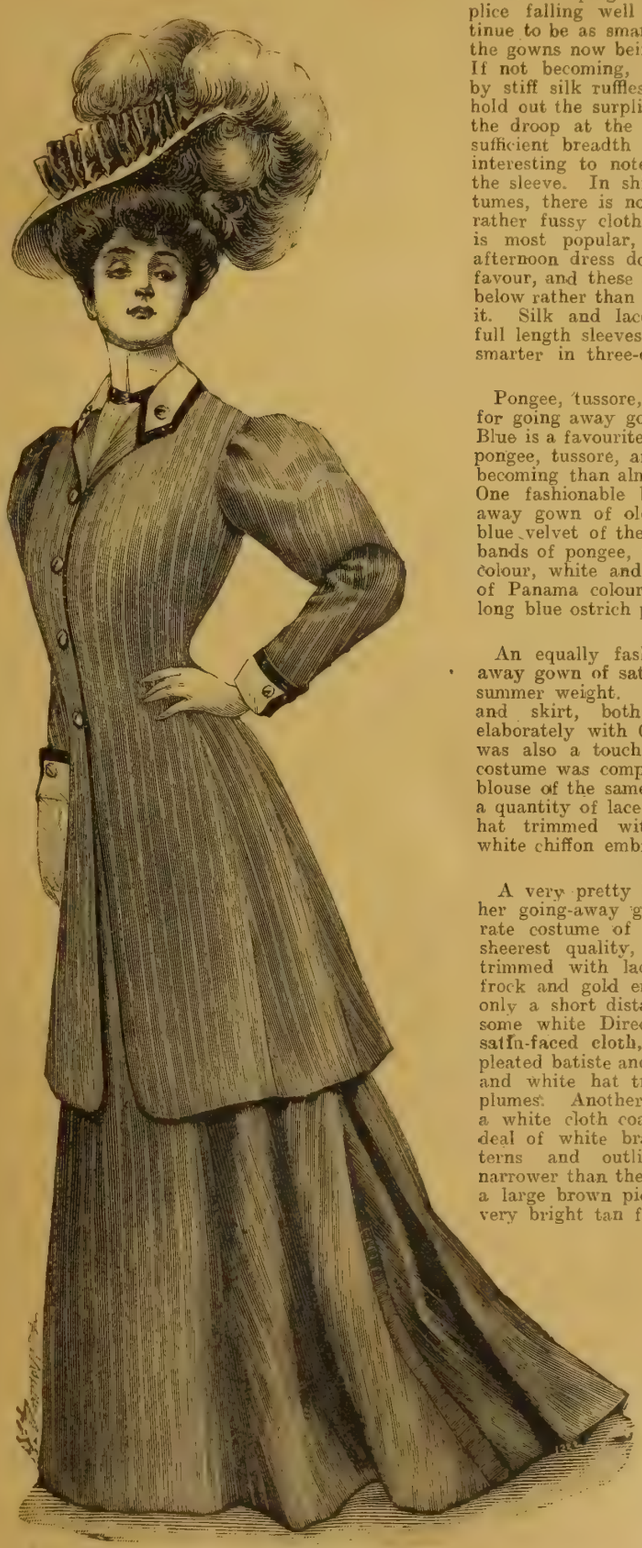
* * *

An afternoon gown must be long and, while exaggerated trains are not worn, there must be a graceful and becoming sweep of the material. As the season advances the Empire becomes more and more disguised, while the severely plain princess model has practically disappeared, although this does not mean that the one piece frock is out of favour—far from it. It has been proved far more satisfactory in dealing with delicate materials to join the bodice and skirt together by a band of embroidery or lace, even though it is to be hidden by a ribbon girdle. With heavier materials and those that are made up of a silk foundation the majority of gowns are now made with bodice and skirt separate, although many are joined together, but a fitted girdle generally hides the fact that they are joined together at the belt.

* * *

The drooping shoulder line and wide surplice falling well down over the sleeve continue to be as smart as ever, and practically all the gowns now being made up show this design. If not becoming, the sleeve can be built out by stiff silk ruffles at the shoulder, which will hold out the surplice, and, by doing away with the droop at the top of the sleeve, will give sufficient breadth across the shoulders. It is interesting to note the gradual lengthening of the sleeve. In shirt blouses and all tailor costumes, there is now a full length sleeve. For rather fussy cloth suits, a three-quarter length is most popular, and only for an elaborate afternoon dress do the elbow sleeves remain in favour, and these are generally finished off just below rather than at the elbow, or a trifle above it. Silk and lace wraps have some of them full length sleeves, but the handsomer ones are smarter in three-quarter length.

* * *



Pongee, tussore, and foulard are much used for going away gowns by this summer's brides. Blue is a favourite colour, if becoming, and blue pongee, tussore, and foulard are more generally becoming than almost any other known fabrics. One fashionable bride recently wore a going-away gown of old blue pongee, trimmed with blue velvet of the same shade and embroidered bands of pongee, the embroidery being in linen colour, white and a little dull pink. The hat, of Panama coloured crin, was trimmed with a long blue ostrich plume and velvet ribbon.

* * *

An equally fashionable bride wore a going-away gown of satin-faced cloth of the lightest summer weight. It was made with a box coat and skirt, both being trimmed somewhat elaborately with Cluny and Irish lace. There was also a touch of silver embroidery. The costume was completed by a handkerchief linen blouse of the same colour, which was made with a quantity of lace insertion. and a large leghorn hat trimmed with blue ostrich feathers and white chiffon embroidered in silver.

* * *

A very pretty bride of this season wore for her going-away gown a diaphanous and elaborate costume of tan voile in the finest and sheerest quality, made over grey silk and trimmed with lace of the same colour as the frock and gold embroidery. A bride who had only a short distance to go wore a very handsome white Directoire gown of light weight satin-faced cloth, with guimpe and sleeves of pleated batiste and Cluny lace. She had a black and white hat trimmed with net and ostrich plumes. Another striking white costume was a white cloth coat suit trimmed with a great deal of white braid put on in elaborate patterns and outlined with tan braid much narrower than the white. With this were worn a large brown picture hat with plumes and a very bright tan feather boa.

A SMART TRAVELLING GOWN.
Paper Pattern 1/6½, post free.

A Famous Song.

One of the most popular of modern songs, "Alice, where art thou?" was offered to several music publishers for a £5 note, and was refused. Imagine their chagrin when the song eventually attained a sale of between two and three hundred thousand copies. The case is, of course, not by any means the only instance of misguided judgment.

COOKERY.

Practical Recipes.

ALLEMANDE STEAK.

Take left-over roasted lamb, and put through the meat mincer with 6 sprigs of parsley and 2 stalks of celery; then add to 1 pint of this meat 3 tablespoonsful of bread-crumbs, 1 tablespoonful softened butter, ½ level teaspoonful of salt, ¼ teaspoonful of pepper, and 1 teaspoonful of minced green mint. Add enough cold water to make moist, and then beat in 1 egg and form into a steak on to a buttered pan; place in a moderate oven and roast for 25 minutes, basting every 10 minutes with melted butter and a little hot vinegar. Just before the last 5 minutes is up spread a generous layer of fine bread crumbs mixed with egg yolk over the top and sides and brown. Serve on a hot dish and garnish with sliced lemon and parsley.

TOMATOES AND MUSHROOMS.

Put on 1 pint of tomatoes in a saucepan and cook for 15 or 20 minutes until nearly all the water has evaporated, season with salt and pepper, add a generous tablespoonful of butter, 1 tablespoonful of bread crumbs, and ½ pint of fresh mushrooms chopped fine. Cook until the mushrooms are tender. Have some bread cut in nice slices, toasted and slightly moistened with warm milk. Pour the tomatoes and mushrooms over it and serve very hot.

CALF'S TONGUE WITH TOMATO SAUCE.

Take 2 calve's tongues, soak them in warm water for 1 hour; drain and parboil for 10 minutes; cool, pare, and scrape the white skin off. Into a saucepan put 1 tablespoonful of flour, stir into it gradually 1 cup of water. When it boils, add 1 wineglassful of vinegar, 1 bunch of parsley, and 1 onion, with 3 cloves stuck in it. Cover and cook slowly for 1 hour. Drain on a cloth; dish up and serve with tomato sauce over it. The tongue can be boiled the day before, and then re-heated for breakfast, and the tomato sauce made and poured over.

ONION SAUCE.

As a change from the tomato sauce usually served with breaded lamp chops, try an onion sauce made in this way:—Slice 2, or, if very small, 3 onions, and cook them in water for a few moments and drain. Put them into just enough boiling water to cover, add a little salt, and cook until tender. Cook together 2 tablespoonfuls each of flour and butter, and when perfectly smooth add ½ pint of stock 3 or 4 tablespoonfuls of cream and 1 saltspoonful each of salt and sugar and a dash of cayenne. When the onion is tender press it through a colander and add the water in which it has been cooked.

ROGNONS FARCIS.

Procure some kidneys, cut in halves, warm, with a chopped shalot, and then let them cool. Cook ½ lb. of liver with 3 oz. of fat bacon, 1 shalot, a few sprigs of parsley, and a bay-leaf. Season with salt, pepper, and a little powdered mace. When the liver is cooked, add a tablespoonful of breadcrumbs which have been soaked in a little boiling milk, and beaten up to a stiff paste; pound all the ingredients in a mortar, then pass them through a wire sieve, and spread on a plate to get quite cold. Take a small portion and fill half a kidney with it, shaping it into the shape of a cone. Proceed with each piece in the same way; dip them in egg, then cover thickly with fine crumbs, and fry in a wire basket. Serve with tomato sauce poured round the dish.

SAUSAGE CAKES.

These are rather more delicate than sausages served in the ordinary way, and certainly look much nicer. Season ½ lb. of sausage meat with salt, pepper, and a little powdered mace, take a dessertspoonful at a time, and form into a little round cake, brush over with beaten egg, and pass through sifted crumbs, fry until nicely browned, then dish up in a circle on a hot dish, with the centre filled in with chip potatoes.

LEMON CURD.

Half a pound of castor sugar, 3 eggs, leaving out the whites, 1 lb. of butter, 2 lemons; grate the rind of one; stir all together, and then boil until rather thick.

LEMON BUNS.

Rub together in a dry state three-parts of a pound of flour, 2 oz. of butter, three-parts of a pound of castor sugar, then add the juice and rind of 1 lemon and 2 eggs; mix well together with half a wineglassful of brandy, and make into small heaps, or place in tiny tins, previously buttered or larded; bake for about 20 minutes.

CHESHIRE BISCUITS.

One pound of flour, ½ lb. of butter, 10 oz. of castor sugar, 2 eggs; mix into a paste with the two eggs and a few dróps of essence of lemon; roll out moderately thin, and cut into small rounds with a pastry-cutter or thin wineglass. Bake for 15 minutes in a modern oven.

MULLIGATAWNY SOUP.

One quart of stock, 2 oz. of butter, 2 sliced tomatoes, 3 eggs, 1 onion, 2 tablespoonfuls of curry powder, 1 tablespoonful of curry paste. Slice the onion thinly, fry it in the butter, adding the tomatoes and curry paste, and 2 green chilies cut very small; then add the well-flavoured stock and boil 20 minutes, then skim well and let the soup cool; beat the eggs, crush and wash the shells, and add to the soup; stir over the fire till boiling, then strain through a tammy, add a squeeze of lemon juice, season with pepper and salt and the curry powder. Serve with boiled rice.

STUFFED STEAK.

Take a pound and a-half of well-hung steak, cut in one piece, and three-quarters of an inch thick. Lay it on a table, and spread upon it a thin layer of good veal stuffing. Roll it round, tie it with twine to keep it in shape, and fasten the ends securely. Dissolve in a stewpan a lump of butter, put in the steak, and turn it about until it is finely browned all over, then pour over it nearly a pint of beef stock, which may be made with beef extract, cover the saucepan closely, and let the steak stew gently until tender, then lay the meat on a hot dish and remove the twine. Thicken the gravy, pour it over the beef, and serve very hot. Great care must be taken that the meat is stewed very slowly, or it will be tough.

SARDINES A L'ITALIENNE.

Split the sardines in half, remove bones and tail, fry some bread in butter, pour the oil from sardine tin into frying-pan and fry sardines in it, sprinkle with pepper and parsley. Lay one on each crouton, lay on fancy paper, and serve hot.

Gardening in August.

PANSIES.—Although excellent plants can frequently be grown from pansy cuttings, recent experiences in growing from seeds have led me to prefer the latter method.

The pansy seeds I have planted this year have produced some most beautiful specimens of good strains, and these are now in full bloom, many of the flowers being exceptionally large, and brilliant in colour. They have grown very strong and have flowered freely. The seeds were sown in a moderately warm position at the end of January last. I therefore recommend amateurs to sow seeds in January in a moderate heat. Prick off as soon as ready, in April, and turn them out in the middle of May; good blooms will then be plentiful in August and September. Seeds may be sown now in a cold frame, and the seedlings allowed to make what growth they can till the spring, when, plant out in the early part of May for blooms in June and July. There is no need to mention any particular variety or colour, as a packet may contain some lovely pansies which a fancier might feel disposed to name if he should happen to drop on something entirely new.

CALCEOLARIA.—This is one of the most showy of greenhouse plants, and is easily raised from seed which should be sown at once in pots or small boxes, compost, being one part fine leaf mould, to about two parts good loam, and one part sand.

The seeds being small, they need careful handling. They should have the smallest possible sprinkling of soil laid upon them, and the box should be covered with glass. Do not let steam settle on the under-surface of the glass, and merely damp the soil. The brown and yellow varieties are certainly best grown from cuttings taken from this year's plants, and should be done as soon as one can spare time to devote to them. They should be planted to a depth of 1 inch, if the cuttings will admit, and soil of the mixture already stated should be used.

ANTIRRHINUMS.—The cuttings should now be obtained and treated in the same manner as the calceolaria.

POPPIES.—The blooms of these brilliantly-coloured garden flowers are now falling rapidly, and the seed pods are forming. These should be collected, and the seeds may be sown in the commencement of September. There are many perennial kinds, and they make a most showy display and are useful for cutting for house decoration.

WEEDS.—Continue the slaughter of weeds, and clean all dead and seedy-looking leaves from geraniums and other bedded plants.

LAWN.—This should be run over with a machine once a week and the edges neatly trimmed. It is unwise to remove dandelion and other roots at present, as this proceeding will make the lawn look patchy. The rooting-out of dandelions should be left till later in the year when grass seed can be sown over the bare patches.

G. W. THOMSON PRICE.

Growing Oak Trees in Glasses.

A young oak tree growing in a glass or vase of water is not only ornamental, but interesting. Place an acorn suspended by a thread within ½ in. of the surface of the water. Let it remain undisturbed for a couple of months, save for the filling up of the vessel to replace evaporation, and an occasional complete change of the water by a siphon. The acorn will throw a root down into the water, and upward will shoot a tender stem with glossy leaves. Hyacinth glasses are the best for the purpose.

A little charcoal at the bottom is needed to keep the water pure.

Summer Fragrance.

All through the winter you may have the fragrance of woods and fields about you if you will take the trouble to gather it during the summer months. This will be a delightful task for the children. Send them out with little baskets to pick clover blooms from the roadside and pastures. Dry them on the garret floor, turning them over daily until cured. Rose leaves, especially those of the wild rose that blooms so abundantly in the hedges, and lemon verbena are also excellent, as well as bay leaves, sweet fern, and wild thyme. These, when dried, should be mixed with common salt to keep out worms; add a few pot pourri spices, pack between layers of wool and into pillows.

To remove fly specks from varnished surfaces use equal parts of water and skim milk warmed.

MEXICAN POTTERY.

For many years before the conquest of Mexico by the Spaniards the inhabitants were skilled in a number of arts. If we can believe tradition and other evidence, these arts were the growth of the civilisation of at least two more or less civilised races, and probably a number of whose names perished before Mexican history began.

The Toltecs were great builders, farmers, and workers in gold, silver, and copper. Magnificent ruins of buildings erected by them still remain in Mexico to attest their skill as builders. So great was their superiority in building over the less civilised tribes that surrounded them that the word "Toltec" became, with the half-civilised Aztecs who followed and imitated them, synonymous with the art of building, and the Aztec builders were called "Toltecs," meaning builders.

MEXICAN POTTERY. WATER JUGS.

The art of building was preserved among the Aztecs after the Toltecs had left the country, as was also the working in metals and the making of all kinds of pottery. In this latter art the natives of Mexico excelled from very early times, as they do to-day. But the coming of the Spaniards destroyed many of the ancient arts of the Mexicans, because the civilisation of the former was in advance of that of the Aztecs. The avarice of the Spaniards swept from the country all the gold and silver work they could lay their hands upon, with the result that there remains very little to prove the skill of the Mexicans in the art of metal working. But even now isolated specimens turn up from time to time and find their way into the hands of curio dealers, who dispose of them at fabulous prices.

Pottery making was one of the distinctive arts of the Mexican people. It supplied all the articles of household use for the great majority of the nation. There was scarcely a town in Mexico in Aztec time where the potter did not find his home. Owing to the intelligence of the workmen and superior class of clay and facilities for marketing, certain districts naturally became more noted than others for the qualities of their wares.

Very early the pottery makers became a guild, and generally the son followed the profession of the father. Thus the art steadily improved as the workers became more skilful. As the Aztec nation became stronger, more civilised, and more wealthy, the potters who could conceive and work out the most beautiful and curious designs artistically, received more and more support and encouragement. Thus a few years before the conquest the art was brought to great perfection.

Most of the vessels used by the Aztec priests were of pottery, generally of symbolical design. Each god (and there were hundreds of them in Aztec Mexico) had his own particular symbolical designs; and every house in Aztecland, be it ever so humble, had at least one altar to its patron god. Thus the better class of potters spent much of their time in making vessels, curious and fantastic in form and ornamental in design, for the altars of the many gods and demi-gods of the nation. This influence of the Church told, just as it has told in all civilised countries, at some time in the history of each of them. Thus the curious and fantastic symbols became worked into the artistic designs of the potter. This accounts for the curious shapes that one sees in Mexican pottery to-day. The meaning of all these ancient symbols has been long lost, yet the inherent love of the fantastic engendered by the mysticism of the Aztec Church still remains.

Pottery is made, generally, where the best potter's clay is to be found. As already said, in Aztec and Toltec times pottery was made everywhere in Mexico, but necessarily the pottery of some districts was made very rude and of common make because the clay used was poor. Practically the places which were famous in Aztec times for their pottery are noted for the same thing to-day. This is because they have excellent clay to work with.

Counterfeit Works of Art.

A recent issue of the "Revue International des Falsifications", published in Paris, contains the first of a series of important papers by the editor, Charles Franche, on the manufacture of counterfeit works of art. Many of the general statements made by M. Franche with respect to the extent of this traffic are already familiar to all readers of the daily papers, but he adds to these statements a certain number of specific cases of fraudulent transactions which are of considerable interest to the public, and the Boston "Transcript" translates the interesting portions of his article. M. Franche avers that a number of establishments exist in Paris, where an army of copyists are employed in the manufacture of bogus pictures. He recalls the famous sale of the San Donato collection in 1870, at which, among other counterfeit works catalogued and sold as genuine pictures, three so-called examples of Paul Delaroche were disposed of for not less than £5,000. These three pictures were copies, two of which were

MEXICAN POTTERY. SYMBOLIC DESIGNS.

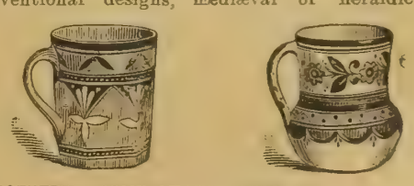
made by Mme. Varcollier, and the third by Bérenger; the copyists having been paid from £20 to £25, for each of the works. The vogue for the works of certain artists has attained such a degree of strength, that even the works of living painters are now counterfeited. Recently, a series of about twenty pictures, all bogus, and signed with the names of three living painters, were seized at the moment that they were being shipped to the United States by a Parisian picture dealer, who is very well known in the trade.

It is a matter of common knowledge that some twenty years ago, while the French school of 1830 was most in favour among buyers, the British markets were flooded with false pictures, bearing the signatures of Corot, Diaz, Daubigny, Dupré, Troyon, Rousseau, etc. M. Franche states that the majority of the dealers in these wares, then had in their employment a group of copyists, some of whom were at work in the forest of Fontainebleau, and others in their studios in Paris, who produced exceedingly plausible pastiches, many of which are to-day in private collections, where they figure as the works of the masters of 1830. One dealer in Paris, had obtained genuine pictures by Corot, Daubigny, Diaz, and Rousseau. He engaged a skilful copyist, who was lodged and cared for comfortably in a snug little country house, on a salary of £40 a month, in return for which he was required to turn out twenty-five copies of each of the originals, with certain slight changes, and this job he accomplished in ten months; the one hundred counterfeits were then exported to America, and sold as originals at high prices. Most of them are now ornamenting the private collections of American collectors, who buy pictures for the names of the men who are supposed to have painted them.

Other dealers have other methods. French portraits of the eighteenth century have been exploited on very much the same scale as the works of the school of 1830, and many of them have been successfully "landed" at fancy prices. Not only copies of old masters, but what are called in trade lingo "repainted restorations," have had a great run among certain classes of collectors. Adroit restorers are employed to make these "repainted restorations." Using ancient studies or sketches of relatively slight value as a base, the counterfeiters of this class of works, by retouching and working over the old canvasses, have manufactured Rembrandts, Ruysdaels, Hobbemas, Raphaels, Bouchers, and Watteaus. These pictures, which require time and a considerable expenditure of capital, cannot be handled by the small fry, but must be dealt in by big dealers.

Pyrography or Burnt Work.

For those who are interested in burnt work the following suggestions will prove useful:—



The tools, whether for wood or leather, consist of needles or points of different shapes and sizes, which are used to burn the lines of the design. These points look somewhat like a lead pencil, but are larger, and in place of the lead there is a hollow point of platinum, which is kept heated by means of a cautery. The points are round, pointed, and curved. The point, inserted in a holder, is connected by a rubber tube with the jar or receptacle in which the gas is generated. By this means the needle is kept at a steady heat, which may be increased by pressure on a bulb connected with the tube. It is used much as one would use a pen, making light or heavy strokes. A little practice will enable one to guide the point and make it respond at will. Of course, the first practice is upon outline work, and shading is taken up as proficiency is gained. Every line should have a meaning. Complete instructions for working are sold with the outfits, so that the work may be undertaken at home successfully, if one cannot have a teacher.

Burnt work is done upon articles from a chamois pen-wiper to chair seats and portières of heavy leather, and from the wooden paper-cutter to book shelves and cabinets.

The possibilities which the burnt work opens up in the way of gifts are unlimited. Especially is it adapted to gifts for men, and that fact alone makes it worthy of consideration.

Pipe racks, tobacco jars, thermometer mounts, whisk broom holders, folding book racks, photograph frames, and screens may be made of burnt wood, and den pillows, magazine covers, pocket cases for stamps, court plaster, photographs or cigars, table covers and bookcase hangings may be made out of burnt leather. A man's belongings should be substantial, and what materials could be more permanent than wood and leather?

The leather for burnt work should be carefully chosen, and skins selected that are soft, pliable, and unwrinkled. Among the favourite studies for pillows are classical heads. Bold conventional designs, mediæval or heraldic

MEXICAN POTTERY. SOME QUAINT MUGS.

motives are also appropriate. Handsome ovals for polished tables are made from leather, with a border of fruit or showy flowers burned and embellished in colours. The colours should be used with discrimination, however, for unless in perfect taste they are likely to destroy the rich character of the work rather than add to it.

———o———

Children should be accustomed as soon as possible to sleep in a dark room. Unless they have learned to be afraid of it, darkness is soothing to the nerves, and the rest is more profound and refreshing than when there is the unconscious stimulation of light.

Origin of Quaint Sayings.

So many quaint sayings in general use have become familiar that it rarely occurs to us to think of or inquire into their origin, how or whence they come into constant, everyday use. Should we do so, the result of our investigations could not fail, in most instances, to be very surprising.

Many of them can be traced back to people who lived hundreds of years ago. The tongues that uttered them have been silent for ages, yet we continue to use the same words and expressions that were a part of those lives so long since passed away!

"Don't count your chickens before they are hatched." This saying is generally supposed to come from the story of the milkmaid who was carrying eggs to market in a basket upon her head, and after thinking what a fine appearance she would make in the beautiful green silk dress purchased with the proceeds of her sale, and the imaginary lovers who should come flocking around her, tossed her head, upset the basket, broke the eggs, and lost all the bright dreams which had so upset her. This seems very probable, but there is a much older version of the same story. It is as follows:—

Sachulé, an East Indian, carried a jar of ghee on his head, a Sepoy following. "Now," said Sachulé, "with the money I get I shall buy a hen, and I shall sell the hen and her eggs, and with the money I get for them I will buy a goat, and then I will sell the goat, her milk and her hide, and buy a cow; I will sell her milk, then I will marry a wife, and some day my children will say to me, 'Father, will you have some rice?' and I shall say 'No,'" and as he said this down came the jar of ghee, spilled.

"Gone to the dogs" has a classic origin. The ace (or the dice) used by the Romans was called canis, a dog. Throwing three aces meant that the game was lost. It is not necessary to suggest an inference.

"There is no royal road to learning." This takes us back more than two thousand years. Euclid, the father of mathematics, taught this subject in the famous school at Alexandria (not the ancient town of Virginia). Being asked one day by the King of Egypt (Ptolemy Soter) whether he could not teach him the science in a shorter way, Euclid answered: "Sire, there is no royal road to learning."

"Axe to grind" comes from "Essays from the Desk of Poor Robert the Scribe," in an article called "Who'll turn the grindstones?" The author was C. Miner; the essays published at Hoylestown, Penn., in 1815.

It introduced a boy who was induced, by a clever fiction, to turn a grindstone for another person, to grind the other person's axe, and is spoken of those who appear to be generous, when only serving their own selfish ends. He says: "When I see a merchant over-polite to a customer, begging him to sample his liquors, and throwing half his goods on the counter, thinks I, that man has an axe to grind."

How many general readers know how the name "Tommy Atkins" came to be applied to a British private soldier? This was originally used in the instructions to non-commissioned officers for purpose of illustration, as "John Thomas" is often used on election forms.

Sample blank returns were shown to the recruiting officers to show how genuine ones should be made out, and "Thomas Atkins, private, Company B," was the fictitious name always used. Model reports were also signed "Thomas Atkins, X his mark."

When a recruit made his first appearance at a garrison he was always called "Thomas Atkins," until his real name was known. Finally "Tommy Atkins" became the sobriquet of the British soldier in every part of the world.

Good Looks.

Nothing ages the appearance of a woman more than lines on the face, and to avert these is the aim of all who desire to look young and retain their good looks. To keep the cheeks round—and the round cheek suggests youth—there is nothing like gentle massage. Place the palms of the hands on the cheeks, and then move the fingers in an outward direction, and then circle them round the cheeks over and over again. Couple the massage with good toilet cream—such as oatmeal cream or lanoline—and the treatment will be of double value. After passing over the cheeks, let the fingers travel up to the eyes, and rub gently beneath them, the tips of the fingers smeared with cream; and the treatment should also be passed up to the brow, where furrows are apt to make deep impressions. The face should afterward be wiped with a soft towel and bathed with warm water.

ROUND-ABOUT NOTES.

There are several dog cemeteries in England, but the largest and most beautiful animal cemetery is La Nécropole Zoölogique, in Paris, or rather in the suburb of Asnières. Here a large plot of ground is laid out for the interment of dogs and other animals, and here are erected monuments in every way as handsome as those over the graves of human beings in other cities of the dead. Some famous dogs have sculptures to mark their memories, and dog kennels in marble are favourite vaults. For about 10s., a grave is leased for three years, and this fee includes the services of a dog undertaker, uniformed and mounted on a tricycle. For £20, a grave may be leased in perpetuity, and between these extremes may be found prices to suit all purposes. The cemetery occupies an entire island in the Seine, and, apart from the rental of graves, the company owning the property makes a handsome profit out of the sale of admission tickets to visitors.

* * *

The pampered pet dog craze seems to be breaking out again pretty badly in Paris, where extravagance in this direction is carried to a pitch all but incredible. In the smart streets like the Rue de la Paix and the Boulevard des Capucines, there are regular "Dog's Toilet Clubs," where not only are pet poodles clipped in so artistic a fashion as to leave crests and coat of arms in the hair on their back, but there are also on sale gold and silver bangles set with precious stones, solid gold collars and leading chains, and chic little fur coats in mink, sable, ermine and seal. In fact, the pet dog of fashion is completely fitted out in these establishments, even to his visiting cards, pocket handkerchiefs and the ridiculous little umbrellas and sunshades, which are fastened around the body by a strap.

* * *

Pity the city child! A London doctor has recently declared that life in a big city makes young children quick, but not intelligent. He thinks it often destroys their chances of being clever, for it hastens the development of the brain unnaturally. It makes them superficial, alert, but not observant; excitable, but without one spark of enthusiasm. They are apt to grow blasé, fickle, discontented; they see more things than the country-bred child, but not such interesting things; they do not properly see anything, for they have neither the time nor the capacity to get at the root of all the bewildering objects that crowd themselves into their little lives.

* * *

Six ladies recently presented themselves as candidates for the difficult examination of house surgeon at one of the Paris hospitals. There were about 600 male candidates and 540 failed; but out of the six girls, two came brilliantly through the ordeal. Their names are Mlle. Jeanne Debat-Ponsan and Mlle. Landry. Mlle. Debat-Ponsan is the daughter of the celebrated painter, a well-known figure in society and a habitue of the opera, whose famous portrait of General Boulanger on his black horse will be remembered. Mlle. Landry is the daughter of a prominent barrister. These two young ladies, who had danced at the official receptions, and were known as charming and fascinating girls, have withdrawn from social pleasures, and are devoting themselves to hard study. They will be for four years house surgeons, and will then start as specialists. Mlle. Debat-Ponsan will devote herself to children's illnesses and gynæcology; Mlle. Landry to nervous diseases.

* * *

Every one knows that the heat of the sun will expand iron and steel. Stevenson's tubular bridge over the Menai Straits is 400 ft. long. The heaviest train passing over it bends it just half-an-inch, yet on a July day, after the sun has been shining on it for several hours, it is found to be bent an inch and a-half below its usual horizontal line. The heat of the sun acts on stone as well as metal, a fact which is proved by the Washington monument. It is 555 ft. high, but it will be found to be about two inches higher in the evening than in the morning of a sunny day. A strange effect of sunshine was noted at Plymouth, where to lay the foundations of a sea wall the workmen had to descend in a diving bell. These bells had stupidly been fitted with convex circular glasses at the top. The sea was very calm and the glasses so concentrated the rays of the sun that the clothes of one of the workmen were set on fire, and that at no less than 25 ft. below the surface of the water.

LATEST MARKETS.

THE CORN TRADE.

MARK LANE, Friday.

English wheat was scarce and dear; 36s. was obtained without difficulty for anything of good condition and weight. Foreign wheat was not pressed on sale, but the trade was inert. Maize was decidedly difficult to sell; buyers are temporarily surfeited. Barley and rye were extraordinarily scarce, so that such few buyers as there were had to pay special terms. Oats were dear for 320 lb. and 336 lb. sorts, but 304 lb oats tended to favour the purchaser. Turkish were offered at 17s. 6d. and Roumanian at 17s. 9d. per qr. Peas were steady for English.

Foreign were offered at 40s. for finest New Zealand, 56s. for Dutch Crowns, and 74s. for Dutch Imperials. Infolium seed of the new crop was offered at 23s. for English, and 20s. for French, in either case, per cwt. But there is as yet no quantity deliverable behind the samples, and buyers showed no dispsition to do business until after the holidays. Mustard seed at 96s. per cwt. had a small but still appreciable sale. Haricot beans made 60s. for fine hand picked Hungarian.

THE FLOUR TRADE.

MARK LANE, Friday.

London makes were 3d. cheaper from Monday, and the price of the popular American grade or type, Iron Duke, was also reduced 3d. on the week. On the other hand Hungarian, through extreme scarcity, was held for 1s. advance. Belgian was fully as dear as formerly. Some Italian middlings were on offer at 130s. per ton, and some Argentine at 117s. 6d. per ton. The importation of offals is never a good sign.

Oatmeal made £14 per ton for Grampian and £12 10s. for Canadian, while oat flour fetched £16 12s. 6d. per ton for best Aberdeen, and brose meal realised 29s. 6d. per sack.

Rye flour was in small request at 29s. per sack for top grade, and 26s. for sound Russian.

America offers to ship Kansas flour from the new crop wheat at 26s. cost freight and insurance.

CLOSE OF THE MARKET.

THE MARKET CLOSED FIRMLY FOR ENGLISH WHEAT, FOR FOREIGN RED WHEAT, FOR BARLEY, FOR HEAVY OATS, AND FOR RYE, BUT RATHER IN BUYERS FAVOUR FOR FOREIGN WHITE WHEAT FOR LIGHT OATS, AND FOR MAIZE.

THE BALTIC.

Friday afternoon.

State of Trade.

Wheat cargoes are quietly held. American new crop is hardly offered. Maize cargoes are rather against holders Oats are neglected, and a few sellers are taking prices which argue downright depression in futures. These sellers, however, are confined to holders of, and operators, in 304 lb. sorts. Barley futures are a little firmer since the close of July.

Business Done.

Wheat.—Australian, 34s per 480 lb, arrived; Blue Stem, 35s 9d per 500 lb, October shipment; Argentine, 34s 9d per 480 lb, arrived; Roumanian, 34s 6d per 492 lb, September shipment; No. 1 Northern Manitoba, 35s per 480 lb, arrived; No. 1 Northern Manitoba, 34s 6d per 480 lb, on passage; White Karachi, 35s per 492 lb, on passage; Red Karachi, 34s 3d per 492 lb, August shipment.

Barley.—Russian, 19s 9d per 400 lb, October shipment; Azoff, 23s per 400 lb, on passage.

Oats.—Russian, 14s 9d per 304 lb, October shipment; Argentine, 16s 9d per 304 lb, August shipment; Argentine, 23s 3d per 480 lb, August shipment.

Maize.—Roumanian, 23s per 480 lb, August shipment; American, 22s 9d per 480 lb, August shipment.

Beans.—New Zealand, 30s. per 480 lb, August shipment.

Peas.—Canadian, 34s. per 504 lb., August shipment

Millet.—Indian, 15s. per 112 lb., August shipment.

Hempseed.—Russian, 32s. 6d. per 336 lb., August shipment.

Sorghum.—Argentine, 19s. per 416 lb., August shipment.

Haricots.—Rangoon, 32s. per 504 lb., August shipment.

Dari.—Indian, 22s. per 480 lb., August shipment.

TERM MARKET.

The speculation in maize is at a singularly low ebb. The price, 4s. 11d. per cental, is not a depressed one, but nobody cares to operate freely in the face of 1,000,000 qr. on passage. Wheat is in an interesting position, there being already buyers as far ahead as March next, a certain number of persons wishing to make their position secure over the whole winter. Latest prices paid for wheat, future delivery, are:—

Winter Wheat.

Red, American, 7s. 3d., per cental, Sept. delivery.
,, ,, 7s. 4d. ,, Nov. ,,
,, ,, 7s. 5d. ,, Jan. ,,
,, ,, 7s. 4d. ,, March ,,

Midwinter is therefore expected (and not unnaturally) to be the scarcest period.

OIL SEEDS.

Mark Lane, August 2.—The price of cotton-seed is a little lower from Monday. There are no other changes.

POTATOES.

Borough, Thursday.—Poor demand; good arrivals. Early Puritans, 60s to 70s; Early Rose, 60s to 70s; Duke of York, 60s to 70s; British Queens, 60s to 70s; Blacklands, 50s to 60s per ton.

Goole, Wednesday.—No local potatoes have been offered. Epicures were on sale at 6s to 7s per load.

Stockton, Wednesday.—Lincolnshires potatoes £5 per ton in barrels and £4 15s in bags; Dutch rounds, 4s 6d per cwt.

Worksop, Wednesday.—New potatoes, 9s to 10s per load of 18 stones.

CHEESE.

Glasgow, Wednesday.—Large arrivals, but condition only moderately good. Stocks are now somewhat heavy. Top qualities maintain their price, but others slow. Dunlops, 54s to 60s; Cheddars, 58s to 62s per cwt.

Highbridge, Tuesday.—A good attendance and clearance. Prime Caerphilly, 49s; seconds, 42s to 47s 6d; other offers taken from 35s to 40s. Prime Cheddar, 60s; seconds, 55s to 58s; lowest, 53s to 54s. Truckles in large supply—Primes to 58s 6d; seconds, 44s 6d to 56s 6d; doubles, 45s to 54s 6d.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

We note this week, so far as the British supply of beasts are concerned, a decrease in the number on offer, due to smaller arrivals from the Midland counties and Ireland. Trade ruled of a slow nature owing to retail butchers' requirements being somewhat limited on account of so many families being out of town; nevertheless, prices were well maintained. The Irish arrivals consisted entirely of Waterfords, for which a slow trade was experienced at late values. A few Devons were included in the supply, and commanded our top quotation. Fat butchering cows and bulls were in excess of the demand, consequently sellers had to concede 2d. per 8 lb. to effect sales. On Thursday all sales were governed by Monday's prices.

At the Foreign Cattle Market, Deptford, trade ruled of a very slow nature, prices showing a downward tendency in value as the week advanced. The total number on offer at both markets up to the time of our going to press was 2,592, consisting of 720 British and 1,872 foreign, these latter comprising 1,584 from the United States and 288 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal):—80 to 90 stone Devons, 4s. 10d. to 5s.; 95 stone Herefords, 4s. 8d. to 4s. 10d.; 95 stone Runts, 4s. 6d. to 4s. 8d.; 100 stone Shorthorns, 4s. 2d. to 4s. 4d.; 95 stone Irish, 4s. 2d. to 4s. 4d.; 90 stone States, 4s. 2d. to 4s. 4d.; 95 stone Canadians, 3s. 10d. to 4s. 1d.; 90 stone fat cows, 3s. 6d. to 3s. 8d.

The sheep trade was entirely confined to the Islington market and opened on Monday with more life, all grades of English wether sheep being quoted 2d. per 8 lb. higher, the Scotch consignments numbered precisely the same as on the Monday of the previous week, whilst the Irish numbers were slightly smaller; both descriptions were steady in regard to value ewes met with less inquiry, no decline in value is, however, quotable. Lambs met with a slow, but steady demand at late currencies. On Thursday late rates governed all transactions for both wether and ewes whilst lambs on the other hand ruled 2d. per 8 lb. lower. The total number penned was 6,860, as against 8,450 during the preceding week. Best pens made per 8 lb. as follows (sinking the offal):—7½ to 8 stone Downs, 6s. to 6s. 2d.; 8 stone Scotch, 6s. 2d to 6s. 4d; 9 stone Downs, 5s. 10d. to 6s.; 10 stone Irish, 5s. 6d. to 5s. 8d; 10 stone Downs, 5s. 8d. to 5s. 10d; 10 stone Halfbreds, 5s. 6d. to 5s. 8d.; 10 stone Down ewes, 4s. to 4s. 2d.; 12 stone Lincoln Half-breds, 5s. 6d. to 5s. 8d.; 5 stone fat Grass lambs, 6s. 10d. to 7s.; 6 stone Half-bred ditto, 6s. 6d. to 6s. 8d.

Calves numbered 70 and met with a very slow trade, the best on offer making from 4s. 10d. to 5s. per 8lb.

LONDON.

Central Market, Thursday.—Fair supplies; trade continues very slow; beef not so firm, probably finish lower. English beef, 3s 8d to 3s 10d; Scotch sides, 4s to 4s 2d; shorts, 4s 4d to 4s 8d; Deptford and Liverpool killed, 3s 6d to 3s 10d; refrigerated hindquarters, best, 3s 8d to 3s 10d; ditto seconds, 3s 5d to 3s 6d; ditto forequarters, 2s 4d to 2s 7d; inferior beef, 2s 4d to 2s 6d; mutton, Scotch wethers, 5s to 5s 5d; ditto tegs, 5s 4d; ditto ewes, 3s 4d to 3s 8d; English wethers, 4s 9d to 5s; ditto ewes, 3s 4d to 3s 6d; Dutch sheep, 4s 8d to 5s; English lamb, 5s to 5s 8d; veal, 3s 4d to 4s 8d; English pork, 3s 6d to 4s; Dutch pork, 3s 6d to 3s 10d per 8 lb.

Islington, Thursday.—To day's supply compared with Thursday last showed an increase of ten head, and consisted almost entirely of fat butchering cows and bulls. Trade ruled of a slow but steady nature at late values. Top prices paid per 8 lb:—Fat cows, 3s 6d to 3s 8d; fat bulls, 2s 9d to 3s 3d. An increase of 160 in the number of sheep and lambs penned compared with Thursday last. For both wethers and ewes a slow but firm trade was experienced at Monday's values. Lambs were in excess of the demand, sellers being obliged to accept a reduction of 2d to effect sales. Best pens made per 8 lb as follows (sinking the offal):—7½ to 8 stone Downs, 6s to 6s 2d; 9 stone Downs, 5s 10d to 6s; 10 stone ditto, 5s 8d to 5s 10d; 10 stone halfbreds, 5s 6d to 5s 8d; 10 stone Down ewes, 4s to 4s 2d; 5 stone fat grass lambs, 6s 10d to 7s; 6 stone halfbred ditto, 6s 6d to 6s 8d. Calf trade ruled slow. Quotations per 8lb:—Sheep, 4s 6d to 6s 2d; calves, 3s 10d to 5s; lambs, 5s 6d to 6s 10d.

COUNTRY.

Birmingham, Thursday.—Small supply of beasts, sheep, and pigs; fair trade for pigs; slow trade for beasts and sheep. Quotations:—Beef, 5d to 6½d per lb; Herefords, 6¾d per lb; mutton, 6½d to 8½d per lb; lamb, 9d per lb; bacon pigs, 10s to 10s 3d per score; cutting pigs, 10s to 10s 3d per score; sows, 8s per score.

Bristol, Thursday.—Beef was plentiful and trade active, a moderate amount of business being done, and best animals realising 62s per cwt, compared with 60s to 62s last week. There was also a large quantity of mutton and lamb, which were in average demand at last week's prices. Pigs were scarce, but not in much request, and values of porkers fell from 10s 6d to 10s 3d per score.

Calne, Friday.—Present prices of pigs:—In lots of not less than ten, on rail within 100 miles, 1s. per pig extra for delivery by road. Prime stores, 6 sc. 10 lb to 8 sc. 10 lbs, 9s 6d per score, 8 sc. 11 lb to 9 sc 10 lb,, 9s per score; 9 sc. 11 lb to 10 sc. 10 lb, 8s 6d. Pigs outside these limits at their value.—C. and T. Harris and Co., Ltd.

Chester, Thursday.—The supply of cattle was smaller, but there were more sheep on offer. Trade was quiet owing to a smaller attendance of buyers, but prices were unchanged on the week. The inquiry for sheep was limited. Quotations:—Milch cows, £16 to £21; calvers, £16 to £19; heifers, £9 to £14; stirks, £6 to £10; sheep, 18s. to 35s each.

Dublin, Thursday.—Slightly weaker trade for cattle, probably due to increased number at market, and prices rather in favour of buyers. Firmer trade for best qualities of sheep and lambs at last week's full rates; other sorts easier sold. Cattle—Live weight (best), 31s to 33s per cwt; Augus crosses up to 35s per cwt; secondary and inferior sorts, 28s to 30s 6d per cwt. Mutton, dead weight, 6½d to 7½d per lb; choice light weights touching 8d per lb.—Ganly, Sons and Co.

Preston, Wednesday.—Good local cattle were very scarce among a fair supply in all departments. Trade was dragging at the following quotations:—Choice home-fed heifers made quite 7d; choice Irish, 6¾d; young cows and bulls, 5d to 5½d; choice lambs, 9¾d; rough and heavy lambs, 9d; hoggs, 8½d; best ewes, 7½d; heavy ewes and tups, 6d to 6½d; and calves, 7½d per lb.

Stockton, Wednesday.—An average show of the best cattle, which made 8s to 8s 6d per stone, rougher kinds making 6s 6d to 7s. Sheep met a slow trade, lambs making 10d per lb, young sheep 9d, ewes 7½ and 7½d, and tups 6d per lb. Pigs were in less demand, and sold at quite 6d per stone decrease upon the previous week's prices.

Thame, Tuesday.—There was again a full attendance of buyers and a good entry of stock, although sheep were considerably scarcer than the previous week. The quality of the beef was not quite up to the high standard of recent markets, but there was a selling trade throughout, practically every lot changing hands at prices satisfactory to the grazier. Sheep, no doubt, on account of the small supply met a firm trade. Veal lower. Bacon and pork in great demand. Messrs. Bond and Burrows' sale comprised 97 fat beasts, 237 fat sheep, 50 fat and weaning calves, and 48 fat and store pigs. Fat oxen made from £16 to £22 2s 6d; fat heifers, £14 to £22; fat ewes, 48s to 58s 6d; fat wethers, 50s to 61s; fat lambs, 31s to 47s 6d; fat calves, £3 to £4 10s; weaning cow calves, 22s to 50s; bull calves, 10s to 38s; bacon hogs, £3 5s to £4 10s; porkers, 30s to 48s; store pigs, 12s to 28s.

Truro, Wednesday.—Fat bullocks, 54s to 56s per cwt; barreners and store bullocks, 40s to 45s; cows and calves, £10 to £14 each; rearing calves, 15s to 30s; wethers, 7½d to 8d per lb; ewes, 5½d to 6d; lambs, 7½d to 8d; large and small pigs and suckers, 10s to 60s each.

Wolverhampton, Wednesday.—Moderate supply and trade except for calves. Beef, 5½d to 7d per lb; mutton, 6½d to 9d per lb; lamb, 8½d to 9½d per lb; veal, 6d to 7½d per lb.

Worksop, Wednesday.—Moderate show of stock. Sheep were in larger supply than for several weeks past. Best beef, 8s to 8s 6d; secondary qualities, 7s 3d to 8s; Southdown wethers and crossbreds, 8d to 8½d; ewes, 6d to 7d; lamb, to 9½d; veal, to 8½d per lb.

York, Thursday.—More than an average show of Irish store cattle, and a small show of English. A fair sprinkling of customers. The best animals changed hands, but a slow trade on the whole, with late rates fully maintained, but no appreciable advance. Best three-year-olds made up to £15 15s; and two-year-olds, £10 to £11 10s. No demand for stirks. A small show of calving and milch cows, but a very bad trade, trade never being worse at this time of the year, hardly any buyers being present, and more than half the cows remained unsold. The best made up to £20, the general run of prices being from £14 to £17. A very small show of all classes of sheep. Best twice-crossed shearlings made up to 48s, others 38s to 44s. About 500 twice-crossed lambs met with a good trade from 26s to 32s each.

FARMS, BUSINESSES, &c., TO LET.

FARMS TO LET of various size in Kent, Sussex, Surrey, &c.—LANGRIDGE & FREEMAN, Agricultural Valuers and Auctioneers, Tunbridge Wells, Kent, and 28, Queen Street, London, E.C.

BAXTER, PAYNE & LEPPER, LAND & ESTATE AGENTS, AGRICULTURAL VALUERS, SURVEYORS, & AUCTIONEERS. Special Agents for DAIRY, FRUIT, STOCK AND MARKET GARDEN FARMS. Particulars on application.

All applicants stating details of requirements will have a selected list of Farms answering thereto forwarded free of charge.

MESSRS. BAXTER, PAYNE & LEPPER'S AGENCY has proved a valuable medium for Owners and others to secure substantial Tenants for FARMS, ESTATES & COUNTRY PROPERTIES.

Landed Estates managed and owners advised upon the best method of dealing with Farms to meet the circumstances of present times, and so protect interest and income.

Offices: 69, King William Street, London, E.C., and Market Square, Bromley, Kent.

Agents, Situations Wanted.

WANTED, AGENTS for the SALE of NATURAL Ammoniacal and Phosphatic GUANOS and high-class Chemical Manures. All analyses and dry condition guaranteed.—Apply to DANIEL DE PASS & CO., 1, Fenchurch Buildings, Fenchurch Street, London, E.C.

TO Auctioneers and Estate Agents.—A Young Gentleman, educated at the Bedford County School, and possessing a good knowledge of shorthand and typewriting, is seeking a situation in the offices of a firm either in London or country. Small commencing salary.—Address "J. T. H.," care of this office.

SMART MEN, good connection amongst farmers, to represent manufacturers of Basic Slag. Good terms offered to suitable men.—Write, with particulars and references, to Box A.P.C., office of Mark Lane Express, 3, Wellington Street, Strand, London.

SITUATION Wanted as FARM MANAGER or STEWARD, thorough knowledge of Hops, Fruit, Management of Stock and Farming generally; references, apply Alfred Barrow, Norwood Hall, Southall.

Printed and Published by the Proprietors, at the Office, 3, Wellington Street, Strand, London, W.C.—August 5, 1907

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

That the wheat crop will be rather better than was supposed a month ago is the dominant expectation to-day, as reports from the eastern and north-eastern counties show a general improvement since St. Swithin's, and the Scotch wheat crop will apparently be a full average. Barley is the crop of least promise, while oats are often very heavy yields, or should be so from their aspect. Seven-feet straw is a rarity in any season, but it is less of a rarity this year than for many years past. At the same time the irregularity of all the crops is a feature of 1907; thus trained observers are of opinion that in the West Riding of Yorkshire oats are over 10 per cent. superior to their aspect in the north of this great county. Barley, too, which looks fairly well in Lincoln, is of most unsatisfactory aspect in the Huntingdon fens, and wheat, which is much below the average in Berkshire, improves decidedly in aspect we travel south into Hampshire. The wheat promise is not at all regular, even in the little group of home counties with their close correspondence of situation and climate. Kent is decidedly more fortunate this year than Surrey and Sussex. There are wheat fields in West Middlesex which should yield fully five quarters to the acre.

The first fields of spring oats have been cut in South Hampshire, and, of course, both winter oats and rye are now falling before the machine. Wheat harvest commences to-day pretty generally in counties south of the Thames and east of Stonehenge. The south-west is as backward, however, as the east this year, and the harvest in these two regions will, as a rule, begin on the 19th for wheat, and on the 26th for barley. The hay crop all over England is now reckoned over an average; 30 cwt. to the acre is the calculation of many farmers. Beans are an average crop. Peas, as far as we have ourselves seen, decidedly above an average though "the leading journal" puts them at only 941 points of a total 1,000 constituting a full crop.

The French wheat crop was the subject on the 6th inst. of a report which was much more favourable than anything previously published. We fancy for ourselves that the 41,000,000 qr. estimate, which appears in Beerbohm's list for the 9th inst., is ample to allow, for the season has not been at all propitious, and the frequent thunderstorms of July were not attended by the forcing heat which often accompanies electrical weather. The great bulk of the straw impresses the crop estimators, and the Government may have its reasons, with the peasantry so dissatisfied, especially in the south, for representing the crops as much better than had been supposed. The deficiency in the German wheat harvest is admitted on all hands, and rye is also under an average crop.

The Russian authorities are taking, like the French, a more hopeful view of the wheat yield and the preliminary estimate of the two crops, winter and spring wheat, for all Russia is as follows:—

1907	70,000,000 qrs.
1906	63,000,000 ,,
1905	79,000,000 ,,
1904	82,000,000 ,,

The average production in Russia being estimated at 74,000,000 qr., the yield of 1907 is not at all gravely deficient; may say 5 per cent. The Russian figures, however, are worked out by the Statistical Bureau on the basis of the acreage of the previous crop, and the news from all the great shipping firms is that the area is not at all as large this year as last, The enormous area under cultivation, nearly fifty million acres, amply accounts for the delay in getting in returns of each season's area. The very unsettled state of the rural districts and the frequent "removal" of officials increases the difficulties of the task.

Owing to the holiday break and the absence of new grain supplies the markets from the 3rd to 10th inst. were singularly featureless. The tone of trade for maize is a little more buoyant from the beginning of August, while foreign oats and barley favour buyers. In wheat no change can be discerned, and flour is equally immobile.

Supplies of English wheat since September 1 have been moderate, but the price shows a small net decline upon the year.

This season ..... 2,644,000 qr. at 27s. 6d. per qr.
Last ,, ... 2,899,000 ,, 28s. 9d. ,,

The barley supplies have been liberal, so that a price 2d. up on the year is so far a matter for congratulation.

This season ... 3,369,000 qr. at 24s. 5d. per qr.
Last ,, ... 3,201,000 qr. at 24s. 3d. ,,

The supplies of oats have been large; the price has given way 4d. under the strain, but has not been below remuneration level.

This season ... 1,174,000 qr., at 18s. 4d. per qr.
Last ,, ... 910,000 qr., at 18s. 8d. ,,

The supplies of English rye are not officially published, but have been fair. Prices which are as low as 24s. from September to January, rose to 28s. in July, and are now at a full 30s. level.

The wheat gradients are not steep at the present time, as in all parts of the country a fair price is obtainable, while in no district is it apparently possible to make a further advance on the terms with which August opened:—

Chelmsford	34s. 2d. per qr.
Salisbury	30s. 6d. ,,
Range ...	3s. 8d. ,,

The vast majority of markets range between 32s. and 33s., including Norwich, 32s. 8d.; Peterborough, 32s. 2d.; Lincoln, 32s. 10d.; and Doncaster, 32s. 7d.

Barley averages are now few, for the great bulk of the markets are without samples.

Mark Lane.....	28s. 3d. per qr.
Reading	25s. 11d. ,,
Range	2s. 4d. per qr.

Oats range from 20s. 6d. accepted at Lincoln to 22s. 6d. averaged at Peterborough.

The imports of the United Kingdom last week were:—

Wheat, 441,000 qr.: a full supply.
Flour, 79,000 sacks: a small supply.
Maize, 287,000 qr.: above the average.
Barley, 47,000 qr.: very reduced arrivals.
Oats, 87,000 qr.: below the average.

Since harvest the imports have been:—

Wheat, 20,170,000 qr.: a fair average.
Flour, 5,061,750 sacks: below the mean.
Maize, 10,733,000 qr.: a good supply.
Barley, 5,141,000 qr.: mediocre arrivals.
Oats, 4,587,000 qr.: less than usual.

The supply of wheat on passage is now very close to the average of 2,500,000 qr.

Californian.....	230,000 qr.
American	310,000 ,,
Russian	145,000 ,,
Indian.....	730,000 ,,
Argentine	280,000 ,,
Australasian	520,000 ,,
Various	40,000 ,,
Total	2,255,000 qr.

Of flour only 168,000 sacks are now on passage; of barley 155,000 qr.; and of oats 79,000 qr. are afloat, both these totals being very much less than usual.

Of maize, expectations are as follows:—

American	[illegible] qr.
Argentine	300,000 ,,
Russian	100,000 ,,
Roumanian.....	310,000 ,,
Turkish, &c.	120,000 ,,
Total.....	1,030,000 qr.

This is 280,000 qr. above the average.

Of oilseeds, the expectations on 10th inst. were:—Linseed, 248,000 qr.; cottonseed, 40,000 tons; rapeseed, 280,000 qr.; and Poppyseed, 6,000 qr.

Shipments for the first week of August were:—From America, 200,000 qr. of wheat, 15,000 qr. of barley, 14,000 qr. of oats, 171,000 qr. of maize and 90,000 sacks of flour; from La Plata, 96,000 qr. of wheat, 100,000 qr. of maize, and 15,000 qr. of linseed, but no oats; from Russia, 172,000 qr. of wheat, 151,000 qr. of barley, 80,000 qr. of oats, and 113,000 qr. of maize; from Roumania and Bulgaria, 110,000 qr. of wheat, 10,000 qr. of barley, 3,000 qr. of oats, and 236,000 qr. of maize; from India, 203,000 qr. of wheat, 71,000 qr. of linseed, and 60,000 qr. of rapeseed; from Australasia, 21,000 qr. of wheat; from Egypt, 10,000 tons of cotton seed; and from Tunis, 15,000 qr. of barley.

LONDON HAY TRADE.

Saturday.—The trade has been of a holiday character during the past week, and with larger supplies (made up mostly of middling and inferior quality of old stuff, and also a large proportion of new crop) the market presents a much quieter appearance. The arrival of prime old stuff, however, continues on a very small scale, and with good demand for this class prices have ruled very firm at unchanged rates, but for the larger quantity of middling and inferior quality now coming to hand the inquiry has been of a very poor description, and to effect clearances lower values have been accepted.

For new crop, if of prime quality and in good, sound condition, the following prices are about obtainable:—Clovers, 77s 6d to 80s per ton; mixtures, 75s per ton; and hays, 65s to 70s per ton; but with the bigger arrivals the demand has ruled quieter, and it is only with difficulty these values have been upheld. Straw is coming along in fair supply, and finds a good sale at about last week's rates. In the foreign market, although shipments have been short, the demand has been very poor, values showing a lower tendency.

Prices ruling are about as follow:—English best old meadow hay, 85s to 90s per ton; good meadow hay, 75s to 82s 6d per ton; plain hays, 70s per ton; best clovers, 95s to 100s per ton; good clovers, 85s to 90s per ton; inferior clovers, 80s to 82s 6d per ton; best mixtures, 95s to 97s 6d per ton; good mixtures, 87s 6d to 92s 6d per ton; plain mixtures, 77s 6d to 85s per ton; seconds hays, clovers, and mixtures, 60s to 65s per ton (these quotations are for 1906 crop); wheat straw, 26s to 28s per load; oat straw, 26s to 28s per load; barley straw, 26s to 28s per load. All ex rail London. Foreign: Canadian mixture, none; first quality Dutch hay, 65s to 67s 6d per ton; second quality Dutch hay, 62s 6d per ton; good French hay, 62s 6d to 65s per ton; New French clover, 72s 6d to 75s per ton. These prices are by the barge load delivered alongside a London Thames wharf.

THE BALTIC.

Wheat cargoes from the 3rd to the 10th inst. showed no appreciable change either on passage and for shipment. Transactions have included Rosario at 34s. 6d. per 480 lb., Blue Stem at 35s. 9d per 500 lb., S.W. Russian at 35s. 3d. per 492 lb., White Karachi at 35s. per 492 lb., No. 1 Hard Manitoba at 36s. per 480 lb., and No. 2 at 34s. 3d. per 480 lb.

Maize cargoes are well held despite the heavy supply on passage. The sales have embraced Galatz at 24s. 3d. per 480 lb., La Plata at 23s. 6d. per 480 lb., and American at 23s. 3d. per 480 lb.

Barley favours buyers for autumn shipment, Russia offering to ship her new crop in September at 20s. 3d. per 400 lb.

Oats have made 19s. 9d. per 320 lb. for Manitoba, 17s. per 304 lb. for black Libau, 17s. 3d. per 304 lb. for Vologda, and 16s. 9d. per 304 lb. for Turkish. These figures do not argue a stagnant market, but the prices are more favourable to buyers than were those of later July.

The secretary of the London Corn Trade Association announces that the following standards (May shipments) were made up on the 9th inst.:—Wheat.—Choice White Karachi, old crop, ditto new crop, Soft Red Krachi, old crop, ditto new crop, Choice White Bombay, new crop. Bombay lentils. Kurrachee barley. Kurrachee Dari. Calcutta white peas. A standard of Atbara wheat from Calcutta will be made up next month of May-June shipments. Atbara is a central Indian and North-West Province mixture of sound medium hard wheat.

The London Corn Trade Association C. F. and I. quotations, for the settlement of Rejections and Difference in Weights on Wheat under Rule No. 4 of the Association East Indian Wheat Contracts were settled on the 9th inst. as follows:—

Crop 1906.—Choice White Karachi 35s. 6d., soft Red Karachi 34s 9d.—New clean terms but 4 per cent. barley.

Choice white Karachi, 35s. 3d.; soft red Karachi, 34s. 6d., old terms, August 9.

The committee has decided to quote rejection prices for old terms, up to and including July shipments, but not later.

These terms remain in force until fresh ones are published by the Association Committee.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat:—English firm, unchanged. Supplies very small. Foreign steadily held at late rates, but demand limited, 36s 9d asked No. 1 Northern Manitoba, ex ship, 37s 6d landed; 36 ex ship No. 2 Northern Manitoba; South Russian, landed, 34s to 37s; La Plata, 35s 6d to 36s 6d. Flour quiet, unchanged. Iron Dukes quoted at 22s to 22s 6d; Minnesota patents at 27s to 28s. Maize firmly held at full rates to 3d advance, but not active. La Plata and Odessa, landed, quoted at 23s 6d; mixed American, ex ship, at 23s 9d; Odessa, ex ship, at 23s. Barley firm, and spot parcels very scarce. New Azoff-Black Sea, ex ship, to arrive, quoted at 22s. Oats steady, quiet. La Platas held at 17s 9d; South Russian (38 lb), 17s to 18s, as per sample.

Mark Lane, Friday.—Wheat: English firm, quiet. Whites quoted at 35s to 37s; reds at 34s 6d to 36s 6d. Foreign steadily held at late rates, but inactive. No. 1 Northern, ex ship, quoted at 36s 9d, landed at 37s; No. 2 Northern, ex ship, at 36s; choice white Karachi at 35s; red Karachi at 36s. Flour slow, unchanged. Iron Dukes quoted at 22s to 22s 6d; Minnesota patents at 27s to 28s; Hungarians at 35s 6d to 36s. Maize steady, quiet. Mixed American, landed, quoted at 24s 3d; River Plate at 23s 6d; Odessa, ex ship, at 23s, landed, 23s 6d to 23s 9d. Barley steady, quiet; Azoff-Black Sea, new crop, ex ship, to arrive, quoted at 22s. Oats slow, nominally unchanged. La Plata held at 17s 6d to 17s 9d; South Russian (38 lb), 17s to 18s as per sample.

COUNTRY.

Ashford, Tuesday.—The market presented a holiday appearance, very few buyers or sellers being present. Last week's prices were maintained, and a little more money would have been given for English wheat. Quotations:—Wheat, 34s to 37s; English barley, 28s to 29s; foreign grinding barley, 26s to 27s; tick beans, 33s to 34s; maize, 25s to 26s; white oats, 22s to 25s; black oats, 21s to 24s; mazagan beans, 30s to 31s.

Banbury, Thursday.—Wheat, red, 34s to 35s 6d per qr; barley, 30s to 32s per qr; beans, 32s to 33s 6d per qr; oats, 20s to 25s per qr.

Berwick, Saturday.—The market was thinly attended, with only a few samples of oats on offer, which sold at late rates.

Birmingham, Thursday.—The market was much of a holiday character, the attendance being small and orders very limited. Foreign wheats were generally 3d lower, the demand being slow. Only a small quantity of English wheats on market, for which dealers require fully late rates. Bessarabian maize was 3d dearer, Galatz-Foxanian being 3d cheaper. Grinding barley was unchanged at 25s 6d per 400lb at Sharpness. English oats and beans were unaltered in value.

Bury St. Edmunds, Wednesday.—Market thinly attended. Wheat in scanty supply, holders demanding 36s per qr., and making 34s 6d to 35s 6d. Oats firm at 22s to 24s per qr. Grinding barley 28s. to 30s per qr. Beans firm at 33s to 34s per qr. Maize firm at 24s 6d, old 25s per qr delivered.

Cambridge, Saturday.—The wheat trade remains steady. At Cambridge on Saturday wheat was in small supply. Sellers held for more money, buyers scarce; 35s per 504 lb on rail was offered. Beans in fair supply, making 32s to 23s 6d per 38 stones. Trade firm.

Canterbury, Saturday.—Owing to the late season no new wheats are expected at market this month; no new peas have yet arrived, but some new winter barley was offered to-day, 27s per qr being asked. Old corn continues to sell well; English wheat ranging up to 39s; barley to 29s; and oats up to 25s 6d. Grey peas are now making from 31s to 33s; tick beans, 32s; and Mazagans, 30s to 32s per qr.

Carlisle, Saturday.—Very small supply of oats again in our market. Good demand at last week's prices, 24s 9d per 336 lb.—THOMAS ROBINSON.

Chester, Saturday.—Small supplies of English grain at full prices. Offals scarce and again dearer. Mixed American maize firm at late rates. Round corn in fair demand at prices ruling last market day. Quotations: Barley, grinding, new 38 9d to 4s per 60 lb; beans, new, 5s 6d to 5s 9d; old, 6s to 6s 6d per 80 lb; oats, new, 2s 11d to 3s 2d; old, 3s 2d to 3s 6d per 16 lb; Indian corn, new, 13s to 13s 3d; old, 13s 6d to 13s 9d per 240 lb; round corn, old, 12s 9d to 14s per 240 lb.

Chichester, Wednesday.—Fair attendance. Trade slow. New white wheat, 35s to 35s 6d; new red ditto, 35s to 35 6d; grinding barley, 25s 9d; oats, English, 18s to 23s; beans, 32s to 33s; maize, 24s to 25s; flour, 24s to 28s.

Colchester, Saturday.—Wheat fair trade at last week's price. Few samples winter oats, indifferent condition.—COLIN TAYLOR, KING AND CO., LTD.

Coventry, Friday.—Farmers were still busy in the hay field, and only a few attended. Wheats a good trade at last week's rates. Barley and beans changed hands at advanced prices. Quotations: Wheat, 12s to 12s 9d per 186 lb; barley, 30s to 34s per 448 lb; peas, 12s to 14s; beans, 13s to 13s 9d per 196 lb; oats, 24s to 26s per 352 lb.

Derby, Friday.—There was a small supply of wheat, for which prices were unchanged. No alteration in the value of spring corn. White wheat, 37s to 38s; grinding barley, 23s to 25s; beans, 34s to 36s; oats, 24s to 25s.

Devizes, Thursday.—All old English corn fully maintains its price, and sells readily. What the value of the new crop will be remains to be seen, but if the value of the old is any criterion prices should be much better than last year—given fine weather for the harvest. Wheat cutting is to commence in this district on Monday. Best wheat, 17s to 18s; secondary, 16s to 16s 6d; malting barley, 24s to 30s; feeding, 22s to 24s; old oats, 20s to 24s; new beans, 15s 6d to 16s 6d; fine flour, 27s to 30s; extra fine, 32s to 36s.

Doncaster, Saturday.—English wheat is very scarce, but where exchanges were made prices were very firm and steady, and ranged from 14s to 13s 6d per load. Foreign wheat still quiet, and though there were signs of a change, prices are slightly in favour of the buyer. Plate maize were a shade lower, whilst oats were firm, and a trifle dearer. Other things unchanged.

Dorchester, Saturday.—Farmers being still busy clearing up the remains of the hay crop, which is by no means got in yet, coupled with the fair earlier in the week, led to a small attendance, with a correspondingly limited offer of grain, stocks of which are now almost if not entirely exhausted. Wheat was held for late values, and on these terms what little was done resulted. Foreign unchanged. Barley steady, and values maintained. Oats rather weaker, from 3d to 6d per qr less being acceped in some cases. Beans and peas sold at late rates. Flour trade nominal.

Exeter, Friday.—Trade dull. Scarcely any English wheat offering. Foreign firm. Barley, oats, and flour unchanged. Maize rather dearer. English weat, 4s 3d to 4s 4d; superfine flour, 25s to 27s; fine, 24s to 25s.

Glasgow, Wednesday.—The trade during the week has been quiet. Prices of bread stuffs having declined in the earlier part of the week, have firmed somewhat, but little business is passing. Maize remains steady. Barley is exhausted on the spot, but there have been some forward sales of Black Sea at high prices. Oats have been depressed, Manitobas being pressed for sale to clear the quay. Other articles remain dull and unchanged. Attendance was moderate at to-day's market. Wheat unaltered. Flour meets with a better sale at late rates. Maize and corn steady at Monday's prices. Barley scarce and dear. Oats pressed for sale on quay, but for shipment the turn dearer. Beans and peas nominally unchanged. Bran 2s 6d per ton dearer, but thirds unaltered. Oatmeal quietly firm.—GIBSON AND CLARK.

Glasgow, Friday.—Maize and corn steady, with a dearer tendency; other articles quiet and unchanged.

Gloucester, Saturday.—English wheat unchanged. Reds, 33s to 33s 6d; whites, 33s 6d to 34s. Foreign wheats steady: Plates, 35s to 36s 3d; Russians, 33s to 35s; Manitobas, 36s 9d. Plate and Bessarabian maize unchanged at 24s. Oats 6d dearer; black, 20s 6d to 21; white, 22s 6d to 23. Barley 3d cheaper, at 25s 6d.

Grantham, Saturday.—Small supplies in all departments. Wheat at 36s and 36s 6d was 6d per qr dearer. Oats firm at 22s to 24s; beans 33s, to 34s per qr.

Hereford, Wednesday.—Small attendance. Wheat trade steady at last week's prices. Nothing doing in barleys. Oats firm without much demand. Beans steady. Maize 3d per qr dearer. Wholesale quotations:—Wheat, 4s to 4s 3d per 62 lb; barley, 3s 6d to 4s per 56 lb; oats, 2s 6d to 2s 10d per 40 lb; beans, 3s 10d to 4s per 65½ lb; maize, 3s 3d to 3s 6d per 60 lb.

Ipswich, Tuesday.—Very little wheat on offer; trade steady at late rates, 34s to 35s per 504 lb. Grinding barley easier. Maize 6d per qr lower. Oats slow. Beans and peas unaltered.

Leicester, Saturday.—Fair attendance of buyers and dealers, with restricted supplies home-grown wheats, which met a slow dragging trade, and prices were not quite so firm. Red wheats, 35s to 36s; white wheats, 36s to 37s per 36 stones; Grinding barley steady at late quotations. A moderate demand for brans at firm prices. Fine oats in good demand at 24s to 25 per 24 stones.

Lincoln, Friday.—A small attendance, and only one or two samples of English wheat on offer, which made the full prices of last week; foreign steady and unaltered. Oats and beans unchanged, and a fair inquiry for other feedings.

Maidstone, Thursday.—Small attendance to-day, the August vacation responsible thereof. Wheat business done in the wheat trade was at about the rates of last Thursday. No particular movement, millers only buying in small quantities, as they are looking to harvest supplies to please them. Barley continues dear, as its scarcity is remarkable. The cost of really good English oats is fully up to recent pitch, but foreign are neglected, late shipments coming to hand in "horsey" condition. Beans and peas firm and sound. Maize keeps well up. No change in other grain or feeding material.

Manchester, Thursday. — English wheat scarce, and nominally 6d higher. Foreign wheat rather variable. Flour slow and unchanged. Indian corn 1½d to 1d dearer on the week. English oats ½d higher, closing firm. Foreign feeding barley offered at 3s 8½d to 3s 9d. Beans and peas steady. Bran and thirds scarce, but quotably unchanged.

Newark, Wednesday.—Small attendance; supplies scarce; prices firm. Red and white wheat, 35s to 36s; malting barley, 28s to 30s; grinding, 26s to 27s; white oats, 23s to 24s; black oats, 22s 6d to 23s; beans, 34s to 35s per qr.

Newcastle-on-Tyne, Saturday. — A quiet demand prevailed at our to-day's market for wheat at last Saturday's quotations. A steady demand for perfect maize, and prices in favour of the seller; prices of last Saturday were maintained for oats with a fair consumptive demand. Peas and beans firm at last Saturday's prices; nothing doing in barley.—JOSEPH POLLARD AND CO.

Newport, Wednesday.—Barley forward for position 6d per qr dearer. Maize and wheat unchanged. Flour 28s 6d.

Northampton, Saturday.—Attendance very small; scarcity of cereals on offer, which changed hands at an advantage to sellers; not much business moving. Prices: Wheat, 34s to 35s; barley, 28s to 30s; white oats, 23s to 24s; black oats, 22s 6d to 23s 6d; beans, 31s to 33s; peas, 30s to 32s; flour, 26s to 30s.

Norwich, Saturday.—There were a few samples of wheat on offer to-day, for which farmers asked 36s per qr delivered; the demand was not very good; 35s 6d was about the value. Feeding stuffs trade quiet, prices generally being firm.

Nottingham, Saturday. — Wheat rather better supply of English, but the high prices asked by holders checks business. Grinding barley firm. Oats and beans but few offering, and full prices maintained.—ROBT. HUBBLE.

Peterborough, Saturday.—The weather is somewhat unsettled. The market attendance is very small with little corn offering, which made about last week's prices.—THOMAS HILL AND SON.

Preston, Saturday.—There was only a small attendance, and nothing was offering from farmers. Flour remains unaltered. Quotations:—Wheat, white, per windle of 220 lb, 13s 9d to 15s; ditto red, 13s 6d to 14s; oats, old, per bushel, 3s 3d to 3s 4d; beans, per windle of 220 lb, 16s 6d to 17s.

Reading, Saturday.—The attendance was fair, but business was on the quiet side. A few parcels of wheat came to hand sparingly, sold at from 33s to 36s per qr; barley (for which practically there was no inquiry) was on offer at from 27s to 31s; oats were firm at 19s 6d to 23s; beans, realised 33s to 36s; and peas 29s to 31s.

Retford, Saturday.—Fairly good attendance, trade at a standstill. Wheat on the up grade, making 36s to 37s; oats, 23s to 24s; black ditto, 22s to 23s per qr. There was no barley on offer. Beans unchanged at 33s to 34s.

Ripon, Thursday. — Very little local wheat showing, and prices show no change. Round maize is making rather less money. A small attendance of farmers. Prices:—Wheat, 34s to 35s 6d; wheat, foreign, 36s. to 40s 6d; barley, grinding, 26s to 27s; oats, 24s to 25s; maize, round, 25s 6d to 26s 6d; maize, flat, 26s to 27s per qr.

Sheffield, Tuesday.—There was generally a tendency to harden. English and foreign wheat was 6d per qr higher. Beans were dearer, and oats, peas, and barley had a decided upward tendency. Prices:—Wheat, white, new, 35s to 36s; ditto red, new, 35s to 36s per 504 lb; oats, black, 22s 6d to 23s 6d; ditto white, 24s to 24s 6d per 336 lb; peas, grinding, 32s 6d to 33s 6d; ditto blue, 75s to 90s per 504 lb; beans, English, 35s to 36s 6d per 532 lb; barley, grinding, 27s 6d to 29s; ditto malting, 31s to 33s per 448 lb; Indian corn, small, 25s 9d to 26s; ditto Plate, 25s 6d to 25s 9d; ditto flat, 26s to 27s per 480 lb.

Shrewsbury, Friday.—New wheat, 14s 6d to 15s per 225 lb; peas, 15s 6d to 16s per 225 lb; beans, 14s 6d to 15s per 240 lb.

Stamford, Friday.—The attendance was about an average, but trade was very quiet. Wheat,

33s to 34s 6d; oats, 22s to 23s; barley, 27s; beans, 32s 6d to 33s per qr. Peas inactive.

Stockton, Wednesday.—There was no farmers' wheat showing. The demand for foreign wheat was lighter at last week's prices. Oats unchanged. Maize lower.

Sunderland, Saturday.—Grain in small supply. Wheat steady and unchanged in value. Spring corn quiet. Arrivals nil.—E. and F. Richardson.

Winchester, Saturday.—Supply of English wheat practically exhausted. Foreign unaltered. Barley and oats unchanged. Maize 6d cheaper to arrive. Flour steady at late rates.—Fear, Colebrook and Co., Ltd.

Wisbech, Saturday.—A small market. Only one or two samples of grain offering. Fresh thrashed red wheat, 35s per 504 lb; oats, 22s to 23s per 336 lb.—James Fletcher.

Yeovil, Friday. — Business somewhat restricted. Numbers were inquiring for good samples of home-grown wheat for blending, and these made up to 35s per qr; secondary descriptions selling at from 30s to 32s 6d; foreign wheat made 34s to 36s; Irish black oats, 19s 3d to 19s 6d; ditto, white, 21s to 21s 6d; English white oats, 22s 6d to 23s 6d; black, 22s to 22s 6d; spring beans, 30s to 31s 6d; winter, 32s 6d to 35s; grinding barley (foreign), 25s 6d to 25s; home grown, 27s to 27s 6d; flat maize, 24s to 24s 3d; round, 23s 3d to 23s 9d; rye, 27s 6d to 28s 6d; tares, winter, 38s 6d to 43s; spring, 43s 6d to 46s 6d. Flour a quiet trade, bakers showing no anxiety to enter into fresh contracts pending the marketing of the new wheat crop. Fines mades 26s 6d per sack. Meals and offals continue a good market at values which favour sellers.

York, Saturday.—There was hardly a sample of wheat on offer, and prices were nominally unchanged. Fine new wheat made 35s to 36s, and red and mixed 34s to 35s per qr. of 36 stones; feeding barley, 26s to 28s per qr of 32 stones; oats firm at 22s to 24s per qr of 24 stones; rye, 30s; beans, 33s per qr of 36 stones.

FOREIGN.

Hamburg, Saturday.—Barley Report: The weather is more or less unsettled and cool; farmers have great difficulty to gather their crops, and although so far no complaints are heard about barley, the present weather can never do any good, and quality is sure to suffer, as the barley is ripe, and cutting has commenced. In Bohemia and Moravia the harvest is in full swing, and some really choice samples are appearing, but enormous prices are asked for such. In Hungary the harvest is completed, but the quality varies a good deal, and the market rules firm, with prices rather tending upwards.—F. M. T. Duhne.

Hamburg, Saturday.—We have still rainy weather; anxiety is increasing respecting the fate of the outstanding crops. Market firm for all articles, with a fair demand for present and later delivery; 60 lb new red Saal wheat, September-October shipment is held at 34s per 504 lb f.o b.; Hard Winter No. 2, new crop, August shipment, is selling at 32s 9d to 33s; Red Winter No. 2 is offering at 32s; 9/20 Ulka, August-September, 32s; 79/80 ko River Plate on the spot, 33s 6d to 34s per 480 lb c.i f. Hamburg. Rye in good demand; 9 15/20South Russian afloat is held at 31s 6d to 32s; 9 20/25 at 33s; 9 10/15 Aug.-Sept. at 28s 9d to 29s, c.i.f. Hamburg. Samples of malting barley received from Bohemia, Moravia, and Slovakia show good stout grain of varying colour; fine even and light-coloured parcels are scarce, and for such 38s 6d to 42s 6d is asked; good mellow, but rather discoloured parcels are held at 35s to 37s, at 448 lb f.o.b. The general opinion is that high prices are justified this season, as much barley in this country and the north will be spoilt by rain. Grinding barley firm; 60 to 61 kg South Russian on the spot is selling at 25s to 25s 6d; afloat, 23s 3d; July, old style, 20s 6d; August-September, 19s 9d per 400 lb c.i.f. Hamburg. Danubian maize is held at 22s 9d, Odessa at 22s 3d, mixed American at 23s 3d per 480 lb c.i.f. Hamburg.—John Tatlock.

CORN STATISTICS

Weekly Arrivals into London.

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, MONDAY, 3 P.M.

The only new grain offering was a little rye of fine quality, for which 30s. was asked and 28s. bid. New wheat is not expected to be offered at all regularly before this day fortnight, though a few forward ears will be gathered this week and shown as a "rubbed-out sample." There was not a good inquiry for wheat at the London market to-day, but holders asked firmer prices for both home-grown and imported descriptions. Maize was in a firm position; the spot inquiry excellent for the time of year. It is surprising how firm this trade is, despite 1,030,000 qr. on passage and a big crop expected in the United States. Barley was quiet, with 24s. 3d. per 400 lb. accepted for Canadian and 22s. 9d. for Persian. For oats the market was divided, as anything over 312 lb. weight sold well, while 304 lb. sorts favoured buyers. Beans and peas also tended slightly in favour of buyers. New English trifolium seed made 23s. per cwt., while a guinea was paid for French.

THE FLOUR TRADE.

MARK LANE, MONDAY, 3 P.M.

The price of Town Whites and Town Households is a little firmer from the markets just preceding the Bank Holiday.

Owing to the supply of flour up from the country being less than usual, the market for it is fairly stiff, and prices are at least as good as on the 2nd inst.

American made 22s 6d to 22s 9d for Iron Duke, and was in small request for the finer grades, the prices for which are very high in proportion to the values of first bakers' types.

Australian flour sold fairly well at currencies.

Californian flour at 27s. per sack had a limited market.

Belgian takes a high place for quality, but the price is high also, and reduces inquiry to a narrow scope.

The dealers in Hungarian flour and would-be purchasers of the same are under an obligation to *Dornbusch's List* for a special telegram from Budapest, which gives the average price of wheat there on Saturday at 42s. 6d. per qr. This is 10s. dearer from a year ago, and shows the impossibility of flour being shipped at the prices to which buyers had become accustomed. At the same time, the 37s. asked to-day for fine Hungarian flour at Mark Lane struck us as being an extreme quotation.

There was a good demand for barleymeal, poultry mixture, and for ground oats, while the sale of bran, pollard, middlings, and ricemeal was rather larger than usual in August.

CLOSE OF THE MARKET.

THE MARKET CLOSED RATHER WEAKER FOR FOREIGN WHEAT AND FLOUR, FIRM BUT DULL FOR OATS AND BARLEY, FIRM AND FAIRLY ACTIVE FOR MAIZE.

THE BALTIC.

MONDAY, 1 P.M.

STATE OF TRADE.

Wheat cargoes opened rather dull in London, with Liverpool reported as in buyers' favour. Maize was steady for near sales and firm for remoter ones. Oats and beans were inclined to recede for cargoes for autumn shipment, but barley was firmer from the close of last week.

BUSINESS DONE.

Wheat.—No. 1 Northern Manitoba, 34s per 480 lb, September shipment; No. 2 Northern Manitoba, 33s 3d per 480 lb, September shipment; Red Karachi, 34s 6d per 492 lb, September shipment; best Russian Winter, 36s 6d per 492 lb, September shipment; Hard Tagonrog, 33s 6d per 492 lb, September shipment; No, 1 Californian, 36s per 500 lb, September shipment; Argentine, 34s 3d per 480 lb, on passage; Roumanian, 34s 6d per 492 lb, September shipment.

Barley.—Azoff, 20s 6d per 400 lb, September shipment; Californian, 30s per 448 lb, October shipment

Oats.—Petersburg, 15s 6d per 304 lb, October shipment; Argentine, 15s 3d per 304 lb, February shipment.

Maize.—Odessa, 23s 6d per 480 lb, September shipment; Argentine, 23s 6d per 480 lb, on passage; American, 23s per 480 lb, September shipment; Novokossisk, 24s 3d per 480 lb, September shipment.

Linseed.—Petersburg, 41s per 416 lb, arrived; Calcutta, 41s per 410 lb arrived.

Linseed.—Egyptian, £9 11s 3d per 2,240 lb, October shipment; Bombay, £5 15s per 2,240 lb, prompt shipments.

TERM MARKET.

Latest prices for future are as follow:—

Winter Wheat.

Red, American, 7s. 1d., per cental, Sept. delivery.
,, ,, 7s. 4d. ,, Dec. ,,
Mixed American Maize, 5s. per cental, Sept. delivery.

In addition to these prices made, 7s. 3d. is offered for March delivery of wheat, and 4s. 11d. for November, December, and January delivery of maize, but holders hesitate to accept these bids. The market is firm for both staples, but it is not active. Indian peas of the new crop are offered at 33s. 6d. for September delivery, at which price there are buyers. The weight is 504 lb.

GRAIN AND FLOUR FACTORS REPORTS.

Flour is unchanged this week. Grain.—Round and flat corn are held for 1½ per boll advance. Manitoba oats steadier at last week's prices. Pease in good demand at high prices. Beans unchanged. Oatmeal steady, but the demand is rather quieter. Mill Stuffs.—Bran and thirds continue in good demand and are again dearer. Winter wheat patents, 28s to 29s per 280 lb; spring wheat patents, 27s 6d to 29s per 280 lb; American corn, 14s per 280 lb; round corn, 13s 10½d to 14s per 280 lb; grinding Tears, 18s 9d per 280 lb; white pease, 19s 6d to 19s 9d per 280 lb; broad bran, 105s per ton; medium bran, 97s 6d to 100s per ton; fine thirds, 125s per ton; common thirds, 105s per ton; American oilcake, 145s per ton.—MCKINNON AND MCDONALD (Glasgow).

Flour. — Home made qualities are rather quieter; prices somewhat influenced in favour of buyers by lower quotations from America.—GREENHILL BROS. (Belfast).

Offals —No change to report in bran; demand fairly good.—GREENHILL BROS. (Belfast).

Milling Offal. — Everything exceedingly firm and scarce, the demand being far in excess of the supply.—JOHN BAWCOMB AND CO.

Flour.—Business in flour to-day has ruled very quiet, but prices remain unchanged on the week. —T. S. MEDILL AND SONS, LTD.

We have liberal arrivals of wheat. Trade is quiet, and prices are rather in favour of buyers. Flour unchanged. No change in value of maize and barley. Oats firm; fine qualities 1½d to 3d dearer.—COVENTRY AND SHEPPARD.

HOPS.

Borough, Monday.—There is no change to note in the market, but there are a few inquiries from consumers. The trade is depressed by the heavy imports, which again show an increase, the total imports from September 1 to July 31 being 220,546 cwt, against 187,661 cwt. for the previous corresponding period, whilst the exports are not much more than half what they were during the same period, viz., 11,522 cwt. against 20,327 cwt., the present fiscal policy of the country is killing the English hop industry.—W. H. AND H. LE MAY.

HAY AND STRAW.

Birmingham, Friday.—Small supply; trade quiet. Hay, £4 per ton; straw, no quotations.

Darby, Friday.—Best old clover, 90s to 100s per ton; new, 80s to 90s; best old hay, 90s to 100s; new, 80s to 90s; seconds, 65s to 70s; wheat straw, 60s to 70s; pressed ditto, 50s to 60s; chop straw, 55s to 65s; peat moss, 35s to 40s

Lancaster, Saturday.—Meadow hay. 6d; clover, 6½d; wheat straw, 4d; oat straw, 4d per stone.

Lincoln, Friday.—No definite prices are settled for new hay. Old hay was dearer at £4 to £4 10s per ton on the ground; seeds, £3 15s to £4; straw, £1 15s per ton at the stack.

Manchester, Friday.—Hay, old, 5½d to 6d; clover, old, 6½d; new, 4½d to 6½d; straw, oat, 3½d to 3¾d per stone.

Nottingham, Wednesday.—Small supplies on offer, and trade quiet at following rates:—Inferior to good hay, 75s to 85s; prime ditto, 90s to 100s; inferior to good clover, 75s to 85s; prime ditto, 95s to 100s; wheat straw, 45s to 55s; new hay, 70s to 80s per ton.

Whitechapel, Thursday.—Fair supplies met a good demand at recent rates. Best clover, 84s to 97s 6d; inferior ditto, 75s to 80s; specially picked hay, 90s; good ditto, 80s to 87s 6d; inferior ditto, 65s to 70s; mixture and sainfoin, 82s 6d to 90s; straw, 28s to 34s per load.

POTATOES.

Borough, Saturday.—Good supplies experienced a very quiet sale. Early Rose, 60s; Early Puritans, 60s to 70s; Epicures, 55s to 60s; Sharp's Express, 60s to 65s; British Queens, 55s to 65s; Blacklands: British Queens, 50s to 55s; and Epicures, 50s per ton.

Goole, Wednesday.—The attendance was small; business slow. Few locally grown potatoes were shown.

Lancaster, Saturday.—A large supply, which sold at 10s 6d to 11s per load; retail, 1d to 2d per lb.

Manchester, Saturday.—Potatoes: Cheshire, new, 5s to 6s 6d per load; Bedfords, 4s to 5s 6d per cwt.

Preston, Saturday.—New potatoes, 8s 6d to 10s per load of 240 lb.

Retford, Saturday.—Market well supplied. Home grown varieties very satisfactory, selling at 6d to 8d per stone.

Spitalfields, Saturday.—A very heavy quantity was delivered, and trade moved off slowly. Early Rose, 50s to 55s; Puritans, 55s to 65s; British Queens, 65s to 75s; Duke of Yorks, 60s to 65s; Sharp's Express, 65s to 70s; Epicures, 55s to 60s. Blacklands: Up-to-Dates, 60s; British Queens, 55s to 60s; Sharp's Express, 55s to 60s; Epicures, 50s to 55s per ton.

York, Saturday.—There was a fair supply of exceptionally good quality, which made up to 3s per hamper.

BUTTER.

TO-DAY'S MARKETS.

CATTLE.

Metropolitan Market, Islington.

	Monday, August 12, 1907. British.	Total.	Monday, Aug. 13, 1906.
Beasts	750	750	1,000
Sheep and Lambs	5,060	5,060	6,450
Calves	10	10	20
Pigs	—	—	—
Milch Cows	30	30	30

Quotations per 8 lb. (sinking the offal).

ENGLISH.

	Inferior. s. d.	Second. s. d.	First. s. d.
Beasts	2 10	3 10	4 8
Sheep	3 10	5 4	6 2
Lambs	5 2	5 10	7 0
Calves	—	—	—
Pigs	—	—	—

Milch cows, per head, £16 to £22.

British arrivals include as follows:—Scotland, nil; Eastern Counties, 43; Midland, Home, and Western Counties, 632; Devon, 20; Ireland, 55.

We note to-day a increase of 260 head in the number of beasts offered for sale, compared with Monday last. For both prime and second quality fat beasts trade opened and continued throughout the day of an extremely slow nature, late currencies being difficult to maintain. The Irish supplies consisted of 24 Dublins and 31 Waterfords, these shared in the slow trade, but were quoted at late values. Fat butchering cows and bulls were difficult to vend, notwithstanding sellers being willing to accept a decline of 2d. per 8lb. on late currencies. A clearance will not be made.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day. s d	s d	Monday, Aug. 13, 1906. s d	s d
Scotch	—	—	—	—
Devons	—	—	—	—
Herefords	4 6 to 4 8		4 4 ex 4 6	
Norfolks	—	—	—	—
Runts	4 4 to 4 6		4 0 to 4 2	
Lincolns	4 0 to 4 2		3 8 to 3 10	
Irish	4 2 to 4 4		3 8 to 3 10	
Canadian	—	—	—	—
Fat cows	3 4 to 3 6		3 4 to 3 6	

There was an increase of 370 in the number of sheep and lambs penned compared with Monday last. For both wethers and ewes a slightly firmer and steadier trade was experienced, sellers both asking and obtaining an advance of 2d. per 8 lb. in value for English descriptions. Scotch and Irish, on the other hand, met with a firm and steady inquiry; no higher rates, however, can be quoted for these, this remark also applies to the lamb trade. The supply included 90 Scotch, 693 Irish, and 600 from the Eastern Counties. There is very little prospect of a clearance being effected however.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

	To-day. s. d.	s. d.	Monday, Aug. 13, 1906. s. d.	s. d.
8 st. Scotch	6 0 to 6	2	5 6 to 5	8
7½ to 8 st Downs	6 0 to 6	2	5 8 to 5	10
9 st. Downs	5 10 to 6	0	5 6 to 5	8
10 st Halfbreds	5 6 to 5	8	5 4 to 5	6
10 st Yorkshires	—		—	
12st Lincolns, half-bred	—		—	
10 st Irish	5 4 to 5	6	5 0 to 5	2
10 st Down Ewes	4 0 to 4	2	4 0 to 4	2
11 st Halfbred ditto	3 10 to 4	0	—	
5 st Down Lambs	6 10 to 7	0	7 0 to 7	2
6 st Halfbreds ditto	6 6 to 6	8	5 10 to 6	0

Calf trade not worth noting or quoting.

No pigs on the market.

FOREIGN.

Deptford, Monday.—Beasts 1,278. To-day's supply consisted of 998 beasts from the United States and 280 from Canada. Trade ruled of a firm and steady nature, both in regard to tone and value. The best of the former on offer were quoted at from 4s 2d to 4s 4d; seconds, 4s to 4s 2d, and the latter 4s to 4s 2d; seconds, 3s 10d to 4s per 8 lb (offal given in). On Saturday 1,730 beasts from the United States and 400 from Canada were offered for sale. Trade ruled of a firm and steady nature at a slight advance in value. Best States were quoted at from 4s 2d to 4s 4d; seconds, 4s to 4s 2d. Canadians, 4s to 4s 2d; seconds, 3s 10d to to 4s per 8 lb (offal given in).

SEEDS.

Mark Lane, Monday.—The new trifolium is now appearing in the market, but dealers have started prices too high for current quality and for competition with foreign seed. New rape and rye are also opening at higher prices, with little business so far. Mustard unchanged, demand slow. Peas quiet.—John Pickard and Co.

OIL SEEDS.

Mark Lane, August 12.—There are few changes in oilseeds since 1st inst., but cottonseed is a little easier to buy.

FEEDING STUFFS.

Mark Lane, Monday.—Linseed Cake.—Though the general demand keeps quiet, any trade passing was principally in favour of London made, on account of their being offered relatively cheap compared with foreign. Home crushers are therefore now inclined to advance their prices.

Cotton Cake.—Business is slow for spot cakes, and the high price required for forward positions checks any trade.

Linseed.—Shipments have eased off all round, and values have consequently a tendency to harden.

—Robt. & John Hewetson

HOPS.

Canterbury, Saturday.—The braml ings are beginning to show hop, but the yield must be below average.

Worcester, Saturday.—There has been little trade this week owing to the holidays, but the market has opened with a fair enquiry. Growers do not report so favourably as a fortnight ago, and unless hot suitable weather comes at once, the probable crop will be less than expected.—Charles Faram and Co.

WET AND DRIED GRAINS.

Mark Lane, Friday.—Wet Grains: Prices remain about the same, and with haymaking over there is an increased demand, and business has been done at 12s ale, and 9s 6d porter per ton on rail, London. Dried Grains.—The demand continues improvingly strong, with every probability of an advance. Prices:—Distillers, 107s 6d; ale, 97s 6d: and mixed, 92s 6d per ton on rail, London. Ale grains for the winter months have been done at 105s. Calcutta rice meal 80s; rice germ, 100s; American cane treacle in good demand, 87s 6d per ton, on rail, London. Kiln-dried sea-damaged Australian wheat from 20s per qr.—Hamlyn and Co., 37 and 38, Mark Lane, London, E.C.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

Owing to the principal market day of the week falling on a Bank Holiday, there was a scarcity of buyers present, and this, combined with the fact that butchers' requirements are much smaller owing to so many families being out of town, brought about an extremely slow trade, sellers being obliged to accept a decline in value to effect sales. The majority of the supplies consisted of grass-fed beasts from the Midland Counties. The Irish arrivals comprised eighteen Dublins and fourteen Waterfords; these shared in the poor trade, but maintained late rates. Fat butchering cows and bulls were very little sought after by country buyers, these also showed a downward tendency, but were not quotably lower. On Thursday trade was confined to fat bulls and rough cattle at Monday's values.

At the Foreign Cattle Market, Deptford, markets were held on Wednesday and Saturday, and were fairly well supplied with both States and Canadian beasts. Trade ruled of a firm and steady nature at late values. The total number of beasts on offer at both markets was 3631, as against 5067 during the preceding week, consisting of 530 British (decrease 190) and 3,101 foreign (decrease 1,246), comprising 2,555 from the United States and 546 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal) :—90 to 95 stone Herefords, 4s. 6d. to 4s. 8d.; 95 stone Runts, 4s. 4d. to 4s. 6d.; 100 stone Shorthorns, 3s. 10d. to 4s.; 95 stone Irish, 4s. 2d. to 4s. 4d.; 90 stone States, 4s. 1d. to 4s. 3d.; 95 stone Canadians, 3s. 11d. to 4s. 1d.; 90 stone fat cows, 3s. 6d., ex. 3s. 8d.

In the sheep market at Islington there was also an extremely slow trade, rates ruling in favour of the buyer for all grades of both wethers and ewes. Scotch descriptions were in smaller supply and Irish in larger, both, however, shared in the generally lower rates which prevailed. On Thursday trade ruled of a slightly firmer nature. Monday's rates, however, governed all transactions. The same remark applies to the lamb trade. The total number penned was 6,140, as against 6,860 during the previous week. No sheep were offered for sale at Deptford. Best pens made per 8 lb. 7½ to 8 stone Downs, 5s. 10d. to 6s.; 8 stone Scotch, 6s. to 6s. 2d.; 9 stone Downs, 5s. 8d. to 5s. 10d.; 10 stone Irish, 5s. 4d. to 5s. 6d.; 10 stone Downs, 5s. 6d. to 5s. 8d; 10 stone Halfbreds, 5s. 4d. to 5s. 6d.; 10 stone Down ewes, 3s. 10d. to 4s.; 5 stone fat Grass lambs, 6s. 10d. to 7s.; 6 stone Half-bred ditto, 6s. 6d. to 6s. 8d.

Calves numbered 60 and met with a dull and dragging trade, the best on offer being quoted at from 4s. 10d. to 5s. per 8lb. (sinking the offal).

Only 5 pigs were offered for sale, consequently trade was not worth noting.

Trade in the West.

In the absence of any great demand for any particular class of stock, except milch beasts and store sheep, the moderate supplies just now on the market fully sufice to meet all requirements; and it is satisfactory to find that, with a somewhat restricted sale, prices are keeping up to such a satisfactory level, particularly for good class stock, which still continues to favour the seller, any little decline taking place only affecting the most ordinary grades, and about which would be purchasers are absolutely indifferent. Milch beasts have fully recovered the slight reaction which temporarily affected this class of stock a week or two since, and prices are once again touching their old level, especially heifers and calves, which are now realising from £17 to £21, and seconds £14 to £16 15s.; whilst deep-milking cows with calves by their side realise from £16 to £18 for the most serviceable, and older animals £12 to £15 10s. In-calf heifers now make £8 to £14, the latter for those of a particularly early date. Store bullocks all round still continue to attract very close attention, and there is every promise of their doing so whilst pasture keep continues as plentiful as is now the case. Best barreners, in high condition, sell from £24 to £28 per pair, and plainer animals £18 to £23. For two year-old steers dealers are now giving from £10 to £13; yearlings, £4 15s. to £11 10s.; and yearling heifers, £5 to £8 15s.

The sheep trade has lost but little, if any, of its former buoyancy, even if harvest prospects are not exactly everything that could be wished, and flockmasters continue to be very firm in their demands, this being fully reflected in the uniformly good prices which all classes of sheep, almost without exception, continue to bring, off-going ewes making an exceptionally keen demand, in spite of its being somewhat early in the season for purchases of this particular class of stock, which is generally associated more with September and the early part of October than the early days of a summer month. Still at Dorchester on Tuesday ewes of all classes were quite 2s. dearer than of late. A general range for offgoing ewes just now may be given is from 36s. up to 50s. each; other ewes, 40s. to 58s.; wether hogs, 38s. to 45s.; lambs, 28s. to 42s.

Now that the holidays are over there has been a little slackening in purveyors' demands, but not to sufficient extent to in any way adversely affect prices, which are generally well maintained for all classes of meat, the more medium weights either in bullocks, sheep, calves, or pigs continuing to find the greatest favour. Choice quality steers and heifers realise in round numbers from £16 up to £21 or £22 (this figure being now but seldom exceeded), at which price values work out at from 11s. 6d. to 12s for all ripest grades of beef, and from 10s. to 11s. for more ordinary runs (mainly for cows or coarse-weight heifers). Fat sheep rule equally firm for most qualities, but more especially for the better-class wethers, which are relatively dearer than ewes weight for weight, except for very young, well-finished ewes, which are also in some demand. The general range of currencies for wethers and tegs is from 8½d. to 9d. according to age and finish, and choice young ewes 8d. to 8½d.; heavier sheep sell from 7d. to 7½d., with a steady demand for particular districts; but the better class sheep sell readily almost everywhere. The best wethers range from 48s. to 60s. each; ewes, 40s. to 54s.; and lambs, best 42s. to 50s., seconds 30s. to 40s. Veal sells very well, but medium weights of good finish now find most favour at 8½d. to 9d., secondary qualities ranging from 7½d. to 8d. Pigs keep firm, and values generally are well maintained, small neat-handling porkers at 10s. to 10s. 9d. per score; baconers, 9s. to 9s. to 9s. 6d., or 9s. 9d.; and heavy weights, 8s. to 8s. 6d.

Trade in Scotland.

The number of fat cattle on offer has been nearly an average, but the general quality deficient. Anything of a good class met a fair inquiry at almost last week's prices, but secondary descriptions would suffer a fall of from 10s. to 15s. per head. Fat cows a small show, and they made rather more money. Sheep and lambs in full average supply, and although there was no quotable change in prices, quotations were with difficulty got. Fat calves dearer, while pigs also met a good inquiry. There was a good show of store cattle for the time of year, and those in condition got early and well sold out but inferior descriptions were entirely neglected. For store sheep and lambs there was a good demand at prices quite equal to expectations. Milch cows a large show, and they met a very slow trade. Quotations :—Top price of cattle per live cwt., 40s. 8d.; current, 36s. to 38s. 6d; mutton, 7d. to 9½d. per lb.—John Swan and Sons, Ltd.

Trade in Ireland

Dublin market on Thursday last was well supplied with cattle, there being 700 more than the previous week, which placed the aggregate very high for this time of the year. The total number of cattle offered for sale was 3,968. There was a rather lower price going for cattle, in consequence of the larger number on offer, the weaker tendency was particularly noticeable in secondary and half-finished cattle, and it was found impossible to effect a thorough clearance, though the attendance of buyers from all parts was large. Live weight prices ruled from 31s. to 35s. per cwt., chiefly for Aberdeen-Angus and Hereford crosses. Second quality beasts made 28s. to 30s. per cwt. Dead-weight prices were :—Best ox and heifer beef, 54s. to 57s. 6d., and some extra finished beasts up to 61s. 3d. per cwt.; good second-class beef, 50s. to 53s. 6d.; and coarse beef, 44s. to 48s. per cwt.

In the sheep department there was a shrinkage of 600 head, which made an improvement in the prices and in the sale. Trade with the London markets is still poor, but sheep for the Liverpool and Manchester markets sold freely at rather improved prices. Home buyers were forced to give better prices for mutton, owing to the scarcity. Coarse sheep continued to drag heavily. The inquiry for choice lambs was better, and higher prices were paid. Choice lambs paid from 36s. to 42s. apiece, and secondary lambs from 25s. to 34s. each. Wether mutton was from 7d. to 7½d. per lb.; ewe mutton 6½d. to 7d. and inferior mutton at from 6d. per lb. Best fed veal made from 8d to 9d per lb., and inferior veal sold from 6d. per lb. Prime veal calves were in good request. Hoggets of large size made from 54s. to 60s. each, while small to medium paid from 36s. to 48s. Rough and horny sheep were difficult to dispose of. Large and medium-sized lambs were in good request for export. Rough sheep were not selling so well as at last market. Butchers say that prices leave them a very small margin for profit. Milch cows are offered in large supply, but trade ruled quiet, prices being easy and irregular. Tip-top springers and choice newly-calved cows were worth from £17 to £20; other sorts much the same as previous market. There was a good demand for store cattle in nice condition and of good breeding. The auction sales were well attended, and good prices were paid. At country fairs these were in good demand at advanced prices.

Dublin Pig Market was small last Thursday, but buyers were in full strength, and trade ruled active, though buyers seemed a bit shy in the early morning. Choice light-weight pigs sold from 51s. to 54s. per cwt.; inferior pigs from 35s. to 42s. per cwt. Good store pigs sold well.

LONDON.

Central Market, Friday.—Fair supplies, and trade very slow. English beef, 3s 8d to 3s 9d; Scotch sides, 4s to 4s 2d; shorts, 4s 2d to 4s 6d; extreme, 4s 8d; Deptford and Liverpool killed, 3s 4d to 3s 8d; refrigerated hindquarters, best, 3s 9d to 3s 11d; ditto seconds, 3s 6d to 3s 8d; ditto forequarters, 2s 2d to 2s 4d; inferior beef, 2s 4d to 2s 8d; mutton, Scotch wethers, 5s to 5s 4d; ditto tegs, 5s 8d; ditto ewes, 3s 4d to 3s 8d; English wethers, 4s 4d to 5s; ditto ewes, 3s 4d to 3s 8d; Dutch sheep, 4s 8d to 4s 10d; English lamb, 5s to 5s 8d; veal, 3s 4d to 4s 8d; English pork, 3s 6d to 4s; Dutch pork, 3s 6d to 3s 10d per 8 lb.

Islington, Thursday.—To-day's supply of beasts consisted entirely of fat butchering cows and bulls, which met with a slow trade at last Monday's values. Top prices paid per 8 lb as follows :—Fat cows, 3s 6d to 3s 8d; fat bulls, 2s 9d to 3s 3d. Trade for both sheep and lambs ruled firmer, with an upward tendency in values, though not quotably so. Best pens made per 8 lb as follows :—7½ to 8 stone Down sheep, 5s 10d to 6s; 9 stone ditto, 5s 8d to 5s 10d; 10 stone ditto, 5s 6d to 5s 8d; 10 stone halfbreds, 5s 4d to 5s 6d; 10 stone Down ewes, 3s 10d to 4s; 5 stone fat grass lambs, 6s 10d to 7s; 6 stone halfbred ditto, 6s 6d to 6s 8d. Calf trade ruled very slow, at previous rates. Pig trade not worth noting. Quotations per 8lb, sinking the offal :—Beasts, 2s 9d to 3s 8d; sheep, 3s 10d to 5s; calves, 3s 6d to 5s; lambs, 5s 8d to 7s.

COUNTRY.

Ashford, Tuesday.—Beef sold rather slowly at about last week's rates, best arrivals making 4s 8d to 5s per stone. Mutton revived at the opening, but afterwards fell off; Down wethers made 5s 8d to 6s 2d, and Kents 5s 4d to 5s 8d. Pork rather neglected, but without reduction; best porkers fetching 3s 10d to 4s. Store sheep trade good, many lambs having been sold at 30s each.

Bath, Wednesday.—Fat steers, £19 15s to £23 10s; fat heifers, £17 15s to £21; cows and calves, £14 10s to £17; fat wethers, 50s to 57s; fat lambs, 35s 6d to 44s 6d; fat ewes, 44s 6d to 53s; fat calves, 90s to 109s; weaning calves, 36s to 63s.

Berwick, Saturday.—Calves, £5 10 to £6 10s; heifers, £7 to £9; stirks, £7 10s to £9 10s; two-year-olds, £10 10s to £12 10s; three-year-olds, 13 to £14 10s; Shorthorn bulls, £11.

Birmingham, Thursday.—Fair supply of pigs; small supply of beasts and sheep. Trade slow. Quotations:—Beef, 5½d to 6½d per lb; Herefords, 6¾d per lb; mutton, 6½d to 8¼d per lb; lamb, 9d per lb; bacon pigs, 10s 3d per score; cutting pigs, 10s to 10s 3d per score; sows, 8s per score.

Bristol, Thursday.—At the market beef was plentiful, but demand was not brisk, and business quiet at last week's prices for best sorts, secondary qualities being quoted 1s higher. A large number of dairy cows, and mostly sold at 15 guineas to 20 guineas each. Mutton and lamb were in moderate supply, and ewes declining ½d per lb. Pigs were not numerous, and values were unchanged.

Calne, Friday.—Present prices of pigs:—In lots of not less than ten, on rail within 100 miles, 1s. per pig extra for delivery by road. Prime stores, 6 sc. 10 lb to 8 sc. 10 lbs, 10s per score, 8 sc. 11 lb to 9 sc 10 lb,, 9s 6d per score; 9 sc. 11 lb to 10 sc. 10 lb. 9s. Pigs outside these limits at their value.—C. AND T. HARRIS AND CO, LTD.

Canterbury, Saturday.—Hibernod stock are drug on the market, but a good business continues to be done in lambs. Ewe lambs were making to-day from 18s to 31s 6d, and wethers from 21s to 32s 6d. One good run of wether lambs averaged 28s. Half-bred lambs were quoted from 24s 6d to 30s 6d; useful old ewes, 33s to 41s; and fat wether tegs, 45s 6d to 48s.

Carlisle, Saturday.—A fair demand for cattle was experienced. Wintering heifers, £7 to £7 10s; ditto stall-fed, £16 10s to £17 each.

Chester, Thursday.—Good supplies of cattle and sheep. The demand at first was brisk, and numerous lots were sold at satisfactory prices. Later business became very slow, and an unexpectedly large number of cattle, principally dairy stock, remained unsold. Milch cows made £17 to £22; calvers, £15 to £19; barrens, £10 to £13; heifers, £8 to £15; stirks, £5 to £9; bullocks, £12 to £14; sheep, 18s. to 33s. each.

Colchester, Saturday.—The market was dull, but fat and store lambs sold well. Beef 4s 8d to 4s 10d per stone of 8 lb, mutton at recent prices. Fat hogs made 9s per stone.

Doncaster, Saturday. Average supply of cattle and a fair supply of sheep, but only a moderate attendance of buyers trade ruling slow. Late prices were firm. Milch beasts, £17 to £23; bullocks, £12 to £18; heifers and drapes, £13 to £14; young stores, £7 to £10 each; gimmer sheep, 54s to 60s; drape ewes, 40s to 50s; and lambs, 34s to 40s each.

Dorchester, Saturday.—Messrs. Ensor and Son had only a limited offer of stock at their to-day's repository sale, but buyers were well represented, and a quick trade resulted throughout at generally enhanced sales, milch beasts in particular being very dear, the best selling up to £21, ranging down to £16 10s, whilst cows sold from £13 to £15 10. Barreners made £24 to £27 per pair, and stirks £6 10s to £8 10s. In fat beef heifers sold readily from £16 10s to £19 each (or 11s to 11s 9d per score); fat bulls £13 10s to £21 (or 9s 6d to 10s). Store bulls made from £6 10s to £9 10s. Mutton continues to come very sparingly to hand at the week-end market, and prices as a consequence rule very firm, and generally speaking against buyers.

Dublin, Thursday.—Better trade for all classes of cattle with prices about the same as last week, and an early clearance effected. Fair trade for sheep at last week's prices. Lambs, except the choicest qualities, not so easily placed at prices favouring buyers. Cattle—Live weight (best), 31s to 33s per cwt; Angus crosses up to 35s per cwt; secondary and inferior sorts, 28s to 30s 6d per cwt. Mutton, dead weight, 6½d to 8d per lb.—GANLY, SONS AND CO.

Edinburgh, Wednesday.—Trade in cattle very stiff; polled bullocks brought to 16 guineas; black polled bullocks to £16; Shorthorned cows to £24. Sheep were a good show, season Cheviot dinmonts sold 33s to 38s; Oxford cross lambs, 30s to 35s.

Exeter Friday.—Immense supply of fat cattle, but only the choicest realised late prices; good many fat cows unsold. Large quantity of sheep, chiefly breeding ewes. Small shorn wethers and lambs 9d; lambs, in wool, 10d to 10½d.; ewes, 6½d; breeding ewes, 42s to 53s; all sold; numerous buyers; calves 7d.

Glasgow, Wednesday.—Larger supplies of cattle; for prime handy weights a good selling trade was experienced; secondary and heavy were easier; top, 64s to 67s per cwt; secondary, 58s to 60s. Sheep and lambs in large numbers, prices a shade easier; prime hogs and wethers in good request; secondary cheaper; lambs not a good inquiry; best mutton, 9¾d to 10d; secondary, 9d to 9½d; lambs, 9d to 10½d.

Hereford, Wednesday.—Moderate supply of beef; trade fairly firm; best quality bullock and heifer 6½d to 6¾d, and in some instances 7d; cow beef, 5d to 6d. Calves were a fair supply, veal being firm at 7d. Sheep were a short supply with brisk trade; best wether mutton, 8½d; ewe, 6d to 7d. Fat lambs fair trade at 10d per lb. Pig trade quiet, supply small; porkers, 5½d; store pigs cheap. Store cattle small supply and trade dull.

Leicester, Saturday.—Good average supplies of home-bred stock, buyers well represented, and trade was active for choice lots at high rates. Choice milch cows, £20 to £21; good lots, £17 to £18 10s; secondary, £14 to £16; Shorthorn bullocks, £14 to £16; Irish bullocks choice, £19 to £20; good lots, £15 to £17 10s; Welsh cattle, £10 to £15 10s; young stock, £5 to £8; calves, 20s to 40s each.

Lincoln, Friday.—A small consignment of horned stock, and business ruled dull. Young beasts, £9 to £13; milch cows, £17 to £21. The sheep trade was brisk. Drape ewes 40s; young ditto, 50s; and lambs, 36s to 41s each.

Lynn, Tuesday.—An average show of fat beasts met a firm trade, and made from 7s 6d to 8s per stone. Stores in larger supply experienced a slow trade, and realised from £6 to £16 each. Fat sheep in average numbers met a firm trade, realising from 9s 6d to 10s per stone, stores from 45s to 50s each. Fat lambs 36s to 40s; stores, 25s to 35s.

Manchester, Friday.—Beef: Firsts, 5¾d; seconds, 4¾d to 5¼d; thirds, 3½d to 4½d. Mutton: Firsts, 7¾d; seconds, 6¾d to 7¼d; thirds, 5¾d to 6½d. Veal.: Firsts, 6½d; seconds, 5½d to 6d; third, 4½d to 5d. Lamb: Firsts, 8d; seconds, 7½d to 7¾d.

Newcastle, Tuesday.—Cattle were a rather smaller supply, and trade was of a holiday nature, and slow all round, but prices remained unchanged. Quotations:—Prime heifers, 8s 3d to 8s 6d; second class, 7s 9d to 8s; prime steers, 8s to 8s 3d; second-class, 7s 6d to 7s 9d; coarse and inferior, 6s 6d to 7s per stone, sinking the offal. Sheep and lamb: Trade was slow, but the only change in prices was an advance of ¼d for ewes and rams. Quotations:—Choice young sheep, 9d to 9¼d; strong heavy, 8¾d to 9d; choice lambs, 9¾d to 10d; second-class, 9½d to 9¾d; ewes, 6d to 7¼d; rams, 5d to 6½d per lb. Trade in veal was steady at 6d to 7½d per lb.

Newport, Wednesday.—Average supply of cattle. Very short supply of sheep and lambs. Fair number of calves. Good attendance of buyers. Exceptionally brisk trade in sheep and lambs owing to scarcity. Best beef, 6¾d to 7d per lb; seconds, 6½d to 6¾d; cows, 5d to 5½d; best wether mutton, 8½d to 8¾d; ewes, 7d to 7½d; lamb, 9d to 9½d; calves, 7d to 9d; porker pigs, 10s 3d to 11s per score.

Norwich, Saturday.—Trade for fat cattle unchanged, the best making from 7s to 8s 3d per 14 lb stone. Fat sheep met a good trade, last week's prices being fully maintained. Rather a small show of fat pigs, but the quality was good, and trade slightly better, both porkers and bacon pigs realising from 6s 3d to 6s 9d per stone, and sows 5s 3d. Store cattle were good, and the best met a good trade, smaller ones being slower to sell; three year-olds sold at from £15 10s to £20; two-year olds of secondary class, £12 10s; and smaller sorts from £5 10s to £10 10s per head. Good show of store calves which met a slow trade at from 18s to 45s per head. Store sheep were of good quality, shearling ewes making from 60s to 74s, two-year olds from 52s to 59s, and and others from 45s to 51. Lambs were of good quality, and sold dear at 31s to 44s per head. Small show of store pigs, but trade was better at from 13s to 25s per head.

Nottingham, Saturday.—Shorter supply of stock, but trade was slightly brisker. In-calf cows made £17 to £19 10s; and heifers, £13 10s to £15 10s. Calves, of which there was a smaller show, made about 45s. A few sheep sold as usual.

Preston, Wednesday.—Local-fed cattle were scarce and dear. Trade was slow at the following quotations:—Local-fed heifers, 7d; Irish heifers, 6¾d to 7d; young cows and bulls, 6¼d; secondary quality, 5d to 5¾d; lambs, prime quality, 9¼d; ditto coarse and inferior, 9d; hoggs, 8¾d; choice young ewes, 7d; rough ewes and tups, 6¼d; calves, 7¼d per lb.

Retford, Saturday.—Very small show and slow trade. Heifers made £11 to £14; cows, £14 to £17; drapes, £8 to £11; and calves, 30s to 35s each.

Romford, Wednesday.—Average supply of fat beasts; trade about the same. Best animals, 4s 4d to 4s 6d; middlings, 4s to 4s 2d per stone. Calves in average supply; trade slow at 5s to 5s 2d per stone. Sheep in average supply; trade better. Best small sheep, 5s 8d to 6s; large, 5s 4d to 5s 6d per stone. Ewes in average supply; trade slow at 4s to 4s 2d per stone. Lambs in short supply; trade a little better at 6s 8d to 7s per stone. A few store beasts on offer; slow demand. Good supply of milch cows; trade slow. Pigs in short supply; slow trade. Small porkers, 3s 8d to 4s; large hogs, 2s 8d to 3s per stone.

Sheffield, Tuesday.—Moderate supplies. Trade weak. Small attendance. Best milch beasts, £17 to £18 10s; young stock, £12 to £15.

Shrewsbury, Tuesday. Owing to the holidays and harvesting operations there was a small market. Quotations:—Beef, 6½d to 7d per lb; mutton (wether), 9d to 9½d per lb; ewes, 7½d to 8d per lb; lamb, 9½d to 10d per lb; veal, 7½d to 8d per lb; porket pigs, 9s 6d to 10s 6d per score.

Stockton, Wednesday.—Trade was slow for the best cattle, which made from 8s to 8s 6d per stone. Rougher kinds made 6s 6d to 7s per stone. Sheep met a slow trading, lambs selling at 10d per lb, young sheep, 9d and 9½d, ewes 7d to 7½d, and tups 6½d per lb. Porker pigs sold at about 7s per stone, and cows up to 6s per stone.

Thame, Tuesday.—For a holiday market there was a capital entry of stock and a fair attendance of buyers. Beef was in good demand and realised more money than the previous week, choice maiden heifers selling well. There was a limited supply of sheep, which made more money, but possibly on account of the smaller supply. Messrs. Bond and Burrows have a capital entry of stock for next Tuesday, some choice Vale fed cattle being already entered. Messrs. Bond and Burrows' sale comprised 77 fat beasts, 124 fat sheep, 50 fat and weaning calves, and 28 fat and store pigs. Fat oxen made from £16 to £22 5s; fat heifers, £14 to £20 2s 6d; fat ewes, 40s to 54s; fat wethers, 50s to 58s 6d; fat lambs, 32s to 46s; fat calves, £3 10s to £4 2s; weaning cow calves, 30s to 60s; bull calves, 15s to 48s; porkers, 36s to 42s; store pigs, 14s to 21s.

Wolverhampton, Wednesday.—Fair supply with slow trade. Beef, 5½d to 7d per lb; mutton, 6½d to 9d per lb; lamb, 9d to 9½d per lb; veal, 6½d to 7½d per lb.

FEEDING STUFFS.

Liverpool, Friday.—Fertilisers all round are quiet on the spot, yet values are firm, and for forward deliveries some enquiries are experienced for phosphatic manures, The consumption demand for feeding stuffs is practically nil, yet values on the whole are fully maintained.

—H. JONES LANGAR AND CO.

Mark Lane, Monday.—Linseed Cakes: The of the market is distinctly better, and already home manufacturers are disinclined to operate at the old figures, while both Russian and American shippers demand almost prohibitive prices in forward positions. Russians now in warehouse continue to find buyers at last week's quotations. East India seed pures move off readily. Fine seedy Calcuttas have changed hands at late rates. London made attract more attention. Cotton Cakes.—The trade has not yet recovered from the recent heavy arrivals, and there are still sellers at a shade under last week's prices, while English, on the other hand, are the turn dearer. Decorticated: London-made pure meet a free sale, as also does the special digestive meal, while American brands of cake and meal are neglected. Rape cakes are quiet but firm. Maize Germ Meal.—A small lot of White American is held above the market, but English makes are obtainable on fairly reasonable terms. Maize gluten meal is in good request. Rice Meal.—Landed lots of Rangoon go quietly into consumption at full prices; but some business

is reported at £4 13s 9d ex ship terms for afloat parcels. Locust beans are without change. Dried brewers' grains offer sparingly, and have an upward tendency. Nitrate of soda is unaltered.

WOOL.

London, Saturday.—English—per pk. of 240 lb.—Fleeces, South Down hoggs, £14 to £15; half-bred hoggs, £13 to £13 10s; ditto wethers; £12 10s to £13; Kent fleeces, £12 5s to £12 10s; South Down ewes and wethers, £13 10s to £14; Leicester ewes and wethers, £12 to £12 10s. Colonial—per lb.—Vic., scoured super., 2s 2d to 2s 3d; scoured, good, 1s 11½d to 2s 1d; scoured, average, 1s 10d to 1s 11d; greasy, average to fair, 1s 1½d to 1s 2½d; N.S.W., scoured, average, 1s 9½d to 1s 10½d; greasy, average, 1s to 1s 1d; S. Aus., greasy, average, 10d to 11d; N.Z., scoured, average, 1s 10d to 1s 11d; greasy, average, 11d to 11½d; Cape, scoured, super., 1s 9½d to 1s 10½d; fleece, average, 9½d to 10½d; greasy, average, 8½d to 9½d; Natal, scoured, 1s 5½d to 1s 6½d; greasy average, 8½d to 9d. Crossbreds—grs.—Vic., good to super., 1s 3½d to 1s 4½d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s to 1s 1d; coarse, 10d to 11d.

Canterbury, Saturday.—Business is on a small scale. Kent fleeces, 10½d to 11d; lamb's wool, 7d; locks, 5d; half-bred fleeces are making 11d.; and Downs from 12d to 13d per lb.

Halifax, Saturday.—Business is rather quiet, in view of many local holidays. There is a fair inquiry for home-grown wools. Irish descriptions are now quite firm, and Down wools are improving, but, as a rule, there is no change in price on the week for other kinds.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Plentiful supplies of fruit and greenstuffs at market, the demand generally being brisk. Quotations for English produce:—Grapes, 6d to 2s; peaches, 1s 6d to 8s perdozen; green figs, 2s to 4s; nectarines, 1s 6d to 8s per dozen; melons, 9d to 2s each; pears, 3s to 5s per bushel; raspberries, 3s 6d to 4s per dozen punnets; apples, 2s 6d to 6s 6d per bushel; cherries, 2s 6d to 6s 6d; gooseberries, 1s 6d to 2s 6d; plums, 2s to 3s 6d per half sieve; tomatoes, 3s to 3s 6d per 12 lb; vegetable marrows, 1s 6d to 3s; endive, 1s 6d per dozen; cucumbers, 5s 6d to 6s 6d per flat; green peas, 3s to 4s 6d per bag; ditto, 1s 6d to 3s per bushel; beetroots, 1s 3d to 1s 6d; carrots, 2s to 2s 6d; turnips, 2s to 2s 6d; parsley, 1s 3d to 1s 6d; mint, 1s to 1s 3d per dozen bunches; cos lettuce, 6d per score; mushrooms, 7s 6d to 12s per 12 lb; broad beans, 1s per bushel; onions, 1s to 1s 6d per dozen bunches; horse radish, 10s 6d to 15s per dozen bundles; cabbage, 3s to 4s per tally; cauliflowers, 1s 6d to 2s per dozen; green artichokes, 2s per dozen; potatoes, 85s to 95s per ton.

POULTRY AND GAME.

Smithfield, Saturday.—Trade moderate for good supplies. Prices: Goslings, 4s to 5s; country ducks, 2s to 2s 9d; Aylesbury ducks, 2s 3d to 3s; Irish fowls, 1s 8d to 2s 3d; Essex fowls, 2s to 2s 9d; Lincolnshire fowls, 2s to 2s 9d; Surrey fowls, 3s 6d to 4s 6d; Sussex fowls, 3s 6d to 4s 6d; quails, 6d to 2s 3d; feathered pigeons, 10d; Bordeaux pigeons, 10d to 1s 2d; tame rabbits, 1s 3d to 1s 6d; wild rabbits, 6d to 8d; hares, 1s 6d to 1s 9d each; Australian rabbits, 6s 6d per doz.

CHEESE.

Glasgow, Wednesday.—Arrivals of home cheese moderate, with a quiet trade passing. Sellers are inclined to meet buyers. Cheddars, 56s to 60s per cwt. Dunlops, 54s to 58s. The latter are in chief request, especially for parcels which will come in at a retail 8d per lb. Cut Canadians stiffer.

Highbridge, Tuesday.—A fair attendance of buyers, and all cleared. Best Caerphilly dairies realised up to 48s per cwt.; secondary dairies, 44s to 46s 6d; and other dairies, 38s to 42s. A few inferior lots failed to reach 35s. Cheddars, 53s 6d to 56s; Truckles, 53s to 55s doubles, 50s to 53s.

Newport, Wednesday.—About ten tons were pitched. There was a fair demand, and an average attendance. Quotations:—Caerphillies, 35s to 45s per cwt; fancy dairies, 46s to 48s; Derbies, 50s to 60s; truckles, 58s to 62s; doubles, 56s to 58s.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending August 6, 1907:—

| | | |

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

Wheat harvest is now in progress, but the very unsettled weather causes frequent interruptions. There will be great irregularities in the yield. The French wheat crop is now for the most part secured, and the yield is a good deal better than many expected. It is probably up to a full average in quantity, though its unusually soft state for the most part causes a deficiency in supplies fit for milling. The German crops are disappointing, and much injured by the incessant rains. In the case of rye this is especially dangerous.

A feature of the past fortnight has been the fall in India of record rains, ninety three inches in the Bombay Presidency, and much above the mean in those of Madras and Bengal. Heavy floods have naturally resulted, but in the main the result should be favourable to Indian agriculture, and the sowings of wheat in September and October are likely to exceed an average, especially in the North-West.

Wheat growing in Eastern Bengal has been almost completely abandoned of recent years, other crops paying better, and the saving on freights causing the ports like Karachi, which look towards Europe, to have the pull over those like Calcutta which are turned to the Orient. The area under wheat in Eastern Bengal, which has Calcutta for its capital and chief port, has fallen to 156,000 acres, out of 8,342,000 acres diverted to agricultural crops. The yield for 1907 is put at 220,000 qr.

The American advices continue to show considerable intrinsic strength. The daily telegrams of fluctuations have little to do with the actual state of affairs. The average price of wheat at New York as cabled on Saturday thus compares with the like date in recent years:—

August 17, 1907	30s. 9d.	per qr.
,, 18, 1906	26s. 0d.	,,
,, 19, 1905	29s. 0d.	,,

The rise of 4s. 9d. on the year makes it difficult to ship new crop wheat at a profit, though very low freights probably render it just practicable.

Board of Agriculture averages for the month of July include the following returns of interest to the corn trade:—

Wheat at Mark Lane	33s. 3d.	per qr.
Barley ,,	26s. 3d.	,,
Oats ,,	21s. 4d.	,,
Wheat at Norwich	31s. 7d.	,,
Barley ,,	25s. 1d.	,,
Oats ,,	20s. 7d.	,,
Wheat at Peterborough	32s. 4d.	,,
Barley ,,	24s. 1d.	,,
Oats ,,	20s. 6d.	,,
Wheat at Paris	46s 6d.	,,
Barley at Paris	27s. 9d.	per qr.
Oats ,,	22s. 6d.	,,
Wheat at Breslau	44s. 4d.	,,
Barley ,,	2-s 4d.	,,
Oats ,,	25s. 8d.	,,

The Board of Agriculture is to be thanked for the Breslau returns, which are in many ways more representative of Germany than those of Berlin.

Wheat gradients last week were very moderate, as there are no cheap markets, and at the same time, no very dear ones. At Canterbury the price rose to 37s. before supplies of old corn dried up altogether.

Chichester	36s. 1d.	per qr.
Salisbury	32s. 11d.	,,
Range	3s. 2d.	per qr.

Barley has also had a moderate range:—

Mark Lane	28s. 3d.	per qr.
Chelmsford	24s. 2d.	,,
Range	4s. 1d.	per qr.

Oats have fetched good prices at nearly all the English markets, and quite fancy quotations have been realised in Scotland.

Doncaster	21s. 9d.	
Peterborough	20s 5d.	
Range	1s. 4d	per qr.

Sales of British wheat at the statute markets since harvest have been as follows:—

This season ... 2,662,000 qr. at 27s. 7d. per qr.
Last ,, ... 2,906,000 qr. at 28s. 10d. ,,

Sales of British barley have been larger than last season:—

This season ... 3,369,600 qr., at 24s. 5d. per qr.
Last ,, ... 3,202,500 qr., at 21s. 3d. ,,

Sales of British oats have been exceedingly heavy for forty-seven weeks out of the forty-nine, but for the last fortnight have fallen short even of the usual low figure for August.

This season 1,177,000 qr. at 18s. 4d. per qr.
Last ,, 914,000 ,, 18s. 6d. ,,

Imports last week into the United Kingdom were:—

Wheat, 421,500 qr.: a fairly good supply.
Flour, 79,300 sacks: very small arrivals.
Barley, 15,000 qr.: extremely small supplies.
Oats, 136,000 qr.: good imports.
Maize, 270,000 qr.: liberal arrivals.

Since September 1 arrivals from abroad have been:—

Wheat, 20,591,500 qr.: fairly good supply.
Flour, 5,143,300 sacks: less than usual.
Barley, 5,145,000 qr.: a mediocre supply.
Oats, 4,723,000 qr.: less than usual.
Maize, 11,003,000 qr.: a good supply, but not as it would seem in excess of the current inquiry.

In August, 1906, the receipts of foreign breadstuffs were in the following proportion:—

American	32	per cent.
Indian	26	,,
Russian	6	,,
Australasian	10	,,
Argentine	17	,,
Various	9	,,
Total	100	,,

It will be interesting to see how the proportions vary this year. Probably we shall have more Russian and Australian, less Indian and Argentime. The American item is a yet indeterminate, as vessels get across the Atlantic in less than a month.

The quantity of wheat on passage shows a slight decline on the week:—

Californian	234,000 qr.
American	335,000 ,,
Russian	75,000 ,,
Indian	741,000 ,,
Argentine	230,000 ,,
Australasian	505,000 ,,
Various	50,000 ,,
Total	2,170,000 qr.
A week ago	2,255,000 qr.

The quantity of flour has fallen on the week from 168,000 to 156,000 sacks, and of maize from 1,030,000 qr. to 940,000 qr., but the quantity of oats has increased from 80,000 qr. to 90,000 q., of barley from 155,000 qr. to 180,000 qr., and of linseed from 248,000 qr. to 253,000 qr.

Shipments last week were moderate from the United States of America, including 223,000 qr. of wheat, 73,000 sacks of flour, 112,000 qr. of maize, 14,000 qr. of oats, and 10,000 qr. of barley.

Shipments from Argentina were rather small, including 100,000 qr. of wheat, 130,000 qr. of maize, 19,500 qr. of linseed, and 2,950 qr. of oats

Shipments from Russia showed a large export of new barley. Total quantities were:—Wheat, 170,000 qr.; barley, 310,000 qr.; oats, 114,000 qr.; and maize, 91,000 qr.

Shipments from Roumania were:—65,000 qr. of wheat, 27,000 qr. of barley, 2,000 qr. of oats, and 190,000 qr. of maize.

Other shipments of the week have been 10,000 qr. of maize from Salonica, 86,000 qr. of wheat and 39,000 qr. of linseed from India, 15,000 qr. of wheat from Australia, and 5,000 qr. of wheat from New Zealand.

THE BALTIC.

The market for wheat cargoes is dull but steady, with prices about as follows:—

	On passage.	Sept. shipment.	Nov. shipment.
Red-winter, per 480 lbs.	—	34s. 6d.	35s. 6d.
Argentine, per 480 lb.	33s 9d.	33s. 6d.	33s. 6d.
White Karachi, per 492 lb.	35s. 0d.	34s. 6d.	34s. 6d.
Red Karachi, per 492 lb.	34s. 6d.	34s. 3d.	34s. 0d.
Best Russian winter, per 492 lb.	36s. 0d.	35s. 6d.	35s. 0d.
Odessa Ghurka, per 492 lb.	33s. 0d.	33s. 0d.	32s. 3d.
Best Californian, per 500 lb.	35s. 3d.	35s. 0d.	35s. 0d.
Best Australian, per 480 lb.	34s. 9d.	36s. 0d.	36s. 6d.

There are offers to ship fine Manitoba at 35s. 9d. per 480 lb, but the buyers at this price are not forthcoming, though at 35s. 6d. it is said that a little trade might pass.

Maize cargoes are quiet at 24s. for round, 22s. 9d. for yellow, and 23s. 9d. for flat, all per 480 lb. A cargo of Californian barley has made 30s. 6d. per 448 lb, and one of South Russia oats 15s. 9d. per 304 lb, both for prompt shipment.

With Germany bidding 31s. 6d. for Russian rye of the new crop, it is not likely that there will be consignments to the United Kingdom, where 30s. is not exceeded.

Several small cargoes of Indian peas have been placed for September shipment at 33s. to 34s. per qr. These are white peas weighing 504 lb.

Owing to the dearness of Egyptian cottonseed cargoes are being offered for September shipment Brazil at £6 10s. per ton. Brazil is also offering to ship cottonseed at 14s. per cwt. A cargo of Turkish canary seed was placed on Saturday at 38s. per qr.

POULTRY AND GAME.

Smithfield, Saturday.—Demand inactive; supplies good. Young grouse, 5s to 6s 6d; old grouse, 2s 6d to 3s per brace; Irish fowls, 1s 4d to 2s; Lincolnshire fowls, 1s 6d to 2s 9d; Essex fowls, 1s 6d to 2s 6d; Sussex fowls, 2s 6d to 3s; Surrey fowls, 3s 6d to 4s; country ducks, 2s to 2s 6d; Aylesbury ducks, 2s 3d to 2s 6d; goslings, 4s 6d to 5s; quails, 1s 6d; Bordeaux pigeons, 10d to 1s; feathered pigeons, 9d; live hens, 1s 3d to 1s 9d; tame rabbits, 1s 2d to 1s 6d; wild rabbits, 6d to 8d each; Australian rabbits, 6s 6d per doz.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Plentiful supplies of fruit and green-stuffs, for which there was a steady demand. Quotations for English produce:—Grapes, 6d to 2s; nectarines, 2s to 10s; green figs, 1s 6d to 3s 6d per dozen; melons, 9d to 2s; peaches, 2s to 10s per dozen; apples, 2s to 7s per bushel; cherries, 3s to 7s; gooseberries, 1s 6d to 2s 6d per half sieve; tomatoes, 3s 6d to 4s; pears, 2s to 4s 6d per bushel; greengages, 2s to 6s 6d per half-sieve; ditto, 9d to 1s 6d per box; plums, 1s to 2s 6d per half sieve; filberts, 4s 6d to 5s per 12 lb; mushrooms, 8s 12s per 12 lb; cucumbers, 4s 6d to 6s per flat; onions, 4s 6d per dozen bunches; broad beans, 1s to 1s 6d; scarlet runners, 1s 9d to 2s 3d per bushel; cabbage, 3s to 4s; vegetable marrows, 3s to 4s per tally; turnips, 1s 6d to 2s 3d; carrots, 1s 6d to 2s; mint, 1s to 1s 3d; parsley, 1s 3d to 1s 6d per dozen bunches; endive, 1s 6d per dozen; cos lettuce, 6d per score; green peas, 3s to 4s 6d per bag; ditto, 2s to 4s per bushel; horse radish, 10s 6d to 15s per dozen rolls; green artichokes, 2s to 2s 6d per dozen; potatoes, 50s to 75s per ton.

WOOL.

London, Saturday.—English—per pk. of 240 lb.—Fleeces, South Down hoggs, £14 to £15; half-bred hoggs, £13 to £13 10s; ditto wethers, £12 10s to £13; Kent fleeces, £12 5s to £12 10s; South Down ewes and wethers, £13 10s to £14; Leicester ewes and wethers, £12 to £12 10s. Colonial—per lb.—Vic., scoured super., 2s 2d to 2s 3d; scoured, good, 1s 11½d to 2s 1d; scoured, average, 1s 10d to 1s 11d; greasy, average to fair, 1s 1½d to 1s 2½d; N.S.W., scoured, average, 1s 9½d to 1s 10½d; greasy, average, 1s to 1s 1d; S. Aus., greasy, average, 10d to 11d; N.Z., scoured, average, 1s 10d to 1s 11d; greasy, average, 11d to 11½d; Cape, scoured, super., 1s 9½d to 1s 10½d; fleece, average, 9½d to 10½d; greasy, average, 8½d to 9½d; Natal, scoured, 1s 5½d to 1s 6½d; greasy average, 8½d to 9d. Crossbreds—grs.—Vic., good to super., 1s 3½d to 1s 4½d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s to 1s 1d; coarse, 10d to 11d.

Canterbury, Saturday.—Kent fleeces are still quoted at 11d, with lamb wool at 7d, and locks 5d; half-bred fleeces 11d, and Downs 13d to 13½d per lb.

Halifax, Saturday.—As the holiday season is drawing to a close, there is a renewal of activity, and a very confident feeling as to the future of business. The market for home-grown wools has been very favourably affected by the demand for America, chiefly for long wools; hence for some descriptions, including North hoggs, values are quoted ¼d up on the week.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English steady, quiet; whites quoted at 35s, 37s, reds at 34s 6d, 36s 6d. Foreign slow, unchanged. No. 1 Northern Manitoba, ex ship, quoted at 36s 3d, landed at 36s 9d, 37s; No. 2 Northern Manitoba, ex ship, at 35s 6d; choice white Karachi, at 35s; red Karachi, at 34s 6d; Australian, landed, at 36s 6d, 37s; South Russian, 34s, 37s; La Plata, 36s, 37s. Flour dull, unaltered, Iron Dukes, ex ship, quoted at 22s; landed, at 22s 6d. Maize steady, quiet; mixed American, ex ship, to arrive, quoted at 24s 3d; landed, 24s 6d; Odessa, landed, at 23 6d; River Plate, landed, at 23s 6d. Barley steady, inactive; Azoff-Black Sea, ex ship, to arrive, quoted at 22s, 22s 9d as to position; Persian, ex ship, 22s 3d; landed, 22s 9d; Karachi, landed, at 23s 6d. Oats slow, unchanged; La Plata quoted at 17s 6d, 17s 9d; South Russian and Danubian, at 17s, 17s 6d.

Mark Lane, Friday.—Wheat: English and foreign steady, but demand slow. No. 1 Northern Manitoba, ex ship, held at 33s 3d; No. 2 at 35s 6d; No. 1 hard Manitoba at 37s; choice white Karachi at 35s; red Karachi at 34s 6d; South Russian, landed at 34s to 37s; La Plata at 35s 6d to 37s 6d; Australians at 36s 6d to 37s. Flour quiet, unchanged. Iron Dukes quoted at 22s to 22s 6d; Hungarians at 35s 6d to 36s; Minnesota patents at 27s to 28s. Maize steady, quiet. River Plate, landed, quoted at 23s 3d to 23s 6d; Odessa, at 23s 4½d; Galatz-Foxanian at 23s 6d. Barley quiet, unchanged; Azoff-Black Sea, ex ship, to arrive, held at 22s to 22s 6d, as per date of arrival; Persian, ex ship, to arrive, at 22s 3d; landed, at 22s 9d. Oats slow, unchanged. La Plata held at 17s 6d; South Russian (38 lb) at 17s to 17s 6d as per sample.

COUNTRY.

Ashford, Tuesday.—Trade very restricted, but tone firm. A few samples of winter barley and new peas were shown, but not sold. Wheats made 34s to 37s; English barley, 28s to 29s; foreign grinding barley, 26s to 27s; mazagan beans, 30s to 31s; tick beans, 33s to 34s; maize, 25s to 26s; white oats, 22s to 25s; black oats, 21s to 24s; grey peas, 32s to 33s.

Banbury, Thursday.—Wheat, white, 33s 6d to 34s per qr; wheat, red, 33s 6d to 34s per qr; barley, old, 28s to 30s per qr; beans, old, 31s 6d to 32s per qr; oats, old, 17s 6d to 25s per qr; peas, old, 28s to 34s per qr.

Berwick, Saturday.—The market was thinly attended, with only a few samples of oats on offer, which sold at late rates.

Birmingham, Thursday.—The market was poorly attended, and trade drags slowly along, buyers being scarce. Quotations:—Foreign wheats, No. 1 Manitobas, 36s 3d per 496 lb, Bristol; River Plate, 34s 9d to 35s 6d; Russians, 33s to 34s per qr at Sharpness; Bessarabian maize, 23s 9d per 480 lb, Sharpness; Galatz-Foxanian, 23s per qr at Bristol; grinding barley was 6d lower at 25s per 400 lb, Sharpness. There was a scarcity of English wheats, top value for same being 13s 6d per 186 lb delivered. Oats a better trade at from 22s 6d to 23s per 312 lb; beans, 13s 3d per 196 lb, delivered.

Brighton, Thursday.—Quiet trade and small attendance. Prices as last week. Barley, 28s to 33s; grinding barley, 24s to 25s; oats, English, 20s to 23s; peas, 30s to 31s; beans, 33s to 34s.

Bury St. Edmunds, Wednesday.—Wheat, with a very small supply, was quiet and without change at 34s to 35s per qr. Barley for grinding is very firm at 29s to 30s per qr. Oats firm and unchanged at 22s to 24s per qr. Beans slow at 31s to 31s 6d per qr. Maize unchanged. Galatz Foxanian, 25s; American flat, 26s per qr delivered. Other feeding corns, cakes, and offals firm at last week's prices.

Canterbury, Saturday.—There were but few samples of new corn on offer to-day, the wet weather having interfered with threshing. Some good grey peas changed hands at 30s 6d, and black winter oats, scaling 43 lb to the bushel, were selling at 20s 6d. Old corn is quite as dear, wheat making up to 38s and 39s, and barley from 27s to 29s. A good inquiry for old oats and peas continues, from 31s to 33s per qr.

Carlisle, Saturday.—Very small supply of oats in our market to-day. Good attendance of buyers, and quick sales at last week's prices—24s 6d to 24s 9d per 336 lb.—Thomas Robinson.

Chester, Saturday.—A good demand for all classes of feeding stuffs. English wheat exhausted. English oats firm, and occasionally dearer. Foreign barley continues firm, and bran and thirds a turn dearer. Quotations: Grinding barley, 3s 9d to 4s per 64 lb; beans, new, 5s 6d to 5s 9d; old, 6s to 6s 6d per 80 lb; oats, new, 2s 11d to 3s 2d; old, 3s 2d to 3s 6d per 46 lb; Indian corn, new, 13s to 13s 3d; old, 13s 6d to 13s 9d per 240 lb; round corn, old, 12s 9d to 14s per 240 lb.

Chichester, Wednesday.—Small quantity of new oats on offer, which readily sold. Trade in general slow. Old white wheat, 36s to 36s 6d; old red wheat, 36s to 36s 6d; barley, 28s to 32s; grinding barley, 21s 9d to 22s 6d; oats, English, 18s to 24s; rye, 26s to 27s; maize, 23s 6d to 24s 6d.

Colchester, Saturday.—Wheat nominal price 36s. New oats small supply.—Colin Taylor, King and Co., Ltd.

Coventry, Friday.—Fair supply of wheat, which met a good demand at last week's figures. Practically no spring corn in farmer's hands. Nominally prices firm, without change. Quotations: Wheat, 12s 3d to 12s 9d per 186 lb; barley, 30s to 34s per 448 lb; peas, 12s to 14s; beans, 13s to 13s 9d per 196 lb; oats, 24s to 26s per 352 lb.

Derby, Friday.—Wheat in limited supply, and a firm trade at recent rates. Oats and beans showed an upward tendency. White wheat, 37s to 38s; grinding barley, 23s to 25s; beans, 35s to 37s; oats, 24s to 26s.

Devizes, Thursday.—No change reported in the value of corn, but last year's crop practically exhausted. Although no new samples have appeared here, there have been heavy sales at other West of England markets. New winter oats have been realising from 18s to 20s per qr, according to weight, and winter barley has made from 24s to 26 per qr. Best wheat, 17s to 18s; secondary, 16s to 16s 6d; malting barley, 24s to 30s; feeding, 22s to 24s; old oats, 20s to 24s; new beans, 15s 6d to 16s 6d; fine flour, 27s to 30s; extra fine, 32s to 36s.

Doncaster, Saturday. — Small attendance, and a poor supply of grain. English wheat, 13s 6d per load. Only a dull trade in foreign wheat. Other things unchanged.

Dublin, Friday.—Foreign wheat in fair demand at late rates. Maize 3d down. Irish wheat quiet. Oats firmly held, but a slow and limited demand. White, 13s 6d to 14s; black, 12s 3d to 13s 6d.

Glasgow, Wednesday.—There was the usual attendance at the market to-day. Wheat the turn easier. Flour quiet, with prices nominally unaltered. Maize unchanged. Corn firm at 1½d per boll up on the week. Oats quiet, and in buyers' favour. Beans and pease steady. Barley unaltered. Bran and thirds 2s 6d per ton dearer. Oatmeal firmly held.—Gibson and Clark.

Glasgow, Friday.—Corn market quiet, with a slow sale passing, and prices nominally unchanged from Wednesday.

Gloucester, Saturday.—No English wheat offering; prices nominal. Foreign wheat firm, unchanged. Plates, 35s 9d to 36s; Russians, 32s 9d to 34s 9d. Plate maize, 23s 9d, Sharpness; flat, 24s; Avonmouth-Bessarabian, 24s, Sharpness. Barley, 25s 3d, Sharpness. Oats, 20s 6d to 21s (white), 22s 6dto 23 (black).

Grantham, Saturday.—Small supplies, and very little business doing. Wheat firm at 36s per qr; beans unchanged at 3s for best samples. No new oats on offer.

Hereford, Wednesday.—Hardly any samples on offer. English wheats maintained last week's prices. Oats were in rather better demand Maize slightly easier. Barley, nothing doing. Wholesale quotations:—Wheat, 4s to 4s 3d per 62 lb; barley, 3s 6d to 4s per 56 lb; oats, 2s 9d to 3s per 40 lb; beans, 4s to 4s 3d per 65½ lb; maize, 3s to 3s 3d per 60 lb.

Ipswich, Tuesday. —Very little wheat on offer; trade quiet at last week's rates. Prices:—Reds, 34s to 35s; whites, to 35s 6d per 504 lb. Grinding barley firm. Oats rather dearer. Maize 6d per qr dearer. Beans and peas firm.

Leeds, Wednesday.—Though not of a forcing character, the weather has not been unfavourable during the past fortnight. Quietness still rules in the trade; it cannot be doubted, however, that the world's wheat crop is more or less deficient, and the recent decline in America and reflected to a less extent here is mainly due to financial troubles. Holders and shippers generally remain firm, prices being only slightly lower than two weeks ago. Maize rather easier. Beans and oats unchanged.

Leeds, Friday.—English wheat, owing to short supplies and unfavourable harvest prospects, was firmly held at an advance upon Tuesday's prices. There was no change in foreign wheat, except Indians, which were 3d cheaper. Flour was in good demand, mostly upon medium qualities, at prices ranging from 25s to 28s. Plate and Odessa maize was easier, closing at 23s. Foreign malting barley was dearer, at 28s to 32s. Beans, peas, and oats unchanged.

Leicester, Saturday.—Fair average attendance of buyers and dealers, with small supplies of home-grown wheats, which met a slow trade at steady rates Red wheats, 35s to 36s; white wheats, 36s to 37s per 36 stones. Grinding barley steady at 30s to 32s per 32 stones; beans firm; fine oats a better trade owing to the damage to the growing crops, good samples making 24s to 25s per 24 stones.

Lincoln, Friday.—A quiet market, characterised by an almost entire absence of English wheat, for which there was a fair demand at unaltered rates. Foreign in buyers' favour. Oats steady at late prices. Beans rather dearer.

Maidstone, Thursday.—We have experienced a variety of weather, but up to the present no intense summer heat to quickly ripen the corn, so that a later harvest than usual the result, and as the stock of old wheat is nearly exhausted, the display of samples at the market scanty. The reason, therefore, for the continued firm tone is obvious, and the full prices of last week were obtainable to-day, and an occasional advance of 6d per qr. Barley is remarkably firm, as the English is in low compass, and the foreign arrivals unusually moderate. Best English oats are dear, and but little display of them. The cost of foreign is a trifle less than recently, and much of it to hand in unsweet state produces considerable altercation between buyer and seller. Maize seems to hold its own well, especially good sound corn, though the faulty parcels are sold at a reduction to get rid of them. The few winter oats and rye of the new crop do not settle down to consolidated value at present.

Manchester, Thursday.—English and Indian wheat ruled firm, while Plate and Manitobas were about ½d lower on the week. Flour shows little change. Indian corn steady; Odessa dearer; fair quantities offering to arrive. English barley scarce; foreign firm. English oats unchanged; foreign, 1d to 1½d higher. Beans 3d per qr dearer. Peas steady. Bran, &c., about 6d per load higher.

Newark, Wednesday. — Fair attendance, hardly anything showing. Prices firm, but trade slow. Quotations:—Wheat, white and red, 36s to 37s; barley, malting, 29s to 30s; grinding, 26s 6d to 28s; oats, white, 23s to 24s; black, 22s 6d to 23s; beans, 34s to 35s per qr.

Newcastle-on-Tyne, Saturday. — A slow demand for wheat was experienced to-day at our market at last week's prices. A fair consumptive demand for maize at fully late rates. Oats of all kinds are dearer; buyers are forced to pay the advance. Beans and peas dearer by 6d per qr on the week. No barley offering. — Joseph Pollard and Co.

Northampton, Saturday.—Small attendance and very little on offer. No new corn in the market yet. Wheat, 34s to 35s; barley, 30s to 32s; white oats, 24s to 25s; black oats, 23s to 24s; beans, 31s to 32s; peas, 30s to 32s; flour, 26s to 30s.

Norwich, Saturday.—The wheat supply of the old crop is getting very small, and prices remained firm at last week's figures, 35s to 35s 6d delivered. No new wheat is expected for a fortnight. The feeding stuff trade was quiet, with steady prices. Maize was 25s to 25s 6d per qr, and grinding barley was scarce at 26s to 26s 6d per 400 lb. There was a short supply of English oats at 22s 6d.

Nottingham, Saturday.—The little English wheat on offer made full prices. Foreign but little doing. Grinding barley still held firmly. Oats and beans in small supply; prices in sellers' favour.—Robt. Hubble.

Peterborough, Saturday.—The weather still continues unsettled, and harvest operations scarcely commenced. Very little corn at market, and prices remain nominally as of late.—Thomas Hill and Son.

Plymouth, Thursday.—Fair attendance. Wheat quite unchanged. Barley, maize steady, late rates. Oats firm.—Orlando Davis.

Preston, Saturday.—The market during the week has been pervaded by a dull feeling, and only a moderate business has passed, buyers having a slight advantage. There was only a moderate attendance to-day, and prices were on a par with those of a week ago. Little wheat or other grain was offering by farmers, who are yet busy in the hay fields. Wheat, white, new 13s 9d to 15s per windle of 220 lb; ditto red, new 13s 6d to 14s; oats, old, 3s 3d to 3s 4d per bushel; beans, 16s 6d to 17s per windle of 220 lb.

Reading, Saturday.—The attendance was fair, but the business done was not large. There was a bettet inquiry for wheat, which ranged from 33s to 37s per qr, and several parcels of oats were disposed of at prices ranging from 19s to 22s 6d. Very little inquiry for barley, beans, and peas. Flour quiet at current rates.

Retford, Saturday.—Wheat was extremely scarce at this market, and again dearer, being worth 35s to 36s per qr. All kinds of grain for feeding purposes were also increased in value, and samples were few. Indian corn, 27s; grinding barley, 26s to 27s; English beans, 33s to 34s; black oats, 20s to 22s; white ditto, 22s to 24s per qr.

Ripon, Thursday.—Small attendance of farmers,

and very few samples showing. Maize, round, 6d per qr down. Prices:—Wheat, 34s to 35s 6d; foreign wheat, 36s to 40s 6d; grinding barley, 26s to 27s; oats, 24s to 25s; round maize, 25s to 26s; flat maize, 26s to 27s per qr.

Sheffield, Tuesday.—There was only a small attendance, and trade was quiet at late prices. Maize remains firm, whilst there is an advance of 6d in wheat. Quotations:—Wheat, white, new, 34s 6d to 35s 6d; ditto red, new, 34s 6d to 35s 6d per 504 lb; oats, black, 22s 6d to 23s; ditto white, 23s 6d to 24s per 336 lb; peas, grinding, 33s 6d to 34s; ditto blue, 75s to 90s per 504 lb; beans, English, 35s 6d to 36s 6d per 532 lb; barley, grinding, 26s to 26s 6d; ditto malting, 28s to 32s per 448 lb; Indian corn, small, 25s 9d to 26s; ditto Plate, 25s 6d to 25s 9d; ditto flat, 26s to 27s per 480 lb.

Shrewsbury, Saturday.—New wheat, 14s to 15s per 225 lb; new oats, 14s to 15s per 225 lb; peas, 15s 6d to 16s per 225 lb; beans, 14s 6d to 15s per 240 lb.

Stamford, Friday.—Business was very quiet at to-day's market, and few transactions were recorded. Wheat, 34s 6d to 35s; oats, 22s to 22s 6d. No samples of barley are expected next week.

Stockton, Wednesday.—There was no English wheat showing yesterday. Foreign wheat trade was slow at last week's prices. Oats very steady. Maize 3d lower. The first new sample was shown on the market, and some black oats grown at Billingham.

Sunderland, Saturday.—Nothing doing at this day's market, and there is no change to report in the value of wheat and spring corn.—E. and F. Richardson.

Tunbridge Wells, Friday. — Quotations: White wheat, 32s to 33s; red ditto, 31s to 32s; barley, 26s to 32s; grinding ditto, 23s to 25s; oats, English, 22s to 24s; rye, 24s to 25s; peas, 32s to 37s; beans, 32s to 37s; tares, 42s to 48s; maize, 22s 6d to 24s.

Warwick, Saturday.—Few samples of corn offering, but business of a more spirited character. Prices practically unchanged.

Winchester, Saturday. — English wheat scarce and dearer. Foreign unaltered. Maize 6d, and barley occasionally 6d cheaper. Oats unchanged. Flour a fair demand, late rates.—Fear, Colebrook and Co., Ltd.

Wisbech, Saturday.—Thin attendance at market. Very little wheat offering. Reds, 34s to 35s per 504 lb; oats, 22s to 26s per 336 lb. Stormy weather retards harvest production.—James Fletcher.

Wolverhampton, Wednesday.—There was a poor attendance, and practically no business was transacted. Prices were unchanged.

Worksop, Wednesday. — Small attendance. White wheat, 33s to 34s; red wheat, 32s to 33s 6d; barley, 27s to 29s; white oats, 22s 6d to 24s 6d; black oats, 22s to 23s 6d; maize, 26s 6d to 28s; beans, 34s to 36s per qr.

Yeovil, Friday.—Millers were inquiring for home-grown wheat for grading purposes, but very little of this or any other last season's grain remains in growers' hands. Some few samples of the new crop of winter oats realised from 18s to 20s per qr, according to weight. English wheat maintained the full rates of last week, but foreign favoured buyers. Grinding barley, foreign, was likewise against sellers, being down 6d. Feeding barley, home grown, 22s to 24s; old oats, 20s to 24s; fresh white, 21s to 21s 6d; black, 19s to 19s 6d. Round maize made 23s to 23s 6d; flat ditto, 24s to 24s 3d; new beans, 15s 6d to 16s 6d. Flour favoured buyers to the extent of 6d per sack; fines quoted at 26s.

York, Saturday.—Very little wheat on offer, which remained firm. Fine white, 36s to 37s; red and mixed 35s to 36s per qr. of 36 stones; feeding barley, 28s per qr of 32 stones; hardly any offering. Oats firm; white Tartary, 21s to 22s; black, 22s to 23s; white Garton, 23s to 24s per qr of 24 stones. Beans, 32s per qr of 36 stones.

FOREIGN.

Hamburg, Saturday.—We have had less rain this week, and a good quantity of rye was carried, most of it in rather soft condition. Cutting of wheat will commence shortly. There are some complaints about potato rot. There is some demand for hard winter wheat, No. 2 selling for August-September shipment at 32s 3d to 32s 6d; red winter No. 2 is held at 31s 9d; macaroni No. 1 at 29s 3d; 79/80 ko River Plate on the spot, 33s 6d to 34s per 480 lb ex-ship here; 60 lb new Saale wheat, August-September, 34s to 34s 6d per 504 lb f.o.b. South Russian rye near at hand is held at 31s 6d to 32s 6d; September-October at 29s per 480 lb, c.i.f. Hamburg. Barley in the Saale district turns out a full crop, stout grain and useful quality, while in the eastern parts of Germany it is not so good. An English brewery bought large quantities of fine Slovakian barley at 38s 6d to 40s, which caused a firm market. Good to fine Bohemian and Moravian to arrive per barge is offering at 35s 6d to 38s 6d per 448 lb f.o.b., but our maltsters so far show no inclination to pay more than about 32s. Grinding barley quiet; South Russian on the spot, 24s 9d; July, old style, 20s 3d; August, 19s 9d; September-October, 19s 6d to 19s 9d per 400 lb c.i.f. Maize little inquired after; Odessa and Danubian, 18s 3d to 18s 6d; mixed American, 19s 3d per 480 lb c.i.f. Hamburg.—John Tatlock.

CORN STATISTICS

Weekly Arrivals into London.

August 7 to 14 inclusive.

Qr.	British.	Foreign.	Total.

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, Monday, 3 P.M.

There were a few samples of new white wheat from Kent shown, and a few of red from Essex, but prices were not quoted, there being as yet no supplies in any quantity deliverable. Condition was very soft, and the grains are very irregular, but they include some large and well formed ones.

Old English wheat was very scarce, and was held for the highest prices of the 12th inst.

Foreign wheat was firm, especially for Argentine and Russian.

Barley was unchanged. Scarcity made value stiff.

Some new winter oats were offered, and showed good quality. For 320 lb. Manitoba 3d. more money was paid, but the price of 304 lb. sorts from Argentina and Russia was in buyers' favour.

Maize was well held, and commanded a good steady inquiry, though purely of a business and non-speculative character.

THE FLOUR TRADE.

MARK LANE, Monday, 3 P.M.

The market was against sellers both of Town Whites and Town Households, which must each be quoted fully 3d. lower from the 12th. Whole meal is also 3d. per sack cheaper.

Country flour, on the other hand was firmer, and no new supplies for the next fortnight at least are expected to consist of flour made from new wheat. The old flour will be in request, and consequently is exceedingly well held. Bran, middlings and pollard may be associated with this branch of the trade in an extreme firmness for delivery at any date between this and the first week of September.

American flour of the best type was held above bakers' ideas, as was Hungarian above those of confectioners'. Belgian was 1s. dearer owing to the good inquiry for it as a substitute for Hungarian.

Rice flour, meal, and cones, of which there was a good supply freshly to hand, sold steadily at firmer prices.

There was a good inquiry for locust bean meal at 130s. per ton.

CLOSE OF THE MARKET.

THE MARKET CLOSED RATHER DULL FOR BREADSTUFFS, BUT MAIZE WAS A TRIFLE DEARER, AND BARLEY WAS FIRM FOR ALL SORTS. OATS UNCHANGED.

THE BALTIC.

Monday, 1 P.M.

State of Trade.

Cargoes of barley, dari, and oats are firmer from Saturday; those of cottonseed are rather easier. Wheat, maize, linseed, and rapeseed cargoes command a slow but steady sale at Saturday's closing quotations.

Business Done.

Wheat.—Russian Winter (new crop), 36s 6d per 492 lb, prompt shipment; Argentine (new crop), 22s 9d per 480 lb, February shipment; White Karachi, 35s per 492 lb, prompt shipment; Red Karachi, 34s 6d per 492 lb, prompt shipment; Walla Walla, 33s 6d per 500 lb, on passage; White Stem, 35s 3d per 500 lb, September shipment; No. 1 Californian, 35s 9d per 500 lb, prompt shipment; Roumanian (old crop), 34s 6d per 492 lb, prompt shipment.

Maize.—Roumanian, 24s per 480 lb, prompt shipment; Odessa, 24s 6d per 480 lb, October shipment; Argentine, 23s 3d per 480 lb, October shipment; American, 23s 3d per 480 lb, arrived.

Barley.—Fine Californian (new crop), 31s per 448 lb, September shipment; Azoff, 20s 9d per 400 lb, September shipment; Persian, 20s 9d per 400 lb, on passage; Tunisian, 29s per 448 lb, prompt shipment.

Dari.—Karachi, 22s 6d per 480 lb, prompt shipment; Karachi, 22s 3d per 480 lb, September shipment.

Oats.—South Russian, 15s 6d per 304 lb, September shipment; North Russian, 15s per 304 lb, October shipment.

Linseed.—Calcutta, 40s 6d per 410 lb arrived.

Rapeseed.—Jamba, 41s 9d per 416 lb, October shipment.

Cottoneed.—Egyptian, £7 17s 3d per 220 lb, September shipment.

TERM MARKET.

The market for futures shows little change. The following are the latest prices made:—

Winter Wheat

Red, American, 7s. 1d., per cental, Sept. delivery.
,, ,, 7s. 4d. ,, Dec. ,,
,, ,, 7s. 4d. ,, March ,,

Mixed American Maize, 5s. per cental, Sept. delivery.

Other transactions include Indian gram for October delivery at 5s 9d per cental; locust beans for October delivery at £5 per ton (good Portuguese); and Argentine oats of the new crop for March delivery at 5s per cental. The latter is a decidedly "long future."

GRAIN AND FLOUR FACTORS' REPORTS.

Flour.—Weaker American markets have reduced flour for shipment 6d per sack. Grain.—Flat corn is a slow sale. Round maize scarce on spot. Manitoba oats in good demand, but the supply is liberal. Beans quiet. Pease dull. Oatmeal is not quite so active. Mill Stuffs.—The demand and advancing prices of offal continue a feature of the trade. Winter wheat patents, 27s to 27s 6d per 280 lb; spring wheat patents, 27s 6d to 28s per 280 lb; American corn, 13s 10½d to 14s per 280 lb; round corn, 14s to 14s 1½d per 280 lb; grinding beans, 18s 9d per 280 lb; white pease, 19s 6d to 19s 9d per 280 lb; broad bran, 105s per ton; medium bran, 100s per ton; fine thirds, 125s per ton; common thirds, 105s per ton; American oil-cake, 145s per ton.—McKinnon and McDonald (Glasgow).

Flour.—The demand not quite so active, and quotations generally for American and home made qualities are both about 6d. per sack lower on the week.—Greenhill Bros. (Belfast).

Offals.—The demand for bran improving with greater firmness in prices.—Greenhill Bros. (Belfast).

Flour.—There has been a fair demand for flour to-day at about 3d. under the prices of this day week.—T. S. Medill and Sons, Ltd.

Milling Offal.—The trade remains exceedingly firm, with prices still very much against buyers. The great difficulty, especially with middlings, is to obtain anything like prompt delivery.—John Bawcomb and Co.

Arrivals of wheat are liberal. The trade is firm and prices are unchanged. Flour sells slowly at late prices. Maize and oats are 3d per qr dearer. Barley scarce and unchanged in value.—Coventry and Sheppard.

WET AND DRIED GRAINS.

Mark Lane, Saturday.—Wet Grains: Prices remain about the same, with a slightly firmer tendency, as with haymaking over, there is an increased demand, and business has been done at 12s ale, and 9s 6d porter per ton on rail, London. Dried Grains.—The demand continues improvingly strong, with every probability of an advance. Prices are:—Distillers, 107s 6d; ale, 97s 6d; and mixed, 92s 6d per ton on rail, London. Ale grains for the winter months have been done at 105s. Calcutta rice meal 82s 6d; rice germ, 102s 6d; American cane treacle in good demand, 87s 6d per ton, on rail, London. Kiln-dried sea-damaged Australian wheat from 20s per qr.—Hamlyn and Co., 37 and 38, Mark Lane, London, E.C.

TO-DAY'S MARKETS.

HAY AND STRAW.

Birmingham, Friday.—Small supply of hay; trade slow. Old hay, £4 per ton; new hay, £3 7s 6d per ton.

Derby, Friday.—Best old clover, 90s to 100s per ton; new, 80s to 90s; best old hay, 90s to 100s; seconds, 65s to 70s; wheat straw, 60s to 70s; pressed ditto, 50s to 60s; chop straw, 55s to 65s; peat moss, 35s to 40s.

Lancaster, Saturday. — Meadow hay, 6d; clover, 6½d; wheat straw, 4d; oat straw, 4d per stone.

Lincoln, Friday.—Hay and clover vary very much in quality. Fair samples selling at 50s per ton, while prime lots commanded ratner more money.

Manchester, Friday.—Hay, new, 4½d to ¾4d; clover, old, 7½d to 7½d; new, 4¾d to 6½d; straw, wheat, 3½d to 4d; oat, 3½d to 3½d per stone.

Whitechapel, Saturday. — A good inquiry existed for the smaller arrivals, prices being steady. Best clover, 84s to 97s 6d; inferior, 75s to 80s; specially picked hay, 90s; good ditto, 80s to 87s 6d; inferior, 65s to 70s; mixture and sainfoin, 82s 6d 90s; straw, 28s to 34s per load.

POTATOES.

Borough, Saturday.—A good quantity was received, and trade proceeded slowly. Early Puritans, 60s; early Rose, 65s; British Queens, 60s to 65s; and Blacklands, 45s to 60s per ton.

Goole, Wednesday.—Small ttendance, but business was rather brisk. Local farmers have large quantities of potatoes to sell, and trade was especially good.

Lancaster, Saturday.—Potatoes, 10s to 11s per load; retail, 9d per stone.

Malton, Saturday.—Potatoes keep very firm, dealers quoting £3 10s per ton; retail 9d to 1s per stone.

Manchester, Saturday.—Potatoes: Cheshire, 4s 6d to 5s 6d; Lincolns, 3s 6d to 5s per cwt.

Preston, Saturday.—Good supply of new potatoes, which made 8s to 9s per load.

Retford, Saturday.—The market was well supplied with locally grown samples, which made 7s to 8s per load.

Spitalfields, Saturday. — Trade remained very quiet, arrivals exceeding the demand. Early Rose, 55s; Farly Puritans, 55s to 65s; British Queens, 65s to 70s; Epicures, 55s to 60s; Sharp's Express, 60s; Duke of Yorks, 55s to 60s; Blacklands: Up-to-Dates, 55s; British Queens, 50s to 55s; Sharp's Express, 50s to 55s; Epicures, 45s to 50s; and Dutch, 40s to 45s per ton.

Worksop, Wednesday.—Very large supply of locally-grown potatoes, which sold at 7s 6d to 8s per load of 18 stones.

York, Saturday.—An ample supply, with an easier tendency on the market, and prices likely to fall. Hampers of 6 stones make about 2s.

CATTLE.

Metropolitan Market, Islington.

	Monday, August 19, 1907. British.	Total.	Monday, Aug. 20, 1906.
Beasts	840	840	1,060
Sheep and Lambs	6,030	6,030	5,860
Calves	10	10	10
Pigs	—	—	—
Milch Cows	30	30	40

Quotations per 8 lb. (sinking the offal).

ENGLISH.

	Inferior. s. d.	Second. s. d.	First. s. d.
Beasts	2 10	3 10	4 8
Sheep	3 10	5 4	6 2
Lambs	4 10	5 6	6 8
Calves	—	—	—
Pigs	—	—	—

Milch cows, per head, £16 to £22.

British arrivals include as follows:—Scotland, nil; Eastern Counties, 37; Midland, Home, and Western Counties, 713; Devon, 10; Ireland, 80.

We note to-day an increase of 90 head in the number of beasts offered for sale, compared with Monday last. The majority of the supply, as usual at this season of the year, was drawn from the Midland counties, consisting principally of grass-fed Herefords and Runts. For both prime and second quality fat cattle trade ruled of a slow and dragging nature, last week's prices being difficult to maintain. The Irish arrivals consisted of 46 Dublins and 34 Waterfords, the former selling readily at good money. Fat butchering cows were difficult to vend even at the low rates quoted A clearance will not be made.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day. s d	s d	Monday, Aug. 20, 1906. s d	s d
Scotch	—	—	—	—
Devons	—	—	—	—
Herefords	4 6	ex 4 8	4 4	ex 4 6
Norfolks	—	—	—	—
Runts	4 4	to 4 6	4 0	to 4 2
Lincolns	4 0	to 4 2	3 8	to 3 10
Irish	4 4	to 4 6	—	—
Canadian	—	—	—	—
Fat cows	3 4	to 3 6	3 4	to 3 6

There was an increase of 970 in the number of sheep and lambs penned compared with Monday last. Trade throughout the day for both wethers and ewes ruled of an extremely slow nature at late currencies; the same remark applies to the Scotch and Irish trade, both of which were in larger supply. Lambs were in excess of the requirements, consequently were difficult to vend even at a decline of 2d. to 4d. per 8 lb. in value. The supply included 200 Scotch, 795 Irish, and 399 from the Eastern Counties. A clearance is expected to be made.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

	To-day. s. d.	s. d.	Monday, Aug. 20, 1906. s. d.	s. d.
8 st. Scotch	6 0	to 6 2	5 10	to 6 0
7½ to 8 st Downs	6 0	to 6 2	5 10	to 6 0
9 st. Downs	5 10	to 6 0	5 8	to 5 10
10 st Halfbreds	5 6	to 5 8	5 4	to 5 6
10 st Yorkshires	—		—

5 st Down Lambs	6 6	to 6 8	7 2	to 7 4
6 st Halfbreds ditto	6 2	to 6 4	6 2	to 6 4

London (Central), Monday. — Fair trade for good supplies. Beef, English, 3s 6d to 3s 8d; Scotch, 4s to 4s 8d; American, 3s 2d to 3s 8d; refrigerated hindquarters, 3s 9d to 4s. Mutton, English wethers, 4s 4d to 4s 10d; ewes, 3s 4d to 3s 6d. Lambs, 4s 8d to 5s 4d; Scotch tegs and wethers, 5s to 5s 4d; ewes, 3s 4d to 3s 8d. Veal, 3s to 4s 4d. Pork, 3s 8d to 4s 2d per stone.

St. Ives (Hunts), Monday.—Beasts, 272; sheep and lambs, 1,954; pigs, 438; horses, 7. Fat and store cattle, fair trade; fat and store pigs, good demand; milch cows, £13 to £20. Prices:—Beef, 7s 3d to 7s 9d; mutton, 7s 7d to 9s 11d; lamb, 9s to 11s; pork, 6s 9d to 7s 3d.

FOREIGN.

Deptford, Monday.—Beasts 980. To-day' supply, compared with Monday last, showed a decrease of 298 head, and consisted of 920 from the United States and 60 from Canada. Trade ruled of a fairly steady nature, at late currencies. The best States on offer were quoted at from 4s 1d to 4s 3d; seconds, 4s to 4s 1d; Canadians, 3s 10d to 4s; seconds, 3s 8d to 3s 10 per 8 lb (offal given in). On Saturday 1,833 beasts from the United States and 527 from Canada were offered for sale, trade ruled of a slow nature, with an upward tendency in value. The best on offer were quoted at from 4s 1d to 4s 3d; seconds, 4s to 4s 1d. Canadians, 3s 11d to 4s 1d; seconds, 3s 8d to 3s 10s per 8 lb (offal given in).

Liverpool, Monday.—Reduced supply of stock. Cattle trade slow, and last week's prices difficult to maintain. Sheep and lambs, although early trade promised fair, the demand fell off, and very little if any improvement in prices could be recorded. Beef, 6¾d to 5d; mutton, 8½d to 6d; lamb, 9d to 8d per lb. At market 1,031 cattle and 9,692 sheep.

FEEDING STUFFS.

Mark Lane, Monday. — Linseed Cake. — Owing principally to harvesting operations the trade rules very quiet, though the firmness in prices is well maintained. London made are finding most favour at present values.

Cotton Cake.—One or two heavy arrivals of Egyptian made rather depressed prices, but home manufactured remain unchanged.

Linseed.—There was a better demand, especially for feeding purposes.

OIL SEEDS.

Mark Lane, August 19.—There has been a marked fall in linseed since the 12th, but on the 17th the market was steadying itself again, and to-day the prices which were accepted on the 16th are firmly supported. Rapeseed is firm, and for poppyseed previous fullest value is obtained. Cottonseed is dull, but not cheaper.

SEEDS.

Mark Lane, Monday.—The new trifolium has now come down to reasonable prices, and more business passing. New rape in good demand in spite of the high opening prices. Mustard moving off, prices unchanged. Rye coming out slowly, demand steady. Peas quiet. In grasses, Italian now appearing; qualities various; prices full.—John Picard and Co.

HOPS.

Borough, Monday.—The market continues very quiet, only small consumptive orders are being executed. The crop progresses slowly, the plant is now in sound condition, the aphis blight has cleared off, and there is no mould, the development is slow, which will put condition into the cones.—W. H. and H. Le May.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

At the Islington Cattle Market during the week a fair average supply of cattle were consigned, Herefords and Runts forming the majority, as is usual at this time of year. Trade opened of an extremely slow and dragging nature and continued so throughout the day, the downward tendency in regard to value being partly due to the fact that butchers' requirements are more limited, owing to the general exodus from town this month. The Irish supplies number 55 head, and consisted of 24 Dublins and 31 Waterfords (no store cattle being consigned), these shared in the slow trade experienced, sellers, however, were able to maintain late currencies. Owing to the small attendance of country buyers, fat butchering cows and bulls were also slow of sale, sellers finding them difficult to vend, even at a decline of 2d. per 8 lb. on late rates. On Thursday trade was confined to fat butchering cows and bulls, Monday's values governing all transactions.

At the Foreign Cattle Market, Deptford, trade throughout the week was of a fairly steady nature, both in regard to tone and value. The total number of beasts on offer at both markets was 4,908, as against 3,631 during the preceding week, consisting of 780 British (increase 250) and 4,128 foreign, these latter comprising 3,006 from the United States and 1,122 from Canada. The following were the top rates paid per 8 lb. (sinking the offal) :—90 to 95 stone Herefords, 4s. 6d. to 4s. 8d. ; 95 stone Runts, 4s. 4d. to 4s. 6d. ; 95 stone Dublins, 4s. 2d. to 4s. 4d. ; 100 stone Shorthorns, 4s. to 4s. 2d. ; 90 stone States, 4s. 2d. to 4s. 4d. ; 95 stone Canadians, 4s. to 4s. 2d. ; 90 stone fat cows, 3s. 4d. to 3s. 6d.

At Islington the trade for wether sheep especially if of best quality, was firmer at an advance of 2d. per lb., ewes also improved in value to the same extent, whilst Scotch and Irish descriptions, on the other hand, only maintained late rates ; the same remark applies to the lamb trade, nevertheless the trade was decidedly brisker. On Thursday trade ruled of a slow but firm nature, Monday's prices ruling most transactions. The total number penned was 6,680, as against 6,140 during the previous week, showing an increase of 540. Best pens made per 8 lb. (sinking the offal), 7½ to 8 stone Downs, 6s. to 6s. 2d. ; 9 stone ditto, 5s. 10d. to 6s. ; 8 stone Scotch, 6s. to 6s. 2d. ; 10 stone Downs, 5s. 8d to 5s. 10d. ; 10 stone Halfbreds, 5s. 6d. to 5s. 8d. ; 10 stone Irish, 5s. 4d. to 5s. 6d. ; 10 stone Down ewes, 4s. to 4s. 2d. ; 5 stone fat grass lambs, 6s. 10d. to 7s. ; 6 stone Half-bred ditto, 6s. 6d. to 6s. 8d.

Calves numbered 30 head, and experienced a a very slow trade at late values, the best on offer being quoted at from 4s. 10d. to 5s. per 8lb. (offal given in).

Trade in the West.

With the harvest now fairly entered upon, though under conditions that are anything but encouraging at the time of writing, business in the stock markets is largely confined to sheep, of which some of the most important sales of the season are now taking place, and, owing to the abnormal scarcity that exists, are being attended with pre-eminently satisfactory results from the sellers' point of view, prices being more buoyant than has been known for years, with every prospect of a continuance, fortified as this is by the promise of a root crop such as can be seldom remembered. The demand is not confined to any one particular class of sheep, but is general, and we feel quite justified in quoting prices at the present time from 2s. to 3s. a head higher for stores, even if not more in the case of working lambs, than they have been any autumn for many seasons past. Poor class things, both ewes and lambs, command a relatively better price than those in higher condition, thus reversing the general order of things, which is somewhat inexplicable in the face of the good price young mutton continues to yield. But if the demand is somewhat limited for store cattle, this must not be construed as indicating a decline in values, which is certainly not the case, as milch beasts are selling readily up to their extreme values, plenty of good milk-producers, both heifers and cows with calves, realising from £16 up to £21 apiece, and in-calvers of early date are relatively just as dear. Perhaps just for the moment barreners fail to attract the same amount of attention as is sometimes the case, and prices may not reach the level they occasionally do at particular seasons.

A good healthy tone continues to pervade all branches of the fat stock business, and with weather on the whole favourable to purveyors, prices are being well maintained for all the bettermost qualities of meat. Fat bullocks, as a rule, come splendidly to hand, and seldom have they shown more uniform excellence, the heifers and steers being beautifully ripe, whilst some of the cows are equally well done. The best steers and heifers command a ready sale at 11s. to 12s. per score, and more ordinary runs 10s. to 10s. 6d., while heavy bulls may be quoted 9s. to 9s. 6d.. Calves are getting still scarcer, and consequently higher rates have to be paid for the best—9d. to 9½d.— and 7½d. to 8d. for the ordinary grades. Mutton keeps very firm, and whilst small deliveries continue to be the rule as at present, there is no great likelihood of prices falling below 7d. to 8d. for secondary qualities, whilst wethers will assuredly continue to command the full price they are now making—8½d to 9d., and occasionally more. Pigs are also in equally good demand, the smaller weights particularly so, these bringing up to 11s. per score, and are sought after at the price, and there is likewise a steady consumptive sale for baconers and heavy weights at prices that pay feeders very well—9s. 6d. to 10s. 3d. per score. Coarser weights, of course, are relatively lower in price.

Trade in Ireland

Dublin's Thursday market was a large one, and a good deal of business was done, though at a somewhat reduced rate, it being necessary to accept from 10s. to 20s. per cwt. less than previously recorded. Some of the choice cattle fetched previous rates, but generally stock were slightly down. The number of beasts in market was 4,020, being an increase of 112 on the previous week. The beef market was early astir, and all the choicest cattle were early sold off ; later on, however, buyers managed to get cattle on somewhat cheaper terms. The cattle market closed in a rather slumpy and disappointing manner. A general concession of about 10s. per head was to be noted, and rates may be reported to be about from 1s. to 1s. 6d. per cwt. (live weight) lower than the previous Thursday, and sales by hand from 10s. to 15s. lower, and in the case of thin cattle up to 20s. Beef ranged from 45s. to 62s. 6d. per cwt (live weight). In the mutton department prices were also slightly weaker.

There were 9,317 sheep and lambs offered for sale, being an increase of fifty-two on the previous week. Trade opened rather slowly, but buyers were obliged to give almost the previous week's rates for the better class of sheep, but for common mutton there was a fall of quite 1s. to 2s. per head. Lambs were cautiously bid for, but were in fair request at a fall of about a couple of shillings. The Manchester lamb trade was bad, it was said, and this had a depressing effect on Dublin. Prime home trade mutton and good shipping hoggets made practically late rates, but all others sold at a slight reduction. Mutton made for wether 7½d. to 8d. per lb., ewes 6½d. to 7d., and inferior mutton 6d. to 6½d. per lb. Large heavy hoggets were worth from 52s. to 62s. each, and smaller from 30s. to 48s. Lambs were lower in price ; small lambs selling at from 24s. to 28s., and best fat lambs making from 30s. to 42s. each. The common classes of sheep sold at a reduction of about 2s. per head.

Veal calves of prime quality made from 7½d. to 8½d. per lb , but coarse calves only made 4½d. per lb. upwards. Milch cattle a better trade, with good supply. Store cattle of the right sort are still in good request, but poor stock are not wanted.

Dublin Pig Market had a very small supply. The day being a holiday (Lady Day) made the supply small. Owners practically had matters in their own hands, and the result was a couple of shillings advance. Best light-weight hogs made from 53s. to 56s. per cwt. ; heavy hogs from 50s. to 53s. per cwt. Stores in good demand, and selling freely.

LONDON.

Central Market, Friday.—Fair supplies, and trade fairly firm for best beef and mutton. English beef, 3s 6d to 3s 9d ; Scotch sides, 4s ; shorts, 4s 4d to 4s 8d ; Deptford and Liverpool killed, 3s 4d to 3s 8d ; refrigerated hindquarters, best, 3s 10d to 4s ; ditto seconds, 3s 8d to 3s 9d ; ditto forequarters, 2s 4d to 2s 6d ; inferior beef, 2s 2d to 2s 8d; mutton, Scotch wethers, 5s to 5s 4d; ditto tegs, 5s 4d ; ditto ewes, 3s 4d to 3s 8d ; English wethers, 4s 6d to 4s 10d ; ditto ewes, 3s 4d to 3s 8d ; Dutch sheep, 4s 6d to 4s 8d ; English lamb, 5s 4d to 5s 8d ; veal, 3s 2d to 4s 4d ; English pork, 3s 8d to 4s ; Dutch pork, 3s 6d to 3s 10d per 8 lb.

Islington, Thursday. — To day's supply of beasts consisted entirely of fat butchering cows and bulls, trade for which was slow and steady. Top value :—Fat cows, 3s 6d to 3s 8d ; fat bulls, 2s 9d to 3s 2d. per 8 lb. Sheep trade ruled slow, and prices showed an upward tendency, whilst ewes made 2d per 8 lb more money. Lambs met a slow but steady trade at late rates. Best pens made per 8 lb as follows :—7½ to 8 stone Down sheep, 6s to 6s 2d; 9 stone ditto, 5s 10d to 6s ; 10 stone ditto, 5s 8d to 5s 10d ; 10 stone halfbreds, 5s 6d to 5s 8d ; 10 stone Down ewes, 4s 2d to 4s 4d ; 5 stone fat grass lambs, 6s 10d to 7s ; 6 stone halfbred ditto, 6s 6d to 6s 8d. Calves 2d per 8 lb dearer. Quotations per 8lb, sinking the offal :—Beasts, 2s 9d to 3s 8d ; sheep, 4s 2d to 6s 2 l ; calves, 3s 6d to 5s 2d ; lambs, 5s 2d to 7s.

COUNTRY.

Ashford, Tuesday.—There was a fair attendance, but a slow trade. Best beef made 4s 10d to 5s, and secondary 4s 4d to 4s 8d ; Down mutton fetched 5s 6d to 6s ; Kent wethers, 5s 4d to 5s 8d ; barrens, 4s to 4s 4d ; veal a little cheaper, 5s to 5s 2d ; pork met rather better demand, roasters 3s 10d to 4s. A good trade for store lambs, prices high.

Berwick, Saturday.—Attendance of farmers and buyers small, and trade dull. Heifers, £7 10s to £18 15s ; stirks, £7 10s to £10 5s ; two year-olds, £4 10s ; Shorthorn bulls, £11 15s.

Birmingham, Thursday.—Small supply of beasts, sheep, and pigs, but slow trade for beasts and sheep. Beef made 5½d to 6½d per lb ; Herefords, 6¾d per lb ; mutton, 6½d to 8½d per lb ; lamb, 9d per lb ; bacon pigs, 10s 3d per score ; cutting pigs, 10s 3d per score ; sows, 8s 4d to 8s 6d per score.

Bristol, Thursday.—There was a large supply of beef, and a moderate trade was done at last week's prices. Sheep and lambs were plentiful, and about the usual business was transacted. Prime wethers, which last week realised 8¼d per lb being quoted 8d to 8½d. Pigs were again scarce, and values unaltered.

Calne, Friday.—Present prices of pigs :—In lots of not less than ten, on rail within 100 miles, 1s. per pig extra for delivery by road. Prime stores, 6 sc. 10 lb to 8 sc. 10 lbs, 10s per score, 8 sc. 11 lb to 9 sc. 10 lb,, 9s 6d per score ; 9 sc. 11 lb to 10 sc. 10 lb, 9s. Pigs outside these limits at their value.—C. and T. Harris and Co., Ltd.

Canterbury, Saturday.—A good inquiry continues for store stock, but the supply to-day was not so large. The range of prices for lambs in one lot of 150 was : Ewes, 18s 6d to 32s ; wethers, 19s to 29s. Another consignment ranged from 19s to 25s. 6d, and some good cross-breds sold at 27s 6d. Tegs were making 39s, and old ewes 28s 6d to 35s. A rather better inquiry for cows and calves.

Carlisle, Saturday.—There was a good supply of cattle, the bulk of the animals being heifers of good quality. Buyers were numerous, including many Northumberland farmers on the look out for strong cattle. This class of stock met a ready sale, but for smaller and less conditioned beasts trade was rather dragging. Quotations :—Small heifers, £6 10 to £8 10s ; wintering cattle, £8 10s to £10 10s ; heifers for figishing off, £14 to £16 10s each.

Chester, Thursday. — Good supply of cattle and sheep, and a brisk demand. Prices :—Milch cows, £17 to £22 ; calvers, £15 to £19 ; barrens, £10 to £13 ; heifers, £8 to £18 ; stirks, £5 to £9 ; bullocks, £12 to £14 ; sheep, 18s to 35s each.

Derby, Tuesday.—A fairly busy market, at which last week's prices again ruled. Best qualities firm. Beasts, 5½d to 7d ; calves, 8d ; sheep, 7½d to 9½d ; lambs, 10d per lb.

Doncaster, Saturday.—Exceedingly small supply of horned stock, and prices unchanged, except that dairy stock was rather worse to sell, making from £16 to £20 per head. Good supply of sheep. Lambs, 30s to 40s ewes, 45s to 55s per head.

Dublin, Thursday.—There was a change in the demeanour of buyers to-day, and helped by a

further increase in supplies a successful effort was made to reduce prices. Choice cattle were about 10s per head lower, and inferior sorts from 10s to 20s per head lower than last week's rates. Sheep a weaker trade, except for choicest qualities prices were in favour of buyers. Lambs, though in demand, had to be sold at less money in order to effect sales. Cattle—Live weight (best), 31s to 32s 6d per cwt; secondary and inferior, 27s to 29s 6d per cwt. Mutton, dead weight, 6½d to 7½d per lb; extreme, 8d per lb—Ganly, Sons and Co.

Edinburgh, Wednesday.—Cows, moderate supply, stiff trade, except for best classes; Shorthorns sold to £23; secondaries to £19 5s. Sheep much larger show, slow trade; Cheviot dinmonts, 28s to 37s; half-bred lambs, 25s to 35s; Oxford cross lambs, 28s to 35s; Cheviot ewe lambs, 22s to 34s.

Glasgow, Wednesday.—Large show of cattle at market, consequently prices suffered slightly. Prime handy grades met a steady inquiry at a shade less money; inferior descriptions also showed decline in values. Top, 63s to 66s; secondary, 56s to 59s per cwt. Average number of sheep penned, and the demand was fair for all classes; lambs of quality sold dear; best quality of mutton, 9½d to 9¾d; secondary, 8¾d to 9½d; lambs, 8d to 10d per lb.

Hereford, Wednesday.—Trade was fairly firm for a fair supply of beef, at late quotations:—Best heifer and bullock at 6¾d to 7d; cow beef, 5d to 6d. A moderate supply of sheep, with firm trade; wether mutton, 8½d; ewe, mutton, 6d to 7d. Fat lambs dear and scarce. Store lambs dear, and in good demand. Veal, a medium supply; trade firm at 7d. Very few pigs on offer; porks made 5½d; store pigs cheaper. Store cattle trade: Nothing doing for a meagre supply.

Leicester, Saturday. — There were exceptionally good supplies of store stock for the season, and the bulk of the lots came to hand in good condition. Trade ruled active at high prices. Choice milch cows, £18 to £20; good lots, £16 to £17; secondary, £13 to £15; Shorthorn cattle, £14 to £16 10s; choice Irish bullocks £17 to to £18 10s; good lots, £14 to £16; heifers, £12 to £15 10s; Welsh cattle, £12 to £16 10s; young stock, £5 to £9; calves, 20s to 40s each.

Lincoln, Friday.—A small show of beasts and a slow trade. Young stock, £9 to £13; milch cows, £17 to £21 each. A fair number of sheep, and business ruled moderately brisk. Lambs made 32s to 44s, and young ewes 64s each.

Lynn, Tuesday.—An average show of fat beasts, with trade fair, made from 7s 6d to 8s per stone. Very few stores on offer, which experienced a slow trade, and realised from £7 to £14 each. Fat sheep were in average supply, and trade was about the same as last week, from 9s 6d to 10s per stone. No stores worth quoting; store lambs in average supply, made from 33s to 40s each.

Newcastle, Tuesday.—Cattle in larger supply, and a much heavier trade. Prime heifers, 7s 9d to 8s; second-class animals, 7s 3d to 7s 6d; prime steers, 7s 6d to 7s 9d; second-class, 7s 3d to 7s 6d; coarse and inferior, 6s 6d to 6s 9d per stone. Larger supply of sheep and a quieter trade. Choice young sheep, 8½d to 9d per lb. Strong heavy, 8½d to 8¾d; choice lambs, 9d to 9¼d; second-class, 8¾d to 9d; ewes, 6d to 7¼d; rams, 5d to 6½d. Veal, 6d to 7¾d per lb.

Newport, Wednesday.—Plentiful supply of cattle, sheep, and lambs. Large attendance of buyers, and very good demand. Best beef, 6½d to 6¾d per lb; seconds, 6¼d; cows, 5d to 5½d; best wether mutton, 8¼d to 8¾d; ewes, 7d to 7½d; lamb, 9d; calves, 7d to 8¼d; porker pigs, 10s 3d to 11s per score.

Norwich, Saturday. — Trade for fat cattle hardly so good, the best making up to 8s; other qualities and cows from 7s to 7s 6d per stone of 14 lb. Veal calves were a small supply, and sold at 8d per lb. Fat sheep were of good quality, and trade was sharper, best sorts selling well at from 8½d to 9½d, and ewes and rough mutton at 6¾d per lb. A small show of fat pigs of good quality, the best of which made up to 6s 8d, and baconers and sows from 5s 6d to 6s 6d per stone. For store cattle, mostly small beasts, trade was slow and dull; best three-year-olds fetched from £16 to £17 10s.; two-year-olds, £14; and young cattle from £4 to £10 15s. A very short supply of calves, prices remaining unchanged at from 20s to 45s per head. Fewer store sheep, and quality and trade were unchanged, best blackfaced Suffolk ewes selling at from 58s to 72s; those from two to four years old at from 45s to 54s; and lambs, which were dear, at 32s to 43s 6d per head. Only a few store pigs offered, for which trade was better at from 13s 6d to 25s per head.

Nottingham, Saturday.—There was a smaller supply of stock, and trade, except for stuff of the best quality, was slow. Best milking cows sold at £17 to £22; heifers, £15 to £18; strong heifers and steers, £10 to £15; and smaller animals, £6 to £10. Calves changed owners at from 35s to 45s. each.

Retford, Saturday.—Small supply of store stock, thin attendance, and very little business transacted. Currencies generally remained about the same as before. Milch cows, £15 to £20; two-year-old steers and heifers, £11 to £12 10s; yearlings, £6 to £8; and calves, 35s to 45 per head.

Romford, Wednesday.—Fat beasts in average supply; trade about the same. Best animals, 4s 4d to 4s 6d; middlings, 4s 2d to 4s 4d per stone. Calves in average supply; trade slow at 4s 10d to 5s per stone. Average supply of sheep; trade dear. Best small sheep, 5s 10d to 6s; large, 5s 4d to 5s 6d per stone. Ewes in larger supply; trade slow at 4s 2d to 4s 4d per stone. Lambs in average supply; trade fair at 6s 4d to 6s 8d per stone. A few store beasts on offer; fair demand. Large supply of milch cows; trade slow. Pigs in short supply; trade slow. Small porkers, 3s 8d to 4s; large hogs, 2s 8d to 3s per stone.

Sheffield, Tuesday.—An average number of cattle shown. Trade ruled dull. Good milch cows made £18 to £20, and younger beasts £14 to £15 10s.

Shrewsbury, Tuesday.—Good show of store cattle, which met a fair trade. Usual supply of fat cattle, calves, sheep, and pigs. Brisk trade for good cows with calves, highest price reaching £22 15s.; heifers, £15 15s; in-calvers, £15 to £16; good rearing calves up to 53s. Quotations:—Beef, 6d to 7d per lb; mutton (wether), 9d to 9½d per lb; ewes, 7d to 8d per lb; lamb, 9½d to 10d per lb; veal, 7½d to 8½d per lb; porket pigs, 10s 6d to 11s per score.

Stockton, Wednesday.—There was a larger show of the best cattle, which met a slow trade at 8s to 8s 3d per stone, whilst rougher kinds made 6s to 7s per stone. Lambs realised 10d per lb, young sheep 9d, ewes 7d to 7½d per lb, and calves 8d to 9d per lb. Small porkers sold at 7s 3d per stone, mediums 7s, and sows 6s to 6s 3d.

Thame, Tuesday. — There was a grand entry of all descriptions of stock on Tuesday last, and in fact it was by far the largest market so far held this season. It was noticeable that beef was of excellent quality, maiden heifers and bullocks predominating. Purchasers attended from all the riverside and principal towns in the district, many buyers coming from long distances. There was a selling trade throughout, only six beast remaining unsold. A choice selection of sheep found eager buyers, and the trade was decidly firm in this respect, every pen being sold. Good demand for veal and bacon. Messrs. Bond and Burrows' sale comprised 140 fat beasts, 362 fat sheep, 79 fat and store pigs, and 61 fat and weaning calves. Fat oxen made from £16 10s to £22 15s; fat heifers, £14 to £22; fat wethers, 45s to 60s; fat ewes, 42s to 58s; fat lambs, 31s to 44s; fat calves, £3 to £4 10s; weaning cow calves, 28s to 60s; bull calves, 10s to 45s; bacon hogs, £3 10s to £5; porkers, 26s to 38s; store pigs, 15s to 22s.

Truro, Wednesday.—Attendance very good; business fairly brisk. Bullocks, 45s to 50s per cwt; barreners and store bullocks, 40s to 45s; cows and calves, £10 to £15 each; rearing calves, 15s to 36s; wethers, 7d to 7½ per lb; ewes, 5d to 5¼d; lambs, 7½d to 8d; pigs, 9s 6d to 100s each; beef, 6d to 8d per lb; mutton, 6d to 8½d; lamb, 8d to 9d; veal, 6d to 8d; pork, 6d to 8½d; carcases, 5d to 5½d.

Wolverhampton, Wednesday. — Moderate supply, slow trade. Beef, 5½d to 7d per lb; mutton, 6½d to 9d per lb; lamb, 9d to 9½d per lb; veal, 7d to 8d per lb.

Worksop, Wednesday.—Small supply of stock. Trade fairly brisk, buyers being numerous and prices a little above late rates. Best beef, 8s to 8s 6d; secondary, 7s 4d to 7s 9d per stone; best Southdown wethers and cross breds, 8d to 8½d; ewes, 6½d to 7¼d; lamb, 9d to 9½d; veal, 8d to 9d per lb.

Yeovil, Saturday.—Heifers and calves made from £18 10s to £19 7s 6d; secondary, £12 5s to £17 5s; cows and calves, £11 5s to £18 15s; yearling heifers, £6 10s to £8 5s; best quality barreners, £12 5s to £14 10s; secondary, £9 5s to £11 15s. A number of rams averaged about £6 10s.

York, Thursday.—There was a good show of shearling sheep and lambs, which met with an improved demand. The best twice-crossed shearling sheep made up to 50s, and Masham shearlings 42s to 46s. A few exceptionally good lots of twice-crossed lambs made up to 40s, but the general prices was 28s to 33s, and a few smaller sorts made up to 26s. There was above an average show of Irish store cattle, and a light one of English. Trade continued slow at about late rates. Some of the best three-year olds made up to £15 10s, two-year-olds varied from £10 to £12. Poor demand for stirks, which made £6 to £8 each. About an average show of calving and milch cows, for which trade, though slightly improved, continued very bad. The very best animals could be bought for £20; the general run made £15 to £17 10s each.

FEEDING STUFFS.

Liverpool, Friday.—The trade in fertilisers for prompt delivery is trivial, but there is a fair inquiry for autumn deliveries of phosphates, and values are very firmly held, whilst nitrate of soda has advanced 5s. per ton. Feeding stuffs are only in quiet demand, but values on the whole are upheld.

—H. Jones Langar and Co

Mark Lane, Monday.—Linseed Cakes: A. may be expected during harvest operations, there is only a moderate consumptive demand; nevertheless, values remain fully as dear, and in some instances a demand of 2s. 6d. per ton has been paid. Russian sell rather more freely. East India seed pures make last week's prices, Fine seedy Calcuttas command full values. London made are relatively cheaply offered. Cotton cake. —With the prospect of light shipment of Egyptian for some time to come, holders ask extreme prices, while English are firm. Decorticated: London made pures find a ready sale, also special digestive meal, but American brands are still neglected.—Rape cakes quiet. East India unchanged. No Ravison. Maize Germ Meal.—Nothing offering in White American, and English makes are held for rather more money. Maize gluten meal is in good request. Rice Meal.—Parcels of Rangoon in warehouse find buyers at a slight advance, while some business is reported for August-September steamer shipments. Locust beans are without change. Dried brewers' grains tend dearer. Nitrate of soda is unaltered.

CHEESE.

Glasgow, Wednesday.—Arrivals of home cheese were larger. There was just sufficient business passing to enable sellers to keep up last week's prices. Cheddars were quoted 57s to 60s per cwt, and Dunlops, 54s to 58s. There has been a fair trade passing in Canadian cheese at steady prices; white Canadian 53s to 56s, and coloured 56s to 58s.

Highbridge, Tuesday.—A large attendance of buyers, and an advance of about 10s on the market, all being cleared. Best Caerphilly dairies realised up to 53s per cwt.; secondary dairies, 47s to 50s; and other dairies, 42s to 45s 6d. A few inferior lots failed to reach 40s. Cheddars, old, 75s; ditto, new 55s to 57s; Truckles, 54s to 58s 6d; doubles, 52s 6d to 54s 6d.

Newport, Wednesday.—There was a good attendance and brisk demand. Quotations:—Caerphillies, 38s to 40s per cwt; fancy dairies, 50s to 52s; Derbies, 54s to 60s; truckles, 58s to 62s; doubles, 52s to 54s.

COLONIAL DAIRY PRODUCE.

London, Tuesday.—The demand for Australian and New Zealand butter continues good, and prices are well maintained, but business is in small compass. Canadian is now arriving in large quantities, but far less than the usual amount for the time of year. Since June 30 the receipts have been 11,357 cwt, against 39,400 cwt last rear. The price of foreign butter remains remarkably stationary, and is also very much below what it was last year at this time, when week by week the price advanced. There has been a fair trade in Canadian and New Zealand cheese this week, and owing to its extraordinary scarcity, coloured Canadian has made 58s per cwt. White is making 56s, and occasionally 57s. New Zealand is selling at 60s to 62s. Attempts are being made to force up prices of Canadian, but the trade here, although having only small supplies, are not to be tempted. Until prices fall to the region of 50s, buying will be from hand to mouth.—W. Weddel and Co.

HOPS.

Canterbury, Saturday.—The plantations look fairly well, and with favourable weather the crop should not be far below average.

Worcester, Saturday.—The reports from the plantations are variable, but all agree that plenty of hot sunny weather is necessary to develop the fruit. The hops grow out very slowly, and the picking will be late. A fair trade continues to be done at late rates.—Charles Faram and Co.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending August 13, 1907:—

| | | |

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

There has been since the 21st inst. a welcome fall in the wind, which from the 14th to the 20th had been unseasonably blusterous, lodging and twisting the grain up badly. Harvest is proceeding in a desultory fashion: the stacking of the cut grain is hardly advisable in its exceedingly damp condition. The lack of warmth in the year in the south is unpleasant, but in the north it is absolutely disastrous, as many corn fields, especially of oats, can now hardly ripen at all. The Board of Agriculture issued on Saturday morning a report on the crops which strikes us as being too favourable with respect to wheat, barley, and oats, but as unduly pessimistic with regard to potatoes, apples, and pears The root crops will be satisfactory if we have a hot and fine September, but they need some sun; especially is this the case with mangels. The barley is admittedly better this year on light than heavy soil; from the former we hope for some rather good malting quality, though fine harvest weather is needed to assure perfect colour in the samples.

An interesting return compiled by the Board of Agriculture shows that from 1821 to 1829, the sales of British wheat at the statute markets varied from 1,582,000 to 2,771,060 qr. From 1830 to 1842 they were about 4,000,000 qr. annually, but for 1845 the record sales of 6,666,240 qr. were reported. Nothing like this has been seen since, though in 1865 the sales were 5,257,000 qr., and in 1859 were 5,449,000 qr. They had dropped by 1906 to 2,685,000 qr., and for 1907 will almost certainly be less than for 1906. The great difficulty of making "head or tail" of these figures has prevented the officials at St. James's Square from emphasising them, but we congratulate Mr. Rew on giving them full publicity. Let us know the truth and blame the bunglers who rob the facts of use. They will not be found at the Board of Agriculture, but at the Palace of Westminster. There are 500 markets (almost exactly) at which wheat is sold in England. In 1821 Parliament, in its wisdom, made 148 of these *statutory* markets, from which returns are *required*. In 1827 the number was fixed at 150, in 1842 at 290, in 1865 at 150, in 1883 at 187, in 1890 at 196, in 1901 at 190. Since 1901 four wheat markets have become voluntarily extinct, and the number is now 186. This diversity is extremely perplexing, but the truth can roughly be ascertained by bearing in mind the vagaries of our so-called wise men at Westminster. What of course common sense has always dictated is the choice between one of the alternatives, either to make the supply of returns the condition precedent to a market being legally a *market overt* for wheat, in which case we should have returns from *all* markets, or else (and this is what the trade has always suggested) taking a list of say 100 chief markets and confining returns to them. If a town wished to be reckoned one of the 100 chief markets, it could voluntarily collect and supply returns, and if for five years, let us say, they exceeded those of the smallest market on the Government list, the Board of Agriculture should have power to effect a substitution. The number of statutory markets should be fixed and the number of 100 has much to recommend it. The present list of 190 is too large. This may be said to be proved by the fact that four places have committed harikari and discontinued wheat sales. But what is there, otherwise than the purely misleading, in returns from Abergavenny, which only sells 177 qr. of wheat in a year? One may also note Ludlow 425 qr., Wareham 203 qr., Frome 72 qr., Bath 378 qr., Penrith 60 qr., and Alnwick 26 qr.

The wheat gradients of late have been very moderate; there is no cheap wheat, but with a constant influx of foreign samples the farmer has no chance of obtaining really high prices:—

Lincoln	34s. 6d. per qr.
Salisbury	32s. 9d. ,,
Range ...	1s. 9d. per qr.

The barley gradient is restricted, largely because the list of markets where barley is on sale is restricted also, and is likely to remain so until October.

Cambridge	26s. 11d. per qr.
Chelmsford	25s. 5d. ,,
Range ...	1s. 4d per qr.

Oats are cheaper in the south and south-west of England than in the other districts.

Doncaster	22s. per qr.
Salisbury	20s. ,,
Range	2s. per qr.

The sales of British wheat at the statute markets last week were very small as is usual for the time of year; nevertheless, they were 40 per cent. larger than in 1906. Since harvest, however, the sales have been smaller than in the preceding season, in spite of which, mean values have been lower:—

This season ... 2,676,000 qr. at 27s. 8d. per qr.
Last ,, ... 2,914,000 qr. at 28s. 10d. ,,

The sales of British barley have been larger than last season. This has been secured without a fall in price; on the other hand the acreage was already below 25s. per qr., and could scarcely undergo further decline without diminishing the area under cultivation:—

This season ... 3,371,000 qr., at 24s. 5d. per qr.
Last ,, ... 3,203,000 qr., at 24s. 3d. ,,

The sales of oats have been heavy.

This season 1,181,000 qr. at 18s. 4d. per qr.
Last ,, 926,000 ,, 18s. 6d. ,,

Imports of the United Kingdom last week were as follows:—

Wheat, 525,000 qr.: a large quantity.
Flour, 105,735 sacks: a moderate supply.
Maize, 354,000 qr.: nearly double an average.
Barley, 59,000 qr.: half an average.
Oats, 125,000 qr.: a full supply.

In fifty completed weeks of the cereal year imports have been as follows:—

Wheat	21,115,000 qr.
Flour	4,376,000 ,,
Breadstuffs	25,491,000 qr.
Maize	11,356,000 ,,
Barley	5,213,000 ,,
Oats	4,848,000 ,,

The receipts of foreign breadstuffs, of barley, and of oats have all been smaller than in the previous season, but of maize imports there has been an increase.

Supplies on passage on the 24th inst. show that of wheat our expectations are smaller than they have been for three years past. Of maize and barley they are fairly good, especially of the former:—

	1907.	1906.	1905.	1904.
	Qrs.	Qrs.	Qrs.	Qrs.
Wheat.	2,070,000	2,400,000	2,225,000	3,025,000
Maize ..	975,000	1,395,000	1,240,000	950,000
Barley .	375,000	178,000	260,000	375,000
Beans ..	1,000	1,000	5,000	37,000

Of oats, 100,000 qr., and of flour, 138,000 sacks, are on passage. It is unnecessary, in these cases, to give details of bygone years, as the whole are much below the average.

Of oil-seeds there are on passage 220,000 qr. of linseed, 40,000 qr. of rapeseed, 26,000 tons of cottonseed, and 6,000 qr. of poppyseed. These are liberal expectations of the respective types. The prices ruling for oilseeds in England are high and encourage shipments to our shores.

American shipments last week were fair of wheat and maize, but small of other article, the quantities being wheat, 270,000 qr.; barley, 43,000 qr.; oats, 22,000 qr.; maize, 180,000 qr.; and flour, 82,000 sacks.

Argentina shipped 145,000 qr. of wheat, 181,000 qr. of maize, and 20,000 qr. of linseed, but no oats.

Russia exported a very large quantity of barley of the new crop, over 200,000 qr. of this being for the United Kingdom. Total Russian shipments were:—Wheat, 80,000 qr.; barley, 474,000 qr.; oats, 45,000 qr.; and maize, 43,000 qr.

Roumania is not now a free shipper, but last week 40,000 qr. of wheat, 15,000 qr. of barley, 2,000 qr. of oats, and 84,000 qr. of maize cleared from her ports.

Other shipments of the week were 179,000 qr. of wheat and 37,000 qr. of linseed from India, 19,000 qr. of wheat from the Australasian colonies, and 30,000 qr. of wheat from Persia.

LONDON HAY TRADE.

Saturday.—This week has found the hay trade in a more or less nervous and slumpy condition, and large supplies of new crop are to hand, a great deal more than our market can deal with, and to effect clearances much lower prices have been taken, in fact, for badly got hays and mixtures as low as 45s. per ton has been accepted, and as the bulk of present supplies consists of these badly made and poor quality new stuffs of all kinds, the trading all round is of a most unprofitable description. For prime new hays, 62s 6d to 65s per ton; for clovers, 75s to 77s 6d per ton, and for mixtures 70s per ton is about top value, but for anything that is not altogether prime much lower prices have to be taken. Old stuffs being now almost exhausted continue in short supply, but with even the demand for these qualities weakening day by day, values show a lower tendency. Owing to harvest, straw is lately in such full supply, and is finding a fair trade at unchanged rates. With the larger supplies of English the demand for foreign importations seems almost to have fallan completely off, and although shipments are very short, and prices nominally unchanged, it is next to impossible to do fresh business. Prices ruling are about as follows:—

English 1906 crop. Best meadow hay, 85s per ton; good meadow hay, 72s 6d to 82s 6d per ton; plain hays, 67s to 70s per ton; best clovers, 95s to 97s 6d per ton; good clovers, 85s to 90s per ton; inferior clovers, 80s to 82s 6d per ton; prime mixtures, 95s per ton; good mixtures, 84s 6d to 90s per ton; plain mixtures, 75s to 80s per ton; seconds hays, clovers, and mixtures, 50s 6d to 62s 6d per ton; wheat straw, 26s to 28s per load; oat straw, 26s to 28s per load; barley straw, 26s to 28s per load. All ex rail London. Foreign: Canadian mixture, 80s to 82s 6d per ton; first quality Dutch hay, 65s per ton; second quality Dutch hay, 60s to 62s 6d per ton; New French clover, 75s per ton. These prices are by the barge load delivered alongside a London Thames wharf.

THE BALTIC.

Since the 21st or thereabouts the cargo trade has been assisting the spot market and adding to the ability of spot holders to obtain a slight advance in prices. Wheat cargoes have made 36s. per 480 lb. for Rosario, 36s. 3d. per 500 lb. for Blue Stem (also for No. 1 Californian), 37s. per 492 lb. for best Russian Winter, 36s. per 492 lb. for choice Karachi, 35s. per 480 lb. for No. 2 Manitoba, and 35s. per 492 lb. for new crop Roumanian. The demand at these prices has been good.

Maize cargoes have fetched 25s. 3d. per 480 lb. for South-West Russian, 24s. 6d. per 480 lb. for Galatz, 24s. 3d. per 480 lb. for Novokossisk, 23s. 9d. per 480 lb. for America, and 24s. per 480 lb. for Yellow La Plata. At these prices the demand is now not so good. Buyers are entitled of course to give full weight to the liberal supply on passage.

Barley cargoes have realised 22s. 9d. per 400 lb. for South Russian, 22s. per 400 lb. for Karachi, and 21s. per 400 lb. for Persian. Some good prices are mentioned in the trade for foreign malting barley, but as yet we are not in a position to quote them.

Oats are decidedly firmer. The Manitoba cargoes offered for prompt shipment at 20s. per 320 lb. have been taken up, and 20s. 6d. is now asked. On the other hand, white Lisbon oats are freely offered for October shipment at 15s. 3d. per 304 lb., so that the period of comparative dearness for foreign oats appears to have a termination well in sight. Other cargo sales of the week have included Smyrna beans at 32s. per 480 lb., white Calcutta peas at 34s. 3d. per 504 lb., Portuguese locust beans at 96s per ton, and Argentine linseed at 40s. 3d. per 416 lb.

The London Corn Trade Association C. F. and I. quotations for the settlement of rejections and difference in weights on wheat under Rule No. 4 of the Association East Indian Wheat Contracts are as follows, viz.:—via canal—

Crop 1906.—Choice White Karachi, 35s. 6d.; soft red Kerachi, 34s. 9d.; new clean terms but 4 per cent. barley.

Choice white Karachi, 35s. 3d.; soft red Karachi, 34s. 6d., old terms.

N.B.—The committe has decided to quote rejection prices for "Old Terms" up to and including July shipments, but not later.

These prices fixed on the 23rd remain in force until a fresh list is published.

The arrivals of grain and seed-laden vessels at ports of call for the week were—8 wheat (1 Adelaide, 1 Bahia Blanca, 1 Port Germein, 1 Port Pirie, 3 Portland (O.), and 1 Rosario); 3 maize (2 San Nicholas and 1 Villa Constitucion)—total, 11.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English firm and dearer, supplies limited. Foreign—American held at 9d to 1s advance, other sorts 6d dearer. No. 1 Northern Manitoba, ex ship, held at 37s 3d; No. 2 at 36s 6d; No. 1 Hard Manitoba at 38s; La Plata, landed, at 36s 6d, 37s 6d; white Karachi, at 35s 6d, 36s; red Karachi, at 35s, 35s 6d. Flour firm and dearer, not active. Iron Dukes held at 22s 6d, 23s. Maize firm and 3d to 6d dearer. La Plata and Odessa, ex ship, quoted at 24s, 24s 3d; mixed American at 24s 9d, 25s. Barley firmly held at 6d advance. Azoff-Black Sea, ex ship, to arrive, quoted at 23s 6d; Persian at 22s 6d, 23s. Oats firm, with values in sellers' favour. La Plata quoted at 17s 6d; Archangel at 17s 9d; Danubian at 17s, 17s 6d.

Mark Lane, Friday.—Wheat: English wheat firm and scarce. Foreign firmly held at full prices, but not active. No. 1 Northern Manitoba, ex ship, quoted at 37s 3d to 37s 6d; No. 2 at 36s 9d; choice white Karachi at 35s 6d to 35s 9d; red Karachi at 35s to 35s 3d. Flour firm, but quiet. Iron Dukes quoted at 22s 6d, ex ship; Minnesota patents, 27s 6d to 29s. Maize firm, and prices in sellers' favour. Mixed American, landed, quoted at 25s; River Plate and Odessa, at 24s 6d. Barley firm and rather dearer, with a moderate inquiry. Azoff-Black Sea, exship, to arrive, held at 23s 6d; Persian, 22s 6d to 23s. Oats firm, but quiet. La Plata quoted at 17s 6d; Archangel at 17s 9d; South Russian, 38 lb, at 17s 3d to 17s 9d.

COUNTRY.

Ashford, Tuesday.—Several lots of new corn were on offer. New peas made 31s to 32s; new black winter oats, 20s to 21s 6d. The rainy weather has spoilt the colour of much of the cut corn. For old corn trade was slow at unchanged rates. Wheats made 34s to 37s; barley, 28s to 29s; oats, 21s to 25s; mazagan beans, 30s to 31s; tick beans, 33s to 34s; foreign barley, made 26s to 27s; and maize, 25s to 26s 6d.

Banbury, Thursday.—Wheat, white, 33s 6d to 34s 6d per qr; wheat, red, 33s 6d to 34s 6d per qr; barley, old, 29s to 32s per qr; beans, old, 31s to 32s per qr; oats, old, 12s to 25s per qr; peas, old, 30s to 35s per qr.

Berwick, Saturday.—The market was thinly attended, with very few samples on offer. Prices remain unaltered.

Birmingham, Thursday.—There was a much improved trade at this market, wheats having taken an upward turn, and sellers reported a good demand at about 1s per qr advaace. Quotations:—No. 1 Northern Manitobas, 37s per 496 lb, Bristol; No. 2 Northern Manitobas, 36s 6d at Bristol; River Plates, 35s 9d to 36s 3d; Russians, 34s to 34s 9d per qr at Sharpness. Bessarabian maize was 9d dearer 24s 6d per 480 lb, Sharpness; Galatz-Foxanian was 1s 6d dearer at 24s 6d Bristol; grinding barley remained at 25s per 400 lb, Sharpness. There was scarcly any English wheat on the market. Oats made from 22s 6d to 23s per 312 lb, and beans from 13s to 13s 3d per 196 lb, delivered.

Brighton, Thursday. — Small attendance, slow trade at last week's prices. New English wheat beginning to make its appearance. Prices not yet settled. Barley, 28s to 33s; grinding barley, 25s to 27s; old oats, English, 21s to 23s; new winter oats, 19s to 20s (42 lb); peas, 30s to 31s; beans, 33s to 34s.

Canterbury, Saturday.—New corn offered is of very fair quality, but supplies so far are extremely limited, owing to the wet weather having delayed harvesting. Prices are starting fairly high, sales of new wheat of 64 lb weight being reported at 37s to 38s delivered. Some new white oats of 44 lb weight have been sold at 21s, and new peas at 30s. 6d. per qr. Supplies of old wheat are practically exhausted. Best white oats range up to 25s 6d, and barleys are worth from 27s to 29s per qr.

Carlisle, Saturday.—Much larger supply of oats in our market to-day. Slow sale owing to few buyers, at a little less money, 23s 6d to 24s 6d per 336 lb.—Thomas Robinson.

Chester, Saturday.—The demand continues good for all feeding stuffs at increased prices. American corn was 3d per sack dearer, and round 3d to 6d per sack. Oats advanced 1d, and offals scarce and dear all round. Quotations: Beans, new, 5s 6d to 5s 9d; old, 6s to 6s 6d per 80 lb; oats, old, 3s 1d to 3s 6d per 46 lb; Indian corn, new, 13s 3d to 13s 6d; old, 13s 9d per 240 lb; round corn, old, 13s 9d to 14s 6d per 240 lb.

Chichester, Wednesday.—Small attendance. Samples of new oats and new wheat on offer were in bad condition. Quiet trade. Old white wheat, 36s to 36s 6d; old red ditto, 36s to 36s 6d; grinding ditto, 25s 6d to 25s 9d; oats, English, 18s to 23s; rye, 27s to 28s; maize, 24s to 25s.

Colchester, Saturday.—Few samples of wheat offering unfit for milling. New oats slow sale.—Colin Taylor, King and Co., Ltd.

Coventry, Friday.—Attendance small, and very few parcels of corn were offered. Wheat ruled at 1s per qr advance on the week. Barley very firm. Oats and beans a strong trade at below figures. Quotations: Wheat, 12s 9d to 13s 6d per 186 lb; barley, 30s to 34s per 448 lb; peas, 12s to 14s; beans, 13s to 13s 9d per 196 lb; oats, 24s 6d to 27s per 352 lb.

Derby, Friday.—There was a very limited supply of wheat, and trade was firm at unaltered prices. Oats and beans a shade dearer. White wheat, 37s to 38s; grinding barley, 23s to 25s; beans, 35s to 37s; oats, 24s to 26s.

Devizes, Thursday.—A small attendance, and prices show no alteration. New winter oats were offered in good condition. The value of them was said to be 18s per qr, 40 lb to the bushel. Wheat-cutting has become general this week, and there is reason to hope that the crop is better than some people anticipated. Best wheat, 17s to 18s; secondary, 16s to 17s 6d; malting barley, 24s to 30s; feeding, 23s to 26s; old oats, 20s to 24s; new beans, 16s 6d to 18s; fine flour, 27s to 30s; extra fine, 32s to 36s.

Doncaster, Saturday. — The market was thinly attended, principally by merchants and millers, farmers having no grain to offer. Prices were firm at last week's full rates. Foreign wheat 1s 6d per qr dearer on the week, and in good demand. A few new oats from the South, but prices not fixed.

Dorchester, Saturday.—The weather being brilliantly fine to-day, everybody was kept at home attending to the harvest; consequently but very little business was done at the corn market. Supplies of home-grown wheat are practically exhausted, and only foreign was on offer to-day, this making, where sales resulted, from 1s to 1s 6d more than at late markets. Barley for grinding purposes also took an upward turn, and where business was done from 9d to 1s per qr advance had to be paid. Maize was also much more firmly held, and an advance of 6d to 1s must be quoted. Several samples of the new season's crop were on offer, but the quality was very variable, and the condition not good enough just yet to tempt buyers. New oats, however, came to hand in better condition than anything else, the prices asked ruling from 16s to 18s per qr. The harvest in Dorset is now being pushed on with all possible despatch, and the prospect on Sunday was decidedly better than has yet been presented at any previous period of the season, brilliant sunshine having a wonderful effect in finishing off the corn in a far better condition than even the most sanguine could have wished for. As it is the colour of much of the corn is seriously affected, but the yield is exceedingly satisfactory.

Dublin, Friday.—Foreign wheat a strong market and held for advance. Maize dearer, with an upward tendency; demand moderate. Irish trade slow, small blacks, 12s 6d to 13s 6d; whites, 14s 6d. New shown flour held for more money.

Exeter Friday. — Fairly good attendance; trade very slow. No English wheat on offer; foreign 6d to 1s dearer. Barley very firm, and 6d to 1s dearer. Maize is dearer. Oats firm. Flour unchanged. Quotations:—English wheat, 4s 6d; superfine flour, 25s to 27s; fine, 23s to 25s.

Glasgow, Wednesday.—The trade during the week has rather improved in tone, with sellers asking slightly higher prices for wheat and maize. Barley to arrive is also the turn dearer; and Manitoba oats on spot are about 3d dearer on the week. Other articles remain firm and unaltered in price. Attendance was small at to-day's market. Wheat dearer to buy. Flour steady to 6d per sack higher over the week. Maize very scarce on the spot, with few sellers at higher prices. Corn firm at late rates. Barley unobtainable on spot. Oats very firm for shipment, and spot lots held for 6d per boll advance. Beans and pease quietly firm. Bran and thirds nominally unaltered from last week. Oatmeal dearer. Other articles unchanged.—Gibson and Clark.

Glasgow, Friday.—Wheat nominally unchanged. Flour held for 6d to 9d per sack advance. Maize and corn very steady and the turn dearer at 3d per boll for spot and 6d for forward shipment. Oats held for 3d more money. Other articles unaltered.

Gloucester, Saturday.—Practically no English wheat on offer: Reds, 33s 6d to 34s; whites, 34s to 34s 6d. Foreign wheat active: Plates, 35s 9d to 36s 3d; Russians, 34s 3d to 36s 6d (Sharpness); Plate maize, 24s 6d (Sharpness); flat, 24s 6d, (Bristol); Bessarabian, 24s 9d (Sharpness). Barley, new, on passage, 22s 6d. Oats, 21s to 23s.

Grantham, Saturday.—Harvest operations having commenced in the district, there was a small attendance, and there is very little old corn left for disposal. What few sales were effected were at last week's prices.

Hereford, Wednesday. — Small attendance. Nothing offering in old English grain, and in the absence of transactions values nominally unchanged. New oats were shown, and nominally quoted at 18s to £1 per qr. Maize experienced a sharp rise during the week of fully 1s per qr. Wholesale quotations:—Wheat, 4s to 4s 4d per 62 lb; oats, old, 2s 6d to 3s per 40 lb; new, 2s 3d to 2s 6d; beans, 4s to 4s 3d per 65½ lb; maize, 3s 3d to 3s 6d per 60 lb.

Ipswich, Tuesday. — Small supply of old wheat; trade steady at late rates. Reds, 34s to 35s; whites, to 36s per 504 lb. Grinding barley steady. Oats rather easier. Maize firm. Beans and peas unaltered.

Leeds, Tuesday.—Although there is still a lack of animation in the trade, the tone has undoubtedly strengthened. Shipments continue much below the European requirements, with the result that stocks and supplies on passage are diminishing, offers for shipment are scarce, and prices above the level of values on this side. Holders of wheat, therefore, are not pressing sales. Prices on the week are the turn against buyers, and old English fetches fancy figures. Maize firm and slightly dearer. Beans and oats unchanged.—Dunns and Co.

Leeds, Wednesday.—English wheat was the turn dearer, owing to continued scarcity and uncertain harvest prospects. Foreign was firmly held, with a hardening tendency. Flour was in good supply at late prices, medium qualities making 26s to 28s. River Plate, American, and Russian maize averaged 23s to 24s, and foreign malting barley 28s to 32s. Beans, peas and oats were steady.

Leicester, Saturday.—Fair average attendance of buyers and dealers, with moderate supplies of home-grown wheats, which met a slow sale. Red wheats, 35s to 36s per 36 stones; white wheats, 36s to 37s per 36 stones; grinding barley, 31s to 33s per 32 stones; beans steady; oats, 23s to 25s per 24 stones.

Lincoln, Friday.—Only a few samples of English wheat came to hand, these making the full prices of last week; foreign was in fair request, and realised 1s per qr more than a week ago. One or two samples of new English barley were shown in fair condition, and made 28s. per qr. Feeding stuffs in demand, and firm in price. Maize is dearer.

Maidstone, Thursday.—No change in the value of wheat to-day; it remains firm, scarcely any new samples yet. Winter oats and rye—the former at about 19s, and the latter 26s, but not much passing in them. Barley is steady at fully former cost, and maize is rather on the upward grade, and most other grains strong position.

Manchester, Thursday. — English wheat nominal, and foreign dearer at 2d to 3d per cental, but the higher prices checked sales. Flour was about 6d per sack dearer. Indian corn 1d to 2d per cental higher, and closed firm. Oats: Both English and foreign, were dearer. Barley scarce, and held for full rates. Beans and peas firm. Bran and other articles were in sellers' favour.

Newark, Wednesday.—The attendance was a little better; prices nominally the same as last week. White and red wheat, 36s to 37s; malting barley, 29s to 30s; grinding, nil; white oats, 23s 6d to 24s 6d; black ditto, 23s to 23s 6d; beans, 35s to 36s per qr.

Newcastle-on-Tyne, Saturday.—We had a fair demand for wheat at our to-day's market at 1s per 504 lb over last week's prices. Maize firm, 6d dearer on the week with a fair consumptive demand. Beans and peas remain firm at late rates. A good demand for oats, and fine quality was fully 6d dearer since last Saturday. Barley very scarce on spot and dearer.—Pollard and Co.

Newport, Wednesday. — Good attendance. Brown maize 6d dearer; flat maize scarce. Oats, 3d advance. Forward barley, 9d dearer; spot barley unchanged. Flour, 6d advance.

Northampton, Saturday.—There was practically nothing doing at the Exchange this morning, all old corn being used up and no new corn yet being in. Prices remain as last week:—Wheat, 34s to 35s; barley, 28s to 30s; white oats, 23s to 24s; black oats, 22s 6d to 23s 6d; beans, 31s to 33s; peas, 30s to 32s; flour, 26s to 30s.

Norwich, Saturday.—There was no wheat at the market on Saturday, either old or new. Harvest generally commences this week.

Nottingham, Saturday.—Rather more old English wheat offering, but the high prices asked checks business. Foreign held for 1s advance. Grinding barley firm. Oats but few showing and 6d higher. Beans firm.—Robt. Hubble.

Oxford, Saturday.—The market was quiet, and only a small trade passed, buyers being poorly represented. New oats were offered at about 18s 6d per 336 lb. A few samples of new wheat were quoted at about 32s.

Peterborough, Saturday.—The weather has

been dull and damp, and harvest work is proceeding but slowly. The little old wheat found buyers at about 35s. A few samples of new barley at market; quality and prices various.—Thomas Hill and Son.

Plymouth, Thursday.—There was a fair attendance on our Exchange to-day. Maize, oats, 3d to 6d. dearer. Wheat 3d. dearer. Barley, none offering.—Orlando Davis and Co.

Preston, Saturday. — The unseasonable weather and late harvest have caused an advance in wheat values, and a large business has been done during the week at 3d to 4d per cental. increased. To-day's market was poorly attended, farmers' supplies of wheat and other grain being exhausted. Millers' offal and flour were 6d per pack dearer, with good demand. Quotations:—Wheat, white, new, per windle of 220 lb., 14s 6d to 15s; ditto red, new, 13s 9d to 14s 3d; oats, old, per bushel, 3s 5d to 3s 6d beans, per windle of 220 lb, 16s 6d to 17s.

Reading, Saturday.—The attendance was small and trade was quiet. Prices: Wheat, 35s to 38s per qr; barley, 27s to 31s; oats, 19s 6d to 23s; beans, 33s to 36s; peas, 29s to 32s.

Ripon, Thursday.—A good attendance of farmers, and a fair business. Local wheat shows a downward tendency. Prices:—Wheat, 34s to 35s; ditto foreign, 36s to 40s 6d; barley, grinding, 26s to 27s; oats, 24s to 25s; maize, round, 25s to 26s; ditto, flat, 26s to 27s per qr.

Retford, Saturday.—Small supplies of wheat, and good prices ruled, running up to quite 36s per qr. All kinds of grain were scarce and dear, grinding barley making 27s; maize, 27s; English beans, 34s; black oats, 22s to 23s; and white ditto, 24s per qr. Harvest has only just commenced in this district, and not likely to be general for a week.

Sheffield, Tuesday.—The market remains quiet, with a steady demand, and prices continue to rule high for English grain. Beans, oats, and barley all sell at about 6d. per qr. advance on the week. Flat maize firm at full prices. Oats steadier at rather more money. Quotations:—Wheat, white, new, 36s 6d to 37s 6d; ditto red, new, 36s 6d to 37s 6d per 504 lb; oats, black, 24s to 25s; ditto white, 24s to 25s per 336 lb; peas, grinding, 33s 6d to 34s; ditto blue, 75s to 90s per 504 lb; beans, English, 36s 3d to 36s 9d per 532 lb; barley, grinding, 27s 6d to 28s; ditto malting, 28s to 32s per 448 lb; Indian corn, small, 25s 9d to 26s; ditto Plate, 25s to 25s 6d: ditto flat, 26s to 27s per 480 lb.

Shrewsbury, Saturday.—Old wheat, 15s to 15s 6d per 225 lb; old oats, 15s 6d to 16s per 225 lb; old beans, 15s 6d to 16s 6d per 240 lb.

Stamford, Friday.—Quiet business, but late rates were upheld. Wheat, 34s 6d to 35s 6d; oats, 22s to 22s 6d; beans, 32s to 32s 6d per qr. The harvest has not yet commenced generally in the district, but in a few isolated cases cutting operations have started, and the yield and quality is satisfactory.

Stockton, Wednesday.—No local wheat showing. Foreign wheat trade steadier owing to unsettled weather, and prices ruled 5d to 6d dearer on the week. Old oats dearer, maize 3d to 6d per qr dearer.

Sunderland, Saturday.—Not much grain offering. Wheat must be quoted 1s per qr dearer. Oats and barley very firm. Arrivals nil.—E. and F. Richardson.

Warwick, Saturday.—Wheat, 12s 9d to 13s per bag. Feeding stuffs a turn dearer, especially barley and maize. Not many samples of grain on offer.

Winchester, Saturday.—Old English wheat scarce and dearer. Foreign 6d to 1s advance. Barley and oats unaltered. Maize 3d higher. Flour firm at late rates.—Fear, Colebrook and Co., Ltd.

Wisbech, Saturday.—At market to-day full prices obtained for the few odd samples of wheat and oats offering. The low temperature during the week, with occasional showers and little sunshine, makes harvesting very slow work.—James Fletcher.

Wolverhampton, Wednesday. — Business quiet. Quotations:—English oats, 14s 6d per 196 lb; English wheat, 14s 6d per 216 lb; English beans, 13s 6d per 196 lb; Indian corn, flat, 11s 6d per 196 lb; round, 11s 6d per 196 lb.

Worksop, Wednesday. — Holiday market. White wheat, 33s to 37s; red ditto, 32s to 36s; barley, 26s to 28s 6d; white oats, 23s to 24s 6d; black oats, 22s to 23s 6d; maize, 26s 6d to 28s; beans, 34s to 36s per qr.

Yeovil, Friday.—A few rubbed-out samples of the new wheat crop were shown, but no business passed. New oats on offer at 18s 6d to 19s 6d per qr. Old wheat (home grown) made about 35s per qr. Foreign wheat was up 1s per qr on last week's values, and maize a like sum. Old oats advanced from 3d to 6d, English white selling at 22s 6d to 24s; black, 20s to 22s; Irish white, 21s 3d to 21s 9d; black, 19s 3d to 19s 9d; grinding barley (foreign), 25s; feeding, English, 24s to 26s 6d; maize, flat, 24s 3d to 24s 9d; ditto, round, 24s to 25s 6d; new rye, 25s to 29s; new beans, 16s 6d to 18s. An improved demand for flour at last week's level of 26s per sack of fines. Meals and offals favour sellers.

York, Saturday.—There was a fair attendance, but very little business doing. Wheat, of which few samples were on offer, made 33s to 36s per qr. of 36 stones, whilst oats made 23s to 24s per qr of 32 stones. Beans, peas, and maize firmer.

FOREIGN.

Hamburg, Saturday. — This week we had almost daily torrents of rain, which must have seriously damaged the outstanding crops. Our market was much excited, a speculative demand set in and prices of all articles advanced rapidly, particularly for wheat and rye, the crops of which are in a critical state. Complaints about potato disease are increasing. American hard winter wheat No. 2, August-September shipment, sold at 34s to 34s 3d; red winter No. 2, free from garlic, is held at 34s 6d; Bluestem at 35s 3d; 80 kg River Plate on the spot, 34s 9d per 480 lb ex-ship here. There is a great demand for dry rye, most of the German crop being unfit for immediate use. 9 10/15 South Russian afloat was sold at 32s 6d; September-October shipment at 30s 6d per 480 lb, c.i.f. Hamburg, and higher prices are now asked. Fine stout Bohemian malting barley is taken by our brewers at 36s to 38s; choice quality is held at 39s to 41s; Slovakian and Moravian of fine colour at 38s 6d to 42s per 448 lb, f.o.b. From the Saale, good coloured but not very stout barley is offering at 40s. From Denmark, Holstein, and Mecklenburg we are still without offers, Quality is not likely to be fine. Feeding barley again in good demand. Russian, August ½-September shipment selling at 21, August-October at 20s 9d per 400 lb, c.i.f. Hamburg. Maize firm. Odessa, August shipment, 23s 6d; Mixed American, 23s 9d to 24s; River Plate, on the spot, 23s to 23s 6d per 480 lb, ex ship here.—John Tatlock.

CORN STATISTICS

Weekly Arrivals into London.

August 14 to 21 inclusive.

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, Monday, 3 p.m.

The market to-day was fairly well attended. There is very little new wheat on offer. Condition and quality vary greatly, and price varies accordingly—33s. to 37s. are terms mentioned. Old wheat is dearer, the exact extent varies. "Between the cereal years" the prices of old and new corn are necessarily more or less unfixed. This day fortnight we may hope for definite new season opening quotations. New winter barley at 27s. is in evidence and has some buyers, a solitary sample of new malting, February sown corn was shown, and 33s. was, we understand, paid for it. Feeding barley was quite celar, whether for English or Russian.

Indian and Persian at 23s. to 24s. sold well. New winter oats at 18s. to 19s. were in request, and some Swedish also met with a good inquiry. Argentine oats, on the other hand, met with little favour. Maize prices tend in sellers' favour, and to do prices for all sorts of beans and peas.

THE FLOUR TRADE.

MARK LANE, Monday, 3 p.m.

The market to-day was a little dearer, both for Town Whites and Town Households, and the inquiry better also. For country flour the prices asking are a little vague, pending the offer of flour from the new crop of wheat. American flour is dearer than ever, the supply on passage is barely half an average, and offers for September shipment are at prices which do not point to any large business being done.

Hungarian flour is hardly to be had, and the price is very high indeed. Even Belgian is well above 30s. per sack. French fails, as a rule, to find favour, and Australian is now practically off the market. Milling offals are scarce, and in consequence a slightly higher price has to be paid for them.

CLOSE OF THE MARKET.

THE MARKET CLOSED DECIDEDLY DEARER FOR ALL STUFF WHICH COULD BE PROMISED FOR ACTUAL DELIVERY BEFORE THE CLOSE OF AUGUST. IN ALL SUCH STUFF PRICES GIVEN ABOVE MAY HAVE 1s. ADDED. THAT FOR FUTURE DELIVERIES—[illegible] IN SEPTEMBER, VALUES MAY STAND AS QUOTED; NOR WAS THERE A GOOD INQUIRE EVEN THEN. THE SUPPLY CRISIS IS OF A STRICTLY TEMPORARY CHARACTER.

THE BALTIC.

Monday, 1 p.m.

State of Trade.

Wheat cargoes are decidedly firm. Barley and maize cargoes are not so showy as on Saturday, but linseed and cottonseed are firmer. Rapeseed, with a large supply on passage, tends in buyers' favour. Oats are dearer for immediate futures but weak for later autumn.

Business Done.

Wheat.—Walla Walla, 35s 3d per 500 lb, on passage; Blue Stem, 36s 6d per 500 lb, on pasage; Australian, 36s 9d per 480 lb, on passage; No. 1 Manitoba, 35s 9d per 480 lb, September shipment; No. 1 Durum, 30s 3d per 480 lb, September shipment; White Karachi, 35s 6d per 492 lb, September shipment; Red Karachi, 35s per 492 lb, September shipment; Argentine, 35s per 480 lb, September shipment.

Maize.—Argentine, 24s 3d per 480 lb, September shipment; Odessa, 24s 9d per 480 lb, Septembar shipment.

Barley.—Persian, 20s per 400 lb, October shipment; Karachi, 22s. 6d per 400 lb, on passage; Oregon, 30s 6d per 448 lb, prompt shipment; Hungarian, 38s per 448 lb, prompt shipment (Trieste).

Oats.—Riga, 15s 3d per 304 lb, September shipment.

Linseed.—Indian, 41s 3d per 410 lb arrived; Duluth, 41s 6d per 416 lb, September shipment.

Rapeseed.—Ferozepore, 55s per 416 lb, on pas-Jamba, 42s per 416 lb, October shipment.

Cottoneed.—Egyptian, £8 per 2,240 lb, on passage; Brazilian, £7 per 2,240 lb, on passage.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour.—The market for wheat has been strong this week, so sellers ask 6d per sack advance on flour. Grain.—Flat corn in improved demand at 6d advance. Round maize arrived held for 3d per boll advance. Manitoba oats much firmer, and in small supply. Beans quiet. Canadian pease 3d per boll dearer. The sale for oatmeal is lower. Mill Stuffs.—Continue to advance. Winter wheat patents, 27s 6d to 28s per 280 lb; spring wheat patents, 27s 6d to 28s per 280 lb; American corn, 14s 6d per 280 lb; round corn, 14s 3d to 14s 6d per 280 lb; grinding beans, 18s 9d per 280 lb; white pease, 19s 9d to 20s per 280 lb; broad bran, 107s 6d to 110s per 200 lb; medium bran, 100s to 102s 6d per 200 lb; fine thirds, 130s per ton; common thirds, 110s per ton; American oilcake, 145s per ton.—McKinnon and McDonald (Glasgow).

Flour.—There is an improvement in the demand, and quotations for American and home-made brands are both about 6d. per sack on last week's prices.—Greenhill Bros. (Belfast).

Offals.—Bran continues firm, and demand steady.—Greenhill Bros. (Belfast).

Milling Offal.—The extreme scarcity still continues, and as long as this prevails there can be no reduction from the high prices.—John Bawcomb and Co.

We have liberal supplies of wheat. The trade is firm, and prices are 1s. 6d. to 2s. per qr. higher. Flour 6d. per sack dearer. Maize 1s. 6d. Barley 3d. Oats 3d. and 6d. per qr. dearer.—Coventry and Sheppard.

Flour.—Trade to-day has been very strong with a good demand. Offers, however, are very scarce, and prices are really dearer on the week.—T. S. Medill and Sons, Ltd.

TERM MARKET.

The market for future delivery has hardened very perceptibly since the 19th, and the following prices are now obtainable, with more business doing at them than was at the lower level previously quoted:—

Winter Wheat.

Red, American,	7s. 5d.,	per cental,	Sept.	delivery.
,, ,,	7s. 6d.	,,	Oct.	,,
,, ,,	7s. 7d.	,,	Nov	,,
,, ,,	7s. 7d.	,,	Dec.	,,
,, ,,	7s. 7d.	,,	Jan.	,,
,, ,,	7s. 8d.	,,	Feb.	,,
,, ,,	7s 8d.	,,	March	,,
American mixed maize	5s. 2d.	,,	Sept.	,,
,, ,,	7s. 2d.	,,	Oct.	,,

No maize is offered on the speculative market at present for later than October delivery.

HOPS.

Borough, Monday.—There is a little more inquiry for 1906 hops. The crop still continues to progress very slowly, especially in the Golding grounds of East and West Kent, where many are still in the burr stage. This is causing the growers considerable anxiety. Some are doubtful whether they will ever get out into hop, and others fear the cones will be the smallest ever picked. The Fuggles on the clays are well out in hop, but they, like the Goldings, will be smaller than usual, but we think all will be very rich in lupulin.—W. H. and H. Le May.

Worcester, Saturday.—Our reports speak of very slow progress in development of the hops, and that hot weather is essential to bring them to maturity. The probable quantity still depends on the weather, especially in the more delicate sorts of hops. Business keeps quiet, and chiefly for present requirements.—Charles Faram and Co.

POTATOES.

Borough, Saturday.—A fair assortment was offered and a steady demand prevailed. Early Rose, 60s; Early Puritans, 60s; British Queen, 55s to 60s; Epicures, 50s; Blacklands, 60s to 65s per ton.

Carlisle, Saturday.—Good supply and a steady trade at 7d to 9d per stone

Doncaster, Saturday.—A good supply, which made 3s per cwt.

Goole, Wednesday.—Practically nothing doing in the potato market, and an exceedingly small supply of samples on sale. Late prices were maintained.

Malton, Saturday.—Prices are firmer at 5s per cwt. retail.

Manchester, Saturday.—Potatoes: Cheshire, 4s 6d to 5s 6d; Bedford, 3s 6d to 4s 6d; Cambridge, 4s to 4s 6d per cwt.

Preston, Saturday.—Prices were easier at 7s to 8s per load of 240 lb.

Spitalfields, Saturday.—Better support was experienced for the somewhat smaller quantity marketed. Early Rose, 60s; Early Puritans, 60s to 65s; British Queens, 70s to 75s; Duke of Yorks, 60s; Epicures, 60 to 65s; Sharp's Express, 60s to 65s. Blacklands: Up-to-Dates, 60s; British Queens, 55s to 60s; Sharp's Express, 55s to 60s; Epicures, 50s to 55s per ton.

Stockton, Wednesday.—Lincolnshire potatoes £4 per ton.

Worksop, Wednesday.—Good supply of locally-grown potatoes, which made 7s to 8s per load of 18 stones.

York, Saturday.—Fair quantity, and good samples made 52s to 55s per ton.

HAY AND STRAW.

Birmingham, Friday.—Small supply; trade quiet. Old hay, £4 per ton; new hay, £3 5s per ton; straw, 2s 3d per cwt.

Derby, Friday.—Quotations:—Clover, best old, 90s to 100s; new, 80s to 90s; hay, best old, 90s to 100s; second, 65s to 70s; straw, wheat, 60s to 70s; pressed, 50s to 60s; chop, 55s to 65s; peat moss, 35s to 40s.

Hereford, Wednesday.—A quiet trade in hay and straw al last week's quotations.

Leeds, Tuesday.—The hay harvest is practically over, but the new crop has not yet been offered in the warehouses. Old hay commands full prices, and straw is in demand for thatching purposes. A steady trade is passing at the following quotations:—Clover hay, 7½d; meadow hay, 7d; wheat straw, 5d; oat straw, 5d; and rye straw (retail), 7d to 8½d per stone; green clover, 3½d per bundle.

Lincoln, Friday.—A good supply of hay and seeds and a moderate demand. Best new hay and seeds, 50s to 55s; inferior ditto, 40s to 50s per ton on the ground. A fair amount of straw, and a poor demand at 55s per ton at the stack.

Manchester, Friday.—Hay, old, 6d to 6½d; clover, 7½d; green, 4½d to 5½d; straw, oat, 3½d.

Newcastle, Tuesday. — Old land hay, from £3 15s to £4 7s 6d per ton; new land hay, £4 10s to £5 7s 6d; this year's growth, £4 10s; wheat straw, £1 2s to £1 5s per load; oat straw, £1 1s to £1 4s.

Nottingham, Wednesday.—Fair supplies on offer, which met with a quiet sale, except for best old. Quotations: Inferior to good hay, 70s to 80s; prime ditto, 90s to 100s; inferior to good clover, 80s to 90s; prime ditto, 95s to 105s; wheat straw, 45s to 55s; new hay, 70s to 80s; new seeds, 80s to 90s per ton.

Sheffield, Tuesday.—Small supplies and moderate attendance of farmers. Choice old seeds, £4 15s to £5; choice hay, £4 10s to £4 15s; straw, £2 5s to £2 10s per ton.

Whitechapel, Saturday.—Supplies were on a liberal scale and passed off quietly at late rates. Best clover, 84s to 95s; inferior, 72s to 80s; specially picked hay, 87s; good, 76s to 85s; inferior, 65s to 70s; mixture and sainfoin, 77s 6d to 87s 6d; straw, 28s to 34s per load.

WET AND DRIED GRAINS.

Mark Lane, Saturday.—Wet Grains: Prices rule a trifle higher, with a better trade and business has been done at 12s to 13s ale, and 9s 6d to 10s 6d porter per ton on rail, London. Dried Grains.—The demand continues improvingly strong, with every probability of a further advance. Prices are:—Distillers, 108s 9d; ale, 98s 9d; and mixed, 93s 6d per ton on rail, London. Ale grains for the winter months are offering at 105s. Rice germ, 102s 6d; American cane treacle, 87s 6d per ton, on rail, London Kiln-dried sea-damaged Australian wheat from 20s per qr.—Hamlyn and Co., 37 and 38, Mark Lane, London, E.C.

Seven Years Grain Averages.
(OFFICIAL.)

Wheat	28s. 10d. per 480 lb.
Barley	25s. 4d. per 400 lb.
Oats	18s. 11d. per 312 lb.

TO-DAY'S MARKETS.

CATTLE.
Metropolitan Market, Islington.

	Monday, August 26, 1907. British.	Total.	Monday, Aug. 27, 1906.
Beasts	850	850	1,020
Sheep and Lambs	5,640	5,640	6,880
Calves	10	10	20
Pigs	—	—	—
Milch Cows	40	40	30

Quotations per 8 lb. (sinking the offal).

ENGLISH.

	Inferior.	Second.	First.
	s. d.	s. d.	s. d.
Beasts	2 10	3 10	4 8
Sheep	3 8	5 2	6 0
Lambs	4 10	5 6	6 8
Calves	—	—	—
Pigs	—	—	—

Milch cows, per head, £16 to £22 10s.

British arrivals include as follows:—Scotland, nil; Eastern Counties, 30; Midland, Home, and Western Counties, 732; Devon, 10; Ireland, 78.

We note to-day an increase of 10 head in the number of beasts offered for sale, compared with Monday last. The majority of the supply, consisted of Herefords and Runts from the Midland counties, trade for which ruled of a slow and dragging nature, with little prospect of a clearance being effected, owing to the inclement weather and the small attendance of buyers present. The Irish consignment consisted of 23 Dublins and 55 Waterfords (no store cattle being included), these shared in the slow trade and were quoted at 2d. per 8 lb. lower. Fats cows and bulls were in excess of the demand, late currencies, however, governed all transactions.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day.	Monday, Aug. 20, 1906.
	s d	s d
Scotch	—	—
Devons	—	—
Herefords	4 6 ex 4 8	4 4 to 4 6 ex 4 6
Norfolks	—	—
Runts	4 4 to 4 6	4 0 to 4 2
Lincolns	4 0 to 4 2	3 8 to 3 10
Irish	4 2 to 4 4	—
Canadian	—	—
Fat cows	3 4 to 3 6	3 4 to 3 6

There was a decrease of 390 in the number of sheep and lambs penned compared with Monday last. For both Scotch and English wether sheep a slow and dragging trade was experienced at a decline of 2d. per 8 lb. in value. Irish descriptions, on the other hand, maintained last week's prices, as also did ewes Notwithstanding low rates prevailing, lambs were difficult to vend owing to the scarcity of buyers present, retail butchers' requirements being naturally limited owing to so many families being out of town. A clearance will not be made. The supply included 200 Scotch, 653 Irish, and 263 from the Eastern Counties.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

	To-day.	Monday, Aug. 27, 1906.

Calf trade not worth noting.

No pigs on the market.

London (Central), Monday.—Trade, quiet, offerings moderate. Beef, English, 3s 7d to 3s 10d; Scotch, 4s to 4s 6d; American, 3s 4d to 3s 9d: refrigerated hindquarters, 3s 9d to 4s. Mutton, English wethers, 4s 4d to 4s 10d; ewes, 3s 4d to 3s 8d. Lambs, 4s 10d to 5s 4d; Scotch tegs and wethers, 5s to 5s 4d; ewes, 3s 4d to 3s 8d. Veal, 3s to 4s 8d. Pork, 3s 8d to 4s 2d per stone.

FOREIGN.

Deptford, Monday.—Beasts nil. No market held here to-day. On Saturday 1,197 beasts from the United States and 833 from Canada were offered for sale, and met with a firm trade at an advance of 2d per 8 lb. in value for the former and 3d for the latter. The best States on offer were quoted at from 4s 3d to 4s 5d; seconds, 4s 1d to 4s 3d. Canadians, 4s 1d to 4s 3d; seconds, 3s 10d to 4s per 8 lb (offal given in).

Liverpool, Monday.—Supply of stock larger. Cattle trade slow, and prices lower, especially for middling and inferior quilities. Sheep and lamb trade of dragging character, and although sheep were quotably little altered, lambs were 2s to 3s per head lower. Beef, 6½d to 5; mutton, 8½d to 6d; lamb, 8½d to 7¾d per lb.

FEEDING STUFFS.

Mark Lane, Monday. — Linseed Cake. — The harvest operations being still in full swing, demand is moderate, though values are well maintained, and in some instances 2s 6d per ton more money is asked. Foreign markets offer very sparingly.

Cotton Cakes.—With no fresh arrivals or anticipated shipments for some time prices are inclined to harden for Egyptian made. English have advanced 2s 6d per ton.

Linseed.—Both Plate and Calcutta are falling off in the quantity shipped, which is giving the market an upward tendency.

PROVISIONS.

London, Monday.—Bacon: The arrivals of bacon last week were:—From Ireland, 1,492 bales, and from foreign ports, 14,357 bales. There was a very poor inquiry for bacon throughout the week, resulting in prices being generally easier:—Irish, 60s to 64s up to 71s; Danish, 57s to 63s up to 69s; Canadian, 56s to 59s up to 63s. Butter: Butter was a quiet market. French, 92s to 100s; Danish, 111s to 113s; Russian, 74s to 98s; Irish, 86s to 106s; Canadian, 104s to 106s; Victorian, 86s to 100s; New South Wales, 84s to 98s; Queensland, 84s to 96s; New Zealand, 96s to 108s. Lard.—There was a fair demand for lard. Irish, 50s to 58s; Danish, 48s to 52s; American, 44s 3d to 46s 3d.

SEEDS.

Mark Lane, Monday.—The new trifolium is now offering very freely, but the demand is limited. New rape not abundant, prices very firm. Mustard in steady demand, prices unchanged. Rye coming out slowly, condition various, demand steady. Peas quiet. In grasses, fine samples Italian find buyers. Perennial prospects unchanged.—John Pickard and Co.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

At the Islington Cattle Market on the chief day of the week there was an increase in the number of beasts offered for sale. For both prime and second quality cattle trade opened very slowly, and though no marked decline in value can be noted, concessions had to be made occasionally to effect sales. The supply, as far as fat beasts were concerned, chiefly consisted of Herefords and Runts, no Scotch and only a few Devons being on offer. The Irish consignment consisted of 46 Dublins and 34 Waterfords, the former, though sharing in the slow trade prevailing, were slightly firmer in regard to value, whilst the latter were quoted at late rates. Fat butchering cows and bulls met with a limited inquiry from both town and country buyers, late currencies, however, governed all transactions. On Thursday no fat beasts were on the market, and all sales of rough cattle were governed by Monday's prices.

At the Foreign Cattle Market, Deptford, markets were held on Monday and Saturday. Trade ruled of a fairly steady nature for both States and Canadian cattle. The total number on offer at both markets was 3,900, as against 4,908 during the previous week, consisting of 890 British (increase 110) and 3,010 foreign (decrease 1,118), these latter comprising 2,117 from the United States and 893 from Canada. The following were the top rates obtained per 8 lb.(sinking the offal) :—90 to 95 stone Herefords, 4s. 6d. ex 4s. 8d. ; 95 stone Runts, 4s. 4d. to 4s. 6d. ; 100 stone Shorthorns, 4s. to 4s. 2d. ; 95 stone Irish, 4s. 4d. to 4s. 6d. ; 90 stone States, 4s. 1d. to 4s. 3d. ; 95 stone Canadians, 3s. 10d. to 4s. ; 90 stone fat cows, 3s. 4d. to 3s. 6d.

The sheep trade at Islington on Monday, with an increase in the supply, ruled of a slow nature, nevertheless sellers were able to maintain late values in most cases. Both Scotch and Irish supplies were in larger numbers and experienced a slow but steady trade. Lambs, on the contrary, were difficult to vend, even at a decline of from 2d. to 4d. per 8 lb. in value. On Thursday a slow trade with a downward tendency in value was experienced for all descriptions.

No sheep were offered for sale at Deptford. The total number penned was 7,560, as against 6,680 during the preceding week, this showing an increase of 880. Best pens made per 8 lb. as follows (sinking the offal), 7½ to 8 stone Downs, 6s. to 6s. 2d. ; 8 stone Scotch, 6s. to 6s. 2d. ; 9 stone ditto, 5s. 10d. to 6s. ; 10 stone Irish, 5s. 4d. to 5s. 6d. ; 10 stone Downs, 5s. 8d. to 5s. 10d. ; 10 stone Half-breds, 5s. 6d. to 5s. 8d. ; 10 stone ewes, 4s. to 4s. 2d. ; 5 stone fat Downs, lambs, 6s. 6d. to 6s. 8d. ; 6 stone Halfbred ditto, 6s. 2d to 6s. 4d.

Calves numbered 40 head, and met with a slow trade, the best on offer being quoted at from 4s. 10d. to 5s. per 8lb. (offal given in). No pigs on the market.

Trade in the West.

The unfavourable weather has so far had but little adverse effect on the price of stores, but how long before this will be the case depends entirely upon how the harvest progresses. Store cattle are not likely to be affected in any way to the extent that sheep may be ; and up to this week both milch beasts and grazing cattle are selling as well almost as their owners could reasonably wish for, milkers in particular realising excellent prices—heifers from £16 to £22 5s., and cows for those of a useful stamp from £15 to £18 ; the more ordinary grades of milchers ranging downwards from £14 to as low as £11 or £12 for milked-out cows just on the eve of being drafted from the dairy, all the bettermost qualities being from 10s. to 20s. a head dearer than they were a fortnight since. Barreners show a corresponding improvement in value, the freshest-conditioned bullocks realising up to £28 or £29 per pair—almost beef prices—and the plainer grades that require more attention in the way of finishing off, from £18 to £22. The younger classes of stock, both stirks and yearlings, are likewise attracting considerably more attention than of late at steadily improving values, dealers finding there is little risk now in purchasing from abundance of pasture, keep being practically assured for some time longer.

The sheep sales in progress in many parts of the country continue to be attended with most satisfactory results, both in respect to the demand and the prices realised for keeping sheep of every class, store ewes for grazing being eagerly sought after at hardening values, as also are working lambs, the shortage of sheep everywhere continuing to operate strongly in keeping prices phenomenally high.

As a consequence of stockowners being just now so much otherwise engaged, only very moderate supplies of fat stock of any kind are being sent to market at present, and to this circumstance as much as anything must be ascribed the existing buoyancy in the trade all round, and, although we have no advance to quote in prices, values are fully maintained all round. Beef continues to show very good quality, both steers and heifers, the best of which sell readily up to 12s. per score (or from £16 to £23 each) ; but cows cannot be quoted more than 10s. to 10s. 6d. (or from £15 to £18 each) ; and for coarse heavy bulls, which are selling from £16 up to £21 or £22, 8s. to 9s. is a correct approximate of value. Mutton, which is the scarcest thing on the market, is correspondingly firm in price, best wethers selling from 48s. to 61s. or 62s. each (or 8½d. to 9d. per lb) ; the range for ewes being from 7½d. to 8d. (or 44s. to 58s.) ; lambs, which have now attained full weight, selling from 36s. to 54s. apiece (or 10d. to 11d., and occasionally for special weights, 1s.).

The veal trade is also characterised by considerable firmness, the ripest finding a quick sale at from £4 to £6 10s. each (or 8½d. to 9d. per lb.), and the more ordinary runs 1d. per lb. less money. Pigs are also in very general request, and some difficulty is experienced in meeting the call for neat porkers, which command a very quick sale at 10s. 6d. to 11s. per score, and 9s. 6d. to 10s. for baconers. Heavier weights also met a ready sale at their value.

Trade in Ireland

Dublin stock market on Thursday was very largely attended by buyers, both from across the Channel and at home. The quantity of stock penned was very large (4,302), being over 200 over the previous week. There was a very satisfactory inquiry from buyers in the afternoon, though in the early morning they seemed inclined to hold off a bit. Well-finished cattle were most in request, and they were rather limited in number ; coarse and lean cattle not much inquired for, and a clearance in such cattle could not be anything like done. The number of second rate cattle left unsold at the close of the day was very large. Live weight prices ruled from 30s. to 34s., and prices for dead weight were :—Best ox and heifer beef from 52s. 6d. to 59s. 6d. for existing claims ; good second class beef, 47s. 3d. to 50s. 9d., and inferior beef from 42s. to 46s. per cwt. Scondary and coarse beef decidedly harder to seek, and at a lower price.

Mutton was also in poor request, and with a very large market of sheep. Reports from England had a discouraging effect on buyers, and on the whole the mutton market was a disappointing one. A number of heavy sheep could not find purchasers, and had to be kept over unsold. Lambs also made a depressed market, and values generally favoured buyers, sometimes to the extent of from 1s. to 2s. per head ; small and thin sheep not wanted. Prime wether mutton was worth from 7½d. to 8d. per lb. ; prime ewe, 6½d. to 7½d. ; and inferior mutton from 6d. to 6½d, per lb. Heavy, well-fed hoggets paid from 52s. to 62s. each, and small to medium from 36s. to 48s. Best large fat lambs made from 30s. to 42s. each ; and small to medium, 22s. to 28s. each. Veal was a featureless trade ; choice calves worth 7½d. to 8d. per lb. ; other sorts from 4½d. per lb. upwards.

In the dairy market there were a lot of second-rate cows, which were met with a sluggish inquiry. Prime milchers met with a ready sale, and prime springers were in request. First-class cows suitable to English centres cleared easily at late rates. Prime milch cows were worth from £15 to £18 ; and prime springers, £18 to £19. Store cattle of good forward quality also sold fairly well.

Dublin Pig Market on Thursday had a large attendance of buyers, but, notwithstanding this fact, trade was of a slow, dragging nature all through, and buyers, taking advantage of the large supply of pigs, bought cautiously and slowly. Englishmen and shippers purchased only when factors gave way as much as 2s. per cwt. compared with last day's price. Choice porkers did not share so much in the general reduction as they were limited in number. It was said that the general reduction in Dublin market was as much as from 3s. to 4s. per cwt. ; but taking everything into consideration a fairly good clearance was made. Small choice bacon pigs were sold at from 50s. to 53s. per cwt. ; heavy ditto, 48s. to 50s. ; inferior pigs, 35s. to 40s. per cwt. Store pigs in good demand, and worth from 25s. to 55s. each, according to age, size, &c. ; a good inquiry at firm rates.

LONDON.

Central Market, Friday.—Fair supplies, and trade slow but firm for good meat. English beef, 3s 8d to 3s 10d ; Scotch sides, 4s to 4s 2d ; shorts, 4s 4d to 4s 6d ; Deptford and Liverpool killed, 3s 4d to 3s 10d ; refrigerated hindquarters, best, 3s 10d to 4s ; ditto seconds, 3s 7d to 3s 9d ; ditto forequarters, 2s 4d to 2s 6d ; inferior beef, 2s 2d to 2s 8d; mutton, Scotch wethers, 5s to 5s 4d; ditto tegs, 5s 4d ; ditto ewes, 3s 4d to 3s 8d ; English wethers, 4s 4d to 4s 8d ; ditto ewes, 3s 4d to 3s 8d ; Dutch sheep, 4s 4d to 4s 8d ; English lamb, 5s to 5s 4d ; veal, 3s 4d to 4s 8d ; English pork, 3s 8d to 4s ; Dutch pork, 3s 8d to 4s per 8 lb.

Islington, Thursday. — To-day's supply of beasts consisted entirely of fat cows and bulls from the South-Western counties, trade for which ruled slow at Monday's values. Top prices paid per 8 lb :—Fat cows, 3s 4d to 3s 6d ; fat bulls, 2s 9d to 3s 2d. A decrease of 99 in the number penned in sheep market compared with Thursday last. Trade for both sheep and lambs ruled extremely slow, prices favouring buyers, but not sufficiently so to quote any lower rates. Best pens made per 8 lb as follows :—7½ to 8 stone Down sheep, 6s to 6s 2d ; 9 stone ditto, 5s 10d to 6s ; 10 stone halfbreds, 5s 6d to 5s 8d ; 10 stone Down ewes, 4s to 4s 2d ; 5 stone fat grass lambs, 6s 6d to 6s 8d ; 6 stone halfbred ditto, 6s 2d to 6s 4d. Calf trade ruled extremely slow at less money. Quotations per 8lb, sinking the offal :—Beasts, 2s 9d to 3s 6d ; sheep, 4s to 6s 2d ; calves, 4s to 5s ; lambs, 4s 10d to 6s 8d.

COUNTRY.

Ashford, Tuesday.—Trade was rather slow, but prices were unaffected. Best beef made 4s 8d to 5s, and cows 3s 10d to 4s. Mutton sold slowly, best small Kents making up to 5s 8d. Veal rather better at 5s 4d to 5s 8d. Pork : A fair trade up to 4s. Store lambs continue to make very high prices.

Bath, Wednesday.—There was a small attendance. Beef made 60s to 68s per cwt, and lamb 9d per lb.

Berwick, Saturday.—Attendance of farmers and buyers fair, and trade dull. Calves, £5 10s to £6 15s ; heifers, £7 15s to £9 10s ; stirks, £8 to £11 10s each.

Birmingham, Thursday.—Fair supply of pigs ; small supply of beasts and sheep. Trade fair for bacon pigs, but slow for beasts and sheep. Quotations :—Beef, 5½d to 6½d per lb ; Herefords, 6¾d per lb ; mutton, 6½d to 8½d per lb ; lamb, 8¾d to 9d per lb ; bacon pigs, 10s to 10s 3d per score ; cutting pigs, 10s to 10s 3d per score ; sows, 8s to 8s 3d per score.

Bristol, Thursday.—At Bristol market to-day beef was in moderate quantity, but in little request, and business was dull at last week's prices. Dairy cows were fairly numerous at late rates. Mutton was in fair supply, and trade steady at last week's quotations, except that prime wethers advanced a point to 8½d per lb. Lamb was plentiful and unchanged, whilst pigs were again scarce with values unaltered.

Calne, Saturday.—Prices of pigs :—In lots of not less than ten, on rail within 100 miles, 1s. per pig extra for delivery by road. Prime stores, 6 sc. 10 lb to 8 sc. 10 lbs, 10s per score, 8 sc. 11 lb to 9 sc. 10 lb,, 9s 6d per score ; 9 sc. 11 lb to 10 sc. 10 lb, 9s. Pigs outside these limits at their value.—C. and T. Harris and Co., Ltd.

Canterbury, Saturday.—The trade for lambs was not so fast to-day, though fair prices were realised. Working lambs ranged from 20s to 25s, and better class up to 30s. An exceptionally good lot of wether lambs also changed hands at 38s, and some half-breds at 33s. There was a larger supply of breeding ewes ; some registered ewes made from 35s to 70s ; average runs of good-mouthed ewes from 40s to 44s, and others rather rough in the

tooth from 22s to 28s per head. Cows and calves, £11 to £15.

Carlisle, Saturday.—The recent bad weather had an adverse effect on trade, buyers being anything but numerous. Small heifers, £6 10 to £8 10s; better sorts, to £10 10s; heifers for stall feeding, £10 10s to £12 10s; exceptionally good sorts for figishing off, £16.

Chester, Thursday. — Good supply of cattle and sheep. The demand was brisk, and a good many lots were sold at satisfactory prices. Owing to the farmers getting in the corn there not a numerous attendance of buyers. Prices:—Milch cows, £17 to £22; calvers, £15 to £19; barrens, £10 to £13; heifers, £8 to £15; stirks, £5 to £9; and bullocks, £12 to £14; sheep, 18s to 35s.

Derby, Tuesday.—An average supply of beasts and sheep; prices for best qualities well maintained. Beasts, 5½d to 7d; calves, 8d; sheep, 7½d to 9d; lambs, 10d per lb.

Doncaster, Saturday.—Moderate supply of horned stock, mostly Irish stores, making £12 10s to £14. Dairy stock met a bad trade. The best in-calf or newly calved cows made up to £21. Large show of sheep, but not much trade. Lambs, 33s to 46s; ewes, 45s to 55s per head. Small supply of pigs.

Dorchester, Saturday. — Considering how busily engaged farmers are just at present with the harvest, there were quite as large supplies at Messrs. Ensor and Son's repository sale to-day as could have been expected, and buyers were also well represented. Everything at all serviceable found a quick sale at good prices all through, the milch beasts trade having lost none of its old buoyancy, heifers and calves, about which there was nothing very special, realising £14 to £17 5s, whilst cows with calves made £15 to £18 15; barreners, £20 to £24 per pair; store Devon steers, £21 per pair; yearling heifers, £6 17s 6d each; stock bulls up to £12 15s. Fat beef met a steady consumptive sale at 11s to 11s 6d per score for the best, heifers bringing £16 to £18 10s, whilst fat bulls sold up to £21 10s each (or 9s to 10s per score). Nothing doing in mutton.

Dublin, Thursday.—Numbers in market: Beasts 4,302, increase 222; sheep 10,670, increase 1,353; calves 32, increase 22. There was again a slow trade for cattle, with prices in favour of buyers. A few choice lots about touched last week's extreme, but the general run of beasts, and particularly those of an unfinished description, were from 5s to 10s per head lower. The large increase in sheep and lambs had a quietening effect on trade; the very choicest sheep barely bringing late rates. Other sorts not so easily placed. Buyers secured their lambs on better terms, the reduction being well marked on any but fancy lots. Cattle—Live weight (best), 31s to 32s 6d per cwt; secondary and inferior, 27s to 29s 6d per cwt. Mutton, dead weight, 6½d to 7¾d per lb.—Ganly, Sons and Co.

Edinburgh, Wednesday.—Fair trade, with light supplies. Sheep in steady demand; half-bred sheep to 44s; Cheviot sheep to 39s; half-bred lambs to 32s; Cheviot lambs to 24s; Cheviot Dinmonts to 31s. Cattle: Bullocks sold from £14 to £15 10s. Cows improved trade; Ayrshires to £20; Shorthorns to £26; crosses to £24 10s.

Exeter, Friday.—Large supply of fat beasts. Steers and maiden heifers, 11s 6d; cows, 10s 6d per score; small wethers and shorn lambs, 9d; lambs in wool, 10d to 11d; ewes, 6½d per lb; breeding ewes, 42s to 43s; calves, 7½d per lb.

Glasgow, Wednesday. — Average show of cattle. The demand experienced was best for prime handy shop bullocks. Inferior sorts met slow sales, prices favouring buyers. Top, 62s to 65s; secondary, 56s to 59s per cwt. A fairly good number of sheep penned, and for best class of hogs and wethers a good inquiry was made. Finest mutton, 9¼d to 9½d; secondary, 8¾d to 9d per lb. Prime lambs being scarce, met a good trade from 8d to 9½d per lb.

Hereford, Wednesday.—A large supply of beef, for which trade was slack, best quality not making more than 6½d to 6¾d; cow beef, 5d. Calves were too large a supply, and trade was dull; veal, 6½d. A good supply of sheep; wether mutton, best quality, 8d to 8½d; ewe mutton, 7d. A lot of store ewes sold well. Fat and store lambs were dear. Pig trade firm, porks fetching from 5½d to 6d. Stores a trifle better trade. Store cattle a small supply, and trade dull.

Leicester, Saturday. — Exceptionally large consignments of home-bred bullocks, which came to hand in excellent condition. Buyers were well represented, and trade ruled active at high prices, pasturage being abundant. Choice milch cows, £19 to £21; good lots, £17 to £18; secondary, £14 to £16; Shorthorn bullocks, £15 to £17; choice Irish cattle, £18 to £19 10s; good lots, £14 10s to £17; Welsh cattle, £12 to £16 10s; heifers, £12 10s to £15 10s; calves, 20s to 40s each. Sheep firm.

Lincoln, Friday.—Average consignment of horned stock, and a good demand. Young beasts, £9 to £12; milch cows, £17 to £21. A fair supply sheep and a brisk trade. Young to ewes 56s; lambs, 36s to 42s,

Manchester, Friday.—Beef: Firsts, 5½d; seconds, 4½d to 5d; thirds, 3½d to 4d. Mutton: Firsts, 7½d; seconds, 6½d to 7d; thirds, 5½d to 6d. Veal: Firsts, 6½d; seconds, 5½d to 6d; thirds, 4½d to 5d. Lamb: Firsts, 7½d; seconds, 6½d to 7d; thirds, 5½d to 6d.

Newcastle, Tuesday.—Prices for cattle were easier, and trade was slow. Prime heifers, 7s 6d to 7s 9d per stone; second class, 7s to 7s 3d; prime steers, 7s 3d to 7s 6d; second-class, 7s to 7s 3d; coarse and inferior, 6s 6d to 6s 9d. Sheep and lambs were a larger supply, and trade was heavy with drooping prices. Choice young sheep, 8¼d to 8½d per lb.; strong heavy, 8d to 8¼d; choice lambs, 9d to 9½d; second-class, 8½d to 9d; ewes, 6d to 7d; rams, 5d to 6d. Veal was quiet at 6d to 7d per lb.

Newport, Wednesday.—Average supply of stock, and a large attendance of buyers with a very brisk trade. Best beef, 6½d to 6¾d per lb; seconds, 6¼d; cows, 4¾d to 5¼d; best wether mutton, 8½d to 8¾d; ewes, 7d to 7½d; lamb, 9d; calves, 7d to 8½d; porker pigs, 10s 6d to 11s per score.

Norwich, Saturday.—Fat cattle prices were hardly so good, the best not making more than 7s 10d, medium sorts 7s 5d, and cows 6s 9d per stone of 14 lb. Veal calves were dearer at 8½d per lb. The best mutton remained unchanged at 11s, but other qualities were hardly so dear at 8s to 10s per stone. A small show of good quality fat pigs, which met a good trade, porkers making 7s, baconers 6s 3d to 6s 9d, and sows 5s 3d per stone. Trade for store cattle was rather slow and dear, best three-year-olds fetching up to £18 10s; two-year-olds to £13 10s; yearlings from £7 15s to £10 10s; and smaller ones from £5 10s to £7 per head. Rearing calves were in short supply, and sold dear at 26s to 52s. Store ewes were not so good as last week, but trade remained the same, best Suffolk yearlings making from 60s to 68s; cross breds, from 54s to 58s; others, from 40s to 50s; and lambs, from 32s to 43s 6d per head. Trade for store pigs was sharper at 14s to 26s.

Nottingham, Saturday.—Best milch cows, £17 10s to £21 10s; heifers, to £20; store stock, £10 10s to £13; small store beasts, £6 to £9 15s; calves, 30s to 45s each.

Preston, Wednesday.—Excellent supplies of stock in all departments, but trade ruled slow, and prices had a downward tendency. Quotations:—Local-fed heifers, 6¾d; Irish-fed ditto, 6¼d to 6¾d; choice young cows and bulls, 6d; secondary ditto, 5d to 5½d; lambs, 9d; hoggs, 9d; young ewes, 7d; heavy tups and ewes, 6¼d; calves, 7½d per lb.

Retford, Saturday. — Milch cows of good quality were saleable at £16 to £20; inferior sorts, £14 to £15. No change in the value of young stock, two-year-old steers and heifers making £10 to £13, and calves, 35s to 45s. each.

Romford, Wednesday.—Fat beasts in average supply; trade about the same. Best animals, 4s 4d to 4s 6d; middlings, 3s 10d to 4s per stone. Calves in large supply; trade about the same at 5s to 5s 6d per stone. Sheep in large supply and dear. Best small sheep, 5s 8d to 6s; large sheep, 5s 2d to 5s 4d per stone. Ewes also in large supply, but trade slow at 4s to 4s 2d per stone. The few lambs on offer met a firm trade at 6s 6d to 6s 8d per stone. No store beasts on offer. Milch cows in good supply; trade a little better. Small supply of pigs; trade slow. Small porkers, 3s 8d to 4s; large hogs, 2s 8d to 3s per stone.

Sheffield, Tuesday.—A better show than last week, and trade slightly brisker. Good milch cows made £18 to £20, younger stock, £13 to £14 10s.

Shrewsbury, Tuesday.—Good supply of store cattle, but short supply of fat cattle. Prices and demand good. Usual quantity of calves, sheep, and pigs. Fair trade all round. Quotations:—Beef, 6½d to 7d per lb; mutton (wether), 9d per lb; ewes, 8d per lb; lamb, 9d to 9½d per lb; veal, 7d to 8d per lb; porket pigs, 10s per score.

Stockton, Wednesday.—Numbers on offer: 107 cattle, 208 sheep, 517 lambs, and 133 pigs. A rather better show of the best cattle, which met with a slow trade at 7s 6d to 8s per stone, whilst rougher kinds sold at 6s 6d to 7s. Lambs sold at 10d per lb, young sheep 9d, ewes 7½d, and tups 6½d. Small porkers made 7s 6d per stone, m diums 7s, and sows 6s 3d to 6s 6d.

Thame, Tuesday.—There was again a capital entry of stock, although not quite so large as the previous week. Buyers were again in evidence, all the neighbouring towns being represented. Trade for beef was not quite so good, although a clearance was effected. Mutton was in great demand, every pen being disposed of. Small supply of bacon and pork, which met an excellent trade, many more could have found purchasers. Veal at late rates. Messrs. Bond and Burrows' sale comprised 101 fat beasts, 368 fat and store sheep, 65 fat and store pigs, and 81 fat and weaning calves. Fat oxen made from £16 to £22 5s; fat heifers, £14 10s to £19 10s; fat wethers sheep, 52s to 64s; fat ewes, 42s to 57s 6d; fat lambs, 35s to 47s 6d; fat calves, £3 to £4 10s; weaning cow calves, 30s to 62s; bull calves, 20s to 45s; bacon hogs, £3 5s to £4 10s; porkers, 28s to 42s; store pigs, 16s to 23s.

Truro, Wednesday.—Attendance very good; business rather slow. Fat bullocks, 56s to 58s per cwt; barreners and store bullocks, 40s to 45s; cows and calves, £10 to £14 each; rearing calves, 15s to 35s; wethers, 7d to 7½d per lb; ewes, 5d to 5½d; lambs, 7d to 8d; pigs, 9s 6d to 40s; beef, 6d to 8d per lb; mutton, 6d to 8½d; lamb, 8d to 9d; veal, 6d to 8d; pork, 6d to 8½d; pork, carcases, 5d to 5½d.

Wolverhampton, Wednesday. — Better supply; moderate demand. Quotations:—Beef, 5d to 7½d; calves 7d to 8d; sheep, 7d to 9d per lb; lambs, 9½d per lb; bacon pigs, 10s 3d per score; porkets, 10s 10d per score; cows, 8s 3d per score.

Worksop, Wednesday.—Small supply of stock, with a good trade for sheep. Beef down about 9d per stone. Best beef, 7s 6d to 7s 9d; cow beef, 6s 9d to 7s 3d per stone; best Southdown wethers and cross-breds, 8d to 8½d; ewes, 6d; veal, 7½d per lb.

FEEDING STUFFS.

Hull, Tuesday.—Linseed: On lighter shipments and a better oil market linseed has been more active, and prices have recovered about 6d per qr. Plate: Spot sold at 40s, after 39s 6d taken, August-September 41s nearest. Duluth; September-October 41s 3d wanted. Petersburgh: 41s to 41s 3d, according to position. Cottonseed: There has been a decline in Egyptian values during the week, and £8 accepted ex store, whereat sellers August shipment. New crop September offers at £7 17s 6d, a little November-January done at £7s 1s 3d, with further sellers. Trade for both linseed and cottonseed oils is quiet at following rates:—Linseed, 21s 9d spot, 21s 7½d August, 20s 10½d September-December. Cottonseed: 27s 9d spot, 26s 6d September-October, 23s 3d November-April. Oilseed Cakes:—Linseed: A rather firmer feeling, with good demand for time of year. Cotton: Best scarce and firm. Bombay rather firmer, with very good deliveries.—Keighley, Maxsted & Co.

Liverpool, Friday.—Nitrate of soda is quiet as usual at this date, and £11 to £11 5s. is quoted on the spot according to quality. In phosphatic manures some inquiries are experienced for autumn deliveries, and values are firm. Feeding stuffs are only a slow trade, but values are fairly maintained.

—H. Jones Langar and Co

Mark Lane, Monday.—Linseed Cakes: There is no actual improvement in the consumptive demand, but a general impression exists that values, in sympathy with other feeding stuffs, are likely to harden, and there are free speculative buyers at 2s 6d to 5s premium on spot prices for autumn and winter deliveries. Russians move move off quietly at £7 2s 6d to £7 5s. in mats,

and £7 7s 6d to £7 8s 9d for the better qualities in bags. East India seed pures make £7 5s to £7 7s 6d. Fine seedy Calcuttas command £7 7s 6d to £7 10s. London made meet a better inquiry being relatively the cheapest cake on the market at £7 7s 6d to £7 10s. Cotton cake.—A comparatively small quantity of Egyptian remains in warehouse, and with no further arrivals due for two or three weeks. Holders are firm at £4 15s to £4 16s 3d, while English makes continue scarce and fully as dear at £4 17s 6d to £5, and Bombays at £4 to £4 2s 6d. Decorticated.—London made pures meet a ready sale at £7 2s 6d to £7 5s, and special digestive meal at £5, with American meals quiet at £6 12s 6d to £7, as to quality. Rape cakes.—Nominal. East India, £4 17s 6d. Ravison none. Maize germ meal.—White American is not obtainable at the moment, and English manufacturers have again raised their limits and are now asking £6 to £6 2s 6d. Maize gluten meal is in good request at £6 5s. Rice meal.—Landed lots of Rangoon make £4 18s 9d to £5, but there are still some second-hand sellers of steamer parcels for shipment at £4 16s 3d to £4 17s 6d, ex ship terms. Locust beans are without change at £5 10s for whole and £5 15s for kibbled. Dried brewers' grains offer sparingly, at £4 15s for ale and £4 10s for mixed. Nitrate of soda is unaltered at £11 2s 6d ex quay. —Pinnock Bros.

Worcester: 10d to 1s 2d. Worksop: 1s to 1s 1d. York: 1s to 1s 2d.

COLONIAL DAIRY PRODUCE.

London, Tuesday.—The production of butter and cheese in the United Kingdom continues to be abnormally large. The demand for Australian and New Zealand butter has been about the same as last week, and prices remain unaltered. Canadian is still in small supply, but is making 104s and 108s per cwt. Foreign butters are slow of sale on this market, and in the North of England prices are easier. Cheese.—The demand for Canadian is hand-to-mouth, and prices on spot are unchanged from last week. Cables from Canada are slightly easier. — W. Weddel and Co.

CHEESE.

Glasgow, Wednesday.—Moderate arrivals of home cheese. The inquiry was limited for this period of the year. Values tend in favour of buyers. Cheddars, 57s to 61s per cwt; Dunlops, 54s to 59s. New Canadians are dull of sale, and are quoted off and on at 57s.

Highbridge, Tuesday.—A large attendance of buyers, a brisk competition, and all cleared. Best Caerphilly dairies realised up to 57s per cwt.; secondary dairies, 51s to 53s 6d; and other dairies, 47s to 50s. A few inferior lots failed to reach 40s. Cheddars, old, 72s; ditto, new, 56s to 60s; truckles, 53s to 58s 6d; doubles, 52s to 57s.

Newport, Wednesday.—There was an average attendance and a good demand. Caerphillies, 35s to 52s per cwt; fancy dairies, 53s to 56s; Derbies, 50s to 56s; truckles, 54s to 62s; Cheddars, 52s to 54s.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Large and varied supplies of fruit and greenstuffs at market, business being fairly brisk and prices moderate. Quotations for English produce:—Grapes, 6d to 2s 3d; pears, 2s 6d to 5s per bushel; apples, 2s 6d to 7s per bushel; plums, 2s to 3s green figs, 1s 6d to 4s; nectarines, 2s to 10s per doz; peaches, 2s to 10s per doz; greengages, 2s to 3s 6d; melons, 1s to 2s; filberts, 4s 6d to 5s per 12 lb; tomatoes, 3s to 3s 6d; cabbage, 2s 6d to 3s 6d; vegetable marrows, 2s 6d to 3s 6d per tally; scarlet runners, 1s to 2s; broad beans, 1s to 1s 6d per bushel; beetroot, 1s 3d to 1s 6d; mint, 1s to 1s 3d; parsley, 1s 6d; carrots, 1s 6d to 2s; turnips, 1s 6d to 2s 6d per dozen bundles; mushrooms, 6s to 10s per 12 lb; cucumbers, 4s 6d to 6s per flat; endive, 1s 3d to 1s 6d per dozen; green peas, 2s to 4s per bushel; cauliflowers, 1s to 1s 6d per dozen; potatoes, 50s to 70s per ton.

POULTRY AND GAME.

Smithfield, Saturday.—Supplies moderate; trade fairly good. Black game, 2s; quails, 1s 6d; feathered pigeons, 1s; Bordeaux pigeons, 1s to 1s 6d; live hens, 1s 6d to 2s; country ducks, 2s to 2s 6d; Aylesbury ducks, 2s 3d to 2s 6d; Irish fowls, 1s 4d to 2s; Essex fowls, 1s 6d to 2s 3d; Lincolnshire fowls, 1s 9d to 2s 6d; Sussex fowls, 2s 6d to 3s 3d; Surrey fowls, 3s to 3s 6d; goslings, 4s to 5s; tame rabbits, 1s 2d to 1s 4d; wild rabbits, 6d to 10d each; Australian rabbits, 6s to 7s per doz; young grouse, 4s 6d to 5s 6d; old grouse, 2s 3d to 3s 6d per brace.

WOOL.

London, Saturday.—English—per pk. of 240 lb.—Fleeces, South Down hoggs, £14 10s to £15; half-bred hoggs, £13 to £13 10s; ditto wethers, £12 10s to £13; Kent fleeces, £12 5s to £12 10s; South Down ewes and wethers, £13 10s to £14; Leicester ewes and wethers, £12 to £12 10s. Colonial—per lb.—Vic., scoured super., 2s 2d to 2s 3d; scoured, good, 1s 11½d to 2s 1d; scoured, average, 1s 10d to 1s 11d; greasy, average to fair, 1s 1½d to 1s 2½d; N.S.W., scoured, average, 1s 9½d to 1s 10½d; greasy, average, 1s to 1s 1d; S. Aus., greasy, average, 10d to 11d; N.Z., scoured, average, 1s 10d to 1s 11d; greasy, average, 11d to 11½d; Cape, scoured, super., 1s 9½d to 1s 10½d; fleece, average, 9½d to 10½d; greasy, average, 8½d to 9½d; Natal, scoured, 1s 5½d to 1s 6½d; greasy average, 8½d to 9d. Crossbreds—grs.—Vic., good to super., 1s 3½d to 1s 4½d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s to 1s 1d; coarse, 10d to 11d.

Halifax, Saturday.—Business following the various holidays, which are now nearing the end, is becoming very buoyant, and good prospects are assured in several directions. Home grown wools are in better demand, and prices, where they had not already been advanced, have been put up during the week, Lincoln and Irish among them.

A fire broke out on Sunday last on the premises of the Yorkshire Cake Mill, Hull, occupied by Messrs. Keighley and Co., and damage to the extent of several thousands of pounds was done. The building was 64 yards by 17 yards, two storeys high, and substantially built. When the Police Fire Brigade arrived the whole place was in flames. Several branches of hose were affixed, and there being a plentiful supply of water the fire was soon under control. The mill contained a large quantity of machinery and presses, and the warehouse was largely stocked with seed for cake making, the whole being destroyed, but a large portion of cake and the boiler-house was saved.

At a meeting of the Management Committee of the Birmingham Grocers' Association last week the chairman (Mr. G. Bolton) called attention to the Small Holdings Bill of the Government, and proposed the following resolution:—"That this association respectfully asks for the serious consideration of Clause 39 of the Small Holdings and Allotments Bill now before the House of Lords, feeling that it will be very unfair to shopkeepers generally, in that it will compel them to supply financial assistance through the rates to co-operative societies, which are in direct opposition to the shopkeepers." He said the measure affected not only grocers, but every retail trader in the United Kingdom. The promoters of the Bill appeared to think that the co-operative society was the only means of distributing the produce of the land to the public, but he failed to see that the private trader had lacked in his efforts in that direction. He rather thought it was the question of railway rates which the Government should tackle. If they wanted to give any assistance to the land that was the point which they should consider. The resolution was passed, and it was decided to forward copies to the House of Lords and the House of Commons, to the Grocers' Federation, and to the members of Parliament for Birmingham.

The first annual meeting of the Federation of Dairy Farmers' Associations for Scotland was held at Kilmarnock on the 9th inst. The report, which was adopted, showed that the federation had carried on much useful work. Milk prices were discussed, and the secretary instructed to issue lists of those obtained throughout the season to the secretaries of branches. The secretary was instructed to petition the Board of Agriculture to issue lists of milk prices during certain seasons, as such would be of great benefit to farmers.

Many well-known firms have taken space at the twenty-ninth Brewers', &c., Annual Exhibition and Market, to be held at the Royal Agricultural Hall, Islington, N., on October 19 to 25, and the whole of the ground floor of the main building is now allotted, whilst but little space is available in the minor buildings. The exhibits of machinery at the forthcoming market promise to be the finest for many years.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

Up to August 24 the rainfall, though spread over fourteen days, had not exceeded 1½in. The 26th, however, was very wet and added a full half inch. Since the 28th fine weather has prevailed in Southern England, though in Lancashire the 29th had eight hours' rain. Most of the English stations ended in showing an August rainfall of from 2 to 2½in. The low evaporation and the prevailing humidity of the atmosphere caused this rainfall, not excessive in itself, to delay harvest very seriously and to cause a general want of condition in the new samples. The progress made since the 28th, however, has been very rapid, and if the present weather continues, the completion of the harvest should not be postponed in England beyond the middle of September. In Scotland and Wales it will not, we, fear, be over before Michaelmas. Most observers are agreed in putting wheat at 30 bushels, but there will be no more than a usual proportion of tail corn. Foreign wheat harvests are now put at 41,000,000 qr. for France 20,000,000 qr. for Austria-Hungary, 14,000,000 qr. for Germany, 6,000,000 qr for Roumania, and 20,000,000 qr. for Italy. The yield in Russia is not yet at all accurately ascertained. The wheat crop of the United Kingdom is estimated at 6,250,000 qr. by *Dornbusch*, and at 5,400,000 qr. by *Beerbohm*, thus the great authorities of the shipping world are in fairly close agreement. The former puts the American wheat crop at 88,500,000 qr., including Canada, whereas last year the United States and Canada combined produced 105,500,000 qr. The production of wheat in Japan this year is stated to have been 10 per cent. below an average, whereas last year there was a 20 per cent. surplus. The next twelve months may easily see a steady demand by Japan for breadstuffs, which will probably be imported in the form of flour.

During the last six trading days of August foreign wheat was held for 1s. to 1s. 6d. advance on the chief British markets, as supplies of the new home crop were much below anticipation.

The wheat prices now ruling lie very generally between 33s. and 36s. per qr.

Nottingham	36s. 7d.	per qr.
Canterbury	32s. 11d.	,,
Range ...	3s. 8d.	per qr.

Barley averages are taken from very few markets as the new crop is not yet in evidence and the old is almost entirely exhausted.

Nottingham	26s. 9d.	per qr.
Salisbury	23s.	,,
Range ...	3s. 9d.	per qr.

Oats are becoming a little less scarce at the markets where home produce is officially quoted. The new deliveries of winter oats account for the comparatively low prices at Cambridge, Chelmsford, &c.

Nottingham.....	23s. 3d.	per qr.
Chelmsford	16s. 9d.	,,
Range	6s. 6d.	per qr.

The sales of English wheat at the statute markets for the fifty-one completed weeks of the cereal year are :—

This season ... 2,694,000 qr. at 27s. 10d. per qr.
Last ,, ... 2,847,000 qr. at 28s. 9d. ,,

Of English barley the sales show an increase on the fifty-one weeks :—

This season ... 3,370,000 qr., at 24s. 6d. per qr.
Last ,, ... 3,203,000 qr., at 24s. 3d. ,,

Of English oats the sales have been :—

This season 1,187,000 qr. at 18s. 5d. per qr.
Last ,, 940,000 ,, 18s. 6d. ,,

Imports into the United Kingdom last week were as follows :—

Wheat	409,000 qr.
Flour	50,000 ,,
Breadstuffs	459,000 qr.
Maize	369,000 ,,
Barley	47,000 ,,
Oats	129,000 ,,

The imports of flour are commonly reckoned as equal to 280,000 sacks. The total receipts of breadstuffs from abroad would be above needs for ten months out of the twelve, but just now, when old English wheat is exhausted and new is still a very scanty quantity, the demand is in excess of supply. Maize arrivals fully exceed current demand here when the small supply of foreign barley is considered. Imports of oats may be termed a full average.

The imports of the United Kingdom for the cereal year ended on Saturday last are not yet published, but the following figures will not be found to vary very materially from the eventual and exact returns.

Wheat	21,923,000 qr.
Flour	4,525,000 ,,
Breadstuffs	26,448 000 ,,
Maize	12,023,000 ,,
Barley	5,309,000 ,,
Oats	5,076,000 ,,

In the previous cereal twelvemonth imports of wheat, flour, barley, and oats were larger, but those of maize were materially smaller than in the cereal year just past. The maize doubtless has mainly gone to make up for the deficiency in grinding barley and in light oats.

American shipments last week were 290,000 qr. of wheat, 40,000 qr. of barley, 10,000 qr. of oats, 91,000 of maize, and 69,000 sacks of flour. The very small exports of flour are noticeable.

Argentine shipments are 20,000 qr. of wheat, 189,000 qr. of maize, 17,000 qr. of linseed, and 3,500 qr. of oats. This is the period of the year when Argentina is but a very moderate shipper.

Russia, on the other hand is usually beginning before August is over to make some exports of her new crops.

The present season is by no means an exception, and last week's shipments were 165,000 qr. of wheat, 395,000 qr. of barley, 135,000 qr. of oats, and 136,000 qr. of maize. Roumania supplemented these exports with 65,000 qr. of wheat, 30,000 qr. of barley, 7,000 qr. of oats, and 90,000 qr. of maize.

Other shipments last week were 96,000 qr. of wheat, 19,000 qr. of linseed, and 16,000 qr. of rapeseed from India, and 17,000 qr. of wheat from Australasia.

The quantity of wheat on passage on August 31 was 2,092,000 qr., whereof 390,000 qr. were American, 224,000 qr. Californian, 100,000 qr. Russian, 628,000 qr. Indian, 240,000 qr. Argentine, 500,000 qr. Australasian, and 10,000 qr. Persian. The total was 408,000 qr. below the average.

Of flour only 138,000 sacks were on passage, or 112,000 sacks below the average.

Of barley 390,000 qr. were on passage, including 270,000 qr. Russian, 60,000 qr. Asiatic, and a like quantity from the Amerian seaboards, Pacific and Atlantic. Of oats only 100,000 qr. were on passage.

Of maize 850,000 qr were on passage, whereof 450,000 qr were Russian, Roumanian, and Turkish, 230,000 qr were Argentine, and 170,000 qr were American. The total was 100,000 qr above an average.

Other quantities on passage were 69,000 tons of rice, 179,000 qr of linseed, 29,000 tons of cotton-seed, and 36,000 qr of rapeseed.

LONDON HAY TRADE.

Saturday.—Supplies are now coming along on a very much larger scale, and with the demand keeping of a very poor nature values are again easier. A very large portion of the arrivals consist of new stuffs in a very badly got and damaged condition, for which some very low prices have been accepted; if fact, for some very bad lots salesmen have only been too glad to get out of for 40s per ton. For really prime new hays about 62s 6d to 65s per ton; for best new clovers, 75s to 80s per ton, and for best new mixtures about 70s 6d per ton represent current values.

There seems to be little doubt that the hay trade is in for a very bad spell, as, although supplies of prime stuffs are short, the large arrivals of inferior quality of all kinds which have to be got rid of at any prices, give the market a feeling of all-round depression. Old hays hays, clovers, and mixtures, although coming along short, meet a poorer demand day by day, and in consequence are about 2s. 6d. per ton lower. Straw, owing to harvest operations limiting supplies, is inclined to go dearer, but for the moment previous quotations are about value. There is very little doing in the foreign market, with a weakening demand importations are falling off, and prices are nominally unaltered.

Prices ruling are about as follows :—English 1906 crop. Best meadow hay, 82s 6d per ton; good meadow hay, 70s to 80s per ton; plain hays, 66s to 67s 6d per ton; best clovers, 92s 6d to 95s per ton; good clovers, 82s 6d to 90s per ton; inferior clovers, 77s 6d to 80s per ton; prime mixtures, 92s 6d per ton; good mixtures, 80s to 90s per ton; plain mixtures, 72s 6d to 77s 6d per ton; seconds hays, clovers, and mixtures, 50s to to 60s per ton; wheat straw, 26s to 28s per load; oat straw, 26s to 28s per load; barley straw, 26s to 28s per load. All ex rail London. Foreign: Canadian mixture, 80s to 82s 6d per ton; first quality Dutch hay, 65s per ton; second quality Dutch hay, 60s per ton; New French first cut clover, 75s per ton. These prices are by the barge load delivered alongside a London Thames wharf.

THE BALTIC.

Wheat cargoes advanced 6d. to 1s. per qr. from August 26 to 29, but on the 30th and 31st there was a pause. Prices made on Saturday included 36s. 3d. per 480 lb. for Argentine, 36s. 7d. per 500 lb. for Walla Walla, 37s. per 492 lb. for South American, 37s. 4½d. per 480 lb. for fine Manitoba, 36s. 6d. per 492 lb. for white Karachi, and 36s. per 492 lb. for Red Karachi.

Maize, despite a large supply on passage, has been very firm for all cargoes, and sales have included Odessa at 25s. per 480 lb., America at 25s. per 480 lb, and Argentine at 25s. per 480 lb. This exact agreement of these leading sorts is remarkable, and witnesses to the all-round inquiry.

Barley cargoes have advanced for heavy quality, but are easier for feeding. Prices made include 31s. 6d. per 400 lb. for Californian, 22s. per 400 lb. for South Russian, and 20s. 3d. per 400 lb. for Persian.

Other cargo sales on Friday and Saturday last included Calcutta linseed at 42s 9d. per 410 lb., brown Cawnpore rapeseed at 51s. 9d. per 416 lb., Sesame at 56s. 3d. per 384 lb., cottonseed (Bombay) at £5 16s. per ton, No 2 Manitoba oats at 20s. 6d. per 320 lb., white Libau oats at 15s. 3d. per 304 lb., Panderma beans at 31s 6d. per 480 lb., white Calcutta peas at 34s. per 504 lb., Syrian dari at 25s. per 480 lb., Canadian buckwheat at 30s. per 416 lb., Canadian oatmeal at 25s. per 240 lb., and Russian rapeseed oil at 31s. 10d. per ton.

N.B.—The committe has decided to quote rejection prices for "Old Terms" up to and including July shipments, but not later.

These prices will rule until a fresh list is published.

On the last day of the old cereal year (August 31) *Beerbohm's List* gives the following useful cablegram of American market prices for wheat :—

The London Corn Trade Association C. F. and I. quotations published on August 30, for the settlement of rejections and difference in weights on wheat under Rule No. 4 of the Association East Indian Wheat Contracts, are as follows (new and old terms), viz. :—

Choice White Kurrachee, 36s. 9d., new terms; 36s. 6d. old terms.

Soft Red Kurrrachee, 36s , new terms; 35s. 9d. old term.

New terms 4 per cent. on barley.

	1907. Per 480lb.	1906.
Minneapolis, No. 1 Northern	34s. 6d.	26s. 0d.
Daluth, No. 1 Northern	35s. 0d.	26s. 0d.
Chicago, No. 1 Northern	34s. 9d.	25s. 8d.
Winnipeg, No. 1 Northern	31s. 9d.	25s. 3d.
Kansas, No. 2 Hard	29s. 3d.	22s. 3d.

It will be seen that Winnipeg is much cheaper than Chicago just now, which may either imply that the Manitoba crop is better than anticipated or that Chicago has gone in for a *bull* speculative movement, while the Canadian sellers are content to offer at modest, though still remunerative rates.

SEEDS.

Mark Lane, Monday.—With the improvement in the weather there is more demand for trifolium; prices very reasonable. Rape firm at the high prices ruling. Mustard in fair demand, prices unchanged. Rye, good inquiry, priecs firm. Peas, more demand. New trefoil now appearing; English—finer quality than foreign—is readily marketed; crop much under medium. In grasses, fine Italians find ready buyers. Perennial prospects still unchanged.—John Picard and Co.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English firm, but quiet at late rates. Foreign firmly held at Monday's full price, but demand rather quieter. No. 1 Northern Manitoba, ex ship, quoted at 37s 9d to 38s; No. 2 at 37s; No. 1 Hard Manitoba at 38s 6d; choice white Karachi at 35s 9d, 36s; reds at 35s; Australian, landed, at 37s, 38s; Persian at 33s 6d; South Russian at 35s, 38s. Flour firm but quiet. Iron Dukes quoted at 23s; Minnesota Patents at 28s 6d, 29s 6d. Maize firm and dearer, but not active. Odessa and La Plata landed at 25s 6d; mixed American at 26s, 26s 3d. Barley firm at full prices, 23s 3d wanted. Azoff-Black Sea, ex ship, to arrive, Persian quoted at 23s, 23s 6d. Oats firm, but quiet. La Plata held at 17s 6d; South Russian, 17s 7½d, 17s 9d.

Mark Lane, Friday.—Wheat: English firm for old crop, irregular for new crop. Foreign: American firmly held at 3d advance; other sorts firm but quiet. No. 1 Northern Manitoba, ex ship, held 38s 3d, with 38s refused; No. 2, ex ship, at 37s 3d to 37s 6d; No. 1 hard Manitoba at 39s; choice white Karachi at 36s; red Karachi at 35s 3d to 35s 6d; Australian, landed, at 37s to 38s; Persians, 33s 6d to 34s; South Russians, 35s to 38s. Flour firm and dearer, but not active. Hungarian quoted at 36s 6d to 37s; Minnesota patents at 28s 9d to 30s; Iron Dukes at 23s to 23s 6d. Maize firm, quiet. Mixed American, ex ship, quoted at 25s 6d, landed at 26s; Odessa and La Plata, landed at 25s 6d. Barley steady, quiet. Azoff-Black Sea and Odessa-Nicolaieff-Kherson, ex ship, held at 23s 3d. Oats dull, unchanged.

COUNTRY.

Ashford, Tuesday.—The business done was small. One sample of new wheat sold at 36s, and new peas 31s and 32s, while black winter oats made 20s. Wheat, 34s to 37s; English barley, 28s to 29s; mazagan beans, 30s to 31s; tick beans, 33s to 34s; white oats, 22s to 25s.

Banbury, Thursday.—Wheat, white, 33s 6d to 34s 6d per qr; wheat, red, 33s 6d to 34s 6d per qr; barley, old, 28s to 31s per qr; beans, old, 31s to 32s per qr; oats, old, 21s to 25s per qr; peas, old, 30s to 35s per qr.

Berwick, Saturday.—An average attendance, with only a few samples of oats on offer. Prices nominally unchanged.

Birmingham, Thursday. — The attendance here was rather a small one, and trade was somewhat steadier, doubtless due to the still advancing prices, values of wheat being about 1s per qr dearer than last market day. There were a few samples of local wheats (old) which made 13s per 186 lb., delivered. There were several samples of new oats showing, blacks being offered at 19s 6d, and whites at 20s per 312 lb, delivered. For old oats 23s were required. Beans, 13s 3d per 196 lb. Galatz-Foxanian maize was 6d dearer, and Bessarabian 9d. Odessa maize was on offer at 24s 9d per 480 lb, Bristol. Grinding barley was offering at 22s 9d per 400 lb, Bristol.

Brighton, Thursday.—Small attendance, but several lots of new corn offering which made good prices. New winter English oats from 19s. to 20s; new spring English oats, 18s 6d to 19s 6d. Foreign grain neglected at recent increased prices.

Bristol, Friday.—A few samples of new English wheat on offer, condition poor, millers not caring to buy. Foreign wheat very firm at 1s to 1s 6d dearer on the week with a fair trade doing. Barley 1s dearer for new crop positions. Maize 9d to 1s higher. Oats fully maintain recent prices. Flour active, good demand at fully 1s advance.—Grace Bros.

Bury St. Edmunds, Wednesday.—Moderate attendance. The few samples of new wheat on offer were in only moderate condition, and fetched 33s to 34s on rail. Old wheats firm at 36s, delivered into mill. A good flour trade at 1s advance, and some bit of forward buying in anticipation of further rise. Milling offals almost unobtainable at £6 15s to £7 for fine middlings, £6 to £6 5s for coarse, and £5 to £5 5s for bran. Maize, 26s per qr delivered.

Cambridge, Saturday. — To-day several samples of new wheat were offered, and prices ruled according to condition, ranging from 30s to 32s per 504 lb. into the mill. White oats scarce at 17s 6d to 18s; black winters, 17s to 17s 6d. Barley, according to quality, made 26s to 29s per 32 stone.

Canterbury, Saturday. — A much better supply of new corn, the dry weather having facilitated threshing. The quality generally is very fair, and quite up to expectations; 65 lb wheats have changed hands at 34s per qr on rail, while 61's have been sold at the same figure delivered. Oats meet a good inquiry, 42 lb whites selling at 19s, and 44 lb at 20s. Malting barley of medium quality is making 30s; grey peas, 30s to 30s 6d per qr.

Carlisle, Saturday.—Fair supply of oats in our market to-day. Slow sale at a little more money than last week, 24s to 24s 6d per 336 lb.—Thomas Robinson.

Chester, Saturday.—The demand for all feeding stuffs continues good at further enhanced prices. Quotations: oats, old, 3s 1d to 3s 6d per 46 lb; Indian corn, new, 13s 6d to 13s 9d; ditto, old, 13s per 240 lb; round corn, old, 14s to 14s 9d per 240 lb.

Chichester, Wednesday. — Fair attendance and good demand for new grain. Old white wheat, 36s to 36s 6d; old red ditto, 36s to 36s 6d; new white ditto, 32s to 33s; new red ditto, 32s to 33s; grinding ditto, 25s 6d to 25s 9d; oats, English, 18s to 23s; rye, 27s to 28s; maize, 24s to 25s.

Colchester, Saturday. — Wheat, various quality and condition, 30s to 33s; barley, 29s to 31s; oats, 18s to 20s.—Colin Taylor, King and Co., Ltd.

Coventry, Friday.—Only a meagre attendance. Flat wheat offered sparingly, but prices were obtainable. Some new oats of good quality changed hands; condition only tolerably good. Beans firm without change. Quotations: Wheat, 12s 9d to 13s 6d per 186 lb; barley, 30s to 34s per 448 lb; peas, 12s to 14s; beans, 13s to 13s 9d per 196 lb; oats, old, 24s 6d to 27s per 352 lb.; new, 21s 6d to 23s.

Devizes, Thursday.—A small supply and attendance. Old wheat the turn dearer on the week, and where new was offered it sold well. The crop is inferior in quality, but it will probably command a much higher price relatively than last year for some time to come. Winter oats, white Gartons, winter barley, and rye are offered, and and all command higher prices than last year. Best wheat, 17s 6d to 13s 6d; secondary, 16s 6d to 17s 6d; new wheat, 16s to 17s; winter barley, 26s to 28s 6d; old oats, 20s to 24s; winter oats, 17s 6d to 18s; white Garton oats (330lb), 18s to 19s; rye, 26s to 28s; new beans, 16s 6d to 18s; fine flour, 20s to 28s; extra fine, 32s to 36s.

Doncaster, Saturday.—No transactions in English wheat, which is now exhausted, but a good demand for foreign, which was dearer, Indian being 6d. per qr higher on the week, and other sorts fully 1s per qr more. There were a few samples of new black winter oats shown, which made 19s to 20s per qr. Old oats unchanged. Other things firm.

Dorchester, Saturday.—Owing to farmers being busily engaged in harvesting, coupled with the fact of to-dey's sheep fair being over at an early hour, there was again only a very limited attendance at to-day's corn market. Supplies also came sparingly to hand, there being evidently but little, if any, old wheat in the district. A quantity of new samples were shown, and much of it came to hand in greatly improved condition, wheat in particular being much harder than it was, and a few good lots of barley were shown, but both bore traces more or less of the rainstorms at the beginning of harvest. Oats make an excellent sample, and each week it becomes more apparent that this is the crop of the season.

Exeter Friday.—Business fair and generally firm. Foreign wheat 6d dearer on the week; new oats down 1s; barley and old oats firm; maize up 6d. English wheat, 3s 9d to 4s; superfine flour, 25s to 27s 6d; fine, 23s to 25s.

Glasgow, Wednesday.—Attendance was as usual at to day's market, with business the turn better. Wheat steadily held at 6d to 9d per qr advance. Flour 6d to 1s per sack dearer over the week. Maize and corn dearer, with prices for both 9d per boll up since last Wednesday. Barley 6d to 9d per boll dearer. Oats held in sellers' favour at 3d to 6d per boll more money. Beans and Pease steady. Bran and thirds in good demand at 2s 6d por ton more money for both. Oatmeal 1s per sack dearer on the week. Other articles steady at late rates.—Gibson and Clark.

Glasgow, Friday.—Market continues steady for all articles of the trade, without any quotable change since Wednesday.

Gloucester, Saturday.—English wheat: Few samples of new out of condition. Reds, new, 32s; old, 34 to 35s. Foreign wheat in good demand. River Plates, 36s 9d to 37s 6d; Russians, 35s 6d to 38s. River Plate maize, 25s; flat, 25s (Bristol); Bessarabian, 25s 3d. Barley, 22s 9d (Bristol). Oats: Few samples of new at 18s 3d; old, 23.

Grantham, Saturday.—Harvest now in full swing in the district, and there was only a small attendance at the market, and little business doing. A sample of new wheat made 33s 6d per qr, and several lots of new oats sold at 18s to 19s 6d per qr. Old oats unchanged.

Hereford, Wednesday.—A moderate attendance and rather more business doing than last week. Old wheats changed hands at 4s 3d per bushel. Values are nominally reported at 4s, if condition good. New black oats changed hands at 18s to 20s. No new white oats on offer. Old whites very firm to 3d per quarter dearer. Barleys nothing doing. Maize fully 1s per quarter higher than last Wednesday. Beans nothing doing. Wholesale quotations:—Wheat, 4s to 4s 3d per 62 lb; barley, 3s 6d to 4s per 63 lb; old oats, 2s 9d to 3s 3d per 40 lb; new oats, 2s 3d to 2s 6d per 40 lb; beans, 4s to 4s 6d per 65½ lb; maize, 3s 4d to 3s 8d per 60 lb.

Ipswich, Tuesday.—Very little old wheat on offer; trade firm, at an advance of 1s per qr: Reds, 35s to 36s; whites, to 37s per 504 lb. One or two samples of new wheat offering, but condition was not satisfactory; prices not yet fixed. Grinding barley, 6d per qr dearer; maize, 6d per qr dearer; oats steady; beans and peas unaltered.

Leeds, Tuesday.—The unfavourable weather for harvest in Europe, the disappointing result of the latter in large parts of the Continent, and the continued small shipments, have finally convinced the trade that a higher range of values is inevitable, consequently there has been an active speculative as well as consumptive demand, and prices for all kinds of wheat have advanced 1s 6d to 2s since last Tuesday. Offers for shipment continue scanty and at prices mostly above values on this side. Maize firm at 1s 3d to 1s 6d per qr advance. Beans 3d to 6d dearer. Oats unchanged.—Dunns and Co.

Leeds, Friday.—Harvest operations in Yorkshire were briskly proceeded with during the week, the quality and yield exceeding late anticipations. There was no further advance in English wheats, but foreign were the turn dearer. There was a good demand formedium qualities of flour at 26s. to 27s. Maize was still hardening, Plate, Russian, and American reaching 25s. New English oats, 19s to 20s. Beans, peas and barley were firmly held.

Leicester, Saturday.—Average attendance of buyers and dealers. Small supplies of old wheats, and very little new on offer. Trade ruled sharper at an advance of 6d to 1s per qr, with a strong tendency. New wheats firm, early districts made 35s to 38s per 36 stones; old wheats, 38s to 39s per 36 stones; old barley firm at late rates; new oats unsaleable, holders asking 20s to 22s per 24 stones; old oats firm at 24s to 28s per 24 stones; beans slow.

Lincoln, Friday.—Farmers being busy with the harvest, there was only a moderate attendance. Little, if any, old English wheat was on offer. A very dry sample of new wheat was shown, and made 34s per qr on rail. Foreign wheat firm. Some samples of new English barley realised from 27s to 28s per qr. Feeding stuffs very firm. New winter oats 18s 6d to 19s per qr.

Maidstone, Thursday.—Fine dry weather the last few days much appreciated. Samples of new wheat thrashed prior to the welcome atmospheric change not in first rate condition by any means, but those later on will, no doubt, display improvement. Not exactly settled value yet, but prices are firm for good quality. New rye and oats as quoted last week. Barley keeps up to former cost, and maize is sold at an advance of quite 6d to 1s per qr. All other grain very firm in tone.

Manchester, Thursday. — English wheat (new) was only offered in small quantity, but better condition and quality are expected later. Certain sorts of foreign were dearer. Indian corn was in very good request. American mixed 3d, and Cinquantina 6d. per cental higher. Barley: Both English and foreign showed no change. Oats also showed no change. Beans and peas unchanged. Bran and offals were scarce and dearer.

Newark, Wednesday.—Small attendance, farmers being busy with the harvest. Prices were a little firmer. Quotations: — White, 36s 6d to 37s 6d; malting barley, 29s to 30s; grinding, 27s to 28s; white oats, 24s to 25s; black ditto, 23s to to 24s; old beans, 24s to 35s per qr.

Newcastle-on-Tyne, Saturday.—We had a fair consumptive demand for wheat here to-day at 6d per qr advance on the week. Maize remain firm, and favouring sellers by 9d per 400 lb over last Saturday's quotation. Old oats firm at late rates, new 6d per qr lower to sell. For peas and beans we had only a limited demand, prices however remain firm at fully last week's quotations. No barley offering.—Pollard and Co.

Newport, Wednesday. — All feeding stuffs dearer. Barley meal and maize meal 10s and 5s per ton higher respectively on the week. Maize and barley firm and dearer. Flour showed an advance of 2s per sack since the last market.

Northampton, Saturday.—The few samples of new corn which were on offer, comprising wheat, barley, and oats, varied very much in quality; prices unsettled. Wheat, 34s to 35s; barley, 28s to 30s; white oats, 23s to 24s; black oats, 22s 6d to 23s 6d; beans, 31s to 33s; peas, 30s to 32s; flour, 26s to 30s.

Nottingham, Saturday. — Small attendance to-day. Few samples. New corn showing.

Wheat made 33s 6d, old wheats, 38s, new oats made 19s, old wheat made 38s, old oats 24s, old beans 35s. Fair demand all round.—Robt. Hubble.

Peterborough, Saturday.—We have had a nice fine week, and farmers have been busy with harvest work. The few samples of new wheat making about 32s to 33s according to condition. New barley from 26s; oats, 17s 6d to 19s 6d.—Thomas Hill and Son.

Preston, Saturday.—There was a fair attendance, but few samples of new grain were forthcoming. Quotations:—Wheat, white, new, per windle of 220 lb., 14s 6d to 15s; ditto red, 13s 9d to 14s 6d; oats, old, per bushel, 3s 6d to 3s 8d; beans, per windle of 220 lb, 16s 6d to 17s.

Reading, Saturday.—Owing to harvest operations, the attendance again was a small one, and business was decidedly quiet, only a few sales being conducted at the following prices:—Wheat, old, 36s to 37s 6d; new, 32s to 34s; oats ranged from 18s to 23s 6d; practically nothing done in barley; beans realised 33s to 36s; and peas, 28s to 31s.

Retford, Saturday.—No new wheat offered. Old was scarce and dear, selling at 35s 6d to 36s 6d per qr. Two or three samples of new black winter oats were on offer at 18s 6d to 19s, but very trade was done; old white oats were quoted 25s to 26s; round maize, 26s 6d. No new English beans shown; old, 35s per qr.

Ripon, Thursday.—A good attendance of farmers, but trade was slow, prices having an upward tendency. No new wheat on offer. Prices:—Wheat, 35s to 36s; ditto foreign, 36s to 40s 6d; barley, grinding, 27s to 28s; oats, 24s to 26s; maize, round, 26s to 27s; ditto, flat, 26s to 27s per qr.

Sheffield, Tuesday.—In the absence of new corn prices are fully maintained at the recent high level. A further advance of 6d on wheat was supported by a sharp rise on imported wheats. Maize quoted at 1s 3d to 1s 6d per qr. advance on last week's prices for Plate and Odessa. American mixed also about 1s per qr dearer. Beans and peas 5d higher on the week. Oats and barley firm and unchanged. Quotations:—Wheat, white, new, 37s to 37s 6d; ditto red, new, 37s to 37s 6d per 504 lb; oats, black, 24s to 25s; ditto white, 24s 6d to 25s per 336 lb; peas, grinding, 34s to 34s 6d; ditto blue, 75s to 90s per 504 lb; beans, English, 36s 9d to 37s per 532 lb; barley, grinding, 27s 6d to 28s; ditto malting, 28s to 32s per 448 lb; Indian corn, small, 26s 3d to 26s 9d; ditto Plate, 26s to 26s 4d; ditto flat, 27s 6d to 27s 9d per 480 lb.

Shrewsbury, Saturday.—Old wheat, 15s to 15s 6d per 225 lb; old oats, 15s to 16s per 225 lb; old beans, 15s 6d to 16s 6d per 240 lb.

Stamford, Friday. — Small attendance, farmers taking advantage of fine weather for harvest operations. Several lots of new grain were offered. Quotations:—Wheat, 33s to 34s; oats, 18s 6d to 19s; barley, 26s to 29s; beans, 32s to 33s; peas, 50s to 60s per qr.

Stockton, Wednesday.—English wheat very scarce and very firm at 35s to 36s on the line. Foreign wheat 1s to 1s 6d per qr dearer, on account of crop reports and the weather. Flour advanced 1s, maize 1s dearer, oats also dearer. Few samples of local black winter oats were offered at 21s on the line.

Sunderland, Saturday.—Farmers stocks are about exhausted, and there was but little passing at to-day's market. All grain however is something dearer than last week. Arrivals nil.—E. and F. Richardson.

Warwick, Saturday.—Very little corn on offer, and business of a quiet character. Wheat and beans the same as last week. Another small advance in feeding stffs.

Winchester, Saturday.—A few lots of new English wheat offering, condition variable. Foreign fully 1s advance. Barley to arrive 6d, and maize 3d dearer. Oats unaltered. Flour a steady trade, 6d to 1s higher rates.—Fear, Colebrook and Co., Ltd.

Wisbech, Saturday.—After a week of favourable harvest weather, we have a few samples of new corn offering. New red wheat, if in good condition, sells at 33s per 504 lb; new oats, 18s to 18s 6d per 336 lb.—James Fletcher.

Worksop, Wednesday.—Small attendance, and small show of grain, with one or two samples of new oats on offer. These were locally grown, and in good condition. White wheat, 36s to 38s; red wheat, 35s to 36s; grinding barley, 28s to 30s; English beans, 36s to 38s; maize, 26s 6d to 27s; new white oats, 20s to 22s; old ditto, 24s to 26s; new black oats, 20s to 22s; old ditto, 23s to 25s per qr.

Yeovil, Friday.—A number of samples of the new season's crops were on offer, but except a few were more or less out of condition and disappointing, particularly in the case of wheat. Under the circumstances the few lots of old wheat remaining were demand, and 36s per qr., the highest price of the year, was paid. The new wheat sold at from 30s to 33s 6d, which quotations, however, are several shillings in advance of the new crop last year. Foreign wheat 1s to 1s 6d advance on the week. More activity in the flour trade. For delivery forthwith millers accepted 26s 6d per sack for fines, and for forward delivery 27s. Meals and offals continue in good demand for the time of the year at full values.

York, Saturday.—The supply of old wheat is running very short, and consequently few samples were shown; prices remain practically unchanged. Feeding barley makes 26s to 28s per qr of 32 stones. Old oats are scarce and dear; white Tartary, 22s to 23s; black, 22s 6d to 23s 6d; short, 23s to 24s per qr. of 24 stones; old beans, 33s to 34s per qr of 36 stones.

FOREIGN.

Hamburg, Saturday.—We had a few dry and sunny days, causing a quiet tone in our market, and top prices of last week are not now obtainable. New rye in the adjacent districts is mostly soft and of light weight. Wheat, barley, and oats are not yet carried, and no doubt were deteriorated by the inclemency of the weather. Potatoes are seriously affected by the disease. Wheat is not materially lower, there being no pressing sellers. For hard winter No. 2, August-September shipment, 34s 6d is being paid, and red winter No. 2 is held at 34s, free from garlic, at 34s 9d; Macaroni No. 1 at 32s; 10 pud Glirka Ulka at 34s 3d per 480 lb, c.i.f. Hamburg. New sale not yet offering. Rye quiet, 9 15/20 South Russian, August, old style, shipment, at 32s 6d; 9 10/15 Taganrog, afloat, at 34s; No. 2 American-Duluth, prompt, at 34s 3d per 480 lb, c.i.f. Hamburg. There is a demand for good German malting barley, but offers are scarce as yet; Saai of good colour is held at 40s to 42s; East Prussian, at 36s to 39s per 448 lb. Middling quality of Bohemian is selling at 35s 6d to 36s 6d; fine is held at 37s 6d to 40s; Moravian and Siorukian, at 40s to 42s 6d per 448 lb, f.o.b. Feeding barley quiet: 60/61 k.g. South Russian, August shipment, 20s 9d to 21s; September-October, 20s 6d per 400 lb at Hamburg. Maize less inquired after; Odessa, loading, 24s; River Plate, September-October, 24s 3d; mixed, 24s to 24s 3d per 480 lb, c.i.f.—John Tatlock.

Hamburg, Saturday.—We have still rather unsettled weather here with really cold nights. There is still a good deal of barley in the fields in the north of Germany, and quality is sure to suffer, but in the south the crop is practically completed, as also in Bohemia, Moravia, and Slavonia, and except some weathered parcels in Bohemia the quality has generally turned out fine, but for choice lots quite extreme prices are asked and actually paid to cover requirements; in Hungary trade has ruled quieter, at least for the common and more medium qualities, whilst finest Chevalier is scarce and held firm.—Francis M. Th. Duhne.

FEEDING STUFFS.

Hull, Tuesday.—Linseed trading during the week has been on a moderate scale, but values have been well maintained and at the close buyers show more disposition to operate. Plate: Spot and afloat, 40s 9d; August-September, 41s 3d; September-October, 41s 6d paid. Duluth: September-October, 41s 3d to 41s 6d. Petersburg sold at 41s to 41s 3d. Cottonseed.—The market declined further during last week, and £7 17s 6d accepted ex warehouse, also on passage and August shipment, but there has since been a smart recovery up to £8 5s being paid spot, £8 2s 6d afloat and to-day sellers ask 2s 6d more. A fair quantity September fayoumi done at £7 15s to £7 18s 9d, October made £7 7s 6d and after £7 taken, November-January £7 2s 6d paid with further buyers. Oils.—The market is firm. Linseed Oil: 22s spot, 22s August, 21s 6d September-December. Cottonseed Oil: 28s spot, 26s 9d September-October, 23s 9d to 23s 10½d November-April. Crude Oil: Nominal spot. Oilseed Cakes.—Linseed are 2s 6d per ton dearer on the week, with a firm market and good demand for time of year. Cotton: Best are dearer and scarce. Bombay have sold well at recent low prices, but to day sellers are satisfied with the sales effected and are holding for more money. Owing to the drop oil the tendency of cakes is strong.—Keighley, Maxsted & Co.

Mark Lane, Monday.—Linseed Cakes: Values of all descriptions are inclined to harden in spite of a comparatively sluggish demand for present delivery, whilst both Hull and London crushers have advanced their prices fully 2s 6d per ton for winter contracts. Russian offer sparingly. East India seed pures make last week's prices. Fine seedy Calcuttas have changed hands at late rates. London made attract most attention, being relatively cheaply offered. Cotton cake.—The recent arrivals of Egyptians are almost absorbed, and with prospect of light shipment for the near future, quotations are again higher, while English are practically unchanged. Decorticated.—London made pures find a ready sale, also digestive meal, but American rule dull. Rape cakes.—Nominal. Maize germ meal.—No white American offers, and English manufacturers now ask an advance of 5s in consequence of a strong Continental demand. Maize gluten meal meets a good inquiry. Rice meal.—The market is bare of stocks, and second-hand sellers ask considerably more money for steamers to come along. Locust beans remain quiet but firm. Dried brewers' grains are the turn dearer. Nitrate of soda is without alteration.

POULTRY AND GAME.

Smithfield, Saturday.—Good supplies were in moderate demand. Young grouse, 4s 6d to 5s; old, 2s to 2s 3d; black game, 3s per brace; goslings, 4s to 5s; country ducks, 2s to 2s 6d; Aylesbury ducks, 2s 3d to 2s 9d; Surrey fowls, 3s to 3s 6d; Sussex fowls, 2s 6d to 3s; Essex fowls, 2s to 2s 6d; Lincolnshire fowls, 2s to 2s 6d; Irish fowls, 1s 4d to 1s 9d; quails, 9d to 1s; feathered pigeons, 8d to 9d; Bordeaux pigeons, 1s to 1s 2d; tame rabbits, 1s 3d to 1s 6d; wild rabbits, 6d to 8d; live hens, 1s 6d to 2s each; Australian rabbits, 5s 6d to 7s per doz.

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, MONDAY, 3 P.M.

The first market of a new cereal year commanded, as usual, a large attendance, and there was also a very decided increase in the number of new crop samples shown. Foreign wheat prices were fully 1s dearer on the week, but millers were slow buyers at the advance. New English was not in a state fit for immediate milling, but some of the samples were of excellent weight.

Barley was quoted 27s. or thereabouts for new winter. Foreign was very unsettled. The new Russian crop is likely to come on sale on arrival at 3s. below prices asked for the old ex granary. Californian and other fine foreign sorts sold at a high price. Oats have ceased to advance.

Buckwheat is eagerly sought for, and 36s. to 38s. is paid. New English rapeseed makes 72s. to 76s. per qr. Maize is comparatively dear, 1s. advance on the week may be quoted as obtained. Beans are 6d. dearer for old crop, and are firm for new.

THE FLOUR TRADE.

MARK LANE, MONDAY, 3 P.M.

London flour to-day was decidedly dearer on the week. The new wheat comes forward so slowly that stocks of old flour will have to suffice to carry bakers over September for the most part. As imported flour is in less evidence than usual, and the price asked for the best sorts is almost prohibitive, London millers have full justification for the terms asked. It is not, of course, anticipated that they will be supported for long, but those who have prompt deliveries wherewith to meet a crisis are discovering their reward. All sorts of bran and middlings are 5s. per ton dearer on the week. Seldom, indeed, does a new cereal year start with no new flour to be had at all. Old country flour is wanted locally, and London would have a sharp, if short, flour famine but for the stocks in its own big mills.

CLOSE OF THE MARKET.

THE MARKET CLOSED STRONGLY FOR WHEAT AND MAIZE. THE REPORTS OF THE AMERICAN GROWING CROP OF MAIZE ARE RATHER UNFAVOURABLE, AND THE PERIOD IS A CRITICAL ONE FOR THAT VERY IMPORTANT YIELD.

THE BALTIC.

MONDAY, 1 P.M.

STATE OF TRADE.

Wheat cargoes open firm for all sorts except American, which are a trifle easier. Maize cargoes are decidedly firm. Futures for oats and feeding barley are rather lower.

BUSINESS DONE.

Wheat.—American Red Winter, 7s 5d per cental, prompt shipment; best Russian Winter, 39s 3d per 492 lb, prompt shipment; Odessa Ghurka, 37s 3d per 492 lb, prompt shipment; Blue Stem (Pacific), 37s 3d per 500 lb, arrived; Australian, 37s 3d per 480 lb, arrived; Rosario, 37s 6d per 480 lb, prompt shipment; Red Karachi, 37s 9d per 492 lb, November shipment; Hard Manitoba, 37s 3d per 480 lb, October shipment; No. 1 Durum, 31s 3d per 480 lb, October shipment.

Barley.—Russian new crop, 21s per 400 lb, prompt shipment; Californian, 31s per 448 lb, prompt shipment; Cyprian, 24s per 400 lb, prompt shipment.

Oats.—Riga, 15s 6d per 304 lb, prompt shipment; Argentine, 15s 9d per 304 lb, February shipment.

Maize.—American Mixed, 5s 4d per cent., prompt shipment; Galatz, 25s 6d per 480 lb, on passage; Argentine, 25s per 480 lb, October shipment.

Beans.—Smyrna, 31s 6d per 480 lb, October shipment.

Teas.—Calcutta white, 34s per 504 lb, October shipment.

Dari.—Indian, 23s per 480 lb, October shipment.

Rice.—No. 2 Rangoon Cleaned, 11s 9d per cwt., October shipment.

Canaryseed.—Turkish, 37s per 464 lb, prompt shipment.

Linseed.—Argentine, 42s per 416 lb, arrived.

Poppyseed.—Indian, 59s per 377 lb, September shipment.

Sesame.—Indian, 56s 3d per 384 lb, February shipment.

Cottoneed.—Indian, £5 16s per 2,240 lb, October shipment.

TERM MARKET.

Speculation in futures is active, and prices indicate a decided belief in wheat prices rising as soon as the first rush of English new crop deliveries is over. Opinion with respect to maize is less certain. Few speculators will make bargains for 1908 delivery, as the next five weeks will practically determine the result of the American new crop, which in turn largely governs the trade for the first six months of the civil year. Latest prices quoted are:—

Winter Wheat.

Red, American, 7s. 6d., per cental, Sept. and Oct. delivery.

,, ,, 7s. 9d. ,, Dec. ,,

,, ,, 7s. 10d. ,, 1908 ,,

American maize 5s. 4d. ,, Sept. ,,

,, ,, 5s. 5d. ,, Oct. ,,

The Egyptian new crop of cottonseed is offered for December delivery in London at £7 per ton.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour.—Advancing wheat markets all week have improved the demand for flour, buyers paying 6d per sack advance freely. Grain.—American corn is active at 6d per boll advance. Round maize has also improved 3d to 6d. Manitoba oats being well cleared from quay are in sellers' favour. Beans quiet. Canadian pease 3d per boll dearer. Buyers of oatmeal are holding off. Mill Stuffs.—Very strong. Winter wheat patents, 27s 6d to 28s per 280 lb; spring wheat patents, 28s to 28s 6d per 280 lb; American corn, 15s to 15s 1½d per 280 lb; round corn, 14s 10½d to 15s per 280 lb; grinding beans, 18s 7½d to 18s 9d per 280 lb; white pease, 19s to 20s per 280 lb; broad bran, 110s per ton; medium bran, 102s 6d per ton; fine thirds, 130s per ton; common thirds, 110s per ton; American oilcake, 145s per ton. —McKINNON AND McDONALD (Glasgow).

Offals.—The demand continues very active, and prices are still advancing.—GREENHILL BROS. (Belfast).

Flour.—Prices are mostly 6d. per sack higher than last week. Home millers are somewhat irregular, quoting in some instances 1s. advance. There is a steady demand, the tendency of prices in both American and home-made being still upward.—GREENHILL BROS. (Belfast).

Milling Offal.—Although the demand is slackening off, there is no difference in price, owing to mills being full of orders.—JOHN BAWCOMB AND CO.

Flour.—Market very strong at 6d to 1s advance on the week. Business is limited owing to scarcity of offers.—T. S. MEDILL AND SONS, LTD.

Supplies of wheat continue liberal. We have a firm trade, and prices are 6d. and 1s. per qr. higher. Maize, 6d. per qr. dearer. Barley and oats unchanged in values.—COVENTRY AND SHEPPARD.

Weekly London Averages.

An account of the Quantities and Prices of British Corn bought on the London Market and in the area within five miles from the Royal Exchange during the week ending Tuesday, August 27, 1907:—

	Imp. Quar.	Bus.	Total Amount. £	s.	d.	Av. Price per qr. £	s.	d.
Wheat ...	356	6 ...	585	5	7	... 1	12	10
Barley ...	205	4 ...	273	6	7	... 1	6	7
Oats	1,991	1 ...	1,964	16	9	... 0	19	9

HAY AND STRAW.

Hereford, Wednesday.—Not much doing in the hay trade. Holders of old hay remain firm, but buyers do not purchase freely. New hay unsettled, sellers and buyers in some instances being rather wide apart. Straw very dull and the turn lower.

Lancaster, Saturday. — Better supply than for some time, with brisk trade. Meadow hay, 6d; clover ditto, 6½d; oat straw, 4d, ditto wheat, 4d per stone.

Leeds, Tuesday.—The new crop of hay has been sparingly offered in the warehouses, and prices have scarcely been tested. Straw is scarce and firm. Quotations:—Clover hay, 7½d; meadow hay, 7d; wheat straw, 5d; oat straw, 5d; and rye straw (retail), 7d to 8½d per stone; green clover, 3½d per bundle.

Lincoln, Friday.—A moderate demand for hay, which was in good supply. New hay and seeds, 50s to 55s per ton on the ground; old ditto, 70s to 80s; straw, 30s to 35s per ton on the ground.

Manchester, Friday.—Hay, old, 5½d to 6½d; clover, old, 7½d; new, 4½d to 6d; straw, wheat, 4d; oat, 3½d to 4d per stone.

Newcastle, Tuesday. — Old land hay, from £3 10s to £4 5s per ton; new land hay, £4 10s to £5 7s 6d; this year's growth, £4 5s to £4 10s; wheat straw, £1 1s to £1 4s per load; oat straw, 18s to £1 4s.

Nottingham, Wednesday.—Fair supplies which met with a good demand for best qualities. Quotations:—Inferior to good hay, 75s to 90s; prime ditto, 95s to 105s; inferior to good clover, 80s to 90s; prime ditto, 95s to 105s; wheat straw, 45s to 55s; new hay, 70s to 80s; new seeds, 80s to 90s.

Sheffield, Tuesday.—Better supplies than last week, and business showing a slight improvement. Choice seeds, £4 10s to £5; choice hay, £4 10s to £4 15s; straw, £1 2s 6d to £2 2s 5d; green fodder, 16s to 17s per ton.

Whitechapel, Saturday.—Heavy arrivals sold quietly at previous rates. Best clover, 84s to 95s; inferior, 72s to 80s; specially picked hay, 87s; good, 76s to 85s; inferior, 65s to 70s; mixture and sainfoin, 77s 6d to 87s 6d; straw, 28s to 34s per load.

POTATOES.

Borough, Saturday.—The small quantity offered met a good sale. Early Rose, 60s to 70s; Early Puritans, 70s; British Queen, 65s to 70s; Blacklands, 60s to 65s per ton.

Berwick, Saturday.—This market is still very dull, little or no trade being done. No exact quotations can be given. A good deal of disease is reported in the potato crop on the Borderland.

Carlisle, Saturday.—There was a large supply at both the public retail markets, and a good demand at 7d to 9d per stone.

Doncaster, Saturday.—Good supply, of potatoes, which made 3s 6d per cwt.; retail 10d per peck, with a fair trade.

Goole, Wednesday.—The potato trade was very slow, and the attendance was small. A few lots changed hands at 50s to 55s per ton.

Hereford, Saturday.—The market was well supplied, and locally grown samples made from 6s to 7s per load.

Lancaster, Saturday.—Good supply, and a fair trade at 8d to 9d per stone.

Spitalfields, Saturday. — Restricted arrivals experienced good support. Early Rose, 65s to 70s; Puritans, 70s; British Queens, 75s to 80s; Epicures, 65 to 70s; Sharp's Express, 65s to 70s. Blacklands: Up-to-Dates, 65s; British Queens, 60s to 65s; Epicures, 55s to 60s; Sharp's Express, 60s to 65s per ton.

York, Saturday.—A somewhat scarce supply, owing to farmers being busy with harvest. Prices, which have an upward tendency, range from 57s 6d to 60s per ton.

HOPS.

Borough, Monday. —There is rather more enquiry from consumers, prices are nominally the same as those current the last month. The crop does not develop satisfactorily, the cones are exceedingly small although full if lupulin. The weight will be at least 1 cwt. less per acre than was estimated last week, and 2 cwt. less than the estimate of a fortnight since.—W. H. and H. Le May.

Canterbury, Saturday.—Warmer weather has added materially to quality of crop, but it has come too late to increase size of cones. Picking commences about middle of next week.

Worcester, Saturday.—Owing to more suitable weather hops have improved this week, and the picking will begin in ten days' time. There is no alteration to note on the market in 1906 hops. A fair trade continues to be done, and 1905's are selling rather more freely. One pocket new has been weighed this week.—Charles Faram and Co.

TO-DAY'S MARKETS.

CATTLE.

Metropolitan Market, Islington.

	Monday, Sept. 2, 1907. British.	Total.	Monday, Sept. 3, 1906.
Beasts	920	920	930
Sheep and Lambs	5,340	5,340	5,950
Calves	10	10	10
Pigs	—	—	—
Milch Cows	40	40	30

Quotations per 8 lb. (sinking the offal).

ENGLISH.

	Inferior. s. d.	Second. s. d.	First. s. d.
Beasts	2 10	3 10	4 8
Sheep	3 8	5 2	6 0
Lambs	4 10	5 6	6 8
Calves	—	—	—
Pigs	—	—	—

Milch cows, per head, £16 to £22 10s.

British arrivals include as follows:—Scotland, nil; Eastern Counties, 40; Midland, Home, and Western Counties, 756; Devon, 30; Ireland, 94.

We note to-day an increase of 70 head compared with Monday last, the supply including a slightly larger number of Devon cattle, these commanding our top quotation. Trade for both prime and second quality beasts ruled of a very slow and dragging nature, late values being difficult to maintain. The Irish consignment consisted of 36 Dublins and 58 Waterfords (no store cattle being included), all of which shared in the poor trade prevailing here to-day. Fat cows and bulls were also slow of sale at last Monday's prices. A clearance will not be effected in this part of the market to-day.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day. s. d.	Monday, Sept. 3, 1906. s. d.
Scotch	—	—
Devons	4 6	—
Herefords	4 6 ex 4 8	4 2
Norfolks	—	—
Runts	4 4 ex 4 6	4 0 to 4 2
Lincolns	4 0 to 4 2	3 8 to 3 10
Irish	4 2 to 4 4	4 2 to 4 3
Canadian	—	—
Fat cows	3 4 to 3 6	3 4 to 3 6

There was a decrease of 300 in the number of sheep and lambs penned compared with Monday last. For all descriptions a slow and dragging trade was experienced, all sales being based on last Monday's prices—this remark also applies to both Scotch and Irish sheep, the latter being in larger numbers. Lambs though in smaller numbers were in excess of the requirements, consequently Thursday's slight advance was not maintained.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

	To-day. s. d.	Monday, Sept. 3, 1906. s. d.
8 st Scotch	5 10 to 6 0	—
7½ to 8 st Downs	5 10 to 6 0	5 10 to 6 0
9 st. Downs	5 8 to 5 10	5 8 to 5 10
10 st Halfbreds	5 4 to 5 6	5 4 to 5 6
10 st Yorkshires	—	—
12st Lincolns, half-bred	—	—
10 st Irish	5 4 to 5 6	5 2 to 5 4
10 st Down Ewes	4 0 to 4 2	4 4 to 4 6
11 st Halfbred ditto	3 10 to 4 0	4 2 to 4 4
5 st Down Lambs	6 6 to 6 8	6 10 to 7 0
6 st Halfbreds ditto	6 2 to 6 4	5 8 to 5 10

Only 10 calves on offer, trade, therefore, not worth noting.

No pigs on the market.

London (Central), Monday. — Moderate arrivals met slow demand Beef, English, 3s 9d to 3s 11d; Scotch, 4s to 4s 8d; American, 3s 6d to 3s 10d; refrigerated hindquarters, 3s 8d to 4s 2d. Mutton, English wethers, 4s 4d to 4s 8d; ewes, 3s 4d to 3s 8d. Lambs, 4s 8d to 5s; Scotch tegs and wethers, 4s 8d to 4s 10d; ewes, 3s 4d to 3s 8d. Veal, 3s 6d to 4s 8d. Pork, 3s 4d to 4s 2d per stone.

FOREIGN.

Deptford, Monday.—Beasts 280. To-day's supply consisted entirely of Canadian cattle, trade for which ruled of firm and steady nature at late rates. The best on offer were quoted at from 4s 1d to 4s 3d; seconds, 3s 10d to 4s per 8 lb (offal given in). On Saturday 1,500 beasts from the United States and 610 from Canada were offered for sale, trade ruled of a firm and steady nature, the best of the former making from 4s 3d to 4s 5d; seconds, 4s to 4s 2d; and the latter, 4s 1d to 4s 3d; seconds, 3s 10d to 4s per 8 lb (sinking the offal).

WET AND DRIED GRAINS.

Mark Lane, Saturday.—Wet Grains: Prices have ruled a trifle higher on the past week, and business has been done at 12s to 13s ale, and 9s 6d to 10s 6d porter per ton on rail, London. Dried Grains.—The rise in prices has entirely stopped home trade, and dealers cannot find any orders, and with hay offering from 50s per ton there is not likely to be any demand, and even a reduction of 5s per ton would not be an aid to increase the consumption. Prices ex factory:—Distillers, 105s; ale, 92s 6d; and mixed, 86s 3d per ton. American cane treacle, 90s per ton, and Kiln-dried sea-damaged Australian wheat from 20s per qr.—Hamlyn and Co., 37 and 38, Mark Lane, London, E.C.

OIL SEEDS.

PROVISIONS.

London, Monday.—Bacon: The arrivals of bacon last week were:—From Ireland, 2,627 bales, and from foreign ports, 14,478 bales. There was an irregular market during the week, but it closed somewhat steadier, quotations ranging:—Irish, 60s to 64s up to 71s; Danish, 56s to 63s up to 69s; Canadian, 55s to 57s up to 62s. Butter: The Butter market was slow. French, 92s to 100s; Danish, 108s to 110s up to 111s; Russian, 76s to 98s; Irish, 84s to 105s; Canadian, 104s to 106s; Victorian, 86s to 100s; New South Wales, 86s to 100s; Queensland, 84s to 96s; New Zealand, 96s to 106s, exceptionally 108s. Lard.—Lard was a quiet market. Irish, 50s to 58s; Danish, 48s to 52s; American, 45s to 46s 9d.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

The trade for fat beasts at Islington both in regard to prime quality on the chief market day of the week opened with an entire absence of life, partly due to the inclement weather which was experienced that day and the fact that the butchers' requirements are somewhat limited owing to the general exodus from town during this month; nevertheless, no lower rates can be recorded. The Irish consignment consisted of 23 Dublins and 55 Waterfords, these shared in the poor trade and were quoted 2d. per 8 lb. lower in value. No fat cattle were offered for sale on Thursday. On both market days fat cows and bulls were slightly in excess of demand, but were able in most cases to maintain late values.

At the Foreign Cattle Market, Deptford, only one market was held during the week, namely, Saturday. Trade ruled of a firm and steady nature, best States beasts showing an upward tendency, whilst Canadian remained about the same. The total number on offer at both markets was 3,010, as against 3,900 during the preceding week, consisting of 890 British (increase 10) and 2,110 foreign (decrease 900), these comprising 1,500 from the United States and 610 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal): —90 to 95 stone Herefords, 4s. 6d. ex 4s. 8d.; 95 stone Runts, 4s. 4d. to 4s. 6d.; 100 to 110 stone 4s. to 4s. 2d.; 95 stone Irish, 4s. 4d.; 90 stone States, 4s. 3d. to 4s. 5d.; 95 stone Canadians, 4s. to 4s. 3d.; 90 stone fat cows, 3s. 4d. to 3s. 6d.

In the sheep market a slow trade was experienced throughout the week for all descriptions at a decline in value for wethers. Ewes, on the other hand, made late values, as also did Irish. Scotch were in excess of the requirements, consequently less money had to be accepted to effect sales. On Thursday Monday's values governed all transactions. Lambs were in fair average supply, but were difficult to vend, even at the extremely low rates prevailing. These brisked up on Thursday, and were quoted at 2d. to 4d. per 8 lb. more money. The total number penned was 6,960, as against 7,560 during the preceding week, this showing a decrease of 600. Best pens made per 8 lb. as follows:—7½ to 8 stone Downs, 5s. 10d. to 6s.; 8 stone Scotch, 5s. 10d. to 6s.; 9 stone Downs, 5s. 8d. to 5s. 10d.; 10 stone Irish, 5s. 4d. to 5s. 6d.; 10 stone Downs, 5s. 6d. to 5s. 8d.; 10 stone Half-breds, 5s. 4d. to 5s. 6d.; 10 stone ewes, 4s. to 4s. 2d.; 5 stone fat Grass lambs, 6s. 6d. to 6s. 8d.; 6 stone Halfbred ditto, 6s. 2d to 6s. 4d.

Calves numbered 30, trade for which ruled of a slow nature, best on offer being quoted at from 4s. 10d. to 5s.

No pigs were offered for sale on either market day.

Trade in the West.

It is satisfactory to be able to state that the stock markets are keeping so exceptionally firm, milch beasts as well as barreners just at present bringing better prices than they have for a long time past, and sheep sales are being characterised by similar satisfactory results. Milch beasts are meeting an unusually keen demand, it being no unusual thing for good-class milchers to realise £22 and even more, though a more average range for heifers is from £17 to £21 apiece, and for secondary grades of heifers and cows from £14 up to £16 10s. In-calvers meet an equally good inquiry from £10 to £14 each; two-year-olds make £8 to £9 each; and yearlings £3 to £7 for the most promising. Barreners are a particularly fast trade, and, with keep plentiful and beef selling at high prices, this is little matter for surprise, graziers readily securing all the best lots now coming to market at from £24 up to £32 per pair, whilst there is also fair consumptive demand for the plainer grades at from £17 to £22 or £23.

Considerable numbers of breeding ewes with other sheep suitable for keeping on are being marketed at good prices, a general run for breeding ewes from 44s. to 48s., though for anything out of the common from 50s. to 52s. or 53s. is made for the younger ages; wethers, 43s. to 49s; store hogs, 35s. to 42s.; and lambs, 28s. (for small rough lots) to 44s. or 45s. for those of a better class. Although we can hardly quote prices as lower, we fancy we can detect a little less inclination on the part of buyers to buy as largely as they have been doing of late; and perhaps this is to be accounted for by the less favourable character of the harvest than was at one time the case.

Moderately good supplies of fat stock of all kinds excepting sheep are coming to hand at the generality of the markets, these proving ample to meet all requirements. Speaking generally of trade, we must quote business as steady throughout, with prices, as a rule, fairly well maintained, more particularly for all the choicer grades, which rule exceedingly firm. Some very good Devon and Shorthorn steers and heifers are included among the fat bullocks now being offered, for the best of which from 11s. 6d. to 12s. is the current quotation (or up to 24s. each for the heaviest); secondary grades and cows, 10s. 6d. to 11s.; and coarse heavy bullocks, 9s. to 9s. 6d. Calves still proved altogether inadequate to the demand, and this tends to keep prices very buoyant; best sells up to 8⅝d or 9d. per lb, and seconds 7½d. to 8d.

In spite of short supplies, mutton, both wether and ewe, is somewhat quieter than it was, but lower currencies cannot be quoted, wethers still selling up to 9d., and ewes, (which in one case this week reached 64s.), 7½d to 8d. Lamb trade temporarily favours buyers, the season being practically over, and what is now coming out may be more accurately described as young mutton, but should still be quoted 9½d. to 10½d. per lb. (only lot of Down wethers selling at Wimborne this week up to 58s. 6d. each), only small, half-finished lots selling for less money. Pigs retain all their old firmness both for neat-handling porkers as well as for heavier baconers, which are readily selling from 9s. to 10s. 6d. per score; coarse pigs, 8s. 6d.

Trade in Scotland.

The number of fat cattle on offer this week has been slightly smaller, and the general quality rather improved. A fair demand has been experienced at prices all through about 10s. per heed higher. A large and good show of fat cows and a small show of bulls, all of which met a dear trade. Sheep in full average numbers. These have met a moderate inquiry, and any change, more especially in secondary ewes, favoured buyers. Lambs in smaller numbers, and those of good quality met a better trade. Calves very dear, while pigs were also just the turn dearer.

There was a moderate supply of store cattle. Anything of a good class got sold out at fairly satisfactory prices, but rough cattle are still neglected and difficult to quit. Fewer store sheep and lambs on offer. Owing to the extremely bad weather this class of stock showed to disadvantage, and a slow inquiry was experienced at prices quite 1s. a head lower, a number of the inferior kinds being left unsold. An exceedingly large and good show of milch cows met a dear trade. Quotations:—Top price of cattle per live cwt., 39s. 9d.; current, 36s. to 38s.; mutton, 6½d. to 9½d. per lb.—John Swan and Sons, Ltd.

Trade in Ireland

As is generally the case in Dublin cattle market on the Thursday of horse show week, the supplies were very short, there being only 3,393 beasts (a decrease of nearly 1,000), and 8,697 sheep and lambs (a falling away of nearly 2,000 on the previous market). This decline brought offerings up considerably, that the nicer descriptions of cattle were about 10s. per head up, but sheep were not in demand, and business was dull and unsatisfactory. The cattle market opened very early, and business was fairly good, with a better demand than last day. There was a general improvement in all sorts of cattle.

The live-weight price for good cattle would average between 31s. 6d. and 33s. Dead-weight prices were:—Best ox and heifer beef, 57s. to 60s.; good second class beef, 47s. 6d. to 50s. 9d.; and inferior beef, 42s. to 46s. per cwt. The attendance of buyers from all centres was large, which is customary in horse show week, when so many strangers come to town. The shrinkage of close upon 1,000 head was however, mainly responsible for the increase in price, as it produced an increased demand from English and Scotch buyers. A large decrease in the number of stock in the market was also due to the fair being held in Mullingar on Thursday, and it was very largely attended and buying was good; this fair kept many of the North of Ireland buyers away. Two lots of very fine bullocks were sold from the stand of Messrs. Duffy, Mangan, and Butler, to Mr. Fisher, of Oldham, England, at £25 each. Second quality and coarse beef was much easier sold than at the preceding market.

The very wet day had a bad effect on the mutton department, the continuous rain having the effect of making many buyers leave earlier than they would otherwise have done. The market having a supply of practically 2,000 head as compared with last market, however, prevented any great fall in price. For choice lightweight Cheviots and hoggets, suitable to city buyers, there was really no fall to speak of, but for heavy wethers and ewes there was less money given. The shipping demand was only nominal. Lambs continued to meet with a good enquiry, as the season is practically closed. Wether mutton was worth 7½d. to 8d. per lb; ewe mutton, 6¾d. to 7½d.; and coarse sheep, 6d. to 6½d. per lb.

Choice fat lambs, 36s. to 40s. each; second quality, 26s. to 32s.; and inferior quality, 18s. to 24s. each. Prime well-fed veal was worth from 8d. to 9d. per lb.; inferior quality, 5d. to 6d. per lb. Good milch cows in fair demand, but other sorts very cautiously dealt with, best cows worth from £18 to £19 each; a lot of six newly-calved cows on Mr. Keogh's stall attracted a good deal of attention and were sold to go across channel at £20 each.

There was a large supply of pigs in the market on Wednesday, but the attendance of buyers was poor, and those present were very reserved and cautious in their transactions.

Prices were depressed, and many useful animals remained unsold at the close of the market. Lightweight pigs sold at from 50s. to 52s.; heavy pigs, 47s. to 50s.

LONDON.

Central Market, Friday.—Fairly good supplies and trade slow, but prices firm for good beef. English beef, 3s 9d to 3s 11d; Scotch sides, 4s to 4s 2d; shorts, 4s 4d to 4s 8d; Deptford and Liverpool killed, 3s 6d to 3s 10d; refrigerated hindquarters, best, 3s 10d to 4s 1d; ditto seconds, 3s 7d to 3s 9d; ditto forequarters, 2s 5d to 2s 7d; inferior beef, 2s to 3s; mutton, Scotch wethers, 4s 8d to 5s; ditto tegs, 5s; ditto ewes, 3s 6d to 3s 8d; English wethers, 4s 4d to 4s 8d; ditto ewes, 3s 4d to 3s 8d; Dutch sheep, 3s 10d to 4s 2d; English lamb, 4s 8d to 5s; veal, 3s 8d to 4s 8d; English pork, 3s 6d to 4s; Dutch pork, 3s 4d to 3s 8d per 8 lb.

Islington, Thursday. — To day's supply of beasts consisted entirely of fat cows and bulls, which met a slow trade at last Monday's values. Top prices paid per 8 lb:—Fat cows, 3s 4d to 3s 6d; fat bulls, 2s 9d to 3s 2d. A decrease of 210 in the number penned in sheep market. Trade for both wethers and ewes ruled slow at last Monday's values. Lambs were in short supply and met with more inquiry, consequently sellers both asked and obtained an advance of 2d per 8 lb. Best pens made per 8 lb as follows:—7½ to 8 stone Down sheep, 5s 10d to 6s; 9 stone ditto, 5s 8d to 5s 10d; 10 stone ditto, 5s 6d to 5s 8d; 10 stone halfbreds, 5s 4d to 5s 6d; 10 stone Down ewes, 4s to 4s 2d; 5 stone fat Down lambs, 6s 8d to 6s 10d; 6 stone halfbred ditto, 6s 2d to 6s 4d. Calves were in smaller numbers, but made no advance in values. Quotations per 8lb, sinking the offal:—Beasts, 2s 9d to 3s 6d; sheep, 4s to 6s; calves, 3s 10d to 5s; lambs, 5s to 6s 10d.

COUNTRY.

Ashford, Tuesday.—Average attendance and a good trade at last week's prices for beef, mutton, and pork, but veal made more money. Best beef, 4s 7d to 5s; secondary, 4s 2d to 4s 6d; cows, 3s 9d to 4s. Mutton, small half-bred Downs, 5s 6d to 6s; small wethers, 5s 4d to 5s 8d; large wethers, 4s 8d to 5s; barrens, 4s to 4s 4d. Veal, 5s to 5s 6d. Lamb, 6s 6d to 7s. Pork, roasters, 3s 10d to 4s.

Aylesbury, Wednesday, — There was the usual supply of stock, consisting of 700 sheep and lambs and 120 beasts. Trade was slower in both departments, and prices showed a downward tendency. Wethers realised from 48s to 59s 6d; Cheviots, 35s 6d to 45s; owes, 41s 6d to 53s; lambs, 30s 6d to 41s; heifers £13 7s 6d to £19 7s 6d; and bullocks, £15 5s to £21 2s 6d.

Basingstoke, Wednesday.—At C. H. Raynbird and Son's sale yard there was a good attendance to meet a supply of 34 fat beasts, 67 calves, 89 fat and store pigs, 303 fat sheep and lambs, and 131 head of dairy and store cattle. The fat beasts

were all sold, and last week's figures well maintained, Devon steers making up to £19; heifers, £15 15s; Shorthorn steers reached £22 10s; heifers, £17 10s; cows, £10 to £17 10s; bulls, £11 to £16 5s. There was a good trade for the short supply of fat sheep and lambs, the best lambs and fat ewes making an advance, and other classes maintaining last week's figures. Twenty months' old Down ewes and wethers made from 52s to 57s; smaller, 46s to 50s; cross-bred Scotch, 46s 6d; Cheviots, 38s 6d; Down ewes, 48s to 57s; second-class, 40s to 46s; old Down ewes, 34s to 38s; Black-face Scotch ewes, 30s 6d; Down rams, 46s to 52s; Down ram lambs, 40s to 51s; eight months' old Down lambs, 46s to 51s 6d; second-class, 38s to 44s; three months' old sucking lambs, Downs, 40s to 42s; cross-bred Scotch, 32s. With an average supply of milch cows and heifers on offer a firm trade was found for all best class cattle, secondary sorts a dull trade; heifers and calves making from £10 10s to £16 10s; cows and calves, £11 5s to £20 10s. Store cattle moved off well with a good demand; fat calves met a slow trade at reduced prices, the best making from 60s to £5 2s 6d; smaller ditto, 20s to 57s 6d. The pig trade, both for fat porkers and store pigs, was firm with an upward tendency in prices; fat porkers making from 35s to 56s; stores to 24s. Ruling values:—Prime Devon beasts, 7d to 7½d; ditto Shorthorns, 6½d to 7d; bulls, cows, and inferior, 5d to 6d; best sheep and big lambs, 8¾d to 9¼d; second-class, 7½d to 8d; old ewes, rams, and inferior, 6d to 7d; choice sucking lambs, 9d to 10d; fat calves, 6d to 7½d per lb; fat porkers, 11s to 12s per score.

Berwick, Saturday.—Only ninety-three cattle were offered, and attendance of farmers and buyers small, with trade dull. Stirks, £8 to £10 10s; two-year-olds, £11 to £13; Shorthorn bulls £11 10s.

Birmingham, Thursday.—Small supply of beasts, sheep, and pigs; fair trade for pigs, slow trade for beasts and sheep. Beef, 5½d to 6½d per lb; mutton, 6d to 8½d per lb; lamb, 8½d to 9d per lb; bacon pigs, 10s 3d per score; cutting pigs, 10s 3d per score; sows, 8s to 8s 3d per score.

Bristol, Thursday.—Beef was in large supply and in fair request; moderate business passing at 62s. per cwt. best qualities and 57s. secondary. Mutton also was fairly plentiful, and demand fairly brisk, average trade being done at last week's values, though lamb declined to 9d per lb. Pigs were again scarce, and prices unchanged.

Calne, Friday.—Prices of pigs:—In lots of not less than ten, on rail within 100 miles, 1s. per pig extra for delivery by road. Prime stores, 6 sc. 10 lb to 8 sc. 10 lbs, 9s 6d per score, 8 sc. 11 lb to 9 sc. 10 lb,, 9s per score; 9 sc. 11 lb to 10 sc. 10 lb, 8s 6d. Pigs outside these limits at their value.—C. AND T. HARRIS AND CO., LTD.

Canterbury, Saturday.—A fair trade; supplies not quite so much. Working lambs made from 18s to 21s, and the best up to 28s and 30s. Good registered ewes were selling at from 46s to 48s, and sound-toothed ordinary ones from 42s to 44s. One run of eighty five ewe and wether lambs ranged from 24s 6d to 29s. A number of two-year-old bullocks found purchasers at from £9 15s to £11, the average price being a little over £10 per head.

Carlisle, Saturday.—Small attendance of buyers, and a quiet trade. Black polled bullocks and blue-greys, £6 10s to £10 10s; wintering heifers, £6 10s to £10 10s; and heifers for stall purposes to £16 10s.

Chester, Thursday.—A well-stocked market, but a small attendance. Prices remained unchanged from last week. The sheep supply comprised Clun ewes and Scotch and Irish wethers and lambs. Quotations:—Milch cows, £17 to £22; calvers, £15 to £19; barrens, £10 to £13; heifers, £9 to £16; and stirks, £6 to £10 each.

Chichester, Wednesday.—There were plenty of buyers for fat and store sheep and lambs, and a clearance was quickly effected, prices being fully as high as those realised of late. Trade for nice quality fat beasts of handy weights was firm at late rates, but heavy cattle and fat cows and bulls experienced a dragging sale at a reduction of fully 3d per stone. There was not quite so much inquiry for dairy cattle, and prices were 10s to 20s per head down. With the exception of a few lots of yearling Shorthorn heifers, which fetched from £7 to £9, the majority of store cattle were unsold. Fat pigs realised about late values, but stores were 2s to 3s per head easier. Quotations:—Prime Down lambs, 7s 6d to 8s 6d; prime Devon steers, 4s 8d to 5s; Shorthorn steers, 4s 4d to 4s 8d; prime Southdown mutton, 6s 6d to 6s 10d; West Country ditto, 6s to 6s 6d; fat ewes, 4s 6d to 5s; veal, 4s 8d to 5s 2d; fat pigs, 3s to 4s per stone; store pigs, 15s to 24s per head.

Doncaster, Saturday.—Good supply of cattle, especially milch beasts, for which there was a better demand, and prices were firm. Milch £17 to £23, bullocks £12 to £18, heifers and drapes £11 to £15, stirks £9 to £11, young stores £7 to £9 each. Large supply of sheep, but trade was slow at late rates. Shearlings 45s to 50s, ewes 52s to 60s, gimmers to 60s, and lambs 34s to 44s each.

Dorchester, Saturday.—Owing to the sheep fair to day there was a larger attendance at the cattle market than usual, but only moderate deliveries of stock came to hand, principally milch beasts and barreners, the dairy stock including some exceptionally useful heifers and calves, and also cows with calves, those from the Isle of Purbeck attracting very close attention. There were some very choice fat bullocks, but the supply of mutton was very short. Dairy beasts again sold at extreme rates—heifers £16 to £20 10s for the best, and cows from £14 to £17 15s; very plain heifers and old cows, £11 to £13 15s; barreners, as a rule, fetched £19 to £27 per pair; and stirks from £9 to £11 10s each. Fat beef ruled firm at 11s to 11s 6d for the best steers and heifers (or from £16 10s to £22 each), and cows 10s to 10s 6d. Mutton met a steady, not to say fast, trade at 7½d to 8½d per lb; and lamb may be quoted 9½d to 10½d.

Dublin, Thursday.—Numbers in market: Beasts 3,393, decrease 909; sheep 8,679, decrease 1,973; calves 64, increase 32. Choice cattle were in good demand and made a shade more than last week's extreme prices. Secondary and inferior lots met rather more inquiry, and an early clearance was effected, though no improvement in quotations can be recorded. In the sheep classes there was a rather weaker tendency, and difficulty experienced in effecting sales. Lambs lower in price. Cattle—Live weight (best), 31s to 32s 6d per cwt; secondary and inferior, 27s to 29s 6d per cwt; choice Angus crosses up to 35s per cwt. Mutton, 7½d to 8¾d per lb.—GANLY, SONS AND CO.

Edinburgh, Thursday.—Market report says:—Cattle good demand, supplies more plentiful; polled cattle to £15; stirks to £7 5s; cows, fine show, Shorthorns, £23 10s; Ayrshires, £17; cross, £22 10s; Irish to £22. Sheep brisk trade, smaller supplies Cheviot sheep, 39s; Down lambs, 23s; half-bred gimmers to 40s; Cheviot Dinmonts to 39s; half-bred ewe lambs to 34s; half-bred wether lambs, 32s.

Exeter, Friday.—Large supply of fat sheep; fat lambs, up to 50s; fat wethers, 42s to 52s; fat hogs, 40s to 48s; breeding ewes, 40s to 49s; steers, up to £20 10s.; fat heifers, £12 10s to £18 17s 6d; rearing calves, 34s to 38s; store steers, £8 to £12.

Glasgow, Thursday.—Fair show of cattle, and for really prime grades and handy weights a good selling trade was experienced, but inferior sorts were the turn cheaper and harder to sell. Top, 62s to 65s; secondary, 56s to 59s per cwt. Sheep and lambs were marketed in very large numbers, consequently prices suffered all round; prime hoggs and wethers in fair demand; other grades slow; best mutton, 9d to 9¼d; secondary, 8¼d to 8¾d; lambs, 8d to 9d per lb.

Hereford, Wednesday.—A large supply of beef, but no improvement in trade. Best quality bullock and heifer beef made 6¼d to 6¾d per lb; cow beef, 5d. Sheep were a big supply, both mutton and store, which maintained a good trade right throughout, wether mutton making 8¾d, and fat ewes 6¼d to 7d. Several bunches of store ewes changed hands at satisfactory figures, A good supply of fat and store lambs, the former making 8d to 9d, and the latter experiencing a rather slower trade. There was a capital supply of calves, with trade about the same as last week, veal making 6¼d per lb. The pig trade was fairly firm, supply moderate. Porkers made 5½d to 6d. Store trade unchanged. A few good stores changed hands. Store cattle dull; supply fair.

Leicester, Saturday.—Heavy consignments of home-bred store stock. Buyers were well represented, and trade ruled brisker for all choice lots at 10s per head advance. Milch cows, £18 to £20 for good lots, and £14 to £16 10s for secondary; Shorthorn bullocks, £13 to £15 10s; Irish bullocks, choice, £16 to £17 10s; ditto, secondary, £12 10s to £15; Welsh cattle, £11 to £14 10s; heifers, £10 10s to £15 5s; young stock, £5 to £7 10s; calves, 15s to 35s each. Sheep were in fair supply and sold freely. Good lamb hoggs, 38s to 42s., ditto, secondary, 27s to 33s each.

Lincoln, Friday.—A small consignment of horned stock, and a slow trade. Young beasts, £9 to £12; milch cows, £17 to £20. The sheep pens were well filled, and business ruled dull. Lambs, 36s to 44s; breeding ewes to 64s; drape ditto, 36s to 42s each.

Manchester, Friday.—Beef: Firsts, 5½d; seconds, 4½d to 5d; thirds, 3½d to 4d. Mutton: Firsts, 7¼d; seconds, 6½d to 7d; thirds, 5½d to 6d. Veal: Firsts, 6½d; seconds, 5½d to 6d; thirds, 4½d to 5d. Lamb: Firsts, 7¼d; seconds, 6½d to 7d; thirds, 5½d to 6d.

Newcastle, Tuesday.—The supply of cattle forward was smaller, and trade was slow, and prices unaltered. Quotations:—Prime heifers, 7s 6d to 7s 9d; second-class, 7s to 7s 3d; prime steers, 7s 3d to 7s 6d; second class, 7s to 7s 3d; coarse and inferior, 6s 6d to 6s 9d. per stone sinking the offal. Sheep and lambs were a slightly smaller supply, and trade was generally slow, and while second-class lambs showed a slight improvement, ewes dragged heavily, and were ½d. down. Quotations:—Choice young sheep, 8½d to 8½d; strong heavy, 8d to 8¼d; choice lambs, 9d to 9½d; second-class, 8½d to 9d; ewes, 6d to 6½d; rams, 5d to 6d per lb. Calves were a rather lighter supply, and trade was firmer, and prices improved ½d., veal making 6d to 7½d per lb.

Newport, Wednesday. — Large supply of cattle, sheep, and lambs. Good attendance of buyers, and a good demand all round. Best beef, 6½d to 6¾d per lb; seconds, 6¼d; cows, 4½d to 5½d; best wether mutton, 8½d to 8¾d; ewes, 7d to 7½d; lamb, 9½d; calves, 7d to 8½d; porker pigs, 10s to 11s per score.

Norwich, Saturday.—With a good supply of fat beasts trade was not so good, at prices ranging from 7s to 7s 9d per 14 lb. There was a larger show of store cattle as compared with last week. The market was practically comprised of Irish stock, and the demand experienced was of a dull, dragging description, a clearance not being effected. Values ranged from £6 to 18 10s per head. There was but a very small supply of store sheep and lambs, and very little business was doing. There was practically no alteration in recent rates. Lambs figured at 35s to 42s per head, and breeding ewes made up to 65s each. Fat sheep were also penned in limited numbers, but the supply fully met the demand, and trade was a trifle easier at 10s to 10s 6d per stone. A small show of fat and store pigs met with a ready clearance. Fat averaged 6s 9d per stone for cutters, sows made 5s 6d per stone. Young store pigs ranged in price from 9s to 21s per head, and larger sizes made from 25s to 38s each.

Nottingham, Saturday.—Trade was a trifle brisker. Best milch cows realised 17 to 20 guineas, heifers, £16 to £18; store stock, £9 to £13, and calves, 30s to 45s. No sheep were shown. The official returns:—144 beasts and 61 calves.

Preston, Wednesday.—Good supplies in all departments, and a slow, dragging trade, recent rates not being maintained. Local-fed heifers, 6¾l; Irish ditto, 6¼d; young cows and bulls, 6d; inferior cows and bulls, 5d to 5½d; lambs, 9d; heavy and inferior ditto, 8d to 8½d; prime ewes, 7d; heavy ewes and tups, 6d to 6½d; hoggs, 8½d to 9d; calves, 7½d per lb.

Romford, Wednesday.—Short supply of fat beasts; trade a little better; best small, neat beasts, 4s 6d to 4s 8d; larger beasts, 4s 2d to 4s 4d per stone. Calves in short supply; business rather better at 5s 2d to 5s 4d per stone. Sheep in shorter supply; trade better: Best small sheep, 6s to 6s 2d; large sheep, 5s 8d to 6s per stone. Ewes in average supply, prices a little better at 4s 2d to 4s 4d per stone. Lambs in short supply, trading better at 6s 4d to 6s 8d per stone. A few store beasts on offer; slow demand. Large supply of milch cows; trade slow. Pig trade slow: Small porkers, 3s 8d to 4s; large hogs, 2s 8d to 3s per stone.

Sheffield, Tuesday.—Milch beasts fairly plentiful and a better tone in trade, good cattle making £20 to £21; younger cattle, £15 to £14 10s.

Stockton, Thursday.—An average show of the best cattle, which made 7s 3d to 7s 9d per stone, whilst rougher kinds made 6s 6d to 7s, trade being slow. Young sheep sold at 8½d to 9d per lb, lambs 9½d to 10d, ewes 7d to 7½d, and tups 6½d. Porkers made 7s to 7s 6d per stone, mediums 7s, and s ws 6s 6d.

Shrewsbury, Tuesday.—Usual supply of fat and store cattle, but larger number of store sheep. Very steady trade all round. Quotations:—Beef, 6½d to 7d per lb; mutton (wether), 9d to 9½per lb; ewes, 7½d to 8d per lb; lamb, 9d to 9½d per lb; veal, 7d to 8d per lb; porket pigs, 10s to 10s 6d per score; bacons, 9s 6d to 10s per score

Thame, Tuesday.—There was again a very large entry of all descriptions of stock, sheep coming to hand in large numbers. Trade for beef showed no alteration, although for ripe fat cows there was a little more inquiry. Sheep continue to make satisfactory prices, practically every pen being disposed of. Messrs. Bond and Burrows' sale comprised 108 fat beasts, 390 fat and store sheep, 78 fat and weaning calves, and 90 fat and store pigs. Fat oxen made from £16 10s to £21 17s 6d; fat heifers, £15 5o £21; fat wether sheep, 48s to 60s 6d; fat ewes, 42s to 58s; fat lambs, 36s to 50s; fat calves, £3 to £5; weaning cow calves, 35s to 60; bull calves, 20s to 48s; bacon hogs, £3 10s to £5; porkers, 30s to 48s; store pigs, 16s to 32s.

Truro, Wednesday.—Business fairly brisk; attendance very good. Fat bullocks, 56s to 60s per cwt; barreners and store bullocks, 40s to 45s per cwt; cows and calves, £10 to £15; rearing calves, 16s 6d to 45s each; wethers, 6½d to 7d per

lb; ewes, 5d to 5½d; lambs, 7d to 7½d; pigs, 9s 6d to 66s each; beef, 6d to 8d per lb; mutton, 6d to 8½d; lamb, 8d to 9d; veal, 6d to 8d; pork, 6d to 8½d; pork, carcases, 5d to 5½d.

Wolverhampton, Wednesday.—Short supply and moderate trade. Quotations:—Beef, 5½d to 7½d; wether mutton, 8½ to 9d; lambs, 10½ to 11d; veal, 7d to 9d per lb; bacon pigs, 9s 6d to 10s; porkets, 10s to 10s 6d; cows, 7s to 8s per score.

Worksop, Wednesday.—Small supply of stock, Trade for mutton was not so good, whilst beef sold at about late rates. Best beef, 7s 6d to 8s; secondary, 7s 3d to 7s 6d; cow beef, 6s 9d per stone; best Southdown wethers and cross-breds, 8½d to 9d; ewes were a bad trade at 5½d to 6d; veal, about 8d per lb.

Yeovil, Friday.—A fairly good entry. Best quality heifers and calves sold at from £16 10s to £20; secondary animals, £12 15s to £16; cows with calves or in-calf, £12 5s to £18 5s; barreners, £9 5s to £10; yearling heifers, £7 to £8 15s.

York, Thursday.—There was a very large show of Irish, and an average supply of English store stock, trade for which was almost at a standstill owing to the poor attendance of buyers. Prices were in favour of buyers, but less than a quarter of the cattle found purchasers. One lot of Irish strong cattle made up to £16 10s. A smaller show of calving and milch cows than usual, with very few customers, and a poor trade. A few good animals made up to £20, but the majority only fetched £16 to £17. A very large supply of shearling sheep and lambs, about 10,000 being penned. Trade ruled slow, at fully 2s. per head less money, while quite half remained unsold. The best Holderness and twice crossed lambs made up to 40s per head; secondary sorts, to 36s; and third class, 28s to 32s. Best shearling sheep made up to 50s, others 42s to 46s each.

BUTTER.

(Price per lb.)

Stockport: 8 and 9. Stockton: 10. Totnes: 1s 2d to 1s 3d per doz. Truro: 10d to 11d per doz. Worcester: 10 to 12. Worksop: 2s 1d to 2s 3d per score. York: 10 and 11.

CHEESE.

Glasgow, Wednesday.—The arrivals of home cheese exceeded those of last week. Buyers were not disposed to operate at the firm prices asked for some lots. Cheddars were quoted 57s to 61s per cwt, and Dunlops 54s to 59s. Canadian parcels were slow of sale at about 67s per cwt.

Highbridge, Tuesday.—A large attendance of buyers, a brisk competition, and all cleared. Best Caerphilly dairies realised up to 64s per cwt.; secondary dairies, 60s to 62s; and other dairies, 55s to 58s. A few inferior lots failed to reach 50s. Cheddars, old, 70s to 73s; ditto, new, 54s to 56s 6d; truckles, 53s to 58s; doubles, 50s to 54s.

Newport, Wednesday.—Quotations:—Caerphillies, 45s to 58s per cwt; fancy dairies, 60s to 62s; Derbies, 58s to 60s; truckles, 56s to 65s; doubles, 54s to 56s. About 10 tons were pitched; and fair demand.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter.—The demand for Australian and New Zealand butter, especially for very best quality, continues fair, but supplies are in very small compass. Canadian arrivals, too, are small. The total arrivals of Colonial butter from July 1 this year to date are 1,321 tons, against 4,855 tons for the same period in 1906. Australian shaws a shortage of 2,287 tons, New Zealand a surplus of 619 tons, and Canada a deficiency of 1,866 tons, making a total deficit of 3,534 tons. Shipments from Australia this week consist of 2,000 boxes in the "Ortona," and 1,250 in the "Carpentaria." The Copenhagen official quotation was reduced yesterday by 3 kroner, which is most unusual in August. In fact, a reduction in August has taken place only four times in thirty-two years. The large production of home-made butter is the main cause of the low price of imported butter, which is fully 10s and 12s per cwt below this time last year. Cheese.—The market for spot business has been very quiet at 57s per cwt., and 58s for very best White and Coloured respectively.—W. Weddel and Co.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Good supplies of fruit and vegetables at market, trade being fairly brisk. Quotations for English produce:—Grapes, 6d to 2s; greengages, 2s to 4s; pears, 3s to 5s per bushel; plums (Victoria), 1s to 3s 6d; ditto (Orleans), 2s to 3s; ditto (Gisborne), 1s to 1s 3d per half sieve; apples, 2s 6d to 8s per bushel; peaches, 9s per doz; oranges (Jamaica), 12s to 15s per case; green figs, 1s 6d to 3s 6d; nectarines, 2s to 8s per doz; melons, 1s to 2s; ditto (Rock), 2s to 3s 6d each; filberts, 2s 6d to 3s 6d; cobnuts, 4s to 5s per 12 lb; tomatoes, 3s to 4s; scarlet runners, 1s to 2s per bushel; green peas, 4s to 6s per bag; ditto, 2s to 4s per bushel; vegetable marrows, 1s 6d to 3s; cabbage, 2s 6d to 3s 6d; cauliflowers, 4s to 5s per tally; onions (English), 1s 6d per dozen bunches; turnips, 1s 6d to 2s 6d; mint, 1s to 1s 3d; parsley, 1s 6d per dozen bunches; green artichokes, 1s 6d to 2s per dozen; cos lettuce, 6d to 8d per score; carrots, 2s to 2s 3d per bag; cucumbers, 4s to 6s per flat; potatoes, 50s to 75s per ton.

WOOL.

London, Saturday.—English—per pk. of 240 lb.—Fleeces, South Down hoggs, £14 10s to £15; half-bred hoggs, £13 to £13 10s; ditto wethers, £12 10s to £13; Kent fleeces, £12 5s to £12 10s; South Down ewes and wethers, £13 10s to £14; Leicester ewes and wethers, £12 to £12 10s. Colonial—per lb.—Vic., scoured super., 2s 2d to 2s 3d; scoured, good, 1s 11½d to 2s 1d; scoured, average, 1s 10d to 1s 11d; greasy, average to fair, 1s 1½d to 1s 2½d; N.S.W., scoured, average, 1s 9½d to 1s 10½d; greasy, average, 1s to 1s 1d; S. Aus., greasy, average, 10d to 11d; N.Z., scoured, average, 1s 10d to 1s 11d; greasy, average, 11d to 11½d; Cape, scoured, super., 1s 9½d to 1s 10½d; fleece, average, 9½d to 10½d; greasy, average, 8½d to 9½d; Natal, scoured, 1s 5½d to 1s 6½d; greasy average, 8½d to 9d. Crossbreds—grs.—Vic., good to super., 1s 3½d to 1s 4½d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s to 1s 1d; coarse, 10d to 11½d.

Canterbury, Saturday.—Market very firm, and few transactions. Staplers bid 11d for Kent fleeces, 7d for lamb wool, and 5d per lb for locks.

Glasgow and Leith.—During the month of August a large weight of wool of all classes has changed hands, especially towards the end of the month. Half-breds particularly have been in demand, and at Leith auctions on 20th and 21st there was almost a complete clearance at prices fully ½d per lb above those of the previous sale. Crosses are practically cleared out. Cheviots remain out of favour and are now relatively the cheapest wool on the market. There has been rather more inquiry, especially for fine hoggs, but prices are unaltered. Blackfaced has been dealt in freely, both for American and home consumption, at current prices.—J. and W. Greig, Sept. 2.

Halifax, Saturday.—Business in wool rather languid, but tone good, and values well supported. Firmness in raw materials has strengthened position of spinners, and Botany makers report more transactions at better rates. Export trade rather werk.

CORN STATISTICS

Five Years' Comparative Averages.

(OFFICIAL.)

Comparative statement of grain sales and prices at the Statute markets for the week ending August 31, and for the corresponding week in each of the years from 1903 to 1906:—

RECEIVED TOO LATE FOR CLASSIFICATION.

ARMY CONTRACTS.

FORAGE, PEAT MOSS LITTER, AND PAILLASSE STRAW.

SEALED TENDERS for Military Services, during six months from the 1st NOVEMBER, 1907, will be received until 12 o'clock noon, on MONDAY, the 23rd day of September, 1907, by the General Officers Commanding the undermentioned Districts.

Aldershot Army-Corps Command.—Aldershot.
Eastern Command.—Dover District.—Dover; Colchester District.—Colchester; Woolwich District.—Woolwich; Thames and Medway Coast Defences.—Chatham.
Irish Command.—5th Division.—Curragh Camp; 5th Division.—Dublin; 6th Division.—Cork; Belfast District.—Belfast.
London District.—Horse Guards, Whitehall, S.W.
Northern Command.—York.
Scottish Command.—Edinburgh.
Southern Command.—3rd Division.—Tidworth Barracks, Andover; Plymouth Coast Defences.—Devonport; Portsmouth Coast Defences.—Portsmouth.
Western Command.—Chester.
Guernsey and Alderney District.—Guernsey.
Jersey District.—Jersey.

Forms of Tender and Conditions of Contract may be obtained on application at the above-named Head Quarter Offices, by letter addressed to the Officer Commanding, Army Service Corps, or in person between the hours of Ten and Four o'clock.

War Office, Whitehall, S.W,
September, 1907.

OILCAKE AGENTS to SELL celebrated Compound Cake to Farmers on commission; busy season just commencing.—Address, "Oilcake," C. A. G Browne, 53-54, Wych Street, Strand, W.C.

Printed and Published by the Proprietors, at the Offices, 8, Wellington Street, Strand, London, W.C.—September 2, 1907.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The want of steady weather in which to complete the wheat harvest is a serious matter, and the higher temperature, which has been welcome to holiday-makers, is agriculturally disadvantageous; it is almost sure to lead to sprouting and the spread of fungoid troubles; with the air laden with moisture, it will also promote the spread of potato disease. Some large crops of mushrooms can hardly be regarded as an agricultural counterpoise! The mills are waiting to get to work on the new crop, and meanwhile milling offals are fetching prices which, while very agreeable to millers, are taking the heart out of those who have live stock to fatten. The Continental crop news is very difficult to arrange, for the last six days have brought information, in each case apparently of an authentic character, that the French wheat crop is threshing out decidedly better than last year, and that the yield in Russia has certainly been overestimated. The French crop is now put by farming, not milling, papers, at 44,000,000 qr again t 41,000,000 for the July estimate, while the Russian yield is given at about 68,000,000 qr., against 75,000,000 qr., the estimate published as recently as August 23. Austria-Hungary chiefly needs imports; as this country usually exports 2,230,000 qr. of wheat to Switzerland and industrial north Germany, and 500,000 sacks of flour to England, &c., the change in the situation is naturally beginning to attract notice. Indian crop shipments remaining very small despite the good prices offering, tend more and more to endorse our May and June protests against the absurdly optimistic estimates issued for Simla. The India Office not being responsible for the Indian estimates which it simply transmits to the Press, and India itself having no Parliament, inquiry appears to be completely burked.

London monthly arrivals of wheat for the cereal year have been approximately as follows. There are no official figures, but the trade will probably find our calculations near enough for most practical purposes:—

September,	1906	338,000 qr.
October	,,	315,000 ,,
November	,,	334,000 ,,
December	,,	273,000 ,,
January,	1907	270,000 ,,
February	,,	170,000 ,,
March	,,	273,000 ,,
April	,,	549,000 ,,
May	,,	219,000 ,,
June	,,	474,000 ,,
July	,,	400,000 ,,
August	,,	267,000 ,,
Total		3,882,000 qr.

The total is decidedly moderate. Certainly an average would not be less than four million quarters. The figures include English as well as imported wheat, but the English seldom exceeds 100,000 qr. During the past twelvemonth, however, the proportion of home produce has been somewhat increased, and although the specific decision is not before us we understand that about 115,000 qr. have been of home growth. The London average for May was 2s. above that of the shires, and even in January when depression, owing to a mild mid-winter, was serious. London was still 1s. 3d. better than the country markets. This naturally led to increased consignments.

Wheat averages for the cereal year show 10d. decline in wheat. 4d. advance in barley, and no change in oats. The prices averaged for August, however, showed 4s. 1d. advance on the previous August for wheat, 1s. 9d. advance for barley, and 2s. 8d. advance for oats.

Top-price flour opens the new cereal year at an advance of 3s. on the twelvemonth, while the rise in Household flour in England is 3s. 6d., and in France is 3s. 9d. per sack. The last-named fact should be specially noted, as a fall in French flour prices has been claimed as an argument for the bear party. The price of flour in France has in effect fallen 1s. on the month, but prices previously had been pushed up to a very high level owing to delay in harvesting the new wheat crop and consequent late start in the new seasons millings.

Supplies of British wheat for the cereal year ended August 31 last were not quite so heavy as those returned for the preceding season, but they could not be considered small in themselves:—

Cereal year ended August 31, 1907 .. 2,706,000 qr.
,, ,, 1906 .. 2,941,000 ,,

At the ordinary reckoning, 2,706,000 qr. sold at 186 wheat markets would be regarded as equivalent to total sales of 6,765,000 qr. for the whole country.

Supplies of British barley for the whole year have been as follows:—

Sept. 1, 1906, to Aug 31, 1907: 3,372,000 qr.
,, 1, 1905, to ,, 31, 1906: 3,203,000 ,,

The barley crop of 1906 threshed out well in bulk, but fine malting samples were always rare, and discolouration was more prevalent than usual despite a brilliant August and rapid harvest.

Supplies of British oats for the twelvemonth have been:—

Sept. 1, 1906, to Aug. 31, 1907: 1,197,000 qr.
,, 1, 1905, to ,, 31, 1906: 940,000 ,,

Imports of the leading staples last week were as follows:—

Wheat, 464,000 qr.: a good supply.
Flour, 80,775 qr.: less than usual.
Barley, 147,000 qr.: rather above the average.
Oats, 46,000 qr.: less than half an average.
Maize, 254,000 qr.: much above the average.

It certainly is not due to small supplies that maize is dear.

Corrected figures of imports for the cereal year are now available, and they show that while supplies of English breadstuffs have diminished imports of breadstuffs have not increased. This is a main cause of present firm markets. Imports both of barley and oats have fallen off, but this has been balanced by a marked increase in the importation of maize. That staple is apparently steadily regaining the popularity which it enjoyed seven years ago.

	Breadstuffs. (480 lb.)	Maize. (480 lb.)	Barley. (400 lb.)	Oats. (312 lb.)
1900-1	21,720,550	13,339,530	4,239,280	7,177,770
1901-2	23,716,720	12,917,600	5,237,200	7,896,000
1902-3	23,292,280	10,933,000	6,443 520	5,933,850
1903-4	25,811,950	9,882,300	7,187,830	5,925,950
1904-5	27,635,100	11,072,000	5,889,000	5,436,320
1905-6	26,728,316	10,861,386	5,725,944	5,812,100
1906-7	26,477,619	11,977,458	5,405,835	5,021,855

The total supplies of breadstuffs for the cereal year work out on the above basis as follows:—

Home crop sales	6,766,000 qr.
Importations.....	36,479,619 ,,
Total supplies.....	33,244,619 ,,

There being no official estimates of requirements, an extraordinary *lacuna* in the Board of Agriculture's information, the Press has to step into the gap, and for 1907 this journal has reckoned total needs, seed and food at 90,000 qr. per diem. This equals 32,850,000 qr. for the year, and appears to be as close an estimate as the trade either requires or is likely to obtain without official aid, and that powers of securing returns which official power denotes.

Supplies of flour on passage on 7th inst. were 180,000 sacks, or 42,000 sacks increase on the week. Wheat, however, showed a diminution from 2,092,000 to 1,931,000 qr., so that present comparatively high prices have not yet fulfilled their purpose of attracting increased shipments of breadstuffs. The wheat on passage is thus made up:—

Russian	70,000 qr.
Californian.....	15,500 ,,
American	410,000 ,,
Indian.....	711,000 ,,
Argentine	150,000 ,,
Australasian	415,000 ,,
Various	20,000 ,,
Total.....	1,931,000 qr.

The barley on passage amounts to 440,000 qr, of which 300,000 qr. are coming from the Black Sea. Other supplies on passage are 795,000 qr. of maize, 180,000 qr. of oats, 179,000 qr. of linseed, 49,000 tons of rice.

American shipments last week were good of wheat, but smaller of other staples: wheat, 301,000 qr.; flour, 70,000 sacks; barley, 40,000 qr.; oats, 15,000 qr.; and maize, 91,000 qr.

Argentina was a comparatively small shipper: wheat, 22,000 qr.; maize, 162,000 qr.; linseed, 16,000 qr.; and oats, 3,000.

Russia sent off a large supply of barley, but not more than average quantities of wheat, and less than had been expected of oats; wheat, 235,000 qr.; barley, 438,000 qr.; oats, 57,000 qr.; and maize, 55,000 qr. To these totals may be added Roumania's 55,000 qr. of wheat, 33,000 qr. of barley, 14,000 qr. of oats, and 47,000 qr. of maize.

India last week shipped 66,000 qr. of wheat, 36,000 qr. of linseed, and 19,000 qr. of rapeseed, but from Australasia exports were limited to 5,000 qr

THE BALTIC.

Cargo sales have been brisk, and there have been a good many resales. We can only note the following sales of wheat cargoes:—Australian at 37s. 3d. per 480 lb., Argentine at 36s. 6d. per per 480 lb., Walla Walla at 38s. 3d. per 500 lb., Azoff at 37s. per 492 lb., Siberian at 36s. per 496 lb., and Durum at 38s. per 480 lb.

Maize cargoes are very well held; 25s. has been paid for Danubian, 24s. 9d. for La Plata, 26s. 6d. for Novorossisk, and 25s. 6d. for American, and holders of the Danubian, Argentine, and American want 6d. more money than they paid. All maize sales have been per 480 lb.

Barley has fetched 22s. 6d. per 400 lb. for Kustendje, 22s. 9d. per 400 lb. for Morocco, 33s. per 480 lb. for Oregon, and 22s. 3d. per 400 lb. for Odessa.

Oats have not shared in the advance, but have sold more readily than before at old quotations. We note several Baltic cargoes—Lithuanian and Courland oats—sold for September and October shipment at 15s. 6d. per 304 lb, also two cargoes of South Russian at 16s. 3d per 304 lb., and four cargoes of Manitoba at 20s. 6d. per 320 lb.

Other cargo sales have included Marmora beans at 31s. 3d. per 400 lb., Karachi Dari at 23s. 6d. per 480 lb., Calcutta linseed at 43s. per 410 lb., and Argentine linseed at 42s. 9d. per 416 lb.

The London Corn Trade Association officials kindly inform us that the following standards, all at time of discharge, were recently made up for May shipments for use during September, &c. Plate wheat of the Province of Santa Fe, 61·15 lb.; Plate wheat of the Province of Santa Fe, 62·45 lb.; Plate wheat of the Province of Santa Fe, 63·45 lb.; Plate wheat of the Province of Santa Fe, 64·35 lb.; Bahia Blanca Barletta and/or Russo, 56·75 lb.; Bahia Blanca Barletta and/or Russo, 58·05 lb.; Bahia Blanca Barletta and/or Russo, 60·55 lb.; Bahia Blanca Barletta and/or Russo, 61·55 lb.; Bahia Blanca Barletta and/or Russo, 62·45 lb.; Bahia Blanca Barletta and/or Russo, 63·45 lb.; Hongrois wheat, 61·55 lb.; Hongrois wheat, 62·75 lb.; Buenos Aires Barletta wheat, 60·65 lb.; Buenos Aires Barletta wheat, 62·45 lb.; Buenos Aires Barletta wheat, 63·55 lb.; Buenos Aires Barletta wheat, 64·25 lb.; Frances wheat, 62·55 lb.; Entre-Rios wheat, 61·66 lb.; Candeal wheat, 62·15 lb.; yellow La Plata maize; f.a.q. Bahia Blanca oats; f.a.q. Buenos Aires oats. Also the following standards:—Basley: Taganoog, Nicolaieff, Berdianski, Novorossisk, Odessa, Danube, and Temruik. Maize: Gal./Fox., Danube, Bessarabian, yellow Dan./Cinq., red Dan./Cinq., Odessa, Novorossisk. All these standards may be seen at 26, St Mary Axe, and samples obtained on payment.

Cargo arrivals during August were:—Six wheat from Argentina, five from Oregon, and eleven from Australia, total 22. From Argentina seven maize cargoes arrived and three of linseed. These arrivals were at ports of call, and represent a more or less speculative trade. By far the larger number of cargoes come direct to the order of particular buyers.

HOPS.

Canterbury, Saturday.—Picking is fairly general. The crop comes down light, but the quality of much of it is good, and an average of 8 cwt per acre is anticipated.

Weekly Arrivals into London.

August 28 to September 4 inclusive.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English firm, but quiet. Old whites quoted at 36s to 38s; old reds at 35s 6d to 37s 6d; new whites at 33s 6d to 35s 6d. Foreign firm, and held for 6d advance. No. 1 Northern, ex ship, held at 39s 6d; No. 2 at 38s 9d; No. 1 Hard Manitoba at 40s; choice white Karachi at 37s 3d; red Karachi at 36s 9d; La Plata, landed, at 39s; South Russians, 37s to 39s; Australians, 39s to 39s 6d. Flour firm, and held at higher prices, but not active. Hungarians quoted at 37s to 38s; Iron Dukes at 24s to 24s 6d. Maize firm and 3d dearer. Mixed American, landed, quoted at 25s 6d; River Plate, 25s to 25s 6d; Odessa, 25s 3d to 25s 6d. Barley firm, 3d dearer. Azoff-Black Sea and Odessa-Nicolaieff, ex ship, held at 23s 6d. Oats firmer, and held at 1½d to 3d advance, with more inquiry—17s 7½d to 17s 9d wanted La Plata; 17s 9d St. Petersburg; 18s 6d Vologda.

Mark Lane, Friday.—Wheat firmly held, full prices. Foreign held for 3d to 6d advance, which rather checks demand. No. 1 Northern ex ship quoted at 39s 9d to 40s; No. 2, at 39s to 39s 3d; No. 1 Duram, ex ship, at 34s; choice white Karachi at 37s 6d to 38s; Australian, landed, at 39s to 40s; La Plata at 39s 3d to 39s 6d; South Russian at 37s to 39s. Flour firm and dearer, little offering; Iron Dukes quoted at 24s to 24s 6d. Maize firm, and 3d dearer; Odessa, landed quoted at 25s 6d. to 25s 9d; mixed American and La Plata at 25s 6d to 26s 6d. Barley firm, little offering; Azoff-Black Sea, ex quay, quoted at 24s, ex ship 23s 9d. Oats firmer; South Russians held at 17s 9d to 18s; La Plata at 18s.

COUNTRY.

Ashford, Tuesday.—Fair attendance; trade quiet but firm. Most new samples of corn out of condition, damp and cold. New peas also out of condition. New wheat, 34s to 35s, sample, 58 lb. New barley was on offer at 32s. New grey winter oats, weighing 43 lb, made 21s 6d. Maize rose 1s on the week.

Banbury, Thursday.—Wheat, white, 33s to 34s 6d per qr; wheat, red, 33s 6d to 34s 6d per qr; barley, old, 28s to 30s per qr; beans, old, 32s to 32s 6d per qr; oats, old, 21s to 24s 6d per qr; peas, old, 30s to 34s per qr.

Berwick, Saturday.—There was a small attendance withfew samples of grain on offer. One or two lots of new barley were shown, but prices are not fixed.

Birmingham, Thursday.—There was a fair muster at the market, and trade generally had a brisk tone. Foreign wheats met with a steady demand at the following quotations:—No. 1 Manitobas, 40s per 496 lb., No. 2 Manitobas 39s at Bristol, Russians 38s to 39s 6d, and River Plates 38s 6d to 39s 6d per qr at Sharpness. All descriptions of maize were 6d per qr dearer, and met with a ready sale, as did all feeding stuffs. Grinding barley was advanced 9d, sellers asking 23s 6d per 480 lb for same at Bristol. There were no samples of English wheat showing, either old or new. Several lots of new oats, in moderate condition, for which 19s to 20s per 312 lb was asked; old oats, 23s, and beans, 13s 3d per 196 lb, delivered.

Brighton, Thursday.—Wheat was in short supply. Prices very firm and buyers for all.

Bristol, Thursday.—The market was well attended to-day being the September Fair. English wheat very scarce, hardly sufficient to test value. Foreign very strong, fully 2s. dearer on week. Maize, 6d to 9d dearer; barley, 6d dearer; oats fully maintain value; flour, 2s dearer, fair business passing.—Grace Bros.

Bury St. Edmunds, Wednesday.—Wheat: The supply was small, and only a small business was done, at 31s to 32s 6d per qr, according to quality, but the tone of the trade was distinctly firm, in face of the continued advance in foreign descriptions. Flour 1s per sack dearer, with a strong upward tendency. Feeding corns all firm, with maize 6d per qr up. Linseed cakes 5s per ton dearer, and milling offals all rather dearer.

Cambridge, Saturday.—The attendance was fair. The few samples of new wheat showing made 31s 6d to 33s per 504 lb, on rail. Barley ranged from 26s 6d to 30s per 32 stone. Oats scarce, whites making 18s 6d to 19s 6d per 24 stone.

Canterbury, Saturday.—Medium quality lots of malting barley are being offered at about 30s, but there is not much inquiry yet. Much of the wheat is old and out of condition, but for good dry 64 lb samples millers are paying 34s 6d on rail and 35s delivered. Oats are firm, black winters of 42 lb weight being worth 20s, and 42 lb white oats about 19s. Grey peas, 30s to 30s 6d per qr.

Carlisle, Saturday.—Fair supply of oats in our market to-day. Slow sale at fully last week's prices, 24s to 24s 9d per 336 lb. No new oats offered yet, very few yields cut in our district. Thomas Robinson.

Chester, Saturday.—Very few supplies of English grain offering. Feeding stuffs in brisk demand, market having a strong upward tendency. Thirds 6d to 9d per sack dearer. Indian corn 3d to 6d per sack dearer, and flour 6d per sack dearer. Quotations: oats, old, 3s 3d to 3s 6d per 46 lb; Indian corn, new, 13s 3d to 17s 9d; old, 14s to 14s 9d per 240 lb.

Chichester, Wednesday.—Old white wheat, 36s to 38s 6d; old red ditto, 36s to 36s 6d; new white ditto, 30s to 32s; new red ditto, 30s to 32s; grinding ditto, 25s 6d to 25s 9d; oats, English, 18s to 23s; rye, 27s to 28s; maize, 24s to 25s. Fair attendance, but not much trade.

Colchester, Saturday.—Wheat, short supply favouring sellers. Oats firm. Beans, no samples showing.—Colin Taylor, King and Co., Ltd.

Coventry, Friday.—Poor attendance. Wheats scarce and prices ruled fully as dear as last week. Hardly any new corn on offer, but trade may be quoted firm for any samples in good condition. Quotations: Wheat, 12s 9d to 13s 6d per 186 lb; barley, 30s to 34s per 448 lb; peas, 12s to 14s; beans, 13s to 13s 9d per 196 lb; oats, old, 24s 6d to 27s per 352 lb.; new, 20s 6d to 23s.

Derby, Friday.—There was a scanty supply of corn, without any alteration of price. No change to report in the value of oats and beans. Wheat, 37s to 38s; grinding barley, 23s to 25s; beans, 35s to 37s; old oats, 24s to 26s; new oats, 18s to 20s.

Devizes, Thursday.—This has been another anxious, trying, and disappointing week for corn farmers. There were only very few sacks at to-day's market. There is practically no alteration in prices. Wheat is the turn dearer, and new oats the turn easer. Best wheat, 17s 6d to 18s 6d; secondary, 16s 6d to 17s 6d; new wheat, 15s to 17s; winter barley, 26s to 28s 6d; old oats, 20s to 24s; winter oats, 17s 6d to 18s; white oats (330lb), 18s to 19s; rye, 26s to 28s; new beans, 16s 6d to 18s; fine flour, 26s to 28s; extra fine, 32s to 36s.

Doncaster, Saturday.—There was no old wheat offered, but some samples of new wheat from the south was shown. It was in poor condition, and made up to 35s 3d per qr. Foreign wheat met with a good inquiry, and advanced 1s 6d per qr. New oats were shown, and made up to 19s per qr. Other things met with a quiet sale, maize being 1s per qr. dearer.

Dorchester, Saturday.—Although the morning opened wet and not at all favourable for the harvesting, it turned out much finer later in the day, and this kept many at home to do what they could with their corn, much of which has now been exposed in the fields almost for a week in continuous wet, which, of course, is seriously affecting the crops. As a consequence prices took an adverse turn to-day, and a general advance has to be noted, wheat in particular, despite the poor condition of the lots, showing the most marked rise, which ranged from 6d to 1s per qr. and over. Barley also took an upward turn, but 6d to 9d may be given as the general rise asked. Oats were likewise held for more money. as, in fact, were all other articles, the disastrous weather of the past week, which has led to an almost total suspension of harvesting operations throughout Dorset, having had a marked effect on values, farmers showing every inclination to recoup themselves, as far as they can, for the increased cost they have been put to in getting their harvesting done, quite irrespective of the general inferiority of much of the corn owing to its failing to properly mature through lack of sunshine.

Exeter Friday.—Fairly good attendance; trade quiet, but firm. Barley and maize 6d to 9d dearer. Oats unchanged. Flour 1s dearer. English wheat, 4s; superfine flour, 26s to 28s; fine, 25s to 27s.

Glasgow, Wednesday.—Attendance was good at to day's market. Wheat held for 6d to 1s more money. Flour 6d to 1s per sack dearer over the week. Maize steadily held at late rates. Corn shows a further advance, and to-day's price is 3d per boll up since last Wednesday. Barley firm at late rates. Oats slow in sale, but prices keep firm. Beans unaltered. Pease 1½d per boll dearer. Bran and thirds steady. Oatmeal quietly steady. Other articles unchanged.—Gibson and Clark.

Gloucester, Saturday.—English wheat in small supply: Reds, 33s for dry samples; whites, 34s. Foreign wheat, 2s 6d advance: Plates, 39s 6d to 40s. Plate maize, 25s 9d; flat, 26s (Bristol); Bessarabian, 26s. Barley, 23s 9d (Bristol). Oats: New, 18s to 18s 3d; old, 22s to 23s.

Grantham, Saturday.—There was only a moderate attendance at the Corn Exchange. The supply of new corn was limited, and only odd samples of wheat, barley, and oats were offered. Wheat changed hands at 32s to 33s per qr, but barley and oats were unquotable.

Hereford, Wednesday.—A moderate attendance. A few samples of English wheat on offer, showing variable conditions. Dry samples were in demand at about 4s. New white oats were very freely offered at about 17s to 18 per qr, but conditions in many instances left something to be desired. Barleys nothing doing. Old beans firm. Maize also firm. Wholesale quotations:—Wheat, old, 4s 2d to 4s 6d per 62 lb; new, 4s to 4s 3d; barley, 3s 6d to 4s per 56 lb; oats, old, 2s 9d to 3s 3d per 40 lb; new, 2s 3d to 2s 6d per 40 lb; beans, 4s to 4s 6d per 65½ lb; maize, 3s 4d to 3s 8d per 60 lb.

Ipswich, Tuesday.—Very little old wheat on offer; trade steady at late rates. Reds, 35s to 36s; whites, to 37s per 504 lb. A few samples of new on offer, for which 34s and 35s was asked. Grinding barley steady. A few samples of new barley were shown, quality and condition various. Oats dull. Beans and peas firm.

Leeds, Tuesday.—The weather continues unsettled, delaying harvest and endangering quality and condition. The trade continues exceedingly firm, and prices of wheat are steadily creeping up. Shipments are again moderate this week, and offers remain small; all this tends to strengthen the hands of holders, who, finding they cannot replace any sales they make, naturally try to make the most of what they have got. Wheat is fully 1s per qr dearer on the week. Maize and beans firm at late rates. Oats steady.—Dunns and Co.

Leeds, Friday.—The bad weather has retarded harvest operations, and prices of English wheat showed an advance. Foreign wheat was also dearer, closing at 6d above last Tuesday's prices. Maize was firmly held, Plate and other descriptions making 25s. Flour had a hardening tendency, finest runs closing at 31s. Foreign malting barley was quoted at 27s to 33s, and grinding at 26s. Other articles were unchanged.

Leicester, Saturday.—Good attendance of buyers and dealers, with small supplies of old wheats, and only a few samples of new from early districts. New wheats firm, and old advanced 2s. per qr. New wheats, 35s to 37s; old wheats, 37s to 30s per 36 stones. Small supplies of new barley, which made 28s to 31s per 32 stones; new oats 21s to 22s per 24 stones; old oats, 25s to 28s per 24 stones. Flour advanced 6d per sack.

Lincoln, Friday.—A fair attendance at the Corn Exchange, but very little wheat was on offer. The condition of the new samples was not of the best, but prices showed an advance of 6d to 1s per qr on the week, both for home and foreign wheats. A few samples of barley were shown, but there was little of the best quality, and prices ranged from 26s to 28s per qr. The supply of oats was limited, the moist weather of the past week interfering with threshing. A ready sale for oats at 18s per on rails.

Maidstone, Thursday.—The wheat trade continues very firm, and the price of new red about 34s to 35s. Although unusual at the harvest time all corn is on the advance, probably from short supply, which seems to be the position not only in the British Isles, but in foreign parts. Buyers must pay the higher prices or not "take on."

Manchester, Thursday.—English wheat in small compass, unchanged; foreign, 2d to 3d dearer on the week. Flour 6d per sack dearer on the week. Indian corn in good demand, prime mixed American offering at 5s 8d to 5s 8½d; Cinquantina, 6s to 6s 1d per cental. Oats exceedingly firm; English, new, on rail, 2s 9d to 2s 10d; old, 3s 4½d to 3s 6d. Foreign also dearer. Beans and peas rather higher on the week. Bran and offals have a higher tendency, but not quotably so.

Newark, Wednesday.—Quiet market; trade dull; few samples of new oats showing. Quotations:—White and red wheats, 37s to 37s 6d; malting barley, 29s to 30s; grinding barley, 27s to 28s; old oats, 24s to 25s; new oats, 18s to 19s; old beans, 34s to 35s per qr.

Newcastle-on-Tyne, Saturday.—Holders of wheat very firm this morning at 1s to 1s 6d dearer on the week. The demand, however, was not active. Maize again dearer at 9d per 480 lb. over last week's quotations. Fine old oats firm and in sellers' favour, whilst new sorts remain unchanged. Beans and pease all scarce, consequently holders are firm at last week's prices. No barley on offer.—Pollard and Co.

Newport, Wednesday.—Wheat 1s to 1s 6d dearer on the week. Barley very firm, and 3d dearer. Maize strong, at 6d advance. Flour, fines, 28s 6d per sack.

Northampton, Saturday.—Good attendance of dealers, but, owing to the wet weather preventing harvesting and thrashing, no new corn was available. There is much apprehension as to the condition and quality of the new grain. Wheat, 34s to 35s; barley, 28s to 30s; white oats, 23s to 24s; black oats, 22s 6d to 23s 6d; beans, 31s to 33s; peas, 30s to 32s; flour, 26s to 30s.

Norwich, Saturday.—Owing to the unfavour-

able weather the supply of wheat was small. The quality and condition of the samples on offer varied very much. Prices were steady, at 30s to 33s 6d per qr delivered. There were no quotable transactions in either new barley or oats. In feeding stuffs the market was of a very quiet character. Maize and grinding barley sold at 6d to 9d per qr advance on the week, and linseed and cotton cakes were 2s 6d dearer, but there was practically no demand. Averages: Wheat, 117 qr, £1 13s 2½d; barley, nil; oats, 495 qr, 17s 1½d.

Nottingham, Saturday.—Very small supply to-day, weather being showery. New wheat, 34s; oats, 19s. No barleys. Trade firm for new, and 6d dearer for old wheat.—Robt. Hubble.

Oxford, Saturday.—The attendance was poor, and there was very little grain on offer. The quality of wheat on the market was moderate, and changed hands at 30s to 33s. Oats are without material change.

Peterborough, Saturday. — The weather during the past week has been showery, and hindering harvest operations, consequently we have only had a small supply new corn. Wheat made from 31s to 33s, condition of most samples not being very good. Barley a quiet trade, prices ranging from 26s up to 30s. Oats, 17s to 19s.—Thomas Hill and Son.

Plymouth, Friday.—There was a very fair attendance on our market here to-day. Prices were all very much firmer. Wheat 2s 6d dearer. Maize, 1s dearer. Barley, 6d dearer. Old oats, 6d. dearer. No new oats offering.—Orlando Davis and Co.

Preston, Saturday.—There was only a moderate attendance, weather conditions restrained the appearance of new grain samples, and quotations were nominal. Millers' offals mode 6d per pack more. Quotations:—Wheat, white, new, 14s to 15s per windle of 220 lb.; ditto red, 13s 9d to 14s 6d; oats, old 3s 6d to 3s 8d per bushel; beans, 16s 6d to 17s per windle of 220 lb.

Reading, Saturday.—The attendance was hardly an average one; trade was firm. Prices:—Old wheat, 34s to 37s; new, 32s to 33s 6d; new grey winter oats, 18s 6d to 19s 6d; new black winters, 19s to 19s 6d per 420 lb; winter barley, 23s to 27s; rye, 24s to 26s; beans, 33s to 37s; hay, 80s to 95s; straw, 28s to 34s per load.

Retford, Saturday. — Thin attendance and small supply. New wheat was quoted at 32s to 33s, but there were only one or two samples on offer, and no old at all. Several lots of new oats were shown, for which there was a fair trade at 18s 6d to 19s per qr. for both white and black winters. Good old white oats were worth 25s 6d to 26s 6d, and maize 27s 6d, delivered here. Old English beans. 35s to 36s per qr.

Sheffield, Tuesday.—Owing to the unfavourable weather for harvesting there was little new corn on the market. Prices are firm at top figures for everything but oats. These are offered in small quantities, and dry samples make a fair price for new corn. American flat maize about 1½d per cental dearer on the week; other descriptions unchanged. Quotations:—Wheat, white, new, 37s to 37s 6d; ditto red, new, 37s to 37s 6d per 504 lb; oats, black, 24s to 25s; ditto white, 24s 6d to 25s per 336 lb; peas, grinding, 34s to 34s 6d; ditto blue, 25s to 30s per 504 lb; beans, English, 36s 9d to 37s per 532 lb; barley, grinding, 27s 6d to 28s; ditto malting, 28s to 32s per 448 lb; Indian corn, small, 26s 3d to 26s 9d; ditto Plate, 26s to 26s 3d; ditto flat, 28s 6d to 28s 9d per 480 lb.

Shrewsbury, Saturday.—Old wheat, 15s to 15s 6d per 225 lb; old oats, 15s to 16s per 225 lb; old beans, 15s 6d to 16s 6d per 240 lb.

Stamford, Friday.—The sunny weather gave farmers an opportunity to get into the harvest fields, and few of them attended the market. The demand was sluggish. Wheats, 32s 6d to 34s; oats, 18s to 18s 6d; beans, 32s to 33s; new barley, 26s to 28s 6d; peas, 53s to 63s per qr.

Stockton, Wednesday. — No local wheat showing. Foreign wheat trade keeps very strong owing to advance in America, and unfavourable weather for the coming crops, and prices were 1s and 1s 6d dearer on the week. Maize 6d dearer. There were a few samples of new Yorkshire oats showing, which made 21s to 22s per qr delivered.

Tunbridge Wells, Friday. — New white wheat, 37s to 38s; new red ditto, 36s to 37s; old white ditto, 32s to 33s; old red ditto, 31s to 32s; barley, 26s to 32s; grinding ditto, 23s to 25s; oats, English, 19s to 23s; rye, 23s to 25s; peas, 32s to 37s; beans, 32s to 37s; tares, 42s to 48s; maize, 25s to 27s.

Warwick, Saturday.—Small supply of corn on offer, wheat making 11s 6d to 12s per bag dry samples; damp corn practically valueless. Feeding stuffs another turn dearer.

Wellington, Thursday.—Quotations:—Wheat, 15s 3d to 15s 6d per 225 lb; old oats, 13s 6d to 14s per 200 lb; barley, 4s 9d to 5s 3d per 70 lb.

Winchester, Saturday. — English wheat and dearer. Foreign 1s to 2s. advance. Barley and maize 6d higher. Oats unaltered. Flour a fair trade at about 1s more money.—Fear, Colebrook and Co., Ltd.

Wisbech, Saturday. — At market to-day samples of new grain mostly lack condition. Any good dry lots of wheat sell at 33s 6d to 34s per 504 lb. Soft samples neglected. Oats 18s to 18s 6d per 336 lb. Barley, 25s to 28s per 448 lb. —James Fletcher.

Wolverhampton, Wednesday.—The attendance was a harvest one, very few farmers being present. Very little business was transacted, but prices were stronger than a week ago

Worksop, Wednesday.—Poor attendance, and a small show of grain. Scarcely any wheat on offer. A few samples of new oats, grown locally, were shown in good condition, and met with a ready sale. White wheat, 36s to 37s; red ditto, 35s 6d to 36s; secondary barley, 28s; grinding barley, 26s; new white oats, 20s to 22s; new black ditto, 20s to 22s; old white oats, 24s to 27s; old black oats, 22s to 24s; flat maize, 26s; round maize, 26s to 27s per qr.

Yeovil, Friday.—A number of samples of the new crop came on offer. The wheat was of fair quality, but for the most part was out of condition and unfit for milling. Business which passed was at from 1s to 2s per qr above last week's rates, viz., 31s to 34s. Foreign wheat sold readily at an advance of 2s, prime samples making up to 40s 6d. New oats favoured buyers, winter oats selling at from 17s 6d to 18s; white, 18s to 19s; Irish white (old crop), 21s 6d to 22s; black 19s 6d to 20s; English white (old crop), 20s to 24s; new beans, 10s to 18s; malting barley, 25s to 30s; secondary, 20s to 24s; grinding barley, foreign, up 6d to 23s 6d. Maize advanced 1s, round making 25s 3d to 26s; ditto flat, 25s. Vetches, 4s to 5s 6d per bushel. A good demand for flour, with prices showing an advance of 2s to 2s 6d per sack, business passing on the basis of 23s to 28s 6d for fines.

York, Saturday.—Prices for wheat were purely nominal, the supply of old corn being quite exhausted, while there were no new samples to hand. Feeding barley met with a fair trade at 26s to 28s per qr of 32 stones; oats remained firm, old making 23s to 24s, and new 19s to 20s per qr. of 26 stones. Old rye made 28s, and new 25s per qr of 36 stones.

FOREIGN.

Hamburg, Saturday.—Weather unseasonably cool, and in some parts of Holstein there were night frosts, but on the whole the weather was less rainy than last week, and farmers are very busy carrying grain. Samples so far produced show poor quality of rye, better of wheat and barley. Oats may yet turn out a good crop. There was a brisk demand for wheat, and prices advanced materially. Hard winter No. 2, afloat, is now held at 36s 6d, red winter No. 2 free from garlic, at 36s 9d; 80 ko. Laplata-Russa at 37s; No. 1 Macaroni at 32s 3d per 480 lb, c i.f. Hamburg. Rye firm, offers are scarce, and South Russian buyers appeared in the market; 9-10/15 Taganrog near at hand is held at 35s 3d; 9 10/15 South Russian August-September, at 33s per 480 lb c i.f. Hamburg. The new German rye is mostly unfit for immediate use. Bohemian and Hungarian barley is held at 35s 6d to 42s; which with a duty of 2s per qr are very high prices for our malsters and brewers, therefore good German barley at 36s to 40s attracts more attention. The first samples of new Danish are of indifferent quality, while Holstein and Mecklenburg may yet produce useful barley; 60/61 ko. South Russian firm at 21s 6d per 480 lb, c.i.f. Hamburg. New white Holstein oats of fair quality are offering at 18s 6d to 19s 3d per 336 lb, f.o.b. There is a large crop, but not yet all secured. Maize firmer; Odessa and Danubian is selling at 24s 3d to 24s 6d per 480 lb, c.i.f. Hamburg.—John Tatlock

FEEDING STUFFS.

Mark Lane, Monday. — Linseed Cake. — With an improving demand and continued short supplies of foreign, quotations are fully 5s. per ton higher since last Monday, and there is a probability of a further hardening in prices on account of scarcity. Russian remain best value. East India seed pures may be bought at an advance of 2s 6d. Fine seedy Calcuttas have been sold at last week's prices. London made meet a steady sale at the advance. Cotton Cake.—The market is almost bare of Egyptian, while for arrival more money is now asked, with English selling at 5s. per ton more. Decorticated: London made pures move off freely, also Digestive Meal, with American brands only obtainable in limited quantity:—Rape Cakes do not offer. Maize Germ Meal.—White American is held at prohibitive prices, and needy buyers of English are compelled to pay full prices. Maize Gluten Meal is in good request. Rice Meal.—Recent arrivals of Rangoon are all cleared, and a large business is reported for September-December shipment. Locust Beans are relatively cheaply offered. Dried Brewers Grains make rather more money. Nitrate of Soda is without change.

—Pinnock Bros., 30, Mark Lane, E.C.

Liverpool, Friday.—Fertilisers are firm all round, and there is a good inquiry for autumn deliveries of all phosphatic manures at an advance on the rates current last season. At auction to-day 1,400 tons bone phosphate and dissolved bone compound were withdrawn, offers being too low. There is now some inquiry for feeding stuffs, and higher prices are demanded in many instances consequent upon the increased cost of imported cakes, &c., and as regards home productions the higher prices paid for the materials, aided by the steady advance in corn. To-day's values are as follows:—

	Per ton. £ s d	£ s d
Cottonseed Cake, N.A., decorticated (good but irregular)	7 2 6	7 5 0
Cottonseed Cake, English, decorticated, prime (soft)	7 10 0	7 17 6

WET AND DRIED GRAINS.

Mark Lane, Saturday.—Wet Grains: Prices have ruled a trifle higher on the past week, and business has been done at 13s to 14s ale, and 10s 6d to 11s 6d porter per ton on rail, London. Dried Grains.—The rise in prices has entirely stopped home trade, and dealers cannot find any orders, and with hay offering from 50s per ton there is not likely to be any demand, and even a reduction of 5s per ton would not be an aid to increase the home consumption. Prices ex factory:—Distillers, 105s; ale, 92s 6d; and mixed, 86s 3d per ton, in buyers' bags. American cane treacle, 90s per ton, and Kiln-dried sea-damaged Australian wheat from 20s per qr.—Hamlyn and Co., 37 and 38, Mark Lane, London, E.C.

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, Monday, 3 p.m.

The market's difficulties, although purely temporary, are rather severe. Holders of imports have the contest pending new crop deliveries, and the humid air of the last ten days has prevented the new wheat from being ground at the mills. The supplies of new winter barley and of new oats are increased from a week ago, but are not enough to exert any material influence, so that here, as in the wheat trade, merchants have the upper hand, and are charging high prices for prompt delivery of maize, feeding barley, and oats.

The trade in malting barley of the new crop has not yet begun in earnest, but some samples have been shown which showed better quality and colour than expected. They range in price from 33s. to 36s. per qr. Beans and peas profit by the general dearness of feedingstuffs, and are in improved request. The rise on the week is about 1s. in foreign wheat and maize, 6d. in oats, beans, and peas. This coming on top of last Monday's advance makes the total rise rather considerable.

Buyers, it need hardly be said, are not purchasing any more grain than they absolutely require for the fulfilment of contracts. There is a tendency to quote prices higher than they actually are, but much depends in a juncture like the present on when delivery is requisite, often as much as 1s per qr. price difference will subsist between an undertaking to deliver "as soon as reasonably possible," and a specific contract to deliver by Wednesday or Thursday.

THE FLOUR TRADE.

MARK LANE, Monday, 3 p.m.

London millers are getting good prices for their flour and extremely high prices for their middlings, bran, and pollard. The country supply of flour is only two-thirds of an average, and that of milling offals is quite insignificant. The price of offals high as it is would have been even higher but for imports. The latter, though welcome for the moment, are an economic loss to the nation. The price of Hungarian flour is not quite so dear as it was, prices were put up in later August to an extravagant extent. Nevertheless, Hungarian flour remains very dear, and is likely to remain so.

Not only are American flour importers asking 1s. advance on previous high prices, but for September shipment of Minnesota types 30s. 6d. c.i.f. is the price cabled. The price of Kansas patents is 27s. 6d. c.f.i. shipment within a month of order. The stringency in the flour markets looks at this rate as if it might be maintained longer than that in wheat is likely to endure. There was a good attendance of bakers, and a busy time for the next week is anticipated.

CLOSE OF THE MARKET.

SEPTEMBER SUNSHINE ALWAYS TENDS TO STOP ADVANCING MARKETS, AND MARK LANE CLOSED WITH ALTOGETHER LESS CONFIDENCE THAN IT OPENED. THE LEADING IMPORTERS, HOWEVER, REGARD THE GENERAL SITUATION AS STRONGLY IN THEIR FAVOUR.

THE BALTIC.

Monday, 1 p.m.

State of Trade.

Wheat and maize cargoes are held for 6d. above Saturday's prices, with buyers at previous full terms. Barley is surprisingly firm, considering the large shipments from Russia. Beans, peas, millet, and dari cargoes all show a hardening tendency. Linseed is firm, but cottonseed is weaker from Saturday.

Business Done.

Wheat.—Durum, 34s 6d per 480 lb, prompt shipment; No. 1 Manitoba, 40s per 480 lb, arrived; No. 1 Manitoba, 39s 6d. per 480 lb, on passage; fine Russian Winter, 40s per 492 lb, arrived; Odessa Ghurka, 38s 6d per 492 lb, arrived; White Karachi, 38s per 492 lb, due about the 14th; Australian, 40s 6d per 480 lb, arrived; Australian, 40s per 480 lb, due; Argentine, 40s per 496 lb, on passage; Argentine, 36s 6d per 480 lb, February shipment (new crop); Walla Walla, 38s per 500 lb, December shipment; Blue Stem, 38s 6d per 500 lb, December shipment; Red Winter, 36s 6d per 480 lb, September shipment; Hard Winter, 36s per 480 lb, September shipment.

Maize.—Galatz, 28s per 480 lb, prompt steamer shipmen; Argentine, 25s 6d per 480 lb, on passage; American, 25s 6d per 480 lb, prompt shipment.

Barley.—Karachi, 23s 3d per 400 lb, prompt shipment; Persian, 21s per 400 lb, November shipment; Odessa, 23s per 400 lb, October shipment.

Oats.—White Libau, 16s per 304 lb, October shipment.

Linseed.—Calcutta, 44s 3d per 410 lb, arrived.

Cottoneed.—Egyptian, £7 5s per 2,240 lb, October shipment.

Flour.—Trade to-day has been very firm, with a fair demand for flour in all positions. Prices shew an advance of about 1s on the week.—T. S. Medill and Sons, Ltd.

GRAIN AND FLOUR FACTORS REPORTS.

Flour.—The market is very strong, and values are 1s per sack higher on the week. Grain.—American corn has further improved 4½d per boll. Maize firm at 3d advance. Oats in good demand and 3d dearer. Beans firmer. Pease unchanged. Oatmeal steady. Oilcake quiet Mill Stuffs sell well at full prices. Winter wheat patents, 28s 6d to 29s per 280 lb; spring wheat patents, 29s to 30s; American corn, 15s 4½d to 15s 6d per 280 lb; round corn, 15s 1½d to 15s 3d per 280 lb; grinding beans, 18s 7½d to 18s 9d per 280 lb; white pease, 19s to 20s per 280 lb; broad bran, 110s to 112s 6d per ton; medium bran, 105s per ton; fine thirds, 130s per ton; common thirds, 110s per ton; American oilcake, 145s per ton.—McKinnon and McDonald (Glasgow).

Flour.—The demand scarcely so active. Buyers more disposed to work off recent purchases than to follow the course of the market, which is generally about 1s per sack higher than a week ago.—Greenhill Bros. (Belfast).

Offals.—The demand for bran continues active, and quotations are advancing about 2s 6d per ton.—Greenhill Bros. (Belfast).

Milling Offal.—Middlings have recovered the slight drop of last week, and prices are again well maintained. Bran and pollard very firm, with prices against buyers.—John Bawcomb and Co.

TERM MARKET.

Speculators are fairly busy, but the situation for futures has not that stringency which rules to-day in the market for grain of which delivery can be guaranteed by the 14th—that is to say, within the week. The following are the latest prices made, all, as usual, per cental (100 lb):—

Red, American, 7s. 8d., per cental, Sept. delivery.
,, ,, 7s. 11d. ,, Dec. ,,
American maize 5s. 6d. ,, Sept. ,,
,, ,, 5s. 7d. ,, Oct. ,,

There are buyers of wheat for October and November delivery at prices intermediate to those given above according to date when delivery is required, and there would be free buyers for 1908 delivery at 7s 11d, only speculators will not do business under 8s, and this stops the market. No speculation exists in maize for later than October delivery.

PROVISIONS.

London, Monday.—Bacon: The arrivals of bacon last week were:—From Ireland, 2,540 bales, and from foreign ports, 15,523 bales. There was a slow market for bacon throughout the week, resulting in prices being generally easier. Quotations range:—Irish, 58s to 62s up to 66s; Danish, 51s to 58s up to 64s; Canadian, 55s to 56s up to 60s. Butter: The Butter market was quiet. French, 92s to 100s; Danish, 109s to 111s up to 112s; Russian, 78s to 98s; Irish, 84s to 103s; Victorian, 86s to 98s; New South Wales, 86s to 93s; Queensland, 84s to 96s; New Zealand, 96s to 108s. Lard. The Lard market was quiet. Irish, 50s to 58s; American, 45s to 46s 9d; Danish, 48s to 52s.

HAY AND STRAW.

Birmingham, Friday.—Small supply; trade quiet. Quotations:—Old hay, £4 to £4 2s 6d per ton; new hay, £3 7s 6d per ton; straw, no quotations.

Derby, Friday.—Quotations:—Best old clover, 90s to 100s; new ditto, 80s to 90s; best old hay, 90s to 100s; new ditto, 80s to 90s; second ditto, 65s to 70s; wheat straws, 60s to 70s; pressed ditto, 50s to 60s; chop ditto, 55s to 65s; peat moss, 35s to 40s.

Lancaster, Saturday.—Hay, meadow, 6d; ditto, clover, 6½d; wheat straw, 4d; ditto oat, 4d per stone.

Leeds, Tuesday.—The arrival of the new crop of hay is on a restricted scale. Quotations:—Clover hay, 7½d; meadow hay, 7d; wheat straw, 5d; oat straw, 5d; and rye straw (retail), 7d to 8½d per stone; green clover, 3½d per bundle

Lincoln, Friday.—Large supplies. New hay made 60s, and seeds 55s to 60s per ton on the ground. No new straw yet offered, old making 35s per ton on the ground.

Manchester, Friday.—Hay, new, 4½d to 5d; clover, old, 7d to 7½d; new, 4½d to 6½d; straw, wheat, 4d; oat, 3½d to 3¾d per stone.

Nottingham, Wednesday.—Large supplies on offer, which met with a good demand for best qualities only. Quotations:—Inferior to good hay, 75s to 85s; prime ditto, 95s to 100s; inferior to good clover, 70s to 80s; prime ditto, 95s to 105s; wheat straw, 45s to 55s; new hay, 50s to 70s; new seeds, 75s to 85s per ton.

Sheffield, Tuesday.—A small supply, and a poor attendance of farmers. Choice old seeds, £5 to £5 5s; choice hay, £4 to £4 10s; straw, £2 15s to £3 per ton.

Whitechapel, Saturday.—Arrivals were smaller, and a fair demand prevailed at steady prices. Best clover, 84s to 95s; inferior, 72s to 80s; specially picked hay, 87s; good, 76s to 85s; inferior, 65s to 70s; mixture and sainfoin, 77s 6d to 87s 6d; straw, 28s to 34s per load.

LONDON HAY TRADE.

Saturday.—The trade this week has again been in a very dull and depressed condition. There are large supplies of all kinds of new crop, the bulk of which, being of a very poor and inferior quality, forced sales have had to be made to effect clearances, some at ridiculously low prices; this is having a bad effect on better qualities, and makes values all round easier. The demand for old crop has also fallen off considerably, and it is now very difficult to do much business with this quality, as buyers do not like paying the extra difference of about 12s. to 15s. per ton, which exists between the value of best new and old, preferring to have the new at the lower price, which is now commencing to handle and dry and merchantable condition. Values of old crop are about as follows:—Best clovers, 90s per ton; best hays, 77s 6d to 80s per ton; best mixtures, 87s 6d to 90s per ton.

The straw trade, owing to harvest operations keeping supplies back, shows considerable firmness, prices being the turn higher. In the foreign market there is little or no demand, and it looks before long as if importations would cease altogether, prices therefore are but nominal ones.

Prices ruling for English 1907 crop are about as follows:—Best hays, 65s per ton; good hays, 57s 6d to 62s 6d per ton; plain hays, 53s per ton; best clovers, 77s 6d to 80s per ton; good clovers, 75s per ton; inferior clovers, 67s 6d to 72s 6d per ton; best mixtures, 75s per ton; good mixtures, 67s 6d to 72s 6d per ton; plain mixtures, 60s to 65s per ton; seconds hays, clovers, and mixtures, 40s to 55s per ton; wheat straw, 26s to 29s per load; oat straw, 26s to 28s per load; barley straw, 28s per load. All ex rail London. Foreign: Canadian mixture, 80s per ton; first quality Dutch hay, 62s 6d to 65s per ton; second quality Dutch hay, 53s to 60s per ton; New French first cut clover, 75s per ton. These prices are by the barge load delivered alongside a London Thames wharf.

SEEDS.

Mark Lane, Monday. — The demand still drags on for trifolium, prices favouring buyers. Rape keeps firm at present high prices. Mustard unchanged. Rye, good inquiry, prices firm. Winter tares moving freely, both new and yearling. Peas open high; little movement. New English trefoils tempt buyers; quality superior to foreign; prices reasonable; crop considerably under medium. In grasses fine Italians sell readily. Perennials unchanged.—John Picard and Co.

Seven Years Grain Averages.

(OFFICIAL.)

Wheat	28s. 10d. per 480 lb.
Barley	25s. 4d. per 400 lb.
Oats	18s. 11d. per 312 lb.

TO-DAY'S MARKETS.

CATTLE.

Metropolitan Market, Islington.

Monday, Sept. 9, 1907. British.		Total.		Monday, Sept. 10, 1906.

Calves	10	10		10
Pigs	—	—		—
Milch Cows	40	40		30

Quotations per 8 lb. (sinking the offal).

ENGLISH.

	Inferior. s. d.		Second. s. d.		First. s. d.
Beasts	2 10		3 10		4 8
Sheep	3 8		5 2		6 0
Lambs	4 10		5 6		6 8
Calves	—		—		—
Pigs	—		—		—

Milch cows, per head, £16 to £22.

British arrivals include as follows:—Scotland, nil; Eastern Counties, 33; Midland, Home, and Western Counties, 844; Devon, 25; Ireland, 108.

We note to-day an increase of 90 head in the number of beasts compared with Monday last. Trade opened, and will continue throughout the day, of an extremely slow and dragging nature for all classes of cattle, partly owing to the overstocked state of the dead meat market, the tendency in regard to values being a downward one. The Irish arrivals consisted of 50 Dublins and 58 Waterfords, for which less money had to be accpted to force sales. Fat butchering cows and bulls met with a very small country demand, however, all transactions were governed by late rates.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day. s. d.		s. d.	Monday, Sept. 10, 1906. s. d.		s. d.
Scotch	—		—	—		—
Devons	4 6	to	4 8	4 4	to	4 6
Herefords	4 4	to	4 6	4 4	to	4 6
Norfolks	—		—	—		—
Runts	4 2	to	4 4	4 2	to	4 4
Lincolns	3 10	to	4 0	3 10	to	4 0
Irish	4 1	to	4 3	4 1	to	4 3
Canadian	—		—	—		—
Fat cows	3 4	to	3 6	3 4	to	3 6

There was a decrease of 610 in the number of sheep and lambs penned compared with Monday last. Trade opened with an entire absence of life, however sellers were not willing to accept any lower rates for either wethers or ewes. Both Scotch and Irish descriptions shared in the poor trade, late currencies governing all transactions. Lambs were in smaller numbers, but were difficult to vend even at the low rates prevailing. A clearance will not be effected. The supply included 200 Scotch, 660 Irish, and 170 from the Eastern Counties.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

Calf trade not worth noting or quoting.

No pigs on the market.

London (Central), Monday. — Trade slow for liberal supplies. Beef, English, 3s 8d to 3s 10d; Scotch, 4s to 4s 6d; American, 3s 7d to 3s 9d; refrigerated hindquarters, 4s to 4s 3d. Mutton, English wethers, 4s 4d to 4s 8d; ewes, 3s 4d to 3s 8d. Lambs, 4s 8d to 5s 4d; Scotch tegs and wethers, 4s 8d to 4s; ewes, 3s 4d to 3s 8d. Veal, 3s 4d to 4s Pork, 3s 8d to 4s 4d per stone.

FOREIGN.

Deptford, Monday.—No market was held here to-day. On Saturday 1,640 beasts from the United States and 280 from Canada were offered for sale. Trade ruled of a firm and steady nature, the tendency in regard to value being an upward one. The best States on offer were quoted at from 4s 4d to 4s 6d; seconds, 4s 2d to 4s 4d; Canadians 4s 1d to 4s 3d; seconds, 3s 10d to 4s per 8 lb (offal given in).

Liverpool, Monday.—Larger supply of cattle in market to-day. Demand good, although prices are not quotably higher. Small decrease in supply of sheep and lambs; demand slow, and notwithstanding that slightly lower rates were accepted a clearance could not be made. Beef, 6½d to 5d; mutton, 8½d to 6d; lamb, 8½d to 7½d per lb. At market, 1,530 cattle and 9,496 sheep.

FEEDING STUFFS.

London, Monday. — Linseed Cake: Owing principally to the advance in seed the market for cake has hardened 2s. 6d. to 5s. per ton. Foreign makes are sparingly offered for forward positions, and at rather prohibitive prices.

Cotton Cake: This is also dearer through seed market advancing, and Egyptians are most difficult to buy for shipment.

Linseed: With lighter shipments from all countries, the market is higher by 1s. to 1s. 6d. per qr.

English Linseed Cake, ex mill	7 12 6	to	7 15 0		
American Calcutta Linseed cake ex quay	7 10 0	to	7 12 6

—Robt. & John Hewetson

HOPS.

Borough, Monday.—The samples of the new hops that have arrived up to the present show more than usual good quality for early pickings, being full of lupulin, and may be classed as good copper hops, but the cones are very small, consequently the weight picked per acre is very disappointing, being at least 25 per cent. less than it was set at when the hops were in the burr state. —W. H. and H. Le May.

POTATOES.

Borough, Saturday.—A small supply was in quiet request. Early Rose, 65s to 70s; Early Puritans, 70s; British Queens, 60s to 65s; Blacklands, 60s per ton.

Berwick, Saturday.—Farmers are beginning to take up their potatoes, although in small quantities, and are meeting a fairly good trade at 60s to 66s per ton.

Carlisle, Saturday.—Large supply and a fair demand was met at 6d to 7d per stone.

Doncaster, Saturday.—Large supply and a fair demand all round; prices 3s to 3s6d per cwt; retail 1s per peck.

Lancaster, Saturday.—Good supply at 8d to 9d per stone.

Preston, Saturday.—Potatoes, 2s 6d to 10s per load of 240 lb

Retford, Saturday.—Potatoes plentiful at 6s 6d to 7s 6d per load; mushrooms, 4d to 6d per lb.

Spitalfields, Saturday. — Small arrivals experienced poor support. Early Puritans, 70s; Early Rose, 65s to 70s; British Queens, 75s to 80s; Epicures, 65s to 70s; Sharp's Express, 65s to 70s. Blacklands: Up-to-Dates, 65s; British Queens, 60s to 65s; Sharp's Express, 60s to 65s per ton.

Worksop, Wednesday.—A smaller supply than usual, with prices up 1s per load, best potatoes making 9s per load of 18 stones.

York, Saturday.—Trade was rather firmer from 57s 6d to 62s 6d per ton being made.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

The trade for fat beasts at Islington both in regard to prime and second quality opened with an entire absence of life, consequently difficulty was experienced in upholding the previous week's currencies. The Irish arrivals consisted of 36 Dublins and 58 Waterfords, all of which shared in the poor trade prevailing. No store cattle were included in the consignments this week. Fat butchering cows and bulls were in shorter supply, but were more than sufficient for the demand, nevertheless late currencies governed all transactions. On Thursday sales were confined to fat cows and rough cattle, for which Monday's values were both asked and obtained.

At the Foreign Cattle Market, Deptford, there was an increase in the supply compared with the previous week, the majority of the consignments consisting of States' cattle. Trade throughout the week ruled of a firm and steady nature with an upward tendency in regard to value. The total number on offer at both markets was 3,490, as against 3,010 during the previous week, consisting of 970 British (increase 70) and 2,520 foreign (increase 410), these latter comprising 1,860 from the United States and 660 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal) :—80 to 90 stone Devons, 4s. 6d. to 4s. 8d. ; 90 to 95 stone Herefords, 4s. 6d. ex 4s. 8d. ; 95 stone Runts, 4s. 4d. to 4s. 6d. ; 100 stone Shorthorns, 4s. to 4s. 2d. ; 95 stone Irish, 4s. to 4s. 4d. ; 90 stone States, 4s. 4d. to 4s. 6d. ; 95 stone Canadians, 4s. 1d. to 4s. 3d. ; 90 stone fat cows, 3s. 4d to 3s. 6d.

The sheep trade, which was confined to the Islington market, ruled of a dull and dragging nature throughout the week for both wethers and ewes ; in fact on Thursday very little business was transacted owing to the scarcity of buyers present. Both Scotch and Irish descriptions shared in the poor trade. Lambs were in excess of the demand, consequently were difficult to vend, the previous week's slight advance having to be dropped to effect sales. The total number penned at both markets was 6,210, as against 6,960 during the preceding week, showing a decrease of 750. Best pens made per 8 lb. as follows :—7½ to 8 stone Downs, 5s. 10d. to 6s. ; 8 stone Scotch, 5s. 10d. to 6s. ; 9 stone Downs, 5s. 8d. to 5s. 10d. ; 10 stone Irish, 5s. 4d. to 5s. 6d. ; 10 stone Downs, 5s. 6d to 5s. 8d. ; 10 stone Half-breds, 5s. 4d. to 5s. 6d. ; 10 stone Down ewes, 4s. to 4s. 2d. ; 5 stonefat Grass lambs, 6s. 6d. to 6s. 8d. ; 6 stone Halfbred ditto, 6s. 2d to 6s. 4d.

Calves numbered 30, trade for which ruled of a slow nature, the best on offer being quoted at from 4s. 10d. to 5s. per 8 lb. offal given in.

Trade in the West.

The markets continue to be very shortly supplied all round, and at no previous period of the present season has this been more marked than during the past week. Dairy stock continues in active request at extreme prices, especially heifers and calves, which are selling readily from £17 up to £21 or £22 apiece ; and even these high rates do not in any way check sales, as many more could be disposed of if they were only available ; and even very plain heifers are readily caught up at from £14 to £16. Good cows with calves are likewise equally saleable, some of the heaviest milchers bringing from £17 to £18 apiece, and more ordinary grades £14 to £16, whilst the older classes of cows make £10 to £12 for animals likely soon to go off their milk. In-calvers of early date may be quoted as selling from £14 to £15 10s. for the most promising grades, and springers from £13 to £15 ; yearling heifers are also in demand at from £5 to £8 each. Good fresh barreners command plenty of custom at £22 to £29 per pair, ranging down to £18 to £20 for those not in quite such high condition. To this circumstance is also to be ascribed the general buoyancy which characterises the sheep trade, present currencies being quite 3s. in advance of those ruling at this time last year ; and those prices are not unlikely to continue until the close of the great sheep sales now in active progress in so many parts of the country.

Deliveries of fat stock have also been on a very limited scale, and, though the demand has been scarcely so strong as of late, yet prices have as a general rule been fairly well maintained, mutton, as a rule, being one of the weakest things on the market, though the drop, even on this, has scarcely been to any quotable extent, some of the choicest wethers still touching 8½d. per lb., whilst heavy grades of lamb—young mutton would be a more accurate description—is selling up to 9¼d. or 9½d. per lb. (or from 45s. to 52s. each), and choice suck lambs from 33s. to 43s. (or 10d. to 10½d.), poor class lambs being quoted 9d. Fat beef shows no decline in value, if anything steers or heifers are rather against the buyer, best quality animals realising 11s. 6d. to 12s. per score (or from £16 to £23 apiece), and fat meaty cows £14 to £17 (or 10s. to 10s. 6d.). Good veal keeps firm, though the sultry weather last week had a somewhat depreciating effect on heavy calves, buyers being very cautious not to purchase too extensively of this class of animal unless they knew exactly how to dispose of their purchases. Heavy calves of this class made 7½d. to 8d. per lb., but the neater-handling weights found a readier and more general sale at fully ½d. per lb. more, and no difficulty was experienced in getting off sticks. Pigs are firmer than ever and prices even higher, all the daintier weights of porkers—animals selling from 44s. up to about 58s. or 60s. each—realising from 11s. 6d. to 12s. per score, and baconers 9s. 6d. to 10s. 6d. ; coarse heavy pigs, 8s. 6d. to 9s.

Trade in Ireland

At Thursday's Dublin market there was a big increase of 1,200 head of cattle over the average supply for this time of the year, and there was also a big increase of nearly 3,000 head of sheep. Prime well-finished bullocks and heifers cleared at firm rates in spite of the increased supply, but ordinary cattle met with a slight fall of 6d. to 1s. per cwt. A good clearance, however, was made during the day (live weight). The number of beasts in the market was 4,430—being an increase of over 1,000 head on the corresponding weeks of 1905 and 1906. The average top live weight price was 32s. to 33s., but a few fancy beasts went at 35s. and 36s. per cwt. The approximate dead-weight prices would be :—Prime ox and heifer beef from 57s. to 61s. and 63s. for extra fed ; good milch beef, 53s. to 55s. ; and inferior 46s. to 49s. per cwt. Prices may be said to have touched the top level of last day's market. Secondary and half-meated animals were somewhat more difficult to get rid of. These (the secondary) formed the bulk of the offer on market. Sheep, though comparatively short in supply, met with a comparatively moderate sale, prices for the choicer qualities remaining unchanged however. Coarse sheep sold slowly at rather depressed values. Shipment trade was small, at rather depressed prices.

Prime wether mutton sold at from 7d. to 7½d., while some extra Mountain and Cheviot mutton went to 8d. ; prime ewe mutton was sold at 7d., and in some cases 7½d. ; other sorts 6d. per lb. Medium hoggets were worth from 36s. to 46s. each, and prime heavy hoggets from 50s. to 54s. each. Large fat lambs sold at from 40s. to 42s., and medium lambs at from 22s. to 28s. each.

Veal was in moderate request and irregular in value, except for such as were of very prime quality, which sold at from 7½d. to 8d. per lb. ; medium veal, 7½d. ; and coarse from 4½d. to 6d. per lb.

Milch cattle were in fair supply, but were chiefly of an ordinary type, there not being many of first-class quality. A good many medium cows sold at from £8 to £12 each ; some of good milking capacity made up to £17 each, and a few extra cows paid more. Store cattle, when of good breeding and quality, sold well, and were in good demand.

The Dublin pig market was rather limited in supplies, but buyers were in good attendance. There was good buying of pigs for shipping and also for the home trade, values being up perhaps from 1s. to 2s. per cwt. from last day. Store pigs in good request at late rates. Choice light-weight pigs sold from 49s. to 51s. per cwt., store pigs made from 21s. up to 55s. each.

Mr. Gavin Low held a large sale of sheep in the paddocks at Prussia Street on the evening of Thursday, when a large attendance of customers was attracted. The sheep offered for sale consisted of some nice lots of Oxford Downs, Lincoln, and Shropshire ewes which sold very well at from 50s. to 70s. apiece.

The rams, of which there were 400, also sold well, large numbers of gentlemen attending to pick up the choice animals offered for sale. The highest prices were paid for the Border-Leicester rams. A fine ram, belonging to Lord Barrymore (Cork), took the top price, and his other sheep made the best average of the day. A ram which took first at Malton and second at Cork, was sold to Messrs. Jeffers and Doran for 25 guineas. Some other very fine sheep also met with buyers at good prices.

LONDON.

Central Market, Friday.—Fair supplies, and trade very slow, prices closing with rather easier tendency : English beef, 3s 8d to 4s ; Scotch sides, 4s to 4s 2d ; shorts, 4s to 4s 8d ; Deptford and Liverpool killed, 3s 6d to 3s 10d ; refrigerated hindquarters, best, 4s 1d to 4s 2d ; ditto seconds, 3s 9d to 3s 11d ; ditto forequarters, 2s 6d to 2s 8d ; inferior beef, 2s 2d to 3s ; mutton, Scotch wethers, 5s to 5s 4d ; ditto tegs, 5s to 5s 4d ; ditto ewes, 3s 4d to 3s 8d ; English wethers, 4s 4d to 4s 8d ; ditto ewes, 3s 4d to 3s 8d ; Dutch sheep, 4s to 4s 4d ; English lamb, 5s to 5s 4d ; veal, 3s 8d to 4s 8d ; English pork, 3s 8d to 4s 4d ; Dutch pork, 3s 8d to 4s 2d per 8 lb.

Islington, Thursday.—The supply of beasts consisted entirely of fat butchering cows and bulls, which met a slow trade at last Monday's prices. Top value : Fat cows, 3s 4d to 3s 6d ; fat bulls, 2s 9d to 3s 2d per 8 lb. A decrease of 450 in the number penned in sheep market compared with Thursday last. Quotations remain unaltered from last Monday, notwithstanding that very few sales were recorded, owing to the absence of buyers ; the same remark applies to the lamb trade. Best pens made per 8 lb as follows :—7½ stone to 8 stone Down sheep, 5s 10d to 6s ; 9 stone ditto, 5s 8d to 5s 10d ; 10 stone ditto, 5s 6d to 5s 8d ; 10 stone halfbreds, 5s 4d to 5s 6d ; 10 stone Down ewes, 4s to 4s 2d ; 5 stone fat Down lambs, 6s 6d to 6s 8d ; 6 stone halfbred ditto, 6s 2d to 6s 4d. Calf trade ruled slow, at late quotations. Quotations per 8 lb, sinking the offal :—Beasts, 2s 9d to 3s 6d ; sheep, 4s to 6s ; calves, 3s 4d to 5s ; lambs, 4s 10d to 6s 8d. Total supply :—Beasts, 50 ; sheep and lambs, 870 ; calves, 20 ; milch cows, 5.

COUNTRY.

Ashford, Tuesday.—Fair demand for beef at old rates. Veal sold well. Average supply of pork and a good demand. Best beef, 4s 6d to 5s ; secondary, 4s 3d. Mutton, small Down wethers, 5s 6d to 6s ; small Kent wethers, 5s 6d ; larger, 4s 8d to 5s ; barrens, 4s to 4s 4d. Veal, 5s to 5s 4d. Lamb, 6s 6d to 7s. Pork, roasters, 3s 10d to 4s.

Aylesbury, Wednesday.—Sheep and lambs were a short supply, only 450 being penned. Beasts were an average consignment, and numbered 120. About 180 pigs were offered. A brisk trade prevailed in all departments at prices exceeding the previous week's sales, and practically everything was sold.

Berwick, Saturday.—Attendance of farmers and buyers very small, and trade quiet. Stirks, £7 10s to £9 10s ; two-year-olds, £10 10s. Shorthorn bulls £9 10s. There were no calves, heifers, or three-year-olds.

Birmingham, Thursday.—Small of supply beasts, sheep, and pigs ; trade slow. Quotations : —Beef, 5d to 6½d per lb ; mutton, 6d to 8½d per lb ; lamb, 8½d to 9d per lb ; bacon pigs, 10s to to 10s 3d per score ; cutting pigs, 10s to 10s 3d per score ; sows, 8s 4d per score.

Bristol, Thursday.—Fair supply of beef ; trade slow at a reduction of 2s per cwt on lowest limit for best qualities—viz., 60s to 62s. Sheep in fair numbers ; business slack ; prime wethers ½d cheaper at 9d. Few pigs ; baconers down 6d, at 9s 6d. 700 store cattle, not all sold, at late rates.

Canterbury, Saturday.—A fair supply of sheep and lambs, and prices are maintained. Useful ewes ranged from 38s to 44s for good-mouthed specimens, and a few very strong in condition made up to 49s. Registered South Down ram tegs sold at an average of 5 guineas each ; working lambs, 24s to 28s 6d ; and better class up to 32s. Two year-old heifers averaged a trifle over £10 each.

Carlisle, Saturday. — Supplies larger than usual ; fair number of buyers, and a steady trade. Small heifers, £7 10s to £10 10s ; better descriptions of wintering cattle, £11 10s to £13 15s ; heifers for fogging purposes, £14 to £16 10s each.

Colchester, Saturday.—Beef and mutton were

in fair supply, and moderate demand, finding a quiet sale at last week's prices.

Derby, Tuesday.—Full supply of fat stock, and a slow sale for inferior qualities. Beasts, 5½d to 6¾d; calves, 7½d; sheep, 7½d to 9d; lambs, 10d per lb.

Doncaster, Saturday.—Very small supply of cattle. Milch beasts were mostly in demand, prices being firm, and from £18 to £23, bullocks £12 to £18, heifers and drapes £12 to £16, stirks £10 to £11, young stores £7 to £10 each. A very large supply of sheep, and fair attendance of buyers, though trade was not particularly brisk. Ewes 54s to 60s, gimmers 60s to 70s each, lambs 40s to 44s each.

Dorchester, Saturday.—Supplies at Messrs. Ensor and Son's repository sale to-day consisted almost entirely of cattle, of which there was a full offer both of stores and fat beasts. Grazing cattle were in active request for the best grades at from £23 to £28 per pair, the top price being reached by a draft from West Dorset, seconds making £13 to £18 (mostly for cows). In milch beasts best heifers and calves commanded a free sale from £16 10s to £20 (from Purbeck); whilst two year-old heifers made £8 10s to £9 15s, and yearlings £3 5s to £5 5s. In fat beasts heifers ranged from £16 to £19 each, and steers £22 (or 11s 6d per score); fat cows, £13 to £16 (or 10s to 10s 6d. Mutton makes about late rates. Everything was readily cleared, there being a very keen demand for anything at all suitable for grazing purposes.

Dublin, Thursday.— Numbers considerably augmented, and, buyers being found in a cautious mood, trade ruled slow generally for cattle, with lower prices for all qualities. Better demand for sheep at last week's prices. Choice lambs easier sold; middling and inferior qualities still difficult to place. Cattle—Live weight (best), 31s 6d per cwt; secondary and inferior, 26s to 30s per cwt; Mutton (dead weight), 6½d to 7¾d per lb.—Ganly, Sons and Co.

Exeter, Friday.—Small supply of fat beasts. Small wethers and shorn lambs, 9d per lb; large size wethers, 8d to 8½d; breeding ewes, 42s to 46s; Bridgewater class sheep, 38s to 42s, all sold; small lambs in wool, 10d to 11d; rams, 5d; calves, 7d to 7½d.

Hereford, Wednesday.—A plentiful supply of beef, but trade none too brisk; best quality bullock and heifer 6¾d to 6¾d; cow 5d. There was a fair supply of calves, and trade was moderately firm for veal at 6½d to 7½d per lb. Sheep were a fair supply, and trade was firm; fat wethers, 8d to 8½d; fat ewes, 6d to 7d. Fat lambs in small supply, 8d to 8½d; store lambs dear. A large supply of porks and bacons, the former making 5½d to 6d., the latter 5½d. Store pigs a better trade. The supply of store cattle was over large, and trade was very quiet.

Gloucester, Saturday. — Messrs. Bruton, Knowles, and Co. report their sales as follows:—About 80 cows and calves and in-calvers, for which there was a good demand. A short supply of store cattle and fair trade.

Lancaster, Tuesday. — Average entry of calving cows, with good trade for the best sorts, but slow bidding for inferior beasts. Large show of fat cattle, sheep, and lambs. Beef trade quiet, with a fair demand for mutton. Quotations:—Calving cows, to £18 2s 6d each; heifers, 6d to 6½d; cows, 5d to 5½d; fat calves, 7d to 7½d; lambs, 8d to 8½d; shearlings, 8d to 8½d; ewes, 6d to 6½d per lb.

Leicester, Saturday. — Heavy consignments of home-bred bullocks. Trade ruled slower at 10s per head decline, and many lots were left unsold. Choice milch cows made £18 to £20, good lots £16 to £17, secondary £13 10s to £15, Shorthorn bullocks, £12 to £15; Irish bullocks, £13 to £16. Welsh cattle, £10 to £16; young stock, £5 to £8; heifers, £9 to £14 10s; calves, 25s to 40s each. Sheep were in good supply, and sold freely at high rates, good Oxford Downs making 55s to 57s 6d, and lamb hoggs, 28s to 37s each.

Lincoln, Friday.—A small market of store stock, farmers being fully occupied with the harvest. Milch cows were in fair show, and trade was slow at £16 to £21 each; young store beasts, £9 to £12. Fair show of sheep; ewes, 48s to 56s; drape ewes, 38s to 42s; gimmers, 60s to 65s; and lambs, 36s to 44s each.

Lynn, Tuesday.—An average supply of fat beasts, which made from 7s to 7s 9d per stone; few stores shown, with trade very slow, making from £6 to £14 each. Fat sheep, average show, and trade firm, from 9s 6d per stone; stores from 45s to 50s each; fat lambs, 30s to 40s each; store lambs, 30s to 38s each.

Manchester, Friday.—Beef: Firsts, 5½d; seconds, 4½d to 5d; thirds, 3½d to 4d. Mutton: Firsts, 7½d; seconds, 6½d to 7d; thirds, 5½d to 6d. Veal: Firsts, 6½d; seconds, 5½d to 6d; thirds, 4½d to 5d. Bacon pigs: Firsts, 5½d; seconds, 4½d to 5d; thirds, 3½d to 4d. Porket pigs: Firsts, 6½d; seconds, 5¾d to 6d; thirds, 5¼d to 5½d

Newcastle, Tuesday.—Trade for cattle was quiet, and prices unaltered. Quotations:—Prime heifers, 7s 6d to 7s 9d; second class, 7s to 7s 3d; prime steers, 7s 3d to 7s 6d; second class, 7s to 7s 3d; coarse and inferior, 6s 6d to 6s 9d per stone sinking the offal. Sheep and lambs met a firmer trade all round, and showed an improvement of ½d to ½d per lb. Prime young sheep, 8½d to 8¾d; strong heavy, 8¼d to 8½d; choice lambs, 9d to 9¼d; second class, 8½d to 9d; ewes, 6d to 6¾d; rams, 5d to 6d per lb. Trade was firm, and prices improved a further ½d, making veal 6d to 7¾d per lb.

Newport, Wednesday.—An average supply of cattle, sheep, and calves; a large number of lambs. A good attendance of buyers, and a brisk trade all round. Best beef, 6½d to 6¾d per lb; seconds, 6¼d; cows, 4¾d to 5½d; best wether mutton, 8½d; ewes, 7d to 7½d; lamb, 9d; calves, 7d to 8½d; porker pigs, 10s 3d to 10s 6d per score.

Norwich, Saturday.—Average show of fat cattle, but the quality was hardly so good as last week, the best selling well at 8s per stone; other sorts met a slow trade at 7s 6d, while cows made 7s. Veal made 9s per stone. Small show of fat sheep; trade hardly so good, the best making 10s 6d per stone; other qualities, 9s 6d to 10s; and ewes 6s. Trade for fat pigs was unchanged; a total clearance was effected, bacons making from 6s to 6s 8d, porkers 7s, and sows 5s 3d per stone. Store cattle were a larger show, the quality was fairly good, and trade was slow and dear; three-year-olds made from £15 to £18, yearlings, £7 to £10 10s, and smaller cattle from £4 10s to £6 5s. Rearing calves were of good quality, and not so dear, prices ranging from 22s to 44s per head. The store sheep shown were mostly ewes, and the quality was hardly so good as usual, trade being slow and dear. Suffolk shearlings made from 58s to 63s, crossbreds from 55s to 60s, and others from 45s to 56s. Store pigs were a rather better trade, and all got sold at prices ranging from 12s to 22s.

Nottingham, Saturday.—Small show of milch beasts, with an improved trade. Best milch cows made £18 to £22, and in-calf heifers, £14 to £18. A small show of store beasts, and a good trade; strong heifers and steers realised £10 to £14, and younger beast £6 to £10. Calves brought 25s to 45s. There were no sheep, and only a few pigs, which met with a fair trade. Official returns:—104 beasts and 46 calves.

Preston, Wednesday.—There were good supplies in all departments of choice quality, but trade ruled slow, Quotations:—Choice quality local-fed heifers, 6½d; Irish ditto, 6¼d; young cows and bulls, 6d; secondary quality ditto, 5d to 5½d; choice hoggs and lambs to 8¾d; secondary ditto, 8d to 8½d.

Retford, Saturday.—Store stock scarce, but sufficient to meet all needs, for both milch cows and young cattle sold slowly, at no variation on the prices current last Saturday.

Romford, Wednesday.—Average supply of fat beasts; trade a little better; best animals, 4s 6d to 4s 8d; middlings, 4s 2d to 4s 4d per stone. Calves in short supply; prices rather better at 5s 2d to 5s 4d per stone. Average supply of sheep; trade about the same; best small sheep, 5s 8d to 6s; larger sheep, 5s 4d to 5s 6d per stone. Ewes in average supply, but dear at 4s 2d to 4s 4d per stone. Lambs in very short supply; trade about the same at 6s 4d to 6s 8d per stone. A few store beasts on offer; very slow demand. Milch cows in good supply; trade better Small supply of pigs, average trade: small porkers, 3s 8d to 4s; large hogs, 2s 8d to 3s per stone.

Sheffield, Tuesday.—A fair show of milch cattle, with a moderate trade, and late prices were fully upheld, the best making £20 to £21, and younger sorts, £14 to £16.

Shrewsbury, Tuesday.—Usual supplies of fat and store cattle, calves, and pigs. Larger number of store sheep, which met a good demand. Usual supply of pigs. Quotations:—Beef, 6d to 6¾d per lb; mutton (wether), 9d to 9¼d per lb; ewes, 7d to 8d per lb; lamb, 9d to 10d per lb; veal, 7d to 7½d per lb; porket pigs, 10s 3d to 10s 6d per score; bacons, 9s to 9s 9d per score. Numbers offered as follows:—Cattle, 711, sheep and lambs 2,729, calves 84, pigs 330.

Stockton, Wednesday.—Best cattle made 7s 8d to 7s 9d per stone, rougher kinds 6s 6d to 7s, lambs 9d to 10d, young sheep 8½d, ewes 7d to 7½d per lb.

Thame, Tuesday.—There was a capital entry of all descriptions of stock, a choicer lot of cattle from the best grazing grounds being seldom seen. There was an exceptionally large attendance of buyers, all the principal towns being strongly represented. Beef was a spirited trade throughout, making slightly more money than the previous week, practically a clearance being effected. Sheep still continue in demand, and fully maintained late rates. We would remind buyers that a large number of pigs are coming to hand, the season having commenced earlier than usual. Messrs. Bond and Burrows' sale comprised 87 fat beasts, 244 fat sheep, 80 fat and weaning calves, and 157 fat and store pigs. Fat oxen made from £15 15s to £23 7s 6d; fat heifers, £14 to £20 12s 6d; fat wethers, 48s to 63s; fat ewes, 40s to 58s; fat lambs, 38s to 46s; fat calves, £3 to £4 17s 6d; weaning cow calves, 28s to 60s; bull calves, 20s to 50s; bacon hogs, £3 to £5; fat porkers, 28s to 44s; small pigs, 13s to 20s; strong store, 25s to 36s.

Truro, Wednesday.—Fat bullocks, 56s to 60s per cwt; barreners and store bullocks, 40s to 45s; cows and calves, £10 to £15; rearing calves, 25s to 45s; breeding ewes, 40s to 42s; wethers, 7d to 7½d per lb; ewes, 5d to 5½d; lambs, 7d to 7½d; large pigs, smaller ditto, and suckers, 10s to 60s each.

Wolverhampton, Wednesday. — Moderate supply; slow trade. Beef, 5½d to 6¾d per lb; mutton, 8½ to 9d per lb; lamb, 9½ per lb; veal, 7½d to 8d per lb.

Worksop, Wednesday.—Small show of stock, with trade dull, and very little variation in last week's prices. Best beef, 7s 3d to 7s 9d; secondary, 6s 9d to 7s 3d per stone; best Southdown wethers and cross-breds, 8d to 8½d; ewes, 5½d to 6½d per lb.

York, Thursday.—This was the first of the extra store cattle markets. There were no English store cattle on offer, with the exception of a few calving and milch cows, £20 being paid for the best of this class. The general run was £15 to £17. The show of Irish store stock was very fair for the "off" market, but very few buyers came forward, and what inquiry there was concerned the best fresh three-year-old bullocks, which made up to £13 10s. There was no inquiry for younger cattle. Aged sheep were a fair trade, prices having a downward tendency, from 1s to 2s per head less being made. A few shearling sheep met an average trade at 42s to 48s, twice-crossed shearling making in a few cases up to 49s. Lambs met a limited inquiry, and a fair lot remained unsold. Masham lambs made up to 28s, white-faced lambs 28s to 36s, and a few Masham ewes from 42s each.

BUTTER.

(Price per lb.)

Altrincham: 1s 2d to 1s 3d. Appleby: 10d to 1s. Barnstaple: 1s 1d to 1s 3d. Berwick: 1s to 1s 2d. Birmingham: 1s 2d to 1s 3d. Camelford: 1s. Carlisle: 1s to 1s 1d. Chester: 1s 1d. Dartmouth: 1s 1d to 1s 3d. Derby: 1s 1d to 1s 2d. Devizes: 1s 4d to 1s 5d. Doncaster: 1s 1d. Dorchester: 10d to 1s 2d. Hereford: 1s to 1s 2d. Ipswich: 1s 1d to 1s 2d. Kidderminster: 1s 1d. Lancaster: 1s 1½d to 1s 2d½. Market Drayton: 1s to 1s 2d Otley: 1s 6d to 1s 8d per 24 oz roll. Penrith: 10½d to 1s 1d. Penzance: 9d to 1s 3d. Preston: 1s 2d to 1s 3d. Retford: 1s 2d. Ripon: 1s 7d to 1s 8d per 24 oz roll. Scarborough: 1s 3d. Shrewsbury: 1s. Spalding: 1s. Stamford: 1s 2d to 1s 3d. Stockport: 1s 2d to 1s 3d. Stockton: 1s to 1s 2d. Totnes: 1s 1d to 1s 2d. Truro: 9d to 10d. Wellington (Salop): 1s to 1s 1d. Worcester: 10d to 1s 1d. Worksop: 1s 1d to 1s 3d. York: 1s to 1s 2d.

EGGS.

(Number per 1s.)

Altrincham: 8 and 9. Appleby: 11 and 12. Barnstaple: 10 to 12. Berwick: 1s 1d to 1s 2d per doz. Birmingham: 9 and 10. Camelford: 12. Carlisle: 10 and 11. Chester: 10. Dartmouth: 1s 1d to 1s 3d per doz. Derby: 10 and 11. Devizes: 12 to 14. Doncaster: 10 to 12. Dorchester: 1s to 1s 4d per doz. Hereford: 10 to 12. Ipswich: 10 to 12. Kidderminster: 10. Lancaster: 9. Market Drayton: 10 and 11. Otley: 10. Penrith: 11 to 12. Penzance: 11d to 1s per doz. Preston: 8 and 9. Retford: 2s to 2s 2d per score. Ripon: 10 and 11. Scarborough: 9. Shrewsbury: 10 and 11. York: 10 and 11.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter.—The Colonial butter market remains quiet, buyers showing very little interest. Prices show no change. The demand for all classes of foreign butter continues slow. The supply of home made shows only a very slight reduction. Continental markets are of the same quiet character. The official quotation for Danish is unchanged. Cheese.—There is a complete absence of any speculation, buyers taking only sufficient for present requirements. The rise of 1s to 2s this week has had its usual effect of bringing a little more demand, but this is only temporary as the trade here does not believe present values will be long maintained. Prices in Canada, however, are steadily rising.

New Zealand is in too small supply to make a market quotation.—W. Weddel and Co.

POULTRY AND GAME.

Smithfield, Saturday.—Full demand experienced for a fair supply. Prices: Surrey fowls 2s 9d to 3s 6d; Sussex fowls, 2s 3d to 3s; Lincolnshire fowls, 1s 9d to 2s 9d; Irish fowls, 1s 4d to geese, 4s 6d to 5s 6d; country ducks, 1s 9d to 2s 6d; Aylesbury ducks, 2s to 2s 6d; wild ducks, 1s 3d; quails, 8d to 1s; feathered pigeons, 8d to 9d; Bordeaux pigeons, 10d to 1s 2d; English hares, 2s 6d; leverets, 1s 3d; Scottish hares, 1s 3d; tame rabbits, 1s 2d to 1s 6d; wild rabbits, 6d to 10d; live hens, 1s 9d to 2s 3d each; Australian rabbits, 5s 6d to 7s per doz; young partridges, 5s to 6s; old, 2s to 2s 4d; young grouse, 6s 6d to 8s; old, 2s 3d to 2s 6d per brace.

CHEESE.

Glasgow, Wednesday.—Arrivals of home cheese were rather liberal, and the demand improved. Prices were firm, Cheddars being quoted 58s to 60s per cwt, and Dunlops 55s to 58s. There was also a better inquiry for Canadian parcels, which were 1s per cwt dearer at 58s.

Newport, Wednesday.—About 10 tons were pitched. There was an average attendance and a fair demand. Quotations:—Caerphillies, 45s to 56s per cwt; fancy dairies, 57s to 60s; Derbies, 58s to 60s; truckles, 56s to 64s; doubles, 54s to 56s.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Ample and varied supplies of fruit and vegetables on offer and business fairly brisk. Quotations for English produce:—Grapes, 6d to 2s; ditto (Guernsey), 6d to 9d; pears, 3s 6d to 5s 6d per bushel; apples, 2s 6d to 10s per bushel; melons, 1s to 2s; ditto (Rock), 2s to 4s each; green figs, 1s to 3s; nectarines, 2s 6d to 8s per doz; peaches, 2s 6d to 8s per dozen; cobnuts, 3s to 4s; filberts, 2s 6d to 3s 6d per 12 lb; damsons, 1s to 2s; plums, 1s to 2s 6d per half sieve; tomatoes (English), 2s 6d to 3s 6d; ditto (Channel Islands), 2s to 3s per 12lb; scarlet runners, 1s 6d to 2s 6d per bushel; peas, 4s to 6s per bag; ditto, 2s to 4s per bushel; endive, 1s to 1s 6d; cos lettuce, 4d to 8d per dozen; cucumbers, 4s to 5s 6d per flat; cabbages, 2s 6d to 3s; marrows, 1s 6d to 3s; cauliflowers, 4s to 5s 6d per tally; mushrooms, 6s to 9s per 12 lb; onions, 1s 6d per dozen bunches; ditto (Ports), 6s 6d to 7s 6d per case; turnips, 1s 6d to 2s 6d; parsley, 1s 6d to 1s 9d; mint, 1s to 1s 3d per dozen bunches; carrots, 2s to 2s 6d per bag; horseradish, 10s to 14s per dozen bundles; potatoes, 60s to 75s per ton.

WOOL.

London, Saturday.—English—per pk. of 240 lb.—Fleeces, South Down hoggs, £14 10s to £15; half-bred hoggs, £13 to £13 10s; ditto wethers, £12 10s to £13; Kent fleeces, £12 5s to £12 10s; South Down ewes and wethers, £13 10s to £14; Leicester ewes and wethers, £12 to £12 10s. Colonial—per lb.—Vic., scoured super., 2s 2d to 2s 3d; scoured, good, 1s 11½d to 2s 1d; scoured, average, 1s 10d to 1s 11d; greasy, average to fair, 1s 1½d to 1s 2½d; N.S.W., scoured, average, 1s 9½d to 1s 10½d; greasy, average, 1s to 1s 1d; S. Aus., greasy, average, 10d to 11d; N.Z., scoured, average, 1s 10d to 1s 11d; greasy, average, 11d to 11½d; Cape, scoured, super., 1s 9½d to 1s 10½d; fleece, average, 9½d to 10½d; greasy, average, 8½d to 9½d; Natal, scoured, 1s 5½d to 1s 6½d; greasy average, 8½d to 9d. Crossbreds—grs.—Vic., good to super., 1s 3½d to 1s 4½d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s to 1s 1d; coarse, 10d to 11d.

Canterbury, Saturday.—Staplers continue to bid 11d for Kent fleeces, and 7d for lamb wool, but holders are indifferent at these figures.

Halifax, Saturday.—While business in wool is, on the whole, rather quiet, values remain exceedingly firm.

Worcester, Saturday.—A few growers at market to-day offering samples of the new growth, but practically no business was done. Consumers are not ready yet, and merchants prefer to wait for a larger supply. The samples were bright and healthy. The growing hops have not developed well this week. There has been so little sun, and it is feared the cones will run small. In this case, the quantity grown will be less than expected.—Charles Faram and Co.

Five Years' Comparative Averages.

(OFFICIAL.)

Comparative statement of grain sales and prices at the Statute markets for the week ending September 7, and for the corresponding week in each of the years from 1903 to 1906:—

	WHEAT.			BARLEY.			OATS.		
	Qrs.	s.	d.	Qrs.	s.	d.	Qrs.	s.	d.
1903	31,057	28	6	1,490	22	4	13,475	17	0
1904	46,115	30	0	22,400	24	10	31,336	16	1
1905	78,589	27	1	17,888	23	4	20,622	15	11
1906	78,579	26	4	19,448	24	9	32,679	16	3
1907	18,316	31	11	7,216	24	2	23,697	17	7

Imports of Foreign and Colonial Corn.

Statement of the quantities of Foreign and Colonial Corn Imported into the United Kingdom in the week ended Saturday, Sept 7, 1907:—

Wheat	1,812,800 cwts.
Wheat-flour	245,000 ,,
Barley	661,800 ,,
Oats	122,800 ,,
Maize	904,800 ,,

And in the corresponding weeks of previous years, viz.:—

	1906.	1905.	1904.	1903.
	Cwts.	Cwts.	Cwts.	Cwts.
Wheat	2,849,400	2,247,500	1,488,000	1,883,700

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

Fine weather has enabled farmers to secure a very large quantity of new wheat in much better state than seemed likely when August was drawing to a close in dark and damp. The ten past days of calm air and clear sunshine have been blessings of the very first order, and the heavy morning dews may have helped to mellow the barley. The potato crop is not turning out very well, but while some sorts have developed disease rather badly, others seem immune. That the bulk of the crop as a whole will be below average, however, seems certain, as of all varieties the tubers tend to run small. This reduced crop of potatoes will throw increased burden of supply on bakers, as potatoes among the masses are always the chief alternative to bread. The wheat markets, after advancing briskly, are now a little inclined to go back, but flour is still on the upward move. Maize and oats are firm, but barley is decidedly cheaper for inferior feeding descriptions.

The American wheat crop of 1907 is the subject of a detailed review in *Beerbohm's List* for the 13th inst. The shipping authority "anticipates excited times on the other side of the Atlantic." This is the more to be noted, as the great shipping organs of the "Baltic" are conducted with almost an excess of caution. The figures at which the *List* has arrived, figures leading to the anticipation quoted as follows:—

Area of winter wheat	38,132,000 acres.
,, spring ,,	16,465,000 ,,
Total area	44,497,000 ,,

This shows a decline of 2,708,000 acres in the area under cultivation, a fact not previously brought home at all clearly to English operators. The yield is put on this acreage as follows:—

Winter wheat	146 bushels on 10 acres.
Spring ,,	123 ,,
Average yield	134 ,,

Total yields in bushels work out thus:—

1907	615,000,000
1906	735,000,000
1905	704,000,000
1904	553,000,000
1903	638,000,000
1902	670,000,000
1901	749,000,000
1900	655,000,000
1899	658,000,000

The nine years average on these figures, which will be found in many ways more valuable than averages based on Nineteenth Century figures, is found to be 675,220,000 bushels, and the yield of 1907 to be 60,220,000 bushels below the average. The deficit as compared with the good year, 1906, is as much as 120,000,000 bushels.

The Russian wheat crop is the subject of a fresh estimate, and is now put semi-officially at not more than 590,000,000 qr. But this total, which would only leave 4,000,000 qr. for export, is obviously some 1,000,000 qr. out. The trade will do well to dismiss it from consideration. Full figures are promised in November.

The supplies of bread stuffs for the first completed week of the cereal year are ascertained to have been as follows:—

Imported wheat	423,000 qr.
,, flour	80,000 ,,
English wheat	37,000 ,,
Total	540,000 ,,

This enables us to give stocks as follows:—

Stocks, September 2, 1907	2,900,000 qr.
Supplies	540,000 ,,
	3,440,000 ,,
Wants	630,000 ,,
Stocks, September 9, 1907	2,810,000 qr.
,, ,, 1906	3,200,000 ,,
,, ,, 1905	2,865,000 ,,

In America, however, the wheat stocks are large:—

September 14, 1907	7,852,000 qr.
,, 1906	5,635,000 ,,
,, 1905	2,475,000 ,,

Imports of barley for the past week have been:—

1907	186,000 qr.
1906	283,000 ,,
1905	126,000 ,,

The arrivals since September 2 have been nearly all from Russia and Roumania, and of light grinding quality only.

Imports of oats have been:—

1907	46,000 qr.
1906	95,005 ,,
1905	58,000 ,,

The very small arrivals of oats are in very great contrast with two years ago, when a plethora of foreign sorts poured into London, Hull, and Edinburgh.

Imports of maize for the first completed week of a new cereal year have been as follows:—

1907	212,000 qr.
1906	355,000 ,,
1905	291,000 ,,

The supply at this period evidently tends to be large. The past week has received large supplies of linseed and of rice meal, but very small quantities only of beans, peas, buckwheat, tares, or rapeseed.

Shipments from America last week were 326,000 qr. of wheat, 20,000 qr. of barley, 27,000 qr. of oats, 55,000 qr. of maize, and 103,000 sacks of flour. There were also shipped 29,000 qr. of linseed, a somewhat unusual addition.

Shipments from Argentina were 37,000 qr. of wheat, 268,000 qr. of maize, 35,000 qr. of linseed, and 2,000 qr. of oats. A cable received the 14th inst spoke of the growing wheat and linseed crops as of very high promise.

Shipments from Russia were 504,000 qr. of barley, 199,000 qr. of wheat, 120,000 qr. of oats, and 40,000 qr. of maize; and there were also 102,000 qr. of rye shipped, though of this last item none was for Great Britain.

Shipments from Roumania were 80,000 qr. of wheat, 54,000 qr. of barley, 28,000 qr. of oats, and 94,000 qr. of maize; and Indian shipments were 175,000 qr. of wheat, 50,000 qr. of linseed. Australia sent off 30,000 qr. of wheat, and 5,000 sacks of flour; New Zealand 50,000 qr. of wheat and 30 000 qr. of oats.

The quantity of wheat on passage continues to diminish, a very remarkable circumstance when we consider that prices offering since September came in are the best the new century has seen. Present quantities afloat are as follows:—

Russian	35,000 qr.
Californian	120,000 ,,
American	420,000 ,,
Indian	570,000 ,,
Argentine	90,000 ,,
Australasian	380,000 ,,
Various	30,000 ,,
Total	1,645,000 qr.
A week ago	1,931,000 ,,
Ten years' average	2,500,000 ,,

These figures are important, and should arrest any declining tendency in wheat prices. Of flour, only 168,000 sacks are on passage as compared with 180,000 sacks a week ago.

The quantity of barley on passage is a little larger than a week ago, as Russia is still a very free shipper, and is sending a material portion of her exports to this country.

Russia	400,000 qr.
California	40,000 ,,
Atlantic Ports	20,000 ,,
Asiatic	60,000 ,,
Total	520,000 qr.
A week ago	440,000 qr.

The quantity of oats on passage, however, has fallen from 180,000 qr. to 150,000 qr., of maize from 795,000 qr. to 725,000 qr., of linseed from 179,000 qr. to 153,000, of rapeseed from 29,000 qr. to 15,000 qr., and of cottonseed from 36,000 to 28,000 tons. Barley is the only article which looks like being depressed in October, and even in this instance the pressure will be on grinding quality only. Of malting and brewing barley the imports in October and November can scarcely be other than small, nor is California shipping her new crop with any speed.

LONDON HAY TRADE.

Saturday. — With farmers busy taking advantage of the spell of fine weather to get forward with their harvest operations, little thought has been given by them to get their hay along, and in consequence we have to report a welcome break in the large supplies, in fact during the past few days our market has been almost denuded of arrivals, the trade in consequence shows a much firmer feeling, and prices are a good 2s. 6d. per ton better, in fact, at some points where the shortage has been scarcely felt, salesmen have been able to squeeze 5s. to 7s. 6d. per ton more money out of needy buyers; although the state of affairs can hardly be expected to last, it is doubly welcome after the very dull and slumpy trade we have been experiencing lately. Clovers show the most firmness, but hays and mixtures are a very good trade, and even plainer sorts of all kinds are more readier of sale. The small arrivals will also now give London holders an opportunity of clearing out the stocks of badly got and inferior new stuff which just lately has been such a drug in our market, and with the incubus got rid of, future trading should be on a more profitable basis.

There is little demand for old stuff. Best hays realising about 80s. per ton; best clovers, 90s to 92s. 6d per ton; best mixtures, 90s per ton. The straw trade also exhibits considerable firmness, and with short supplies prices are about 2s. per load higher. In the Foreign Market there is little or nothing doing, last week's nominal prices about representing value.

Prices ruling for English 1907 crop are about as follows:—Best hays, 65s to 70s per ton; good hays, 57s 6d to 62s 6d per ton; plain hays, 55s per ton; best clovers, 82s 6d per ton; good clovers, 77s 6d per ton; inferior clovers, 67s 6d to 75s per ton; best mixtures, 77s 6d per ton; good mixtures, 70s to 75s per ton; plain mixtures, 62s 6d to 67s 6d per ton; seconds hays, clovers, and mixtures, 40s to 53s per ton; wheat straw, 28s to 30s per load; barley straw, 28s to 30s per load; oat straw, 28s to 30s per load. All ex rail London. Foreign: Canadian mixture, 80s per ton; first quality Dutch hay, 62s 6d to 65s per ton; second quality Dutch hay, 53s to 60s per ton; New French first cut clover, 75s per ton. These prices are by the barge load delivered alongside wharf, London.

THE BALTIC.

The London Corn Trade Association quotes white Karachi wheat at 38s. per 492 lb, and red at 37s. 6d., arrived cargoes. For cargoes on passage the following prices have been made:—Australian, 38s. per 492 lb.; Blue Stem, 39s. per 500 lb.; Walla Walla, 38s. 3d. per 500 lb.; fine Russian winter, 40s. per 492 lb.; Odessa Ghirka, 38s. 6d. per 492 lb.; No. 1 Northern Manitoba, 38s. 6d. per 480 lb.; No. 1 Durum, 33s. per 480 lb.; and American red winter, 7s. 11d. per cental.

Maize cargoes have made 26s. 3d. per 480 lb. for Russian and 5s. 7d. per cental for American. For Argentine, 25s. 9d. per 480 lb. is asked, but buyers are not inclined to pay so much.

Barley is in large offer, and consequently buyers have a little the best of the market, 23s. 6d. being accepted for Indian, 21s. 6d. for Persian, and 22s. 6d. for Russian on passage. These prices are for 400 lb. grinding barley in every case. No trade is as yet doing in malting or brewing types.

Other cargo sales of the week have included White Libau oats at 16s. per 304 lb. for December shipment, and La Plata oats at 16s. 3d. per 304 lb. for February shipment. A cargo of Calcutta linseed made 44s. 3d. per 410 lb. on Saturday, and one of Egyptian cottonseed realised £7 per ton; the first was an arrival, the second a contract to ship in December.

The arrivals of grain and seed laden vessels at ports of call for the week were—1 wheat (Adelaide).

The sailings of grain and seed laden vessels from ports of call for the week were—9 wheat (1 Antwerp, 1 Belfast, 1 Birkenhead, 2 Dublin, 1 Gloucester, 1 Hull, 1 Limerick, and 1 Plymouth).

Since January 1, 1907, the total arrivals have been 223 wheat, 1 flour and wheat, 3 barley and wheat, 6 barley, 15 maize, and 15 linseed—total 263.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English steady, quiet. Foreign dull, and 6d to 1s easier, but no pressure to sell. No. 1 Northern Manitoba ex ship, held at 40s; No. 2 at 38s 6d to 39s; choice white Karachi at 37s 6d to 38s; South Russian, landed, at 39s to 40s; Persian at 38s; La Plata, 39s 6d to 40s. Flour steady, unchanged. Hungarian held at 37s to 38s; Iron Dukes at 24s 6d to 25s. Maize dull, easier tendency. River Plate, landed, held at 25s 9d to 26s; Odessa, ex ship, at 24s 9d to 25s; Galatz Foxanian, ex ship, 25s 3d to 25s 6d. Barley quiet, and 3d lower to sell. Azoff-Black Sea and Odessa-Nicolaieff, exship, held at 23s 3d; Persian, 23s to 23s 6d. Oats steady, quiet. New white English quoted at 20s 6d to 21s 6d; new blacks, 20s to 21s; La Plata, 18s 3d to 18s 6d; South Russians, 38 lb, 18s to 18s 3d.

Mark Lane, Friday.—Wheat: English firm, with foreign rather steadier not active. No. 1 Northern, ex ship, quoted at 39s 9d to 40s, as to position; No. 2 at 39s; No. 1 Durum, ex ship, at 35s; choice white Karachi at 38s; red Karachi 37s 6d. Flour firm, quiet; Iron Dukes quoted at 24s 6d to 25s; Kansas patents, 28s 6d to 29s. Maize dull, easier tendency; River Plate, landed, quoted at 20s; Odessa at 25s 9d to 26s 3d; Gal.-Fox., ex ship, to arrive, at 25s 6d. Barley firm, quiet; Azoff-Black Sea and Odessa-Nicolaieff, ex ship, quoted at 23s 6d. Oats firm, and in sellers' favour; La Plata quoted at 8s 6d; South Russains (38 lb), 18s 3d.

COUNTRY.

Ashford, Tuesday.—The market was very firm, especially for wheat and oats, but many wheat samples were out of condition. New barleys also sold well. There was no change in flour, but trade was firm. Wheats made, 34s to 35s; barleys, old, 28s to 30s; new, 26s to 30s; foreign grinding barley, 25s to 27s; new oats, 16s to 21s; Mazagan beans, 30s to 31s; tick beans, 34s to 36s; maize, 26s 6d to 27s 6d; new peas, 30s to 31s.

Banbury, Thursday.—Wheat, white (new), 31s to 32s per qr; ditto (old), 33s to 34s per qr; wheat, red (new), 31s to 32s per qr; ditto (old), 33s to 34s per qr; barley, 27s to 38s per qr; beans (old), 32s to 33s per qr; oats (old), 21s 6d to 26s per qr; peas (old), 31s to 36s per qr.

Berwick, Saturday.—A slightly larger attendance. A considerable quantity of new barley on offer, which met a brisk demand. No new oats or wheat. Prices:—Barley, 27s 6d to 31s per qr.; old oats, 26s to 27s.

Birmingham, Thursday.—Small attendance. The demand for wheat this week is much quieter, although prices on the week are 6d up. Several lots of new English wheats in dealers' hands, for which 13s per 186 lb delivered is asked, condition improving on first samples. New oats make 19s per 312 lb delivered. Old beans 13s 6d per 196 lb. A good demand continues for feeding stuffs, all kinds of maize being 3d per qr dearer than last week. Grinding barley is again moving steadily upwards, the price being from 24s to 24s 6d per 400 lb at Sharpness.

Brighton, Thursday. — Small attendance. There was no old wheat on sale, and very little new. Oats and barley were very firm at last week's prices. New wheat, 32s to 34s per 504 lb; barley, 27s to 30s; grinding ditto, 24 to 26s; oats, English, 18s 6d to 20s; maize, 27s 6d to 28s 6d; flour, 28s to 32s.

Bristol, Thursday.—New English wheat still scantily offered, last week's full prices being easily obtainable. Foreign wheat has declined slightly, but still maintains a very firm undertone. Maize strong and unchanged. Barley 1s dearer, and very scarce on spot; old oats 6d to 9d dearer; new oats unaltered; flour firm at recent values.—Grace Bros.

Bury St. Edmunds, Wednesday.—A small supply of wheat; some in fair condition, and some decidedly damp. Prices were unchanged at 32s to 33s for fair reds, and 31s for damp parcels. Oats and grinding barley firm, and in some cases dearer. Maize 6d per qr dearer on the week, at 27s to 27s 6d per qr delivered. Feeding stuffs all very firm at last week's full prices.

Canterbury, Saturday.—There was a larger supply on offer, and a little improvement in the condition of wheat; good dry samples sold from 31s to 34s 6d. The demand for malting barley has now opened, and there was a good inquiry, at from 28s to 32s per qr. Oats are limited in supply and firm in value, 42 lb black winters being worth 20s, and 42 lb whites about 19s, 44 lb whites 20s, and grey peas from 30s to 30s 6d per qr.

Carlisle, Saturday.—Very small supply at our market to-day; farmers busy cutting new oats. Good demand at full prices, 24s to 24s 9d per 336 lb. Several hand samples of new oats offering at 20s per 336 lb.—Thomas Robinson.

Chester, Saturday.—New samples of grain are commencing to make their appearance, and the quality so far is fair. Old grain in few hands, and holders command full rates. Feeding stuffs continue to advance, and there is a good demand. Thirds 6d per sack, and bran 3d per sack dearer. Indian corn 3d to 6d dearer. Quotations: oats, new, 2s 7d to 2s 8d; old, 3s to 3s 6d per 46 lb; Indian corn, old, 14s 6d to 15s per 240 lb.

Chichester, Wednesday.—A good attendance, but not a great deal of trade, and very little on offer. New white wheat, 33s to 34s; new red ditto, 33s to 34s; barley, 28s; grinding ditto, 24s to 25s; oats, English, 18s to 22s; rye, 26s to 28s; peas, 30s to 32s; beans, 31s to 33s; tares, 5s 6d to 6s 6d; maize, 23s 9d to 25s 6d; flour, 29s to 31s.

Colchester, Saturday.—Small supply, various quality. Wheat, 32s to 34s. Oats, 18s to 19s 6d. Barley, 27s to 28s 6d.—Colin Taylor, King and Co., Ltd.

Coventry, Friday.—Small attendance. Good supply of wheat at last week's prices. Quotations: Wheat, 12s 9d to 13s 6d per 186 lb; barley, 30s to 34s per 448 lb; peas, 12s to 14s; beans, 13s to 13s 9d per 196 lb; oats, old, 24s 6d to 27s per 352 lb.; new, 20s to 22s.

Derby, Friday.—New corn was in larger supply, and a moderate amount of business was done. Quotations: White wheat, 36s to 37s; new red, 33s to 35s; grinding barley, 23s to 25s; beans, 35s to 37s; old oats, 24s to 26s; new, 18s to 20s.

Doncaster, Saturday.—English wheat backward in being threshed, and no local grain offered. A few samples from the south made 35s to 36s per qr delivered. Maize unchanged. A few new oats offered, but prices very irregular, and not quotable. Market thinly attended and very quiet.

Dorchester, Saturday. — Considering that many were kept away from market to-day by the brilliant weather prevailing, which enabled the more belated to push forward with their harvesting operations, there was a fairly good attendance at to-day's corn market, and a much larger display of new samples, which the fine weather of the past week had been very helpful in getting into greatly improved condition, much of the wheat having lost the softness of character, which proved such a drawback to sales in the earlier parcels shown. Holders showed no great anxiety, in the absence of anything definite as to prices being arrived at, to sell except on their own terms, which were somewhat beyond buyers' ideas, and quite up to those ruling at the previous market, even if not in advance, and no great amount of business resulted. Barley and oats were both characterised by similar firmness, and generally we must prove rates fully as high if not in advance of the previous market, and this firmness generally applied all round.

Glasgow, Wednesday.—Wheat the turn dearer, and prices are 3d to 6d per boll up on the week. Flour steady at 1s per sack advance since last Wednesday. Maize firm, but prices are 3d per boll dearer over the week. Corn very scarce on spot, and to-day's prices show an advance of 6d per boll. Barley firmly held at late rates. Oats quiet, but steady. Beans and pease firm. Bran steady at 2s 6d per ton advance. Thirds unaltered. Oatmeal unchanged, with trade slow. Other articles unaltered.—Gibson and Clark.

Glasgow, Friday.—Wheat the turn dearer. Flour firm, at late rates. Maize and corn steady and shaping dearer. Oats keep their price. Barley quoted higher. Beans and peas quiet. Other articles nominally unaltered.

Gloucester, Saturday.—Practically no old English wheat; new, 32s to 33s per qr. Plates wheat unchanged, at 39s 6d to 40s; Russian, 6d dearer, at 38s 6d to 40s. Maize unchanged. Plate at 25s 9d; flat, 26s; Bessarabian, 26s. Barley unchanged, 23s 9d to 24s. New oats 6d dearer: New, 18s 6d to 19s; old, 23s 6d to 24s per qr.

Grantham, Saturday.—A fair show of new grain, but prices as yet are variable. The following, however, were the quotations generally:—Wheat, 31s to 33s; barley, 26s to 30s; oats, 17s 6d to 19s; peas, 55s to 70s.

Hereford, Wednesday.—There were practically no farmers on the market, and therefore nothing doing in English grain. New English wheat remained nominally unchanged at about 4s for dry samples, while those in indifferent condition were quoted at 3s 9d to 3s 10d per bushel. No barley offering. New Englis oats met with a ready sale at 18s per qr. Quotations:—Wheat, old, 4s 3d to 4s 6d per 62 lb; new, 3s 10d to 4s 3d; barley, 3s 6d to 4s per 56 lb; oats, old, 2s 9d to 3s 3d per 40 lb; new, 2s 3d to 2s 6d per 40 lb; beans, 4s to 4s 6d per 65½ lb; maize, 3s 4d to 3s 8d per 60 lb.

Ipswich, Tuesday.—Moderate supply of new wheat; trade steady at late rates. Out of condition lots about 31s per qr, hard up to 34s. Grinding barley firm. Oats steady. Maize unaltered. Beans and peas firm.

Leeds, Tuesday.—Fine weather has favoured the harvest since Thursday, and the new wheats offering show better condition. There has been an active trade in wheat since last Tuesday, both speculative and consumptive, and prices are fully 1s per qr dearer, the finer weather to-day slightly checking demand. Shipments continue moderate, offers for shipment scarce, and at limits quite above the level of values on this side, so that the tone remains very strong. Maize 1s per qr dearer. Beans and oats quiet. Flour has been advanced 1s per sack.—Dunns and Co.

Leeds, Friday.—With another week's favourable harvest weather, and English wheats better in quantity and quality than had been anticipated, prices showed no further advance. Foreign wheats were firm at late advances. Flour was firmly held at Tuesday's full rates. Maize had a hardening tendency, Plate making 25s 6d and Odessa 25s. Odd foreign malting barley was the turn dearer. Beans, peas, and lentils unchanged.

Leicester, Saturday.—Moderate attendance of buyers and dealers, with very small supplies of new wheats from early districts. Trade ruled steady at 33s to 35s per 36 stones. No old wheat offering. Barley a short supply, and sold freely at 27s to 30s per 32 stones; new oats a quiet trade at 19s to 21s per 24 stones. Flour advanced to 28s, 31s, and 33s per 280 lb.

Lincoln, Friday.—Although the week has been so favourable for harvesting, few samples of English wheat came to hand, but these were in tolerably good condition as a rule, and made up to 34s per qr delivered. A few samples of barley were offered, but maltsters are not yet buying, and prices cannot be fixed. Oats firm, 18s to 19s 6d per qr. No beans showing.

Manchester, Thursday.—Attendance was comparatively small; finer weather has checked buying to some extent. English wheat offering at full rates, quality and yield better than expected; foreign easier. Flour unchanged. Indian corn easier, not obtaining the advances noted during the week. Beans and peas firm, English registering rather higher prices. Oats in smaller demand, and, if anything, lower. Bran and offals firm and scarce.

Newark, Wednesday.—A small attendance, farmers being busy with the harvest. A few samples of new grain showing; old corn firm; new easier to buy. Old wheat, 37s to 38s; new wheat, 33s to 34s. Malting barley, 29s to 30s; grinding, 26s to 27s. Old oats, 24s to 25s; new oats, 18s to 19s. Old beans, 35s to 36s per qr.

Newcastle-on-Tyne, Saturday. — Only a moderate demand for wheat at our market to-day at last Saturday's quotations. Meantime all qualities are very firm at fully 6d per qr advance on the week; a steady trade for fine old oats at fully late quotations. New qualities slightly in favour of the buyers. Beans and peas are scarce, and consequently dearer. No barley on offer.—Pollard and Co.

Newport, Wednesday.—There was an average attendance. Business was brisk, and prices were firm. Round and flat maize was 6d per qr dearer; barley 1s dearer; beans, 6d advance; flour, fines, 29s per sack.

Northampton, Saturday.—Meagre supply of new corn and also small attendance of farmers. Prices still remain firm and almost unchanged from last week:—Wheat, 34s to 35s; barley, 28s to 30s; white oats, 23s to 24s; black oats, 23s 6d to 24s 6d; beans, 31s to 33s; peas, 30s to 32s; flour, 28s to 32s. New: Wheat, 30s to 32s; barley, 25s to 30s; oats, 18s to 20s.

Norwich, Saturday.—There was a fair attendance at the market, but not much wheat on offer. The quality still varies considerably, prices for best quality delivered being 32s and 33s per qr. Owing to the harvest there is a very quiet demand for feeding stuffs, but prices remain firm.

Nottingham, Saturday.—Small show of new corn, with a fair demand at last week's prices. New wheat, 33s 6d to 34s; oats, 18s 6d to 20s; barley, 26s to 28s.—Robt. Hubble.

Peterborough, Saturday.—We have had a perfect week for harvest work, and great progress has been made. Only a fair supply of wheat at market to-day, which found buyers at from 32s to 33s. Barley trade steady, making from 26s to 32s. Oats, 17s 6d to 18s 6d.—Thomas Hill and Son.

Preston, Saturday.—A fairly good business has been done during the week at slightly reduced prices. To-day's market was poorly attended, and practically nothing was offering. A few samples of new oats were forward, but no new wheat. Flour unchanged. Quotations:—Wheat, white, new, per windle of 220 lb., 14s to 15s; ditto red, 13s 9d to 14s 6d; oats, old, per bushel, 3s 6d to 3s 8d; ditso, new, 2s 11d to 3s; oatmeal, per load, of 240 lb, 27s 6d to 28s; beans, per windle of 220 lb, 16s 6d to 17s; bran, 12s to 12s 6d.

Reading, Saturday.—The attendance was

per, farmers not having completed harvest operations. Prices:—Old wheat, 37s to 39s; new, 33s 6d to 36s; winter barley, very dry for feeding purposes, 25s to 29s; grey winter oats, 40 lb bushel, 17s 6d; Garton oats, 42 lb bushel, 19s 6d; rye, 22s to 27s; tares, 6s 3d to 7s 6d per bushel.

Retford, Saturday.—Not many samples of new grain on offer. There were, however, a few lots of new wheat, those in good condition making 32s to 33s 6d, damp and inferior 30s to 31s, and old (of which there was scarcely any offered) 37s per qr. Malting barley was quoted at 26s to 29s; new white oats, 18s to 19s; black winters, 18s to 18s 6d; old oats, 26s; maize, 27s 6d; old English beans, 36s per qr.

Ripon, Thursday.—A good attendance of farmers, but only a light trade. English wheat and maize show an upward tendency. No new samples showing. Prices:—Wheat, 36s to 37s; ditto foreign, 38s to 41s; barley, grinding, 27s to 28s; oats, 24s to 26s; maize, round, 27s to 27s 6d; ditto, flat, 27s to 28s per qr.

Sheffield, Tuesday.—There was little new corn on the market, farmers taking advantage of the fine weather. Foreign wheats were quoted at 1s more than last Tuesday's prices. Maize, both flat and round, is quoted at 9d per qr advance. Prices of beans, oats, and barley respeated. Quotations:—Wheat, white, new, 37s to 37s 6d; ditto red, new, 37s to 37s 6d per 504 lb; oats, black, 24s to 25s; ditto white, 24s 6d to 25s per 336 lb; peas, grinding, 34s to 34s 6d; ditto blue, 75s to 90s per 504 lb; beans, English, 36s 9d to 37s per 532 lb; barley, grinding, 27s 6d to 28s; ditto malting, 28s to 32s per 448 lb; Indian corn, small, 26s 9d to 27s; ditto Plate, 26s 9d to 27s; ditto flat, 29s to 29s 6d per 480 lb.

Stamford, Friday.—Business was brisker, supplies of new corn being available. A good quantity of new wheat was offered at 32s to 32s 6d per qr. The supply of new barley was scarcely sufficient to adequately test values. White oats, 18s to 18s 6d; black winter oats, 18s per qr. Few peas and beans were offered.

Stockton, Wednesday. — There was no local wheat showing. Owing to the brilliant weather the demand for foreign wheat is quiet, and there was no change in price on the week. Maize 1s dearer on the week. Oats 6d higher.

Tunbridge Wells, Friday. — New white wheat, 34s to 35s; new red ditto, 33s to 33s 6d; old white ditto, 32s to 33s; old red ditto, 31s to 32s; barley, 25s to 32s; grinding ditto, 23s to 25s; oats, English, 18s to 24s; rye, 24s to 25s; peas, 32s to 37s; beans, 32s to 37s; tares, 42s to 48s; maize, 24s to 27s.

Wisbech, Saturday.—After a week of brilliant harvest weather we have a fair sprinkling of samples of the new crop offering, mostly in good condition. Wheat varies in quality. Best dry lots make 33s to 34s; secondary, 31s to 32s per 504 lb. Oats 18s to 18s 6d per 336 lb. Barley, 25s to 28s per 448 lb.—James Fletcher.

York, Saturday.—Old grain is exhausted, and as farmers are busy harvesting, very few samples of the new crop were on offer. Dry lots made 33s to 34s per qr of 36 stones. A few samples of new barley on sale at from 28s to 30s per qr of 32 stones; feeding sorts, 25s to 27s; new white, 19s to 20s; black, 18s to 19s per qr. of 24 stones. New rye, 25s to 26s; old beans, 33s to 34s per qr of 36 stones.

FEEDING STUFFS.

Liverpool, Friday.—Fertilisers are without change. For feeding stuffs there is a good inquiry at the late advance, and the market is firm and tends upwards.

—H. Jones Langar and Co.

Mark Lane, Monday. — Linseed Cake. — There is a continued absence of any consumptive demand, probably owing to the fact that farmers are still busy harvesting; at the same time country dealers in anticipation of higher rates, are more inclined to go into stocks, while in forward positions a substantial advance is demanded. Russians sell quietly at last Monday's prices. East India seed pures remain scarce and relatively dear. Fine seedy Calcuttas are fully 5s per ton higher on the week. London made pures command rather more attention and have a further hardening tendency. Cotton Cake. —The market is practically bare of stocks of Egyptian, but for early arrival there are sellers at £4 18s 9d to £5, while English are firm but without change, as also are Bombays. Decorticated London made pures are in good request at 2s 6d advance, but American brands of cake and meal continue a dragging trade. Rape Cakes do not offer. Maize Germ Meal.—White American is not available at the Moment, and English is quoted at prohibitive prices. Maize Gluten Meal finds a ready sale. Rice Meal.—Landed lots of Rangoon have now all been cleared, and shippers ask £5 5s. ex ship terms for steamer parcels to come along. Locust Beans are without alteration. Dried Brewers' Grains make full prices both for mixed ale and porter and ale. Nitrate of Soda is dull of sale and slightly easier forward.

—Pinnock Bros., 30, Mark Lane, E.C.

London, Monday.—Linseed Cake: With the seed market strengthening and shortage of foreign supplies, home prices have advanced prices another 2s. 6d. to 5s. per ton.

Cotton Cake: There are hardly any stocks of Egyptian made remaining, and English are selling at 1s 3d to 2s 6d more money on the week.

Linseed: The market closes, steady with a fair trade doing in the feeding sorts.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Trade generally brisk, with ample supplies on offer. Quotations for English produce:—Apples, 2s 6d to 10s per bushel; pears (English hazels), 3s to 4s; ditto (Bergamots), 4s to 5s per bushel; ditto (Williams), 2s to 4s per half bushel; peaches, 3s to 15s per dozen; green figs, 1s to 3s; nectarines, 2s 6d to 12s per dozen; pineapples, 2s 6d to 4s each; melons, 9d to 2s; grapes, 6d to 3s; plums, 1s to 1s 9d; damsons, 1s to 1s 6d per half sieve; tomatoes, 2s 9d to 3s 6d; cobnuts, 3s to 4s; filberts, 2s 6d to 3s per 12 lb; horseradish, 12s to 15s per dozen bundles; cucumbers, 4s to 5s 6d per flat; endive, 1s 3d to 1s 6d per dozen; cos lettuce, 6d to 8d per score; cauliflowers, 4s to 5s 6d; marrows, 2s 6d to 3s 6d; cabbages, 2s 6d to 3s per tally; onions, 1s to 1s 6d per dozen bunches; green peas, 2s to 4s; scarlet runners, 1s 6d to 2s per bushel; mint, 1s to 1s 3d; parsley, 1s 6d to 2s 6d; turnips, 1s 6d to 2s 6d; carrots, 1s 6d to 2s; beetroots, 1s 6d per dozen bunches; mushrooms, 8s to 12s per 12 lb; celery, 8d to 1s per bundle; potatoes, 60s to 75s per ton.

POULTRY AND GAME.

Smithfield, Saturday.—Fairly good supply and demand. Prices: Surrey fowls, 3s to 3s 6d; Sussex fowls, 2s 6d to 3s; Lincolnshire fowls, 2s to 2s 9d; Essex fowls, 2s to 2s 6d; Irish fowls, 1s 4d to 1s 9d; geese, 5s to 6s 6d; country ducks, 2s to 2s 9d; Aylesbury ducks, 2s to 2s 6d; wild ducks, 1s 2d to 1s 4d; quails, 8d to 1s; feathered pigeons, 8d to 9d; Bordeaux pigeons, 10d to 1s 1d; English hares, 2s 6d to 2s 9d; Scottish hares, 1s 4d to 1s 6d; tame rabbits, 1s 2d to 1s 6d; wild rabbits, 6d to 9d; live hens, 1s 9d to 2s each; Australian rabbits, 5s 6d to 6s 6d per doz; young partridges, 4s 6d to 5s 6d; old, 2s to 2s 3d; young grouse, 5s to 6s; old, 2s 4d; black game, 3s per brace.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter.—The demand for Colonial butter has improved, and prices have advanced from 1s to 2s per cwt. on the week. Arrivals have, however, been small. Foreign butter is meeting a better demand, but supplies have been small for the last month, and prices are about 10s per cwt. below those of last year. The official quotation of Danish was yesterday raised 4s 6d per cwt, but French and Russian remain unchanged. Cheese.—Demand continues to be on a scale to meet only present requirements, and no speculative element can be detected. Prices on spot are firm, and c.i.f. quotations from Canada are higher. Appearances indicate that for the present it will strain the position to force values any higher.—W. Weddel and Co.

CHEESE.

Glasgow, Wednesday.—There were moderate arrivals of home cheese. The demand was fair at last week's prices. Buyers were not responding to the extreme prices asked for some lots. Cheddars, 58s to 62s per cwt; Dunlops, 56s to 60s; Canadian parcels firmer, with a moderate trade passing from 59s to 60s.

Highbridge, Tuesday.—There were 35 tons of cheese pitched and all was cleared, there being a brisk sale. Best Caerphilly dairies realised up to 58s per cwt.; secondary dairies, 54s to 56s 6d; and other dairies, 49s to 52s. A few inferior lots failed to reach 45s. Cheddars, 54s to 57s 6d; truckles, 53s to 56s 6d; doubles, 50s to 51s 6d.

Newport, Wednesday.—About 10 tons were pitched. There was a good attendance and a fair demand. Quotations:—Caerphillies, 45s to 56s per cwt; fancy dairies, 57s to 60s; Derbys, 59s to 60s; truckles, 50s to 60s; singles, 59s to 60s; Cheddars, 56s to 58s.

WOOL.

London, Saturday.—English—per pk. of 240 lb.—Fleeces, South Down hoggs, £14 10s to £15; half-bred hoggs, £13 to £13 10s; ditto wethers, £12 10s to £13; Kent fleeces, £12 5s to £12 10s; South Down ewes and wethers, £13 10s to £14; Leicester ewes and wethers, £12 to £12 10s. Colonial—per lb.—Vic., scoured super., 2s 2d to 2s 3d; scoured, good, 1s 11½d to 2s 1d; scoured, average, 1s 10d to 1s 11d; greasy, average to fair, 1s 1½d to 1s 2½d; N.S.W., scoured, average, 1s 9½d to 1s 10½d; greasy, average, 1s to 1s 1d; S. Aus., greasy, average, 10d to 11d; N.Z., scoured, average, 1s 10d to 1s 11d; greasy, average, 11d to 11½d; Cape, scoured, super., 1s 9½d to 1s 10½d; fleece, average, 9½d to 10½d; greasy, average, 8½d to 9½d; Natal, scoured, 1s 5½d to 1s 6½d; greasy average, 8½d to 9d. Crossbreds—grs.—Vic., good to super., 1s 3½d to 1s 4½d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s to 1s 1d coarse, 10d to 11d.

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, Monday, 3 P.M.

English wheat to-day is in good request, many of the new samples being much more dry than had been anticipated. The quality is fair, not up to that of a year ago, but at the same time not nearly so inferior as in later August had been apprehended. Foreign wheat is very dear, and importers are making a handsome profit.

Millers must have a proportion of dry foreign rich in gluten to mix with new English, and the firms which have had the foresight enabling them to meet this need are reaping their just reward. Barley favours buyers of cheap feeding sorts; in other types scarcely any business is yet doing.

Oats are in good supply of new English, which are a better average sample than had been looked for. Foreign oats are steady, but do not sell as freely as the English. Maize is still dear, and beans and peas are inclined to be a little dearer on the week. Buckwheat sells well.

CLOSE OF THE MARKET.

THE MARKET CLOSED FIRMLY FOR OATS. OTHER STAPLES NOT ALTERED FROM PREVIOUS REPORT.

THE FLOUR TRADE.

MARK LANE, Monday, 3 P.M.

The rise of 2s. per sack on top-price flour was justified by the dearness of Hungarian and Town Whites. Nevertheless 34s. for best London flour against 29s. a year ago is bound to attract attention, and bakers are resisting millers' demands with some spirit. This, the prolongation of the holidays and fine weather, with its reduction of retail demand, enables them to do for the time being, but with very little foreign flour on passage, the home millers are in the enjoyment of an intrinsically strong position. Household flour has settled down into a big non-speculative business at 28s. cash. Country flour is not in much request pending deliveries of the new wheat crop. American flour is 1s. dearer on the week, and French is also dearer. Hungarian is so high already that further advance was not to be thought of. Milling offals are not quite so dear as they were a week ago, but they are still a great deal higher than suits either live stock breeders or owners of poultry.

TERM MARKET.

A week of some speculative excitement closed quietly. To-day the futures market opens with the following calls, all prices being, as usual, per cental (100 lb.), and no article being quoted except where 1,000 centals have been sold.

Red, American, 7s. 9d., per cental, Oct and Nov. delivery.

,, ,, 7s. 10d. ,, Dec. ,,

,, ,, 7s. 11d. ,, 1908 ,,

Mixed American maize, 5s 7d. per cental. Oct. and Nov. delivery.

There is no speculative offering of new American maize as yet. The crop is secured in October, but is not ripe to ship until later December.

THE BALTIC.

Monday, 1 P.M.

State of Trade.

Cargoes of wheat, maize, oats, and linseed, open in sellers' favour, while with respect to cargoes of barley and cottonseed the reverse is the case. Cargoes of rapeseed, beans, peas, and bart, are firm. "Parcels" of foreign oilcakes are dearer.

Business Done.

Wheat.—Argentine, 38s 9d per 480 lb, on passage; Blue Stem, 39s per 500 lb, on passage; Australian, 38s 6d per 480 lb, on passage; Western Red Winter, 37s per 480 lb, October shipment; White Karachi, 38s per 492 lb, October shipment; Red Karachi, 37s 6d per 492 lb, October shipment; Best Manitoba, 39s per 480 lb, October shipment; Best Russian, 41s 6d per 592 lb, October shipment.

Barley.—Odessa, 22s 6d per 400 lb, October shipment; Karachi, 23s 6d per 400 lb, October shipment.

Oats.—Riga 16s 6d per 304 lb, October shipment; Soueh Russian, 16s 9d per 304 lb, October shipmen.

Maize.—Galatz, 26s 6d per 480 lb, October shipment; Argentine, 25s 6d per 480 lb, October shipment; American, 25s 9d per 480 lb, October shipment; Bessarabian, 26s 3d per 480 lb, October shipment.

Linseed.—Argentine, 43s 6d per 416 lb, arrived Duluth, 43s 9d per 416 lb, November shipment.

Rapeseed.—Jamba, 42s per 416 lb, October shipment; Ferozepore, 53s per 416 lb, February shipment.

Cottoneed.—Egyptian, £8 per 2,240 lb, arrived Bombay, £5 17s 6d per 2,240 lb, February shipment.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour.—The market during the week continued strong, and yesterday local millers advanced prices 6d per sack. Grain.—American corn is very scarce. Maize is plentiful, but held for full prices. Foreign oats quiet. New English oats are offered at lower prices. Beans 1s per boll dearer. Pease steady. Oatmeal unchanged. Oilcake in sellers' favour. Mill Stuffs.—Mills are behind with orders for thirds. Bran, good demand. Winter wheat patents, 28s 6d to 29s per 280 lb; spring wheat patents, 29s to 30s per 280 lb; American corn, 15s 10½d to 16s per 280 lb; round corn, 15s 4½d to 15s 6d per 280 lb; grinding beans, 8s 9d to 19s per 280 lb; white pease, 19s to 20s per 280 lb; broad bran, 112s 6d per ton; medium bran, 105s to 107s 6d per ton; fine thirds, 135s per ton; common thirds, 112s 6d per ton; American oilcake, 147s 6d to 150s per ton.—McKinnon and McDonald (Glasgow).

Offals.—Bran continues in good demand, and prices decidedly firmer. — Greenhill Bros. (Belfast).

Flour.—The demand has been rather quieter during the past few days, and in some instances there has been a slight decline in prices.—Greenhill Bros. (Belfast).

Milling Offal.—All offal continues to remain firm; last week's prices still obtainable. Deliveries from mill still very slow.—John Bawcomb and Co.

Flour.—Trade to-day has been quiet, but firm, and prices show no change since this day week.—F. L. Medill and Sons, Ltd.

Our market is steady for wheat. English is in better supply and improved condition, and arrivals of foreign are moderate. Manitobas are 3d to 6d higher. Flour firm and unchanged. Oats are firm and 6d up on the week. Maize and barley unchanged.—Coventry and Sheppard.

HOPS.

Worcester, Saturday.—There was an increased attendance of growers offering hops, but the business done was very small, both growers and merchants preferring to wait for the fair next Thursday. Most of the samples shown were "earlies," but there were some choice lots of Bramblings and Fuggles. These last were held for high figures, but commoner sorts were in little request. The cold nights and hot sun have caused some of the hops to ripen prematurely and lose colour.—Charles Faram and Co.

Borough, Monday.—The week opens with a considerable enquiry for the new English growth, the market is now supplied with a good selection of the new crop from all districts, and the better class hops that are now coming to hand show in most instances grand quality. From all parts we hear that the crop is coming down considerably less than the most conservative estimates, in some cases as much as 33 per cent. less than what they were put at by experts three weeks since.—W. H. and H. Le May.

HAY AND STRAW.

Birmingham, Friday.—Small supply; trade quiet. Quotations:—Old hay, £4 2s 6d per ton; new hay, £3 7s 6d per ton; straw, no quotations.

Derby, Friday.—Quotations:—Best old clover, 90s to 100s; new ditto, 80s to 90s; best old hay, 90s to 100s; new ditto, 80s to 90s; second ditto, 65s to 70s; wheat straw, 60s to 70s; pressed ditto, 55s to 60s; chop ditto, 55s to 65s; peat moss, 35s to 40s.

Halifax, Saturday.—The market, though still not very active, is exhibiting a better tone, while values are either still very firm or further advancing.

Hereford, Wednesday.—Hay and straw met a very slack trade, with a slightly lower tendency in values. New straw from 20s to 31s per ton, old straw from 25s to 35s; new hay from 40s to 50s per ton in stack, old hay from 50s to 60s. in stack.

Lancaster, Saturday.—Meadow hay, 6d; clover, 6½d; wheat straw, 4d; oat straw, 4d per stone.

Leeds, Tuesday.—The supply of old is diminishing, and prices rule firm. New hay is coming on the market in variable condition Quotations:—Old clover hay, 7½d; ditto meadow hay, 7d; wheat straw, 5d; oat straw, 5d; and rye-straw (retail), 7d to 8½d per stone; green clover, 3½d per bundle.

Lincoln, Friday.—Large supplies of new hay, which made 60s; seeds 55s to 60s; straw, old, 35s per ton on the ground.

Manchester, Friday.—Hay, old, 5½l; new 5l; clover, old, 7½d; new, 5½d to 6½d; straw oat, 3½d to 4½d per stone.

Newcastle, Tuesday.—There were forty-one carts of hay and seven carts of straw at market. Old land hay, £4 10s to £4 12s 6d per ton; new land hay, £5 to £5 2s 6d; this year's growth, £4 5s to £4 7s 6d; wheat straw, £1 3s to £1 5s per load; oat straw, £1 2s.

Nottingham, Wednesday.—Large supply, which met with a slow sale except for best qualities. Quotations:—Inferior to good hay, 50s to 65s; prime ditto, 75s to 85s; inferior to good clover, 60s to 70s; prime ditto, 75s to 85s; wheat straw, 45s to 55s; old hay, 90s to 100s; old seeds, 95s to 105s per ton.

Sheffield, Tuesday.—A small supply. Business was very quiet. Small attendance of farmers and dealers. Choice old seeds, £5 to £5 5s; ditto hay, £4 to £4 10s; straw, £2 15s to £3 per ton.

Whitechapel, Saturday.—A large quantity offered met slow support at recent rates:—Best clover, 84s to 95s; inferior, 72s to 80s; specially picked hay, 87s; good, 76s to 85s; inferior, 65s to 70s; mixture and sainfoin, 77s 6d to 87s 6d; straw, 28s to 34s per load.

POTATOES.

Borough, Saturday.—A fair supply was in quiet request. Early Puritans, 70s to 75s; Epicures, 60s to 65s; silts, 65s to 70s; Blacklands, 60s per ton.

Berwick, Saturday.—Few potatoes are yet being lifted, but those put forward are selling satisfactorily 65s per ton.

Carlisle, Saturday.—Fair supply and a good sale at 7d to 8d per stone.

Doncaster, Saturday.—Only a moderate supply, but a good demand, and prices firm at 3s 6d to 3s 9d per cwt

Lancaster, Saturday.—Good supply but a dead trade. Wholesale, 11s per load; retail, 10d per stone.

Malton, Saturday.—Potatoes in good supply. Trade mainly retail at 6d per stone.

Manchester, Saturday.—Potatoes: Cheshire, 8s 6d to 9s 6d; Bedford, 4s to 5s 6d; Norfolk, 4s to 5s 6d per cwt.

Preston, Saturday.—Potatoes, 10s 6d to 11s per load, an increase of 1s per load on the week.

Retford, Saturday.—Potato market was well supplied, and best lots of home-grown made 7s to 7s 6d per load.

Spitalfields, Saturday.—A good demand prevailed for the small offerings. Sharp's Express, 70s to 75s; Epicures, 70s; and Blacklands, 65s to 70s.

Stockton, Wednesday.—Potatoes £4 to £4 5s per ton.

Whitby, Saturday.—Potatoes, 1s per stone.

York, Saturday.—Supply was comparatively small, but a steady trade was done at 57s 6d to 62s 6d per ton.

TO-DAY'S MARKETS.

CATTLE.

Metropolitan Market, Islington.

	Monday, Sept. 16, 1907. British.	Total.	Monday, Sept. 17, 1906.
Beasts	970	970	1,080
Sheep and Lambs	4,840	4,840	5,310
Calves	10	10	10
Pigs	—	—	—
Milch Cows	40	40	60

Quotations per 8 lb. (sinking the offal).

ENGLISH.	Inferior.	Second.	First.
	s. d.	s. d.	s. d.
Beasts	2 10	3 10	4 10
Sheep	3 10	5 4	6 2
Lambs	4 10	5 6	6 8
Calves	—	—	—
Pigs	—	—	—

Milch cows, per head, £16 to £22 10s.

British arrivals include as follows:—Scotland, nil; Eastern Counties, 60; Midland, Home, and Western Counties, 781; Devon, 25; Ireland, 104.

We note to-day a decrease of 40 head in the number of beasts offered for sale compared with Monday last. Trade for both prime and second quality cattle ruled of a slightly firmer nature, occasionally an advance of 2d. per 8 lb. being both asked and obtained. The Irish arrivals consisted of 59 Dublins and 88 Waterfords, the former of which were quoted at 1d. per 8 lb. higher. No store cattle were included in the arrivals from that country. Fat cows and bulls met with a limited country demand, late rates governing all transactions. A clearance is not expected to be made in this part of the market to-day.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day.	Monday, Sept. 17, 1906.
	s d	s d
Scotch	—	4 4 to 4 6
Devons	4 8 to 4 10	4 4 to 4 6
Herefords	4 6 ex 4 8	4 2 to 4 4
Norfolks	—	—
Runts	4 2 to 4 4	4 0 to 4 2
Lincolns	3 10 to 4 0	3 8 to 3 10
Irish	4 2 to 4 4	—
Canadian	—	—
Fat cows	3 4 to 3 6	3 4 to 3 6

There was an increase of 110in the number of sheep and lambs penned compared with Monday last. For all descriptions of both wethers and ewes, trade opened and continued throughout the day of a brisker nature, sellers both asking and obtaining in most cases an advance of 2d per 8 lb. on late currencies. Irish and Scotch sheep were in larger numbers, for which late values governed all transactions. Lambs were slow of sale throughout the day at last Monday's prices. The supply included 300 Scotch, 1,021 Irish, and 212 from the Eastern Counties. A clearance is expected to be made.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

	To-day.	Monday, Sept. 17, 1906.
	s. d. s. d.	s. d. s. d.

Calf trade not worth noting or quoting.

No pigs on the market.

London (Central), Monday.—Trade slow for moderate consignments. Beef, English, 3s 6d to 3s 8d; Scotch, 4s to 4s 8d; American, 3s 4d to 3s 7d: refrigerated hindquarters, 3s 8d to 4s 2d. Mutton, English wethers, 4s to 4s 8d; ewes, 3s 4d to 3s 8d. Lambs, 4s 8d to 5s; Scotch tegs and wethers, 4s 8d to 5s; ewes, 3s 4d to 3s 8d. Veal, 3s 4d to 4s 8d. Pork, 3s 8d to 4s 2d per stone.

St Ives (Hunts) Monday.—Beasts, 186; sheep and lambs, 1,922; pigs, 496. Fat and store cattle fair; fat and store sheep in good demand; fat and store pigs a good trade. Prices: Beef, 7s 6d to 8s 6d; mutton, 8s 2d to 10s 6d; pork, 6s 9d to 7s 3d; milch cows, £14 to £21.

FOREIGN.

Deptford, Monday.—Beasts 1,035. To-day's supply consisted of 617 from the United States and 418 from Canada. Trade ruled of a slow nature, with a slight downward tendency in regard to value for the former. Besides the above, 600 Canadians were withheld from sale. The best States were quoted at from 4s 3d to 4s 4d ex 4s 5d; seconds, 4s 1d to 4s 3d; Canadians, 4s to 4s 2d; seconds, 3s 10d to 4s per 8 lb. (offal given in). On Saturday 1,474 beasts from the United States and 326 from Canada were offered for sale. Trade ruled of a slow nature at from 4s 3d to 4s 5d per 8 lb for the former, and 4s to 4s 2d for the latter.

Liverpool, Monday.—Supply of cattle slightly larger. Demand good, but prices reduced except for very best qualities. Sheep and lambs were shown in smaller numbers. Trade of firmer tone for nice quality of both, though prices were quotably little altered. Beef, 6½d to 5½d; mutton, 8½d to 6d; lamb, 8½d to 7d per lb.

OIL SEEDS.

Mark Lane, September 16.—Linseed, despite large arrivals, is 1s dearer; but cottonseed is rather lower on the week.

SEEDS.

Mark Lane, Monday.—There is little demand for trifolium; prices unchanged. Rape very firm; though high in price. Mustard now coming out s fine samples, big yield. Rye, good inquiry, price firm. Winter tares moving freely, prices favouring buyers. Peas open high; few parcels on offer yet; acreage large. New English trefoils offering find buyers; prices unchanged. In grasses, both Italian and Perennials higher.—John Picard and Co.

PROVISIONS.

London, Monday.—Bacon: The arrivals of bacon last week were:—From Ireland, 2,075 bales, and from foreign ports, 14,966 bales. The bacon market closed slightly steadier, with Quotations ranging:—Irish, 58s to 62s up to 66s; Danish, 56s to 60s up to 64s; Canadian, 54s to 56s up to 60s. Butter: Butter was a steady market. French, 92s to 100s; Danish, 113s to 116s; Russian, 89s to 98s; Irish, 88s to 107s; Victorian, 86s to 98s; New South Wales, 86s to 93s; Queensland, 86s to 100s; New Zealand, 96s to 108s. Lard.—Lard was a quiet steady market. Irish, 50s to 53s; Danish, 48s to 52s; American, 46s to 47s.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

For fat beasts of both prime and second quality trade was entirely confined to Monday, and for all descriptions was of an exceedingly slow nature; nevertheless, late currencies governed most transactions with regard to English cattle. Irish, on the other hand, met with a decline in value, the supply from that country consisting of 50 Dublins and 58 Waterfords. The consignments of English beasts consisted principally of grass-fed Herefords and runs from the Midland counties, with a slightly larger number of Devons, these latter commanding our top quotation. Fat butchering cows and bulls were in fair average supply, but met with a limited inquiry; last week's prices, however governed all transactions. On Thursday very few transactions were recorded; prices, however, remained the same.

At the Foreign Cattle Market, Deptford, no market was held on Monday, but on Wednesday and Saturday a larger number of beasts were offered for sale than on the previous week, from both the United States and Canada, the consignment from the latter country including some Ranch cattle. The total number of beasts offered for sale at both markets was 4,000 as against 3,490 during the previous week, consisting of 1,050 British (increase 80) and 3,010 foreign, the latter comprising 2,274 from the United States and 736 from Canada, these latter including 320 Ranch cattle. The following were the top rates obtaineed per 8 lb. (sinking the offal) :—90 stone Devons, 4s. 6d. to 4s. 8d.; 90 to 95 stone Herefords, 4s. 4d. to 4s. 6d.; 95 stone Runts, 4s. 2d. to 4s. 4d.; stone Shorthorns, 3s. 10d. to 4s.; 95 stone Irish, 4s. 1d. to 4s. 3d.; 90 stone States, 4s. 3d. to 4s. 5d.; 95 stone Canadians, 4s. to 4s. 1d.; ranchers, 3s. 4d. to 3s. 10d.; 90 stone fat cows, 3s. 4d 3s. 6d.

The sheep trade at Islington on both market days ruled of an exceedingly dull and dragging nature, however sellers were not willing to accept any decline on last week's values. Both Scotch and Irish descriptions shared in the poor trade, notwithstanding the supplies from the latter country being smaller; however, late currencies governed all transactions. Lambs were in fair average supply at late rates. No sheep were shown at Deptford. The total number penned at both markets was 5,390, as against 4,730 during the preceding week this showing a decrease of 820). Best pens made per 8 lb. as follows (offal given in) :—7½ to 8 stone Downs, 5s. 10d. to 6s.; 8 stone Scotch, 5s. 10d. to 6s.; 9 stone Downs, 5s. 8d. to 5s. 10d.; 10 stone Irish, 5s. 4d. to 5s. 6d.; 10 stone Downs, 5s. 6d to 5s. 8d.; 10 stone Halfbreds, 5s. 4d. to 5s. 6d.; 10 stone Down ewes, 4s. to 4s. 2d.; 5 stone fat Grass lambs, 6s. 6d. to 6s. 8d.; 6 stone Half-bred ditto, 6s. 2d to 6s. 4d.

Calves numbered 20, the best on offer being quoted at from 4s. 10d. to 5s. per 8 lb. offal given in.

No pigs on the market.

Trade in the West.

The adverse character of the weather during the greater part of the past week, and the consequent serious interruptions in harvesting has, happily, up to the present, more especially as the elements have once again taken a much more propitious turn, exercised but little, if any, prejudicial effect on the price of any class of keeping stock, which in the face of the injury wrought to the harvest, is something to be really thankful for. Both cattle and sheep are now bringing an equally satifactory return, and with regard to the latter there seems every likelihood of prices hardening still further, despite the fact of a very considerable proportion of the sheep now being brought to market consisting of draft or "culled" lots. That sheep are badly wanted in many districts is becoming more and more strikingly evident at every fair or market now being held from the difficulty buyers experience in getting their demands met, and, whilst this is encouraging for flockmasters, it is scarcely so satisfactory for those who want sheep and are bound to get them. Speaking generally, at the present moment we must quote sheep quite 3s. a head dearer all round than they were at this time last year, best ewes just now making 52s. up to 68s. apiece for those of a distinct character and suitable for flock purposes, and others of a more ordinary run from 45s. or 46s. up to 50s. Chilver lambs make high prices, 38s. to 47s., and best wether lambs, 48s. to 52s. Grazing ewes sell from 34s. to 39s. each, and, there being still abundance of keep everywhere, sheep of this class are in particularly keen demand, the supply being in no way commensurate with what is wanted in any district. Store lambs are equally saleable at from 28s. (for very rough lots) to 36s. or 37s. (for better-condition drafts. Grazing cattle keep exceedingly firm in price, as is likely to be the case for some time, whilst keep prospects continue as favourable as is the case at present; and more especially as so many are now retaining their stock in hand and grazing them on their own account. The higher condition bullocks sell freely from £24 up to £30 per pair, and the plainer kinds at £15 or £16 up to £21 or £22. Milch beasts rule very firm indeed, prices during the past week being distinctly against buyers to the extent of 10s. to 20s. a head; but the advance is much more marked in the case of heifers and calves than that of cows with calves, it being the younger class of animal that is more generally wanted. Early in-calvers also sell freely from £11 up to £13 or £14; two-year-olds from £9 to £11; and yearling heifers £4 5s. to £6 5s. Calves for rearage are finding a good market up to £3 or £3 5s. each, and there is still an active sale for store pigs for turning out in the harvest field.

The fat-stock markets show but very trifling change from our last report. Beef, however, must be quoted as a distinctly better trade than mutton, the scarcity of the latter up to the present in no way enhancing its value, for, whilst 11s. 6d. to 12s. per score is readily obtainable for heifers and steers of good finish (or from £16 to £23 apiece), the best price for wethers and tegs is 8d. to 8½d., whilst ewes only bring 7d. to 7½d. (or a trifle more). Lamb, which now has generally developed into young mutton, is a much quieter trade than it was, the advent of the game season leading to a generally restricted demand; and from 9d. to 10d. must now be quoted as top value except on very special instances. Good-class veal, which is none too plentiful, commands a ready consumptive sale at 8d. to 9d. per lb. best, or 7d. to 7½d. for rougher animals. Fat pigs are still on the upward turn, best porkers realising up to 11s. 6d. score and over, and baconers 9s. 6d. to 10s. 3d. Heavier weights according to size and quality.

Trade in Ireland

Dublin market last Thursday was well supplied with stock, there being 4,364 cattle (being only sixty-six under the previous week) and 9,820 sheep (or an increase of 264 on the previous week). Trade was not satisfactory for sellers, as it was slow at lower prices, but through it all a large business was done. For best cattle from 29s. to 30s. 6d. was paid (liveweight), and in a few cases 31s. for very choice. Per head prices were considered about 10s. under the prices obtainable last week. Prices (dead-weight) per cwt. were :—Best ox and heifer beef, 50s. to 54s., and in a few cases up to 56s. for extra choice; second quality, 48s. to 50s.; inferior beef, 42s. to 46s. per cwt. There was a late finish to the market. Buyers turned up in good numbers from England and the North of Ireland. Business was tedious and dragging. The sheep trade was quiet, but with values down about 2s. per head a fairly good business was done. Best wethers, in a few cases, paid 7¾d. per lb, but most of these sold went at from 7d. to 7¼d.; ewe mutton sold at from 6½d. to 6¾d. per lb.; inferior mutton went at 5d. to 5½d. per lb., but was difficult to clear.

Lambs of prime quality were in demand for time of season. Best fat lambs were sold at 40s. to 42s. each, but other sorts could be got from 20s. to 30s. according to conditions and size. Most of the business for lamb was for North of Ireland and local requirements, these being very little inquiry for shipping. Heavy large hoggets sold at from 50s. to 60s. each, and light to medium ditto at from 36s. to 46s. each. Veal was plentiful, with a slow sale. Choice calves sold at from 7½d. to 8d. per lb.; other sorts at from 4½d. to 6d. per lb., only choice milk-fed calves brought top rate. Only a few really prime calves on market. Milch cows in good supply, and a fair trade done at late rates, best fresh cows worth from £15 to £20 each; prices for small cows varied a good deal, according to size and quality. Demand still active for choice milkers and springers, coarse cows hard to get rid of. The pig market opened exceptionally slow, in the absence of buyers who were attending country fairs. Buyers operated very cautiously, and factors, to make sales, had to reduce their prices from 2s. to 3s. a cwt. to effect sales. City pork butchers did not seem to require pigs, and bought at a good reduction—fully 3s. per cwt. Store pigs were in good request. Nice porkers made 50s. per cwt.; heavy pigs, 47s. to 49s.; and coarse heavy pigs from 36s. to 44s. per cwt. Messrs. Wilkinson and Messrs. Cuffe and Sons held large sales of store cattle in their private yards. These were well attended by buyers from England, Scotland, &c., as well as by those from country districts in Ireland. The bidding was good and well sustained, and all best lots found purchases at good prices. Mr. Gill, bullocks at £14 10s. each. Young cattle sold very well. A consignment of in-calf heifers belonging to the Earl of Howth, were also sold at from £12 5s. to £14 2s. 6d. each. Mr. Gavin Low (on the same day, Thursday) held a sale of pedigree cattle (Aberdeen-Angus and Herefords), including lots belonging to the Marquis of Waterford, Mr. R. Nash, &c.; bidding was spirited, and the auction was very successful. Lucan Earth was sold to Mr. Bland for 50 guineas; she is a three-and-a-half year old cow. Other prices ranged from 10 to 40 guineas.

LONDON.

Islington, Thursday.—The supply of beast consisted entirely of fat cows and bulls from the South-Western Counties, trade for which ruled slow, though late rates governed all transactions. Top value: Fat cows, 3s 4d to 3s 6d; fat bulls, 2s 9d to 3s 2d per 8 lb. Decrease of 210 in the number penned in sheep market; trade for both wethers and ewes ruled extremely low, last Monday's currencies governing all transactions. Lamb trade also slow at rate rates. Quotations per 8 lb as follows :—7½ stone to 8 stone Down sheep, 5s 10d to 6s: 9 stone ditto, 5s 8d to 5s 10d; 10 stone ditto, 5s 6d to 5s 8d; 10 stone halfbreds, 5s 4d to 5s 6d; 10 stone Down ewes, 4s to 4s 2d; 5 stone fat grass lambs, 6s 6d to 6s 8d; 6 stone half-bred ditto, 6s 2d to 6s 4d. Calf trade nominal. Quotations per 8 lb, sinking the offal:—Beasts, 2s 9d to 3s 6d; sheep, 4s to 6s; lambs, 4s 10d to 6s 8d. Total supply :—Beasts, 40; sheep and lambs, 660; calves, 10; milch cows, 5.

COUNTRY.

Ashford, Tuesday.—Average attendance and fair trade at recent rates for beef. Mutton a little easier; pork dearer. Bset beef made 4s 8d to 5s; cows, 3s 10d to 4s 2d; small Kent wethers, 5s 4d to 5s 8d; ewes, 3s 8d to 4s; veal, 5s to 5s 4d; roasting pigs, 3s 10d to 4s per stone.

Aylesbury, Wednesday.—The market here comprised 640 sheep and lambs, and 153 beasts. Trade was fair, and prices ruled about the same as those current last week. Wethers made to 61s, Cheviot to 44s, ewes to 57s 6d, lambs to 46s 6d, Cheviot and Welsh to 33s, heifers to £21 10s, and bullocks £22 12s 6d.

Berwick, Saturday. — Stirks made £7 to £9 15s; two-year-olds, £12 10s; Shorthorn bulls, £9.

Birmingham, Thursday. — Small supply of beasts, sheep, and pigs; trade fair for pigs, but slow for beasts and sheep. Quotations :—Beef, 5d to 6½d per lb; mutton, 6½d to 8½d per lb; lamb, 9d per lb; bacon pigs, 9s 10d to 10s per score; cutting pigs, 10s to 10s 3d per score; sows, 8s 4d per score.

Bristol, Thursday.—Good supply of beef at market; trade quiet, secondary qualities up 1s at 58s. Moderate number of sheep. Prime wethers advanced ½d at 8½d. Pigs short in numbers; rates unchanged. Five hunpred store cattle, of which a number sold at late prices.

Calne, Friday.—Prices of pigs: — In lots of not less than ten, on rail within 100 miles, 1s. per pig extra for delivery by road. Prime stores, 6 sc. 10 lb to 8 sc. 10 lbs, 9s 6d per score, 8 sc. 11 lb to 9 sc. 10 lb,, 9s per score; 9 sc. 11 lb to 10 sc. 10 lb, 8s 6d Pigs outside these limits at their value.—C. and T. Harris and Co., Ltd.

Canterbury, Saturday.—There was a good offering of sheep and lambs, and trade generally showed an improvement on the previous week. Best quality breeding ewes made from 41s to 50s; superior lambs, from 32s to 36s; working lambs,

from 25s to 27s; old ewes, from 27s 6d to 39s; heifers and calves, from £12 to £15; and cows and calves, from £18 to £22 5s.

Carlisle, Saturday. — Fair Attendance of buyers, and a steady demand. The smaller cattle brought £7 10s to £9 10s; wintering beasts, to £11 10s; and heifers for short keep up to £16 10s a head.

Chester, Thursday. — A large show of all descriptions of stock, and increased attendance of buyers, with a quick demand for milking cattle. An excellent selection of sheep and lambs and a good trade was done at rather higher rates. Milch cows, £17 to £22; heifers, £10 to £15; calvers, £14 to £18; bulls, £11 to £15; heifers, £10 to £15; barrens, £10 to £13; stirks, £6 to £9; lambs, 18s to 30s; sheep, 25s to 50s each.

Chichester, Wednesday. – Good fat sheep realised fully late rates, and fat ewes advanced fully 3s per head. The demand for store lambs was not quite so brisk as it has been, although there was no alteration in prices. Prime fat cattle of handy size and weight sold readily, but secondary quality beasts and three parts fat cows met a dull sale. Fresh-calved heifers and cows with good stocks sold remarkably well at fully 20s per head more than last market day, but old cows and inferior heifers were difficult to dispose of. Quotations:—Prime Down lambs, 7s 6d to 8s 6d; prime Devon steers, 4s 8d to 5s; Shorthorn steers, 4s 4d to 4s 8d; prime Southdown mutton, 6s 6d to 6s 10d; West Country ditto, 6s to 6s 6d; fat ewes, 4s 6d to 5s; veal, 4s 10d to 5s 6d; fat pigs, 3s to 4s per stone; store pigs, 15s to 24s per head.

Doncaster, Saturday.—A good show of cattle considering the time of the year, especially of milch beasts, which met with a fair demand, and made good prices. Milch beasts realised £17 to £23; bullocks, £12 to £17; heifers, £11 to £16; drapes and stirks, £9 to £12; and young stores, £7 to £9 each. Large supply of sheep, though less than last week. Trade slow and prices unchanged. Lambs made 36s to 40s; Lincoln ewes, 48s to 55s; Southdown ewes, 40s to 46s; and rams, 4 guineas to 5 guineas each.

Dorchester, Saturday.—The cattle market was one of the fullest to-day we have had for some time past both as regards fat and store things, and there was a large attendance of buyers both at Messrs. Duke's and also at Messrs. Symonds and Sampson's sales. As regards the quality of the stock it is a long time since we have seen anything better, as regards either the fat bullocks or the grazing stock. With a very keen demand ruling throughout, high prices generally were realised. Barreners ranged from £22 to £30 per pair for the best; seconds, £17 to £21. Best milch beasts (heifers) sold from £16 to £20 each, and others (cows) from £11 to £15 15s; two-year-old in-calf heifers, £8 15s to £9 15s; barre yearling heifers, £6 10s. In fat bullocks there were some rare selections to choose from, steers bringing £7 10s to £22 10s, and heifers from £15 15s to £20 (or 11s 6d to 12s per score); fat cows, £13 to £17 (or 9s 6d to 10s 6d); fat bulls, £11 to £15 (or 8s 6d to 9s). Mutton is still coming out very sparingly, to-day's supply being particularly short. Best wethers sold from 46s 6d to 51s 6d (or 8d per lb), and ewes from 46s 6d to 54s (or 7½d to 8d).

Dublin, Thursday.—There was again a tendency on the part of buyers to reduce the prices of cattle, and with numbers and trade in their favour a further shrinkage in values must be recorded. Sheep a dragging trade, fancy light weights and cross-breds only maintaining late rates, wethers and ewes, owing to hot weather, not so easily placed at prices favouring buyers. Lambs unaltered in value. Cattle—Live weight (best), 29s to 31s per cwt; exceptional, 32s 6d; secondary and inferior sorts, 26s to 28s 6d per cwt. Mutton (dead weight), 6½d to 7¾d per lb.—GANLY, SONS AND CO.

Edinburgh, Wednesday.—Middling trade for sheep and cattle. Grey-faced sheep, to 39s; half-bred lambs, to 33s; black polled bullocks, £15 10s; polled bullocks, £15 10s; best Shorthorn cows, to £24; Irish, to £19; Ayrshires, £19 10s.

Glasgow, Wednesday.—Fewer cattle, and the demand for prime sorts of handy weights was good; inferior descriptions met a slow, dragging trade; top, 62s to 64s; secondary, 56s to 59s per cwt. Larger supplies of sheep and lambs, and trade slow for all classes; prime sheep met a quiet sale; while secondary moved off slowly; best mutton, 8¾d to 9d; secondary, 8d to 8¼d per lb.; lambs, 7d to 9d per lb.

Gloucester, Saturday. — Messrs. Bruton, Knowles, and Co. report their sales as follows:—Cows and calves: A large supply with good trade. Store cattle: A fair supply for which there was a better demand.

Hereford, Wednesday.—There was an ordinary supply of cattle, and trade was fairly firm for good quality beasts. Best heifer and bullock beef realised from 6½d to 6¾d per lb, not more, and cow beef about 5d to 6d. A large supply of sheep was available, but they were chiefly stores. There were few choice butchers' lots, and they sold dear, making up to 8½d to 9d per lb. Fat lambs were scarce, also fetching from 8½d to 9d per lb. The sheep trade generally was firm. A small supply of veal was on offer, the average price being from 6½d to 7d. Pork pigs a small supply, and trade was not quite so good as last week, the best went at 5½d. Bacon pigs were scarce, and the average price was 5d per lb.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report an average supply of fat cattle, first class qualities being scarce. There was a brisk trade throughout, well-finished yard-fed animals of medium weights making up to 9s per stone, others from 8s 6d to 7s 9d. A large entry of grazing cattle, including the first consignment of eighty north-country steers, which ranged from two years to sixteen months old, and these were well bred and in good condition. There was a fair attendance of buyers considering harvest operations, and all animals of good quality were disposed of. Secondary sorts were dull without alteration in values. Shorthhorn steers, two years old, £13 7s 6d to £12 10s; twenty months old, £11 7s 6d to £10; eighteen to sixteen months, £9 5s to £7 12s 6d; six Polled steers, two years old, £12; ten eighteen to sixteen months, £9 15s to £8; Irish calves, £5 10. Cows and heifers met a slow trade up to £17 10s for fresh calved Red Polls. Fat sheep were short and in strong demand. Half-bred shearlings, to 67s, Suffolks to 64s, Southdowns to 51s 6d. At the special sale of rams and ewes about 800 were penned. There was a large attendance of buyers, and all changed hands quickly at high prices. Lincoln ram lambs, 10 guineas to 6½ guineas; first cross ram lambs, 7 guineas to 4½ guineas; Suffolk shearling ewes, 68s to 63s 6d; full mouth, 52s 6d to 38s; Southdown shearlings, 55s to 54s 6d; two shear, 52s; three shear, 44s 6d to 41s 6d. Fat swine were short and dear.

Leicester, Saturday.—Very large consignments of home-bred stock in excellent condition; but buyers were not so well represented, and trade ruled irregular at a decline of 10s to 20s per head, many lots remaining unsold. Milch cows made £18 to £20 for choice lots; good useful cattle, £16 to £17; secondary, £14 to £15; Shorthorn bullocks, £12 10s to £15; Irish bullocks, £13 to £16. Welsh cattle, £9 to £13; heifers, £10 to £15; young stock, £6 to £8; and calves, 15s to 38s per head. Sheep were a large supply, and sold freely, breeding ewes making 50s to 58s, and lamb hoggs, 28s to 35s per head.

Lincoln, Friday.—A small consignment of horned stock, and a slow trade. Young beasts, £9 to £11; strong ditto, £12 to £14; milch cows, £16 to £21. A large number of sheep were on offer, and the demand was fair. Young ewes, 48s to 56s; gimmers, 50s to 60s; lambs, 34s to 45s each.

Lynn, Tuesday.—Fat beasts in average supply, experienced late rates from 7s to 7s 9d per stone; few stores shown, and scarcely any trade, making from £6 to £12 each. Fat sheep, average show, and trade firm from 9s to 10s per stone; stores from 45s to 50s each; fat lambs about 30s to 40s; stores 30s to 35s each.

Manchester, Friday.—Beef: First class, 5⅝d; seconds, 4½d to 5d; thirds, 3½d to 4d. Mutton: Firsts, 7½d; seconds, 6½d to 7d; thirds, 5½d to 6d. Veal: Firsts, 6d; seconds, 5d to 6½d; thirds, 4d to 4½d. Bacon pigs: Firsts, 5½d; seconds, 4½d to 5d; thirds, 3½d to 4d. Porket pigs: Firsts, 6½d; seconds, 5¾d to 6d; thirds, 5½d to 5¾d per lb.

Newcastle, Tuesday.—Cattle were in slightly larger supply, and trade was much heavier, with prices drooping, a fall of 3d per stone being recorded for most classes. Quotations:—Prime heifers, 7s 3d to 7s 6d; second class, 7s to 7s 3d; prime steers, 7s to 7s 3d; second class, 6s 9d to 7s; coarse and inferior, 6s to 6s 6d per stone sinking the offal. Sheep and lambs were a much larger supply, and prices fell ½d to ½d per lb. Choice young sheep, 8d to 8½d; strong heavy, 7¾d to 8d; choice lambs, 8½d to 8¾d; second class, 8d to 8½d; ewes, 6d to 6¾d; rams, 5d to 6d per lb. Trade in veal was fair at 6d to 7¾d per lb.

Newport, Wednesday.—Good supply and fair demand. Best beef, 6½d to 6¾d per lb; seconds, 6d; wethers, 8d; ewes, 7d; lamb, 9d; veal, 8d; porker pigs, 10s 6d; large pigs, 9s 6d to 10s per score.

Norwich, Saturday.—Small show of fat cattle, trade good for all classes, small beasts making 8s 2d; large sorts, 7s 9d; and second quality animals and cows, 7s to 7s 8d per 14 lb stone. Fat sheep were a short supply, small mutton selling well at 9½d; large sorts from 8½d to 9d; and ewes, 6¾d per lb. Trade for fat pigs remained unchanged, mostly baconers being on offer, these made from 6s 3d to 6s 6d; the few porkers, 6s 9d; and sows, 5s 3d per stone. Larger show of store cattle of good quality. Trade was slow, large cattle getting sold in preference to small ones; three year-olds made from £15 to £18 10s; two-year-olds, from £11 to £14 10s; yearlings, £7 to £10; and others, £5 to £6 10s per head. The few store calves met a slightly better trade, at from 25s to 52s per head. Store sheep were principally ewes; trade slow and dear, Suffolks making 60s to 70s, and crossbreds 58s to 62s per head. Few lambs on offer, prices being 32s to 42s. Fair show of store pigs, and trade was brisk, at from 14s to 25s per head.

Nottingham, Saturday.—An average supply of stock. In-calf cows realised £18 to £20 each; in-calf heifers, £15 to £18; and calves, 25s to 45s apiece. 186 beasts, 66 calves, 74 sheep, and 9 horses offered.

Retford, Saturday. — Market only scantily supplied with store stock. Buyers were few, and trade generally inactive. Milch cows made £18 to £20; secondary qualities, £14 to £16; two-year-old steers and heifers, £10 to £12; yearlings, £6 to £8; and calves, 35s to 45s per head.

Romford, Wednesday.—Average supply of fat beasts; trade about the same: Best beasts, 4s 6d to 4s 8d; middling, 4s 2d to 4s 4d per stone. Calves in average supply; trade slow, at 5s 2d to 5s 4d per stone. Sheep in average supply; prices about the same: Best small sheep, 5s 8d to 6s; larger sheep, 5s 4d to 5s 6d per stone. Ewes in larger supply, ; trade about the same at 4s 2d to 4s 4d per stone. Lambs in short supply and dear, at 6s 4d to 6s 8d per stone. A few store beasts on offer; fair demand. Good supply of milch cows; trade better. Pigs in short supply; trade about the same: Small porkers, 3s 8d to 4s; large hogs, 2s 8d to 3s per stone.

Sheffield, Tuesday.—Fewer milch cattle than last week. Moderate business done. Little alteration from last week's prices. Good milch cows, £19 to £20; secondary, £15 to £16 10s.

Shrewsbury, Tuesday.—Usual supplies of fat stock, but smaller of store cattle; moderate trade, owing to farmers being busy in the harvest. Store sheep a steady trade. Quotations:—Beef, 6½d to 7d per lb: mutton (wether), 9d to 9½d per lb; ewes, 7½d to 8½d per lb; lamb, 9d to 10d per lb; veal, 7½d to 8d per lb; porket pigs, 10s 6d to 11s per score; bacons, 9s 6d to 10s per score. Cows with calves a good supply and demand, several reaching £22 10s.

Stockton, Wednesday.—An average show of the best cattle, but with few customers trade was slow at 7s to 7s 6d per stone, whilst rougher kinds made 6s to 6s 8d. Lambs realised 9d per lb., young sheep 8½d, and ewes 6½ to 9d. There was a reduction of 3d per stone all round in pigs, small porkers selling at 7s to 7s 3d, mediums 6s 9d to 7s, sows 6s to 6s 6d.

Thame, Tuesday.—There was again a capital entry of stock, and not for many years have the cattle been coming off the grazing grounds in better condition. Buyers were not so numerous as the previous week, consequently trade was not so brisk; a practical clearance was effected. Fat cows were in slow demand. Mutton continues to sell well. Veal a slower trade. Bacon hogs and porkers in good demand. Store pigs selling well. Owing to farmers being at harvest weaning calves moved off slowly, but choice cow calves were eagerly sought after. Messrs. Bond and Burrows' sale comprised 110 fat beasts, 183 fat sheep, 81 fat and weaning calves, and 80 fat and store pigs. Fat oxen made from £16 to £22; fat heifers, £15 to £20; fat wethers, 51s to 60s; fat lambs, 36s to 51s; fat ewes, 40s to 56s; fat calves, £3 to £4; weaning bull calves, 20s to 50s; cow calves, 28s to 56s; bacon hogs, £3 to £5; porkers, 28s to 44s; store pigs, 16s to 28s. We would remind our readers that a large number of well-bred down calving heifers will be offered next Tuesday, and those requiring this class of stock would do well to attend the market.

Truro, Wednesday.—Attendance very good, and business fairly brisk. Fat bullocks, 55s. to 60s. per cwt; barreners and store bullocks, 49s to 45s; cows and calves, £10 to £15 each; rearing calves, 25s to 42s; ewes, 42s to 45s; wethers, 6½d to 7d per lb; ewes, 5d to 5½d; lambs, 7d to 7½d; large and small pigs and suckers, 9s 6d to 45s each.

Wolverhampton, Wednesday.—Slow trade, with moderate supply. Quotations:—Beef, 5½d to 6¾d per lb; mutton, 6½ to 9d per lb; lamb, 8½d to 9½ per lb; veal, 6d to 7½d per lb.

York, Thursday.—Only a very poor trade in English grazing cattle, the bulk of the stores being Irish. Two-year-old bullocks made 7 guineas to 10 guineas, and strong three-year-olds up to £14 10s. Dairy cattle met with an advance of 10s to £1, secondary sorts remained at late rates. Best cows made £18 10s to £21; in exceptional cases up to £22 10s. A good show of English heifers, and prices remain at late rates—£13 10s to £16. Fully 12,000 sheep of all descriptions were penned, and met with a very bad trade. Best north country ewes made up to 52s, others from 46s to 50s; Masham ewes 40s to 46s, best twiced crossed lambs 38s, others from 30s to 35s,

Masham lambs 24s to 28s. A few southdown ewes were on offer, and made up to 45s.

WET AND DRIED GRAINS.

Mark Lane, Saturday.—Wet Grains: Prices have ruled a trifle higher on the past week, and business has been done at 14s to 15s ale, and 11s 6d to 12s 6d porter per ton on rail, London. Dried Grains.—The rise in prices has practically stopped home trade, and dealers cannot find orders, and with hay offering at from 50s per ton there is not likely to be much demand, and even a reduction of 5s per ton would not increase the home consumption. Prices ex factory:—Ale, 92s 6d; mixed, 86s 3d per ton, in buyers' bags. American cane treacle, 90s per ton, and Kiln-dried sea damaged Australian wheat from 20s per qr.—Hamlyn and Co., 37 and 38, Mark Lane.

CORN STATISTICS

Weekly Arrivals into London.

HOPS.

Canterbury.—The yield is very much short of even the most conservative estimates. A few sales of small parcels of earlies have been reported at prices ranging from 30s to 70s per cwt.

Weekly London Averages.

An account of the Quantities and Prices of British Corn bought on the London Market and in the area within five miles from the Royal Exchange during the week ending Tuesday, September 10, 1907:—

	Imp. Quar. Bus.	Total Amount. £	s.	d.	Av. Price per qr. £	s.	d.
Wheat	1,424 1 ...	2,320	18	6 ...	1	12	7
Barley	417 3 ...	524	12	4 ...	1	5	2
Oats	6,158 3 ...	5 689	12	6 ...	0	18	6

A fatal fire occured at Foreland's Farm, Bembridge, Isle of Wight, on Monday night, presumably as the result of a man named Brooks, a former Guardsman, smoking over the stable where he slept. When discovered the lower part of his body was burned to a cinder. He was found with his head reclining on his hand, as if asleep, and no doubt had been suffocated. Several horses were extricated uninjured, but the building was gutted.

Bristol Wool Fair.—There was a very good attendance at this fair held on Thursday. Down fleeces and matchings met with a brisk demand, and large quantities changed hands, which was in direct contrast with the state of affairs which prevailed twelve months ago, when prices ruled very high. Taking the average prices of fleeces, they were ½d. to ¾d. per lb. above those recently current. Downs made 1s. to 1s. 1d., half-breds 11½d. to 12½d., greasy Downs 8½d., Gloucesters about 10½d., Southdowns about 13d.

Lincoln September Ram Fair took place on Friday. A large number of rams and breeding sheep were offered by auction, and for the latter there was a good demand, but for rams it was somewhat unsatisfactory owing to the absence of foreign buyers. The highest price for rams was 16 guineas, given by Mr. Pears, Mere, for a shearling ram from the flock of Mr. J. Brocklebank, Bassingham. The best figure last year was 17½ guineas. Mr. J. H. Headland, Potterbanworth, topped the fair for ewes, a pen of six selling at 39s. each, whilst the best price for gimmers was secured by Mr. J. C. Mountain, of Welbourn, he obtaining 62s. to 67s. per head for thirty-five. The sheep sales were as follows:—Mr. J. Brocklebank, Bassingham, seventeen shearling rams, 5½ guineas to 16 guineas; fourteen shearlings belonging to Mr. J. Brocklebank, Carlton-le-Moorland, 6 guineas; Mr. L. W. Stephenson, South Thoresby, nine rams, 5½ guineas to 13½ guineas each; twenty-five rams belonging to Mr. J. Evens, Burton, 5½ guineas to 11 guineas each; Mr. C. S. Dickinson, Ashfield House, Branston, sixteen at 6½ guineas to 12 guineas; six rams from Mr. C. E. Howard, Nocton Rise, 7 guineas to 15 guineas; two from Messrs. R. and R. Hilton, Wellingore, 9 guineas to 11 guineas; six from Mr. C. Featherstone, Nocton Grange, 6 guineas to 12 guineas; and twenty from Mr. J. Pears, The Mere, 5½ guineas to 9 guineas. Twenty-five Hampshire Down rams, bred by Mr. E. W. B. Clift, Sherborne St. John, Basingstoke, made up to 8½ guineas each, and eleven Lincoln Long-wools, belonging to Mr. J. Cartwright, Dunston Pillan, 6 guineas to 9 guineas.

RECEIVED TOO LATE FOR CLASSIFICATION.

RUGBY 10TH ANNUAL FOAL SHOW and SALE.

The above will be held on FRIDAY, SEPTEMBER 27, 1907. £25 will be given in Prizes (open). For entry forms and full particulars apply to Howkins & Sons, Auctioneers, Rugby.

N.B.—At last year's sale colts made up to 141 guineas each. Fillies up to 90 guineas each.

GLOUCESTERSHIRE.

BLAISDON HALL ESTATE.

BRUTON, KNOWLES & CO. are instructed by Colin MacIver, Esq., to hold at THE SPOUT FARM, BLAISDON (two miles from Grange Court Station), on

FRIDAY, SEPTEMBER 27TH, 1907,

at one o'clock most punctually,

THE IMPORTANT ANNUAL SALE OF

SURPLUS FARMING STOCK,

comprising 26 well-bred Shorthorn dairy cows, 18 fresh Shorthorn stirks, 20 very fresh three-year-old polled bullocks, 15 fresh two-year-old steers, 4 fat maiden heifers, 6 fat cows, and yearling Shorthorn bull; 49 cross-bred ewes, 56 cross-bred lambs, and 59 pigs (Large White Yorkshire breed). Luncheon by ticket at 12 o'clock.

Catalogues may be had at the Blaisdon Estate Office, Blaisdon, or of the Auctioneers, Albion Chambers, Gloucester.

Printed and Published for the Proprietors, at the Offices 8, Wellington Street, Strand, London, W.C.—September 16, 1907.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

It is not often that the weather takes so fine a turn as it has done this September, and the blessing that the dry spell has been to farmers engaged in harvesting needs no emphasising. The yields of 1907 will be far from that subject of general regret which was the feeling in later August. The winds, which have latterly acquired an easterly character, have added to the drying influences so much needed after the prevailing humidity of June, July, and August.

While the English farmer is rejoicing over a better harvest result than in August he could possibly have anticipated, the reports from abroad are not of a character to make us anticipate any marked depression. No practical doubt now exists as to Russia as well as the United States and Roumania, Austria-Hungary, and Germany having all of them under average wheat yields. If Canada is still a doubtful item, no great importance need be attached thereto, for the total deficiencies are vastly more than any Canadian yield could balance. The growing crops in the Southern Hemisphere are very promising in Argentina and Uruguay, but by no means so uniformly hopeful in Australia. The yields of Argentina and Australia cannot in any event influence the markets of Europe and England much before March, so that the campaign immediately before us has to be conducted on the lines laid down by the wheat harvests of the Northern Hemisphere.

The price of bread, according to the Board of Trade returns issued on Friday, is now 547 pence for 100 quartern loaves, against 523 pence at this date last year. The parts where bread is dearest are the North of Scotland, where it is cheapest is in the South and Midlands. It is rather curious that East Anglia, the "granary of England," should be decidedly dearer than the West, where the local production of wheat is always very small.

The flour averages are retuned at 10s. 5½d. per cent. for London, and 9s. 8½d. for imported. It is strange to find the official figures suggesting that th emarket is depressed by imported flour, whereas the flour market is in no way depressed, and the holders of foreign sorts are conspicuous for upholding a high level of value. The Board of Trade owe to the public an explanation of their reasons for asserting that the foreign flour supplies are depressing the home manufactured to the material extent of 9½d. per cwt. The London flour market, since the present month began, has been peculiarly firm, and even strong.

The American maize crop is the subject of the following semi-official statement:—

1907	2,500,000,000	bushels.
1906	2,928,000,000	,,
1905	2,708,000,000	,,
1904	2,468,000,000	,,
1903	2,244,000,000	,,
1902	2,523,000,000	,,
1901	1,523,000,000	,,

The area under maize this year is 1,200,000 acres larger than last year, yet the yield is expected to be 428,000,000 bushels less. It is clear that but for the increased area there would be a very marked deficiency, and even as things now are the indications of September may already be said to be that maize will be dearer for the new than it was for the old cereal year.

The visible supply of maize in the United States is as follows:—

September 19, 1907	828,000 qr.
,, 1909	729,000 ,,

Total maize shipments for the period January 1—August 31, corrected figures, prove to have been:—

From America	6,970,000 qr.
,, Argentina	3,490,000 ,,
,, Russia	3,050,000 ,,
,, Roumania	4,100,000 ,,
,, other countries	500,000 ,,
Total	18,110,080 ,,

Same period last season ... 18,120,000 ,,

The sales of British wheat at the statute markets since September 1 have been:—

This season... 55,000 qr. at 31s. 8d. per qr.
Last ,, 225,000 qr. at 25s. 10d. ,,

The much smaller deliveries are clearly in somewhat close relation to the very much higher price realised.

The sales of British barley at the statute markets for this and last season, since September 1, thus compare:—

This season... 17,000 qr. at 24s. 3d. per qr.
Last ,, 66,000 qr. at 24s. 5d. per qr.

English barley should be held for a higher price; so much appears to be demonstrated by the above comparison.

The sales of British oats at the statute markets since September 1 have been:—

This season... 60,000 qr. at 17s. 7d. per qr.
Last ,, ... 90,000 ,, 16s. 4d. ,,

Here, as with wheat, we discover a due proportion between moderate deliveries and a fairly good price made for them.

The wheat gradient last week was moderate:—

Doncaster	35s. 0d. per qr.
Cambridge ...	30s. 2d. ,,
Range	4s. 10d. ,,

Barley showed the following difference:—

Ipswich	28s. 8d. per qr.
Lincoln	23s. 10d. ,,
Range...	4s. 10d. per qr.

In oats the differences were rather remarkable, the demand for heavy old oats in some places being good, while other exchanges have been overdone with new oats in poor condition.

Chichester	24s. 5d. per qr.
Norwich	16s. 10d. ,,
Range...	7s. 7d. per qr.

Farmers in East Anglia would do well not to hurry their new oats to market, as the prices will certainly be better when the season has assumed a more autumnal character than the summer-like conditions of the past fortnight.

Imports last week were as follows:—
Wheat, 473,000 qr.: a good supply.
Flour, 89,410 qr.: a small supply.
Barley, 85,000 qr.: a small supply.
Oats, 22,000 qr.: One of the smallest weekly totals recorded for many seasons.
Maize, 292,000 qr.: a good supply, but probably all absorbed to make up for the practical failure in arrivals of foreign oats.

Supplies on passage thus compare with three preceding seasons:—

	1907.	1906.	1905.	1904.
Wheat, qr.	1,936,000	1,555,000	1,750,000	2,950,000
Flour, sks.	168,000	245,000	260,000	160,000
Maize, qr.	775,000	1,095,000	1,260,000	1,460,000
Barley, qr.	495,000	444,000	420,000	480,000

The sums paid by the United Kingdom for foreign cereals, &c., during the harvest year ended August 31, are officially returned as follows:—

	£
Wheat	33,644,000
Flour	6,287,000
Bread stuffs	39,931,000
Maize	13,073,000
Barley	5,837,000
Oats	3,373,000
Beans	253,000
Peas	612,000
Oatmeal	504,000
Maize meal	209,000
Milling offals	1,229,000
Potatoes	1,939,000

Items showing increased cost on the previous season are maize, barley, oatmeal, maize meal, and potatoes. On the other hand, we have reduced our expenditure on foreign breadstuffs and milling offals, and on foreign oats. Expenditure on pulse shows little change.

The shipments of America last week were 393,000 qr. of wheat, 138,000 sacks of flour, 86,000 qr. of maize, 25,000 qr. of linseed, 7,000 qr. of oats, and 20,000 qr. of barley.

Argentina shipped 20,000 qr. of wheat, 60,000 qr. of maize, and 10,000 qr. of linseed, but no oats or flour.

Russia shipped 150,000 qr. of wheat, 495,000 qr. of barley, 120,000 qr. of oats, and 30,000 qr. of maize. The very heavy shipments of barley are of course the feature of the week so far as Russia is concerned.

All Roumania's shipments were very moderate. India shipped 170,000 qr. of wheat, 37,000 qr. of linseed, 19,000 qr. of rapeseed, and 4,500 tons of cottonseed. Countries whence grain shipments were nil or too small to be worth cabling were Australia, New Zealand, Chili, and the Persian Gulf. It is probable that Turkey, Morocco, and Syria all shipped some barley, but the statistician has no honour in these lands.

LONDON HAY TRADE.

Saturday. — The continued fine weather giving farmers the opportunity of finishing harvesting, the supplies of hay have naturally continued on a very restricted scale, prices, however, show little or no change on last week's higher values, as although everything coming along has been quickly disposed of, the consumers have not followed the lead of those in the trade, business at the increased rates being mostly done amongst salesmen and dealers who, having contracts and orders to fulfil have been forced to satisfy their wants whatever the price. Anything of good quality finds a ready market, there is also a better trade for plainer sorts if sweet and clean; the larger proportion of supplies, however, consist of dusty and inferior kinds, which, although finding a better demand than of late, are more difficult of sale. The arrivals of old stuffs are now almost finished, values being about 80s. per ton for best old hays, 90s. per ton for best old mixtures, and 92s. 6d. per ton for best old clovers. Straw is still coming along in very short supply, and keeps a firm trade at about last week's values. The foreign market remains in a very quiet condition, shipments are very small, but with demand almost nil prices are nominally unchanged.

Prices ruling for English 1907 are about as follows:—Best hays, 67s 6d to 70s per ton; good hays, 57s 6d to 65s per ton; plain hays, 55s per ton; best clovers, 82s to 85s per ton; good clovers, 77s 6d to 80s per ton; inferior clovers, 70s to 75s per ton; best mixtures, 77s 6d to 80s per ton; good mixtures, 70s to 75s per ton; plain mixtures, 62s 6d to 67s 6d per ton; seconds hays, clovers, and mixtures, 40s to 55s per ton; wheat straw, 28s to 30s per load; barley straw, 28s to 30s per load; oat straw, 28s to 30s per load. All ex rail London.

Foreign: Canadian mixture, 80s per ton; first quality Dutch hay, 62s 6d to 65s per ton; second quality Dutch hay, 55s to 60s per ton; New French first and second cut clover, 75s per ton. These prices are by the barge load delivered alongside wharf, London.

THE BALTIC.

The wheat cargo trade after a little hesitation is again firm, and prices show about 6d. net advance upon the week. Recorded sales include Durum at 35s 6d per 480 lb., best Manitoba at 40s. 6d. per 480 lb., American Northern spring at 40s. per 480 lb., American red winter at 39s. per 480 lb., hard Kansas at 37s. per 480 lb., finest Russian Azima at 40s. per 492 lb., Odessa Ghurka at 38s. 9d. per 492 lb.; white Karachi at 38s. per 492 lb., red at 37s. 6d per 492 lb., and Australian at 38s. 6d per 480 lb,

Maize cargoes are well held. Prices made include 25s. 6d. for Argentine, 26s. for American, 26s. 3d. for Odessa, 26s. 9d. for Novorossisk, and 28s. for fine Cinquantina, all per 480 lb.

Sales of barley cargoes show that Russian supply in prospect is getting a little ahead of inquiry. The price making is 22s. 6d. per 400 lb. A Persian cargo made 21s. 6d. per 400 lb. on Thursday.

Sale of linseed cargoes admit of the following comparison:—

	Indian.		Argentine.	
	s. d.	s. d.	s. d.	s. d.
16-21 Sept., 1907...	44 0 to 44 6	...	43 3 to 43 9	
,, 1906...	40 9 to 41 0	...	39 0 to 39 3	
,, 1905...	37 0 to 37 3	...	36 9 to 36 8	
,, 1904...	36 3 to 36 6	....	36 0 to 36 3	

The Indian weighs 410 lb., the Argentine 416 lb. to the qr. The oilseed cargo sales of the week have also included a cargo of brown Calcutta rapeseed at 53s. per 416 lb., and a cargo of Egyptian cottonseed at £8 per ton.

The Secretary of the London Corn Trade Association announces that the following standards for June shipments were made up on the 19th inst., and are now to be seen (and samples purchased) at the association's rooms in St. Mary Axe.

Wheat.—Choice White Kurrachee (crop 1906); ditto (crop 1907); Soft Red Kurrachee (crop 1906); ditto (crop 1907); Choice White Bombay (crop 1907); Atbara Wheat from Calcutta, May/June (crop 1907). Barley.—Kurrachee. Gram.—Kurrachee. Lentils.—Bombay. Pease.—White Bombay and Calcutta.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English steady quiet. New whites quoted at 34s to 37s; new reds, 33s 6d to 36s. Foreign firmly held at full prices to 3d advance. No. 1 Northern Manitoba ex ship, quoted at 41s, landed at 41s 6d; No. 2 Northern Manitoba, ex ship, at 40s 3d; No. 1 Durum, ex ship, at 35s 3d; No. 1 hard Manitoba, landed, 42s 3d; Australian, ex ship, 39s 9d, landed, at 41s 6d; La Plata, landed, at 40s to 40s 6d. Flour firm, quiet. Iron Dukes quoted at 24s 6d to 25s; Hungarians, at 37s to 38s. Maize steadily held but inactive. River Plate, landed, quoted at 26s; Odessa, ex ship, to arrive, at 25s 6d to 25s 9d, landed, 26s to 26s 3d. Barley firm but quiet. Azoff-Black Sea and Odessa-Nicolaieff, ex ship, to arrive, held at 22s 6d to 22s 9d, landed, at 23s 9d; Persian, ex ship, at 22s 6d, landed, at 23s. Oats firm but inactive. South Russians held at 18s 6d to 18s 9d; River Plate, 18s 9d to 19s.

Mark Lane, Friday.—Wheat: English firm, but not active. Whites quoted at 34s 6d to 37s 6d, reds at 34s to 36s 6d. Foreign firm, and Americans held at 1s advance; other sorts 6d dearer. No. 1 Northern Manitoba, ex ship, held at 42s; No. 2 Northern Manitoba at 41s: choice white Karachi at 38s 6d to 39s; Australian, landed, at 41s 6d, ex ship at 40s. Flour firmer, but inactive; Iron Dukes quoted at 25s 6d, ex ship at 25s. Maize firm; Odessa, landed, held at 26s 6d, with 26s 3d paid; Plata, landed, 26s 6d asked. Barley firm, moderate inquiry; Odessa-Nicolaieff and Azoff-Black Sea, ex ship, held at 22s 9d to 23s, landed at 23s 9d to 24s. Oats firmer, more inquiry; River Plate held at 19s; South Russains, 18s 9d to 19s.

COUNTRY.

Appleby, Saturday.—A few samples of new oats showing. White oats worth 21s to 23s per 36 stone.

Ashford, Tuesday.—Contrary to expectations, the trade for wheat showed no improved tendency, sales taking place at last week's rates; flour, too, remained unaltered at 32s per sack for whites, 29s for seconds, and 27s for scaling corn. Prices:—Wheats, 34s to 35s; barley, English, 26s to 30s; barley, foreign, 25s to 27s; Mazaagan beans, old, 30s to 31s; tick beans, old, 34s to 36s; maize, 26s to 27s 6d; new peas, 30s to 31s; new white oats, 18s to 21s; black winter oats, 19s to 21s.

Banbury, Thursday.—Wheat, white (new), 31s to 32s per qr; ditto (old), 34s to 35s per qr; barley, 26s to 30s per qr; beans (old), 32s to 33s per qr; oats, 17s to 20s per qr; oats (old), 21s to 25s per qr; peas (old), 30s to 35s per qr.

Berwick, Saturday.—Increased attendance. Larger supplies of new barley on offer. Finest quality sold readily at last week's price, others rather dull. No wheat or oats on offer. Barley made 27s to 30s.

Birmingham, Thursday.—There was a fair attendance at market, and trade was generally good all round, prices being in sellers' favour. Quotations:—Foreign wheat, No. 1 Manitoba 40s 6d., No. 2 40s, and No. 3 39s 6d per 496 lb at Bristol; Russian 39s to 40s 6d, Plate 40s 3d per qr at Sharpness. A fair quantity of new English wheats were offering, and made from 12s 9d to 13s 6d per 186 lb delivered; oats, 19s per 312 lb, black winter 19s 6d delivered; beans, new, 12s 9d, old 13s 6d per per 196 lb delivered; maize, Bessarabian 26s to 26s 3d, Odessa 25s 9d per 480 lb at Gloucester, Galatz-Foxanian 25s 9d per qr at Sharpness; barley, grinding, 24s per 400 lb at Sharpness.

Brighton, Thursday.—Wheat in short supply, and firm at late rates. Barley, 28s to 32s; grinding ditto, 25s to 26s; oats, English, 17s to 19s; beans, 33s to 34s.

Bury St. Edmunds, Wednesday.—The attendance was small, and the o was only a limited quantity of wheat on offer. The trade is strong and dearer on the week; reds and whites in fair milling condition found free buyers at 32s 6d to 34s per qr; damp parcels, of course, did not make these prices. Flour also a strong trade at 6s to 7s per sack above the prices ruling in May last, and with a decided upward tendency. Oats firm at last week's advance. New white 18s to 19s 6d per qr. Old beans firm at 33s to 35s per qr. New peas steady at 32s to 32s 6d per qr. Grinding barley firm at 28s to 29s 6d per qr. Rye: A small business was done at 12s 6d to 13s 6d per qr. Maize, round, firm at 27s to 27s 6d per qr delivered. Maize germ 2s 6d per ton dearer, at £6 15s per ton. Feeding stuffs very firm, with an upward tendency.

Canterbury, Saturday.—There was a good all-round trade at to-day's market. Wheat an upward tendency in price, best 64 lb wheats making up to 34s, and lesser weights up to 31s per qr. Malting barley met with a little more demand at from 28s to 32s. Oats slightly dearer; 42 lb black winters sold at 20s 6d, and 44 lb whites at 21s 6d. Grey peas, 30s per qr.

Carlisle, Saturday.—Small supply of oats (old) in our market to-day; good demand at full prices, 24s to 24s 6d per 336 lb. Only one lot of new oats shown in market. Very inferior quality sold at 18s per 336 lb. Poor attendance owing to farmers harvesting.—Thomas Robinson.

Chester, Saturday.—There has been a considerable advance in the price of American mixed corn since last market, due to scarcity. New wheat and oats are offering, and the condition is very good. Offals very scarce at increased prices. Quotations:—Wheat, new white, 5s per 75 lb; oats, new, 2s 6d to 2s 7d; old, 3s 1d to 3s 6d per 46 lb; Indian corn, old, 14s 9d to 15s per 240 lb.

Chichester, Wednesday.—A very good attendance, and market very firm. There was, however, little on offer, and everything sold readily. New white wheat, 33s to 33s 6d; new red ditto, 33s to 33s 6d; barley, 28s to 30s; grinding ditto, 23s 6d to 25s; oats, English, 17s to 23s; rye, 27s to 29s; peas, 31s to 32s; beans, 32s to 33s; tares, 5s 6d to 6s 6d; maize, 25s 6d to 26s 6d; flour, 29s to 31s.

Colchester, Saturday.—Wheat, 1s dearer. Oats and barley slightly dearer. Farmers firm in their demands.—Colin Taylor, King and Co., Ltd.

Coventry, Friday.—Poor attendance. Wheat was in rather small supply, and prices for good quality were about 6d per qr higher on the week. Beans and peas firm, but unchanged. Quotations: Wheat, new, 12s to 12s 6d, old 12s 9d to 13s 6d per 186 lb; barley, 30s to 34s per 448 lb; oats, old, 24s 6d to 27s, new 20s to 23s per 352 lb.; beans, 13s to 13s 9d per 196 lb; peas, 12s to 14s per 352 lb.

Derby, Friday.—A better supply of new corn than at the last market, and a fair trade done. Spring corn unchanged in value. Quotations:—Wheat, 36s to 37s; red, 34s to 35s; grinding barley, 23s to 25s; beans, 35s to 37s; old oats, 24s to 26s; new, 18s to 20s.

Devizes, Thursday.—There was again a small supply of corn, farmers having been too busy taking advantage of the fine weather to thresh. Prices fully maintained last week's rates for wheat, barley, and oats. Rye dearer, at 26s to 28s. Fine winter barley commands 24s to 28s per qr. Vetches scarce, and realise 6s 6d to 7s 6d a bushel. Best wheat, 17s 6d to 18s 6d; secondary, 16s 6d to 17s 6d; new wheat, 15s to 17s; winter barley, 26s to 28s; old oats, 20s to 24s; winter oats, 17s 6d to 18s 6d; white Garton oats (330lb), 18s to 19s; rye, 26s to 28s; new beans, 16s 6d to 18s; fine flour, 30s to 31s; extra fine, 32s to 36s.

Doncaster, Saturday.—Small supplies of grain all round. Rather better supply of new wheat than last week, and the condition varied considerably, some of the samples being in good condition, but others were very poor, and the best samples made from 13s to 13s 6d per load. Foreign was exceedingly firm, and made an advance of fully 1s per qr. Short supply of new oats, which made from 18s to 20s per qr, being 3d dearer. Maize also advanced 3d. Some new barley was offered, but prices were irregular, but may be quoted from 26s to 30s 6d per qr.

Dorchester, Saturday.—The attendance at to-day's market was a little larger than of late, but no doubt the approaching Poundbury Fair kept many away. Wheat handled considerably better, but still, on the whole, it compared somewhat unfavourably with the ordinary run of samples. In spite of this holders were firm in their demands, which generally represented a rise of 6d to 9d per qr—a concession which had to be made where sales were forced. Barley, too, was equally firm; but most of what was shown was for grinding purposes, malting samples as yet being very scarce. Oats were also against buyers in price, as were beans and peas. Maize, though well held, cannot be recorded as quotably higher.

Dublin, Friday.—Foreign wheat was active and dearer. Maize was dearer and slow. Flour had a good demand, and was dearer. Irish wheat, few sales. New crop, 19s to 20s; prime samples held for 21s to 21s 6d. Oats: New crop was irregular; white plentiful. Sales made 10s to 11s. Indian meal was unchanged. Brand and pollard scarce and dearer.

Exeter Friday.—English and foreign wheat firm; trade good. Few samples of new English barley made 3s 6d to 4s; trade firm. Maize and oats unchanged. Flour, 1s 6d to 2s dearer. English wheat, 4s; superfine flour, 29s to 31s; fine, 27s to 29s.

Glasgow, Wednesday.—Prices still keep firm, and business is being checked by the advance. Wheat steadily held, with prices about 6d per boll dearer over the week. Flour firm at 3d to 6d per sack advance. Maize firm. Corn very scarce on spot, and held for extreme prices at 3d per boll more money since last Wednesday. Oats quiet in tone, but prices still maintain their firmness of last week. Barley shading dearer. Beans and pease nominally unchanged. Bran and thirds steady, but not quotably altered. Oatmeal quiet. New crops of both Scotch and Irish on the market, but very difficult to get on with sales. Other articles unaltered.—Gibson and Clark.

Glasgow, Friday.—Market continues firm, and practically no change in values. Business on the whole is quiet.

Gloucester, Saturday.—New English wheat 1d a bushel dearer, at 32s to 34s per qr. Foreign wheat: Plates, 9d to 1s dearer, at 40s 3d to 41s; Russian, 1s 6d dearer, at 40s to 41s 6d. Plate maize 3d up, at 26s; flat 3d dearer, at 26s 3d; Bessarabian unchanged, at 26s. Barley 2d dearer, at 43s 3d per qr. Oats unchanged.

Grantham, Saturday.—A few nice samples of new corn on offer. Quotations:—Wheat, 34s to 35s; barley, 26s to 30s; oats, 18s; and peas, 60s to 70s.

Hereford, Wednesday.—The general tone of the English wheat trade was steady with a fairly wide range of values, buyers pricing some samples at 3s 6d, while better grades occasionally realised a fraction under 4s. English oats met with fair inquiry at last week's prices. Nothing doing in barleys. Maize very firm at last week's prices. Wholesale quotations:—Wheat, new, 3s 6d to 4s per 62 lb; barley, 3s 6d to 4s per 56 lb; oats, old, 2s 2d to 3s 3d per 40 lb; new, 2s 3d to 2s 6d per 40 lb; beans, 4s to 4s 6d per 65½ lb; maize, 3s 4d to 3s 8d per 60 lb.

Ipswich, Tuesday.—Moderate supply of wheat; trade firm at last week's rates. Reds, 33s to 35s; whites, 33s to 36s per 504 lb. Few samples of dry barley on offer; they were rather high-coloured and coarse, and the few sold realised from 28s to 32s. Oats firm and fully as dear. Maize steady. Beans and peas unaltered.

Leeds, Tuesday.—The weather continues all that can be desired. The depression of the early part of last week was of very short duration. Since Thursday the trade has again gradually gained strength chiefly owing to the unfavourable crop reports from Canada, where a large portion of the wheat is frosted. Shipments and offers from Russia remain moderate, Australia wants rain, stocks in this country are decreasing, as also is the quantity on passage. The market consequently rules strong at 6d advance on the week. Maize, beans, and oats steady.—Dunns and Co.

Leeds, Friday.—With another week's splendid harvest weather, English wheats were rapidly secured, and as both quantity and quality exceeded anticipation, the recent upward tendency in prices was checked. Foreign wheats were firmly held at Tuesday's full prices. Flour was in good demand, especially medium qualities, which were from 26s to 28s. Maize was easier, Plate and Odessa closing at 25s. New English barley was in good condition at 27s to 30s.

Leicester, Saturday.—Good attendance, with better supplies of home-grown wheats, which came to hand in good condition; trade steady at very firm rates. Red wheats made 34s to 36s, and white wheats, 35s to 37s 6d per 36 stones; malting barley in steady request at 27s to 31s per 32 stones; good oats in better request 19s to 22s per 24 stones; flour, 28s, 31s, and 33s per 280 lb.

Lincoln, Friday.—Small supply of English wheat, which made 1s per qr more than last week. All classes of foreign wheat 1s per qr dearer on the week. Malting barley trade not yet started. Oats very firm.

Maidstone, Thursday.—The firm tone in the wheat trade continues, the supply of samples not large as the hop season engages the attention of many of the farmers. In a first class sample quite 6d per qr was the cost obtained last week. Barley keeps up in value, and maize continues to advance. Very little alteration in oats, and beans or peas much as recently. The stiffness in prices seems to indicate a general deficiency in harvest yield.

Newark, Wednesday.—Only a moderate attendance. More samples of new grain showing, and prices quite firm. Quotations:—Old wheat, 37s to 38s; new wheat, 33s to 34s. Malting barley, 29s to 30s; grinding, ditto, 25s to 26s. New white oats, 18s to 19s; black winter ditto, 18s to 18s 6d. Old beans, 35s to 36s per qr.

Newcastle-on-Tyne, Saturday.—Wheat here-to-day was held for 1s per qr advance on the week; millers, however, were very reluctant in responding. Maize again dearer, demand, however, limited. Oats remain steady at last week's quotations. Beans remain firm at fully late rates. No peas offering. A few samples of new barley were shown; prices quoted were 27s to 29s; buyers, however, held off.—Pollard and Co.

Newport, Wednesday.—Trade fair; flour, 29s per sack; bran and sharps, 2s 6d high for the week, while barley showed an advance of 6d. Maize and peas unchanged.

Norwich, Saturday.—There was not a large

supply of wheat for the season; prices were dearer, and in sympathy with foreign markets, to the extent of 1s per qr: values, 34s to 34s 6d for good wheats. In feeding stuffs cotton cakes are 2s 6d to 5s dearer; maize, 6d to 9d per qr dearer; and grinding barley, 6d more.

Northampton, Saturday.—Better attendance, and improved business. Strong demand for wheat, which advanced 1s per qr. Old Wheat, 35s to 36s; new wheat, 31s to 33s; new barley, 26s to 30s; old white oats, 24s to 26s; new white oats, 18s to 20s; old black oats, 22s 6d to 23s 6d; new black oats, 18s to 19s; old beans, 31s to 33s; new beans, 30s to 32s; peas, 30s to 32s; flour, 27s to 32s.

Nottingham, Saturday.—Wheat, small supply of the new crop, and prices advanced a further 6d to 1s per qr. Barley, a few samples of new offering of various qualities; prices irregular. Oats, both old new, 6d dearer. Beans firm.—ROBT. HUBBLE.

Peterborough, Saturday.—Another fine week, and harvest nearly all in. Not a large supply of wheat which made fully 1s more than last week. Spring corn also tending upwards. Barley, 26s to 32s. Wheat, 33s to 34s. Oats, 18s to 19s.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was a good attendance on our market here to-day. Wheat and barley 3d dearer. Maize and oats steady, unchanged.—ORLANDO DAVIS AND CO.

Preston, Saturday.—The market was only moderately attended, and there was no new grain offering. Flour 1s per peck dearer. Quotations:—Wheat, white, new, 14s to 15s per windle of 220 lb., ditto red, 13s 9d to 14s 6d; oats, old, 3s 6d to 3s 8d per bushel, new, 2s 11d to 3s; oatmeal, 27s 6d to 28s per load of 240 lb; beans, 16s 6d to 17s per windle of 220 lb; bran, 12s 6d to 13s.

Reading, Saturday. — The attendance again was rather small, and there was not a lot doing. Prices:—wheat, 30s to 36s; winter barley, 26s 6d to 29s; malting barley, 26s to 33s: old oats, 21s to 23s; new, 17s to 20s; beans, 33s to 37s; pease, 29s to 31s.

Retford, Saturday.—The close of harvest affected the attendance here, which was thin, and the supply of grain small. New wheat fully 1s per qr dearer, and worth 34s to 35s; old extremely scarce. A few samples of malting barley were offered, for which there was a fair demand at 27s to 29s, and really tip top lots made up to 30s per qr, but prices still unsettled. Grain for feeding purposes kept well up to the mark in value, maize making 27s to 27s 6d; grinding barley, 27s; new oats, (of which there is a big yield in this district), 18s to 19s; and old oats, 25s per qr.

Ripon, Thursday.—A few samples of new grain on offer. Business quiet, light attendance. Old wheat made 36s to 37s; new wheat, 34s; wheat, foreign, 38s to 41s; barley, grinding, 27s to 28s; barley, malting, 28s to 30s; new oats, 20s; old oats, 24s to 26s; maize, round, 27s to 27s 6d; maize, flat, 27s to 28s per qr; bran, £5 to £5 5s per ton.

Sheffield, Tuesday.—New grain comes to market very slowly yet, and last week's prices are well maintained. New wheat in good condition finds a ready market, and foreign is quoted at about 6d per qr higher again. Maize, oats, and beans firm and unchanged. Barley slightly easier. Peas scarce, new blue peas making prices above usual values for new grain. Quotations:—Wheat, white, new, 36s 6d to 37s; ditto red, new, 36s 6d to 37s per 504 lb; oats, black, 24s to 25s; ditto white, 24s 6d to 25s per 336 lb; peas, grinding, 34s 6d to 35s; ditto blue, new, 55s to 75s per 504 lb; beans, English, 37s to 37s 6d per 532 lb; barley, grinding, 27s to 27s 6d; ditto malting, 28s to 32s per 448 lb; Indian corn, small, 26s 9d to 27s; ditto Plate, 26s 9d to 27s; ditto flat, 29s to 29s 6d per 480 lb; bran, 100s; fine sharps, 135s; broad bran, 110s per ton.

Shrewsbury, Saturday.—Old wheat, 15s to 15s 6d per 225 lb; new, 14s to 14s 6d; old oats, 15s to 16s per 225 lb, new 11s 2d to 12s per 200 lb.

Stamford, Friday.—Attendance very meagre. New corn was shown in surprisingly small quantity. New wheats were advanced to the extent of 1s per qr on the week, from 33s to 33s 6d per qr; new black winter oats made 18s; white ditto, 17s 6d to 18s 6d; lack of inquiry for barleys; new beans 31s, and old ditto 38s per qr. Peas in small supply, and were a drug on the market.

Stockton, Wednesday. — Old wheat made about 36s 6d per qr. The first sample of new wheat was shown. Foreign wheat keeps firm, but with the fine weather the demand was only very limited at last week's prices. Maize 3d lower on the week. Oats plentiful, and offered at lower prices.

Tunbridge Wells, Friday. — New white wheat, 32s to 34s; new red ditto, 30s to 32s; barley, 27s to 32s; grinding ditto, 24s to 25s; oats, English, 20s to 23s; rye, 24s to 26s; peas, 30s to 31s; beans, 31s to 34s; tares, 42s to 48s; maize, 23s to 25s.

Warwick, Saturday.—Fair supply of new grain on offer, making from 12s to 12s 3d per bag. Feeding stuffs another turn dearer.

Wisbech, Saturday.—A moderate supply of new grain at market. Wheat 1s per qr dearer on the week. Good dry reds, 34s to 35s per 504 lb. Oats dearer; 18s to 19s per 336 lb. Barley, 25s to 29s per 448 lb.—JAMES FLETCHER.

Wolverhampton, Wednesday.—There was only a moderate attendance of farmers and dealers, and prices were unchanged.

Worksop, Wednesday.—Moderate attendance, with larger show of grain. There were several samples of nice dry new wheat on offer, which made 34s to 34s 6d per qr.; also a few samples of new barley, in very good condition, which made 28s to 30s per qr. New white oats were a moderate show, at last week's prices. Prices:—White wheat (old), 37s to 38s; new ditto, 34s to 34s 6d; red wheat (old), 30s to 37s; new ditto, 32s to 34s; new malting barley, 28s to 30s; grinding barley, 27s 6d to 28s 6d; white oats (old), 25s to 26s; ditto (new), 18s to 20s; black oats (old), 24s to 25s; ditto (new), 18s to 20s; maize, 28s to 29s per qr. Flour, 1s 4d to 1s 7d per stone. Fine sharps, £7 to £7 10s; barley meal, £7 6s 8d to £7 15s; bran, £5 10s to £6 10s per ton.

Yeovil, Friday.—Millers were ready buyers of new wheat at 6d to 1s per qr above last week's rates, and foreign sold for a similar advance. Oats, barley, and maize firm, and without change, but rye and vetches were dearer. Best English white 35s to 37s; secondary, 30s to 34s; winter barley, 26s to 28s; grinding, foreign, 24s 3d to 24s 6d; maize, round, 25s 6d to 26s; flat, 26s 6d; oats, old, 20s to 24s; winter oats, 17s 6d to 18s 6d; white 18s to 19s; Irish black, old, 20s to 21s; white, 22s to 22s 6d; new beans, 35s to 36s; rye, 26s to 28s; vetches, 6s 6d to 7s 6d per bushel. Demand for flour good, business passing on the basis of 28s 6d for fines. Meals and offals continue in good request at increasing values.

York, Saturday.—Rather more new grain on offer. New wheat made 33s to 35s per qr of 36 stones. Barley, the quality of which varies very much, ranged in price from 26s to 30s per qr of 32 stones. Oats realised 19s to 21s per qr. of 24 stones. Beans, peas, and maize firm. Flour has advanced 1s per sack.

FOREIGN.

Hamburg, Saturday.—The weather continues favourable for autumnal field work. Market animated, wheat, rye, and feeding barley being in brisk demand at rising prices. German wheat in scanty supply; dry lots are readily taken by our millers at prices equal to 37s to 39s 6d per 504 lb. f.o.b., duty deducted. American hard winter, No. 2, is selling at 38s; red winter, No. 2, at 37s to 37s 6d per 480 lb c.i.f. Hamburg; 79 ko. River Plate, February-March, 37s 6d. Rye firm in value; 9 10/15 Taganrog afloat is held 34s 6d; American Duluth No. 2 at 34s 9d per 480 lb, ex ship, Hamburg. Good Bohemian barley is taken by our brewers at 36s to 38s, Saale and East Prussian at 35s to 41s per 448 lb, Danish of common quality is held at 31s to 32s, fine Bohemian and Slooakian at 39s 6d to 43s 6d per 448 lb f.o.b., 60/61 ko. ko South Russian barley scarce and selling at 22s 9d to 33s per 400 lb, c.i.f. Hamburg. Fine white Holstein and Pomeranian oats are offering at 19s 6d to 20s 6d per 336 lb, c.i.f. Odessa and River Plate maize firm at 24s 6d to 24s 9d per 480 lb, c.i.f. Hamburg.—JOHN TATLOCK

FEEDING STUFFS.

Mark Lane, Monday.—Linseed Cake: The tone of the market has generally improved during the past week, with a greater volume of business passing at advanced prices, and there are indications of even higher values as the demand increases, as it undoubtedly will do during the coming winter months. Russian remain scarce, and sparingly offered at £7 7s 6d to £7 8s 9d in mats, and £7 10s to £7 12s 6d in bags. East India seed pures are nominally quoted at £7 8s. 9d. to £7 10s. Fine seedy Calcuttas command £7 10s to £7 12s 6d. London made attract most attention, being relatively good value at £7 12s 6d to £7 15s. Cotton cake.—Only a limited quantity of Egyptian is available on spot, and needy buyers are compelled to pay full prices of £4 18s 9d to £5, while for shipment a fraction less would be accepted. English being in limited production maintain their values of £5 to £5 2s 6d, and Bombays at £4 5s. Decorticated.—London made pures meet a ready sale at £7 2s 6d to £7 5s, and special digestive meal at £5, with American brands of cake and meal quoted at £6 17s 6d to £7. Rape cakes do not offer. Maize germ meal.—White American is not obtainable for present delivery, and English manufacturers have again raised their prices, and are to-day asking £6 10s to £6 12s 6d. Maize gluten meal is in good request at £6 10s. Rice meal.—The market is bare of stocks of Rangoon, and shippers now quote £5 5s ex ship terms for autumn shipments. Locust beans remain excellent value at £5 10s for whole and £5 17s 6d for kibbled. Dried brewers' grains are the turn dearer at £5 to mix, and £5 5s for ale. Nitrate of soda is without change at £11 2s 6d ex quay.—Peruvian Bros., 30, Mark Lane, E.C.

Liverpool, Friday. Nitrate of soda values firm, but demand quiet. The autumn manuring season will soon be on, and there are inquiries for forward deliveries of kainit and phosphatic fertilisers at late values. Feeding stuffs are more inquired for, but the late advances somewhat check business. Indian corn, however, continues to steadily advance.

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, Monday, 3 P.M.

The salient fact of to-day's market is that a full week of quite extraordinarily fine weather for the time of year has passed without causing depression. Sunshine for once has not taken the life out of Mark Lane, as it is commonly said to do. The supply of English wheat to-day showed a notable increase, but condition was much improved, and by the judicious admixture of strong old foreign sorts millers will be able to use a good deal more of it for October deliveries to bakers than seemed at all likely a fortnight ago. With improved quality and condition value was naturally firm, especially as foreign, after a period of hesitation, was again tending dearer. Barley recovered 3d of its recent fall in Russian, and was firm for all other kinds. Oats were rather cheaper for new English, but were firmer for foreign. Maize was 6d up for flat, 3d for round and yellow corn.

THE FLOUR TRADE.

MARK LANE, Monday, 3 P.M.

Top-price flour has settled down with a good steady trade at 33s. net cash. Owing to the scarcity of Hungarian and Belgian the trade in this ancient standard is better than it has been for years.

London household flour was firm to-day, and looked like going 6d to 1s dearer. We do not, however, quote that rise as obtained. There is a growing practice of putting up prices after the close of a market which enables the next market to open with a fixed and known value, and also operates as a premium upon the prompt giving of orders. Country flour was inclined to be dearer for all the chief sorts, and American was also on the upgrade.

Ricemeal was obtainable at a moderate price, but maizemeal and wheatmeal favoured sellers, and the values of bran, pollard, and middlings remain high.

CLOSE OF THE MARKET.

THE MARKET CLOSED WITH INQUIRY GOOD, THOUGH NOT BUOYANT. THE FULL STRENGTH WOULD BE EXPRESSED BY ADDING 6D. TO THE ABOVE QUOTATIONS, BUT IT WOULD NOT BE ACCURATE TO SAY THAT THE EXTRA 6D. WAS ALWAYS OBTAINED.

THE BALTIC.

Monday, 1 P.M.

State of Trade.

The cargo market opened in sellers' favour for wheat, barley, oats, and maize; steady for beans, peas, linseed, and rapeseed; and in buyers' favour for cottonseed only.

Business Done.

Wheat.—Best Russian Winter, 42s 6d per 492 lb, October shipment; Roumanian, 39s 9d per 492 lb, October shipment; Australian, 40s 6d per 480 lb, on passage; Argentine, 40s 3d per 480 lb, prompt shipment; White Karachi, 39s 6d per 492 lb, prompt shipment; Red Karachi, 39s per 492 lb, prompt shipment; Best Manitoba, 41s 6d per 480 lb, October shipment.

Maize.—American, 27s per 480 lb, October shipment; Argentine, 26s 3d per 480 lb, October shipment; Russian, 27s 3d per 480 lb, October shipment; Cinquantina, 29s per 480 lb, October shipment.

Barley.—Russian, 23s 3d per 400 lb, October shipment; Californian, 32s per 448 lb, October shipment.

Oats.—Russian, 15s per 304 lb, October shipment.

GRAIN AND FLOUR FACTORS REPORTS.

Flour.—Very strong wheat markets have forced flour prices up another 6d per sack, with a fair demand. Grain.—American corn scarce on spot. Maize is 3d per boll dearer. The trade for foreign oats is now more limited, as home-grown oats are offered freely. Beans, none on quay, quiet to arrive. Pease, a retail trade at full rices. New oatmeal 1s to 2s per sack lower. Oilcake firm and inactive. Mill Stuffs.—The brisk demand continues. Winter wheat patents, 29s to 29s 6d per 280 lb; spring wheat patents, 31s to 31s per 280 lb; American corn, 16s to 16s 3d per 280 lb; round corn, 15s 4½d to 15s 6d per 280 lb; grinding beans, 18s 9d to 19s per 280 lb; white pease, 19s to 20s 3d per 280 lb; broad bran, 112s 6d per ton; medium bran, 105s to 107s 6d per ton; fine thirds, 135s per ton; common thirds, 112s 6d per ton; American oilcake, 147s 6d to 150s per ton.—McKinnon and McDonald (Glasgow).

Offals.—There is no change to report in bran. The demand continues steady, and prices are firm.—Greenhill Bros. (Belfast).

Flour.—In the past few days there is greater firmness in the flour trade, and a more active demand. Quotations are mostly 6d to 1s per sack higher, with tendency still upward.—Greenhill Bros. (Belfast).

Flour.—Trade to-day has been quiet but very firm, offers being scarce. Prices show a further rise of 6d to 9d on the week.—F. L. Medill and Sons, Ltd.

The trade remains firm, with prices still against buyers. Difficulty is experienced in getting delivery of middlings and pollard. Bran also scarce.—John Bawcomb and Co.

Arrivals of wheat are large. The trade is firm, and prices are 1s per qr higher since last Monday. Flour is 6d a sack higher. Maize 6d to 6d, barley 9d to 1s, and oats 6d per qr dearer.—Coventry and Sheppard.

TERM MARKET.

The market in futures to-day is rather excited, and quotations are difficult; 8s 1d per cental is asked for December delivery of red American winter wheat, and 8s is offered. There are holders who ask 8s 2d for delivery at any date in 1908. Maize is hardly quotable; nothing is offered for 1907 delivery under 27s per 480 lb., and for 1908 delivery there are no speculative sellers, the new crops in America and Russia being awaited before the winter business opens.

HOPS.

Borough, Monday.—The market opens this week with a good demand, and prices are fully 5s to 10s per cwt. in advance of those ruling last week for all good hops, and we also have to record a much better demand for the second qualities, which are finding buyers at prices that could not be obtained when the season opened. Choice hops are exceedingly scarce. The crop of Goldings is now practically picked and comes down lighter than all published estimates, and it is now certain that the crop will be only equal to 160,000 old duty.—W. H. and H. Le May.

PROVISIONS.

London, Monday.—Bacon: The arrivals of bacon last week were:—From Ireland, 2,557 bales, and from foreign ports, 13,889 bales. There was a steady, quiet market for bacon throughout the week. Quotations ranging:—Irish, 57s to 60s up to 66s; Danish, 52s to 60s up to 64s; Canadian, 54s to 56 up to 60s. Butter: There was a good demand for most descriptions of butter:—French, 94s to 106s; Danish, 115s to 119s; Russian, 80s to 100s; Dutch, 106s to 108s; Irish, 88s to 115s; Canadian, 108s to 110s; Victorian, 88s to 102s; New South Wales, 94s to 110s; Queensland, 86s to 102s; New Zealand, 106s to 110s. Lard.—Lard was a quiet market. Irish, 50s to 58s; Danish, 48s to 50s; American, 48s to 50s.

POTATOES.

Berwick, Saturday.—Ample supply, and a good trade at 65s per ton.

Borough, Saturday.—Good offerings met with fair support. Epicures, 70s; Blacklands, 70s; British Queens, 70s to 75s; and Up-to-Dates, 70s to 80s per ton. Dutch, 3s 3d per bag.

Carlisle, Saturday.—Fair supplies, and a steady demand at 7d to 8d per stone.

Doncaster, Saturday.—Good supply, and fair demand. Prices higher, and from 3s 6d to 4s per cwt.

Goole, Wednesday.—Attendance very small. Little business was passing. A few lots of Warps were making 65s to 70s per ton.

Malton, Saturday.—Little lifting has been done as yet, and supplies are small, and prices nominally unchanged. Retail good qualities, 8d to 9d per stone.

Manchester, Saturday.—Potatoes: Yorkshire, 10s to 11s; Cheshire, 7s 6d to 8s 6d; Lincoln, 9s to 10s: Bedford, 3s 6d to 5s per cwt.

Preston, Saturday.—Last week's prices of 10s 6d to 11s per load of 240 lb were again repeated.

Retford, Saturday.—The market was well supplied, and the best lots of home-grown made 7s 6d, secondary qualities 5s 6d to 6s 6d per load.

Spitalfields, Saturday.—Trade quiet, arrivals being ample for requirements. Epicures, 70s; Sharp's Express, 75s to 80s; Blacklands, 70s to 75s; Up-to-Dates, 75s; British Queens, 75s to 80s per ton; French Beauvais, 3s 6d; Dutch, 3s 3d per bag.

Stockton, Wednesday.—Potatoes, £4 to £4 5s per ton.

Whitby, Saturday.—Potatoes, 10d per stone.

Worksop, Wednesday.—Good supply, which made 7s 6d to 8s per load of 18 stones.

York, Saturday.—Only a small supply. Trade steady, at 62s 6d to 65s per ton.

HAY AND STRAW.

Birmingham, Friday.—Small supply; no quotations obtainable.

Derby, Friday.—Best old clover, 90s to 100s; new, 80s to 90s; best old hay, 90s to 100s; new, 80s to 90s; seconds, 65s to 70s; wheat straws, 60s to 70s; pressed straw, 50s to 60s; chop straw, 55s to 65s; peat moss, 35s to 40s.

Leeds, Tuesday.—Trade is fairly brisk for the limited supplies old hay now available at the warehouses. Quotations:—Old clover hay, 7½d; ditto meadow hay, 7d; wheat straw, 5d; oat straw, 5d; and rye straw (retail), 7d to 8½d per stone.

Lincoln, Friday.—Best quality new hay and seeds, 55s to 60s; secondary ditto, 50s. per ton on the ground. Old hay scarce and dear, at 100s. per ton on the ground. Straw, 35s per ton at the stack.

Manchester, Friday.—Clover, old, 7d; new, 5½d to 6½d; straw, oat, 3½d to 4d per stone.

Newcastle, Tuesday.—Old land hay, from £4 5s to £4 7s 6d per ton; new land hay, £5 5s to £5 7s 6d; this year's growth, £4 5s to £4 7s 6d; clover hay, £5 5s to £5 7s 6d; oat straw, £1 2s.

Nottingham, Wednesday. — Full market, which met with a slow sale. Quotations:—Inferior to good hay, 50s to 65s; prime ditto, 70s to 80s; inferior to good clover, 65s to 75s; prime ditto, 75s to 85s; wheat straw, 45s to 55s; swede turnips, 20s to 22s; old hay, 90s to 100s; old seeds, 95s to 105s per ton.

Whitechapel, Saturday.—Smaller arrivals met a better demand at current rates:—Best clover, 84s to 95s; inferior, 72s to 80s; specially picked hay, 87s; good, 76s to 85s; inferior, 65s to 70s; mixture and sainfoin, 77s 6d to 87s 6d; straw, 28s to 34s per load.

WET AND DRIED GRAINS.

Mark Lane, Saturday.—Wet Grains: Prices have ruled a trifle higher on the past week, and business has been done at ale 15s, and porter 12s 6d per ton on rail, London. Dried Grains.—As reported in the last two or three weeks, the high prices stop consumptive trade, and prices remain at the same figures:—Ale, 92s 6d; mixed, 86s 3d per ton, in buyers' bags, ex factory; American cane treacle, 90s per ton; and kiln-dried sea-damaged Australian wheat from 20s per qr.—Hamlyn and Co., 37 and 38, Mark Lane.

Five Years' Comparative Averages.

(OFFICIAL.)

Comparative statement of grain sales and prices to the Statute markets for the week ending September 21, and for the corresponding week in each of the years from 1903 to 1906:—

Milch cows, per head, £16 to £23 10s.

British arrivals include as follows:—Scotland, nil; Eastern Counties, 30; Midland, Home, and Western Counties, 845; Devon, 25; Ireland, 150.

We note to-day an increase of 80 head compared with Monday last, the majority of the supplies being drawn from the Midland Counties and Ireland, these latter comprised 54 Dublins and 36 Waterfords, for which an extremely slow trade was experienced, sellers being obliged to accept a decline in value to effect sales. For both prime and second quality English cattle trade also ruled of a slow and steady nature (partly owing to the overstocked state of the Dead Meat Market) at a decline in value; whilst fat cows and bulls were slow of sale, but were able to maintain late currencies.

There was an increase of 430 in the number of sheep and lambs penned compared with Monday last. Trade opened of a firmer and steadier nature, and continued so throughout the day for all grades of English sheep, late currencies being well upheld. Scotch sheep numbering precisely the same as on Monday last, were slow of sale; however, no decline in value is noticeable, whilst Irish were in larger numbers and sold steadily, last week's currencies governing all transactions. With regard to lambs, the season for which is nearly at an end, the inquiry was very limited, the supply included 300 Scotch, 1,040 Irish, and 373 from the Eastern Counties.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

	To-day. s. d.	s. d.	Monday, Sept. 24, 1906. s. d.	s. d.
8 st Scotch	5 10 to 6	0	5 10 to 6	0
7½ to 8 st Downs	6 0 to 6	2	5 6 to 5	8
9 st. Downs	5 10 to 6	0	5 6 to 5	8
10 st Halfbreds	5 6 to 5	8	5 4 to 5	6
10 st Yorkshires	—		—	
12st Lincolns	—		—	
10 st Irish	5 4 to 5	6	5 2 to 5	4
10 st Down Ewes	4 2 to 4	4	4 2 to 4	4
11 st Halfbred ditto	4 0 to 4	2	4 0 to 4	2
5 st Down Lambs	6 6 to 6	8	6 10 to 7	0
6 st Halfbred ditto	6 2 to 6	4	5 8 to 5	10

Calf trade not worth noting or quoting.

No pigs on offer.

N.B.—Just as our report was leaving a consignment of Irish stores were placed on the market, comprising two and a half-year-old heifers and bulls, also a few yearlings; the two former were quoted at £11 per head, and the latter £7 10s.

London (Central), Monday.—Moderate offerings, and trade quiet. Beef, English, 3s 6d to 3s 9d; Scotch, 4s to 4s 6d; American, 3s 4d to 3s 9d; refrigerated hindquarters, 3s 8d to 4s 2d. Mutton, English wethers, 4s 4d to 4s 8d; ewes, 3s 6d to 3s 10d. Lambs, 4s 8d to 5s 4d; Scotch tegs and wethers, 5s to 5s 4d; ewes, 3s 6d to 3s 10d. Veal, 3s 8d to 4s 8d. Pork, 3s 8d to 4s 4d per stone.

St. Ives (Hunts) Monday.—Fat and store cattle, sheep and pigs a good demand; milch cows a short supply, and in good demand. Prices: Beasts (392), 7s 3d to 7s 8d; sheep and lambs (1,584), 8s 2d to 10s 6d, and 9d to 10d; pigs (456), 6s 3d to 7s; milch cows, £13 to £21.

FOREIGN.

Deptford, Monday.—Beasts 754. To-day's supply, compared with Monday last, showed a decrease of 281 head, the supply consisting entirely of shipments from the United States. Trade ruled of a fairly steady nature, at Saturday's values. The best on offer were quoted at from 4s 1d to 4s 3d ex 4s 4d; seconds, 3s 10d to 4s per 8 lb (offal given in). On Saturday 1,650 beasts from the United States and 150 from Canada were offered for sale. Trade ruled of a slow nature, with a downward tendency in value. Besides the above, 250 States and 300 Canadians were withheld from sale. The best States on offer were quoted at from 4s 1d to 4s 3d, ex 4s 4d; seconds, 3s 10d to 4s; Canadians, 3s 10d to 4s; seconds, 3s 8d to 3s 10d per 8 lb (offal given in).

Liverpool, Monday.—Smaller supply of cattle. Demand good for finished qualities, but late rates barely maintained. Rough and middling sorts in poor demand at lower prices. Sheep and lamb supply also smaller, demand fair, and prices slightly better for choice qualities; other sorts unchanged. Beef, 6½d to 5d per lb; mutton, 8½d to 6d; lamb, 8½d to 7d. At market 1,362 cattle and 8,590 sheep.

FEEDING STUFFS.

Mark Lane, Monday. — Linseed Cake. — Supplies of foreign continue small. The market is firm, but not active. Decorticated Cotton Cake and Meal not much doing, the high prices preventing consumption. Ordinary Cotton Cake small supplies; rather dearer.

Linseed Cakes.	£ s. d.	Per ton. £ s. d.
English Linseed Cake, ex mill	7 12 6	to 7 17 0

SEEDS.

Mark Lane, Monday.—The continued fine weather is improving the demand for trifolium, prices unchanged. Rape rising. Mustard, fine samples, useful prices. Rye in good demand, prices very firm. Winter tares moving freely, prices reasonable. Peas little more improvement, but prices unsettled. English trefoils firmly held. Foreign relatively dear. Alsika, white, and red clover firm. In grasses, Italian and Perennials higher.—John Picard and Co.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

The trade for fat beasts at Islington, both in regard to prime and second quality, opened with more life, and continued so throughout the day, the tendency in regard to value being in favour of the seller, occasionally an advance of 2d. per 8 lb. being both asked for and obtained. The Irish arrivals consisted of 59 Dublins and 88 Waterfords, the former of which were quoted 1d. per 8 lb. higher than the previous week. Fat butchering cows and bulls were in average numbers, all sales being governed by late rates. On Thursday the supply consisted as usual of fat cows and bulls from the south-western counties. Trade ruled of a slow nature, but no alteration in regard to value was noticeable.

At the Foreign Cattle Market, Deptford, markets were held on Monday and Saturday; trade ruled of a slow nature, the tendency in regard to value ruling slightly in favour of the seller on Monday, with a fall in value on Saturday. The total number on offer at both markets was 3,865 as against 4,060 during the preceding week, consisting of 1,030 British (decrease 20) and 2,835 foreign, (decrease 175), these latter comprising 2,267 from the United States and 568 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal) :—80 to 90 stone Devons, 4s. 8d. to 4s. 10d.; 90 to 95 stone Herefords, 4s. 6d. ex 4s. 8d.; 95 stone Runts, 4s. 2d. to 4s. 4d.; 100 stone Shorthorns, 3s. 10d. to 4s.; 110 stone ditto, 3s. 8d. to 3s. 10d.; 95 stone Irish, 4s. 2d. to 4s. 4d.; 90 stone States, 4s. 2d. to 4s. 4d. ex 4s. 5d.; 95 stone Canadians, 4s. to 4s. 2d.; 90 stone fat cows, 3s. 4d to 3s. 6d.

The sheep trade at Islington was of a firmer and steadier nature, with an advance of 2d. per 8 lb. in value for both English wethers and ewes. Scotch and Irish descriptions proved an exception to the foregoing remark, these being in larger supply and meeting with no corresponding increase in the demand, sellers were obliged to be content with late currencies. On Thursday all sales were governed by Monday's prices. Lambs were offered for sale on both days, but were somewhat difficult to vend, nevertheless no further decline in value can be quoted. No sheep were shown at Deptford. The total number of sheep penned at both markets was 5,410, as against 5,390 during the preceding week, this showing an increase of 20. Best pens made per 8 lb. as follows (offal given in) :—7½ to 8 stone Downs, 6s. to 6s. 2d.; 8 stone Scotch, 5s. 10d. to 6s.; 9 stone Downs, 5s. 10d. to 6s.; 10 stone Irish, 5s. 4d. to 5s. 6d.; 10 stone Downs, 5s. 8d. to 5s. 10d.; 10 stone Halfbreds, 5s. 6d. to 5s. 8d.; 10 stone Down ewes, 4s. 2d. to 4s. 4d.; 5 stone fat Down lambs, 6s. 6d. to 6s. 8d.; 6 stone Half-bred ditto, 6s. 2d to 6s. 4d.

Calves numbered 30, and on Thursday were quoted 4d. per 8 lb. higher, the best on offer making from 5s. 2d. to 5s. 4d. per 8 lb. (offal given in).

Trade in the West.

Grazing cattle, as might naturally be expected, are in very keen request everywhere, and not only for the fresher-condition bullocks, ready for finishing off, but equally so for younger stock—stirks and yearling heifers. The more forward kinds of graziers now command a free sale at £24 to £30 or £31 per pair, and, with fat beasts keeping up to their present level, they are not very likely to recede in value. With a keen enquiry for animals suitable for town milk walks, many of which are now making up their numbers for the winter trade, sellers are very firm in their demands, more particularly for heifers of a good class and also for cows of a reliable character, the range for which may now be given at from £17 to £21 or £22 (for the very best young heifers, and £15 to £17 or £18 for cows); the plainer kinds realising from £14 down to £11 or £12 for cows almost if not quite played out as milchers. In-calvers are also very saleable at from £12 up to £15 and over according to their seasons. The sheep trade is even more buoyant, the prices now ruling being some shillings in advance of the ordinary range of prices at this time of the year, the rise being quite 5s. at Beaminster on Thursday, with a quick trade at the advance. Ewes may be quoted as selling from 45s. up to 65s. apiece (made at Beaminster) for flock purposes; grazing sheep, 34s. to 44s.; chilver and wether lambs (for keeping on), 35s. to 45s.; mixed lambs, 35s. to 47s.; and culls from 24s. to 33s. 6d. And every sheep or lamb that can be bought is caught up with a keenness seldom witnessed almost at the fag end of a season, when as a rule most buyers have had their requirements met. Store pigs are difficult to procure despite the high prices buyers are prepared to pay.

Supplies of fat stock, either beasts or sheep, are by no means too plentiful at any of the markets, and this circumstance gives considerable tone to sales. Ripe fat steers and heifers readily make 11s. 6d. to 12s (or from £16 to £23 apiece); seconds, 11s.; fat cows, 9s. to 10s. (or £14 to £18); and coarse bulls, 8s. to 9s. Mutton seems to be getting scarcer and scarcer, and prices are becoming correspondingly dearer; wethers now sell up to 60s. apiece (or 8½d. to 9d. per lb.); ewes, best, 46s. to 58s. (or 7½d. to 8¼d); and lambs, heavy wethers, 46s. to 58s. (or 10d. to 11d. per lb.); smaller lambs of poorer finish, 9½d. Calves keep very scarce, and prices rule correspondingly high—9d. per lb. and over for best finished lots, and 8d. to 8½d. for seconds. The pig trade keeps firm at 10s. 6d. to 11s. for best porkers; 9s. 6d. to 10s. for baconers; and 8s. to 9s. for coarse weights.

Trade in Scotland.

The number of fat cattle on offer was much smaller, and the quality rather under an average. An active trade has been experienced, and prices have advanced from 20s. to 25s. per head over last week, with hardening prices at the close. Sheep have also been shown in fewer numbers. These have experienced a better trade, and have advanced nearly 2s. per head. Fat lambs were also in demand at a little rise. Fat calves considerably dearer, while pigs maintained previous prices. There was a fair supply of store cattle, but owing to the backward harvest farmers are not yet prepared to buy, and a quiet trade has been experienced at prices slightly favouring buyers. Store sheep of a good class met a good inquiry at previous prices, but secondary kinds were left. Milch cows a fair show, and they met a trade quite equal to that of last week. Quotations :—Top price of cattle per live cwt., 40s. 6d.; current, 35s. 6d. to 38s.; mutton, to 9½d. per lb.—John Swan and Sons, Ltd.

Trade in Ireland

There was a good attendance of buyers on Thursday last, and buying was more satisfactory, as reports from English markets were better. There was a decrease of 160 cattle and 760 sheep, there being 4,203 beasts and 9,066 sheep. The market opened better for useful descriptions of cattle, with a tendency against buyers. Bullocks and heifers made (liveweight) 29s. to 31s. per cwt., the approximate (dead-weight) prices for prime beef, from 51s. to 52s. 6d., with extra quality up to 54s.; medium beef, 48s. to 50s.; and inferior beef, from 44s. to 46s. per cwt. Sheep trade was confined to small or medium weights. Wethers were in fairly good request, making from 7d. to 7¾d.; good ewes making from 6½d. to 7d. per lb. Heavy sheep were a drag, and difficult to quote for; good fat lambs, were worth from 30s. to 40s.; while some of extra quality went up as far as 45s. each. Best veal was worth 8d. per lb.; second quality, 7d. to 7½d., and inferior veal very slow and cheap. A good show of milch cattle. But although there was a good attendance of buyers trade was quiet. Best fresh cows brought £15 to £20 each, and other descriptions in proportion.

Store cattle were not much dealt in on the open market, but a good deal was done at the auction sales. Small offering of pigs in the market, with a good attendance of buyers. Competition was keen for the better classes of hogs, and last week's depression was overcome, values showing an upward tendency. Choice light-weight pigs were from 52s. to 53s., and in a few cases 54s. per cwt. Heavy baconers, 48s. to 51s. per cwt.; coarse pigs, 36s. to 42s. 6d. per cwt.

LONDON.

Central Market, Friday.—Fair supplies, and trade continues slow., prices barely maintained for beef. English beef, 3s 6d to 3s 9d; Scotch sides, 4s to 4s 2d; shorts, 4s 4d to 4s 8d Deptford and Liverpool killed, 3s 4d to 3s 9d refrigerated hindquarters, best, 4s to 4s 2d; ditto seconds, 3s 8d to 3s 10d; ditto forequarters, 2s 4d to 2s 6d; inferior beef, 2s 2d to 2s 8d; mutton, Scotch wethers, 5s to 5s 4d; ditto tegs, 5s to 5s 4d; ditto ewes, 3s 6d to 3s 10d; English wethers, 4s 4d to 4s 8d; ditto ewes, 3s 6d to 3s 10d; Dutch sheep, 4s to 4s 4d; English lamb, 4s 8d to 5s 2d; veal, 3s 8d to 4s 8d; English pork, 3s 8d to 4s 4d; Dutch pork, 3s 8d to 4s 2d per 8 lb.

Islington, Thursday. — Supply of beasts consisted entirely of fat cows and bulls, trade for which ruled slow, but fairly steady at last Monday's values Top prices paid per 8 lb as follows :—Fat cows, 3s 4d to 3s 6d; fat bulls, 2s 9d to 3s 2d. Decrease of 90 in number penned in sheep market compared with Thursday last. Sheep trade ruled steady, and last Monday's advance was well maintained. Lambs, however, were difficult to vend, even at the low rates quoted. Best pens made per 8 lb as follows :—7½ stone to 8 stone Down sheep, 6s to 6s 2d; 9 stone ditto, 5s 10d to 6s; 10 stone half-breds, 5s 6d to 5s 8d; 10 stone Down ewes, 4s 2d to 4s 4d 5 stone fat grass lambs, 6s 6d to 6s 8d; 6 stone half-bred ditto, 6s 2d to 6s 4d. Calves met slow trade, but were firmer in value. Quotations per 8 lb, sinking the offal :—Beasts, 2s 9d to 3s 6d; sheep, 4s 2d to 6s 2d; calves, best, 5s 2d to 5s 4d; lambs, 4s 10d to 6s 8d.

COUNTRY.

Ashford, Tuesday.—Beef trade very slow, bulk of the supply making 4s to 4s 6d. Mutton trade also quiet, Downs quoted up to 6s, small Kents up to 5s 8d, and barrens 4s to 4s 4d. Pork sold rather more readily, roasters making 3s 10d to 4s, and large hogs about 3s 8d.

Aylesbury, Wednesday.—About 600 sheep and lambs and 150 beasts were on offer, and consisted of some excellent quality stock. Although prices showed no advance on previous week trade was fair, nearly everything changing hands. Wethers made from 37s 6d to 59s 6d; ewes, 35s 6d to 57s; lambs, 32s to 44s 6d; heifers, £14 10s to £22 10s; and bullocks, £16 5s to £22 10s.

Basingstoke, Wednesday. — Prime Devon beasts, 7d to 7½d; ditto Shorthorns, 6½d to 7d; bulls, cows, and inferior, 5d to 6d; best sheep and big lambs, 9d to 9½d; second-class sheep, 7½d to 8½d; old ewes, rams, and inferior, 6½d to 7d; choice sucking lambs, 9½d to 10½d; fat calves, 6d to 7½d per lb; fat porkers, 10s 6d to 11s 6d per score.

Birmingham, Thursday. — Good supply of pigs; small supply of beasts and sheep; trade slow. Quotations :—Beef, 5d to 6½d per lb; mutton, 6½d to 8½d per lb; lamb, 8½d to 9d per lb; bacon pigs, 9s 6d to 9s 10d per score; cutting pigs, 9s 9d to 10s per score; sows, 7s 10d to 8s per score.

Bristol, Thursday. — Beef was in average supply, but demand not brisk and business slow, values receding to 60s per cwt. for best qualities and 57s for secondary. Sheep were less numerous than usual, and moderate business was done, prime wethers being reduced ½d per lb. Pigs were scarce, and prices unchanged.

Calne, Friday.—Prices of pigs: — In lots of not less than ten, on rail within 100 miles, 1s. per pig extra for delivery by road. Prime stores, 6 sc. 10 lb to 8 sc. 10 lbs, 9s 0d per score, 8 sc. 11 lb to 9 sc. 10 lb,, 8s 6d per score; 9 sc. 11 lb to 10 sc. 10 lb, 8s 0d Pigs outside these limits at their value.—C. and T. Harris and Co., Ltd.

Canterbury, Saturday.—Not quite an average market. A few cows and calves were offered, the average price being about £15. Good wether lambs sold at from 32s 6d to 31s 6d; good graft ewes, 33s to 34ss; good working lambs, from 24s 6d to 28s; and wether tegs, from 45s to 47s 6d.

Chester, Thursday.—Large supplies, and a good selection of stock. Demand again showed an improvement all round, and considerable business was done at very remunerative rates. Sheep market well stocked, trade being brisk, and prices again high. Quotations :—Milch cows, £17 to £22; calvers, £14 to £17; barrens, £10 to £13; heifers, £9 to £15; stirks, £6 to £10; sheep, 30s to 48s; lambs, 26s to 32s per head.

Dorchester, Saturday.—Messrs. Tucker and Son had fine supplies of everything except mutton at their Charles Street repository sale to-day, at which there was likewise a full attendance of buyers. Store cattle were in keen request, both for milk and grazing purposes, and a very firm trade resulted in outside values being paid all round. Dairy beasts, especially young heifers, of which some very good drafts were stalled, sold exceedingly well, and useful cows also found a free sale, the range for the former being from £16 up to £20 10s each, and for the latter from £14 to £17 5s for the best. From £24 to £28 may be given as a fair average

run for useful barreners in good condition; poorer class bullocks selling from £16 10s to £22 10s. Beef trade firm, ripe heifers making 11s 6d per score (or from £16 5s to £21 each); fat cows, 9s 6d to 10s 6d (or £14 to £17). Buyers of mutton found great difficulty in getting their wants supplied.

Dublin, Thursday.—A better selling market for cattle at last week's prices. Sheep a very slow trade, shipping hoggets and fancy light weights making late rates, heavy qualities favouring buyers, and in excess of requirements. Cattle—Live weight (best), 30s to 33s per cwt; secondary sorts, 26s to 28s per cwt. Mutton (dead weight), 6½d to 7¾d per lb.—Ganly, Sons and Co.

Edinburgh, Wednesday.—Trade was was dull, and supplies were middling in quality; half-bred lambs sold for 24s to 30s; Gray-faced, 20s to 22s; Cheviot ewes, 24s to 34s. Cattle short supply only. Quotations: Polled bullocks, £13 13s; Shorthorn cows sold at £21 to £26 5s; Ayrshires, £15 to £18 10s; crosses, £18 to £23.

Exeter, Friday.—Smaller supply of fat beasts; quiet trade. Steers and maiden heifers, 11s; cows, 9s 6d to 10s, many unsold. Much smaller supply of sheep; trade very quiet, only hoggs in demand, 9d; big wether sheep, 8d; ewes, 6½d. Less number of breeding ewes offered, and less demand, 40s to 45s; rams, 5d. Slackness of trade was due to unsatisfactory reports from the London dead meat market.

Glasgow, Wednesday.—Average number of cattle marketed, and for prime sorts a sharper trade was experienced; secondary and inferior classes also met better inquiry; top, 63s to 66s; secondary, 58s to 61s per cwt. Sheep and lambs were penned in average numbers, and for the best descriptions a good demand was experienced; other classes also met good inquiry; finest mutton, 8¾d to 9d; secondary, 8d to 8½d per lb. Finest lambs, 7d to 9d per lb.

Hereford, Wednesday.—A large supply of beef with a dragging trade, only the best heifer and bullock being sought after, and that making from 6½d to 6¾d; cow beef a slow trade, making 5d. Calves were a good supply, with trade firmer, veal fetching 7d. A large supply of fat and store sheep, with trade fairly firm; wether mutton 8d and ewe 6½d. Fat lambs, a fair supply met with a good call at 8d. Store lambs were in good demand. Porks a large supply at 5½d to 6d. A few bacons passed hands at 5½d. The store trade was dull. Few store cattle were on offer, and they experienced a slow trade.

Ipswich, Tuesday.—Messrs Robert Bond and Sons report an average supply of fat cattle, with a scarcity of prime qualities; a few of the best realised 9s per stone, but other descriptions were rather lower on the week. A good show of grazing cattle, including several choice lots of roan Shorthorns bred in Cumberland and Westmoreland. There was a fair attendance of buyers, and prices ruled slightly in their favour, but a good clearance was effected. Two years old Shorthorns in good condition, £11 to £12 5s; twenty to eighteen months, £11 10s to £9 15s; young growing steers, £9 to £7 5s; roan Polled two-years-olds, £13 to £12 17s 6d; eighteen months, £10 5s to £9; Irish calves, £5 7s 6d to £5 5s. The trade for dairy stock was extremely slow, only young animals freshed calved or near being in any demand. Shorthorns with calves by sides to £20 10s; red polls to £19 10s. Fat sheep were short and sold freely. Half-bred shearlings, to 62s 6d, Suffolks to 62s, Southdowns to 56s 6d, fat ewes to 56s 6d, breeding and grazing sheep were scarce and dear. Fat swine in request, recent values being well maintained.

Lincoln, Friday.—A small consignment of horned stock, and a fair trade. Young beasts made £9 to £11; strong ditto, £12 to £14; and milch cows, £17 to £21 per head. The sheep pens were well filled, and business ruled dull. Gimmers made 65s, ewes 58s, and lambs 36s to 44s. Lincolnshire rams, 5 gs to 11 gs, and Hampshire ditto up to 4 gs per head.

Lynn, Tuesday.—An average show of fat beasts met a fair trade, and made from 7s to 7s 9d. Stores were in very small supply, and with trade very slow realised from £6 to £14 each. Fat sheep were offered in average numbers, and trade was about the average, from 9s to 10s per stone; stores from 45s to 50s each; fat lambs, 30s to 40s; stores 32s to 40s each.

Manchester, Friday.—Beef: Firsts, 5½d; seconds, 4½d to 4¾d; thirds, 3½d to 3¾d. Mutton: Firsts, 7½d; seconds, 6½d to 6¾d; thirds, 5½d to 5¾d. Veal: Firsts, 6½d; seconds, 5½d to 5¾d; thirds, 4½d to 4¾d. Bacon pigs: Firsts, 5½d; seconds, 4½d to 5d; thirds, 3½d to 4d. Porket pigs: Firsts, 6½d; seconds, 6d to 6½d; thirds, 5½d to 5¾d per lb.

Newport, Wednesday.—There was a fair supply at this market, and moderately good business was done, prices being the same as last week.

Norwich, Saturday.—Fat cattle only fair, best making 7s 9d to 8s per 14 lb stone. Veal calves sold at 8s to 9s per stone. Fat sheep trade hardly so good, the best making 9d, second quality 8½d, and a few ewes 6¾d per lb. Pigs were in short supply, baconers fetching 6s to 6s 6d; porkers, 6s to 7s, and sows 5s per stone. Store cattle were mostly large beasts, and met a slow trade, best two and three-year-olds making £14 to £18; yearlings, £8 to £10 5s; and younger stock £3 10s to £6 10s per head. For store sheep trade was slow and dear, Suffolk shearlings made 50s to 64s; crossbreds 53s to 60s; and lambs, of which there were only two lots, 33s 6d to 44s. Store pigs were a small show, and met a good trade at 14s to 25s per head.

Nottingham, Saturday.—There was a fair show of stock, and trade for the best animals was good. In-calf cows made average prices, selling at £8 10s to £20 10s, and heifers, £15 to £18; calves made from 25s to 45s apiece. Sheep made average rates, there being a good show.

Preston, Wednesday.—Trade was slow for an average supply of stock, though prices were fairly well maintained. Local heifers were scarce. Local-fed heifers of choice quality realised 6½d to 6¾d; prime Irish, 6½d; young cows and bulls, 5¾d to 6d; heavy and secondary ditto, 5d to 5½d; choice hoggs and lambs, 8¾d; heavy and secondary ditto, 8d; prime ewes, 6½d; heavy ewes and tups, 5½d to 6d; and calves up to 7½d per lb.

Retford, Saturday.—First class milch beasts sold very well at this market, realising from £18 to £21 10s; secondary qualities down to £15; two-year-old steers and heifers showed no variation in value, selling at £10 to £12; yearlings, £6 to £8; and calves, 35s to 40s per head.

Romford, Wednesday.—Average supply of fat beasts; trade very slow. Best animals, 4s 4d to 4s 6d; middlings, 4s to 4s 2d per stone. Calves in short supply; trade about the same: best small, 5s 8d to 6s; larger, 5s 4d to 5s 6d per stone. Ewes in short supply; trade a little better, at 4s 2d to 4s 4d per stone. Lambs in short supply; trade about the same, at 6s 4d to 6s 8d per stone. A few store beasts on offer; very slow demand. Large supply of milch cows; trade good. Pigs in average supply; trade unchanged.

Sheffield, Tuesday.—More milch beasts shown than last week, and a sharper demand for the pick, which made £21 to £22 10s; secondary quality making £16 to £17 10s. No sheep penned.

Shrewsbury, Tuesday.—Usual supply of fat cattle, but smaller of store cattle, which had a slower trade. Good demand for fat stock, prices being well maintained. Store sheep a fair demand. Usual trade in calves and pigs. Quotations:—Beef, 6d to 6½d per lb; mutton (wether), 9d to 9½d per lb; ewes, 7½d to 8d per lb; lamb, 9d to 9½d per lb; veal, 7d to 7½d per lb; porket pigs, 10s to 10s 6d per score; bacons, 9s 6d to 9s 9d per score.

Stockton, Wednesday.—An average show of the best cattle, which, with few customers at the market, met with a slow trade at 7s 3d to 7s 6d per stone, rougher kinds selling at 6s to 6s 6d. Lambs made 9d per lb., young sheep 8½d, ewes 7d, and tups 6d to 6½d. There was no change in the pig trade, small porkers selling at 7s 3d per stone, mediums at 7s, and sows 6s to 6s 6d.

Thame, Tuesday.—There was again a very large entry of all descriptions of stock, including a large number of Down calving heifers. Trade for beef was not quite so brisk as the previous week, although a large number changed hands. Sheep still continue to sell well, a clearance being effected. Down calving heifers were in demand, and realised satisfactory prices. Bacon hogs and porkers eagerly sought after. Messrs. Bond and Burrows' sale comprised 135 fat beast and store cattle, 287 fat and store sheep, 91 fat and weaning calves, and 130 fat and store pigs. Fat oxen made from £16 to £20; fat heifers, £15 to £23 12s 6d; fat wethers, 52s to 60s; fat lambs, 36s to 52s; fat ewes, 48s to 60s 6d; fat calves, £3 to £3 17s 6d; weaning bull calves, 20s to 50s; cow calves, 26s to 58s; bacon hogs, £3 5s to £5 5s; porkers, 28s to 45s; small store pigs, 16s to 20s; large stores, 25s to 36s.

Truro, Wednesday.—Attendance very good, and business fairly brisk. Fat bullocks, 56s. to 60s. per cwt; barreners and store bullocks, 40s to 45s; cows and calves, £10 to £15 each; rearing calves, 25s to 40s; ewes, 42s to 48s; wethers, 7d per lb; ewes, 5d to 5½d; lambs, 7d; pigs, 8s to 38s each; beef, 6d to 8d per lb; mutton, 6d to 8½d; lamb, 8d to 9d; veal, 6d to 8d; pork 6d to 8½d; pork carcasses, 5d to 5½d.

Wolverhampton, Wednesday.—Trade slow all round; supply fair. Quotations:—Beef, 5½d to 6¾d per lb; mutton, 6½d to 9d per lb; lamb, 8½d to 9½ per lb; veal, 6d to 8d per lb.

Worksop, Wednesday.—Somewhat larger supply of stock, sheep in particular, with fair trade at about late rates, mutton alone being down at about ½d per lb. Best quality beef made 7s 6d to 8s, and secondary to 7s 6d per stone; South-down wether and cross-bred mutton, 8d to 8½d; best qualities and secondary, 7d to 8d per lb; ewes and other sorts, 6d to 6½d per lb. A few lambs made up to 9½d per lb.

York, Thursday.—Very few buyers were present owing to harvesting operations, and trade was very slow. The best of what few ewes were shown made up to 54s, and others from 48s to 52s. North Country gimmers, 48s to 54s; North Country lambs, 32s to 38s; best twice crossed lambs up to 37s; others 32s to 35s; and Masham lambs 23s to 26s each. A few Masham ewes were on offer, and made 40s to 48s. No English store cattle were shown, but there was a fair offer of Irish for an off-market. Buyers were, however, scarce, and only a few odd lots found purchasers. Small offer of newly calved cows, which met with a really sale at 17 to 20 guineas each.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Ample and varied supply; demand fairly brisk. Quotations for English produce:—Grapes, 6d to 3s; pears, 2s 6d to 4s per bushel; damsons, 1s to 1s 6d per half sieve; plums, 1s to 3s per half sieve; peaches, 3s to 12s per dozen; green figs, 1s to 3s per dozen; melons, 1s to 2s; cobnuts, 3s to 3s 6d; filberts, 2s 6d to 3s per 12 lb; apples, 2s 6d to 7s 6d per bushel; tomatoes, 3s to 3s 6d; scarlet runners, 1s 3d to 2s; green peas, 2s 6d to 4s per bushel; cauliflowers, 3s to 5s; cabbages, 2s 6d to 3s 6d; marrows, 2s 6d to 3s 6d per tally; cucumbers, 4s to 5s 6d per flat; endive, 1s 6d to 1s 9d per dozen; parsley, 1s 6d to 1s 9d; mint, 1s to 1s 3d; turnips, 1s 6d to 2s 6d; carrots, 1s 6d to 2s per dozen bunches; horseradish, 10s to 15s per dozen bundles; mushrooms, 7s 6d to 12s per 12 lb; cos lettuce, 6d to 8d per score; beetroots, 1s 6d per dozen bunches; potatoes, 60s to 75s per ton.

BUTTER.

(Price per lb.)

Altrincham: 1s 2d to 1s 3d. Appleby: 10½d to 1s. Barnstaple: 1s to 1s 3d. Birmingham: 1s 2d to 1s 3d. Camelford: 1s. Carlisle: 1s 1d. Chester: 1s 1d. Dartmouth: 1s 1d to 1s 3d. Derby: 1s 2d to 1s 3d. Devizes: 1s 4d to 1s 5d. Doncaster: 1s 1d. Dorchester: 10d to 1s 2d. Evesham: 1s 1d to 1s 2d. Hereford: 1s 1d to 1s 3d. Kidderminster: 1s 1d. Lincoln: 1s 1d to 1s 2d. Market Drayton: 1s 1d to 1s 2d. Otley: 1s 6d to 1s 7d per 24 oz roll. Penrith: 10½d to 1s 2d. Plymouth: 1s 1d to 1s 3d. Preston: 1s 2d to 1s 3d. Retford: 1s 2d. Ripon: 1s 6d to 1s 8d per 24 oz roll. Scarborough: 1s 3d. Spalding: 11d. Stamford: 1s to 1s 3d. Stockport: 1s 2d to 1s 3d. Totnes: 1s 2d to 1s 3d. Truro: 10d to 11d. Wellington (Salop): 1s to 1s 1d. Worcester: 11d to 1s. York: 1s to 1s 2d.

EGGS.

(Number per 1s.)

Altrincham: 4 and 8. Appleby: 9 and 10. Barnstaple: 10. Birmingham: 8 and 10. Camelford: 12 and 14. Carlisle: 8. Chester: 8 and 9. Dartmouth: 1s 1d to 1s 3d per doz. Derby: 9 and 10. Devizes: 10 and 12. Doncaster: 10 and 11. Dorchester: 1s to 1s 2½d per doz. Evesham: 1s 4d per doz. Hereford: 10 to 12. Kidderminster: 10. Lincoln: 9 and 11. Market Drayton: 9 and 10. Otley: 9 and 10. Penrith: 9 and 10. Plymouth: 11 and 12. Preston: 8. Retford: 2s to 2s 2d per score. Ripon: 8 and 9. Scarborough: 9. Spalding: 12. Stamford: 9 and 11. Stockport: 7 and 8. Totnes: 1s 2d to 1s 3d per doz. Truro: 1s to 1s 1d per dozen. Wellington (Salop): 10 and 11. Worcester: 9 and 12. York: 9.

HOPS.

Canterbury, Saturday.—There is little business doing, quotations ranging from 30s to 84s, with upward tendencies for all bright and coloury samples.

Halifax, Saturday.—Though inquiry is very plentiful just now, the amount of business done is restricted to rather small quantities, users awaiting the London sales, as to which, however, reduction in prices is not expected.

Worcester, Saturday.—Owing to the annual fair being held only last Thursday, there were not many growers at market to-day. Rather better prices were made, especially for anything with good colour, as it is seen what a small proportion there are of them. The foggy nights and hot sun during the day causing the hops still on the poles to lose colour. 1,339 pockets new hops have passed at public scales this week.—Charles Faram and Co.

CHEESE.

Glasgow, Wednesday.—Arrivals of home cheese were less this week. The floors are now well covered, and buyers are loth to respond to the extreme prices sought. Demand quiet, several lots of outstanding quality brought from 1s to 2s

above the quotations now given:—Cheddars, 58s o 62s per cwt; Dunlops, 56s to 60s. Canadians are quoted at 50s; demand slow.

Highbridge, Tuesday.—A rather dragging trade. A fair attendance of buyers, and ultimate clearance. Best Caerphilly dairies realised up to 54s 6d per cwt.; secondary dairies, 45s to 53s; and other dairies, 42s to 43s 6d. A few inferior lots failed to reach 39s. Cheddars, old, 54s to 75s; seconds and new, 66s to 72s; no doubles.

Newport, Wednesday.—There was an average attendance and a fair demand. Quotations:—Caerphillies, 42s to 50s per cwt; fancy dairies, 52s to 54s; Derbys, 60s to 63s; truckles, 58s to 60s; singles, 58s to 60s; Cheddars, 60s.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter.—All over Australia rain is needed, and if none should fall for another month the situation would become serious. On the other hand, if good rains fall in that time the whole aspect of affairs will be changed, and supplies of butter equal to last year will result. Foreign butter has advanced in price, Danish by 2s 3d per cwt, and French by 4s. The rise is due to the annual decline caused by the spring calving cows reaching the close of their lactation period, when their milk-giving powers are naturally at their lowest. Cheese.—The demand for Canadian has been slow and dragging, and holders for June and July cheese are more inclined to meet buyers than they were a week ago. August and September goods remain firm, but business in these lines is not by any means brisk.—W. Weddel and Co.

Weekly Arrivals into London.
September 11 to September 18 inclusive.

Qr.	British.	Foreign.	Total.
Wheat	2,630	52,511	55,142

Rye	140	—	140
Flour sacks	18,000	36,000	54,000
Meal	200	445	645

OBITUARY.

Mr. Frank Corbett.

The death is announced of Mr. Frank Corbett, Yesselcote, Chaddesley Corbett, which occurred somewhat suddenly from pneumonia. He had not been very well for some time, but the end was unexpected. The Corbett family have been associated with Chaddesley Corbett for several generations, and the firm of Joseph Corbett and Sons, of which the deceased was a member, are large employers of labour in the district. They carry on an extensive business as timber merchants, millers, and farmers, and their operations extend throughout the Midlands and other parts of the country.

Mr. Frank Corbett was the fourth son of the late Mr. Joseph Corbett, and was sixty-one years of age. He was born at Pleremore, and resided at Chaddesley Corbett all his life. He was an enthusiastic and experienced agriculturist, and a member of the Royal Agricultural Society, as well as an active member of the committee of the Chaddesley Corbett and District Farmers' Club, which did such good work in the district for so many years. He took a keen interest in all local affairs, and rendered generous help to all those movements which contribute to the pleasures of country life.

Mr. T. W. Stocker.

The death is announced of Mr. T. W. Stocker, a well-known Huntingdonshire agriculturist. The deceased, who was sixty-three years of age, had been ailing for some time past, but finally succumbed to a stroke attack early on Sunday morning last. Mr. Stocker for some years figured as the representative of Huntingdonshire to the Royal Agricultural Society, and locally was one of the prime movers in that county's annual exhibition.

Sale of Jersey Cattle and Berkshire Pigs at Dutchlands.

There was a good company at Dutchlands, Great Missenden, last Wednesday, when the herds of Jersey cattle and Berkshire pigs belonging to the Hon. Mrs. Cecil Howard, were sold. The Jerseys were a good, useful lot, but did not sell particularly well, Mr. F. F. Roothans purchasing Haltonia at 16 guineas, Mr. Clucas Habenaria at 16 guineas, and Mr. Lawrence Currie Hazleberry and Hymerocallis at 17 guineas each. Some good cows were also secured by Mr. Shuttleworth to go to Bicester, and several of the best heifers by Sir Robert Wilmot; whilst the yearling bull Horsechesnut went cheaply to Mrs. Watson's bid of 30 guineas, and goes into Norfolk.

The small herd of Berkshires of the old Dutchlands strain averaged £3 5s. all round, many of them being very young. Countess Highclere, with a choice litter of eight, went at £8 5s. to Mr. Young, with Lady Oxford 3rd at £6 10s. Mr. Macmonies purchased some good gilts; Mr. J. Reffell obtained the boar Master Dolly Oxford at 97s. 6d.

A number of Southdown ewes were also sold at prices up to 48s. (Col. Van de Weyer); Southdown lambs up to 35s. (Mr. J. Stimson); the average for 52s. being 30s., and fifty Cheviot lambs averaged 32s. 6d., Mr. W. Smith and Mr. A. Gee being the principal purchasers.

Worcester Fair.

Although known as Worcester Hop Fair, the annual fair at Worcester is not confined to hops, for horses, cattle, and sheep, cheese, &c., all figure in the proceedings. For instance, at the fair held on Thursday over 3,000 sheep and lambs were offered, and there was a good show of both horses and cheese, but hops were perhaps the feature. The supply was nothing like so large as last year, and merchants described business as very meagre and the quality of the crop somewhat disappointing.

In the sheep fair there were offered about 3,100 sheep and 200 rams. There was a good demand for the best stock, and all classes met with a ready sale. About 700 store lambs sold better than of late, making up to 40s. 6d. The ram trade was good. Some made up to 7½ guineas, and others 6½ guineas. Fifty Shropshire theaves made up to 62s. Messrs. Lythall and Walters (Birmingham) offered thirty Hampshire ram lambs, which sold from 4½ guineas.

The cattle entries were rather disappointing. Two hundred Irish animals came from a distance, but the local entries were poor, about twenty-six fat cattle being shown. In the horse yard the Welsh colts were prominent. Their number showed an increase on last year, being 200 compared with 181. Irish colts were not so numerous. The horse exhibits were of no special quality, and the reason was said to be that the autumn sales attracted the best. Not many colts were disposed of. In only one case did the amount exceed £60. The lowest sum paid was £5. There were about 100 pigs offered for sale, compared with a dozen or so last year.

Cheese prices were:—Cheddar, 60s. to 74s.; double Gloucester, 54s. to 60s.; single ditto, 48s. to 56s.; Canadian, 56s. to 62s.; American, 55s. to 60s.

Imports of Agricultural Produce.

Account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended September 14, 1907, together with the quantities imported in the corresponding week of the previous year (the figures for 1906 are in parentheses):—

Animals, living:—Oxen, bulls, cows, and calves (10,795), 11,031; sheep and lambs (232), 1,210; horses (171), 418.

Fresh meat:—Beef (135,689 cwts.), 85,747; mutton (35,713), 42,698; pork (8,528), 9,980.

Salted or preserved meat:—Bacon (114,535 cwt.), 105,968; beef (2,979), 1,583; hams (21,568), 22,339; pork (3,823), 5,125; meat (7,997), fresh, 8,660; salted 916; meat, preserved (6,620), 4004.

Dairy produce and substitutes:—Butter (72,421 cwt.), 73,618; margarine (22,346), 1,6796; cheese (71,532), 56,444; milk, fresh in cans or drums (160), —; cream (92), 24; milk, condensed (21,577), 17,545; milk, preserved (240), 34.

Eggs (great hundreds):—(348,471), 408,880; poultry (value £2,377), £2,158; game (value £1,692), £2,587; rabbits, dead (not tinned), (69,432 cwt.), 38,696; lard (35,995 cwt.), 28,349.

Corn, grain, meal, and flour:—Wheat (2,125,500 cwt.), 2,024,200; wheat meal and flour (311,300), 223,500; barley (651,300), 301,500; oats (204,600), 60,700; peas (46,610), 20,350; beans (13,530) 3,560; maize or Indian corn (1,032,300), 1,248,900.

Fruit (raw):—Apples (14,595 cwt.), 13,741; grapes (21,835 cwt.), 33,225; pears (39,453 cwt.), 38,886; plums (70,955 cwt.), 11,323.

Hay (1,741 tons), 559; straw (2,235 tons), 1,919; moss litter (1,352 tons), 1,412; hops (1,039 cwt.), 1,718.

Vegetables (raw):—Onions (178,360 bushels), 237,576; potatoes (17,790 cwt.), 56,740; tomatoes (34,158), 19,459.

In the course of a speech at the Cosby (Cumberland) Agricultural Show, on Thursday, the Speaker of the House of Commons (Mr. J. W. Lowther) said the purpose of the Small Holdings Act had been briefly, but incorrectly, described as contained in the phrase, "back to the land." Everyone desired to see the country districts more thickly populated, but they possibly entertained doubts as to whether it would be possible to achieve this by legislative means. Fifty years ago this country decided to be a manufacturing country, and that policy had since been chiefly supported. The result was that agriculture, while not forced to the wall, had not occupied the centre of the stream of traffic. He felt sure that, whether they were landlords or county councillors, they would give the experiment their support. It was a bold but interesting experiment, and if successful they might see therein one solution of the many difficulties which surrounded them.

RECEIVED TOO LATE FOR CLASSIFICATION.

HAY FOR SALE.—A quantity of first-class old mixture and meadow for sale.—H. M. Simmons, Amberstone Grange, Hailsham.

BASIC SLAG, all grades.—Kainit, Supers., Boiled and Dissolved Bones, etc. State quantities required and station, when prices, analyses, etc., will be sent by return of post.—Clement Swaffield, Derby.

15,000 BREEDING EWES.
8,000 LAMBS, &c.

COUNTY AUCTION MART, AYR.

GREAT TWO DAYS' SALE.

(FIRST DAY)—THURSDAY FIRST, 26th September, 1907.—FIRST GREAT ANNUAL SALE of BLACKFACED and CHEVIOT HILL EWES, Uncrossed and Guaranteed, and BLACKFACED GIMMERS, &c., when there will be exposed—

9,000 BLACKFACED EWES, direct off the Hill, uncrossed and guaranteed, of their mouths and udders, among which which will be the following well known lots;—Chirmorrie, Lochingerroch, Whiterue, Blackrue, Farden, Dochroyle, Brochloch (Carsphairn), Pencloe, Auldhouseburn Palgown, Gleckmulloch, Changue, Darneimow, Laggish, Garryhorn, Castlemaddie, Slintoch Moor, Craigcanhochie, Ardnamore, Corphin, Sannox, Glaister, Machrie, Knockdon (Waterhead Hirsel), Lochryan (Cairnmains and Brockloch Hirsels), Glenkiln, Shallochwell, Whiteclauchrie, Marbrack, Craigengillan, Drenandow (Nappers and Barclye Hirsels), Shiel, Glenmuick, Benwhat, Maneight, Meiklehill, Auchincloigh and Greenhill, Rankinstone, Smithstone, Carnavel, Knockguldron, Heidmark, Blackcraig, High Eldrig (Dervinnie and Dervauchlie Hirsels), Machriebeg, Amod, Barnhill, Waterhead, Pultadee (Fore and Back Hirsels), Barnvannoch, Darnaconnar, Pynannot, Strahanna, Ardnoe, Aldiona, Gass, Stroan, Carskeoch, Craigenrae and Carnfore, Dinmurchie (Ferter Hirsel), Blackclauchrie, Baing, Beoch (New Cummock), Knowe, &c., &c.

1,500 CHEVIOT HILL EWES, uncrossed and guaranteed, among which are the following lots:—Rhifail (Sutherlandshire, 400), Ulzieside, Morton Mains, Drumbuie Townfoot.

500 BLACKFACED GIMMERS.

Special attention is drawn to the above selection of Ewes, which will form the largest and finest displays ever seen in this market. They are drafted from the best stocks in South Ayrshire, and an excellent opportunity will be afforded for selecting Ewes possessed of a sound, hardy character, and which will prove well wherever they go.

Sale starts at 10 30 a.m. sharp.

(SECOND DAY)—FRIDAY FIRST, September 27th, 1907.—GREAT SPECIAL SALE of BLACKFACED and CHEVIOT CROSSED EWES, BLACKFACED THREE-YEAR-OLD WEDDERS, all Classes of LAMBS, BLACKFACED BORDER LEICESTER and YORKSHIRE RAMS and RAM LAMBS, when there will be exposed:—

4000 BLACKFACED EWES that have been crossed in the breeding, nearly all suitable for running another season.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The official view of this year's wheat crop is that it exceeds the mean by 1 per cent. on quantity, but is in quality not up to the average. There are some good yields in the Eastern Counties, and more rarely in South-east England, but the view held by the majority of farmers appears to be that wheat is slightly below an average. Barley slightly over it, and oats materially above it where fully matured, a very important exception, as large areas of this crop have never ripened. The yield of the four minor crops, rye, beans, peas, and tares, is probably a full average, and mustard seed, buckwheat and rapeseed have done well, the latter having surmounted the difficulties of July and August better than had been anticipated. The French wheat crop estimate is fully 3,700,000 qr. beyond what the trade regards as probably reaped —in other words, is 46,000,000 qr. against 43,000,000 qr. We do not believe for a moment that there is 5,700,000 qr. increase on the yield of 1906, but attribute the estimate to the political exigencies of an unpopular Government. The new crop in Germany is not an average, but deficiency had been exaggerated, so that with new grain being freely threshed, 2s. per qr. fall in prices is reported from Berlin and Breslau. Roumania is now credited with 20 per cent. below an average wheat yield, an estimate which, low as it is, is still 10 per cent. better than the official estimate of August. Hungary admits the finest wheat crop for many years.

The markets for foreign wheat are 1s. dearer on the week, and flour is often as much as 2s. up. An advancing tendency has prevailed in linseed, foreign feed barley, light oats from abroad, and in maize as well as in breadstuffs, but the trade has been strong, not excited. The speculator is, of course, at these times alert, but he is not an essential of the situation. The position of affairs is that of under-average supplies on passage, under average stocks on hand, and a retarded home harvesting. There never was a time when such conditions did not bring about firm markets. The chances of lower prices in October are twofold - the deliveries from farmers are now increasing at a rate which is indiscreet, and the shipments of foreign produce, attracted by higher prices, are beginning to mount. Of these two causes of possible reaction the first is far and away the most dangerous. The foreign shipments, though they show an increase, will all be required, and will probably go into use with the least possible delay after their arrival.

The sales of British wheat at the 186 statute markets since harvest have been as follows :—

This season...	122,000 qr. at 31s. 7d.	per qr.
Last ,,	315,000 qr. at 25s. 10d.	,,

The sales of British barley have been :—

This season...	42,000 qr. at 24s. 4d.	per qr.
Last ,,	140,000 qr. at 24s. 5d.	per qr.

Of oats the sales have been as follows :—

This season...	105,000 qr. at 17s. 6d.	per qr.
Last ,,	128,000 qr. at 18s. 3d.	per qr.

The advance on the twelvemonth will be seen to have been 5s. 9d. on wheat and 1s. 3d. on oats, but barley has had no share in the advance. This is not reasonable, and barley holders should stand their ground. There is nothing like an excess in the supply.

The wheat gradient is now very moderate, as none of the exchanges are above 34s., and none under 30s. for home produce :—

Canterbury ...	33s. 6d.	per qr.
Norwich	30s. 4d.	,,
Range	3s. 2d.	per qr.

Barley prices are more level than they were and with average :—

Nottingham ...	26s. 6d.	per qr.
Reading	24s. 2d.	,,
Range	2s. 4d.	per qr.

Oats are lower than the situation seems to warrant :

Canterbury ...	18s. 9d.	per qr.
Peterborough	16s. 9d.	,,
Range	2s. 0d.	per qr.

Imports of the United Kingdom last week were as follows :—

Wheat, 580,000 qr. : liberal.
Flour, 96,500 sks. : moderate.
Barley, 187,000 qr. : liberal.
Oats, 21,000 qr. : extremely small.
Maize, 136,000 qr. : small.

Completed returns of the first three weeks of September are :—

Wheat, 1,475,000 qr. : fairly good.
Flour, 285,000 sks. : small.
Barley, 475,000 qr. : moderate.
Oats, 89,000 qr. : extremely small.
Maize, 636,000 qr. : an average.

Supplies on passage on the 28th were as follows of wheat :—

Russian	160,000 qr.
American.....	520,000 ,,
Californian	122,000 ,,
Indian	600,000 ,,
Argentine	100,000 ,,
Australasian	420,000 ,,
Various	30,000 ,,
Total.....	1,952,000 ,,
A year ago	1,345,000 ,,
Ten years average.....	2,500,000 ,,

The present total, therefore, while below the average by 548,000 qr., is larger than at this time last year, the higher prices stimulating shippers to increased efforts.

Of flour, 282,000 sacks are on passage against 296,000 sacks a year ago.

Of barley 465,000 qr. are on passage against 315,000 qr. a year ago, and 500,000 qr. on the ten years' average.

Of other articles the quantities afloat on 28th included :—Oats, 195,000 qr. ; maize, 945,000 qr. ; and linseed 144,000 qr.

American shipments last week were 395,000 qr. of wheat, 136,000 sacks of flour, 60,000 qr. of Indian corn, and 20,000 qr. of Californian barley. The short crop of oats leaves little margin for exportation.

Argentine shipments were 88,000 qr. of wheat, 139,000 qr. of maize, and 37,000 qr. of linseed, totals which were not in any way remarkable.

Russia shipped 274,200 qr. of wheat, 103,050 qr. of rye, 1,750 qr. of linseed, 374,200 qr. of barley, 68,315 qr. of oats, and 115,050 qr. of maize.

Other shipments of the week were : 240,000 qr. of wheat from Roumania, 40,000 qr. of wheat from Australia, 23,000 qr. of wheat from European Turkey (including Bulgaria), 17,000 qr. of barley from European Turkey, 15,000 qr. of barley from Persia, 10,000 qr. of barley from India, and 15,000 tons of cottonseed from Egypt.

THE BALTIC.

Prices for wheat cargoes have advanced 1s. to 1s. 6d. on the week, but on Saturday quietude had succeeded to firmness, and there was a rapid rise. We may quote 42s. 6d. per 492 lb. as made for the best Russian, 40s. for the common kinds, both for prompt shipment. Other cargo sales have included Blue stem at 40s. 6d. per 500 lb., Walla-Walla at 39s. 3d. per 500 lb., red Fife at 39s. 6d. per 500 lb., Victorian at 40s. 6d. per 480 lb., white Karachi at 39s. per 492 lb., No. 2 hard winter at at 38s. 3d. per 480 lb., No. 2 red winter at 37s. 9d. per 480 lb., and No. 1 Durum at 35s. 9d. per 480 lb.

Maize cargoes are 1s. dearer on the week ; 27s. 6d. per 480 lb. is paid for Odessa on passage, and 26s. 9d. for La Plata, same weight.

Other cargo sales of the week have ineluded Kusteridge barley at 25s. per 400 lb., Karachi barley at 24s. 3d. per 400 lb., Persian barley at 23s per 400 lb., Libau white oats at 17s. 6d. per 304 lb., Petersburg oats at 19s. per 320 lb., Indian gram at 29s. 3d. per 504 lb., Calcutta linseed at 45s. 6d. per 410 lb., and Egyptian cottonseed at £7 5s. per ton., the last named for shipment prior to October 15.

The arrivals of grain and seed laden vessels at ports-of-call for the week were 5 wheat (1 Melbourne, 2 Portland (O.), 1 Port Wakefield, 1 Wallaroo ; 1 linseed (Rosario)—total, 6.

The sailings of grain and seed laden vessels from ports-of-call for week were 4 wheat (1 Belfast, 1 Brake, 1 Dublin, 1 Limerick).

Since January 1, 1907, the total arrivals have been 230 wheat, 1 flour and wheat, 3 barley and wheat, 7 barley, 15 maize and 16 linseed—Total, 272.

Last year during the same time the arrivals were 232 wheat, 2 barley and wheat, 3 barley, 5 maize, 1 locust beans and 27 linseed—Total, 270.

The London Corn Trade Association C. F. & I. quotations, for the settlement of rejections and Difference in Weights on Wheat under Rule No. 4 of the Association East Indian Wheat Contracts, are as follows, viz. :—*viâ* Canal.

Crop 1906.—Choice White Karachi 39s., Soft Red Karachi 38s. 6d.—New Clean Terms.

Choice White Karachi 38s. 9d., Soft Red Karachi 38s. 3d., Old Terms.

N.B.—The committee has decided to quote rejection prices for "Old Terms" up to and including July shipments, but not later.

The L.C.T.A. prices remain in force until a fresh list is published.

LONDON HAY TRADE.

Saturday.—With the continued fine weather farmers have had every opportunity of clearing up all their harvesting operations, and in consequence there has been a continuance of the short supplies, and the trade has remained in a very firm condition ; prices are unchanged, but demand has been good for whatever has come to hand. For forward delivery, however, buyers' ideas are for lower prices, and it is next to impossible to do much business at present values, but country dealers seem to have a better opinion of the trade than their London confreres, as we hear of them paying much above London parity for hay in stacks. Prime mixtures and clovers are the strongest trade, and best hays keep in good demand, and plain stuffs of all kinds if sweet and clean find a ready sale ; but for badly got and weathered qualities more difficulty is found in getting buyers. The straw trade is not so good, larger supplies are to hand and prices show a reduction of about 1s to 2s per load on previous quotations. It seems as if the foreign trade will be right out of it this season as our market will apparently be overdone with low class stuffs with which the foreigner has to compete, and which at present values he is unable to do.

Prices ruling for English 1907 crop are about as follows :—Best hays, 70s per ton ; good hays, 57s 6d to 67s 6d per ton ; plain hays, 65s per ton ; best clovers, 82s 6d to 85s per ton ; good clovers, 77s 6d to 80s per ton ; inferior clovers, 70s to 75s per ton ; best mixtures, 80s per ton ; good mixtures, 70s to 75s per ton ; plain mixtures, 62s 6d to 67s 6d per ton ; seconds hays, clovers, and mixtures, 40s to 55s per ton ; wheat straw, 25s to 28s per load ; barley straw, 26s to 28s per load oat straw, 26s to 28s per load. All ex rail London.

Foreign : Arrivals are very small, and prices quoted are nominally Canadian mixture, 80s per ton ; first quality Dutch hay, 62s 6d to 65s per ton ; second quality Dutch hay, 53s to 60s per ton ; New French first and second cut clover, 75s per ton. These prices are by the barge load delivered alongside wharf, London.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English firm, unchanged prices. Foreign firmly held at late prices, but in slow demand. No. 1 Northern, ex ship, held at 42s 6d, landed at 42s 9d to 43s; No. 2 Northern, ex ship, at 41s 6d; No. 1 Durum, at 36s 6d; choice white Karachi, at 38s 9d; red Karachi, at 38s 6d; Australian, at 40s; South Russian, landed, 40s 6d to 43s 6d; La Plata, 40s to 42s. Flour firm, quiet. Iron Dukes quoted at 25s to 25s 6d; Hungarian, 37s to 37s 6d. Maize steady, inactive. Odessa, ex ship, held 26s 3d; Danubian and Galatz Foxanian, landed, at 26s 9d. Barley firm. Odessa-Nicolaieff and Azoff-Black Sea, ex ship, quoted at 24s to 24s 3d; landed at 24s 6d. Oats firm but quiet. River Plate held at 19s 3d to 19s 6d; South Russian (381b), 19s 3d to 19s 6d.

Mark Lane, Friday.—Wheat: English firm, and 3d dearer, but not active. Foreign firmly held at full prices to 3d advance. No. 1 Northern Manitoba, ex ship, held at 42s 9d; No. 2, at 41s 9d to 42s; No. 1 Durum at 36s 9d to 37s; choice white Karachi at 39s; red Karachi at 38s 9d. Flour firm and dearer Iron Dukes quoted at 26s, Hungarians, 37s 6d to 38s. Maize firm, and held for 3d advance. River Plate, Danubian, and Odessa, landed, quoted at 26s 9d to 27s as per sample. Barley firm. Odessa-Nicolaieff, landed, held at 24s 6d, ex ship, to arrive at 24s to 24s 3d. Oats firm and rather dearer, but not active. River Plate, landed, held at 19s 6d to 19s 9d; South Russains, 19s 6d.

COUNTRY.

Ashford, Tuesday.—Wheat trade rather slower, and though best samples realised last week's rates, mediums fell slightly. Maize advanced fully 1s, and new white oats were also as much dearer; flour, too, was raised 2s a sack. Quotations:—Wheat, 33s to 35s; English barley, 27s to 30s; Mazagan beans, 30s to 31s; ticks, 34s to 36s; maize, 28s to 29s; winter oats, 20s to 21s; white oats, 19s to 22s per qr; flour, whites 34s, seconds 31s, scaling 29s per sack.

Banbury, Thursday. — Wheat, red (new), 33s 6d to 34s 6d per qr; ditto (old), 35s to 36s per qr; barley, 26s to 28s 6d per qr; beans (new), 30s 6d to 31s; ditto (old), 33s to 33s 6d per qr; oats, 17s to 20s 6d per qr; oats (old), 20s to 26s per qr; peas 30s to 33s; ditto (old), 33s to 35s per qr.

Berwick, Saturday.—Good attendance, with a large show of new barley. The quality was very variable; fine samples sold readily; secondary, dull. New oats in small supply. No wheat offering. Barley, 26s to 30s 6d; new oats, 22s to 23s per qr.

Birmingham, Thursday.—There was a larger attendance here than usual, doubtless due to being fair time. Trade in wheats was not brisk, buyers no doubt being supplied for the present. Foreign sorts have advanced 1s 6d per qr since last market day. English wheats are offering more freely, and made from 12s 6d to 13s 9d per 186 lb, according to condition. English oats are gradually increasing in value, and 20s per 312 lb is now required for either black or white. New beans made 12s 9d per 196 lb delivered. There was a good demand for all sorts of maize, Bessarabian being 6d dearer, while Galatz-Foxanian and Odessa made 9d more money. Grinding barley was 1s 3d per qr up on the week.

Brighton, Thursday. — Little business and average attendance. Wheat in short supply, dry samples 1s per qr advance. Barley, 29s to 33s; grinding ditto, 26s to 27s; oats, English, 17s to 20s; peas, 31s to 32s; beans, 33s to 34s.

Bristol, Thursday.—The market was fairly well attended. English wheat in larger supply, and obtained from 1s to 1s 6d per qr over last week. Foreign a fair trade, 1s 6d to 2s dearer. Grinding barley, 9d to 1s dearer. Maize, 1s advance. Oats firm, making 3d more money.—GRACE BROS.

Bury St. Edmunds, Wednesday.—Wheat: Farmers are holding back supplies, and the trade is very firm at 1s per qr advance, and with a strong upward tendency. Flour a strong trade at a further 1s per sack advance. Malting barley trade not fairly commenced at present. A small business done at 28s to 33s per qr. The tone of the trade is firm. Feeding corns and stuffs all firm, and linseed cakes quoted at 5s per ton advance on the week.

Cambridge, Saturday.—Trade for wheat and spring corn continues very firm, with a slight upward tendency. There was an average attendance, and wheat was in good supply, and made up to 36s per 504 lb. Barley made from 26s 6d to 32s. Still a short supply of oats, and 6d more money had to be paid. Beans a trifle easier.

Canterbury, Saturday.—Wheats maintain recent prices, 62 lb. samples selling at 33s on rail, and 64 lb lots at 35s and 35s 6d. There is rather more business doing now in malting barley, at from 28s 6d to 32s. Oats are firm, ranging from 21s 6d per 44 lb, up to 23s for 47 lb; black winters of 44 lb weight 21s 6d to 22s. Grey peas are making from 30s to 31s per qr; and new tares from 5s to 6s per bushel.

Chester, Saturday.—English wheat and oats are being thrashed out freely and good samples are being offered at late rates. American mixed maize and River Plate corn show an advance on the week. Quotations:—Wheat, new, 5s 10d per 75 lb; oats, new, 2s 6d to 2s 7d; old, 3s 1d to 3s 6d per 46 lb; Indian corn, old, 14s 9d to 15s per 240 lb; round corn, old, 14s to 15s 3d per 240 lb.

Chichester, Wednesday.—A good attendance and fair trade, with wheat 1s dearer on the week. New white wheat, 33s 6d to 34s 6d; new red ditto, 33s 6d to 34s 6d; barley, 28s to 30s; grinding ditto, 23s 6d to 25s; oats, English, 17s to 23s; rye, 27s to 29s; peas, 31s to 32s; beans, 32s to 33s; tares, 5s 6d to 6s 6d; maize, 25s 6d to 26s 6d; flour, 29s to 31s.

Colchester, Saturday.—Wheat, firm, 35s 6d to 36s 6d. Oats firm, 19s 6d to 20s 6d. Beans and barley steady.—COLIN TAYLOR, KING AND CO., LTD.

Coventry, Friday. — Scarcely an average attendance, and very limited supply of wheat, which sold readily at fully 6d per qr advance. Fair trade in barley at the late quotations. Demand for oats in good condition was brisk, and extreme figures of last week were obtained. Beans and peas firm, without change. Quotations:—Wheat, new, 12s 6d to 13s 6d, old 13s to 13s 6d per 186 lb; barley, 30s to 34s per 448 lb; oats, old, 24s 6d to 27s, new 20s to 23s per 352 lb.; beans, 13s to 13s 9d per 196 lb; peas, 12s to 14s per 196 lb.

Derby, Friday.—A fair supply of wheat, which sold at the extreme prices of last week. There was no alteration in the value of spring corn. Wheat, white, 37s to 38s; red, 35s to 36s; grinding barley, 23s to 25s; beans, 35s to 36s; oats, old, 24s to 26s; new, 20s to 21s.

Devizes, Thursday.—There was an increased supply of corn. The trade for all descriptions was very firm, wheat and oats being the turn in favour of sellers. Barley at fully late rates. Best wheat, 17s 6d to 18s 6d; secondary, 16s 6d to 17s 6d; new wheat, 15s to 17s; winter barley, 26s to 28s; old oats, 20s to 24s; winter oats, 17s 6d to 18s 6d; white Garton oats (330lb), 18s to 19s; rye, 26s to 28s; new beans, 16s 6d to 18s; fine flour, 30s to 31s; extra fine, 32s to 36s.

Doncaster, Saturday.—Better supply of English wheat, but it is still in variable condition, and made from 13s to 13s 6d per load. Fine samples met with a good sale at an advance of 3d to 6d per load, secondary quality being neglected. Foreign wheat was very firm at last week's prices. Some new barley was on offer, but malters did not buy freely. Old beans 6d per qr dearer. Oats firm to 3d per qr more money. Maize very firm, and 26s per qr on rail.

Dorchester, Saturday.—The attendance at to-day's market was adversely affected by the show on the previous day, following on Poundbury fair on Thursday; but there were plenty of new samples of most kinds of corn offering, all in considerably improved condition. The wheat trade opened very firmly, holders asking prices considerably in advance of factors' views; but at a later period sales were effected at 6d to 1s rise on the week's prices, and foreign still more, and a considerable amount of business was done on those lines. Barley likewise showed a rise, this ranging from 9d to 1s compared with recent values. Oats also took an upward turn, the rise, as a rule, ranging from 3d to 6d per qr; maize made 6d more, and beans and peas were both against buyers. Flour very firm, with prices tending to buyer.

Dublin, Friday.—Foreign wheat firm, and in good demand. Maize 6d dearer. Irish wheat dearer at 21s to 21s per barrel, with a fair demand. Oats firmar for distillers' samples; blacks, 10s 6d; whites, 11s 6d; extra, 12s. Barley in small supply, and sells at 15s 6d, market rates not being fixed yet. Flour steady. Oatmeal steady. Indian meal tending dearer. Bran firm. Pollard scarce.

Exeter Friday.—Good attendance. Wheat firm, and generally 1s dearer than last week, 4s to 4s 3d; superfine flour, 31s; fine, 29s. Barley not much offering, firm trade, 3s 6d to 4s.

Glasgow, Wednesday.—There was the usual attendance at to-day's market. Wheat 6d per boll dearer. Flour firm. Maize steady at 1½d per boll advance. Corn steady at late rates. Barley held for extreme prices. Oats, quiet and unchanged for foreign, but home qualities the turn easier. Beans and peas firmly held. Bran and thirds steady. Oatmeal quiet.—GIBSON AND CLARK.

Glasgow, Friday.—Wheat and flour firm at Wednesday's full rates. Maize steady. Corn firm, and shaping higher. Other articles steady. The market will be closed on Monday for the Glasgow autumn holiday.

Gloucester, Saturday.—English wheat 1d per bushel dearer at 33s to 34s 6d per qr. Foreign wheat unchanged: Plates, 40s 3d to 41s; Russian, 40s to 41s 6d. Maize, 9d dearer: Plate, 26s 9d; flat, 27s 9; and Bessarabian 26s 9d per qr. Barley 1s dearer at 25s 3d. New oats 6d to 1s dearer: White, 19s 6d to £1; black, 19s to 19s 6d; old white, 6d up, at 34s.

Grantham, Saturday.—There was a good supply of new grain, and a good trade was experienced. Wheat, 35s to 36s; barley, 26s to 32s; oats, 18s to 20s; beans, 30s to 32s; peas, 65s to 75s per qr.

Hereford, Wednesday.—More active business in English grain generally. Wheat in better condition at from 4s to 4s 3d per bushel. Barleys made from 3s 3d to 3s 9d. Oats steady at 2s 3d to to 2s 4½d. Old oats very firm at about 3s. New beans found bidders at 3s 9d, but few transactions took place. Maize 6d per qr dearer.

Ipswich, Tuesday.—Moderate supply of wheat; trade firm at an advance of from 6d to 1s per qr. Reds, 34s to 35s 6d; whites to 36s 6d per 504 lb. Fair supply of barley, trade slow, prices ranging from 27s to 31s per qr. Oats rather dearer. Maize 6d per qr dearer. Beans and peas firm

Leeds, Tuesday.—Harvest is drawing to a close and rain will soon be welcome. We have to report another week of activity in the wheat trade at daily rising prices; since yesterday, however, with weaker American advices and large shipments, a quieter tone has prevailed. English wheats are only in moderate supply, and with a good demand from millers, as also for export to Germany, are fully 1s 6d per qr dearer on the week. Foreign irregular at a similar advance. Prices of malting barley are not yet settled; foreign mostly held above values on this side. Maize 1s dearer. Beans and oats firm.—DUNNS AND CO.

Leeds, Friday.—Although the bulk of English wheat has been secured, supplies continued scarce, and prices were very firm, Tuesday's advance being fully maintained. Foreign was also firmly held. Flour was in good demand, with a rising tendency, medium qualities making 26s to 28s, and finest runs 35s per sack of 20 st. Maize was dearer, Plate and Odessa closing at 26s odd. Malting and feeding barley had a hardening tendency.

Leicester, Saturday.—Good attendance of buyers and dealers, with larger supplies of home-grown wheats in rather variable condition. Trade was quiet, and fine samples firm. Red wheats, 33s to 35s; white wheats, 35s to 38s per 36 stones; bright samples of malting barley firm, secondary flat; prices 27s to 31s per 32 stones; fine oats in good demand at 19s to 22s per 24 stones.

Lincoln, Friday.—There was a good attendance. Not a large supply of English wheat, for which there was abundant inquiry, quotations being 1s 6d per qr more than last week. Malting barley, as a week ago, prices not yet being fixed. Oats rather dearer. Beans scarce.

Newark, Wednesday.—A good attendance, it being the ram fair. Samples sparingly shown; prices 6d per qr dearer all round. Quotations:—Wheat, old, 37s to 38s; new, 34s 6d to 35s 6d. per qr. Barley, malting, 28s to 30s; grinding, 25s to 26s. per qr. Oats, white, 18s 6d to 19s 6d; black, 18s 6d to 19s per qr. Beans, old, 36s to 37s per qr.

Newport, Wednesday.—Maize and barley 9d to 1s dearer on the week. Flour, 30s per sack; Offals in very good request at advanced prices.

Newcastle-on-Tyne, Saturday.—A steady trade for wheats at fully last week's quotations. Maize again dearer with a fair demand. Beans and peas met a fair sale, and prices fully maintained. Oats of all descriptions were in sellers' favour. Barley met a slow demand for malting purposes, prices not yet fixed.—POLLARD AND CO.

Northampton, Saturday.—Better attendance at Exchange, but wheat was still in small quantities and had advanced 6d per qr during the week. Larger supplies of oats and barley, which still remained firm. Wheat, 33s to 34s 6d; barley, 26s to 30s; white oats, 18s to 20s; black oats, 18s to 20s 6d; beans, 28s to 30s; flour, 29s to 33s.

Norwich, Saturday.—Wheat is in moderate supply, with a steady trade, prices being 6d per qr dearer than last week—34s to 35s delivered. Good supply of barley for the time of year; prices dearer in the feeding stuff trade, with a good demand.

Nottingham, Saturday.—Farmers being still busy but few parcels of wheat offering. Values advanced 6d to 1s per qr. A few samples of new barley showing, quality various, but condition good, prices irregular. New oats 6d higher, old very firm. Beans full rates.—ROBT. HUBBLE.

Oxford, Saturday.—The market was thinly

attended, and a fair trade was experienced. Wheat and oats were in limited supply, and a further 6d advance was demanded and obtained.

Peterborough, Saturday.—We have a fair supply of wheat at our market to-day. Wheat was fully 1s per qr dearer than last Saturday. Barley a steady trade at firmer prices. Oats come to market slowly, and made rather more money. Wheat, 34s to 35s Barley, 26s to 32s. Oats, 18s 6d to 19s 6d.—THOMAS HILL AND SON.

Preston, Saturday.—Wheat is well held, although splendid weather has checked the advance. There was a fairly good attendance New grain comes forward very sparingly, and only oats are yet on offer, prices varying according to condition. Quotations:—Wheat, white, new, 14s to 15s per windle of 220 lb.; oats, old, 3s 6d to 3s 8d per bushel, ditto new, 2s 11d to 3s; oatmeal, 27s 6d to 28s per load of 240 lb; beans, 16s 6d to 17s per windle of 220 lb.

Plymouth, Thursday.—There was a very good attendance on our market here to-day. Wheat firm, unchanged. Maize 9d dearer. Barley 1s dearer. Oats steady. English wheat making better prices.—ORLANDO DAVIS AND CO.

Reading, Saturday.—The attendance was again on the small side, and the business transacted was not heavy. The following may be taken as the prices of the parcels on offer:—wheat, 31s to 35s; barley, 25s to 31s; oats, 18s to 21s 6d; beans, 30s to 36s; peas, 28s to 32s.

Retford, Saturday.—Increased supply of new wheat, which sold well at the full prices of the previous Saturday—35s to 35s 6d per qr. Malting barley on offer, the best being worth 30s, and the general run of the market 27s to 29s per qr. Grinding barley made 26s. No new English beans on offer. Old made 35s, new black oats 18s to 18s 6d, white up to 19s, old oats 25s, and maize (dearer) 28s per qr.

Ripon, Thursday.—An excellent attendance of farmers, and a better business passing. Some good samples of new wheat on offer. Malting barley shows a downward tendency. New wheat made 34s to 35s; wheat, foreign, 40s to 42s; barley, grinding, 27s to 28s; barley, malting, 28s to 30s; new oats, 20s; old oats, 24s to 26s; maize, round, 28s; maize, flat, 28s; bran, £5 10s to £6 per ton.

Sheffield, Tuesday.—The market continues strong for all descriptions of grain, and during the past week steady advances have been daily made until to day wheats are quoted from 1s to 2s per qr dearer on the week. Maize 9d per qr higher than a week ago. Beans, barley, and oats steady to 6d per qr more. Feeding stuffs in good demand at full rates. Quotations:—Wheat, white, new, 37s to 37s 6d; ditto red, new, 37s to 37s 6d per 504 lb; oats, black, 24s to 25s; ditto white, 24s 6d to 25s; ditto new, 20s 6d to 21s per 336 lb; peas, grinding, 34s 6d to 35s; ditto blue, new, 65s to 75s per 504 lb; beans, English, 37s to 37s 6d per 532 lb; barley, grinding, 27s to 27s 6d; ditto malting, 28s to 32s per 448 lb; Indian corn, small, 27s 6d to 28s; ditto Plate, 27s 6d to 28s; ditto flat, 30s to 30s 6d per 480 lb; bran, 105s; fine sharps, 140s; broad bran, 110s per ton.

Shrewsbury, Saturday.—Old wheat, 15s to 15s 6d per 225 lb; new, 14s to 14s 6d; old oats, 15s to 16s per 225 lb, new 11s 2d to 12s.

Stamford, Friday.—Farmers turned up in goodly numbers, and there was a little improvement in trade; market very firm. Wheat made 6d per qr more than last week; and there were indications of an upward tendency. Oats and barley firm at last week's quotations. Beans 30s to 30s 6d; peas, 60s to 66s.

Stockton, Wednesday.—There were a few samples of new local wheat showing which made 33s 6d to 34s per qr. The foreign wheat trade was strong, and with a fair demand holders were asking 1s 6d per qr advance over last week. Maize was also firm, and about 1s per qr dearer on the week. Oats was quiet and unchanged.

Tunbridge Wells, Friday.—New white wheat, 32s to 35s; new red ditto, 30s to 32s; barley, 26s to 32s; grinding ditto, 23s to 25s; oats, English, 18s to 22s; rye, 24s to 25s; peas, 32s to 35s; beans, 32s to 35s; tares, 40s to 48s; maize, 23s to 32s.

Warwick, Saturday.—Fair supply of corn on offer. Wheat, 12s 6d to 12s 9d per bag; white oats, £1 1s per 9 score. Feeding stuffs about the same.

Winchester, Saturday.—English and foreign wheat steady trade, 6d to 1s advance. Barley and maize 6d dearer. Oats unaltered. Flour a fair demand at last week's full prices.—FEAR, COLEBROOK AND CO., LTD.

Wisbech, Saturday.—A limited supply of new grain at market. Wheat advanced 6d to 1s per qr. Best reds 35s to 36s per 504 lb. Oats very firm, 19s to 19s 6d per 336 lb. Barley, 25s to 30s per 448 lb.—JAMES FLETCHER.

Wolverhampton, Wednesday.—The market was fairly well attended, and last week's prices were sustained, and in some cases firmer.)

Worksop, Wednesday.—Small attendance and very few samples of wheat on offer. A good inquiry at last week's full prices. There were several samples of new barley in very good condition. Only a small show of oats. White wheat (new) made 35s to 36s; red ditto, 34s to 35s per qr. No old wheat on offer. Best malting barley made 28s to 38s; secondary and grinding barley, 27s to 28s; old white oats, 24s to 26s; new ditto, 18s to 20s; old black oats, 23s to 25s; new ditto, 17s to 19s per qr; maize, 28s to 29s; English beans, 37s to 39s per qr; flour, 1s 5d to 1s 8d per stone; fine sharps, £7 to £7 10s; barley meal, £7 10s to £8; bran, £5 15s to £6 10s per ton.

Yeovil, Friday.—Wheat was greatly improved in condition since the last market but it still lacks quality for milling purposes. Values were up 1s per qr on the week, foreign advancing 1s 6d to 2s. Oats made 3d more money, maize 6d to 1s, and grinding barley (foreign) 6d to 9d. Best quality home grown wheat, 33s to 34s; secondary, 30s to 32s 6d; winter barley, 26s to 28s 6d; imported barley, 25s to 25s 3d; old oats, 20s to 24s; winter oats, 17s 6d to 18s 6d; white, 18s to 19s; Irish black, 20s to 21s; ditto white, 22s to 22s 6d; new beans 33s to 35s; rye, 26s to 29s; round maize, 26s 6d to 27s; ditto, flat, 26s 9d; vetches, 6s 6d to 7s 6d per bushel Good consumptive demand for flour, at 29s 6d for fines. The trade in milling offals and meals continues good, with prices tending upwards.

York, Saturday.—There were a few samples of new wheat in moderate condition on offer, which made 33s to 35s per qr of 36 stones. A fair supply of malting barley sold well, fine samples making 28s to 30s, and good stuff 26s to 28s per qr of 32 stones. New oats fetched 18s to 19s, and old 24s per qr of 24 stones, while rye made 26s to 27s, and old beans 33s to 34s per qr of 36 stones.

FEEDING STUFFS.

Mark Lane, Monday.—Linseed Cake: The actual consumptive demand is disappointing, but there is a continued good inquiry for winter delivery, and values of all descriptions are again the turn dearer. Russian only offer sparingly. East India make last week's full prices. Fine seedy Calcuttas are firmly held at a slight advance. London-made remain relatively good value, and attract considerable attention. Cotton Cakes.—Egyptian are scarce on spot, and holders ask full prices, while English rule quiet but steady. Decorticated.—London-made pures meet a free sale, also digestive meal, but American brands are a dull sale. Rape cakes do not offer. Maize germ meal.—White American is not obtainable on spot, and English are held at almost prohibitive prices. Maize gluten meal is in good request. Rice meal.—Landed lots of Rangoon have now been all cleared, and shippers demand full prices for steamer parcels to come along. Locust beans remain cheaply offered. Dried brewers' grains find a good Continental demand. Nitrate of soda is unchanged.—PINNOCK Bros., 30, Mark Lane, E.C.

Nitrate of soda	11	2	6		

—PINNOCK BROS., 30, Mark Lane, E.C.

Liverpool, Friday.—Nitrate of soda maintains late rates. Increased inquiry is experienced for all phosphates for autumn application, and sales are being freely booked for forward deliveries. Kainit, too, is inquired for, and importers advise advanced prices as likely to prevail shortly. The continued strong market and high prices prevalent for Indian corn adds firmness to the market for feeding stuffs, and though the consumptive demand is very limited, doubtless owing to the comparatively warm weather, holders generally look forward to higher values in the near future when the autumn and winter demand sets in.

WOOL.

London, Tuesday.—The fifth series of London Colonial wool sales for the year commenced to-day, the quantities catalogued comprising a total of 8,341 bales, including 7,232 bales New Zealand, 267 West Australian, 312 Cape, 55 New South Wales, 39 Queensland, 34 Victorian, 14 South Australian, 338 River Plate. There was a large attendance of buyers and good competition. Merinos were a very small moiety of the offerings, but, as far as can be judged, ruled about 5 per cent. dearer than the closing rates of July. Crossbreds, largely represented by sliped sorts, show little change, with the exception of cross bred lambs' wool in grease, which may be quoted 5 per cent. dearer. The net available quantity for the present sales, arranged to terminate on October 4, adding 23,500 bales old stock, amounts to 91,013 bales; 3,100 bales Punta Arenas, 1,500 bales Falkland Islands, 1,500 bales River Plate, and 700 bales North Patagonian and Chilian will also be offered.

London, Saturday.—English—per pk. of 240 lb.—Fleeces, South Down hoggs, £13 15s to £14 5s; half-bred hoggs, £13 to £13 10s; ditto wethers, £12 10s to £13; Kent fleeces, £12 5s to £12 10s; South Down ewes and wethers, £13 10s to £14; Leicester ewes and wethers, £12 to £12 10s. Colonial—per lb.—Vic., scoured super., 2s 2d to 2s 3d; scoured, good, 2s to 2s 2d; scoured, average, 1s 10d to 1s 11d; greasy, average to fair, 1s 2½d to 1s 3½d; N.S.W., scoured, average, 1s 10½d to 1s 11½d; greasy, average, 1s to 1s 2d; S. Aus., greasy, average, 11d to 1s; N.Z., scoured, average, 1s 11d to 2s; greasy, average, 11d to 11½d; Cape, scoured, super., 1s 10d to 1s 11d; fleece, average, 9½d to 10½d; greasy, average, 8½d to 9½d; Natal, scoured, 1s 6d to 1s 7d; greasy average, 8½d to 9d. Crossbreds—grs.—Vic., good to super., 1s 3½d to 1s 4½d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s to 1s 1d, coarse, 10d to 11d.

Canterbury, Saturday.—Growers hold off steadily, while staplers are rather more anxious to do business Prices remain at 11d for Kent fleeces; lamb wool, 7d; half-bred fleeces, 11d. Downs have advanced 1d per lb.

Halifax, Saturday.—A little more inquiry for home-grown wools, which in some cases have risen slightly. Merinos, too, a little dearer. As to yarns spinners keep well employed, especially in Botany trade, and prices in that branch steadily improve. Continental demand of hand-to-mouth character. Spinners still press for deliveries.

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, Monday, 3 P.M.

The market to-day is quieter for foreign wheat, which was pushed up on the 25th and 27th to a price that meets with determined resistance. English wheat is extremely firm and sells as fast as it can reach the market. It is the best value going and undersells all imported descriptions. Barley is the turn dearer both for Russian feeding and for Californian brewing descriptions. English is worth more than is asked, but the supply is not yet sufficient really to test quotations.

Oats are very firmly held for all imported descriptions, but the sale is slow and attention is concentrated upon the new English crop, which, although often lacking in quality, is by no means always so; in fact several quite first-rate samples, 336 lb. to 344 lb. to the quarter, were on view to-day.

Maize is decidedly a strong market without being quotably dearer, both beans and peas tend in sellers' favour.

Some minor staples may be mentioned as follows, viz.:—Red Sorghum at a guinea per 416 lb, common white mustardseed at 88s. per qr., Dutch carraways at 31s. per cwt., Madagascar butter beans at 24s. 6d. per cwt., and fine Chilian haricots at 56s. 6d per qr.

THE FLOUR TRADE.

MARK LANE, Monday, 3 P.M.

High prices rule for London makes as the country supply is still lacking in condition (though much improved on the fortnight), and imports have now been below an average for some five or six successive weeks. The prices for London sales range from 29s. to 35s., for country from 26s. to 30s., and for American from 25s. to 31s., as a rule.

Hungarian flour is dearer than ever, and there has been 2s per sack rise in wheatmeal during the past fortnight. Miller's offals remain decidedly dear, with the finest middlings held for 7 guineas per ton, and bran for £5 10s per ton. Potato flour is making £9 to £10 per ton. Oatmeal makes £16 for Midlothian, £13 12s. 6d. for Aberdeen, £14 for Gilcomston, and £12 10s. for Canadian; all per ton.

Brose meal makes 30s. per sack, and oat flour commands £13 per ton for American, £16 12s. 6d. for Aberdeen. There seems to be no offerings of paste flour, of Russian, or of Argentine. Bakers are buying more sparingly to-day than on the 23rd, 25th, and 27th, but the position of the market remains one of considerable strength, and apparently nothing but large deliveries of new flour from the country can deprive the London trade of its advantage.

CLOSE OF THE MARKET.

THE MARKET CLOSED WITH DECIDED FIRMNESS FOR ALL FEEDING STUFFS, BUT WHEAT WAS ONLY A QUIET TRADE.

THE BALTIC.

Monday, 1 P.M.

State of Trade.

Maize, barley, and linseed cargoes, open to-day with an upward tendency, but wheat is rather hesitating, and cottonseed is lower. Cargoes of rapeseed, beans, peas, and oats are steady at the prices whereat Saturday closed.

Business Done.

Wheat.—Best Manitoba, 40s 6d per 480 lb, October shipment; Argentine, 40s per 480 lb, October shipment; Blue Stem, 40s 3d per 500 lb, October shipment; Australian, 40s per 480 lb, due; White Karachi, 39s 6d per 492 lb, November shipment; Red Karachi, 38s 6d per 492 lb, October shipment; No. 2 Hard Winter, 36s 3d per 480 lb, November shipment.

Maize.—Argentine, 26s per 480 lb, October shipment; Argentine, 26s 6d per 480 lb, November shipment; American, 26s 9d per 480 lb, November shipment; Russian, 27s 9d per 480 lb, prompt shipment.

Barley.—Californian, 32s 6d per 400 lb, prompt shipment.

Oats.—Konigsberg, 19s per 320 lb, prompt shipment; White Libau, 17s 3d per 304 lb, November shipment; South Russian, 17s 6d per 304 lb, October shipment; New Zealand, 24s per 384 lb, prompt shipment.

Linseed.—Argentine, 43s 6d per 416 lb, prompt shipment; Bombay, 46s 9d per 416 lb, prompt shipment.

Rapseed.—Guzerat, 54s. 6d. per 416 lb., April shipment.

Sesame.—Indian, 61s. 6d. per 384 lb., December shipment.

Cottonseed, Indian, £9 per 2,240 lb., December shipment.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour.—The recent quietness, with downward tendency in flour, has, during the past few days, been followed by decided firmness, and a further advance of 6d to 1s per sack.—Greenhill Bros. (Belfast).

Offals.—Bran continues firm, and in some instances advances are being quoted.—Greenhill Bros. (Belfast).

Flour.—The market continues to advance, prices being 6d. to 1s. per sack higher on the week. Grain.—The demand for American corn is small at 1½d per boll decline. Maize is firm but not active. Good demand for home and foreign oats. Beans scarce on spot, but pressed to arrive. Peas held for extreme prices. Oatmeal steady. Oilcake firm. Mill Stuffs. — Full prices are paid in all positions. Winter wheat patents, 29s to 29s 6d per 280 lb; spring wheat patents, 30s 6d to 31s 6d per 280 lb; American corn, 15s 10½d to 16s per 280 lb; round corn, 15s 4½d to 15s 6d per 280 lb; grinding beans, 18s 10½d to 19s per 280 lb; white pease, 19s 6d to 20s 6d; per 280 lb; broad bran, 112s 6d to 115s per ton; medium bran, 105s to 107s 6d per ton; fine thirds, 135s per ton; common thirds, 112s 6d per ton; American oilcake, 147s 6d to 150s per ton.—McKinnon and McDonald (Glasgow).

Flour.—Trade to-day has been firm, with a fair demand for flour in all positions. Prices are unchanged on the week.—F. L. Medill and Sons, Ltd.

The demand for milling offals continues good, with prices again dearer for coarse middlings and bran. Fine middlings and pollards firm, but unchanged.—John Bawcomb and Co.

Arrivals of wheat from abroad continue to be large. The trade is firm at full prices. Flour unchanged. Maize and barley are 3d to 6d dearer. Oats steady, prices unchanged.—Coventry, Sheppard, and Co.

SEEDS.

Mark Lane, Monday.—The autumn sowing demand is drawing to a close. Trifolium prices now tempting enough for holding over. Rape firm. Mustard unchanged. Rye in good demand—dearer. Winter tares moving freely, no change in price. Peas more movement, prices unsettled. English trefoil, Alsika, white, and red clovers, all firm. In grasses, Perennials and Italian higher.—John Picard and Co.

HOPS.

Borough, Monday.—The market opens this week with a good demand for all classes of English hops, choice colory hops of every description command more money, and all useful copper hops are taken at full rates, even low discoloured samples find buyers at very firm rates.—W. H. and H. Le May.

Canterbury, Saturday.—Good Weald of Kent hops sell 75s to to 84s, and Sussex up to 70s. Business in East and Mid-Kent growths has scarcely commenced, but 95s per cwt has been refused for a good lot. Yearlings, 56s to 65s per cwt.

Worcester, Saturday.—As picking is about over, there was a full attendance of growers, who asked higher prices, but when modified, buyers were found at a substantial advance on last week's prices, especially for good choice qualities. Many of the samples now lack colour but are richer in quality. 2,451 pockets have been weighed this week.—Charles Faram and Co.

HAY AND STRAW.

Birmingham, Friday.—Small supply; trade quiet. Old hay, £4 per ton; new hay, £3 to £3 5s per ton; straw, no quotations.

Hereford, Wednesday.—Hay and straw steady, without change in values.

Lancaster, Saturday.—Meadow hay, 6d; clover ditto, 6½d to 7d; wheat straw, 4d; oat straw, 4d per stone.

Lincoln, Friday.—Good supply, and fair demand. Best hay realised 55s to 60s, and seeds the same price; secondary sorts 50s per ton on the ground, and straw, 35s per ton at the stack.

Manchester, Friday.—Hay, old, 5½d to 6d, new, 5d to 5½d; clover, new, 5½d to 6½d; straw, oat, 3½d to 4d per stone.

Nottingham, Wednesday.—Large supplies on offer, which met with a slow trade. Quotations:—Inferior to good hay, 50s to 60s; prime ditto, 75s to 85s; inferior to good clover, 60s to 70s; prime ditto, 75s to 85s; wheat straw, 50s to 55s; swede turnips, 20s to 21s; old hay, 90s to 100s; old seeds, 95s to 105s per ton.

Whitechapel, Saturday.—Heavier supplies to hand sold lowly, hay being slightly easier. prices:—Bestclover, 84s to 95s; inferior, do., 72s to 80s; specially picked hay, 85s; good do., 75s to 82s; inferior do., 65s to 70s; mixture and sainfoin, 77s 6d to 87s 6d; straw, 28s to 33s per load.

FEEDING STUFFS.

Mark Lane, Monday. — Linseed Cake. — Although nearly all feeding stuffs are high, this article has not shown much advance at present, but we expect higher prices during the winter months. Decorticated Cotton Cake and Meal in good demand. Cotton cake small supplies. Retail trade rather dearer.

TO-DAY'S MARKETS.

CATTLE.

Metropolitan Market, Islington.

	Monday, Sept. 30, 1907. British.	Total.	Monday, Oct. 1, 1906.
Beasts	970	970	1,210
Sheep and Lambs	5,260	5,260	5,800
Calves	10	10	20
Pigs	—	—	—
Milch Cows	40	40	40

Quotations per 8 lb. (sinking the offal).

ENGLISH.

	Inferior. s. d.	Second. s. d.	First. s. d.
Beasts	2 8	3 6	4 8
Sheep	4 8	5 4	6 0
Lambs	5 4	6 0	6 8
Calves	—	—	—
Pigs	—	—	—

Milch cows, per head, £16 to £22

British arrivals include as follows:—Scotland, nil; Eastern Counties, 67; Midland, Home, and Western Counties, 779; Devon, 30; Ireland, 94.

We note to-day a decrease of 80 in the number of beasts offered for sale compared with Monday last, the majority of the supply consisted of grass-fed Herefords and Runts, with a slightly larger number of Devons. Trade for both prime and second quality was entirely devoid of life, partly owing to the late summer prolonging the holday season in consequence of which, butchers' requirements are somewhat limited, and the overstocked state of the Dead Meat Market. For all descriptions of English beasts, with the exception of Devons, a decline of 2d. per 8 lb. was noticeable. The Irish arrivals consisted of 33 Dublins and 61 Waterfords; these also ruled slow of sale at less money. Fat butchering cows and bulls were in average supply, and maintained late currencies.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day. d	s d	Monday, Oct. 1, 1906. s d	s d
Scotch	—	—	—	—
Devons	4	6 to 4 8	4 4	to 4 6
Herefords	4	2 to 4 4	4 2	to 4 4
Norfolks	—	—	—	—
Runts	4	0 to 4 2	4 0	to 4 2
Lincolns	3	8 to 3 10	3 8	to 3 10
Irish	4	0 to 4 2	—	—
Canadian	—	—	—	—
Fat cows	3	4 to 3 6	3 4	to 3 6

There was a decrease of 10 in the number of sheep and lambs penned compared with Monday last. Trade opened and continued throughout the day of an extremely slow and dragging nature, rates favouring the buyer to the extent of 2d. per 8 lb. for both wethers and ewes. Scotch and Irish descriptions were in smaller numbers, the former of which, although slow of sale, maintained late values, whilst the latter were quoted 1d per 8 lb lower. The lamb season being now practically at an end, only a small number were on offer, all scales of which were governed by last Monday's prices, the supply included 200 Scotch, 988 Irish, and 309 from the Eastern Counties. A clearance will not be made.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

	To-day. s. d.	s. d.	Monday, Oct. 1, 1906. s. d.	s. d.
8 st Scotch	5 10 to 6	0	5 10 to 6	0
7½ to 8 st Downs	5 10 to 6	0	5 10 to 6	0
9 st. Downs	5 8 to 5	10	5 6 to 5	8
10 st Halfbreds	5 4 to 5	6	5 4 to 5	6
10 st Yorkshires	—		—	
12st Lincolns	—		—	
10 st Irish	5 2 to 5	4	5 4 to 5	6
10 st Down Ewes	4 0 to 4	2	4 0 to 4	2
11 st Halfbred ditto	3 10 to 4	0	3 10 to 4	0
5 st Down Lambs	6 6 to 6	8	—	
6 st Halfbred ditto	6 2 to 6	4	—	

Calf trade nominal.

No pigs on the market.

London (Central), Monday.—Slow trade, and supplies liberal. Beef, English, 3s 6d to 3s 8d; Scotch, 3s 10d to 4s 4d; American, 3s 2d to 3s 7d; refrigerated hindquarters, 3s 7d to 4s. Mutton, English wethers, 4s 4d to 4s 8d; ewes, 3s 6d to 4s. Lambs, 5s to 5s 4d; Scotch tegs and wethers, 5s to 5s 4d; ewes, 3s 6d to 4s. Veal, 3s 8d to 4s 8d. Pork, 3s 6d to 4s per stone.

St. Ives (Hunts) Monday.—Fat and store cattle and pigs fair trade; fat and store sheep good demand; milch cows fair trade. Beasts, 570; sheep and lambs, 1,395; pigs, 536. Prices:—7s 3d to 8s; mutton, 7s 7d to 10s 6d; lamb, 9d to 10d; pork, 6s 3d to 6s 9d; milch cows, £12 to £20.

FOREIGN.

Deptford, Monday.—No market was held here to-day, but 1,200 Canadian beasts and 100 sheep were held over for Wednesday's market. On Saturday 1,647 beasts from the United States and 403 from Canada were offered for sale. Trade was of a fairly steady nature. The whole consignment, however, consisted only of middling quality cattle, good beasts being very scarce, consequently prices were low. Besides the above, 300 States and 1,000 Canadians were withheld from sale. Also 150 Canadian sheep. The best States beasts on offer were quoted at from 4s 1d to 4s 3d, Canadians, 3s 10d to 4s per 8 lb (offal given in).

Liverpool, Monday.—Supply of cattle slightly larger. Demand slow, and prices lower except for very good extra quality. Sheep and lambs again shown in smaller numbers. Trade slow, only choice quaility of both maintaining last week's quotations. Middling and rough classes much lower. Beef, 6½d to 5d per lb; mutton, 8½d to 6d; lamb, 8½d to 7d. per lb. At market 1,436 cattle and 7,683 sheep.

OIL SEEDS.

Mark Lane, September 30.—The market for linseed has been tending in sellers', that for cottonseed in buyers' favour. Rapeseed and sesame are quite firm.

WET AND DRIED GRAINS.

Mark Lane, Saturday.—Wet Grains: Business has been done for the winter months at ale 22s, and porter 19s per ton on rail, London. Dried Grains —A better Continental demand has been experienced, and stocks are considerably reduced, 100s ale and 95s mixed being paid ex factory, in buyers' bags At these prices same compare favourably with bran, pollard, &c. American cane treacle, 90s per ton; and kiln-dried sea-damaged wheat from 21s per qr.—Hamlyn and Co., 37 and 38, Mark Lane.

PROVISIONS.

London, Monday.—Bacon: The arrivals of bacon last week were:—From Ireland, 2,723 bales, and from foreign ports, 13,126 bales. There was a dull market for bacon throughout the week, resulting in prices generally being lower. Quotations:—Irish, 56s to 58s up to 62s; Danish, 52s to 56s up to 62s; Canadian, 54s to 57s up to 58s. Butter: The butter market was firm. French, 96s to 110s; Danish, 115s to 117s; Russian, 78s to 102s; Dutch, 110s; Irish, 90s to 112s; Canadian, 110s to 112s; Victorian, 88s to 114s; New South Wales, 88s to 112s; Queensland, 86s to 104s; New Zealand, 98s to 112s. Lard.—The lard market was slow. Irish, 50s to 58s; Danish, 48s to 50s; American, 46s 3d to 48s

POTATOES.

Borough, Saturday.—A good assortment was in quiet request. Epicures, 65s; British Queens, 65s to 75s; Blacklands, 65s to 70s; Up-to-Dates, 70s to 80s; Sharp's Express, 70s to 80s per ton. French, 3s 3d; and Dutch, 3s 3d per bag.

Berwick, Saturday.—The market was fairly supplied, satisfactory business being done at 65s per ton.

Carlisle, Saturday.—A large supply and a rather slow sale, at 7d to 8d per stone.

Lancaster, Saturday.—Good supply, which sold at 10s 6d per load; retail, 9d per stone.

Spitalfields, Saturday.—A fair inquiry prevailed for the good quantity. Epicures, 65s; British Queens, 70s to 75s; Blacklands, 65s to 70s; Up-to-Dates, 70 to 75s; Sharp's Express, 65s to 70s per ton. Dutch, 3s 3d; French (Beauvais), 3s 6d per bag.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

At the Islington Cattle Market during the week, with a rather larger supply, mostly consisting of consignments from the Midland and Home Counties, trade on both market days ruled of an extremely slow and dragging nature, with, for both prime and second quality, a downward tendency in regard to value, in some cases to the extent of 2d. per 8 lb. The arrivals from Ireland consisted of 54 Dublins and 36 Waterfords, also a consignment of 60 store cattle, comprising yearlings and two-and-a-half-year-old heifers; these met with very little demand and were quoted at £7 10s. and £11 per head respectively. There was an average supply of fat cows and bulls from the South-Western counties on both market days. These, however, ruled slow of sale at Monday's values. No fat beasts were offered for sale on Thursday as usual.

At the Foreign Cattle Market, Deptford, no market was held on Wednesday, but on Monday and Saturday a fair trade was experienced, at a downward tendency in value, due to too many middling quality beasts being offered for sale. The total number on offer at both markets was 3,904, as against 3,865 during the preceding week, consisting of 1,100 British (increase 70) and 2,804 foreign (decrease 31), these latter comprising 2,401 from the United States and 403 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal):—80 to 90 stone Devons, 4s. 6d. ex 4s. 8d.; 90 to 95 stone Herefords, 4s. 4d. to 4s. 6d.; 95 stone Runts, 4s. 2d. to 4s. 4d.; 100 stone Shorthorns, 3s. 10d. to 4s.; 95 stone Irish, 4s. 1d. to 4s. 3d.; 90 stone States, 4s. 1d. to 4s. 3d. ex 4s. 4d.; 95 stone Canadians, 3s. 10d. to 4s.; 90 stone fat cows, 3s. 4d to 3s. 6d.

The sheep trade, which was confined to the Islington market, ruled of a firm and steady nature on Monday, late currencies being well maintained for all grades of English sheep. Scotch descriptions met with less inquiry, but nevertheless were able to uphold late values, whilst Irish, notwithstanding the large number on offer, sold very readily at good money. Lambs were in excess of the requirements, consequently a downward tendency was noticeable, but not sufficiently so to warrant our quoting any decline. On Thursday a very slow trade was experience at late values. Best pens made per 8 lb. as follows (sinking the offal):—7½ to 8 stone Downs, 6s. to 6s. 2d.; 8 stone Scotch, 5s. 10d. to 6s.; 9 stone Downs, 5s. 10d. to 6s.; 10 stone Irish, 5s. 4d. to 5s. 6d.; 10 stone Downs, 5s. 8d. to 5s. 10d.; 10 stone Halfbreds, 5s. 6d. to 5s. 8d.; 10 stone Down ewes, 4s. 2d. to 4s. 4d.; 5 stone fat Down lambs, 6s. 6d. to 6s. 8d.; 6 stone Half-bred ditto, 6s. 2d to 6s. 4d.

The calf trade ruled of a slow nature, the total number consigned numbering 40 head, the best of which were quoted at from 4s. 10d. to 5s. per 8 lb. (offal given in).

Trade in the West.

The harvest throughout the West has now been brought to a successful termination, and everyone is well pleased with the result; and though the quality of the corn may not be exactly all that could be desired, still what is lacking in quality is more than compensated for by the bulk. And the fields being once again cleared, rain is now generally desired, as under the scorching influence of the past fortnight's brilliant sunshine the pastures are showing unmistakable evidence of languishing, and this, of course, means that without rain the grass lands, especially upon the hills, will be soon giving out, and a shortage of pasture will follow. In spite of such a probability, stores of all kinds keep unusually buoyant, nothing more so than sheep; but this feeling of confidence as to the future is largely inspired by the knowledge that the present season's root crop is one of exceptional promise, and after discounting all that we hear about the unsoundness of a good many of the roots, we believe that even the crop will come considerably above the average; and this is a matter of vital importance to the flockmasters, especially those keeping breeding flocks. Therefore it is little matter for surprise to find the prices of sheep keeping up as they are doing, and which there is every prospect of their still continuing to do unless something very unforeseen occurs. Of course the one chief factor responsible for this is the abnormal shortage of sheep in the country, and whilst this continues there is very little likelihood of sheep dropping back to the old unremunerative level to which in some seasons they have sunk before the scarcity made itself felt so keenly as it is doing at present. The existing condition of things affects all classes of store sheep and lambs in an equal degree, and nothing is at all likely to occasion a reaction whilst the demand continues as keen as it is at present, and there is the same difficulty experienced in meeting the demands of buyers, this being confined to no particular district, but is general all over the country, this being put by best judges at from 7s. to 10s. a head. Draft ewes are selling from 45s. to 58s. for Downs, and from 48s. to 65s. for horns; grazing ewes, 34s. 6d. to 46s.; and lambs from 28s. 6d. to 45s. And a similar buoyancy characterises transactions in keeping cattle, both barreners and young grazing stock bringing capital prices all round, high condition graziers making £22 or £23 per pair, up to £30 for young bullocks of a good stamp, and £17 to £22 for animals not so heavily fleshed. Stirks are also meeting with a very active demand at good prices, ranging from £6 15s. to £9 10s. each, and yearling heifers sell equally well. Milch beasts are a good deal sought after at varying prices, ranging from £14 (for plain animals) up to £22 for deep milking heifers, in-calvers ranging from £10 to £15 according to season; other store stock sell at equally good rates to those we have quoted.

In fat stock bullocks rule very firm indeed for the best quality steers or maiden heifers up to 12s. per score and over, Shorthorns, Devons, and Polled Angus all selling, if anything, at advanced rates; but anything of a distinctly secondary character is scarcely worth as much money, prices being very irregular, and ranging from 10s. up to 11s. per score. Best Devon steers are now making up to £25 each and heifers to £22 or £23, according to size. Mutton is still anything but plentiful, and prices for all the best weights rule very firm up to 9d. for best young mutton; seconds making 7½d. to 8d.; old ewes, 6½d. to 7d.; and choice sucking lamb up to 10½d., where the finish is not to be called into question. Calves still fail to meet the demand in point of supply, and sellers as a consequence show no disposition to give way in price, which cannot be quoted under 9d. for the best animals (or from £3 10s. to £6 15s. each); seconds, 7½d. to 8d. Pigs show no sign of lessening in value, this being especially the case with porkers, which cannot be quoted under 10s. 6d. to 11s. per score, and baconers from 9s. 6d. to 10s., anything under this value distinctly lacking in quality.

Trade in Scotland.

The number of fat cattle on offer has been larger, and the general quality a shade improved. A good steady demand has been experienced, and prices as nearly as possible similar to those of the preceding week. Fat cows made rather less money. There was a full average supply of sheep and lambs on offer, and the general quality was also better. A steady demand has been experienced, and previous prices rather improved upon. There was a good show of calves and a fair show of pigs, both of which with difficulty maintained previous prices. There was a considerable increase in the number of store sheep and lambs, but many of them of very indifferent class. For Cheviot ewes the demand has been decidedly quieter, and a fall of from 2s., to in some cases 5s. per head had to be accepted. A small supply of store cattle were sold out without change in value. Milch cows a good show, and they met a trade similar to last week. Quotations:—Top price of cattle per live cwt., 39s. 2d.; current, 36s. to 37s. 6d.; Irish, 32s. to 35s.; mutton, 6½d. to 9½d. per lb.—John Swan and Sons, Ltd.

Trade in Ireland

There was a good attendance of buyers in Dublin market on Thursday last, but buying was slow for stock not in very good condition. Choice cattle were from 10s. to 15s., and coarse beasts fully 20s. under the previous day's price. Heavy sheep were somewhat of a drug, but other classes were in fair request. There were over 4,000 beasts, a decrease of nearly 100, and 7,764 sheep, a decrease of over 1,300 on the previous week. A strong inquiry for A 1 lots of beasts was visible at the commencement of the market, but lasted only a short time, 29s. to 30s. per cwt. being the offer for good beasts. The market did not clear out well, middling and inferior cattle not selling. The choice dead-weight prices were for heifers and ox beef, from 52s. 6d. to 55s., with 56s. given in some cases for extra choice: medium beef, 47s. 6d. to 50s.; and inferior from 44s. to 46s. per cwt.

The sheep market was pervaded by an idle tone, heavy mutton did not sell well, best wethers were worth from 7d. to 7½d., and ewes from 6½d. to 7d. per lb., handy weight hoggets sold fairly well, also fat lambs, but as a rule these were considerably off in price. Veal was sold from 7½d. to 8d. for choice, and from 4½d. upwards per lb. for inferior classes. Dairy and store cattle sold fairly well, but badly bred and backward beasts were hard to part with. Dairy cows in the marked ranged much as before.

In the Dublin pig market supplies were large, and English and home buyers were in good attendance. Rates manifested a drop of 2s. to 3s. per cwt. on the good sorts, and from 3s. to 5s. on big coarse pigs, choice light-weight bacon pigs from 47s. 6d. to 50s. per cwt., and inferior pigs from 36s. to 38s. per cwt.

LONDON.

Central Market, Friday.—Good supplies, and trade very slow for beef, which finished lower; mutton and lamb firm. English beef, 3s 6d to 3s 8d; Scotch sides, 3s 10d to 4s; shorts, 4s 2d to 4s 4d; Deptford and Liverpool killed, 3s 2d to 3s 7d; refrigerated hindquarters, best, 3s 10d to 4s 1d; ditto seconds, 3s 7d to 3s 9d; ditto forequarters, 2s to 2s 4d; inferior beef, 2s to 2s 8d; mutton, Scotch wethers, 5s to 5s 4d; ditto tegs, 5s; ditto ewes, 3s 8d to 4s; English wethers, 4s¾d to 4s 8d; ditto ewes, 3s 6d to 4s; Dutch sheep, 4s to 4s 4d; English lamb, 5s to 5s 4d; veal, 3s 8d to 4s 8d; English pork, 3s 6d to 4s; Dutch ditto, 3s 6d to 4s per 8 lb.

Islington, Thursday.—To-day's supply of beasts consisted entirely of fat cows and bulls from South-Western counties; trade ruled slow at Monday's values. Top prices paid per 8 lb:—Fat cows, 3s 4d to 3s 6d; fat bulls, 2s 9d to 3s 2d. A decrease of 20 in the number penned in sheep market compared with Monday last. Sheep trade was slow and dragging for both wethers and ewes, so few buyers being present, but no quotable decline in value can be noted. Very little inquiry for lambs. Best pens made per 8 lb as follows:—7½ to 8 stone Down sheep, 6s to 6s 2d; 9 stone ditto, 5s 10d to 6s; 10 stone ditto, 5s 8d to 5s 10d; 10 stone half-breds, 5s 6d to 5s 8d; 10 stone Down ewes, 4s 2d to 4s 4d; 5 stone fat grass lambs, 6s 6d to 6s 8d. Calf trade slow at a decline in value. Quotations per 8 lb, sinking the offal:—Beasts, 2s 9d to 3s 6d; sheep, 4s 2d to 6s 2d; calves, 3s 10d to 5s; lambs, 5s 4d to 6s 8d.

COUNTRY.

Ashford, Tuesday.—Beef sold slowly at last week's rates, best making about 4s 8d. Mutton depressed, and 2d cheaper. Down wethers, 5s 4d to 5s 10d; best Kent wethers, 5s 2d to 5s 6d; ewes, 4s to 4s 2d. Veal, 5s to 5s 6d; roasting pigs dear, 4s to 4s 2d; large hogs, 2d cheaper.

Basingstoke, Wednesday.—Best fat beasts, 6¾d to 7¼d; second-class ditto, 6d to 6½d; bulls, cows, and inferior, 5d to 5½d; best sheep, 9d to 9½d; second-class ditto, 7½d to 8½d; old ewes, rams, and inferior, 6½d to 7d; choice sucking lambs, 9½d to 10½d; fat calves, 6½d to 7½d per lb; fat porkers, 10s 6d to 11s 6d per score.

Berwick, Saturday.—Attendance of farmers and buyers very small, and trade rather better. Calves, £6 10s; heifers, £7 10s; stirks, £9 to £10 15s; two-year-olds, £12 12s.

Birmingham, Thursday. — Fair supply of pigs; small supply of beasts and sheep. Trade fair for pigs but slow for beasts and sheep. Quotations:—Beef, 5½d to 6½d per lb; mutton, 6½d to 8½d per lb; lamb, 8½d to 9d per lb; bacon pigs, 9s 6d per score; cutting pigs, 9s 9d to 10s per score; sows, 7s 10d to 8s per score.

Bristol, Thursday.—Fat cattle were plentiful, but demand was not brisk, and business was slow at last week's values. Sheep were numerous and trade was quiet, with prices unchanged. Pigs were again scarce, porkers realising 10s 3d per score, and baconers falling to 9s.

Calne, Friday.—Prices of pigs:—In lots of not less than ten, on rail within 100 miles, 1s. per pig extra for delivery by road. Prime

stores, 6 sc. 10 lb to 8 sc. 10 lbs, 9s 0d per score, 8 sc. 11 lb to 9 sc. 10 lb,, 8s 6d per score; 9 sc. 11 lb to 10 sc. 10 lb, 8s 0d Pigs outside these limits at their value.—C. and T. Harris and Co., Ltd.

Canterbury, Saturday.—There was a large entry of stock, including a number of rams from the registered flock of Mr. F. Neame. They averaged about £10 5s per head, and ranged up to 22½ and 30 guineas. Good lambs were in request at from 29s to 36s, and occasionally 39s, and ewe tegs were selling at 44s to 50s, with a few exceptional pens at a trifle more money. Old sheep, 25s to 35s; and better class, 36s to 46s.

Carlisle, Saturday.—Few buyers attended, and a moderate trade was done. Small heifers, £8 10s to £10 10s, better description £12 10s, cattle for feeding-off purposes £15 10s.

Chester, Thursday.—Fair supplies of store and dairy cattle, sheep, and lambs. Buyers were numerous, and a large trade was done, though there was scarcely as good a clearance as last week. Quotations:—Milch cows, £17 to £22; calvers, £14 to £17; barrens, £10 to £13; heifers, £9 to £15; stirks, £6 to £10; sheep, 30s to 48s; and lambs, 26s to 32s per head.

Chichester, Wednesday.—There was a large attendance of buyers, and a brisk demand prevailed for both fat and store sheep, and prices were fully up to those realised at recent sales. There was much more inquiry for store cattle, and practically every lot changed hands. Pigs met a steady trade at about last week's prices. Quotations:—Devon steers, 4s 6d to 4s 10d; Shorthorn steers, 4s 2d to 4s 6d; Southdown tegs, 6s 6d to 6s 8d; West Country ditto, 6s 2d to 6s 6d; West Down ewes, 4s 4d to 4s 8d; Southdown ewes, 4s 6d to 5s; fat calves, 5s to 5s 6d; porkers, 3s 10d to 4s 4d.

Colchester, Saturday.—Mutton was in short supply, and made 6s 4d per stone of 8 lb; beef, 4s 6d to 4s 8d; and pigs, 9s per score. There was a fair supply of grass beef.

Doncaster, Saturday.—Moderate supply of cattle, and a fair attendance of buyers. Milch beasts firm, but no change in prices. Milch beasts, £18 to £23; bullocks, £12 to £18; heifers, £11 to £15; drapes and stirks, £10 to £13; young stores, £7 to £10 each. Very large supply of sheep, over 2,000 in number, and a good demand for breeding sheep. Gimmers, 56s to 60s; ewes, 50s to 58s: lambs, 38s to 40s each.

Dorchester, Saturday.—The trade market was well supplied, both with store cattle and fat bullocks, including some very ripe beasts from the Vale country, and many useful graziers from the best known stock-raising centres. Despite the fair and show occurring the two days previously there was a good attendances of buyers, and as everyone was confidently anticipating rain, this imported a very poor tone to business, and those who had stock on offer asked extreme rates. Best heifers and calves sold from £16 10s to £20 10s each, and cows from £13 to £18. Barreners ranged from £18 up to £27, and young stock—stirks and yearlings—from £5 up to £11. Fat beast showed a decline in value, the ripest animals realising fully 11s 6d to 12s per score, and seconds 10s to 11s. Very little passing in mutton, which may generally be quoted as making 7¼d to 8¼d per lb.

Dublin, Thursday.—A well-sustained demand for cattle at last week's prices, and a good clearance effected. No material alteration in price of sheep, though shipping hoggs and fancy light weights were easier sold, heavy sheep again difficult to place and in excess of requirements. Cattle—Live weight (best), 30s to 33s per cwt; secondary sorts, 26s to 28s per cwt. Mutton (dead weight), 6½d to 7¾d per lb.—Ganly, Sons and Co.

Edinburgh, Wednesday.—Sheep very poor trade, cattle and milch cows going good trade. Cheviot sheep to 35s; Cheviot ewes to 32s; half-bred lambs to 29s; greyfaced lambs to 21s; polled bullocks, £13 to £15; best Shorthorn cows to £26 10s; Ayrshires to £19

Exeter, Friday.—Small supply of fat cattle, lower tendency all round, top prices for steers and maiden heifers being 11s; cows, 9s 6d to 10s; best quality sold out. Remarkable falling off in the supply of sheep. Big lambs and small sheep, 9d; larger size, 8d; fat ewes, 6½d. Little inquiry for breeding ewes; rams, 5d; calves, 7d.

Glasgow, Wednesday.—Fair show of cattle at market, and for all classes good selling trade experienced. Prime bullocks scarce and dear; other sorts also in good demand; tops, 63s to 66s; secondary, 59s to 61s per cwt. Sheep and lambs penned in average numbers, and prime quality being very scarce sold dear; other descriptions also met fair demand; best mutton, 8¾d to 9¼d; secondary, 8d to 8½d per lb; finest lambs, 7d to 9¼d per lb.

Hereford, Wednesday.—A large supply of beef quite above the demand, the price for best quality bullock and heifer being from 6½d to 6¾d; cow beef, 5d. A fair supply of calves, with veal making 6½d to 7d. A good supply of sheep, with trade firm. Wether mutton made 8d, and ewe mutton 6½d to 7d. Several bunches of stock ewes changed hands at satisfactory prices. Lambs scarce, sold well, butchers' lambs making 8d. Store lambs dear; a larger supply, which made from 5½d to 6d. A few bacons from 5d to 5½d.

Leicester, Saturday.—Heavy consignments of home-bred bullocks. Buyers were well represented, but trade ruled irregular, and prices were fully 10s per head lower. Choice milch cows sold freely at £20 to £22; good lots, £16 to £17 10s; inferior, £14 to £15; Shorthorn bullocks, £12 to £15 10s; cross-bred Angus, £13 10s to £14 10s; Irish bullocks, £14 10s to £15; Welsh cattle, £9 to £13 10s; young stock, £6 to £7; and calves, 20s to 40s each. Sheep were in fair supply, and sold freely. Breeding ewes, 50s to 58s; lamb hogs, 25s to 39s; and rams, £3 3s to £5 10s each.

Lincoln, Friday.—A small consignment of horned stock, and business ruled fairly brisk. Young beasts realised £9 to £12, and milch cows, £17 to £22 per head. The sheep pens were well filled, and trade was steady. Gimmers sold at 66s to 69s, young ewes 50s to 60s, drape ewes 33s to 44s, and lambs 38s to 44s per head.

Lynn, Tuesday.—A rather smaller show of fat beasts met with trade at late rates, and realised from 7s to 7s 9d per stone. The few stores shown experienced a slow trade, and made from £6 to £15 each. Fat sheep in average supply met a slow trade, and fetched 9s to 10s per stone; stores, 45s to 50s each; fat lambs, 30s to 40s; store lambs, 36s to 45s.

Manchester, Friday. — Beef: Firsts, 5½d; seconds, 4d to 4½d.; thirds, 3d to 3½d. Mutton: Firsts, 7¼d; seconds, 6¼d to 6¾d; thirds, 5¼d to 5¾d. Veal: Firsts, 6d; seconds, 5d to 5½d; thirds, 4d to 4½d. Bacon pigs: Firsts, 5½d; seconds, 4¼d to 4¾d; thirds, 3¼d to 3¾d. Porket pigs: Firsts, 6½d; seconds, 6d to 6¼d; thirds, 5¼d to 5¾d per lb

Newcastle, Tuesday.—Trade was slow for cattle, but steady, and there was no change in prices. Quotations:—Prime heifers, 7s 3d to 7s 6d; second class, 6s 9d to 7s; prime steers, 7s to 7s 3d; second class, 6s 9d to 7s; coarse and inferior, 6s to 6s 6d per stone, sinking the offal. Trade for sheep was a shade heavier, but prices were similar. Quotations:—Choice young sheep, 8d to 8¾d; strong heavy, 7¾d to 8¼d; choice lambs, 8¼d to 9d; second class, 8¼d to 9d; ewes, 6d to 6¾d; rams, 5d to 6d per lb. Trade in veal was fair at unchanged prices of 6d to 7¼d per lb.

Newport, Wednesday. — Large supply of cattle, moderate supply of sheep and lambs, fair number of calves and pigs. Large attendance of buyers, and good demand all round. Best beef, 6½d to 6¾d; seconds, 6¼d; cows, 4¾d to 5¼d; best wether mutton, 6½d to 8¾d; lamb, 9d; calves, 6½d to 8d; porkers, 10s 3d to 10s 9d per score.

Norwich, Saturday.—A large show of fat cattle, the best of which sold up to 8s per 14 lb stone; the demand for middle-class bullocks, of which several were offered, was slow at from 7s 3d to 7s 6d; cows made 6s 9d. Small show of sheep; quality good; the best made 9d per lb; others, 8¼d; no ewes were offered. Pigs were of good quality, and a good trade was experienced, all being sold; baconers made from 6s to 6s 6d; sows, 5s 3d; and porkers, 6s 6d to 6s 9d per stone. A very slow trade was experienced for store cattle. Cattle with most condition sold best; two and three-year-olds ranged from £13 10s to £18; best yearlings, £10 15s; others, £3 10s to £7 10s. For store sheep trade slower, best shearlings making from 56s to 60s; other ages, 42s to 51s. Lambs were a little cheaper, at 33s to 42s. Sharp trade for any nice store pigs at from 11s to 25s. Fair show of calves, which met a slightly dearer trade at from 27s to 55s.

Nottingham, Saturday.—Short supply of stock, meeting with good trade. Best in-calf cows, £17 10s to £22; heifers, £14 to £17 10s. There were few store beasts shown, and met with an improved trade at £12 to £14 10s each. A better trade in calves, fetching up to 50s per head.

Preston, Wednesday. — Moderate supplies. Prices for the best quality well maintained, but middling and inferior qualities were difficult to sell. Quotations:—Choice local-fed heifers, 6¾d; ditto Irish, 6¼d; secondary ditto, 6d; choice cows and bulls, 5¾d; secondary ditto, 5d to 5¼d; best quality hoggs and lambs, 9d; heavy and inferior ditto, 8¼d; prime ewes, 6¾d; heavy tups and ewes, 5¼d to 6¼d; choice calves, 7d; secondary ditto, 6d to 6¼d per lb.

Retford, Saturday.—Supply small. Good milch cows scarce and dear at £20 to £22; secondary and inferior animals, down to £14; steers and heifers, £10 to £12; yearlings, £6 to £8; and calves, 40s to 45s per head.

Romford, Wednesday.—Fat beasts in average supply, trade slower. Best beasts 4s 4d to 4s 6d; middlings, 4s to 4s 2d per stone. Calves in short supply, prices about the same at 4s 10d to 5s per stone. Sheep in short supply, trade about the same. Best small sheep, 5s 8d to 6s; larger sheep, 5s 4d to 5s 6d per stone. Ewes in short supply at 4s 2d to 4s 4d per stone. The quotations for lambs are discontinued. Milch cows in good supply, trade better. Pigs in larger supply, rather better trade: Small porkers, 4s to 4s 2d; large hogs, 3s 8d to 3s 10d per stone.

Sheffield, Tuesday.—A small show of milch cattle. Business generally ruled very quiet, the best lots making £19 to £21, and secondary ditto £15 to £16 10s per head.

Shrewsbury, Tuesday.—Usual supplies of fat and store cattle. Good trade in beef, store sheep, and pigs. Quotations:—Beef, 6½d to 7d per lb; mutton (wether), 9d to 10d per lb; ewes, 7d to 8d per lb; lamb, 9d to 9½d per lb; veal, 7d to 7½d per lb; porket pigs, 10s to 11s per score; bacons, 9s 3d to 9s 9d per score.

Stockton, Wednesday.—About an average show of the best cattle, and, with few customers, trade was slow at 7s 3d to 7s 6d per stone, rougher kinds making 6s 6d to 7s. Lambs sold at 9d per lb, shearlings at 8½d, ewes 7d, and tups 6d. The pig trade was very slow, prices being about the same as last week. Small porkers made up to 7s 6d, mediums, 7s, and sows from 5s 9d to 6s 6d per stone.

Thame, Tuesday.—One of the largest entries of cattle for many years were pitched in this market. The quality was excellent, and considering the large number entered, there was a selling trade throughout, although no alteration in prices upon previous weeks. Sheep still continue to sell well, a clearance being again effected. Fair trade for veal, with sharp demand for bacon and pork. Store pigs and weaning calves all finding purchasers. Messrs. Bond and Burrows' sale comprised 171 beasts, 266 fat sheep, 96 fat and weaning calves, and 198 fat and store pigs. Fat oxen made from £16 to £20 5s; fat heifers, £15 to £20; fat wethers, 49s to 65s 6d; fat ewes, 42s to 58s 6d; fat lambs, 35s to 46s; fat calves, £3 to £4 1s; weaning cow calves, 30s to 65s; bull calves, 20s to 50s; bacon hogs, £3 5s to £5 10s; porkers, 30s to 48s; store pigs, 16s to 32s.

Truro, Wednesday.—Attendance fairly good, business brisk. Fat bullocks, 56s. to 58s per cwt; barreners and store bullocks, 40s to 45s per cwt; cows and calves, £12 to £16; rearing calves, 20s to 40s each; ewes, 42s to 48s each; wethers, 6½d to 7d per lb; ewes, 5d to 5½d; lambs, 7d; pigs, 10s 9d to 35s; beef, 6d to 8d per lb; mutton, 6d to 8½d; lamb, 8d to 9d; veal, 6d to 8d; pork 6d to 8½d; pork (carcasses), 5d to 5½d.

Wolverhampton, Wednesday.—Trade very slow all round; moderate supply. Quotations:—Beef, 5d to 6¾d per lb; mutton, 7d to 9d per lb; veal, 6d to 7½d per lb; lamb, 8½d to 9¼d per lb.

Worksop, Wednesday.—Moderate supply of beef, with trade slow. Fair supply of mutton, with trade also very slow, prices being down for the latter nearly 1d per lb, whilst beef was about 6d per stone cheaper. Best quality beef made up to 7s 3d; secondary qualities, 6s 9d to 7s per stone; best Southdown wether and cross bred shearling mutton, 7½d to 8d; ewes, 4½d to 5d; lambs, 8½d per lb.

Yeovil, Friday.—Fairly heavy offer of stock, all of which sold readily. Best quality heifers and calves sold up to £20; secondary, £12 10s upwards; cows and calves to £19 5s for best quality, others selling at from £11 10s; best heifers, £12 to £15 10s; secondary, £9 to £11 5s; stirk heifers, £7 to £9.

York, Thursday.—There was a large show of store cattle. The attendance of buyers was small, and trade was very slow. Some of the best quality three-year-olds made up to £16, and two-year-olds up to £11 10s, whilst a few lots of fine English stirks made up to £9 10s. For calving and milch cows the trade was fairly steady. All the best young animals were sold at prices ranging up to £22, but the majority could be had at £16 to £18 10s. per head. The number of sheep penned was fully 30,000, including all classes, and trade was improved all round, particularly in respect of ewes. Best north country ewes made up to 58s, but the general run sold at from 48s to 54s, Cheviot ewes made 26s to 33s, best Masham ewes up to 50s, others 44s to 48s, south country ewes 38s to 48s, north country gimmers 46s to 55s; best north country lambs up to 40s, others 32s to 37s, best twice crossed lambs up to 40s, general run from 30s to 35s, Masham lambs 24s to 28s, and Masham shearlings 42s to 47s each. A fair supply of rams met a slow sale, making up to 7 guineas per head.

DAIRY PRODUCE.

London, Friday.—Butter.—The demand for Australian and New Zealand butter is necessarily small, the principal point of interest in the market being the arrival of new season's butter from Australia, which has brought from 110s to 112s per cwt for salt, and 114s to 116s for unsalted, while last season's New Zealand salted butter has

brought 108s, and exceptional quality even 110s per cwt. Canadian remains at last week's figures. The market for foreign butter, with the exception of French, has been rather quiet, and prices have been easier in tone. The Copenhagen official quotation remains unchanged at 99 kroner, which is 10 kroner below the corresponding week last year. French butter advanced this week 6d per dozen lb for rolls, 4s per cwt for fresh and salt baskets and firkins. A further rise of 6d for rolls and 5s for fresh and 4s for salt will take place on Monday next. CHEESE.—There has been a lack of life in the markets this week, although prices for the best goods remain firm, but anything a bit flavory is offered at more tempting prices.—W. WEDDEL AND Co.

CHEESE.

Highbridge, Tuesday.—A good attendance of buyers, a brisk sale, and all cleared. Best Caerphilly dairies realised up to 58s per cwt.; secondary dairies, 54s to 54s 6d; and other dairies, 50s to 52s. A few inferior lots failed to reach 44s. Cheddars, 60s to 61s; truckles, 54s to 60s; doubles. 48s to 52s.

Newport, Wednesday.—There was a good attendance and a brisk demand. Quotations:—Caerphillies, 42s to 52s per cwt; fancy dairies, 54s to 56s; Derbys, 60s to 62s; truckles, 58s to 60s; singles, 58s to 60s; Cheddars, 56s.

FRUIT AND VEGETABLES.

Covent Garden, Saturday. — Fairly good supply; steady demand. Quotations for English produce:—Grapes, 6d to 3s 9d; plums, 1s to 4s; damsons, 1s to 1s 6d per half sieve; apples, 3s to 9s per barrel; nectarines, 3s to 15s; green figs, 1s to 3s per dozen; melons, 1s to 2s; peaches, 3s to 12s per dozen; pears (Hazels), 2s 6d to 4s per bushel; ditto (Williams), 3s to 5s 6d per half bushel; cobnuts, 2s to 3s 6d; filberts, 2s 6d to 3s per 12 lb; tomatoes, 2s 9d to 3s 3d; scarlet runners, 1s to 1s 6d per bushel; marrows, 2s 6d to 3s 6d; cauliflowers, 2s 6d to 3s 6d; cabbages, 2s 6d to 3s per tally; cucumbers, 4s 6d to 5s 6d per flat; cos lettuce, 6d to 8d per score; turnips, 2s 6d to 3s 6d; carrots, 1s 6d to 2s 6d; mint, 1s to 1s 6d; parsley, 1s 6d to 2s per dozen bunches; green peas, 3s to 4s per bushel; horseradish, 10s to 15s per dozen bundles; shallots, 2s 6d per 12 lb; beetroots, 1s 4d to 1s 6d per dozen bunches; endive, 1s 6d to 1s 9d per dozen; potatoes, 70s to 85s per ton.

POULTRY AND GAME.

Smithfield, Saturday.—Good supplies, slow demand. Young grouse, 6s to 6s 6d; old, 2s 9d to 3s; young partridges, 5s to 5s 6d; old, 2s 3d per brace; geese, 5s 6d to 7s; country ducks, 2s 3d to 2s 9d; Aylesbury ducks, 2s 6d to 3s; wild ducks, 1s 1d to 1s 3d; Surrey fowls, 2s 9d to 3s 6d; Sussex fowls, 2s 6d to 3s; Lincolnshire fowls, 2s to 2s 9d; Essex fowls, 2s to 2s 6d; Irish fowls, 1s 8d to 2s; quails, 8d to 1s; feathered pigeons, 8d to 9d; Bordeaux pigeons, 9d to 1s 1d; English hares, 2s 6d to 3s; Scottish hares, 1s 4d; tame rabbits, 1s 2d to 1s 6d; wild rabbits, 6d to 10d; live hens, 1s 6d to 2s each; Australian rabbits, 5s 6d to 6s 9d per dozen.

CORN STATISTICS

Weekly Arrivals into London.

September 18 to September 25 inclusive.

Qr.	British.	Foreign.	Total.
Wheat	4,600	116,000	120,600
Barley	1,950	24,000	25,950
Malt	15,700	—	15,708
Oats	10,000	20,512	33,512
Beans	127	919	1,046
Peas	25	1,079	1,104
Maize	—	15,265	15,625
Tares	59	100	159
Linseed	—	12,000	12,000
Sunflowerseed	—	480	480
Millet	—	50	50
Flour sacks	19,796	31,977	51,773
Rice flour	—	7,000	7,000
Maizeflour	—	6,800	6,800

Five Years' Comparative Averages.

(OFFICIAL.)

Comparative statement of grain sales and prices at the Statute markets for the week ending September 28, and for the corresponding week in each of the years from 1903 to 1906:—

	WHEAT.			BARLEY.			OATS.		
	Qrs.	s.	d.	Qrs.	s.	d.	Qrs.	s.	d.
1903	57,499	26	3	41,730	23	9	34,054	15	9
1904	56,534	29	10	119,553	25	5	44,796	15	8

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The weather since October came in has been almost exactly what farmers would have ordered. The southern and eastern counties have seen the drill at work, and some wheat for 1908 is already in the soil. For the most part, however, the plough is turning the land into a new tilth, farmyard manure is being carted on to the fields, and the labours of mid-October will this year be mainly those which a forward season sees in full progress by mid-September. In the north harvest is not yet completed, and thousands of fields of oats are in Scotland still uncut. We hear of farmers busy carrying oats in Wales, on Dartmoor, and in the Lake country. This crop is often a heavy one in these belated regions, but it is not for the most part ripe even yet. in other words, it will now never be really ripe. It was a surprise to hear at Mark Lane on Friday that large areas in the English Fenland had been cut perfectly green. The wheat threshings are giving good results, and some fine malting barley has already made a welcome appearance at the London Exchange.

Our weather record for September shows that the month was nearly as dry as March. Some of the daily papers give a very small fall of rain indeed, but this is due to the 30th having been wet, and the wish to get a record into the issues of October 1 led to the last day's figures being either omitted or averaged. Up to the 29th only ·60 of an inch had fallen, whereof ·35 had fallen on the 2nd. From the 3rd to the 26th there was a drought, which on the 22nd was broken by a short thunderstorm. The temperature was actually higher than for August, but this was due not to September heat but to August cold. The warmth of September was not remarkable; the month was dry, bracing, and genial, but not hot.

1907.	Rain. (inches.)	Sunshine. (hours.)	Warmth. (degrees.)
January	1·01	40	39·0
February	1·02	55	42·0
March	·81	152	48 0
April	3·10	105	48 0
May	2·50	151	51·0
June	23·0	180	54·0
July	1·80	162	59 6
August	1·90	160	57·5
September	·90	130	59 0

The markets since October came in have been decidedly strong, and prices are now remunerating the growers of wheat, rye, feeding and malting barley, and also of rapeseed, mustardseed, and tares. Articles which should in proportion be dearer are oats, beans, peas, and canaryseed, and these are accordingly, staples to which the judicious buyer will devote October attention.

London markets for September included 342,000 qr. of wheat, 126,000 qr. of barley, 133,000 qr. of oats, 172,000 qr. of maize, and 199,000 sacks of flour; these supplies left the following stocks on October 1, as compared with last season:—

	Oct. 1, 1907.	Oct. 1, 1906.
Wheat, qr.	73,000	150,000
Barley, ,,	32,400	61,000
Oats, ,,	165,500	336,000
Maize, ,,	56,500	47,600
Flour, sks.	143,500	290,500

The decline in holdings of breadstuffs shows that September advances in prices have not had the usual effect in increasing imports. Holdings of barley are smaller than the efforts of Russia to ship her new crop has led us to anticipate. Evidently the arrivals of Russian stuff have gone into prompt use in the mills for making barley meal. The reserves of oats are seen to be less than half what they were a year ago, a fact which Chelmsford sellers at 16s. 9d., and Cambridge sellers at 16s. 8d. would do well to "mark and inwardly digest."

Supplies on passage on 5th inst. included 1,860,000 qr. of wheat, 249,500 sacks of flour, 835,000 qr. of maize, 425,000 qr. of barley, 146,000 qr. of oats, 155,000 qr. of linseed, 7,000 qr. of rapeseed, 15,000 tons of cottonseed, and 40,000 tons of rice. There is not a single one of these items threatening our markets with large supplies between now and the end of November, and in the case of oats, rapeseed, cottonseed, and rice, the totals are much below the average. It includes 415,090 qr. of North American, but only 60,000 qr. of South American. India is represented by 643,000 qr., and Australasia by 380,000 qr.

The total reserves of cereals in the United Kingdom on October 1 are thus estimated:—

	Oct. 1, 1907.	Oct. 1, 1906.
Wheat, qr.	2,118,000	2,327,000
Barley ,,	184,000	240,000
Oats ,,	221,000	540,000
Beans ,,	34,000	29,000
Peas ,,	31,000	51,000
Maize ,,	555,000	551,000
Flour, sks.	423,000	654,000

The course of prices for British cereals in London during September was as follows:—

	Wheat.	Barley.	Oats.
	s. d.	s. d.	s. d.
September 2—9	31 11	25 9	18 6
,, 9—16	32 7	25 2	18 6
,, 16—23	32 11	25 8	18 5
,, 23—30	33 7	26 5	19 0
September	32 9	25 7	18 8

The first of the month, it will be remembered, was a Sunday, so that the record is not a day short as at first would appear. Wheat will be seen to have advanced 1s. 8d. on the month, barley 1s. 6d., and oats 6d. These are small advances compared with the strong markets for imported produce. But the salient fact is that there was advance at all at a period when deliveries are increasing market by market, and the natural trend of events is in buyers', not sellers', favour.

The wheat gradient since October came in has been as follows:—

Mark Lane ...	34s. 4d.	per qr.
Chelmsford ...	30s. 8d.	,,
Range	3s. 8d.	per qr.

Barley prices remain literally uniform:—

Canterbury ...	26s. 5d.	per qr.
Peterborough.	24s. 5d.	,,
Range	2s. 0d.	per qr.

The value of oats is not as high as it should be:—

Mark Lane ...	19s. 3d.	per qr.
Cambridge ...	16s. 8d.	,,
Range	2s. 7d.	per qr.

The price of household flour in London rose 2s. per sack on the course of September, and is now 5s. 9d. dearer from a year ago. In Paris, household flour rose only 3d. on the month, and is only 3s. 3d. dearer from 1906. While this comparison argues that France is better off for breadstuffs than England, the fact that value is 3s. per sack up on the year, effectually contradicts the French official report of a bumper crop, and 3,700,000 qr. of wheat available for exportation.

The top price of flour in London has advanced 1s. per sack since October came in, and is now 36s., a price which warrants a 5½d. charge for the quartern loaf delivered, or 5d. on the counter. We have heard it said that a halfpenny for delivery is dear, but as a matter of fact, the baker would welcome a change to French customs, where the householder sends his servant or makes his own arrangements for shopping. The head of a well-known firm of bakers told the writer that he lost more customers over the delay and delinquencies of the men and lads employed to deliver the bread than over all other causes, including the vital ones of price and quality, put together.

Sales of British wheat since harvest have been less than usual, as threshings did not become liberal till late in September. Figures thus compare with 1906:—

This season ... 205,000 qr. at 31s. 7d. per qr.
Last ,, ... 399,000 ,, 25s. 10d. ,,

Sales of British barley since harvest have been remarkably small; the threshings are not yet at all heavy, and the harvest itself is not quite finished in the counties beyond the Humber and the Dee:—

This season ... 96,000 qr. at 24s. 9d. per qr.
Last ,, ... 272,000 ,, 24s. 5d. ,,

The sales of British oats have been much more liberal in proportion. Farmers will not take leases with restrictive covenants, and oats are more and more sold off the farm. The farmer himself is not always a gainer by this policy, but the free hand is undoubtedly a gain in itself:—

This season... 160,000 qr. at 17s. 7d. per qr.
Last season... 169,000 qr. at 16s. 3d. per qr.

The sales for the first month of the cereal year from 1901 to 1905 did not average more than 120,000 qr. of oats, so that since 1906 the increase in sales off the farm has become very marked.

The imports of the United Kingdom last week were as follows:—

Wheat, 516,000 qr.: large.
Flour, 168,100 sks.: good.
Maize, 409,000 qr.: extremely heavy.
Barley, 253,,000 qr.: ,, ,,
Oats, 27,500 qr.: extremely small.

September imports for the last two years have been as follows:—

September.	1907.	1906.
Wheat	1,990,000 qr.	1,991,000 qr.
Flour	377,000 ,,	415,000 ,,
Breadstuffs ...	2,367,000 qr.	2,406,000 qr.
Maize	1,047,000 ,,	1,043,000 ,,
Barley	710,000 ,,	769,000 ,,
Oats	116,000 ,,	333,000 ,,

The total for breadstuffs will be seen to agree very closely, and those for maize to be practically identical, but both barley and oats this year have thus far been in reduced supply. The want of foreign oats is so large as to be quite startling.

Shipments last week were:—From America, 362,000 qr. of wheat, 5,000 qr. of barley, 12,000 qr. of oats, 39,000 qr. of maize, and 127,000 sacks of flour; from Argentina, 80,000 qr. of wheat and 170,000 qr. of maize; from Russia, 195,000 qr. of wheat, 110,000 qr. of oats, 390,000 qr. of barley, and 25,000 qr. of maize; from Roumania, 20,000 qr. of wheat, 10,000 qr. of barley 11,000 qr. of oats, 60,000 qr. of maize, and 5,000 qr. of rapeseed; and from India 180,000 of wheat, 40,000 qr. of linseed, and 19,000 qr. of rapeseed.

THE BALTIC.

Cargoes have been an irregular trade, but on the whole have gone higher. Wheat cargoes have fetched from the 1st to the 5th inst. 42s. per 480 lb. for Manitoba, 37s. per 480 lb. for Durum, 40s. per 480 lb. for Australian, 40s. 9d. per 492 lb. for Black Sea, 40s. 3d. per 492 lb. for white Karachi, 37s. 3d. per 480 lb. for hard winter, 38s. 6d. per 480 lb. for Argentine, and 38s. per 480 lb. for Uruguayan.

Maize cargoes have fetched 26s. 3d. per 480 lb. for Argentine, 5s. 9d. per cental for American, and 27s. 3d. per 480 lb. for Black Sea.

Barley cargoes have realised 24s. 6d. per 400 lb. for Black Sea, 23s. per 400 lb. for Persian, and 32s. 6d. per 448 lb. for Californian.

Oats have fetched 18s. 6d. per 320 lb. for a cargo of Konigsberg, prompt shipment; 17s. 9d. for 404 lb. for White Libau, on passage; and 24s. per 384 lb. for New Zealand.

Other cargo sales have included Calcutta linseed at 46s. 3d. per 416 lb., Argentine linseed at 45s. 3d. per 416 lb., brown Calcutta rapeseed at 54s. per 416 lb., Jamba rapeseed at 43s. per 416 lb.; Egyptian cottonseed at £7 13s. 9d per ton, and Indian poppy seed at 57s. per 377 lb.

The London Corn Trade Association C. F. & I. quotations, for the settlement of Rejections and Difference in Weights on Wheat under Rule No. 4 of the Association East Indian Wheat Contracts, are as follows (new and old terms), viz.:—

Choice White Karachi, 40s. new terms; 39s. 6d., old terms. Soft Red Karachi, 39s. 6d., new terms; 39s. old terms.

N.B.—The committee has decided to quote rejection prices for "Old Terms" up to and including July shipments, but not later. These prices remain in force until a new list is issued.

Cottonseed and cottonseed cake interest farmers much at this time of year, so that the following special advices to *Beerbohm's List* are particularly worth noting.

"The total shipments of cottonseed from India from January 1 to date have amounted to 244,675 tons, against 149,680 tons in the corresponding period last year and 98,000 tons in 1905.

"The receipts at Bombay for the week ending September 12 amounts to 1,437 tons, against 1,704 tons same week last year, making the total since January 1 203,043 tons, against 134,466 tons in the same period last year:—

Tons.	This week.	Total to date.	Same time 1906.
London imports...	2,252	71,047	57,771

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English firm, unchanged. Whites quoted at 35s, 30s; reds at 34s 6d, 38s. Foreign firmly held at full prices, but not active. No. 1 Northern, ex ship, quoted at 42s 6d, 42s 9d; No. 2 at 41s 6d; choice white Karachi, at 38s 9d; red Karachi, 38s 6d; Australian, landed at 41s 6d; La Plata, 41s, 42s; Persian, 39s. Flour quiet, unchanged. Hungarian quoted at 37s, 37s 6d; Iron Dukes at 25s, 25s 6d. Maize steady, quiet. River Plate, landed, held at 26s 9d; Odessa, 27s; Danubian at 27s 3d. Barley steadily held, but inactive. Azoff-BlackSea and Odessa-Nicolaieff, ex ship, to arrive, quoted at 24s, 24s 3d; Persian, ex ship, 22s 9d.; landed, 24s. Oats quiet at about late rates. South Russian held at 19s 6d; River Plate, 19s 6d to 19s 9d.

Mark Lane, Friday.—Wheat: English firm, and held at 1s advance but not active. Whites quoted at 36s to 40s; reds, 35s 6d to 39s 6d. Foreign: American held at 1s to 1s 3d advance; other sorts 1s dearer, with a moderate inquiry. No. 1 Northern Manitoba, ex ship, held at 44s; No. 2 at 43s: No. 1 Durum at 38s to 38s 6d; choice white Karachi at 39s 6d to 40s; Australian, landed, at 42s 6d, ex ship, to arrive, at 41s. Flour firmly held and little offering at 1s advance. Hungarians quoted at 37s 6d to 38s 6d; Iron Dukes at 26s to 26s 6d. Maize firm, but quiet. Odessa, ex ship, quoted at 26s 6d to 26s 9d, landed at 27s; River Plate, landed, at 26s 9d; Galatz-Foxanian, landed, at 27s. Barley firm. Odessa-Nicolaieff and Azoff-Black Sea held at 24s 6d, ex ship, to arrive, landed, 24s 9d. Oats steady, quiet. South Russians (38 lb) and River Plate held at 19s 6d.

COUNTRY.

Appleby, Saturday.—A few samples forward, and a fair trade. White oats (horse corn), 12s to 21s per 26 stones; barley, about 30s per qr of 32 stones.

Ashford, Tuesday.—The trade for wheat was firm, though, as local dealers seem well supplied, there was some difficulty in disposing of cold or out of condition samples. Good samples made 33s to 35s; English barley, 27s to 30s; foreign grinding barley, 25s to 27s; Mazagan beans, 30s to 31s; tick beans, 34s to 36s; maize, 28s to 29s; new peas, 30s to 31s; black oats, 20s to 21s; white oats, 19s to 22s per qr. Flour unchanged.

Banbury, Thursday.—Wheat, white (new), 33s 6d to 34s per qr; ditto red (new) 33s to 34s per qr; barley, 27s to 32s per qr; beans (new), 30s 6d to 31s per qr; ditto (old), 33s to 33s 6d per qr; oats, 17s to 21s 6d per qr; oats (old), 24s to 25s per qr; peas 30s to 33s.

Berwick, Saturday.—Average attendance; considerable quantities of grain on offer. Fine barley in good demand at late rates. Oats, 21s 6d to 23s; barley, 23s to 30s 6d per qr.

Birmingham, Thursday.—The market was well attended, and trading was of a healthy character, prices being dearer inclined. Foreign wheat met with a fair demand at fully late rates. English wheat plentiful, and ranged from 12s 6d to 14s per 186 lb, delivered. Maize was 3d per qr dearer. Grinding barley was unchanged on the week. English oats made from 20s to 21s 6d per 312 lb. New beans 12s 6d, old 13s 6d per 196 lb, delivered.

Brighton, Thursday.—Small attendance, and little business doing. Prices firm. Wheat in good supply, and 1s per qr dearer. Barley, 30s to 35s; grinding ditto, 26s to 27s; oats, English, 18s to 20s; peas, 32s to 34s; beans, 30s to 33s.

Bristol, Thursday.—There was a good attendance at our market to-day. English wheat in only moderate supply, finding a ready sale at 6d to 1s above last week's level. Foreign wheat very firm and rather dearer. Maize and oats 3d to 6d advance. Barley firmly held at 3d dearer. Flour slow sale at the moment, bakers working on old stocks where possible; prices fully maintained.—Grace Bros.

Bury St. Edmunds, Wednesday.—Wheat was in rather more liberal supply than last week, but with a steady demand, prices were well maintained at 34s 6d to 35s per qr for dry reds and whites, and 32s to 33s for samples out of condition. Barley: Maltsters have hardly commenced buying at present, and the business was small, with not many of the finer samples offering at present. Fair malting qualities sold at 28s 6d to 33s 6d per qr.

Cambridge, Saturday.—Wheat was in good supply, and 6d dearer on the week, reaching 36s 6d per qr into mill. Good supply of barley, which was rather dearer, from 27s to 34s. Small supply of oats; prices firm, and unchanged. A few samples of beans made 31s.

Canterbury, Saturday. — Best samples of wheat sell readily at full rates, ranging up to 36s per qr delivered, but many lots were out of condition. Inquiry for barley was scarcely so good as a week ago; prices from 28s 6d to 32s. Oats in fair demand, white samples making from 21s 6d to 23s, and black winters of 44 lb weight, 21s 6d to 22s. Peas firm, 30s to 31s; tick beans, 31s 6d; mazagans, 29s per qr.

Carlisle, Saturday.—Very small supply of oats in our market to-day; good demand at late prices. New, 18s to 19s per 336 lb; oats, 24s per 336 lb.—Thomas Robinson.

Chester, Saturday.—There was a slight advance in maize, and wheat and oats were firm at past quotations, with a better demand for the former. Offals scarce. Quotations:—Wheat, new, white, 5s to 5s 1d per 75 lb; oats, new, 2s 6d to 2s 7d; old, 3s 1d to 3s 6d per 46 lb; Indian corn, old, 14s 9d to 15s per 240 lb; round corn, old, 14s to 15s 3d per 240 lb.

Chichester, Wednesday.—A small attendance. Little on offer and trade firm. New white wheat, 33s 6d to 34s 6d; new red ditto, 33s 6d to 34s 6d; barley, 28s to 30s; grinding ditto, 23s 6d to 25s; oats, English, 17s to 23s; rye, 27s to 29s; peas, 31s to 32s; beans, 32s to 33s; tares, 5s 6d to 6s 6d; maize, 25s 6d to 26s 6d; flour, 29s to 31s.

Colchester, Saturday. — Wheat firm, 35s to 37s. Oats steady. Barley and beans unchanged. —Colin Taylor, King and Co., Ltd.

Coventry, Friday.—Market sparsely attended. A small supply of wheat met a good demand at prices somewhat in favour of sellers. Barley changed hands at fully recent quotations. Oats scarce, and a strong trade was done at top figures of last week. Beans and peas unchanged. Quotations:—Wheat, 12s 3d to 13s; old, 13s to 13s 6d per 186 lb; barley, 30s to 34s per 448 lb; oats, old, 24s 6d to 27s; new, 20s to 23s per 352 lb.; beans, 13s to 13s 9d per 196 lb; peas, 12s to 14s per 196 lb.

Derby, Friday.—A moderate supply of wheat, which sold readily at full prices. There was no alteration to note with regard to spring corn. Wheat, 37s to 38s; red, 35s to 36s; grinding barley, 23s to 25s; beans, 35s to 36s; old oats, 24s to 26s; new, 20s to 21s.

Devizes, Thursday.—The quotations were as follow:—Best old wheat, 19s to 20s; secondary, 18s 6d to 19s; best new wheat, 17s to 18s; winter barley, 26s to 28s; old oats, 20s to 24s; winter oats (320 lb), 17s 6d to 18s 6d; white Garton oats (330lb), 18s to 19s; rye, 26s to 28s; beans, 16s 6d to 18s; fines flour, 31s to 32s; extras, 32s to 36s.

Dorchester, Saturday.—Fine weather having enabled threshing operations to be pretty generally proceeded with, the result was reflected in largely increased supplies at to-day's market. Buyers of wheat, however, held aloof in view of the advanced prices asked, and sales were on a much more limited scale than during the last week or so, speculators being somewhat apprehensive as to whether or not a "slump" may not occur a little later on after the inflated rates that have lately been ruling. Prices of home-grown wheat must still be quoted as very firm, and occasionally against buyers; and foreign also showed a distinct rise in values. Barley again favoured sellers, though the advance is to no material extent. Oats sold at unchanged rates; the maize, beans, and peas were each very firmly held, and full values were paid where sales resulted. But buyers generally were very cautious, and anything like hazardous speculation was altogether avoided.

Doncaster, Saturday.—English wheat rather scarce and trade slow, but prices firm, and 3d to 6d per load higher. A good demand for foreign wheat at an advance of 1s to 1s 6d per qr. Small supply of barley, which was dearer. Oats are scarce at an advance of 3d to 6d per qr. All feeding stuffs firm, with a fair inquiry.

Exeter, Friday.—Good attendance; trade slow. English wheat 1s dearer; foreign firm. English barley unchanged; grinding 3d dearer. Maize 6d dearer. Oats firm and unchanged. Quotations:—English wheat, 4s to 4s 1½d; English barley, 3s 6d to 4s 6d; superfine flour, 29s to 32s; fine, 27s to 29s.

Gloucester, Saturday.—English wheat 6d dearer for best quality, at 33s to 35s per qr. Foreign wheat fully 1s dearer: Plates, 41s 6d to 42s 6d; Russian, 41s 6d to 43s. Plate and Bessarabian maize unchanged at 26s 9d. Barley unchanged at 25s 3d. Oats 6d dearer; black, 19s to 20s; white, 20s to 20s 6d.

Grantham, Saturday.—Fair supply of corn, and a brisk trade was transacted. Wheat, 35s 6d to 36s 6d; barley, 26s to 33s; oats, 18s to 20s; blue peas, 65s to 72s; beans, 30s to 32s per qr.

Hereford, Wednesday.—Moderate supplies of all kinds of English-grown grain. Wheats steady at last week's prices. Barleys little doing. Oats firm. Maize 3d to 6d per qr dearer. Quotations:—Wheat, 4s to 4s 3d per bushel; barley, 3s to 4s; oats (new), 2s 3d to 2s 6d; beans, 3s 9d to 4s; maize, 3s 6d to 3s 9d.

Ipswich, Tuesday.—Moderate supply of wheat; trade firm at last week's rates:—Reds, 35s to 36s; whites to 37s per 504 lb. Fair supply of barley, trade steady, at prices ranging from 28s to 33s. Oats steady. Maize firm. Beans unaltered. Peas 1s per qr dearer.

Leeds, Tuesday.—Harvest may now be considered finished. The yield is well spoken of, quality and condition vary. Although some of the leading markets have ruled quiet and easier for wheat, owing to increased shipments and a less active demand, the trade, on the whole, continues very firm. Shippers' limits prove quite out of reach, the Continent outbidding the United Kingdom for all Black Sea varieties, while Indian shippers, owing to bad prospects for the next crop, show a disposition to buy back forward contracts. Prices on the week are rather higher, with a moderate demand. Malting barley in larger supply, fine lots making rather more money. Maize fully 6d dearer. Beans and oats firm.—Dunns and Co.

Leeds, Friday.—Although supplies of English and foreign wheats were arriving more freely, fully late prices were demanded, and there was a hardening tone upon Tuesday's quotations. Flour was in good demand, mostly for medium qualities, ranging from 26s to 28s. All descriptions of maize were dearer, finest Plate making 26s to 27s; Odessa about the same. Beans, peas, oats, and barley were firmer.

Leicester, Saturday.—Good attendance, with larger supplies of home-grown wheats, but while trade was sharper for extra fine samples, out of condition sorts were dragging. Red wheats, 34s to 37s; white wheats, 35s to 38s per 36 stones; bright samples of barley in fair request; common sorts flat; oats 19s to 22s per 24 stones.

Lincoln, Friday.—A large show of English wheat, which met with a fair demand at last week's full prices, round about 36s per qr. Malting barleys in better demand, but quality of samples shown variable, prices ranging from 28s to 32s per qr. Oats and beans at full prices of last week.

Maidstone, Thursday.—We do not note any particular change to-day, the firm tone in the wheat continues, but millers do not manifest sufficient eagerness to purchase to prompt an advance except in the case of a really choice sample at 5d per qr over the last week's rate. Other grain is well up to previous cost, and for some inexplicable reason demand does not subside.

Manchester, Thursday.—English wheat was in fair request and unchanged on last week. Foreign was ½d to 2d per cental higher on the week, but no great quantity was offered. Flour ruled very firm at full rates. Indian corn was ½d to 1d per cental dearer. English barley very firm, and foreign 1d to 1½d per bushel dearer. Oats steady. Beans and peas firm. Bran and other articles were scarce, and occasionally dearer.

Newark, Wednesday.—Moderate attendance. More samples showing; prices easier. Red and white wheat, 34s 6d to 35s 6d; malting barley, 28s to 30s; grinding barley, 25s to 27s; white oats, 18s 6d to 19s 6d; black oats, 18s to 19s; old beans, 37s 6d to 36s 6d per qr.

Newcastle-on-Tyne, Saturday.—A steady trade prevailed for wheats at 1s to 1s 6d per qr advance over last Saturday's prices. Maize fully 6d dearer, with a good steady demand. Beans and peas firm and dearer. A good demand for oats, and last week's full prices were maintained. A few new barleys for malting purposes sold to-day at 25s to 28s 6d. according to qualities.—Joseph Pollard and Co.

Newport, Wednesday. — Rather a quiet market on the whole, but an exceptional trade was done in oats. Barley ruled unchanged. Wheat was rather firmer, maize 3d dearer, and oats also dearer. Flour, prices unchanged.

Northampton, Saturday. — Larger attendance, but limited supply. Wheat made 1s advance on the week. Good demand for best sorts. New wheat, 34s to 36s; new barley, 26s to 30s; old white oats, 24s to 26s; new white oats, 18s to 20s; old black oats, 22s to 23s 6d; new black oats, 18s to 19s; old beans, 31s to 33s; new beans, 30s to 32s; flour, 27s to 32s.

Norwich, Saturday.—Supply of native wheat small, and selling at 1s per qr advance—35s to 36s per qr delivered. Fair demand in feeding stuffs trade, which is very firm. There is an advance of 3d to 6d in the price of grinding barley and maize on last week. Linseed and cotton-cakes steady. English oats 19s to £1 per 336 lb. Big supply of barley, 26s to 34s per qr.

Nottingham, Saturday. — Wheat in better supply; prices advanced a further 6d per qr. But little barley offering, of middling quality; prices still irregular. Oats, old and new, selling at prices in holders' favour. Beans firm.—Robt. Hubble.

Oxford, Saturday. — Wheat was sparingly offered, and prices are against buyers to the extent of 1s. Barley and oats are quotably unaltered.

Peterborough, Saturday.—We have had a good supply of wheat, which found a ready sale at 1s. per qr more money than last week. Barley firm at late rates. Oats quiet at the extreme prices of last week Wheat, 35s to 36s. Barley, 27s to 32s. Oats, 19s to 20s.—Thomas Hill and Son.

Plymouth, Thursday.—English wheat 1s. dearer, foreign wheat rather firm. Maize 3d dearer. Barley 3d dearer. Oats 9d dearer.—Orlando Davis and Co.

Preston, Saturday.—A large business has been done in foreign wheat during the week at 2d per cental advance. There was a fairly good attendance at to-day's market, but no samples of new wheat forward. Some oats of good quality were offered at a slight improvement over the quotations of a week ago. Quotations: —Wheat, white, new, 14s 6d to 15s per windle of 220 lb.; ditto, red, 13s 9d to 14s 6d; oats, old, 3s 6d to 3s 8d per bushel, ditto new, 2s 11d to 3s; beans, 16s 6d to 17s per windle of 220 lb.

Reading, Saturday. — The attendance was again on the small side. Trade ruled firm, but lacked briskness. Prices of corn on offer:—Wheat, 33s to 36s; barley, 26s to 28s 6d; new oats, 17s to 20s. Beans sold at 31s to 34s, and peas realised from 29s to 32s. Flour showed an upward tendency.

Retford, Saturday.—There was not a large supply of new wheat, for which there was a good demand. Prices showed a further slight advance upon the week at 35s 6d to 36s 6d per qr. There was an increase in the supply of malting barley. Best qualities sold freely at 29s to 31s; secondary, 27s; and grinding, 26s per qr. Maize showed a strong upward tendency, and was worth 29s per qr delivered. New English beans 31s; new black oats, 18s to 18s 6d; new white ditto, 19s to 19s 6d; and old oats 25s per qr.

Ripon, Thursday.—A fair supply of samples, and a good attendance of farmers. Prices firm at late rates. New wheat, 34s to 35s; wheat, foreign, 40s to 42s; barley, grinding, 27s to 28s; barley, malting, 28s to 30s; new oats, 20s; old oats, 24s to 26s; maize, round, 28s; maize, flat, 28s per qr.

Sheffield, Tuesday.—New corn comes forward in limited quantities, and prices are well maintained. Wheats are quoted at late full prices. Beans and oats in sellers' favour. Mixed American maize 9d per qr dearer. Plate and Odessa corn firm to 3d per qr more. Offals unchanged. Quotations:—Wheat, white, new, 37s to 37s 6d; ditto red, new, 37s to 37s 6d per 504 lb; black oats, 24s to 25s; white ditto, 24s 6d to 25s; ditto new, 20s 6d to 21s per 336 lb; peas, grinding, 35s to 35s 6d; ditto blue, new, 65s to 75s per 504 lb; beans, English, 37s to 37s 6d; grinding barley, 27s to 27s 6d; malting ditto, 28s to 32s per 448 lb; Indian corn, small, 27s 6d to 28s; ditto Plate, 28s to 28s 8d; ditto flat, 30s 6d to 31s per 480 lb.

Shrewsbury, Saturday.—Old wheat, 15s to 15s 6d per 225 lb; new wheat, 14s 6d to 15s; old oats, 15s to 16s per 225 lb; new oats, 11s to 12s per 225 lb; barley, 16s to 19s per 280 lb.

Stamford, Friday.—A distinctly improved tone prevailed, and numerous samples of new grain were shown. There was a further advance of 6d per qr for wheat, which was quoted at 35s to 36s; oats, 18s 6d to 19s 6d; superior malting barley, to 34s per qr; grinding ditto, 26s to 27s; beans, 31s to 32s; peas, 60s to 65s per qr.

Stockton, Wednesday.—There was a fair show of local wheat, some of which was in very bad condition, the best samples bringing about 35s per qr. Foreign wheat was firm, Indian being 6d dearer, and other kinds unchanged. Oats rather dearer. Maize unchanged.

Tunbridge Wells, Friday. — New white wheat, 36s to 37s; new red ditto, 35s to 36s; barley, 26s to 32s; grinding ditto, 23s to 25s; oats, English, 22s to 25s; rye, 24s to 26s; peas, 32s to 37s; beans, 32s to 37s; tares, 48s to 56s; maize, 24s to 26s.

Warwick, Saturday.—There was a large attendance, but very little corn on offer. farmers asking slightly more all round for English corn.

Winchester, Saturday.—English and foreign wheat fully 1s dearer. Barley and maize 3d to 6d advance. Oats also rather higher. Flour a steady trade at 6d more money.—Fear, Colebrook and Co., Ltd.

Wisbech, Saturday. — A moderate supply of grain at market. Wheat advanced 1s per qr. Best reds 36s per 504 lb. Oats very firm, 18s 6d to 20s per 336 lb. Barley, 26s to 30s per 448 lb. —James Fletcher.

Wolverhampton, Wednesday.—The market was well attended, and prices were slightly lower.

Worksop, Wednesday.—Small attendance owing to Retford Fair. Good supply of grain, with wheat firm, barley in demand, and a good inquiry for oats. White wheat (new), 35s to 36s; red ditto, 34s to 35s; best malting barley, 28s to 30s; secondary and grinding barley, 27s to 28s; old white oats, 24s 6d to 26s 6d; new ditto, 18s 6d to 20s 6d; old black oats, 23s 6d to 25s; new ditto, 17s 6d to 19s 6d; maize, 28s to 29s; English beans, 37s to 39s per qr.

Yeovil, Friday.—Heavy offer of new season's grain, which generally proved of much better quality than had been expected. Wheat made 6d more money on the week, and oats 3d. Foreign wheat sold at 6d advance, and barley and round maize 3d. Best new wheat made up to 35s per qr; secondary, from 32s 6d; barley, malting, 25s to 28s; secondary, 20s to 24s; grinding barley (foreign), 25s 3d to 25s 6d; oats, good old, 21s to 23s; best quality new, 10s to 20s; secondary, 18s to 19s; Irish black, 20s to 21s; Irish white, 22s to 22s 6d; beans, 33s to 36s; round maize, 26s 6d to 27s; vetches, 4s to 5s 6d per bushel. Flour firm, fine making from 30s to 31s per sack, and extra fine 32s to 35s. Offals and meals a good trade, with values in holder's favour.

York, Saturday.—Very little wheat on offer, and prices remained firm, samples in a few cases being a little dearer. Fine white made 36s to 37s, and red and mixed 35s to 36s per qr of 36 stones. Good samples of fine malting barley fetched 29s to 30s, with a good demad, while good made 28s to 29s, and ordinary sorts 27s to 28s per qr of 32 stones. Oats were firm at 19s to 20s per qr of 24 stones, rye 26s to 27s, and beans 34s per qr of 36 stones.

FOREIGN.

Hamburg, Saturday. — Fine weather continues. Market was quiet in the early part of the week, but towards the end a brisk demand set in, owing chiefly to small stocks and scanty arrivals of new grain. Fine 62 to 63 lb new Saale wheat is selling at 38s to 38s 6d, 59 to 60 lb Holstein and Mecklenburg at 35s 6d to 36s 6d per 504 lb f.o.b, hard winter, No. 2 is held at 38s 6d; red winter, No. 2, free of garlic at 38s, fine South Russian 29s 3d, 79 ko. River Plate Barletta, February-March, 38s 3d per 480 lb c.i.f. Hamburg. Rye firm and offers scarce, 9 10/15 Taganrog about due is held at 34s 6d per 480 lb c.i.f. Hamburg. Malting barley firm in value. Good useful Bohemian is offering at 36s, fine quality at 37s to 38s 6d; Moravian and Slovakian, 38s to 42s; Holstein, Mecklenburg, East Prussian, and Saale, 36s to 42s per 448 lb. Feeding barley very scarce; 60/61 kg. South Russian afloat is held at 23s 6d; November shipment at 24s per 400 lb, c.i.f. Hamburg. Fine white Holstein and Pomeranian oats, 19s 6d to 20s 6d per 320 lb, c.i.f. E.C. Maize firm. River Plate and Odessa, 26s 3d; mixed American, 27s 3d per 480 lb, c.i.f. Hamburg. —John Tatlock.

FEEDING STUFFS.

Mark Lane, Monday.—Linseed Cake: The trade during the past week has been disappointing, there being very little consumptive demand, and country dealers already holding considerable stocks, and disinclined to enter into further contracts except for distant positions, for which an almost prohibitive premium is demanded. Russians come to hand sparingly, and are held above the market. East India seed pures make last week's prices. Fine seedy Calcuttas command late rates. London-made pures meet a dull sale, although relatively cheaply offered. Cotton Cakes.—With some fairly heavy arrivals of Egyptian values are barely as strong, while English remain quiet but firm. Decorticated.—London-made pures, in consequence of an increased demand are again dearer for both cake and meal, while American continue to find little response at late quotations. Rape cakes do not offer. Maize germ meal.—White American is not obtainable on spot, and English makes are firmly held up at last week's high prices. Maize gluten meal meets a free sale. Rice meal.—Landed lots of Rangoon have all been cleared, but some second-hand parcels for shipment have changed hands at £5 3s. 9d. to £5 . . Locust beans are without change. Dried brewers' grains make extreme prices. Nitrate of soda is unaltered.

Nitrate of soda	11	2	6		

—Pinnock Bros., 30, Mark Lane, E.C.

Liverpool, Friday.—Nitrate of soda is firm at the recent advance of 5s. per ton, and spot values are £11 5s. to £11 7s. 6d. Kainit firm, as also all phosphatic manures, and there are inquiries for autumn deliveries. The consumptive demand for feeding stuffs is only quiet, yet values all round have advanced since our last report, and especially does this apply to rice and germ meals, decorticated cotton cakes, and meat and linseed cakes; to-day's values are as below. Feeding treacle offers at moderate prices and is attracting some attention, and likewise semi-decorticated cotton-cake of English make, choice and really soft, at £7 per ton.

WOOL.

Canterbury, Saturday.—An improved tone on the market, but farmers are asking 1s per lb for Kent fleeces, and this staplers are, as yet, unable to pay. Lamb wool, 7d; half-breds, 11d; best Downs up to 14d per lb.

Halifax, Saturday. — A rather quiet tone characterises the local wool trade, but values are firm or hardening. Domestic wools are steady at late rates, with a moderate business. Other descriptions have not followed the rise in London fully, but merino tops have appreciated most.

London, Saturday.—English—per pk. of 240 lb.—Fleeces, South Down hoggs, £13 15s to £14 5s; half-bred hoggs, £13 to £13 10s; ditto wethers, £12 10s to £13; Kent fleeces, £12 5s to £12 10s; South Down ewes and wethers, £13 10s to £14; Leicester ewes and wethers, £12 to £12 10s. Colonial—per lb.—Vic., scoured super., 2s 3d to 2s 4d; scoured, good, 2s to 2s. 2d; scoured, average, 1s 10½d to 1s 11d½; greasy, average to fair, 1s 2½d to 1s 3½d; N.S.W., scoured, average, 1s 10½d to 1s 11½d; greasy, average, 1s to 1s 2d; S. Aus., greasy, average, 11d to 1s; N.Z., scoured, average, 1s 11d to 2s; greasy, average, 1 to 1s 1d; Cape, scoured, super., 1s 10d to 1s 11d; fleece, average, 9½d to 10½d; greasy, average, 8½d to 9½d; Natal, scoured, 1s 6d to 1s 7d; greasy average, 8½d to 9d. Crossbreds — grs.—Vic., good to super., 1s 3½d to 1s 4½d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s to 1s 1d, coarse, 10½d to 11d.

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, MONDAY, 3 P.M.

The wheat market to-day is 6d. to 1s. dearer from the closing markets of September. The inquiry for foreign is checked by the high prices asked, but English sells as fast as it can be brought to market. The demand for barley is brisker from a week ago, and both English and foreign sorts may be quoted 6d. dearer on the week.

Oats sell very well and are 3d. to 6d. dearer for most descriptions, whether English or foreign. Maize is a strong trade, despite heavy arrivals; the scarcity of foreign oats is the reason probably why maize keeps up so stiffly to a 27s. or 27s. 6d. level. Beans and peas are a hardening market, and very decided firmness also exists in rye, tares, millet, and dari.

CLOSE OF THE MARKET.

THE MARKET CLOSED VERY FIRM, WITH 1s. ADVANCE ON ABOVE PRICES ASKED FOR WHEAT AND MAIZE; 6D. FOR BARLEY AND PULSE. OATS, THOUGH A STIFF MARKET, WERE NOT QUOTABLY DEARER.

THE FLOUR TRADE.

MARK LANE, MONDAY, 3 P.M.

The advance on the top price to 36s. is justified by the very high rates asked for Hungarian. Sales are always small of this superfine grade, but they probably exceed the average even at the advance.

The price of Town Whites, Town Households, white meal and fine country flour is "6d. certain and 1s. tried for" better from a week ago. The demand is fair but not fast.

American flour does not get any cheaper, and thus the London and country millers have a clear field. Californian flour is 1s. dearer on the week, and several sorts of meal are also dearer. No change is to be quoted in Hungarian, Belgian, French, or Argentine flour; the latter, indeed, is hardly on offer. Bran, middlings, pollard, sharps, &c., are all firm, and sell fairly well. There is a good inquiry for barley meal.

THE BALTIC.

MONDAY, 1 P.M.

STATE OF TRADE.

Wheat cargoes open 6d. dearer from Friday and Saturday. Maize and oat cargoes 3d. dearer. Barley cargoes are well held despite the large Russian shipments. Argentine cables quote linseed 1s. dearer for October and November shipment. Rapeseed cargoes are 6d. dearer.

BUSINESS DONE.

Wheat.—Blue Stem, 40s 9d per 500 lb, prompt shipment; White Walla, 40s 3d per 500 lb, November shipment; Victorian, 42s 6d per 500 lb, November shipment; Manitoba, 42s per 480 lb, on passage; Red Karachi, 40s 3d per 492 lb, on passage; Argentine, 38s 9d per 480 lb, February shipment, new crop; No. 2 Hard Winter, 37s 9d per 480 lb, prompt shipment; Durum, 37s per 480 lb, prompt shipment.

Barley.—Azoff, 25s 3d per 400 lb, prompt shipment; Californian, 32s 6d per 448 lb, prompt shipment; Oregon, 33s 6d per 448 lb, prompt shipment; Kustendje, 26s 9dper 416 lb, prompt shipment.

Oats.—South Russian, 17s 6d per 304 lb, prompt shipment; North Russian, 18s per 304 lb, prompt shipment.

Maize.—Argentine, 27s 3d per 480 lb, prompt shipment; Odessa, 27s 3d per 480 lb, prompt shipment; American, 27s per 480 lb, prompt shipment (old crop); American, 25s 6d per 480 lb, January shipment (new crop).

Linseed.—Riga, 42s 6d per 416 lb, November shipment; Argentine, 45s per 416 lb, November shipment.

Rapeseed.—Guzerat, 55s 6d per 416 lb., April shipment (new crop).

Cottonseed, Egyptian, £7 5s per 2,240 lb., prompt shipment.

GRAIN AND FLOUR FACTORS REPORTS.

Flour.—Prices advanced 6d. per sack on the week. Grain.—The high price of flat and round corn has materially reduced the consumption. Foriegn oats being scarce, home oats are readily picked up. Beans steady. Pease strong and in sellers' favour. Oatmeal unchanged. Oilcake firm. Mill Stuffs.—As firm as ever. Winter wheat patents, 29s to 30s per 280 lb; spring wheat patents, 31s to 30s per 280 lb; American corn, 16s to 16s 1½d per 280 lb; round corn, 15s 4½d to 15s 6d per 280 lb; grinding beans, 18s 10½d to 19s per 280 lb; white pease, 20s to 21s 3d per 280 lb; broad bran, 115s per ton; medium bran, 107s 6d per ton; fine thirds, 135s per ton; common thirds, 115s per ton; American oilcake, 147s 6d to 150s per ton.—MCKINNON AND MCDONALD (Glasgow).

Offals.—Bran in good demand, and continues very firm in prices.—GREENHILL BROS. (Belfast).

Flour.—The market has been somewhat unsettled since last week, occasioned mainly by fluctuations in America. Prices are again very firm, and quotations are now mostly advanced 1s per sack.—GREENHILL BROS. (Belfast).

We have liberal supplies of wheat. The trade is strong and prices are 1s 6d to 2s per qr higher. Flour has advanced 1s per sack. Maize and barley 3d to 6d higher. Oats firm, at prices of last Monday.—COVENTRY, SHEPPARD, AND CO.

Milling offals remain in good demand, with prices firm and unchanged from last week.—JOHN BAWCOMB AND CO.

Flour.—Trade to-day has been very firm, and prices show a further advance of 1s 6d since this day week.—T. S. MEDILL AND SONS, LTD.

OIL SEEDS.

Mark Lane, October 7.—All oilseeds have been a quiet trade since October came in. Cottonseed is a little firmer for Egyptian, but the cheapest sorts are lower on the week.

TERM MARKET.

The market in futures has developed fresh strength since the beginning of October. The present state of the trade is decidedly strong as may be seen from the latest calls, which are:—

(per cental).

Wheat, American Red	7s. 3d. Nov. & Dec. delivery.	
,, ,,	8s. 4d. Jan. & Feb.	,,
,, ,,	8s. 5d. Mar. & April	,,
,, ,,	8s. 3d. May & June	,,
Maize, American Flat	5s. 9d. Nov. & Dec.	,,
,, ,, ,,	6s. 6d. Jan. & Feb.	,,
,, ,, ,,	5s. 5d. Mar. & April	,,
,, Argentine, yellow	5s. 8d. Oct. & Nov.	,,
,, ,, ,,	5s. 7d. Dec. & Jan.	,,
,, ,, ,,	5s. 6d. Feb. & Mar.	,,

A few speculators are offering Egyptian cottonseed for January delivery at £6 17s. 6d. per ton.

POTATOES.

Berwick, Saturday.—Trade shows an improvement at 65s per ton.

Borough, Saturday.—A good quantity met a quiet demand. Epicures, 60s to 65s; Blacklands, 65s to 70s; British Queens, 70s to 75s; Up-to-Dates, 70s to 75s per ton. French and Dutch, 3s to 3s 3d per bag.

Carlisle, Saturday.—Large supply, and a fair sale at 7d to 8d per stone.

Doncaster, Saturday.—Good supply, and a fair demand at 3s 6d to 4s per cwt.

Goole, Wednesday.—There was a fair supply, which ranged from 65s to 70s per ton.

Lancaster, Saturday.—A good supply of potatoes, which sold at 9d per stone; wholesale, 10s 6d to 11s 6d per load.

Malton, Saturday.—Potatoes, wholesale, £3 10s to £3 15s, and up to £4 per ton for the best sound samples. Retail, 8d to 9d per stone. The yield is stated to be very limited.

Manchester, Saturday.—Potatoes: Yorkshire, 10s; Cheshire, 6s to 7s; Lincoln, 9s to 10s; Bedford, 4s to 5s per cwt.

Preston, Saturday.—Potatoes: 8s to 9s per load of 240 lb.

Retford, Saturday.—The potato market was well supplied. Best lots home-grown made 7s to 8s per load, other varieties 5s 6d to 6s per load.

Spitalfields, Saturday.—Good offerings were in quiet request. Epicures, 60s to 65s; British Queens, 70s to 75s; Blacklands, 65s to 70s; Up-to-Dates, 70 to 75s; Sharp's Express, 70s per ton; Dutch, 3s; French (Beauvais), 3s 3d per bag.

York, Saturday.—A medium supply and a fair trade at 62s 6d to 65s per ton. A firmer tone prevailed.

FRUIT AND VEGETABLES.

Covent Garden, Saturday. — Fairly good supplies on offer, and business generally brisk. Quotations for English produce:—Apples, 3s to 8s 6d per bushel; pears (Williams), 2s 6d to 6s per half bushel; ditto (Hazels), 2s to 4s per bushel; damsons, 1s to 1s 6d per half sieve; peaches, 2s to 12s per dozen; green figs, 6d to 1s 3d per dozen; nectarines, 3s to 12s 6d per dozen; grapes, 6d to 3s; melons, 9d to 2s; tomatoes, 2s to 3s 6d; cobnuts, 3s to 4s; walnuts, 4s 6d to 5s 6d per 12 lb; cauliflowers, 3s to 4s 6d; marrows, 4s to 5s 6d; cabbages, 4s 6d to 6s 6d per tally; shallots, 2s to 2s 6d per 12 lb; beetroots, 1s 6d per dozen bunches; scarlet runners, 1s 6d to 2s 6d per bushel; cucumbers, 4s to 6s per flat; parsley, 1s 6d to 1s 9d; turnips, 1s 6d to 2s 6d; mint, 1s to 1s 3d; leeks, 1s to 2s per dozen bunches; mushrooms, 10d to 1s 6d per lb; horseradish, 10s to 15s per dozen bundles; carrots, 2s to 2s 3d per bag; endive, 1s 6d to 2s per dozen; onions, 1s 6d to 1s 9d per dozen bunches; celery, 8d to 1s per bundle; cos lettuce, 8d to 1s per score; potatoes, 70s to 85s per ton.

POULTRY AND GAME.

Smithfield, Saturday.—Fairly good supply and demand. Young grouse, 6s to 7s; old, 2s 9d to 3s; young partridges, 4s 6d to 5s; old, 2s to 2s 4d; pheasants, 6s 6d to 7s; black game, 3s to 3s 6d per brace; geese, 5s to 6s; country ducks, 2s 3d to 2s 9d; wild ducks, 1s 2d to 1s 4d; Sussex fowls, 2s 6d to 3s; Surrey fowls, 2s 9d to 3s 6d; Lincolnshire fowls, 2s 3d to 2s 9d; Irish fowls, 1s 6d to 2s; quails 9d to 1s; feathered pigeons, 8d to 9d; Bordeaux pigeons, 9d to 1s; English hares, 2s 6d to 3s; Scottish hares, 1s 6d; tame rabbits, 1s 2d to 1s 6d; wild rabbits, 7d to 10d; live hens, 1s 4d each; Australian rabbits, 5s 6d to 6s 9d per dozen.

HAY AND STRAW.

Birmingham, Friday.—Fair supply; trade quiet. Hay made £3 12s 6d to £4 per ton; straw, no quotations.

Hereford, Wednesday.—Trade is dull, and there is no change recorded in prices.

Lincoln, Friday.—Best hay and seeds 55s; secondary quality, 50s; straw about 30s per ton on the ground.

Manchester, Friday.—Hay, old, 4¾d to 6½d, new, 5½d to 6½d; clover, new, 5½d to 6½d; straw, wheat, 3½d; oat, 3½d per stone.

Derby, Friday.—Best old clover, 90s to 100s; new, 80s to 90s; hay, best old, 90s to 100s; new, 80s to 90s; second ditto, 65s to 70s; straw—wheat, 60s to 70s; pressed, 50s to 60s; chop, 55s to 65s; peat moss, 35s to 40s.

Lancaster, Saturday.—Meadow hay, 6d; clover ditto, 6½d to 7d; wheat straw, 4d; oat straw, 4d per stone.

Whitechapel, Saturday.—Light arrivals met a fair demand at occasionally lower rates. Best clover, 84s to 95s; inferior, do., 72s to 80s; specially picked hay, 85s; good do., 68s to 78s; inferior do., 55s to 63s; mixture and sainfoin, 70s 6d to 82s 6d; straw, 28s to 33s per load.

TO-DAY'S MARKETS.

CATTLE.

Metropolitan Market, Islington.

	Monday, Oct. 7, 1907. British.	Total.	Monday, Oct. 8, 1906.

Sheep and Lambs	4,740	4,740	6,020
Calves	15	15	30
Pigs	—	—	—
Milch Cows	35	35	30

Quotations per 8 lb. (sinking the offal).

ENGLISH.

	Inferior. s. d.	Second. s. d.	First. s. d.
Beasts	2 6	3 4	4 6
Sheep	4 8	5 4	6 0
Lambs	—	—	—
Calves	3 10	4 6	5 0
Pigs	—	—	—

Milch cows, per head, £16 to £23

British arrivals include as follows:—Scotland, nil; Eastern Counties, 62; Midland, Home, and Western Counties, 922; Devon, 25; Ireland, 61.

We note to-day an increase of 100 head in the number of beasts offered for sale compared with Monday last; as usual at this season of the year, the majority of the supply consisted of consignments from the Midland, Home, and Western counties. Trade for both prime and second quality was of a slow but steady nature, rates favouring the sellers in some cases to the extent of 2d. per 8 lb. The Irish arrivals consisted of 31 Dublins and 30 Waterfords (no store cattle being included), trade ruled of a slightly firmer nature for these also. Fat shed cows and bulls met with a limited inquiry, the former, however, maintained late values, whilst the latter were quoted 1d per 8 lb lower. A clearance is not expected to be made.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day.	Monday, Oct. 8, 1906.
	d	s d
Scotch	—	—
Devons	—	4 4 to 4 6
Herefords	4 4 to 4 6	4 2 to 4 4
Norfolks	—	—
Runts	4 2 to 4 4	4 0 to 4 2
Lincolns	3 10 to 4 0	3 8 to 3 8
Irish	4 1 to 4 3	—
Canadian	—	—
Fat cows	3 4 to 3 6	2 10 to 3 4

There was a decrease of 520 in the number of sheep penned compared with Monday last. For all grades of both wethers and ewes an extremely slow trade was experienced, late currencies governing all transactions. Scotch sheep were in average supply and made late rates, whilst Irish were in larger numbers, and met with more inquiry, an advance in value being both asked and obtained. No lambs were offered for sale, the season being now at an end. The supply included 200 Scotch, 1,070 Irish, and 306 from the Eastern Counties. A clearance will not be made in this part of the market.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

	To-day.	Monday, Oct. 8, 1906.
	s. d.	s. d.
7½ to 8 st Downs	5 10 to 6 0	5 10 to 6 0
9 st. Downs	5 8 to 5 10	5 8 to 5 10
10 st Halfbreds	5 4 to 5 6	5 4 to 5 6
10 st Yorkshires	—	—
12st Lincolns	—	—
10 st Irish	5 4 to 5 6	5 2 to 5 4
10 st Down Ewes	4 0 to 4 2	4 2 to 4 4
11 st Halfbred ditto	3 10 to 4 0	4 0 to 4 2
5 st Down Lambs	—	—
6 st Halfbred ditto	—	—

A few calves were offered for sale and met with a slow trade, the best on offer being quoted at from 4s 10d to 5s per 8 lb. (offal given in).

No pigs were offered for sale.

FOREIGN.

Deptford, Monday.—To-day's supply consisted of 702 beasts from the United States and 148 from Canada. Trade ruled of a firm and steady nature for States cattle at good money, whilst Canadian met with no inquiry, no sales having been effected when our report left. Besides the above, 750 more Canadian beasts were witheld from sale. The best States on offer were quoted at from 4s 2d to 4s 4d; seconds, 4s to 4s 2d per per 8 lb (offal given in). On Saturday 1,776 beasts from the United States were offered for sale, and with a firm and steady trade were quoted at from 4s to 4s 4d; seconds 4s to 4s 2d per 8 lb (offal given in).

Liverpool, Monday.—The supply of cattle was rather smaller than last week; demand fair, but prices unchanged. Sheep supply practically unaltered and improved; demand for all classes; small finished sorts readily made more money, but strong classes were not quotably altered in value. Prices:—Beef, 6½d to 4½d per lb; mutton, 9d to 6½d per lb. At market 1,316 cattle and 7,678 sheep.

FEEDING STUFFS.

Mark Lane, Monday.—Linseed Cake.—The market remains very firm in all positions, and values are not likely to weaken, as seed is advancing rapidly. Russians in bags are best value at present. Cotton Cake.—Prices are well maintained for both London and Egyptian made. Linseed.—Market strong and dearer.

—Robt. & John Hewetson.

WET AND DRIED GRAINS.

Mark Lane, Monday.—Wet Grains: Business has been done during the week at prices between 16s 6d and 18s 6d ale, and 3s less for porter per ton on rail, London. Dried Grains.—A better Continental demand has been experienced, and stocks are considerably reduced, 100s ale and 95s mixed being paid ex factory, in buyers' bags. At these prices same compare favourably with millers' offals. American cane treacle, 90s per ton; and kiln-dried sea-damaged wheat from 21s per qr.—Hamlyn and Co., 37 and 38, Mark Lane.

SEEDS.

Mark Lane, Monday.—The autumn sowing demand drags along. The demand for trifolium has practically ceased. Rape keeps firm. Mustard unchanged. Rye still in good demand at the higher rates. Winter tares moving freely, though prices favour buyers. Seed wheat in active demand, prices firm. Peas more inquiry, but supplies backward. English trefoil, Alsika, white and red clovers firm, fair business passing. In grasses, Perennials and Italians still higher.—John Picard and Co.

HOPS.

Borough, Monday.—The market is strong for all classes of hops, the growths that are being opened show up the great scarcity of celery hops, these command more money, and the majority, which are good, sound, copper hops, are being taken freely at current rates, those that are off colour are finding buyers at full relative prices.—W. H. and H. Le May.

Canterbury, Saturday.—Business is in the main confined for the present to the best Weald of Kent and Sussex hops, and prices range from 58s to 80s. A few choice East Kents have been sold at 5 guineas per cwt.

Worcester, Saturday.—There was a good attendance at market to-day. Higher prices were asked and were given for bright, coloury parcels, and for good yellow hops. The business done was not large, as growers were indifferent sellers. Three thousand two hundred and fifty-seven pockets have been weighed this week, which makes with those previously weighed 7,065 to date.—Charles Faram and Co.

Seven Years Grain Averages.

(OFFICIAL.)

Wheat	28s. 10d. per 480 lb.
Barley	25s. 4d. per 400 lb.
Oats	18s. 11d. per 312 lb.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

At the Islington Cattle Market on the chief market day of the week there was a decrease in the number of beasts offered for sale. For both prime and second quality fat cattle a very slow trade was experenced, sellers being obliged to accept a decline of 2d. per 8 lb. in value to effect sales; this state of trade is partly due to the prolonging of the holiday season owing to the late summer, consequently butchers' requirements are necessarily limited. The supply as far as fat beasts were concerned chiefly consisted of Herefords and Runts from the Midland Counties, and a slightly larger number of Devon cattle, these commanding our top quotations. The Irish arrivals consisted of 33 Dublins and 61 Waterfords; these shared in the poor trade, and fell in value. On Thursday no fat beasts were on the market, as usual. The supply was slightly larger than on the corresponding day of the previous week, and consisted almost entirely of fat cows and butchering bulls, for which an extremely slow trade was experienced at late values.

At the Foreign Cattle Market, Deptford, no market was held on Monday, but on Wednesday and Saturday a fair average supply of both States and Canadian cattle were offered for sale, the consignments, however, from the latter country consisted of very poor quality in consequence of which no sales were effected. The total number on offer at both markets was 3,483, as against 3,904 during the preceding week, consisting of 1,030 British (decrease 70) and 2,453 foreign (decrease 371), these latter comprising 2,255 from the United States and 198 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal):—80 to 90 stone Devons, 4s. 6d. to 4s. 8d.; 90 to 95 stone Herefords, 4s. 2d. to 4s. 4d.; 95 stone Runts, 4s. to 4s. 2d.; 100 stone Shorthorns, 3s. 8d. to 3s. 10d.; 95 stone Irish, 4s. to 4s. 2d.; 90 stone States, 4s. to 4s. 2d. ex 4s. 3d.; 90 stone fat cows, 3s. 4d to 3s. 6d.

The sheep trade at Islington on both market days ruled of an extremely slow nature, notwithstanding the decrease in the supply. Both Scotch and Irish descriptions were in smaller numbers, and shared in the poor trade prevailing; however all sales of the former were transacted on late currencies, whilst the latter were quoted 2d. per 8 lb. lower. Lambs met with little inquiry, the season for these being practically over. On Thursday all sales were governed by Monday's prices. No sheep were offered for sale at Deptford. The total number penned at Islington was 5,750, as against 3,904 during the preceding week, showing a decrease of 70. Best pens made per 8 lb. as follows (sinking the offal): —7½ to 8 stone Downs, 5s. 10d. to 6s.; 8 stone Scotch, 5s. 10d. to 6s.; 9 stone ditto, 5s. 8d. to 5s. 10d.; 10 stone Irish, 5s. 2d. to 5s. 4d; 10 stone Downs, 5s. 6d. to 5s. 8d.; 10 stone halfbreds, 5s. 4d. to 5s. 6d.; 10 stone Down ewes, 4s. to 4s. 2d.; 5 stone fat Down lambs, 6s. 6d. to 6s. 8d.; 6 stone halfbred ditto, 6s. 2d. to 6s. 4d.

Calves numbered twenty five, and met with a slow trade. The best on offer were quoted at from 4s. 10d. to 5s. per 8 lb. (offal given in).

Trade in the West.

Great eagerness is shown in capturing almost every head of dairy stock that comes into the market—no matter whether the best class of heifer or indifferent quality cow—every one of which sells at good prices, deep-milking heifers frequently commanding £20, £21, £22, £23, and even as much as £24 for very special animals (one of which sold at this extreme price at Salisbury), and cows from £14 to £18. Of course, others make less money—from £11 to £13—but then, as a rule, they are almost, if not quite, played out as milchers, and are fit for little else but the strawyard after a little longer out door grazing, preparatory to being prepared for the butcher. This brings us next to another class of stock, almost if not quite in so much demand—grazing cattle—the youngest of which sell up to £30 per pair and over, ranging down to £18 or £19 for poor class bullocks with anything but age on their side. Stirks continue to find keen inquiry as do yearling heifers, whilst in-calvers find an exceptionally ready sale up to as high as £16 10s. for those coming into early profit, down to £10 or £11 for those of later dates. With pasture keep still fairly plentiful—though the grass lands in many places are badly burnt up—and the roots promising well, though some of those on the poorer lands are beginning to languish from want of moisture, the position of the flock-master, after the splendid rains with which we have been favoured, has seldom, if ever, been more encouraging than at present, and to this must be ascribed the extraordinary rise in the value of sheep almost everywhere, which cannot be placed, even at a moderate computation, at less than from 6s. to 10s. a head on the different classes of sheep, some of the best ewes at recent sales making from 62s. up to 73s. apiece, and seconds 48s. to 59s. or 60s., and ewe lambs to 53s. or 54s! Couples, too, have been in extraordinary request, those with good plump lambs which will be ready for market well before Christmas, commanding as much as 80s. for mothers with single lambs! And other stores are selling at correspondingly high figures.

As a corollary to these somewhat extravagant values, fat stock is selling very dear all round, and, although some of the markets quote fat bullocks as slightly favouring buyers, this, as far as our experience goes, only relates to secondary grades, choice ripe steers and heifers, which are bringing from £16 10s. to £22 or £23 apiece, not being quotable under 11s. 6d. to 12s. per score for the best finished lots, and 10s. 6d. to 11s. for seconds and cows; coarser beasts, 9s. to 9s. 6d. Veal keeps steady, and though we have no advance to quote, still we cannot give prices as lower than 8½d. to 9d. for good quality animals, and 7½d. to 8d. of not quite so good finish. Wether mutton, which now consists almost entirely of matured lambs, commands a ready sale up to 9d. per lb., and occasionally more, and young ewes make up to 8½d.; but aged sheep rather favour buyers, being a type of mutton that does not suit every class of buyers. Choice suck lamb makes full value—10d. to 10½d., seconds 9½d. Pigs retain all their old firmness on the market, the smaller weights in porkers selling up to 11s. 3d., and baconers of good finish and medium weight 9s. 6d. to 10s.; heavy sows, 8s. to 9s.

Trade in Ireland

There was a good attendance of cattle and sheep at the Dublin market on Thursday. Home traders were well in evidence and purchased pretty freely. The supplies of stock in Dublin market are, on an average, much larger than they have been at this time of the year for some seasons past. Business opened fairly briskly. There was a good demand for well-finished beasts, and the best of these changed hands quickly at from 30s. to 32s. (live weight) per cwt. Rough and unfinished sorts were hard to dispose of.

Dead-weight prices were:—Choice bullocks and heifers, from 52s. to 60s. per cwt. for very choice; second-class beef, 47s. to 50s; and inferior beef, 44s. to 46s. 6d. per cwt. Heifers were not so much wanted. There were over 4,200 beasts in market, an increase on the week of about 160.

Sheep were only brought to the extent of 7,490, a falling off of some 200 on the week. There was no demand for heavy sheep except for nice small light-weight sheep for the English districts. London and South of England trade was practically *nil*. Prime wether mutton was sold at 7d. to 7¾d. per lb.; ewe mutton at 6d. to 6¾d. per lb.; and inferior mutton at 5d. to 6d. per lb. Large heavy hoggets were worth from 50s. to 60s. each, and small to medium, ditto, from 36s. to 40s. each. Large fat lambs from 34s. to 44s., and smaller lambs from 24s. to 30s. each. Choice veal brought 7½d. to 8d. per lb., and other calves from 4½d. per lb.

A number of the usual attendants were at Ballinasloe Fair. Not nearly so many sheep were purchased, though many buyers were on the look-out for good sheep. It seems rather a strange thing to have buyers come short in Ballinasloe. Sheep only sold in hundreds, instead of thousands some years ago.

The Dublin pig market on Thursday was badly attended, and trade proved of a very disappointing sort. Prices were of a very uncertain type. Shippers did very little. Only from 42s. to 44s. was obtainable for very choice light weight hogs. Other pigs also fared badly.

LONDON.

Central Market, Friday.—Fair supplies, and firm trade for best meat. Quotations:—English beef, 3s 6d to 3s 9d; Scotch sides, 3s 10d to 4s; shorts, 4s 4d to 4s 6d; Deptford and Liverpool killed, 3s 4d to 3s 9d; refrigerated hindquarters, best, 4s to 4s 2d; ditto seconds, 3s 6d to 3s 8d; ditto forequarters, 2s to 2s 4d; inferior beef, 2s to 2s 8d; mutton, Scotch wethers, 5s to 5s 4d; ditto tegs, 5s to 5s 4d; ditto ewes, 3s 4d to 3s 8d; English wethers, 4s 4d to 4s 10d; ditto ewes, 3s 4d to 3s 8d; Dutch sheep, 4s to 4s 6d; English lamb, 5s to 5s 4d; veal, 3s 8d to 4s 8d; English pork, 3s 8d to 4s 4d; Dutch ditto, 3s 8d to 4s 4d per 8 lb.

Islington, Thursday.—Supply of beasts consisted almost entirely of fat cows and bulls, for which a very poor inquiry was experienced, very few sales being recorded, though late values governed all transactions. Top prices paid per 8 lb:—Fat cows, 3s 4d to 3s 6d; fat bulls, 2s 9d to 3s 2d. Decrease of 60 in number penned in sheep market compared with Thursday last. Sheep trade ruled extremely dull, though Monday's values were maintained. The lamb season being practically over, very few transactions were recorded; Prices, however, remained about the same. Best pens made per 8 lb as follows:—7½ to 8 stone Down sheep, 5s 10d to 6s; 9 stone ditto, 5s 8d to 5s 10d; 10 stone ditto, 5s 6d to 5s 8d: 10 stone half-breds, 5s 4d to 5s 6d; 10 stone Down ewes, 4s to 4s 2d; 5 stone fat Down lambs, 6s 6d to 6s 8d; 6 stone half-bred ditto, 6s 2d to 6s 4d. Calves met a slow trade. Quotations per 8 lb, sinking the offal:—Beasts, 2s 9d to 3s 6d; sheep, 4s to 6s; calves, 3s to 5s; lambs, 5s 4d to 6s 8d.

COUNTRY.

Ashford, Tuesday.—Beef trade was quiet, though there was an average attendance. Best beasts made 4s 4d to 4s 8d. Mutton sold fairly well at a slight advance, Kent wethers going up to 5s 8d, and Downs and half-breds up to 5s 10d. Veal unchanged, 5s to 5s 6d. Pork cheaper, roasters selling at 3s 10d to 4s. Good trade for store cattle.

Aylesbury, Wednesday.—Trade was dull in both departments, and prices were decidedly in favour of buyers.

Bath, Wednesday.—The attendance was large, and business brisk. The following were the prices:—Fat steers, £18 5s to £20 10s; fat heifers, £15 5s to £21; fat cows, £15 to £18 5s; sturk heifers, £7 2s 6d to £9 12s 6d; heifers and calves, £16 to £18 5s; fat wethers, 50s to 54s 6d; fat ewes, 44s to 48s 6d; fat lambs, 40s to 46s 6d; fat calves, 76s to 109s; weaning calves, 32s to 50s.

Berwick, Saturday.—Better attendance of farmers and buyers, and trade sharper. Calves, £5 10s to £6 15s; heifers, £9; stirks, £8 to £10 15s; two-year olds, £11 to £13; Shorthorn bulls, £11 10s; milk cows, to £23.

Birmingham, Thursday.—Good supply of pigs; small supply of beasts and sheep, trade slow. Quotations:—Beef, 5d to 6½d per lb; mutton, 6d to 8½d per lb; lamb, 8½d to 9d per lb; bacon pigs, 9s per score; cutting pigs, 9s 6d 10s per score; sows, 6s 10d to 7s per score.

Bristol, Thursday.—Fat cattle were offered in about average number, but inquiry was not brisk, and trade quiet at lower quotations; best qualities 58s to 60s per cwt., secondary 55s. Sheep were not numerous, but moderate business passed, with prime and heavy wethers ½d per lb dearer. Pigs were scarce, and values unchanged.

Calne, Friday.—Prices of pigs:—In lots of not less than ten, on rail within 100 miles, 1s. per pig extra for delivery by road. Prime stores, 6 sc. 10 lb to 8 sc. 10 lbs, 9s 0d per score, 8 sc. 11 lb to 9 sc. 10 lb,, 8s 6d per score; 9 sc. 11 lb to 10 sc. 10 lb, 8s 0d. Pigs outside these limits at their value.—C. and T. Harris and Co., Ltd.

Canterbury, Saturday.—There was a very large offering of sheep to-day, and a good trade prevailed. Good lambs ranged from 30s to 35s 6d, and extreme primes covered a range from 26s to 37s; wether tegs, 38s to 47s; rough old sheep, 25s to 35s; better class, 35s to 45s; and the best ewes up to 50s; ewe tegs, 40s to 54s 6d; Kent ram tegs were making from 2½ to 5½ guineas. Not much inquiry for horned stock. Useful yearlings made about £6 apiece.

Carlisle, Saturday.—Buyers were numerous, and a better trade was done. Smaller cattle, £8 10s to £10 10s; wintering beasts, £12 10s to £14; heifers for feeding off, to £16 each.

Chester, Thursday.—There were large supplies of stock, with numerous buyers, and a large trade was done. The demand affected all classes of cattle, and most of the best lots were cleared. The sheep market was well stocked, and there

was an active demand. Milch cows, £17 to £23; calves, £16 to £20; barrens, £10 to £13; heifers, £9 to £15; stirks, £6 to £10 each.

Derby, Tuesday.—Prices practically unchanged from last week. Beasts and sheep of best quality in demand. Beasts, 3½d to 6½d; calves, 7½d; sheep, 7½d to 9d; lamb, 9d.

Doncaster, Saturday. — Fully an average supply of cattle, and a good attendance of buyers. Moderate inquiry at late rates. Milch beasts made £18 to £23; bullocks, £12 to £18; heifers and drapes, £10 to £15; stirks, £8 to £10; and young stores, £7 to £10 each Large supply of sheep. Fair trade, and late prices ruled. Ewes made 44s to 56s; gimmers, 60s to 68s; and lambs, 35s to 40s each. Moderate supply of rams, which made £5 to £10 each.

Dorchester, Saturday.—Messrs. T. Ensor and Sons' fortnightly sale at to-day's repository was in many respects a record one, both on account of the extensive character, particularly of milch beasts, which made a grand show, and also from the uniformly high prices ruled throughout, but more especially from dairy stock, which, owing to the presence of many buyers for town and other dairies, realised an advance of from £1 to £2 10s ahead, compared with late rates. For the best qualities of deep milking young heifers from £18 10s to £23 was paid, Mr. Groves, Charminster, making the top price; Mr. J. Braisby, Kimmeridge, £22; Mr. Dorey, Wool, £21 15s; Mr. Ford, Bucknowle, £19; Mr. F. Kent, Quarr Farm, £18 10s; and others showing clear £15 to £17 15s. In calvers ranged from £9 £10 10s. Barreners, after the recent welcome rainfall, which has proved of incalculable benefit to the pastures and roots alike, sold from £19 to £24 per pair. The beef trade ruled firm, and prices for all the riper qualities of heifers (of which more were wanted) were well maintained, quotations ranging from £15 to £18 15s (or 11s to 11s 6d per score for the best); fat bulls to £15 10s (or 9s 6d to 10s per score). A capital clearing trade all through.

Dublin, Thursday.—A teidous and slow moving market for cattle, with prices generally in favour of buyers, more particularly for second class and inferior beasts, a number of which remained unsold. Sheep in better request, and a fair clearance effected at last week's full prices. Lambs scarce and dearer, especially best qualities. Cattle—Live weight (best), 29s to 31s 6d per cwt; exceptional for choice Angus crosses, 33s. per cwt; secondary and inferior quality, 26s to 28s per cwt. Mutton (dead weight), 6½d to 7¾d per lb.—Ganly, Sons and Co.

Edinburgh, Wednesday. — Market report says: Cattle and sheep larger supply; cattle fair trade, clearance nearly effected. Polled bullocks to £15; horned bullocks, £14 15s.; Shorthorn cows, £26 10s; Ayrshires, £19 15s. Sheep slow trade. Half-bred lambs, 30s; half-bred ewes, 33s; greyfaced hoggs, 43s; hoggs, 39s,

Exeter, Friday.—Very quiet demand at usual prices, 11s being the top price for steers and maiden heifers; cows, 9s 6d to 10s, all sold. Larger supply of sheep, but slow trade; small size, 9d; larger size, 8½d; ewes, 6½d; rams, 5d; calves, 7d.

Glasgow, Wednesday.—Average numbers of cattle forward. For prime sorts a good demand was experienced. Secondary and heavy classes also met a steady inquiry. Top, 63s to 66s; secondary, 59s to 61s per cwt. Fewer sheep were penned, and the demand for prime hogs and wethers was good. Secondary showed no improvement in price. Lamb of quality sold well. Finest mutton, 9d to 9½d per lb; secondary, 8d to 8½d per lb; lambs, 7d to 9½d.

Hereford, Wednesday.—A large supply of beef, but not an over brisk trade, the top prices for the very best quality being 6½d to 6¾d, cow beef, 5d. Store cattle met with a better demand. There was a moderate supply of mutton, and it met with a ready sale at 8d per lb and upwards for best quality wethers and yearlings, ewes 6½d to 7d. Several lots of store sheep were brought, and the best lots found ready customers, inferior lots hanging on hand A larger supply of store lambs, and varied in price. Veal, a small supply, with firm trade at 6½d to 7d. Porks were in larger supply, and met with a good trade at 5½d to 6d. A few nice bacons made 5½d. Big stores sold well.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report the supply of yard-fed cattle was not so large and sold freely up to 9s. per stone; grass cattle from the Midlands were more numerous and met a dull trade at prices ruling in favour of buyers. At the special sale of grazing cattle over 400 were penned, including many choice lots of Cumberland and Westmoreland Shorthorns full of condition. There was a moderate attendance of buyers, and a slow trade prevailed at the lower range of prices noticed last week. Polled two-year-olds, forward in condition, £13 7s 6d to £12 10s; Shorthorn two years old, £12 17s 6d to £11 10s; eighteen months, £11 to £9 5s; roan Cumberland steers, sixteen months, £8 15s to £7 15s; Westmoreland steers of nice quality from 15 to 12 months old, £7 10s to £6 7s 6d. Cows and heifers were in better demand, those fresh calved or near advanced in values from 10s to 20s per head; Shorthorns with calves by sides, to £20 10s; polled, to £19 10s; heifers in calf, £16 to £11 10s; fat sheep were short, and values well maintained up to 64s 6d for half-bred shearlings; Suffolks, to 63s; breeding ewes sold slowly, first cross shearlings, to 55s 6d; full mouth Suffolks, to 45s; Suffolk wether lambs forward in condition, to 48s 6d. Fat swine were in good demand at high prices, and well bred stores were well competed for from 32s to 15s

Leicester, Saturday.—Good consignment of home-bred stock. Buyers were well represented, and trade ruled active at firm rates. Choice milch cows sold freely at £20 to £22; good lots, £18 to £19; secondary, £14 to £16; Shorthorn cattle, £12 to £16; choice Irish bullocks, £16 to £17 10s; secondary, £12 10s to £14 10s; Welsh cattle, £9 to £13 10s; young stock, £6 to £8; and calves, 20s to 40s each. Sheep sold freely at slightly easier rates; breeding ewes, 47s to 49s 6d and lamb hoggs, 24s to 34s each.

Lincoln, Friday.—Small show of horned stock, and a moderate demand. Young beasts, £9 to £12; milch cows, £17 to £22. An average consignment of sheep, and a fair trade. Gimmers, 50s to 67s, young ewes, 48s to 55s; and lambs, 30s to 44s each.

Lynn, Tuesday.—Fat beasts average supply, trade at late rates, 7s to 7s 9d per stone. Few more stores than last week, and trade very slow, making from £6 to £18 each. Fat sheep in average supply, and trade good, from 9s to 10s per stone; stores, 45s to 50s each. Trade for fat lambs over; store lambs made from 30s to 38s each.

Manchester, Friday. — Beef: Firsts, 5½d; seconds, 4d to 4½d; thirds, 3d to 3½d. Mutton: Firsts, 7½d; seconds, 6½d to 7d; thirds, 5½d to 6d. Veal: Firsts, 6½d; seconds, 5½d to 6d; thirds, 4½d to 5d. Bacon pigs: Firsts, 5½d; seconds, 4½d to 4¾d; thirds, 3½d to 3¾d. Porket pigs: Firsts, 6¾d; seconds, 6½d to 6½d; thirds, 5½d to 6d per lb

Newcastle, Tuesday.—Cattle a rather larger supply, and trade slow and dragging, but prices unchanged. Quotations:—Prime heifers, 7s 3d to 7s 6d; second class, 6s 9d to 7s; prime steers, 7s to 7s 3d: second class, 6s 9d to 7s; coarse and inferior, 6s to 6s 6d per stone, sinking the offal. Sheep and lamb trade similar to last week, but strong, heavy sheep and prime lambs were a ½d up, and ewes a ½d down. Quotations:—Choice young sheep, 8d to 8¾d; strong heavy sheep, 7¾d to 8½d; choice lambs, 8½d to 9d; second class, 8½d to 8½d; ewes, 6d to 6½d; rams, 5d to 6d per lb. Trade in veal was rather heavier, but prices remained unchanged at 6d to 7½d per lb.

Newport, Wednesday. — Large supply of cattle, sheep and lambs, and moderate supply of calves and pigs. Numerous attendance of buyers, and brisk demand for all classes of stock on offer. Quotations prevailing were as follows:—Best beef, 6½d to 6½d; second, 6d; cows, 4¾d to 5d; best wether mutton, 8½d to 8½d; ewes, 6½d to 7d; lamb, 9d to 9½d; calves, 6½d to 7½d per lb; porkers pigs, 10s to 10s 6d per score.

Norwich, Saturday.—Average supply of fat cattle, trade fairly good for best beasts, which made up to 8s per 14 lb stone; other qualities from 7s 3d to 7s 6d, and fat cows made 6s. Veal calves sold at 3d per lb. Small show of fat sheep; trade good, the best making up to 9½d per lb; and ewes 6½d to 7d. Trade for fat pigs was similar to last week, prices being from 6s to 6s 6d per stone. Store cattle were a good show, chiefly store beasts Trade was better, three year-olds making from £15 to £17 10s per head, two-year-olds from £11 to £12 10s, and yearlings from £5 to £9. Store sheep were in small supply, ewes made from 56s to 60s, and hoggets from 34s to 48s. Store pigs fetched from 16s to 30s.

Nottingham. Saturday.—There was a shorter supply of stock, with rather a better trade. Best milch cows were very dear, making £18 to £21 each, heifers realised £13 to £17 10s, and calves, which sold briskly, up to 50s. Sheep made the usual rates,

Preston, Wednesday.—The supplies of sheep and lambs were considerably smaller, and a better trade was done, especial for choice qualities. The beef trade was rather slow. Quotations:—Local-fed heifers, best quality, 6½d; secondary ditto, 6d; Irish ditto, 6d to 6½d; choice cows and bulls, 5¾d; heavy and secondary quality, 5d to 5½d; choice lambs, 9d; hoggs, 8½d; choice 6½d; heavy tups and ewes, 5d to 5½d; calves, 7d per lb.

Retford, Saturday.—First-class bullocks and milch cows, which were very scarce, were quoted £18 to £22, secondary from £14; two-year-old steers and heifers unchanged, calves 35s to 45s each.

Romford, Wednesday.—Fair supply of fat beasts, trade rather slow. Best animals, 4s 2d to 4s 6d; middlings, 3s 10d to 4s per stone. Calves in short supply, trade slow at 4s 10d to 5s per stone. Sheep in large supply, trade about the same. Best Down wethers, 5s 8d to 6s; large sheep, 5s 4d to 5s 6d per stone. Ewes in large supply, trade much lower. Down ewes, 3s 10d to 4s; half-breds and Kents, 3s 9d to 3s 10d per stone. A few store beasts on offer; slow demand. Milch cows in good supply, trade better. Pigs in average supply, trade about the same. Small porkers, 4s to 4s 2d; large hogs, 3s 8d to 3s 10d per stone.

Sheffield, Tuesday.—A small supply of cattle. A fair demand for good milch beasts, which made £18 to £21, with little doing in rougher descriptions.

Shrewsbury, Tuesday.—Usual supplies of fat and store cattle, calves, and pigs, but smaller for store sheep. There was a fair attendance of buyers, but prices were slightly less than last week. Quotations:—Beef, 6d to 6½d per lb; mutton (wether), 9d to 9½d per lb; ewes, 7½d to 8½d per lb; lamb, 9d to 10d per lb; veal, 7d to 8d per lb; porket pigs, 9s to 9s 6d per score; bacons, 8s 6d to 9s per score.

Stockton, Wednesday.—There was an average show of the best cattle, which met a slow trade at 7s 3d to 7s 6d per stone, whilst rougher kinds sold at 6s and 6s 6d. Lambs made 9d per lb; young sheep, 8½d; ewes, 6d; and calves 8d per lb. The pig trade was about the same as last week, small porkers making 7s to 7s 6d per stone; mediums, 7s; and sows, 6s to 6s 6d.

Thame, Tuesday.—There was a considerable decrease in the number of beasts in this market on Tuesday last, and the trade showed no improvement on the previous week, although nearly all the cattle were disposed of. Sheep were decidedly firmer, and made more money than for several weeks past, a choice consignment of wether sheep fetching 64s. each. Large numbers of well-bred weaning calves are coming to hand, and it would be well worth while the attention of rearers of stock to note. The pig pens were also full. Capital entries have been received for next week's sales. Messrs. Bond and Burrows' sale comprised 91 fat beasts, 247 fat sheep, 126 fat and store pigs, and 141 fat and weaning calves. Fat oxen made from £16 to £20 10s; fat heifers, £14 to £19 5s; fat wether sheep, 54s to 65s 6d; fat ewes, 40s to 59s 6d; fat lambs, 38s to 54s; fat calves, £2 10s to £5; weaning cow calves, 30s to 68s; bull calves, 15s to 51s; bacon hogs, £3 10s to £5 10s; fat sows to £6 15s; porkets, 26s to 48s; store pigs, 12s to 36s.

Truro, Wednesday.—Attendance very good, business fairly brisk. Fat bullocks, 54s to 56s per cwt; two-year-old steers and barreners, 40s to 45s per cwt; cows and calves, £12 to £16; rearing calves, 25s to 40s each; ewes. 42s to 46s each; wethers, 7d; ewes, 5d to 5½d; lambs, 7d to 7½d per lb; pigs, 6s 6d to 35s each; beef, 6d to 8d per lb; mutton, 6d to 8½d; lamb, 8d to 9d; veal, 6d to 8d; pork, 6d to 8½d; pork (carcasses), 5d to 5½d.

Wolverhampton, Wednesday.—Trade very slow; fair for lambs. Supply moderate. Quotations:—Beef, 5½d to 6¾d per lb; mutton, 6½d to 9d per lb; lamb, 9d to 9½d per lb; veal, 6½d to 7d per lb.

Worksop, Wednesday.—Poor show of stock, with trade slow. Best beef, of which there was an exceptionally small supply, made 7s to 7s 3d per stone; secondary qualities, 6s 6d to 6s 9d. Best Southdown wether and cross-bred shearlings met a better trade, making 7½d to 8½d per lb; ewes, 5d to 5½d; lambs, 8½d per lb.

York, Thursday.—Trade for cattle was very inactive, dealers finding considerable difficulty in disposing of their stock. Good quality three-year-old bullocks made up to £17 10s, and two-year olds from £9 10s to £12 10s. Young beasts changed hands at £6 to £7 10s. Trade for sheep showed an improvement in this department, and sales were easily effected. Best ewes made up to 55s, others 46s, and Cheviot ewes realised 23s to 30s. There was an excellent inquiry for cross-bred lambs, which ranged in price from £1 to £1 8s.

LONDON HAY TRADE.

Saturday.—The position of the hay trade during the past week has been of an unsettled character. At earlier part of week very much larger supplies came to hand, and business showed a weakening tendency, but during the last few days the arrivals have dropped off considerably, and with a better demand in consequence, our market has somewhat steadied itself, and prices, on the whole, show little or no change on previous quotations. The present position of the London trade is a difficult one; with the season's crop well over average, consumers' ideas are for much lower prices, yet, at the same time, farmers and country holders are asking more money for stuff in stacks. No doubt with corn and all feeding stuffs at such

high figures more hay will be used as country feed than usual, and this, no doubt, makes farmers more indisposed to sell than in ordinary years. Best qualities of all kinds are a very firm trade. Mixtures being in very short supply are specially in demand, while best hays and clovers find a good inquiry; in fact, anything that can be guaranteed as sweet and clean is readily disposed of at top prices. Straw is in better supply, and is a quiet trade at about last week's values.

Prices ruling for English 1907 crop are about as follows:—Best hays, 70s per ton; good hays, 57s 6d to 67s 6d per ton; plain hays, 55s per ton; best clovers, 82s 6d to 85s per ton; good clovers, 77s 6d to 80s per ton; inferior clovers, 70s to 75s per ton; best mixtures, 80s to 82s 6d per ton; good mixtures, 70s to 75s per ton; plain mixtures, 62s 6d to 67s 6d per ton; seconds hays, clovers, and mixtures, 40s to 55s per ton; wheat straw, 26s to 28s per load; barley straw, 26s to 28s per load; oat straw, 28s per load. All ex rail London.

Foreign: Hardly anything doing, and prices are nominally unaltered. Canadian mixture, 80s per ton; first quality Dutch hay, 62s 6d per ton; second quality Dutch hay, 55s to 57s 6d per ton; New French first and second cut clover, 75s per ton. These prices are by the barge load delivered alongside wharf, London.

DAIRY PRODUCE.

London, Friday.—Butter.—The Continental butter markets show a continued rise in price, which is usual in October. Danish has risen one kroner this week in Copenhagen, against a fall of three kroner twelve months since, when the September prices had been abnormally high, and which produced a temporary reaction to lower values. In November prices again advanced. The recent rise of 12s per cwt. in French butter has been too much for the market, and buyers are now filling their requirements from other sources. Such sudden and large fluctuations are detrimental to all sound principles of commerce, and the sale of French butter has suffered severely for this large and sudden rise. Siberian butter continues to arrive in larger quantities than last year, the excess for the last four weeks being 2,600 cwt. over last year. Cheese.—There has been a fair demand for Canadian this week, and prices are well maintained. "Choicest" white makes 61s and coloured 62s, there being very little except tasty goods to be had below 60s. The large retail establishments all over the country have decided to raise the retail price of colonial cheese next week to 7½d per lb—W. Weddel and Co.

EGGS.

(Number per 1s.)

Altrincham: 8. Appleby: 7 and 8. Barnstaple: 10. Berwick: 1s 2d to 1s 3d doz. Birmingham: 8 and 9. Carlisle: 7 and 8. Chester: 8. Dartmouth: 1s 4d to 1s 6d per doz. Derby: 8 and 9. Doncaster: 10 and 11. Dorchester: 1s to 1s 3d per doz. Evesham: 1s 3d to 1s 4d per doz. Hereford: 9 and 10. Ipswich: 9 and 10. Kidderminster: 10. Lancaster: 7 and 8. Lincoln: 10 and 11. Market Drayton: 8 snd 9. Otley: 9. Penrith: 8 and 9. Penzance: 1s to 1s 3d per doz. Plymouth: 10 and 11. Preston: 7 and 8. Retford: 2s 2d to 2s 3d per score. Ripon: 8 and 9. Scarborough: 9. Spalding: 11. Stockport: 7 and 8. Stockton: 8. Totnes: 1s 3d to 1s 4d per doz. Truro: 1s to 1s 1d per dozen. Wellington (Salop): 10 and 11. Worcester: 8. Worksop: 2s 2d to 2s 4d per score. York: 8 and 9.

BUTTER.

(Price per lb.)

Altrincham: 1s 2d to 1s 3d. Appleby: 11d to 1s 1d. Barnstaple: 1s 2d. Berwick: 1s to 1s 2d. Birmingham: 1s 2d to 1s 3d. Carlisle: 1s 2d to 1s 3d. Chester: 1s 2d. Dartmouth: 1s 2d to 1s 4d. Derby: 1s 2d to 1s 3d: Doncaster: 1s 1d to 1s 2d. Dorchester: 10d to 1s 3d. Evesham: 1s 1d to 1s 2d. Hereford: 1s 1d to 1s 3d. Ipswich: 1s 2d to 1s 3d. Kidderminster: 1s 2d. Lancaster: 1s 2½d to 1s 3½d. Lincoln: 1s 1d to 1s 2d. Market Drayton: 1s 2d. Otley: 1s 6d to 1s 8d per 24 oz roll. Penrith: 10½d to 1s 2d. Penzance: 10d to 1s 2d. Plymouth: 1s 2d to 1s 3d. Preston: 1s 3d. Retford: 1s 3d to 1s 4d. Ripon: 1s 6d to 1s 8d per 24 oz roll. Scarborough: 1s 3d. Shrewsbury: 1s to 1s 2d. Spalding: 1s. Stockport: 1s 2d to 1s 3d. Stockton: 1s to 1s 2d. Totnes: 1s 1d to 1s 2d. Truro: 11d to 1s. Wellington (Salop): 1s to 1s 1d. Worcester: 1s 1d to 1s 3d. Worksop: 1s 1d to 1s 3d. York: 1s 1d to 1s 2d.

CHEESE.

Highbridge, Tuesday. A good attendance of buyers, a brisk sale, and all cleared. Best Caerphilly dairies realised up to 56s per cwt.; secondary dairies, 53s 6d to 55s; and other dairies, 48s to 52s. A few inferior lots failed to reach 42s. Cheddars, 54s to 58s; truckles, 53s to 59s; doubles, 56s to 52s.

Glasgow, Wednesday.—The arrivals of cheese were small. There was a lack of life in the market. Values remained firm for high-class goods, but anything of a secondary nature was offered at more tempting prices. Cheddars, 59s to 63s; Dunlops, 58s to 61s; Canadians, 60s per cwt.

Newport, Wednesday.—The supply on offer was larger than usual. There was a moderate attendance of buyers, and a fair business was done. Ruling quotations:—Caerphillies, 40s to 53s; fancy dairies, 54s to 56s; Derbys, 63s; truckles, 56s to 63s; Cheddars, 60s to 63s.

Weekly London Averages.

An account of the Quantities and Prices of British Corn bought on the London Market and in the area within five miles from the Royal Exchange during the week ending Tuesday, October 1, 1907:—

	Imp. Quar.	Bus.	Total Amount. £	s.	d.	Av. Price per Qr £	s.	d.
Wheat	8,907	5	15,275	6	0	1	14	4
Barley	4,151	1	5,371	0	11	1	5	11
Oats	7,775	4	7,477	16	5	0	19	3

Five Years' Comparative Averages.

(OFFICIAL.)

Comparative statement of grain sales and prices at the Statute markets for the week ending October 5, and for the corresponding week in each of the years from 1903 to 1906:—

	WHEAT. Qrs.	s.	d.	BARLEY. Qrs.	s.	d.	OATS. Qrs.	s.	d.
1903	56,620	25	10	58,717	23	8	31,189	15	6

Price Five Shillings.

LOOK.—To poultry keepers, string netting, waterproof 1 in. mesh, for enclosing poultry runs, &c., 20 sq. yards, 1s., sent any width or length.—H. Robinson & Co., Net Works, Rye.

CORN and SEED BUSINESS for absolute SALE at Reigate. Genuine old established. Excellent neighbourhood. Central position. Price and particulars of Mr. James T. Peat, Estate Agent, Reigate, Surrey.

WHITE ORPINGTON COCKERELS (April, May), excellent laying strain, 5s. each; two, 9s.—H. Creber, St. Germans, Cornwall.

By Mr. GAVIN LOW.

COUNTY WESTMEATH.

SUBSCRIBER has been favoured with instructions from the Executrix of the late Scrope B. Rynd, Esq., to SELL BY AUCTION, in one or two Lots, at his PROPERTY SALEROOMS, 50, PRUSSIA STREET, DUBLIN, at 1 o'clock p.m., on THURSDAY, OCTOBER 10, 1907,

GORTMORE and LECADE,

containing 581a. 1r. 33p., statute, subject to £400 per annum, reducible at the end of each of the first three decades.

Lot 1—Gortmore, with House, Offices, Garden, &c., contains 273a. 1r. 16p., statute, and subject to £200 per annum, reducible at the end of each of the first three decades.

Lot 2—Gortmore (part of), and Lecade, containing 308a. 0r. 17p., statute, and subject to £200 per annum, reducible at the end of each of the first three decades.

The Land is all in grass, old pasture, a large proportion being of prime fattening quality, well watered, and suitably divided.

The House (a beautiful residence), Southern aspect, with greenhouse, pleasure grounds, and garden, contains entrance hall (with fireplace), three reception rooms, eight bedrooms, servants' hall, servants' rooms, kitchen, scullery, larder, pantry, dairy, storerooms, w.c.'s, &c.

It is approached by two avenues, front and back (with two gate lodges), through lawn well studded with ancient timber. There are ample out-offices, and a lock-up stable and coach-house, yard.

Gortmore is situated in the Westmeath hunting district, being two miles from Ballymore, four from Ballymahon, seven from Streamstown, nine from Athlone, and eight from Moate, where there is a Polo Club.

A good trout stream runs through the property, and there is good salmon fishing on the Shannon, two miles distant.

Date of Sale of Stock, Crops, Implements, Furniture, &c., will be given in future advertisements.

For further particulars and Conditions of Sale apply to

T. W. HARDMAN and SONS, Solicitors,
14, Molesworth Street; or to
GAVIN LOW,
50, PRUSSIA STREET, DUBLIN.

By LLOYD & THOMAS.

RHYWFELEN, ABERGWILI,
CARMARTHEN.

LLOYD & THOMAS are instructed by Mr. J. Ll. Morgan to SELL by AUCTION on OCTOBER 10th, 1907, at Rhywfelen, three miles from Carmarthen Town, on the main line G.W.R., almost the entire prize-winning HERD of SHORTHORNS. The cows are a fine milking lot and in calf to the great stock bull Duke of Tyne 74425, winner of numerous prizes, and the sire of several winners, including the prize-winning bull and heifer calves at the last United Counties Show.

Catalogues of the Auctioneers, 5, Quay Street, Carmarthen.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The wheat crop of the United Kingdom is now put by some good judges at 32 bushels against 30, which was the accepted estimate a month ago. Excellent threshing results from Kent and Northumberland have probably led to this optimism, and the area in question is so important that the earlier estimate really may need a slight increase. It is, however, unlikely that the high standard of four quarters to the acre has actually been attained for the three kingdoms. Scotland and Ireland have not fared as well as England, and there is not a single case before us of Welsh farmers claiming to have done well with this year's wheat. A very competent authority reckons September to have improved our wheat yield by a full 3 per cent., but this would only give us 31 bushels, not 32 bushels, as the eventual result. Barley is estimated to have gained nearly 4 per cent. by the fine September which is not improbable, seeing that it was the latest of the crops to mature that it gained most by the fair weather conditions, and that it is the crop which more than the others depends on the harvesting. Oats are a good yield this year, and the fine September has enabled fields to be retrieved which, on the feast of St. Partridge, appeared a lost cause. Beans are a better crop than peas this year. Rye thrashes out well, and so do tares. Potatoes are below an average very decidedly, and this will throw an increased strain upon the wheat supply. Roots have gone off since September 1 very materially, and the aftermath of hay is a great deal less than had been anticipated. These facts are a large discount off the farmers gains to the cereal and pulse crops. The rains, since October came in, have helped the start with autumn work, but have been inimical to the condition of a good deal of grain sent to market. Where the new wheat has been unfit for October milling, the flour trade has been placed in a difficulty, and foreign sorts being both very dear and very scarce, while absolutely necessary for mixing purposes. The price of flour has been advanced a full shilling per sack; in some instances, indeed, a florin.

The wheat gradient last week was moderate at the whole 190 statute markets (186 of which reported wheat sales) were in agreement in advancing values, and there had not previously been an especial disparity.

Mark Lane ...	35s.	0d. per qr.
Sailisbury ...	31s.	3d. ,,
Range	3s.	9d. per qr.

The range in the price of barley shows Kent to be the place where the value is at its highest:—

Canterbury ...	27s.	1d. per qr.
Nottingham...	21s.	8d. ,,
Range	2s.	5d. per qr.

The gradient in oats shows that 19s. is exceeded at Mark Lane, Reading, Canterbury, and a few other markets, and that no leading exchange is now below 17s. per qr.

Mark Lane	19s.	4d. per qr.
Nottingham...	17s.	0d. ,,
Range	2s.	4d. per qr.

The markets where oats have been cheapest have included, besides the Eastern-Midland centre, Peterborough, Salisbury, Norwich, Lincoln, Cambridge, and Ely.

The latest prices for leading staples thus compare with the lowest values within the year.

	Present Value.		Lowest Value.	
	s.	d.	s.	d.
English wheat ...	32	6	26	0
Manitoba wheat...	46	0	33	0
Karachi wheat ...	41	0	33	0
Best flour	37	0	29	0
Household flour...	32	0	22	0
Mixed maize	28	0	20	0
Russian barley ...	25	6	20	6
,, oats	19	6	16	6
Indian linseed ...	47	0	41	0
,, rapeseed...	54	0	42	0

These ten prices show advance all along the line. An advance of 13s. in Manitoba wheat as compared with 6s. 6d. only in English is partly due to the greater firmness with which importers hold their grain, but must also be assigned in a very appreciable degree to the gross exaggeration of the Dominion crop by the Government representatives in later August and early September. When the truth leaked out a minor panic was set up, as those who had contracted for this special grade found themselves menaced by real difficulty in procuring it.

The sales of British wheat at the statute markets since harvest have been as follows:—

This season ... 314,000 qr. at 31s. 10d. per qr.
Last ,, ... 416,000 ,, 25s. 10d. ,,

Smaller supplies, higher prices. It is a quite natural state of affairs.

The sales of British barley thus compare:—

This season ... 193,000 qr. at 24s. 10d. per qr.
Last ,, ... 455,000 ,, 24s. 7d. ,,

The price of barley ought to be higher than it is.

Sales of British oats have been as follows:—

This season ... 216,000 qr. at 17s 8d. per qr.
Last season .. 205,000 qr. at 16s. 3d. per qr.

Considering the heavy sales off the farms—sales in excess of what we deem altogether prudent—the British farmer may regard himself as fairly lucky to get 1s. 5d. more money than he obtained in October last year.

The imports of the United Kingdom last week were as follows:—

Wheat, 422,000 qr.: a fairly large arrival.
Flour, 133,200 sks.: a moderate supply.
Barley, 133,000 qr.: a full average.
Oats, 55,000 qr.: barely half an average.
Maize, 205,000 qr.: a full average.

Since September 1 the imports of the United Kingdom have been:—

Wheat,.....	2,412,000 qr.
Flour, ...	487,000 ,,
Breadstuffs,	2,899,000 ,,
Maize.....	1,252,000 qr.
Barley	843,000 ,,
Oats	170,000 ,,

In no previous campaign since the new century have the imports of oats in five completed weeks been less than four hundred thousand quarters, so that the deficiency this season may fairly be called extraordinary.

The price of English oats, which works out at £6 6s. 6d. per ton, shows that that staple undersells wheat barley and rye, and is 13s. 4d. per ton cheaper than imported oats. The price of maize equals £6 10s. per ton, and is 3s. 6d. in favour of the buyer of English oats, so that the rise of 1s. 5d. on the year in the latter, in the face of large deliveries, is explained. None the less one feels that to get an advanced price when sending unwonted quantities to market is not a thing likely long to continue, and we therefore hope that English farmers will hold their oats with a little more confidence.

The quantity of wheat on passage on the 12th inst. was as follows:—

American	345,000 qrs.
Californian	100,000 ,,
Russian	265,000 ,,
Indian	700,000 ,,
Argentine	95,000 ,,
Australasian.....	435,000 ,,
Various	20,000 ,,
Total	1,960,000 ,,
A week ago	1,845,000 ,,

The quantity of flour on passage is 242,000 sks.; of barley the quantity on passage has increased to 570,000 qr., of which total 440,000 qr. are feeding and 130,000 qr. brewing quality. No first-class malting barley is known to be on passage.

The quantity of oats on passage is 160,000 qr.; of Maize, 960,000 qr.; of linseed, 143,000 qr.; of rapeseed, 9,000 qr.; and of cottonseed, 320,000 tons.

Shipments are increasing under the influence of the higher prices, and were above an average last week of wheat from America and Russia, of barley from Russia, and of maize from Russia. But there were no excessive shipments of oats from any country, and of flour the American exports were not large enough to balance the cessation in flour supply from all other foreign sources.

LONDON HAY TRADE.

Saturday.—The hay trade during the past week has presented a much firmer appearance, and prices in some instances are the turn higher, supplies, owing mainly perhaps to the very stormy and unsettled weather, have been much shorter and little difficulty has been found in effecting clearances at top values. The consumers are not as yet very eager buyers at any advance in prices, the present advance being paid mostly among those in the trade who had anticipated values, being on a much lower level after harvest, but the market, instead of going lower, has upset all calculations by being in fact dearer, very few purchases had been made for future deliveries, and in consequence salesmen are finding great difficulty in keeping their contracts supplied, there being keen competition among them for the very short arrival. Clovers and mixtures are a very firm trade, and slightly higher prices are obtainable. Best hays are in good demand, and all lots are easily disposed of. There is also a very fair inquiry for plain stuffs of all kinds. With farmers busy thrashing whenever possible, a large bulk of straw is finding its way to market, and prices in consequence are the turn easier. In the Foreign market there is very little doing, and prices are nominally unaltered.

Prices ruling are about as follows:—English 1907 crop. Best hays, 70s per ton; good hays, 60s to 67s 6d per ton; plain hays, 55s to 57s 6d per ton; best clovers, 82s 6d to 85s per ton; good clovers, 77s 6d to 80s per ton; inferior clovers, 70s to 75s per ton; best mixtures, 80s to 82s 6d per ton; good mixtures, 72s 6d to 77s 6d per ton; plain mixtures, 62s 6d to 70s per ton; seconds hays, clovers, and mixtures, 45s to 55s per ton; wheat straw, 25s to 27s per load; barley straw, 24s to 26s per load; oat straw 26s per load. All ex rail London.

Foreign: Canadian mixture, 80s per ton; first quality Dutch hay, 60s to 62s 6d per ton; second quality Dutch hay, 55s per ton. New French first and second cut clover, 75s per ton. These prices are by the barge load delivered alongside a London Thames wharf.

THE BALTIC.

The prices asked for wheat cargoes on Saturday were high, and sales were checked thereby. Nevertheless, the following transactions took place:—Odessa Ghirka, 46s. per 492 lb.; Roumanian, 43s. 9d. per 492 lb.; Blue stem, 43s. 3d. per 500 lb.; Walla Walla, 42s. 6d. per 500 lb.; Australian, 43s. 6d. per 480 lb.; and No. 1 Northern Manitoba, at 44s per 480 lb.

Maize cargoes were 6d. dearer, and the prices made included 27s. 9d. per 480 lb for Argentine, 28s. 6d. per 480 lb. for Russian, and 28s. per 480 lb. for American.

Barley cargoes also advanced 6d., and sales were effected at 26s. 9d. per 400 lb. for Russian, 27s. per 400 lb. for Roumanian, 28s. per 416 lb. for Kustendje, 24s. 9d. per 400 lb. for Persian, and 34s. 6d. per 448 lb. for Californian.

A cargo of oats fetched 18s. per 304 lb. for prompt shipment from Riga, and one of beans had a buyer at 32s. 9d. per 480 lb. for October shipment from Smyrna.

The London Corn Trade Association C. F. & I. quotations, for the settlement of Rejections and Difference in Weights on Wheat under Rule No. 4 of the Association East Indian Wheat Contracts, are as follows, viz.—via Canal:—

Crop 1906.—Choice White Karachi, 41s 6d; Soft Red Karachi, 42s—new clean terms.

These prices remain current until a new list is issued.

The secretary of the above association announces that the following standards were made up on the 11th inst. for July shipments, viz.:—

Wheat.—Choice White Kurrachee (crop 1906); ditto (crop 1907); Soft Red Kurrachee (crop 1907); Choice White Bombay (crop 1907).

Gram, Dari, and barley.—Kurrachee.

Pease.—White Calcutta.

Lentils.—Kurrachee and Bombay.

These standards can be inspected at the offices, 26, St. Mary Axe, and samples obtained on payment of a small fee.

HOPS.

Canterbury, Saturday.—The demand is a trifle better for the best hops, and a sale of a good lot of Kent Goldings is reported at £6 per cwt. Healthy brown hops sell fairly freely at from 45s to 56s per cwt.

Worcester, Saturday.—There was a good attendance of planters at market to-day and trade was good for choice bright samples at late rates. Good yellow hops also sold pretty well, but growers are still indifferent about selling. Two thousand five hundred and thirty-seven pockets passed the public scales this week, making with those previously weighed 9,602 to date.—Charles Faram and Co.

Seven Years Grain Averages.

(OFFICIAL.)

Wheat	28s. 10d.	per 480 lb.
Barley.....	25s. 4d.	per 400 lb.
Oats.....	18s. 11d.	per 312 lb.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English firm, but not active. Whites quoted at 37s 6d to 40s; reds at 37s 6d to 39s 6d. Foreign firmly held at 3d to 6d advance over Monday, but not active. No. 1 Northern Manitoba, ex ship, held at 45s 3d, landed at 43s; No. 2 Northern Manitoba, ex ship, at 44s 6d to 44s 9d; No. 1 Durum, 40s; choice white Karachi at 41s 6d; red Karachi at 41s. Flour firm, and held at 6d advance, which checks business. Hungarian quoted at 37s 6d; Iron Dukes at 26s 6d to 27s. Maize firm, moderate inquiry at 3d over Monday. Odessa, ex ship, to arrive, quoted at 27s, landed at 27s 3d; Danubian, landed, at 27s 6d; Galatz-Foxanian, landed at 27s 3d. Barley firm and dearer; 25s asked Azoff-Black Sea, ex ship, to arrive; Persian, ex ship, 23s 6d, landed at 24s. Oats firm at fully late rates, but quiet. South Russian (38 lb), landed, held at 19s 3d to 19s 6d; La Plata, landed, at 19s 6d.

Mark Lane, Friday.—Wheat: English firmly held at full prices. Whites quoted at 38s to 40s; reds at 38s to 39s 6d. Foreign firmly held for 9d over Wednesday, with a moderate trade passing. No. 1 Northern Manitoba, ex ship, held at 46s; landed at 46s 6d; No. 2 Northern, ex ship, at 45s to 45s 3d; No. 1 Durum at 41s; choice white Karachi at 42s to 42s 6d; red Karachi at 41s 6d to 41s 9d. Flour firm and 6d to 9d dearer. Hungarians quoted at 38s to 38s 6d; Iron Dukes at 27s 6d. Maize firm; fair request at 9d advance. River Plate, Odessa, and Danubian landed held at 28s to 28s 3d. Barley firm, and 6d more money asked; 25s 6d asked Azoff-Black Sea and Odessa-Nicolaieff, ex ship, to arrive; 26s landed; Persians, 23s 6d to 24s 6d. Oats firm but quiet. La Plata and South Russian (38 lb) held at 19s 3d to 19s 6d, ex quay.

COUNTRY.

Appleby, Saturday.—A fair number of samples forward, with a steady trade. White oats (horse corn), 20s to 21s per 26 stones

Ashford, Tuesday.—Wheat market firm and samples in good condition, dearer sales taking place up to 37s. Barley firm. Oats and maize slightly dearer. Flour 2s per sack dearer. Quotations: Wheat, 34s to 37s; best malting barley, 30s to 32s; secondary, 27s to 29s; Mazagan beans, 27s to 30s; tick beans, 33s to 35s; black oats, 20s to 22s; white oats, 19s to 22s; maize, 29s to 30s. Flour: Whites, 36s per sack; seconds, 33s; scaling, 31s.

Banbury, Thursday.—Wheat, white (new), 34s 6d to 35s 6d per qr; ditto red (new) 34s 6d to 35s 6d per qr; barley, 27s 6d to 32s per qr; beans (new), 30s to 31s per qr; oats, 17s to 21s qr; peas, 30s to 33s per qr.

Berwick, Saturday.—There was a moderate attendance. The wet weather seriously interfered with threshing operations during the week, and there was a smaller show of grain. Fine barley firm at fully late rates. Oats and wheat scarce. Wheat, 23s to 31s; oats, 22s to 23s 6d per qr.

Birmingham, Thursday.—Trade was fairly active in spite of big advances. Foreign wheats, since last market day, have advanced from 2s 6d to 3s per qr, and met with a fair demand at the advance; No. 1 Manitoba, 45s 3d per 496 lb; No. 2, 44s 6d; No. 3, 44s at Bristol; River Plate, 43s 6d; Russian, 42s 6d to 44s per qr at Sharpness. Best samples of English wheats made from 14s to 14s 6d per 186 lb, delivered. English oats were generally 6d dearer; beans, 12s 6d per bag (196 lb) delivered. Grinding barley and maize were 9d per qr up on the week.

Brighton, Thursday.—Little business and fair attendance. Wheat in short supply, 2s per qr dearer. Oats 3d to 6d dearer. Barley, 30s to 36s; grinding ditto, 27s to 28s; oats, English, 18s to 21s; peas, 32s to 33s; beans, 31s to 33s.

Bristol, Thursday.—A good attendance on market to-day. English wheat in moderate supply at 2s advance. Foreign wheat very firm, 3s to 4s dearer on the week. Maize and barley 1s dearer. Oats 6d advance. Flour strong and 1s 6d dearer with a good inquiry.—GRACE BROS.

Bury St. Edmunds, Wednesday.—Wheat was in small supply, and, with holders reluctant to part, was firm at 1s per qr advance. Reds, 35s 6d to 37s; reverts, 35s to 36s per qr. Trade for barley was firm in tone, and business was done at 29s to 31s per qr. Oats a firm trade, at 19s to 20s per qr; old, 23s to 24s per qr. Beans sold at 31s to 32s; and peas at 32s to 34s per qr. Maize strong, at 28s 6d to 29s per qr, delivered. Other feeding corns, cakes, and offals firm, with an upward tendency.

Cambridge, Saturday.—During the week prices for wheat have considerably advanced. Although prices have now reached this high level, farmers do not bring out large supplies. At this market there was a fair supply of wheat making 38s to 39s per 504 lb. on rail, being an advance of about 2s 6d on the week. Good supply of barley, trade very firm. Oats in short supply, prices unchanged.

Canterbury, Saturday.—Many of the wheat samples continue to be out of condition, but for really dry lots values are advancing, samples of 64 lb weight making up to 39s per qr. There was a better supply of barley, and a good inquiry prevailed to-day for malting qualities at from 29s to 35s. Oats steady, 38 lb samples ranging up to 19s 6d and 44 lb lots to 22s per qr. Peas and beans scarce and firm. Good seed wheat is selling at 40s per qr.

Carlisle, Saturday.—Small show of new in our market to-day, but large quantity of pocket samples shown, sale of which was good prices, 19s 6d to 20s 6d per 336 lb. Large trade in old oats, 24s to 25s per 336 lb. Several lots of fine quality barley sold at 28s to 29s 6d per 448 lb.—THOMAS ROBINSON.

Chester, Saturday.—There has been a general advance in all classes of grain since last market day. English wheat showed an improvement of 2d to 3d per bushel. Oats showed a similar advance for prime qualities. Few samples of barley offering. Offals scarce and dearer. Quotations:—White and red wheat, 5s 2d to 5s 3d per 75 lb; new grinding barley, 4s to 4s 3d per 64 lb; old oats, 3s 1d to 3s 6d; and new, 2s 7d to 2s 9d per 46 lb; Indian corn (feeding), 15s 3d to 15s 6d per 240 lb; round corn, 14s 6d to 15s 3d.

Chichester, Wednesday.—A good attendance and fair trade. Wheat and flour were each 1s dearer, and oats showed an advance of 6d. New white wheat, 34s 6d to 36s; new red ditto, 34s 6d to 36s; barley, 28s to 36s; grinding ditto, 23s 6d to 25s; oats, English, 17s 6d to 23s 6d; rye, 27s to 29s; peas, 31s to 32s; beans, 32s to 33s; tares, 5s 6d to 6s 6d; maize, 25s 6d to 26s 6d; flour, 30s to 32s.

Colchester, Saturday.—Wheat firm, full 2s per qr advance. Oats and beans firm trade, small supply.—COLIN TAYLOR, KING AND CO., LTD.

Coventry, Friday.—Only a small attendance. Supply of wheat poor, and met a good demand at about 1s 6d per qr advance on the week. Barley maintained top prices for good lots. Oats quite scarce, and may be called 6d per qr dearer. Beans and peas sold freely at full late quotations. Quotations:—Wheat, 13s to 14s; old, 13s to 13s 6d per 186 lb; barley, 30s to 34s per 448 lb; oats, old, 24s 6d to 27s; new, 21s to 22s 6d per 352 lb; beans, 13s to 13s 9d per 196 lb; peas, 12s 6d to 14s per 196 lb.

Dorchester, Saturday.—Despite the fact of threshing operations having had to be suspended owing to unfavourable weather, and samples as a consequence coming a little less freely to hand, still, taking these circumstances into consideration, there was by no means a scarcity of any kind of grain. Holders were very firm in their demands, little disposition to do business being evinced, except at a still further advance in wheat, which ranged from 6d to 1s, and farmers even then were not particularly anxious sellers; and we must quote the market as distinctly against buyers to the extent we have quoted above for English and foreign. Barley was likewise well held, and buyers had to pay extreme values where business resulted. Oats were about the same, but maize must be quoted 3d to 6d dearer, and all other articles made more money, the rise being from 6d to 1s.

Exeter, Friday.—Good attendance, good trade. English wheat 1s dearer on the week; foreign, 2s dearer. English barley unchanged; grinding barley, 6d to 9d dearer. Maize, 6d dearer. Oats firm. Flour, 1s dearer. Quotations:—English wheat, 4s to 4s 3d; English barley, 3s 6d to 4s 6d; superfine flour, 30s to 33s; fine, 28s to 31s.

Glasgow, Wednesday.—Wheat still advancing, and prices to-day show an advance of about 3d per boll over the week. Flour very firm and 1s per sack dearer. Maize steady, at 3d per boll advance from last Wednesday. Corn firmly held and shading dearer. Barley scarce, and dear for top qualities. Oats the turn in sellers' favour for both home but foreign. Beans steady. Pease scarce and held for full rates. Bran and thirds very firm. Oatmeal held for more money. Other articles unaltered.—GIBSON AND CLARK.

Gloucester, Saturday. — English wheat 2s dearer at 34s to 37s per qr. Foreign wheat 2s dearer: Plates, 43s to 44s; Russian, 42s 6d to 45s. Maize, 1s 3d dearer; Plate and Bessarabian, 2s per qr. Grinding barley, 1s 6d dearer, at 26s 6d to 27s. Oats 6d to 1s dearer; black, 19s 6d to 20s 6d; white, 21s to 21s 6d.

Grantham, Saturday.—Fair show of new grain in all departments, and with numerous inquiries trade was decidedly brisk. Wheat advanced 1s to 2s per qr, whilst oats showed a slight upward tendency. Wheat made 37s to 38s 6d; barley, 26s to 33s; oats, 18s 6d to 21s; blue peas, up to 74s; and beans, 30s to 32s per qr.

Derby, Friday.—There was a small supply of wheat, which met with a ready sale at the extreme prices of last week. No alteration in the price of spring corn. Quotations:—Wheat, 37s to 38s; red, 35s to 37s; grinding barley, 25s to 27s; new beans, 35s to 36s; old oats, 24s to 26s; new, 20s to 21s.

Devizes, Thursday.—There was a moderate supply. Trade for all descriptions was very firm. Wheat was 6d per sack higher, old making up to 21s and new 18s per sack of 12 score 12 lb. Best old wheat, 19s to 21s; best new wheat, 17s to 18s 6d; secondary, 15s 6d to 16s 6d; malting barley, 27s to 32s; grinding barley, 24s to 26s; winter barley, 23s to 28s; old oats, 20s to 24s; winter oats, 18s to 19s; white Garton oats (330lb), 18s to 19s; black Tartar oats (320 lb), 17s to 19s; rye, 26s to 29s; new beans, 16s to 18s; fine flour, 31s to 33s; extra fine, 34s to 37s; vetches, 6s to 7s.

Doncaster, Saturday.—A moderate supply of English wheat, and a ready sale for best samples, prices being 2s per qr higher. Foreign wheat also met with a brisk demand at an advance of 2s 6d per qr on the week. Barley was very firm at an advance of 1s per qr, and made 29s to 33s. Barley is 3s to 4s dearer than it was at this time last year. Oats firm. Maize advanced 1s per qr.

Hereford, Wednesday.—A good attendance, but only moderate trade. English wheats averaged 4s 3d, with an occasional 1d more for seed qualities. Barleys met with a good demand, transactions ranging chiefly around 28s per qr; oats, 18s 6d to 19s 6d. Beans quietly steady. Maize 3d per qr dearer.

Ipswich, Tuesday.—Moderate supply of wheat; trade firm at an advance of 1s per qr. Reds, 36s to 37s; whites to 38s per 504 lb. Moderate supply of barley, trade firm for all descriptions, prices unaltered. Foreign oats rather easier. Maize steady. Beans and peas firm

Leeds, Friday. — Both English and foreign wheats were still advancing, Tuesday's closing prices being exceeded by a further rise of 6d. Owing to the arrivals of flour being below the average, and the active demand, recent advances were fully maintained, with a rising tendency. Maize was dearer, best qualities of Plate, Russian, and American making 27s. English and foreign malting barley was firmer, with a good demand. Beans, peas, and lentils all hardened.

Leicester, Saturday.—Good attendance of buyers and dealers, with fair supplies of home-grown wheats, which came to hand in rather variable condition. Trade steady at extreme quotations. Red wheats, 36s to 39s; white wheats, 38s to 40s per 36 stones; barley in variable condition, and good samples firm; fine oats in good request at 19s to 22s per 24 stones.

Lincoln, Friday.—A fair attendance and a good inquiry for English wheat, which realised an advance of 2s to 2s 6d on the week. Malting barley a quiet trade, and making full prices of last week. Oats 3d to 6d dearer. Beans unaltered.

Maidstone, Thursday.—The attendance at the market to-day was more encouraging than of late, as outdoor operations do not so much engross the attention of farmers. Wheat continues to step up in price, and 6d to 1s per qr from last week may be registered. The infection seems to spread to all other grain, the cost for which is decidedly more than recently tabulated.

Manchester, Thursday.—English wheat was about 1s 6d per qr higher. Foreign has also advanced 4½ to 5d per cental. Flour 1s to 2s per sack higher. Indian corn was very firm. Oats: Cheshire about 1½d per bushel dearer, and foreign also in sellers' favour. Beans and peas steady. Bran, &c., scarce, with a higher tendency.

Newcastle-on-Tyne, Saturday.—A strong market for wheats here to-day at 1s to 2s advance on the week. Maize also dearer at fully 6d advance since last Saturday. Beans and peas steady at full prices with a fair demand. A good demand for oats, prices in sellers' favour. Barley remains steady at last week's prices.—JOSEPH POLLARD AND CO.

Northampton, Saturday.—Improved attendance at Exchange. Wheat is still rising, and is about 1s 6d dearer on the week. Good trade was done with oats and beans, whilst barley was also in better demand. Prices: Wheat, 36s 6d to 37s; barley, 26s to 30s; white oats, 18s to 20s; black oats, 18s to 20s; beans, 28s to 30s; flour, 32s to 36s.

Norwich, Saturday.—The upward tendency in the wheat market continues. With a very small supply, farmers being unwilling sellers, wheat was 2s per qr dearer, prices being 37s to 38s per qr delivered. There was a small show of barley, and with a firm trade values remained about the same as last week, viz., 28s to 34s per qr. There was a further advance in prices in feeding stuffs upon last week. Maize was worth 29s 6d to 30s per qr; grinding barley, 26s; and oats, 19s to 21s per qr. Linseed and cotton cakes were very firm. There was a quiet demand.

Nottingham, Saturday. — Small supply of wheat to-day, good demand for everything. Wheat, 38s 6d to 39s 6d; oats, 20s to 21s; beans, 33s to 34s; barley, 27s to 32s.—Robt. Hubble

Peterborough, Saturday.—Not a large supply of wheat at market to-day, and made 1s to 2s more than last week. Oats keep quite at about late rates. Barley firm but quiet. Wheat, 36s 6d to 37s 6d. Barley, 27s to 32s. Oats, 19s to 20s. —Thomas Hill and Son.

Plymouth, Thursday.—There was a very good attendance at our market here to-day. Wheat 1s dearer. Maize and barley 9d to 1s dearer. Oats 6d dearer.—Orlando Davis and Co.

Preston, Saturday.—The upward movement in foreign wheat has continued during the week, and prices have increased 6 per cent. To-day's market was fairly well attended. Farmers are holding supplies back, evidently in anticipation of better prices. Quotations: —Wheat white, new, 15s 6d to 16s per windle of 220 lb.; red, ditto, 14s 6d to 15s; oats, old, per bushel, 3s 6d to 3s 8d; ditto new, 2s 11d to 3s; beans, per windle of 220 lb. 13s to 13s 9d.

Reading, Saturday.—There was a much improved attendance and better trade. Parcels were on offer or sold at the following prices:—Wheat, 34s to 39s; barley, 28s to 35s; oats, 18s to 22s; beans 30s to 35s; peas, 29s to 32s; rye, per 480 lb, 26s to 28s; flour, per 280 lb, 28s to 35s.

Retford, Saturday.—Attendance good, and the supply of grain largely increased. Wheat was again 1s dearer on the week, at 38s to 39s, some few samples for seed making 40s per qr. Capital demand for malting barley, and the best changed hands at 29s to 32s, and common 22s 6d per qr. All kinds of grain for feeding purposes were on the up grade. Grinding barley was worth 28s to 28s 6d. Maize was scarce, and was quoted at 28s, delivered here. Blackats, 18s to 19s; white ditto, 18s 6d to 19s 6d; old oats, 26s; new English beans, 30s; old, 36s per qr.

Ripon, Thursday. — A good attendance of farmers, with business more active. New wheat made rather more money. Malting barley shows a firmer tone. Prices:—New wheat, 35s to 37s; wheat, foreign, 40s to 42s; barley, grinding, 27s to 28s; barley, malting, 28s to 30s; new oats, 20s; old oats, 24s to 26s; maize, round, 28s; maize, flat, 28s per qr.

Sheffield, Tuesday.—With daily advances in prices of foreign wheats during the past week the market to-day is very strong, and from 1s to 2s dearer for wheats on the week. Beans, oats, and barley in sellers' favour, and about 6d per qr dearer. Maize of all descriptions very firm and unchanged prices from last Tuesday. Offals in good demand at late rates. Quotations:—Wheat, white, new, 37s to 37s 6d; ditto red, new, 37s to 37s 6d per 504 lb; oats, black, 24s to 25s; ditto white, 24s 6d to 25s; ditto new, 20s 6d to 21s per 336 lb; peas, grinding, 35s to 35s 6d; ditto blue, new, 65s to 75s per 504 lb; beans, English, 35s 6d to 37s 6d per 532 lb; barley, grinding, 27s to 27s 6d; ditto, malting, 28s to 32s per 448 lb; Indian corn, small, 27s 6d to 28s; ditto Plate, 28s to 28s 3d; ditto flat, 30s 6d to 31s per 480 lb.

Shrewsbury, Saturday.—Wheat, 15s to 16s per 225 lb; oldoats, 15s to 16s per 225 lb; new oats, 11s to 12s per 225 lb; barley, 16s to 19s per 280 lb.

Stamford, Friday.—A firm tone in the market, and an upward tendency in prices. Wheat advanced 1s to 1s 6d per qr on the week. Farmers asked 37s to 38s per qr for superior samples of wheat, other sorts, 30s to 32s 6d. Barley was also on the rise, and few of the best dealers were disposed to treat at the rates demanded. Best Barley, 32s 6d to 33s; secondary quality, 25s to 29s; grinding barley, 24s to 26s 6d; beans, 31s 6d to 32s; oats, 18s 6d to 20s; peas, maple, 70s and upwards per qr.

Warwick, Saturday.—There was a moderate attendance at this market, but very little business was transacted. Wheat, 13s 6d; oats, 22s. Feeding stuffs a shade dearer than last week. A very small supply of grain of all kinds on offer.

Winchester, Saturday.—English and foreign wheat about 2s higher on the week. Barley, 1s. Maize 9d dearer. Oats very scarce, but unaltered. Flour a steady trade at 1s advance.—Fear, Colebrook and Co., Ltd.

Wisbech, Saturday.—A small supply of grain at market. Wheat advanced fully 2s per qr. on the week. Reds, 38s to 38s 6d per 504 lb. Oats dearer, 19s 6d to 20s 3d per 336 lb. Barley in demand, from 27s 6d to 30s per 448 lb.—James Fletcher.

Wolverhampton, Wednesday.—There was a good attendance, and a fair amount of business was transacted. Quotations: English wheat, new, 15s per 216 lb; old, 16s per 216 lb; English oats, old, 15s per 196 lb; new, 12s per 196 lb; English beans, 14s per 196 lb; flat corn, 12s per 196 lb; round corn, 11s 9d per 196 lb; barley, 27s 6d to 32s per 448 lb.

Worksop, Wednesday.—Large attendance. Small show of wheat, which made about 6d per qr more money. White wheat (new), 35s 6d to 36s 6d; red ditto, 34s 6d to 35s 6d; best malting barley, 28s to 30s; secondary barley, 27s to 28s; grinding barley, 26s 6d to 27s 6d; old white oats, 24s 6d to 26s 6d; new ditto, 18s 6d to 20s 6d; old black oats, 23s 6d to 25s; new ditto, 17s 6d to 19s 6d; maize, 28s to 29s; English beans, 37s to 39s per qr.

Yeovil, Friday.—Farmers disp'ayed inclination to rush their new season's crop on the market. Trade was firm all round. English wheat advanced from 1s 6d to 2s per qr upon last week's prices, and foreign from 1s to 2s, whilst Canadian and Indian was up to 2s 6d. Barley (grinding) and maize were up 1s, and oats 6d. Best new wheat sold at from 35s to 37s per qr; secondary, 31s to 33s; malting barley, 27s to 32s; grinding, 24s to 26s; do. (imported), 26s 3d; winter barley, 26s to 28s; old oats, 20s to 24s; winter oats, 18s to 19s; Irish white, 22s to 22s 6d; Irish black, 20s to 21s; maize, 27s to 28s; rye, 26s to 29s; beans, 32s 6d to 36s; vetches, 6s to 7s per bushel. A firm trade in flour at 1s 6d per sack advance on last week, fine now selling at from 31s to 32s per sack. Offal and meal brisk, with advancing prices.

York, Saturday.—The wheat trade was somewhat excited, owing to the prospects of a scarcity, and prices ruled 1s per qr higher on the week. Fine white made 37s to 38s per qr of 36 stones. Good samples of malting barley are quite as dear, but inferior sorts sell at irregular prices; fine makes 29s to30s, good 28s to 29s, feeding 27s to2 8s perqr of 32 stones. Oats firm at 6d per qr advance, 1ss to 20s per qr of 24 stones; rye, 27s; old beans 34s per qr of 36 stones.

FEEDING STUFFS.

Mark Lane, Monday.—Linseed Cake: With decreasing stocks of foreign and continued light shipments, values of all descriptions are inclined to harden, in spite of a very poor demand. Russians remain scarce and dear at £7 7s. 6d. to £7 8s. 9d. in mats, and £7 10s. to £7 12s 6d. in bags. East India seed pures have been sold at £7 7s. 6d. to £7 10s. ex ship. Fine seedy Calcuttas £7 10s. to £7 12s. 6d. London-made meet a dragging trade, although temptingly offered at £7 12s. 6d. to £7 15s. Cotton Cakes.—A fair business is passing, especially in Egyptian, which are relatively cheaply quoted at £4 17s. 6d. to £4 18s. 9d. English remain quiet at £5 to £5 2s. 6d. Decorticated.—London-made pures find a ready sale £7 10s. cake and meal, and £5 5s. for special digestive meal, while American brands are quiet at £7 2s. 6d. to £7 5s. Rape cakes steady. East India, £5 5s. Ravison none. Maize germ meal.—White American does not offer, but English makes are obtainable in limited quantity at £6 12s. 6d. to £6 15s. Maize gluten meal is in good request at £6 15s. Rice meal.—Landed lots of Rangoon have all been cleared, but some second-hand parcels for shipment have changed hands at £5 5s. ex ship terms. Locust beans are without change £5 10s. for whole and £5 15s. for kibbled. Dried brewers' grains make rather more money at £5 10s. for ale, and £5 5s. for porter. Nitrate of soda is unaltered at £11 2s. 6d. ex quay.

—Pinnock Bros., 30, Mark Lane, E.C.

Liverpool, Friday.—Nitrate of soda is with out change, demand quiet. For fertilisers for autumn application there are inquiries and values are firm. The colder weather is inducing more inquiry for feeding stuffs, but there is only a small trade doing with needy buyers, yet values all round are well upheld and point to further improvements as not unlikely. Feeding treacle is cheap and in fairly active demand.

WOOL.

London, Saturday.—English—per pk. of 240 lb.—Fleeces, South Down hoggs, £13 15s to £14 5s; half-bred hoggs, £13 to £13 10s; ditto wethers, £12 10s to £13; Kent fleeces, £12 5s to £12 10s; South Down ewes and wethers, £13 10s to £14; Leicester ewes and wethers, £12 to £12 10s. Colonial—per lb.—Vic., scoured super., 2s 3d to 2s 4d; scoured, good, 2s to 2s 2d; scoured, average, 1s 10½d to 1s 11½d; greasy, average to fair, 1s 2½d to 1s 3½d; N.S.W., scoured, average, 1s 10½d to 1s 11½d; greasy, average, 1s 1d. to 1s 2d; S. Aus., greasy, average, 11d to 1s; N.Z., scoured, average, 1s 11d to 2s; greasy, average, 1s to 1s 1d; Cape, scoured, super., 1s 10d to 1s 11d; fleece, average, 9½d to 10½d; greasy, average, 8½d to 9½d; Natal, scoured, 1s 6d to 1s 7d; greasy average, 8½d to 9d. Crossbreds — grs.—Vic., good to super., 1s 3½d to 1s 4½d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s to 1s 1d; coarse, 10d to 11d.

Canterbury, Saturday. — Farmers are still holding out for 1s per lb for Kent fleeces, and as staplers decline to give this, the deadlock continues.

Halifax, Saturday.—There is a quieter tone about the market as consumers of raw materials are indisposed to follow the recent rise in London. For English and Irish wools business is very slow —hand to mouth—and there is no change in values to record. Merino tops are quoted at the recent full advance, which checks demand.

POULTRY AND GAME.

Smithfield, Saturday.—Fair supplies, moderate demand. Geese, 5s 6d to 7s; country ducks, 2s 6d to 3s 3d; wild ducks, 1s 4d to 1s 6d; Surrey fowls, 2s 9d to 3s 6d; Sussex fowls, 2s 9d to 3s 3d; Lincolnshire fowls, 2s to 3s; Essex fowls, 1s 8d to 2s 3d; Irish fowls, 1s 6d to 2s; quails, 8d to 1s; Bordeaux pigeons, 10d to 1s 1d; feathered pigeons, 8d to 9d; English hares, 2s 3d to 3s 9d; Scottish hares, 1s 4d to 1s 6d; tame rabbits, 1s 2d to 1s 6d; wild rabbits, 6d to 9d; live hens, 1s 6d to 1s 9d each; Australian rabbits, 5s to 6s 9d per dozen; pheasants, 7s to 8s; young grouse, 6s 6d to 7s 6d; old, 3s; young partridges, 3s 6d to 4s; old, 1s 9d to 2s; black game, 3s to 3s 6d per brace.

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, Monday, 3 P.M.

Prices to-day reached a higher position from a week ago. All sorts of wheat made fully 1s. more money, and 2s. advance was demanded in many cases. Barley was in improved supply, and some good English was offered at 37s. per qr. There was also a good supply of bold poultry barley. The "cheaper" foreign sorts are no longer cheap, but fancy prices have to be given in order to fulfil contracts.

For oats, values were 6d to 1s dearer in the case of English, but foreign types were hard to sell at 3d advance; they are, in fact, too dear. Maize was 1s up on the week, and nothing as a rule was parted with under 28s per qr. Beans were fully 6d, peas fully 1s dearer. For prompt delivery peas were very dear, as the supply on spot is unequal to the immediate demand. Dari, millet, sorgum, and rye were 1s up on the week.

THE FLOUR TRADE.

MARK LANE, Monday, 3 P.M.

The rise of 1s in the price is accompanied by an equal advance in town whites, in town households, in whole meal, in country flour, and in American flour. There is no advance in Hungarian, but a small trade passes at 37s net. Australian sorts are scarse; Argentine are not obtainable; Belgian and French are selling fairly well, at prices quoted.

All sorts of middlings, milling offals, and meal may be quoted about 6d per sack dearer on the week. For fine Midlothian oatmeal 40s 6d per sack is paid, but Irish is obtainable at 28s per 240 lb sack—40 lb less to the sack than the good Scotch. Indian corn meal at 14s 6d per 240 lb sack is in request.

CLOSE OF THE MARKET.

PRICES WERE ADVANCED IN MANY CASES 1s. ABOVE THE PRICES PREVAILING UP TO 1.30 p.m., BUT THIS WAS REGARDED AS TAKING VALUES TO THE TOP OF THE MARKET. FOREIGN AS WELL AS BRITISH SUPPLIES ARE POURING IN AT THE ENHANCED RATES, AND BUYERS EXPECT THEIR INNINGS BEFORE OCTOBER IS OUT.

THE BALTIC.

Monday, 1 P.M.

State of Trade.

There is a rather general feeling that advance in wheat and maize has culminated. If, however, the Australian drought continues, the situation may be again strengthened for wheat. Barley and oat cargoes are now held above buyers' ideas. Linseed is 6d. dearer to-day for all futures, and cotton-seed cargoes have regained 1s. 3d. off their 10s. pes ton decline of last week!

Business Done.

Wheat.—Argentine, 40s per 480 lb, January shipment of new crop; Australian, 44s 6d per 480 lb, January shipment of new crop; Manitoba, 44s 3d per 480 lb, November shipment of new crop; Californian, 43s per 500 lb, November shipment of new crop.

Maize.—Argentine, 28s per 480 lb, November shipment of 1907 crop; American, 26s 9d per 480 lb, January shipment of 1907 crop; Odessa, 29s per 480 lb, November shipment of 1906 crop; Odessa, 27s per 480 lb, January shipment of 1907 crop.

Barley.—Persian, 24s 3d per 400 lb, November shipment of 1907 crop.

Oats.—Koingsbury, 20s 6d per 320 lb, November shipment of 1907.

Linseed.—Petersburg, 45s per 416 lb., November shipment of 1907 crop; Argentine, 46s 3d per 416 lb, arrived cargo.

Rapseed.—Ferozepore, 57s 6d per 416 lb, on passage.

Sesame.—Indian, 70s per 384 lb, on passage; Indian, 63s per 384 lb, December shipment; Indian, 62s per 384 lb, January shipment.

Cottonseed, Egyptian, £7 6s 3d per 2,240 lb., due.

TERM MARKET.

The market in futures has been very animated, and considerable quantities of wheat and maize have changed hands. The prices which are ruling this day (Monday) are about as follows:—

American Red Winter wheat	8s. 8d. Dec.	delivery.
,, ,, ,,	8s. 9d. Mar.	,,
,, ,, ,,	8s. 8d. May	,,
American Mixed Maize	5s. 11d. Nov.	,,
,, ,, ,,	5s. 9d. Jan.	,,
,, ,, ,,	5s. 7d. Mar.	,,
Argentine yellow ,,	5s. 7d. Nov.	,,
Odessa round ,,	5s. 9d.	,,
African white ,,	6s. 0d.	,,
Cinquantine small ,,	6s. 0d.	,,

All these prices are per cent. (100 lb.) and allrelate to transactions of not less than 5,000 cental tals (say 1,000 qr.). Small deals are not received at the Term Market but aae done at the Baltic if of fair dimensions, and if really small at Mark Lane.

GRAIN AND FLOUR FACTORS REPORTS.

Flour.—Demand steady, and prices fully 1s per sack higher. Quotations for forward delivery range from 1s to 1s 6d per sack advance upon those of last week.—Greenhill Bros. (Belfast).

Offals.—Demand for bran not quite so active; no change to report in prices.—Greenhill Bros. (Belfast).

Flour.—Prices have further advanced 1s. per sack on the week. Grain.—There has been a better demand for round and flat corn, with steadily advancing prices. Oats run after at 3d. to 6d. per boll advance. Grinding beans are dearer. Pease very scarce, and dearer. Oatmeal in sellers' favour. Oilcake more asked for. Mill Stuffs.—in brisk request. winter wheat patents, 31s to 31s 6d per 280 lb; spring wheat patents, 32s to 34s per 280 lb; American corn, 16s 9d to 17s per 280 lb; round corn, 16s 3d to 16s 6d per 280 lb; grinding beans, 18s 9d to 19s per 280 lb; white pease, 21s 6d to 22s per 280 lb; broad bran, 115s per ton; medium bran, 107s 6d per ton; fine thirds, 135s per ton; common thirds, 115s per ton; American oilcake, 147s 6d to 150s per ton.—McKinnon and McDonald (Glasgow).

Flour.—Trade to-day has been very firm, with a fair demand for flour in all positions. Prices are somewhat irregular at an advance of about 1s 6d to 2s on the week.—T. S. Medill and Sons, Ltd.

Milling offals.—Everything remains very scarce, and prices are again 2s 6d to 5s per ton dearer, with a good demand—John Bawcomb and Co.

Arrivals of wheat are moderate. Trade continues to be active, and prices are 1s 6d to 2s higher than last Honday. Flour is 1s per sack higher. Maize is 1s and barley 6d to 1s per qr dearer. Oats in moderate demand at full prices. —Coventry, Sheppard, and Co.

PROVISIONS.

London, Monday.—Bacon: The arrivals of bacon last week were:—From Ireland, 3,100 bales, and from foreign ports, 12,520 bales. There was a firm market for bacon throughout the week. Quotations ranged:—Irish, 57s to 60s up to 62s; Danish 55s to 60s up to 62s; Canadian, 54s to 56s up to 59s. Butter: There was a good demand for all butters with the exception of of Danish, which was quiet. French, 104s to 116s; Danish, 118s to 120s; Russian, 88s to 100s; Irish, 90s to 118s; Victorian, 94s to 116s; New South Wales, 98s to 114s; Qucensland, 94s to 112s; New Zealand, 104s to 116s. Lard.—The lard market was steady, American in strong demand. Irish, 50s to 58s; Danish, 48s to 50s; American, 47s to 48s 9d.

HAY AND STRAW.

Birmingham, Friday.—Fair supply; trade quiet. Quotations:—Hay, £3 5s to £4 per ton; straw, on quotations.

Derby, Friday.—Best old clover, 90s to 100s; new, 80s to 90s; hay, best old, 90s to 100s; new, 80s to 90s; seconds, 65s to 70s; straw—wheat, 60s to 70s; pressed, 50s to 60s; chop, 55s to 65s; peat moss, 35s to 40s.

Hereford, Wednesday. — Very dull trade, without quotable change in last week's values—viz., straw 20s to 25s per ton in bulk, hay 50s to 60s per ton in stack.

Lancaster, Saturday.—Meadow hay, 6d; clover ditto, 6½d to 7d; wheat straw, 4d; oat straw, 4d per stone.

Lincoln, Friday.—A good show of hay and straw and an average trade. Best hay, 55s to 60s; inferior ditto, 45s to 55s; best clover, 55s to 60s; secondary ditto, 45s to 50s; straw, 30s per ton on the ground.

Manchester, Friday.—Hay, new, 4d to 5d; clover, new, 5½d to 6½d; straw, wheat, 3½d; oat, 3d per stone.

Whitechapel, Saturday.—Lighter supplies were in fair request at recent levels. Best clover, 84s to 95s; inferior ditto, 72s to 80s; specially picked hay, 85s; good ditto, 68s to 78s; inferior ditto, 55s to 63s; mixture and sainfoin, 70s to 82s 6d; straw, 28s to 33s per load.

POTATOES.

Borough, Saturday.—Good supplies received steady support. Epicures, 65s; British Queens, 70s to 80s; Blacklands, 65s to 70s; Up-to-Dates, 80s; Sharp's Express, 80s per ton; French, 3s 3d Dutch, 3s to 3s 3d per bag.

Manchester, Saturday.—Potatoes: Yorkshire, 10s; Cheshire, 6s to 7s; Lincoln, 9s to 10s per 18st; Bedford, 4s to 5s per cwt.

Preston, Saturday.—Potatoes: 8s to 9s per load of 240 lb.

Retford, Saturday.—Market well supplied. Best lots home-grown made 7s to 8s per load, and secondary qualities 5s 6d to 6s per load.

Spitalfields, Saturday.—Good supplies were in quiet request. Epicures, 65s; Blacklands, 70s; British Queens, 70s to 80s; Sharp's Express, 80s per ton; French, 3s 3d; Dutch, 3s 3d per bag.

Worksop, Wednesday. — Plentiful supply, with trade slow, but samples making 7s 6d to 8s per load of 18 stones.

York, Saturday.—Owing to the commencement of "pieing," prices were a little higher, ranging from 69s to 67s 6d per ton.

BUTTER.

(Price per lb.)

Altrincham: 1s 2d to 1s 3d. Appleby: 11d to 1s 1d. Barnstaple: 1s to 1s 2d. Berwick: 1s. Birmingham: 1s 2d to 1s 3d. Camelford: 1s, Carlisle: 1s 2d. Chester: 1s 2d.. Dartmouth: 1s to 1s 3d. Lancaster: 1s 2d to 1s 3½d. Lincoln: 1s to 1s 2d. Market Drayton: 1s 2d to 1s 3d Otley: 1s 7d per 24 oz roll. Penrith: 11½d to 1s 2d. Penzance: 10d to 1s 2d. Preston: 1s 3d. Retford: 1s 2d to 1s 3d. Ripon: 1s 7d to 1s 8d per 24 oz roll. Scarborough: 1s 3d. Shrewsbury: 1s 1d to 1s 2½. Spalding: 1s. Stockport: 1s 2d to 1s 3d. Stockton: 1s to 1s 2d. Totnes: 1s 1d to 1s 2½. Truro: 11d to 1s. Worcester: 11d to 1s 3d. Worksop: 1s 2d to 1s 3d.

EGGS.

(Number per 1s.)

Altrincham: 6. Appleby: 7 and 8. Barnstaple: 8. Berwick: 1s 4d to 1s 5d doz. Birmingham: 7 and 8. Camelford: 10. Carlisle: 7 and 8. Chester: 8. Dartmouth: 1s 2d to 1s 4d per doz. Derby: 7 and 8. Devizes: 9 and 10. Doncaster: 10 and 11. Dorchester: 1s 4d to 1s 6½d per doz. Evesham: 1s 4d to 1s 4½d per doz. Hereford: 9 to 11. Ipswich: 9 and 10. Kidderminster: 10 and 11. Lancaster: 6 and 7. Lincoln: 10 and 11. Market Drayton: 8 and 9. Otley: 10 and 11. Penrith: 8 and 9. Penzance: 1s 3d to 1s 4d per doz. Preston: 7. Retford: 2s 3d to 2s 4d per score. Ripon: 8 and 9. Scarborough: 9. Shrewsbury: 8 and 9. Spalding: 10. Stockport: 6 and 7. Stockton: 7 and 8. Totnes: 1s 4d to 1s 5d per doz. Truro: 1s to 1s 1d per dozen. Worcester: 8. Worksop: 2s 4d to 2s 6d per score.

HOPS.

Borough, Monday.—The Mid and East Kent growths are now being opened, and the fine lots taken freely at current rates, whilst the medium also find buyers at relative values. Choice Weald of Kent Fuggles are in good demand and command full rates, brown samples are taken at comparative values.—W. H. and H. Le May.

TO-DAY'S MARKETS.

CATTLE.

Metropolitan Market, Islington.

	Monday, Oct. 14, 1907. British.	Total.	Monday, Oct. 15, 1906.
Beasts	1,050	1,050	960
Sheep and Lambs	4,210	4,210	4,530
Calves	20	20	10
Pigs	—	—	—
Milch Cows	50	50	40

Quotations per 8 lb. (sinking the offal).

ENGLISH.

	Inferior. s. d.	Second. s. d.	First. s. d.
Beasts	2 4	3 6	4 8
Sheep	4 8	5 6	6 0
Lambs	—	6 0	6 8
Calves	3 10	4 10	5 4
Pigs	—	—	—

Milch cows, per head, £16 to £23 10s.

British arrivals include as follows:—Scotland, 10; Eastern Counties, 60; Midland, Home, and Western Counties, 861; Devon, 30; Ireland, 89.

We note to-day a decrease of 20 head in the number of beasts offered for sale compared with Monday last. The supply included a few Scotch and Devons, the former of which commanded our top quotations. For both prime and second quality fat beasts trade ruled of a brisker nature, with an upward tendency in regard to value, but hardly sufficient to warrant our quoting any higher rates, except in the case of Lincoln Shorthorns. The Irish arrivals consisted of 57 Dublins and 32 Waterfords. These shared in the better trade experienced; however, no advance on late values is noticeable. Fat cows and bulls met with a very limited demand, sellers being obliged to accept a decline on late rates to effect sales. There is every prospect of a clearance being effected in this part of the market.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day. s d	s d	Monday, Oct. 15, 1906. s d	s d
Scotch	4 6 to 4 8	...	—	—
Devons	4 4 to 4 6	...	—	—
Herefords	4 4 to 4 6	...	4 4 to 4 6	
Norfolks	—	—	—	—
Runts	4 2 to 4 4	...	4 4 to 4 6	
Lincolns	4 0 to 4 2	...	3 8 to 3 10	
Irish	4 2 to 4 4	...	3 8 to 3 10	
Canadian	—	—	—	—
Fat cows	3 4 ex 3 6	...	3 2 ex 3 6	

There was a decrease of 530 in the number of sheep and lambs penned compared with Monday last. For both wethers and ewes a slow but steady trade was experienced, late values being easily maintained. Irish descriptions were in smaller supply, and met with more inquiry, consequently sellers were able both to ask and obtain an advance of 2d per 8 lb. Scotch sheep were in average supply, all sales of which were governed by late currencies. A few choice small lambs were offered for sale and cleared early at late rates. The supply included 200 Scotch, 950 Irish, and 243 from the Eastern Counties. A clearance is not expected to be made in this part of the market.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

	To-day. s. d.	s. d.	Monday, Oct. 15, 1906. s. d.	s. d.
8 st Scotch	5 10 to 6	0	6	0 to 6 2
7½ to 8 st Downs	5 10 to 6	0	6	0 to 6 2
9 st. Downs	5 8 to 5	10	5	10 to 6 0
10 st Halfbreds	5 4 to 5	6	5	8 to 5 10
10 st Yorkshires	—		—	
12st Lincolns	—		—	
10 st Irish	5 6 to 5	8	5	2 to 5 4
10 st Down Ewes	4 0 to 4	2	4	4 to 4 6
11 st Halfbred ditto	3 10 to 4	0	—	
5 st Down Lambs	6 6 to 6	8	—	
6 st Halfbred ditto	—		—	

The calf trade ruled of a slow, but steady nature, the best on offer being quoted at from 5s to 5s 4d per 8 lb. (offal given in).

No pigs on the market.

London (Central), Monday.—Trade quiet, offerings liberal. Beef, English, 3s 8d to 3s 10d; Scotch, 4s 2d to 4s 10d; American, 3s 4d to 3s 9d; refrigerated hindquarters, 4s 2d to 4s 10d. Mutton, English wethers, 4s to 4s 6d; ewes, 3s to 3s 4d. Lambs, 4s 4d to 5s; Scotch tegs and wethers, 4s 8d to 5s; ewes, 3s 2d to 3s 6d. Veal, 3s 4d to 4s 4d. Pork, 3s 8d to 4s 4d per stone.

St. Ives (Hunts) Monday.—Fat cattle fair, a good trade; good demand. Fat and store sheep and pigs a good trade; milch cows in good demand. Prices: Beef, 7s to 7s 6d; mutton, 8s 2d to 10s 6d; lamb, 9d to 10d; pork, 6s 3d to 7s; milch cows, £14 to £22. Beasts, 906; sheep and lambs, 1,185; pigs, 573.

FOREIGN.

Deptford, Monday.—Beasts, 352 To-day's supply, compared with Monday last showed a decrease of 498 head, and consisted of 158 from the United States and 194 from Canada, these latter consisting entirely of ranch cattle. Trade ruled of a slow nature partly due to the fact that the consignments from the former country were of very inferior quality. Besides the above 700 Canadians were withheld from sale. The best States on offer were quoted at from 4s 1d to 4s 3d; seconds, 3s 10d to 4s; Canadian Ranchers, 3s 4d to 3s 6d per per 8 lb(offal given in). On Saturday 1,468 beasts from the United States and 200 from Canada were offered for sale, and met with a firm and steady trade, notwithstanding the fact that the States consignment were only middling quality cattle. The best States on offer were quoted at from 4s 3s to 4s 5d; seconds, 4s 1d to 4s 3d; Canadians, 4s to 4s 2d; seconds, 3s 10d to 4s per 8 lb (offal given in).

Liverpool, Monday.—The supply of cattle was larger, demand good, and prices for best qualities rather better; other sorts unchanged. Larger sheep supply, and for finished quality trade started better at a shade more money, though demand was not sustained. Last week's prices, however, governed most transactions; rough classes no better. Quotations:—Beef, 6½d to 4½d per lb; mutton, 9d to 6½d per lb. At market 1,414 cattle and 8,492 sheep.

FEEDING STUFFS.

Mark Lane, Monday.—Linseed Cake.—The demand is poor, but no indication of any weakening in prices for either foreign or London made. Cotton Cake.—There is rather more enquiry, Egyptian and home made keep firm at last quotations. Decorticated Cotton Cake and Meal.—Demand for spot rules quiet, and very little business passing for forward delivery owing to prohibitive prices asked. Linseed.—A strong inquiry market, 1s. 6d. per qr. advance.

SEEDS.

Mark Lane, Monday.—There is still a sowing demand. Trifolium appears well cleared up. Rape firm. Mustard unchanged. Rye in good demand at the high prices ruling. Winter tares selling in buyer's favour. Seed wheats in active demand at rising prices. Peas good inquiry, but backward supply. English trefoil, Alsike, white and red clover all very firm, with good business passing In grasses a brisk trade in both Perennials and Italians, prices strong.—John Picard and Co.

WET AND DRIED GRAINS.

Mark Lane, Monday.—Wet Grains: Business has been done during the week at prices between 16s 6d and 18s 6d ale, and 3s less for porter per ton on rail, London. Dried Grains.—Prices at home continue steady, lacking any upward tendency owing to slackness of Continental demand, 100s ale and 95s mixed are being paid ex factory, in buyers' bags. At these prices same compare favourably with millers' offals. American cane treacle, 90s per ton; and kiln-dried seadamaged wheat from 21s per qr.—Hamlyn and Co., 37 and 38, Mark Lane.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

At the Islington Cattle Market during the week, with a rather larger supply, mostly consisting of consignments from the Midland and Home counties, trade ruled of a slow nature; however, transactions were in favour of the seller for all descriptions of English fat cattle, in some cases an advance of 2d. per 8 lb. being both asked and obtained. The Irish arrivals consisted of 31 Dublins and 30 Waterfords (no stores being included in this week's consignments); these also ruled slightly firmer in regard to value. On both market days fat butchering cows and bulls were slow of sale, late rates governing all transactions of the former whilst the latter showed a slight decline.

At the Foreign Cattle Market, Deptford, markets were held on Monday and Saturday, and with a fair average supply, trade ruled of a firm and steady nature, notwithstanding the fact that Saturday's consignment from the United States consisted only of middling quality cattle. The total number on offer at both markets was 3,658, as against 3,483 during the preceding week, consisting of 1,140 British (increase 110) and 2,518 foreign (decrease 65), these latter comprising 2,170 from the United States and 348 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal):—80 to 90 stone Devons, [4s. 4d. to 4s. 6d.; 90 to 95 stone Herefords, 4s. 4d. ex 4s. 6d.; 95 stone Runts, 4s. 2d. ex 4s. 4d.; 100 stone Shorthorns, 3s. 10d. to 4s.; 95 stone Irish, 4s. 2d. to 4s. 4d.; 90 stone States, 4s. 2d. to 4s. 4d.; 95 stone Canadian, 4s. to 4s. 2d.; 90 stone fat cows, 3s. 4d to 3s. 6d.

The sheep trade, as usual of late, was confined to the Islington market, and opened on Monday of a slow nature, but firm in regard to value, both for wethers and ewes. Scotch descriptions numbered precisely the same as on the previous week, all sales of which were governed by late currencies. Irish sheep were in larger numbers, and experienced a slightly better trade, rates favouring the seller to the extent of 2d. per 8 lb. No lambs were included in this week's consignments, the season for which is now over. On Thursday all sales were governed by late currencies. The total number penned was 4,950, as against 5,750 during the previous week (this showing a decrease of 800). Best pens made per 8 lb. as follows (sinking the offal):—7½ to 8 stone Downs, 5s. 10d. to 6s.; 8 stone Scotch, 5s. 10d. to 6s.; 9 stone Downs, 5s. 8d. to 5s. 10d.; 10 stone Irish, 5s. 4d. ex 5s. 6d.; 10 stone Downs, 5s. 6d. to 5s. 8d.; 10 stone halfbreds, 5s. 4d. to 5s. 6d.; 10 stone Down ewes, 4s. to 4s. 2d.

Calves numbered forty five, and met with a slow but steady trade at an advance in value. The best on offer were quoted at from 5s. to 5s. 4d. per 8 lb. (sinking the offal).

Trade in the West.

The rain which has come so opportunely has already had a beneficial effect in stimulating business in all kinds of store stock, which flagged somewhat for a time as regards cattle whilst the drought was at its height. Now that this is once more at an end and stockowners are assured of a good bite of grass until the frost sets in, a more speculative spirit pervades business, and dealers show much greater disposition to buy at enhanced values than they were inclined to do whilst the keep prospects seemed involved in so much uncertainty. The most striking rise that has taken place since our last report has been in the price of dairy stock, both heifers and cows with calves, as well as in-calvers of early season, which have jumped up from £1 to nearly £3 per head in about a week, this being due very largely to the demand there is just at present for milchers of a useful class for town dairies, where many are wanted to fill the places of those already weeded out or in course of being so before the winter season sets in. Although milchers have been selling very well all along, the prices hitherto ruling fall considerably below those now being realised either for heifers or for cows, the former being readily bought up at from £17 or £18 apiece up to £23, and the latter from £15 to £18, whilst heifers coming into early profit make £9 10s. up to £14 or £15 according to season.

Store sheep continue to realise very high prices—Dorset Horns especially, as another paragraph details—and whilst the supplies keep as short as they have been at all the principal fairs and markets during the past week, there seems very little likelihood of any decline in values, and, despite the fact of many of those now being drafted out consisting mainly of "culls," they command almost if not quite as much money as the bettermost drafts sold earlier in the season. Good flock ewes, as now selling, may be quoted from 52s. to 62s. for Downs; grazing ewes, 38s. to 43s.; chilver lambs, 40s. to 48s.; wether lambs, 38s. to 56s. (for high-condition lots); and mixed lambs 37s. to 44s. Despite the lateness of the season, sheep are even dearer now than they were a fortnight since, and the demand is still equally as good. Horns have made up to 110s. each, and 165s. in another, and horn comes to 58s.

Respecting fat stock sales we scarcely consider the beef trade as good as it was, though the decline in value, so far, is only to an almost infinitesimal extent, and it is the plainer kinds that is affected more than better class grades, the choicest heifers and steers still command 11s. to 12s. per score (or up to £22 or just over for steers), but cows cannot be quoted higher than 10s. to 10s. 6d., and rough contract beasts 8s. 6d. to 9s. 6d. Mutton rules fairly steady as regards price, but sales are not particularly brisk. We may quote the best fat sheep as making from 46s. up to 58s., and occasionly 60s. for very heavy weights (or from 7½d. to 8½d. per lb.); coarse, heavy old ewes making ½d. to 1d. per lb. less than the values quoted. Choice wether tegs make from 51s. to 61s. apiece (or 9½d. to 10d.), and seconds 32s. to 48s. (or 9d.). Fat calves command fully late currencies up to 9d. per lb., and pigs, porkers in particular, still sell up to 10s. 9d., or 11s. per score for all the neater weights, and 9s. 6d. to 10s. for baconers. Business all round keeps fairly healthy and free from anything like a "slump" in any one particular branch.

Trade in Scotland.

The number of fat cattle on offer has been over an average. Trade has been just the turn quieter, at prices slightly under those ruling last week. The best class of fat cows sold fairly well, while bulls were without change. There was a large number of sheep and lambs on offer. Trade was steady, and as nearly as possible the prices of the previous week have been obtained, with the exception of ewes, which, being scarcer, made quite 2s. a head more money. Fat calves exceedingly dear, while pigs continue to sell at full prices. There was a very small supply of store cattle in Edinburgh, the bulk of them being held over till Linton Fair. A clearance was effected at prices quite as high as last week. There was a small show of store sheep, and mostly of a very secondary description. Anything good got fairly well sold, but a considerable number of the rougher classes were left over. A small show of milch cows met a stiff trade. Quotations:—Top price of cattle per live cwt., 37s. 7d.; current, 34s. to 35s. 6d.; mutton, 6d. to 9½d. per lb.—John Swan and Sons, Ltd.

Trade in Ireland

Dublin market on Thursday last showed an increase of over 100 head of cattle and a decrease of some 650 sheep, the numbers being 4,370 beasts and 6,851 sheep. Trade seemed inclined to be better in the early morning, but any improvement was spoiled by sellers standing out for better prices, which buyers refused to give. Eventually, however, prices became better, and something better figures were given for second quality, especially bullocks. Prices for "blacks" and for Herefords of best quality ranged from 30s. 6d. to 31s. 6d. per cwt. (dead weight), and 27s. and 28s. per cwt. for coarser animals. The live weight price for best beef ranged from 52s. to 54s. for best beef, to 56s. per cwt. for extra quality; second quality, 47s. to 50s.; and inferior quality, 44s. to 46s. per cwt. A good all-round clearance was made at these prices.

In the sheep department there was a better demand than the previous market. There was no quotable improvement in the price for best home trade mutton, best hoggets for the English markets were from 1s. to 2s. per cwt. better. A good clearance was made at an early hour. Lambs did not make much of a feature in the market. Prime wether mutton was worth from 7½d. to 8d. per lb.; good ewes, 6½d. to 7d. per lb.; and inferior mutton from 5d. to 6d. Small to medium hoggets sold at from 36s. to 56s. each, and large heavy hoggets brought from 50s. to 60s. each.

Best fed veal was inquired for, but coarse veal was hard to dispose of. Best veal sold at 7d. to 8d. per lb., and coarse veal from 4½d. per lb. upwards according to quality.

The Dublin pig market was fairly well supplied, and trade was much better, the depression of the former week's market seeming to have passed off. Choice heavy pigs for shipping sold well at a recovery of at least 2s. per cwt. Choice light weight pigs made from 48s. to 50s. per cwt., and coarse pigs from 36s. to 38s per cwt.

LONDON.

Central Market, Friday.—Good supplies, and trade very slow. Best beef firm, but mutton lower. Quotations:—English beef, 3s 6d to 3s 10d; Scotch sides, 4s to 4s 2d; shorts, 4s 4d to 4s 10d; Deptford and Liverpool killed, 3s 6d to 3s 10d; refrigerated hindquarters, best, 4s 4d to 4s 8d; ditto seconds, 3s 8d to 4s; ditto forequarters, 2s 4d to 2s 8d; inferior beef, 2s 2d to 2s 8d; mutton, Scotch wethers, 4s 8d to 5s; ditto tegs, 4s 8d to 5s; ditto ewes, 3s 4d to 3s 6d; English wethers, 4s 4d to 4s 8d; ditto ewes, 3s 2d to 3s 6d; Dutch sheep, 4s to 4s 4d; English lamb, 4s 4d to 5s; veal, 3s 8d to 4s 8d; English pork, 3s 8d to 4s 4d; Dutch ditto, 3s 8d to 4s 2d per 8 lb.

Islington, Thursday.—Supply of beasts compared with Thursday last, consisted entirely of fat butchering cows and bulls, which met a very slow trade. Top value fat cows 3s 4d to 3s 6d, fat bulls 2s 9d to 3s per 8 lb. Decrease of 280 in number penned in sheep market compared with Thursday last. Trade for both wethers and ewes ruled dull and dragging, though sellers were not willing to accept any further decline in value. Best pens made per 8 lb as follows:—7½ to 8 stone Downs, 5s 10d to 6s; 9 stone ditto, 5s 8d to 5s 10d; 10 stone ditto, 5s 6d to 5s 8d; 10 stone half-breds, 5s 4d to 5s 6d; 10 stone Down ewes, 4s to 4s 2d. Calf trade ruled dull but steady. Quotations per 8 lb, sinking the offal:—Beasts, 2s 9d to 3s 6d; sheep, 4s to 6s; best calves, 5s 2d to 5s 4d.

COUNTRY.

Ashford, Tuesday.—Beef sold fairly well at last week's rates, best steers and heifers making 4s 4d to 4s 8d. Mutton was a slow trade, and prices for all but the best declined slightly, Down wethers making up to 5s 10d, and next Kents to 5s 8d. Veal and pork quiet. Several rams sold.

Aylesbury, Wednesday.—Small supply of sheep and lambs, only 470 being penned, and these met a steady trade. Beasts were numerous, numbering 170, and with the exception of a few choice quality animals, the dhmand was slow.

Barwick, Saturday.—Attendance of farmers and buyers fair, and trade better. Calves, £5 10s to £6 15s; heifers, £8; stirks, £8 10s to £11 10s; two-year-olds, £13 10s; Shorthorn bulls, £12 10s.

Birmingham, Thursday.—Small supply of beasts, sheep, and pigs; fair trade for pigs, but slow for beasts and sheep. Quotations:—Beef, 5d to 6½d per lb; mutton, 6½d to 8½d per lb; lamb, 8½d to 9d per lb; bacon pigs, 9s to 9s 2d per score; cutting pigs, 9s 6d per score; sows, 7s 3d to 7s 4d per score.

Bristol, Thursday.—Fat cattle were rather less numerous, and with small inquiry trade was dull, best qualities being quoted at 58s per cwt., against 58s to 60s last week. About the usual number of sheep, but demand not brisk, and business quiet at late rates. Pigs were again scarce and values unchanged.

Calne, Friday.—Prices of pigs:—In lots of not less than ten, on rail within [illegible] miles, 1s. per pig extra for delivery by road. Prime stores, 6 sc. 10 lb to 8 sc. 10 lbs, 9s 0d per score, 8 sc. 11 lb to 9 sc. 10 lb,, 8s 6d per score; 9 sc. 11 lb to 10 sc. 10 lb, 8s 0d. Pigs outside these limits at their value.—C. and T. Harris and Co., Ltd.

Canterbury, Saturday.—A considerable offering of sheep, the best of which met a good demand, though second quality dropped considerably. A few of the best ewe tegs made up to 31s, but a more general range was from about 36s to 45s. Good lambs were making from 28s to 34s, and old ewes from 29s 6d to 40s. A number of ram tegs changed hads at from £4 to £5 per head. Very little trade for horned stock.

Carlisle, Saturday.—Fair attendance of buyers, and a steady demand was experienced. Small

wintering heifers made £6 10s, and stall-feeding cattle up to £16 each.

Chester, Thursday.—There was a large and useful selection of store and dairy cattle, with a good attendance of buyers. A satisfactory trade was done in most classes. Quotations were well maintained throughout. The sheep pens were filled, mostly with wethers and lambs. The prices demanded were occasionally too high for intending purchasers. Quotations:—Milch cows, £17 to £23; calves, £16 to £20; barren cattle, £9 to £13; stirks, £6 to £10; lambs, 18s to 26s; and shdep, 21s to 40s each.

Chichester, Wednesday.—There was a capital attendance, and a brisk demand prevailed for both fat and store sheep and lambs, and late prices were fully upheld. The best finished fat cattle met a firm sale, and fresh-calved cows and heifers and down-calvers met a remarkably good sale, all being sold. There was a fair inquiry for well-bred store cattle and forward condition beasts, but young stock and inferior bred cattle sold slowly. Quotations: — Devon steers, 4s 6d to 4s 10d; Shorthorn steers, 4s 2d to 4s 6d; Southdown tegs, 6s 6d to 6s 8d; West Country ditto, 6s 2d to 6s 6d; West Down ewes, 4s 4d to 4s 8d; Southdown ewes, 4s 6d to 5s; fat calves, 5s to 5s 6d; porkers, 3s 10d to 4s 4d.

Colchester, Saturday.—Beef made 4s 6d, and mutton 6s per stone of 8 lb; pork 8s per score. There was a fair supply of all classes of stock, and the pig market was rather overcrowded.

Derby, Tuesday.—About an average demand; prices unaltered from last week. Beasts, 5½d to 6½d; calves, 7½d; sheep, 7½d to 9d.

Doncaster, Saturday.—Good supply of cattle, and a fair trade, especially for milch beasts, and late prices ruled. Milch beasts £17 to £22; bullocks, £12 to £16; heifers and drapes, £11 to £15; stirks, £8 to £10 each. Large supply of sheep, but not up to the average at this time of the year. A steady demand at late rates. Ewes, 40s to 56s; shearling gimmers, 58s to 64s; draught ewes. 36s; and lambs, 40s to 44s each.

Dorhester, Saturday.—A full cattle market to-day, Messrs. Duke and Son having a rare lot of stock on offer at their sale, and Messrs. Symonds and Sampson were equally well supplied, the horned stock including some rare milch beasts from good districts, many useful barreners and some splendid quality fat steers and heifers, but mutton again only made a poor show. The rain having greatly improved the keep prospects as well as the root crops, store cattle met a very ready sale, milchers selling from £16 10s to £21 for the best, and £14 to £16 5s for others; young fresh barreners, £21 to £26; others, £16 to £19 10s. Fat bullocks sold from about £16 5s to £21 10s (or 11s to 11s 6d per score); secondary qualities, 9s 6d to 10s 6d. Mutton made about late rates—7½d to 8½d per lb for the best. A good clearance throughout.

Dublin, Thursday.—A better demand for choice cattle and last week's extreme prices more frequently realised. Secondary and inferior sorts were easier to place and an early clearance effected. Reduced numbers in the sheep department caused a firmer trade, fancy light weights favouring sellers, other sorts easier sold, and few, if any, remaining unsold. Cattle—Live weight (best), 29s to 31s 6d per cwt; exceptional for choice Angus crosses, 33s. per cwt; secondary and inferior qualities, 26s to 28s per cwt. Mutton (dead weight), 6½d to 7½d per lb.—Ganly, Sons and Co.

Edinburgh, Wednesday.—Smaller supplies; demand only fair. Sheep, owing to last night's storm, shown at a disadvantage, and slow to sell; half-bred lambs to 27s 6d; Cheviot lambs to 22s; half-bred Dinmonts to 40s; Cheviot ewes to 31s. Cattle, poor trade. Bullocks, £11 to £14 14s; cows, fair trade; Shorthorns to £24 10s; Ayrshires to £19; cross to £24.

Exeter, Friday.—Small supply of fat beasts, selling well, 11s to 11s 6d for steers and maiden heifers; cows, 10s to 10s 6d, all sold. Remarkably small supply of sheep, but good sale; small sheep, 9p to 9½d; larger size, 8½d to 9d; ewes, 6½d to 7d, all sold. Large number of keeping lambs, from 36s to 40s; breeding sheep, from 40s to 46s; rams, 5d; calves, 7½d.

Glasgow, Wednesday.—Fair supply of cattle at market, and for really choice finished bullocks a good selling trade was experienced; inferior descriptions in fair request; top quality, 63s to 66s; secondary, 57s to 59s per cwt. Sheep were penned in average numbers, and prices ruled fair for prime sorts; secondary again in quiet request; best mutton, 8¾d to 9½d per lb; secondary, 8d to 8½d per lb; lambs, 7d to 9½d per lb.

Hereford, Wednesday.—Large supply of beef, and not many buyers. Trade was quiet, although it revived towards the last. The top figure for bullock and heifer was not above 6½d, fat cows about 5d. The best store cattle were cleared off quickly. Calves a short supply, and prices were moderate, about 6½d to 7d. Sheep made a substantial display, and trade was fairly firm, the choicest wethers and yearling ewes making over 8d, fat ewes 6½d to 7d. Good store lambs sold readily at top figures, middling ones remained. A lot of porks, but not selling quite so well, the best about 5½d. Very few bacons.

Leicester, Saturday.—Fair average supplies of home-bred bullocks. rade ruled rather slow after the heavy business at the fairs. Choice milch cows, £18 to £19; good lots, £14 10s to £16 10s; bullocks, £11 to £13 10s; young stock, £4 15s to £7; and calves, 20s to 40s each.

Lincoln, Friday. — An average number of horned stock, and a fair trade. Strong beasts, £14 to £16; yearlings, £8 to £10; milch cows, £17 to £21. Of sheep there was a moderate show, and the demand was brisk. Gimmers, 55s 6d to 65s; young ewes, 50s to 55s; lambs, 35s to 45s each.

Lynn, Tuesday.—A rather larger show of fat beasts met late rates, and made from 7s to 7s 9d per stone. Stores in larger supply experienced a slow trade, and realised from £6 to £19 each. Fat sheep in average supply met a firm trade, and fetched from 9s to 10s per stone. Stores, from 45s to 50s; trade firm. Store lambs made from 35s to 42s each.

Manchester, Friday.—Beef: First-class, 5d; second-class, 4d to 4½d; third-class, 3d to 3½d per lb. Mutton: First-class, Cheviots, Irish, and others, 7½d; second-class, 6½d to 7d; third-class, 5½d to 6d per lb. Veal: First-class, 6½d; second-class, 5½d to 6d; third-class, 4½d to 5d per lb. Bacon pigs: First-class, 5½d; second-class, 4½d to 4¾d; third-class, 3½d to 3¾d. Porket pigs: First-class, 7d; second-class, 6½d to 6¾d; third-class, 6d to 6½d per lb

Newcastle, Tuesday.—Cattle were a very similar supply to last week, and trade was quiet and prices unaltered. Quotations:—Prime heifers, 7s 3d to 7s 6d; second class, 6s 9d to 7s; prime steers, 7s to 7s 3d; second class, 6s 9d to 7s; coarse and inferior, 6s to 6s 6d per stone, sinking the offal. Sheep and lambs were a smaller supply, and trade was a shade firmer, and prices improved generally ½d, rams being an exception. Quotations:—Choice shearling sheep, 8½d to 8¾d; strong heavy, 8d to 8½d; choice lambs, 8¾d to 9d; second class, 8½d to 8¾d; ewes, 6d to 6½d; rams, 5d to 6d per lb. Calves were a similar supply to last week Trade was quiet, and prices down ½d, veal bringing 5½d to 7½d per lb.

Norwich, Saturday. — There was a good supply of fat beasts for which a fair trade was experienced at 7s 3d to 7s 9d per stone of 14 lb. The show of store cattle was the largest this season, and, with the exception of a few good class English steers, consisted wholly of Irish stock. Except for best qualities the demand was by no means brisk; values ranged from £6 10s to £18 per head. Store sheep were in better supply than last week. Lambs met a fair inquiry, but for breeding ewes there was little demand. Lambs ranged in price from 40s to 48s; and ewes from 50s to 65s per head. Fat sheep were again a limited supply, and met with a firm trade at 10s to 11s per stone. For the small number of fat and store pigs penned there was a brisk demand, and all were sold. Fat pigs averaged 7s per stone for small qualities, and 6s 3d to 6s 6d for big pigs. Small stores made from 8s to 20s per head, and large sizes from 25s to 40s.

Nottingham, Saturday.—Larger supply of stock, with a fair trade. In-calf cows made £19 to £24, in-calf heifers £15 to £18, store stock £10 to £14, and calves 25s to 45s. A few sheep made the usual prices. Official returns—271 beasts, 72 calves, and 28 sheep.

Preston, Wednesday. — There was a fair attendance of buyers, and there were good supplies of average quality. Trade ruled quiet, and prices were a trifle weaker. Local fed heifers made up to 6¼d; Irish ditto, 6d to 6¼d; young cows and bulls, 5¾d; coarse and heavy ditto, 5d to 5¼d; choice hoggs, 8d to 8½d; prime lambs, 8¾d; coarse lambs, 8½d; choice ewes, 6¼d; inferior ditto, 5¾d; tups, 5½d; calves, 6¾d per lb.

Retford, Saturday.—Not a very large supply, but a fair trade, and milch cows of good quality were worth £20 to £22, and secondary down to £15 each; healthy young steers and heifers also found a market at £10 to £12; yearlings, £6 to £8; and calves 35s to 45s per head.

Romford, Wednesday.—Short supply of fat beasts, trade a little better. Best small, 4s 4d to 4s 6d; middlings, 4s to 4s 2d per stone. Calves in short supply, trade a little better at 4s 10d to 5s per stone. Sheep in short supply, trade better. Best small, 6s 2d to 6s 4d; larger, 5s 8d to 6s 10d per stone. Ewes in short supply, trade about the same at 4s 2d to 4s 4d per stone. Fair supply of milch cows, trade good. A few store beasts on offer, very slow demand. Small supply of pigs, trade dear. Small porkers, 3s 10d to 4s large hogs, 2s 8d to 3s per stone.

Sheffield, Tuesday.—More milch beasts shown than last week, and a stronger tone in trade, the best qualities making £20 to £23; smaller lots, £17 to £19.

Shrewsbury, Tuesday.—Large supplies all round. Good attendance of buyers, with a brisk trade. Quotations:—Beef, 5½d to 6½d per lb; mutton (wether), 8½d to 9d per lb; ewes, 7d to 8d per lb; lamb, 9d to 10d per lb; veal, 7d to 8d per lb; porket pigs, 9s 6d to 10s 3d per score; bacons, 8s to 9s per score.

Truro, Wednesday.—Attendance very good, business fairly brisk. Fat bullocks, 56s to 58s per cwt; barreners and store bullocks, 40s to 45s; cows and calves, £12 to £17; rearing calves, 25s to 42s each; ewes, 40s to 48s; wethers, 7d per lb; ewes, 5½d to 6d; lambs, 7d to 7½d; pigs, up to 41s each; beef, 6d to 8d per lb; mutton, 6d to 8d; lamb, 7d to 8½d; veal, 6d to 8d; pork, 6d to 8d; pork (carcasses), 4½d to 5d.

Wolverhampton, Wednesday.—Trade very slow all round, and fair supply. Quotations:—Beef, 5d to 6½d per lb; mutton, 6½d to 9d per lb; lamb, 8½d to 9½d per lb; veal, 6d to 7½d per lb.

Yeovil, Friday.—The market was well supplied, and with a good demand prices ruled in sellers' favour. Best quality heifers and calves, £18 10s to £20 5s; secondary quality, £16 5s to £17 10s; cows and calves, £15 10s to £18 15s; in calf heifers, £15 15s to £18 15s; in-calf cows, £10 10s to £17 5s; barreners, £10 to £13 7s 6d; two-year-old heifers, £9 to £14; yearlings, £6 10s to £8 5s; steers, £13 to £15 10s; Down lambs, 37s 6d to 42s 6d.

York, Thursday.—The largest show of both English and Irish cattle this year; trade ruled very slow owing to the high prices asked. Some of the best three-year-old stirks made up to £14 10s, but the general run fetched £8 to £11. A small show of calving and milch cows, for which there was a brisk demand, some of the best making up to £23, the general prices being from £16 to £18. A very large show of sheep, fully 25,000 being penned. The best North country ewes made up to 58s, secondary sorts 50s to 55s. North country gimmers 54s, others up to 50s. North country lambs made 38s for the best sorts, and smaller sorts down to 34s. Best Masham ewes, 52s., seconds 44s to 47s, best twice-crossed lambs, 38s, others 30s to 34s, best Masham lambs 30s, others as low as 24s, one exceptionally good lot making 34s; Cheviot ewes made 23s to 28s, South country ewes 40s to 48s, South country lambs 33s to 38s. A number of rams were sold by auction, Oxford shearlings ranging from £3 10s and £6 15s. Lincoln longwool sheep met with a demand, prices ranging from £3 10 to £5 17s 6d.

DAIRY PRODUCE.

London, Friday.—Butter.—The demand for Australian butter this week has been very good, especially for secondary quality, which has risen about 6s per cwt. "Choicest" quality has made an advance of 2s per cwt, but is still 6s per cwt below last year's price. New Zealand supplies are very small, and "Choicest" is making the same price as Australian—viz, 112s to 114s per cwt. The butter markets on the Continent generally are stiffening, and the Danish official quotation has been raised 2 kroner. In Paris a slight reduction has taken place this week. The result of the recent rise in French is shown by a fall in the import last week of 1,000 cwts, equal to about 14 per cent. of the previous week's receipts. Russian prices are about 2s per cwt dearer on the week. Cheese.—There has been more buying this week, the trade having apparently made up its mind that values would not recede for some time to come. The raising of the retail price by the large retail firms has caused the smaller retailers to come on the market. Values in Canada and New Zealand are advancing in unison with our markets, and c.i.f. cables ask 65s for Canadian, and 62s for New Zealand for the season's output of best factories.—W. Weddel and Co.

CHEESE.

Glasgow, Wednesday. — Arrivals of home cheese were small, mainly owing to the harvest operations not being completed. Moderate demand at last week's prices. Cheddars, 60s to 64s; Dunlops, 58s to 62s; Canadian quoted on spot at 61s to 62s, but forward price is firmer owing to the drought.

Highbridge, Tuesday.—A large attendance of buyers, a brisk sale, and all cleared. Best Caerphilly dairies realised up to 58s per cwt.; secondary dairies, 54s 6d to 56s; and other dairies, 50s to 52s 6d. A few inferior lots failed to reach 45s. Cheddars, 60s to 63s; truckles, 58s to 62s; doubles, 52s to 57s.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Business fairly brisk; good supplies. Quotations for English produce: — Grapes, 6d to 3s; ditto, Channel Islands, 5d to 1s per lb; peaches, 3s to 10s 6d per dozen; green figs, 6d to 1s 6d per dozen; melons, 9d to 2s; apples, 3s to 8s per bushel; pears

(Williams), 3s to 6s per half bushel; cobnuts, 3s to 4s per 12 lb; walnuts (Grenoble) 6s to 7s per bag; nectarines, 3s 6d to 12s 6d per dozen; tomatoes 2s to 3s; ditto (Channel Islands), 1s 6d to 2s 6d; per 12 lb; cos lettuce, 6d to 1s per score; endive, 1s 6d to 2s per dozen; celery, 6d to 10d per bundle; turnips, 1s 6d to 2s 6d per dozen bunches; ditto, 2s 6d to 3s per bag; pursley, 1s 6d to 2s; mint, 1s to 1s 3d; leeks, 1s 6d to 2s per dozen bunches; scarlet runners, 1s 9d to 2s 6d per bushel; cucumbers, 4s to 6s per flat; shallots, 2s 6d per 12 lb; cauliflowers, 3s to 5s; cabbages, 4s 6d to 6s per tally; onions, 1s 3d to 1s 9d per dozen bunches; horseradish, 10s to 15s per dozen bundles; carrots, 2s to 2s 3d per bag; beetroots, 1s 3d to 1s 6d per dozen bunches; potatoes, 60s to 75s per ton.

* September 1st, 1907, was a Sunday.

Wisbech Mustard Market.

The annual market for the sale of this season's mustard seed grown in Lincolnshire, Cambridgeshire, Northamptonshire, and Norfolk was held on Saturday at Wisbech, and was largely attended by growers and merchants, all the leading firms being represented There was a very good show of brown seed, but both white and brown were described as raw and unmatured, and many lots in consequence not yet fit to thresh. The price obtained for brown seed was about the same as at the opening market last year—half a guinea per bushel as the best price, and for indifferent lots the price fell as low as 7s. per bushel. The top price realised for white was 8s. 6d. per bushel, but here again the worst feature was the unmatured state of the seed. White seed is about 1s. 6d. per bushel lower than at the opening market last year, and prices show a tendency to go lower.

There was only a small attendance at Barnsley Fair on Friday, and the importance of the event seems to be continually on the wane. The quality of the horses shown was distinctly poor. Sheep were a good show, and a fair sale resulted. A few Scotch breeds made full value, North Country animals from 50s. to 60s., and Cheviots about 35s. each. Milch cows were scarce, and there was a good inquiry, prices ranging from £16 to £20. Calves made from £3 to £6.

An unusual dispute has arisen at Chester between the butchers and farmers. The Chester Corporation are causing a thorough inspection of the meat supply to be made, and when a carcase is seized for tuberculosis the butchers have at present to bear the loss. Against this they protest, and they have addressed an ultimatum to the farmers attending Chester fairs demanding a guarantee against tuberculosis. They suggest that the farmers shall, through the auctioneer, insure approved beasts, and that when a butcher has a guaranteed carcase seized he shall be recouped to the extent of two-thirds of the purchase price. The butchers threaten to boycott beasts offered for auction without this guarantee. The farmers on Saturday held a crowded meeting to discuss the situation, and strong opinions were expressed that compensation should be paid for condemned carcases out of public money, and that the Legislature should be pressed to take action. It was resolved to call a mass meeting, and to request the Chester Chamber of Agriculture to do the same.

RECEIVED TOO LATE FOR CLASSIFICATION.

LEEDS SMITHFIELD SHOW.

The 48th ANNUAL EXHIBITION will be held in the VICTORIA CATTLE MARKET HALL, December 10, 11, & 12, 1907.

Cattle, Sheep, Pigs, Roots, Dressed Poultry, Butter, Poultry, Pigeons, and Rabbits.

Entries finally close Nov. 23, 1907. Prize List and entry forms may be had on application to the Sec., H. KITCHEN, 3, Wormald Row, Leeds.

PEDIGREE TAMWORTHS, the property of C. HOWARD TAYLOR, Middlewood Hall; a few good young Boars and Gilts for sale.—Apply, Hampole Priory, Doncaster.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

October rainfall has already been liberal, and we could do well with ten fine days to end the month. The land is a little laden with surface moisture, but the subsoil being drier than usual all fields where there is drainage may be expected to get into condition rapidly and November work should be brisk. The fear of the average farmer is that frost should set in before he has got all his wheat sown, and there are many farms where the lifting and securing of the roots will hardly be practicable without taking hands away from the plough and the drill. Still, with a fine November and no frosts before Advent the situation six weeks hence should be healthy. The labour which farmers can reduce with advantage is that of threshing, which has lately been going on far too fast and has resulted in flooding many markets with stuff badly out of condition. The good prices made for dry sound milling wheat are far from reflecting uniform advantage to growers. In an autumn like the present the tendency is towards a very steep gradient in actual prices realised, the finest lots which have also escaped weather damage having to make a price to cover the loss on the other lots which have to go at damaged or tail corn prices. Thus, although we quote no English sound wheat in London under 37s. per qr. of 480 lb., or 38s. 6d. per 504 lb., the London average declared on Friday last was only 36s. 6d per 480 lb., or 38s. per 504 lb. Damaged wheat and tail corn is returned in the official figures, but is not quoted in market circulars which presuppose fit condition in produce offered.

News from abroad with respect to crops may very briefly be summarised. France: The barley and oat yields are heavy, and of both staples some surplus for exportation is disclosed. Germany: Widespread disease in the potato fields will throw an increased strain upon wheat and rye supplies. Germany will therefore be a very heavy importer of both these cereals during the next ten months. Roumania: The maize crop is probably below an average, thus completing the circle of Roumanian misfortune for 1907. Every one of the crops is below the mean, and wheat is as much as 40 per cent. deficient. Russia: Large autumn sowings of wheat are reported; the high prices ruling are very encouraging to the easily elated peasants, who take for granted that the values of October 1908 will be the values of October 1907. Canada: The last reports show that the wheat yield, though under an average, is not so gravely deficient as was rumoured early in October. India: Rain is needed in many districts, but the Bombay Presidency had a record fall in August, and the Punjab depends mainly on irrigation. Australia: Drought is seriously threatening the crop prospects in all the colonies. Argentina: a bumper crop of wheat is now regarded as assured, for the area under cultivation, at first regarded as stationary, is now reported to be increased. The usual conditions are found, that is to say, a certain replacing of corn land by cattle pastures in the older parts more than balanced by the large areas added to corn acreage in the newly opened-up districts. It is expected by shippers at Buenos Ayres, Rosario, and Bahia Blanca that Argentina, which sent to the United Kingdom 5 per cent. only of its wheat imports in 1901, but had raised the percentage to 20 in 1906, will for 1908 contribute as much as 25 per cent. of the total.

The markets of the United Kingdom advanced steadily last week, and value was higher on the Saturday than on the Monday at all centres. A remarkable change has, none the less, come over the feeling of the market, and there is now a strong current running in buyers' favour, the desire to unload on the part of importers being strengthened by the indiscreetly heavy deliveries of new English wheat, barley, and oats by farmers.

Flour has reached 34s. for household grade where credit and delivery are needed, 33s. being the latest net price ex mill. The cost of bread with flour at 33s. should be 5½d., for actual production; 5½d. with bakers' reasonable remuneration of 1d. on the quartern loaf and 5¾d. with bakers' profit, plus ¼d. charge for delivery to the customer. The Board of Trade returns of the 17th inst. showed the average price in London to be just 5¾d., and for the whole island to be 5·7d. The West End loaf, made of half town whites and half town households, is reasonably priced at 6d.

The sales of British wheat at the statute markets since harvest have been as follows:—

This season ... 419,000 qr. at 32s. 0d. per qr.
Last ,, ... 497,000 ,, 25s. 11d. ,,

The sales of British barley have been:—

This season ... 329,000 qr. at 25s. 0d. per qr.
Last ,, ... 682,000 ,, 24s. 8d. ,,

Of oats the sales off the farm have been heavier than appears to us to be prudent:—

This season ... 279,000 qr. at 17s. 8d. per qr.
Last season ... 243,000 qr. at 16s. 3d. ,,

The imports of the United Kingdom last week were:—

Wheat, 532,000 qr.: large.
Flour, 86,500 sks.: small.
Barley, 147,000 qr.: liberal.
Oats, 89,000 qr.: small.
Maize, 230,000 qr.: good.

The total supply of breadstuffs from abroad has since harvest exceeded the wants of the country, when farmers' deliveries were also added on.

We estimate the figures thus:—

British wheat.....	1,044,000 qr.
Foreign wheat	2,944,000 ,,
Foreign flour	560,000 ,,
Total supply.....	4,548,000 ,,
Total wants	3,780,000 ,,
Excess	768,000 ,,

This addition to millers' and bakers' holdings will enable them in all probability to recover a share in the control of the market.

The supplies on passage, however, are in sellers' favour; it is the large supplies from farmers which are really undermining the wheat trade. Average supplies of foreign wheat on passage are 2,500,000 and of foreign flour are a quarter of a million; quantities of 480 lb and 280 lb respectively. To-day's returns of supplies on passage are as follows:—Wheat, 195,000 qr.; flour, 246,000 sacks; barley, 700,000 qr.; oats, 180,000 qr.; maize, 935,000 qr.; linseed, 143,000 qr.; rapeseed, 12,000 qr.; cottonseed, 44,000 qr., and rice, 27,000 tons. The wheat, including 658,000 qr. Indian, 415,000 qr. Australasian, and 390,000 qr. American.

Shipments last week were as follows:—From America: wheat, 402,000 qr.; barley, 10,000 qr.; oats, 1,000 qr.; maize, 40,000 qr.; and flour, 123,000 sacks. New Argentina wheat, 87,000 qr.; maize, 192,000 qr.; linseed, 24,000 qr.; and oats, 15,000 qr. From Russia: wheat, 390,000 qr.; barley, 573,000 qr.; oats, 139,500 qr.; and maize, 63,000 qr. From Roumania and Bulgaria: wheat, 47,000 qr.; barley, 129,000 qr.; and maize, 54,000 qr. From India and Persia: wheat, 73,000 qr.; barley, 20,000 qr.; and linseed, 37,000 qr.; and from Australia and New Zealand: wheat, 50,000 qr.; flour, 20,000 sacks; and peas, 5,000 qr.

LONDON HAY TRADE.

Saturday.—With a continuance of wet and stormy weather, preventing farmers and senders getting anything on rail at country stations, the arrivals have been of a very sparse character, and our market presents a firm appearance. Demand has been far greater than the supply, and prices in consequence show an all round advance on last week's rates.

The different London stations have been almost denuded of stocks, and fancy prices have had to be paid by salesmen, who having contracts to keep supplied, must purchase whatever the cost. Although some of these inflated prices can hardly be quoted as market value, they make holders very firm, and until there is a change for the better in the weather there seems very little likelihood of a normal condition of trade. Clovers and mixtures show the largest advance, being 2s 6d to 5s per ton more money, and hays are a good 2s 6d per ton dearer. There is a strong inquiry for plain sorts of all kinds which make top values. Seconds are also the turn better. With the wet weather supplies of straw show a considerable falling off, and prices are 1s per load higher. Arrivals of foreign are on a very limited scale, with prices nominally unaltered.

Prices ruling are about as follows:—English 1907 crop. Best hays, 70s to 72s 6d per ton; good hays, 62s 6d to 67s 6d per ton; plain hays, 57s 6d to 60s per ton; best clovers, 85s per ton; good clovers, 80s 6d to 82s 6d per ton; inferior clovers, 72s 6d to 77s 6d per ton; best mixtures, 82s 6d to 85s per ton; good mixtures, 75s to 80s per ton; plain mixtures, 67s 6d to 72s 6d per ton; seconds hays, clovers, and mixtures, 45s to 60s per ton; wheat straw, 26s to 27s per load; barley straw, 26s to 27s per load; oat straw 26s to 27s per load. All ex rail London.

Foreign: Canadian mixture, 80s per ton; first quality Dutch hay, 60s to 62s 6d per ton; second quality Dutch hay, 55s per ton. New French first and second cut clover, 75s per ton. These prices are by the barge load delivered alongside a London Thames wharf.

THE BALTIC.

The position of the wheat cargo trade is probably hit off by *Beerbohm's List* when it says that the money crisis in America is the danger spot. The American merchant is so plucky a holder where prices appear to give him a fair chance that the London market has come to expect a backing from New York whenever disposed itself to make a move forward. It is more than a mere possibility, as the shippers' organ observes, that the American may be unable to hold his grain even if profit were fairly in sight. Prices made since the 14th include 40s. 6d. per 480 lb. for Argentine new crop for February shipment, 42s. 6d. per 480 lb. for Canadian for prompt shipment, and 47s. per 492 lb. for fine Russian winter. The market closed very dull.

Other cargo sales of the week include Argentine maize at 28s. 6d. per 480 lb., Russian barley at 25s. 3d. per 400 lb., Konigsberg oats at 18s. 6d. per 320 lb., Calcutta linseed at 46s. 3d. per 410 lb., and Egyptian cottonseed at £7 5s. per ton.

East Indian wheat rejections are:—Choice White Karachi 41s. 6d., Soft Red Karachi 41s. per 492 lb.

These are the prices at which Indian wheat differences under the association contracts will be adjusted until further notice.

The arrivals of grain and seed-laden vessels at ports of call since last review have been six, as will be seen by the following table:—

Cargo	Total	Arg. Republ.	Chili and Oregon.	Australia.	Total Last Week.	Total since Jan. 1, 1907.	Total same time 1906.
Wheat....	5	—	1	4	8	244	245
Maize	1	1	—	—	—	17	5
Barley ..	—	—	—	—	—	5	5

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat.—English firm held at full prices, but not active. Whites quoted at 39s to 42s; reds at 38s to 41s. Foreign firmly held at Monday's full prices, but demand less active. No. 1 Northern Manitoba, ex ship, held at 46s 3d; No. 2 at 45s 6d; No. 1 Durum at 40s 6d; choice white Karachi at 42s 6d; reds at 41s 9d. Flour firm, but quiet. Hungarian quoted at 39s; Washburn gold medal at 34s to 34s 6d; Iron Dukes at 28s 6d to 29s 6d. Maize firm at full prices. Odessa-Danube and Galatz-Foxanian, landed, held at 29s; Odessa, ex ship, at 28s 6d. Barley firm at Monday's rates. Azoff-Black Sea and Odessa-Nicolaieff, ex ship, held at 26s 3d to 26s 6d, landed at 26s 9d to 27s. Oats steady, quiet. River Plate, landed, held at 19s 3d; South Russian (38 lb), at 19s 3d to 19s 6d.

Mark Lane, Friday.—Wheat: English steady, unchanged. Whites quoted at 39s to 42s; reds, at 38s to 41s. Foreign slow, and offered at 6d to 9d decline, with only limited business passing. No. 1 Northern Manitoba, ex ship, held at 45s 6d; No. 2 at 44s 9d; No. 1 hard Manitoba at 47s 6d; choice white Karachi at 42s; red Karachi at 41s 6d. Flour held unchanged prices, but inactive. Hungarians quoted at 39s; Iron Dukes at 28s 6d to 29s. Maize dull, easier tendency. Odessa, ex ship, quoted at 27s 9d to 28s; Danubian and Galatz-Foxanian, landed, at 29s; La Plata, landed, at 28s 6d. Barley slow, and 3d lower to sell. Azoff-Black Sea and Odessa-Nicolaieff, ex ship, to arrive, quoted at 25s 9d to 26s; Persian, ex ship, to arrive, at 24s 3d to 24s 6d. Oats steady, quiet. South Russian, 38 lb, held at 19s 3d to 19s 6d; La Plata, at 19s 3d.

COUNTRY.

Ashford, Tuesday.—A sharp rise in wheat, which made 3s per qr more than last week, best lots going above 40s. Barley and feeding corn also dearer, and flour 1s per sack higher. Quotations: Wheat, 37s to 40s 6d; English barley, best, 31s to 33s; and secondary, 27s to 29s; maize, 30s to 31s; peas, 32s to 33s; oats, 19s to 22s per qr; flour, whites, 37s; and seconds, 34s; scaling, 32s per sack

Banbury, Thursday.—Wheat, white (new), 37s 6d to 38s 6d per qr; ditto red (new) 37s 6d to 38s 6d per qr; barley, 28s 6d to 34s per qr; beans (new), 30s to 31s per qr; oats, 18s to 21s 6d qr; peas, 30s to 34s per qr.

Berwick, Saturday.—Small attendance, with fewer samples of grain on offer. Barley 6d to 1s per qr dearer. Oats scarce, and making more money. No wheat on offer. Barley, 25s to 31s; oats, 23s to 27s.

Birmingham, Thursday.—There was a much steadier tone about the business at the market, and transactions were small and few. Foreign wheats have advanced from 6d to 1s per qr since last market day, but the demand was very quiet. Plenty of English wheats in dealers hands, which made up to 14s 6d to 14s 9d per 186 lb delivered. Galatz-Foxanian maize was 1s per qr dearer at 28s 6d per 490 lb at Sharpness. Bessarabian was 1s 3d per qr up at 28s 9d Sharpness. For grinding barley 26s 9d per 400 lb at Sharpness was wanted. English oats dearer, whites making 21s 6d and blacks 21s per 312 lb. Beans were also dearer at 13s 3d per 196 lb delivered.

Brighton, Thursday.—Slow trade and small attendance. Wheat in short supply, the advanced prices asked checking the demand. New white white, 39s to 41s; new red ditto, 38s to 41s; barley, 30s to 35s; grinding ditto, 29s to 30s; oats, English, 19s to 21s; peas, 32s to 33s; beans, 32s to 34s.

Bristol, Thursday.—English wheat in small supply at 1s per qr advance on the week at our market to-day. Foreign wheat firm and unaltered. Maize 9d dearer. Barley unchanged. Oats 6d advance. Flour 6d higher, with a very good inquiry.—Grace Bros.

Bury St. Edmunds, Wednesday.—Wheat, with a small supply, was 1s 6d per qr dearer on the week, but a very quiet trade at the advance. Reds, 38s to 39s 6d; revets, 37s to 38s per qr. Barley: supply moderate, with a firm trade at improved prices; fair malting sorts sold freely at 30s to 33s 6d, and fine parcels were inquired for at 34s to 38s per qr. Maize fully 1s per qr dearer, at 29s to 29s 6d per qr. All other feeding corns firm, and tending upwards. Linseed cakes firm at £8 5s, and cottons at £5 10s to £5 15s per ton. Milling stuffs advancing.

Canterbury, Saturday.—Wheat is quoted at from 37s to 38s, with an occasional choice sample at 39s. Prices were a trifle higher than this earlier in the week, but they have since dropped, and business is dull. Barley slow of sale, at from 29s to 35s; and oats are making from 19s for 38 lb up to 22s for 44 lb. Peas and beans rather dearer, grey peas being quoted up to 32s, and tick beans to 33s per qr.

Carlisle, Saturday.—Larger supply of oats in market to-day. Quiet sale at 1s qr advance. Prices:—New oats, 20s to 22s per 336 lb; old oats, 25s to 26s per 336 lb. New wheat sold at 36s per 36 stone. Weather very bad this week for thrashing; good many oats in field yet.—Thomas Robinson.

Chester, Saturday.—A further advance in the price of wheat since last market day. Oats occasionally 1d per bushel dearer. Barley firm, and maize 3d per sack over last market day. Trade fair, and attendance good. Quotations:—Wheat, white and red, 5s 4d to 5s 6d per 75 lb; grinding barley, new, 4s to 4s 3d per 64 lb; oats, new, 2s 7d to 2s 9d; old, 3s 1d to 3s 6d per 46 lb; Indian corn, old, 15s 3d to 15s 6d per 240 lb; round corn, old, 14s 9d to 15s 9d per 240 lb.

Chichester, Wednesday.—A fair attendance, but not much trade. There was a rise of 1s on wheat, oats, barley, maize, and flour. New white wheat, 36s 6d to 40s; new red ditto, 36s 6d to 40s; barley, 29s to 37s; grinding ditto, 23s 6d to 25s; oats, English, 18s 6d to 24s 6d; rye, 27s to 29s; peas, 31s to 32s; beans, 32s to 33s; tares, 5s 6d to 6s 6d; maize, 26s 6d to 27s 6d; flour, 31s to 33s.

Colchester, Saturday.—Wheat, better supply at lower prices. Oats, beans, and barley steady. —Colin Taylor, King and Co, Ltd.

Coventry, Friday.—With only poor attendance, the supply of wheat was small, but demand was fair at about last week's prices. Very few samples of barley or oats on offer. Little change in figures, and such alteration as there was in buyers' favour. Quotations:—Wheat, 14s per bag (186 lb); barley, 30s to 34s per qr (448 lb); oats, old, 24s 6d to 27s per per 352 lb; new, 21s to 23s per 352 lb; beans, 13s to 13s 9d per 196 lb; peas, 12s 6d to 15s per 196 lb.

Derby, Friday.—There was only a small supply of wheat, which sold slowly at the extreme rates of last week. Spring corn unchanged. Quotations:—Wheat, 37s to 38s; grinding barley, 25s to 27s; beans, 35s to 36s; oats, old, 24s to 26s; new, 20s to 21s.

Devizes, Thursday.—There was a small supply to-day, farmers being unable to thresh owing to wet weather. Prices again show a considerable advance. Wheat 1s per sack dearer. Barley very firm, and maintained last week's prices. Oats the turn dearer. Best wheats are worth 20s per sack, and oats 20s per qr, 40 lbs to the bushel. Best old wheat, 20s to 23s; best new wheat, 19s to 20s 6d; secondary, 16s 6d to 18s 6d; malting barley, 30s to 37s; grinding barley, 27s to 29s; winter barley, 26s to 30s; old oats, 22s to 24s 6d; winter oats, 18s to 19s; white Garton oats (330lb), 19s to 20s; black Tartar oats (320 lb), 10s to 20s; rye, 27s to 30s; new beans, 16s 6d to 18s; fine flour 32s to 34s; extra fine, 36s to 39s; vetches 5s 6d to 6s 6d.

Doncaster, Saturday.—Moderate supply of English wheat, but the condition was variable. There was a lull in the advance, prices having gone down to last week's figure. English wheat, 14s to 14s 6d per load. Foreign wheat was quoted at last week's rates, the advance being fully maintained. Maize declined 3d per qr. Oats and barley about unchanged.

Dorchester, Saturday.—Larger attendance than usual to-day owing to the barley show, but only a moderate offer of samples, the weather of the past week having completely put a stop to all threshing operations. Much of the excitement which has pervaded operations at the last two or three markets died out to-day, and, although holders took up a firm position, still there was an easier feeling abroad, and sales generally were effected on slightly easier terms, wheat being back quite 6d for both English and foreign, whilst barley was a trifle lower. Oats unchanged, but the tendency of sales was to lower rates, maize slightly easier. Beans and peas held for full values. Flour favoured buyers. On the whole we must characterise trade all round with a slightly declining tendency.

Dublin, Friday.—The market was moderately attended, and pervaded by a more cautious tone. Foreign wheat 3d lower. Flour weaker. Maize nominally unchanged. Irish grown cereals very stiff in price, and barley held for more money. Oatmeal strong. Milled stuffs scarce and dear.

Glasgow, Wednesday.—Markets have been very excited over the week, and prices are still tending higher. Wheat held firm at 1s per boll more money, and flour, in sympathy, has advanced 1s to 1s 6d per sack since last Wednesday. Maize steady at an advance of fully 1s 3d per boll. Corn almost exhausted on spot, and for any lots on hand 2s per boll more money is being paid since last week. Oats firmly held at 1s per boll advance. Barley 3d per boll dearer. Beans firm at late rates. Pease scarce and dearer. Bran and thirds held for 2s 6d per ton advance. Oatmeal, in sympathy with oats, 1s 6d per sack dearer. Other articles firm.—Gibson and Clark.

Glasgow, Friday.—Wednesday's boom in wheat and flour gave way to-day to weakness, prices falling from 6d to 1s. Even at that fall buyers declined to purchase, as they anticipated that the Argentine crop, which is harvested in December, will make up for the shortage of America.

Gloucester, Saturday.—English wheat in small supply, and prices 1d to 2d per bushel cheaper. Foreign wheat inactive and quotations 6d to 1s per qr lower. Plate maize 6d, and Bessarabian 9d dearer at Sharpness. Barley and oats unchanged.

Grantham, Saturday.—Owing to the inclement weather there were only small supplies of grain. A brisk inquiry prevailed. Wheat, 37s to 38s per qr; barley, 26s to 34s; oats, 18s to 21s; beans, 30s to 32s; blue peas, 70s to 75s.

Hereford, Wednesday.—Moderate attendance, but not a large volume of business passing. Sellers were firm holders of wheat at about 3d per bushel better than last week's prices, full quotations ranging from 4s 6d to 4s 9d. Barley moved off at from 28s to 32s. Oats stood at about 20s per qr. Beans firmly held at recent rates. Maize 3d per qr dearer.

Ipswich, Tuesday.—Fair supply of wheat; trade firm at from 38s to 40s per 504 lb. Moderate supply of barley, and the condition of the majority of the samples was not very good—runs made 29s to 31s, better qualities up to 33s. Maize and oats dearer. Beans and peas unaltered.

Leeds, Tuesday.—We have to record another week of active trading in wheat at daily rising prices, the advance in Kurrachees now reaching 14s per qr, and unless the drought in India and Australia is speedily broken, a further advance is quite on the cards. Millers have followed the upward movement somewhat reluctantly, hoping for a pause and large supplies of cheap English wheat. Farmers, however, have grasped the situation and are holding back their produce. Prices are irregular at 1s 6d to 2s 6d advance on the week. Malting barley unchanged, supply liberal. Maize 2s per qr dearer. Oats 6d up. Beans scarce.—Dunns and Co.

Leeds, Friday.—Both English and foreign wheats were still advancing, closing prices showing a further substantial rise upon Tuesday's full rates. Maize was 6d dearer, Plate, American, and Russian making over 28s. Flour, after several advances during the past few weeks, was firmly held, with a further hardening tendency, and English and foreign malting barley was in good demand at higher prices. Oats were fully 3d dearer, and beans and peas very firm.

Leicester, Saturday.—Good attendance of buyers and dealers, but short supplies of new home-grown wheats, samples being held back. Trade steady, the samples being very variable. Red wheats, 36s to 39s; white wheats, 37s to 40s per 36 stones; fine bright samples of barley in steady request at 28s to 32s per 32 stones; oats in good request at 19s to 22 per 24 stones.

Lincoln, Friday.—Large attendance and good supply of English wheat, quotations showing an advance of 6d per qr on the week. Fair supply of barley, which realised 1s per qr more money. Oats: A good trade at 6d advance. Beans firm at late rates.

Manchester, Thursday.—English wheat quiet, and about 1s per qr dearer. Foreign, 1½d. to 2d per cental higher on the week. Flour 2s per sack dearer, and Indian corn varied from 2d to 3d dearer. Oats 1d, and foreign barley 2d to 2½d per bushel, and bran 6d a load higher on the week.

Newark, Wednesday.—Good attendance, with a fair show of samples, which continue very firm. Quotations: White wheat, 39s to 40s; red, 38s 6d to 39s 6d; malting barley, 28s to 31s; grinding, 26s 6d to 27s 6d; white oats, 19s 6d to 20s 6d; black, 19s to 20s; old beans, 36s to 37s; new, 30s to 32s per qr.

Newcastle-on-Tyne, Saturday.—The demand for wheat at our to-day's market was not so active; prices, however, were fully maintained. Maize was held for 6d advance, and buyers had no other option than to pay the advance, this article being scarce on spot. Beans and peas steady at late rate. Fine dry oats made slightly more than last week; common sorts, however, remain unchanged. Barley, slow sale at the moment.—Joseph Pollard and Co.

Newport, Wednesday.—Market very strong. Maize 2s higher on the week, present price from 29s to 29s 6d. Barley also dearer, 27s to 27s 6d. Very small supply of English oats, which were in very good demand at an advance in prices. Flour 32s 6d. Wheat offals in good request at advanced prices.

Northampton, Saturday.—There was a good attendance. Wheat was not much in demand and suffered a relapse in prices after further rise at the beginning of the week. Good demand for

barley and oats at unchanged prices. New wheat, 34s to 36s 6d; new barley, 26s to 32s; old white oats, 24s to 26s; new white oats, 18s 6d to 21s; new black oats, 18s to 19s; old beans, 31s to 33s; new beans, 31s to 33s; peas, 33s to 35s; flour, 32s to 36s.

Nottingham, Saturday. — Wheat in fair supply. Slow trade at late rates. Barley only moderate show, and 1s dearer. Oats but few offering, and 6d higher. Beans firm.—ROBT. HUBBLE.

Norwich, Saturday.—There is a relapse in the wheat trade, but farmers resist anything but a slight reduction in price. The supply is larger and values may be written about the same as last week, but lower than the mid-week markets. Values 38s per qr delivered, feeding stuffs demand quiet, maize and grinding barley slightly dearer, linseed and cotton cake steadier, English oats 19s to 20s per qr, barley firm trade and good supply, prices from 29s to 35s.

Peterborough, Saturday.—A fair supply of wheat which found a quiet trade at about last Saturday's prices. Oats quite at unchanged rates. Barley small supply and rather dearer. Wheat, 37s to 38s; barley, 27s to 32s; oats, 19s to 20s. —THOMAS HILL AND SON.

Plymouth, Thursday.—There was a very good attendance at our market here to-day. Wheat 1s 6d dearer. Maize 1s 6d dearer. Barley 6d dearer. Oats firmer. Flour very firm.—ORLANDO DAVIS AND CO.

Preston, Saturday.—More favourable reports as to wheat crops have given a decided pause to the market, and during the week there has been a decline of 1½d to 2d per cental, the tendency being towards weakness. There was a moderate attendance at to-day's market, but farmers have not yet commenced seriously to offer any portion of the new crop. The prices obtainable were barely equal to those of last Saturday. Flour unchanged. Quotations:—Wheat white, new, per windle of 220 lb, 15s 6d to 16s; ditto red, 14s 6d to 15s; oats, old, per bushel, 3s 6d to 3s 8d; ditto new, 2s 11d to 3s; beans, per windle of 220 lb. 16s 6d to 17s.

Reading, Saturday.—Very good attendance. The advance in the price of wheat was maintained, and the following may be taken as a correct return of parcels held or sold:—Wheat, 36s to 42s; malting barley, 28s to 35s; grinding barley, 26s to 28s 6d; oats, 18s to 21s.

Retford, Saturday.—The upward tendency in wheat was checked here to-day, in sympathy with reports from abroad, and prices were 1s lower at 37s to 38s per qr. There was a good demand for malting barley, especially for the best lots, which were on the up grade, and worth 29s to 32s; secondary, 27s 6d to 28s; grinding barley, 27s. Maize was again dearer, and quoted at 30s to 31s delivered here. New oats 19s to 20s, and old ditto up to 25s and 26s per qr. Beans as before.

Ripon, Thursday. — A good attendance of farmers, and a fair trade. Prices show an advance all round. New wheat, 37s to 38s; foreign wheat, 46s to 48s; grinding barley, 27s to 28s; malting ditto 28s to 34s; new oats, 20s; old ditto, 24s to 26s; round maize, 30s; flat ditto, 30s per qr.

Sheffield, Tuesday.—The market continues very strong, and all grain has had a further increase in price since a week ago. Wheats are sold at an advance of 1s to 1s 6d per qr on the week. Beans, oats, and barley quoted 6d to 1s per qr more. Maize very firm at 1s 6d to 2s per qr advance on the price current last Tuesday. Blue peas sparsely offered at several shillings per qr advance on early prices for new corn. Quotations:—New white wheat, 38s to 38s 6d; new red ditto, 38s to 38s 6d per 504 lb; black oats, 24s to 25s; white ditto, 24s 6d to 25s; ditto new ditto, 21s 6d to 21s per 336 lb; grinding peas, 35s to 35s 6d; new blue ditto, 75s to 90s per 504 lb; English beans, 35s 6d to 37s 6d per 532 lb; grinding barley, 27s to 27s 6d; malting ditto, 28s to 32s per 448 lb; Indian corn small, 30s to 30s 6d; Plate ditto, 29s 6d to 30s; flat ditto 31s to 31s 6d per 480 lb.

Stamford, Friday.—The sudden advances in the price of wheat experienced during the past week underwent a slight check to-day, and farmers were rather disappointed to find that the almost daily rise had not been maintained. There is still a belief that rates will be much higher, and farmers were not easily drawn to sell at less than 38s per qr, the majority declining to part at less than 39s. First-class barley was not very plentiful, and trade was quiet, those asking 34s for malting barley being persistent in their demands; a few lots were disposed of at 32s; grinding barley, 25s 6d to 26s 6d; oats, 19s to 19s 9d; maple peas, 70s and upwards; beans, 31s 6d to 32s 6d.

Stockton, Wednesday. — There were a few samples of English wheat, which made from 35s to 38s 6d per qr, and about 1s 6d advance over last week. Foreign wheat was steady at an advance of 1s 6d over last week. Maize 1s 6d per qr dearer on the week, and oats also dearer. Malting barley made 26s to 30s per qr according to quality. Farmers, however, were asking much more money, and this checked business.

Tunbridge Wells, Friday. — New white wheat, 38s to 40s; new red ditto, 37s to 38s; barley, 26s to 30s; grinding ditto, 24s to 25s; oats, English, 20s to 22s; rye, 26s to 28s; peas, 34s to 36s; beans, 34s to 36s; tares, 40s to 48s; maize, 28s to 32s.

Winchester, Saturday.—English and foreign wheat quiet but unchanged. Barley and maize 6d dearer. Oats scarce and unaltered. Flour a fair trade at late rates.—FEAR, COLEBROOK AND CO., LTD.

Wisbech, Saturday.—A small supply of grain at market. Wheat 1s to 2s lower. Reds, 37s to 38s 6d per 504 lb. Oats from 19s 6d to 20s 6d per 336 lb. Barley, 27s to 30s per 448 lb.—JAMES FLETCHER.

Wolverhampton, Wednesday.—There was a fair attendance. Business was equal to that of late. Quotations: English oats, old, 15s; new, 12s per 190 lb; English wheat, 15s 6d per 216 lb; English beans, 14s per 196 lb; malting barley, 30s to 34s per 448 lb.

Worksop, Wednesday. — Large attendance but very little grain on offer, and not sufficient to meet requirements. Wheat, barley, and oats about 1s per qr dearer. White wheat, 36s to 37s; red wheat, 35s to 36s 6d; best malting barley, 29s to 31s; secondary barley, 27s to 28s 6d; grinding barley, 26s 6d to 27s 6d; old white oats, 25s to 27s; new white oats, 19s to 21s 6d; old black oats, 24s to 28s 6d; new black oats, 18s to 20s; maize, 28s to 29s; English beans, 37s to 39s per qr.

York, Saturday.—Excitement has gone out of the wheat trade, and prices are decidedly lower than during the week. Fine white wheat made 37s to 38s; red and mixed, 36s to 37s per qr of 36 stones. Malting barley was firm and in good demand, fine making 30s to 32s; good, 28s to 30s; and feeding barley, 26s to 28s per qr of 32 stones. Oats firm, and 6d dearer; white, 20s to 21s; black, 19s to 20s; and common, 18s to 19s per qr of 24 stones; old beans, 34s to 36s; and rye, 27s to 28s per qr of 36 stones.

FEEDING STUFFS.

Liverpool, Friday.—Nitrate of soda firm, as also phosphate manures; for the latter there is a moderate demand for autumn deliveries. For this time of the year the consumptive demand for feeding stuffs is very quiet, yet with moderate arrivals and the higher values prevalent at the ports of shipment abroad, prices on this market are well upheld and holders are firm. Feeding treacle, however, is moderately reasonable in value, and meets a fairly good demand from consumers.

—H. JONES LANGAR AND CO.

Mark Lane, Monday.—Linseed Cake: With only a limited quantity of foreign available, either in warehouse or for shipment. The bulk of the trade is forced on to home manufactures, and prices in consequence continue to harden, while Crushers have already advanced their limits fully 5s. per ton. Russian offer sparingly. East India seed pures make last week's prices for arrival. Calcuttas are still obtainable at late rates. London-made remain by far the best value on the market. Cotton Cake.—The recent arrivals of Egyptian have come to hand more or less out of condition, causing a better tone for good sound descriptions, for which holders ask full prices, while English are quiet but steady. Decorticated.—London-made pures command rather more money, also digestive meal, with American brands unchanged. Rape cakes nominal. East India and Ravison unchanged. Maize germ meal.—White American does not offer, but English brands are procurable on slightly easier terms, probably owing to lower value of maize. Maize gluten meal meets a free sale at 5s advance. Rice meal.—Landed lots of Rangoon are firmly held, while shippers have advanced their prices for steamer parcels to come. Locust beans are attractively offered. Dried brewers' grains remain scarce and dear. Nitrate of soda is unaltered.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Fairly good supplies, but trade rather quiet. Quotations for English produce:—Grapes, 8d to 3s; peaches, 3s to 12s per dozen; apples, 3s 6d to 8s 6d per bushel; pomegranates, 7s to 11s per case; pears (Williams), 3s 6d to 6s per half bushel; green figs, 6d to 1s 6d per dozen; melons 9d to 2s; tomatoes 3s to 3s 6d; nuts, 3s to 4s per 12 lb; walnuts (Grenoble) 6s to 7s per lb; carrots, 30s to 35s per ton; ditto, 2s to 2s 3d per bag; shallots, 2s 6d per 12 lb; onions, 1s 6d to 2s per dozen bunches; cucumbers, 6s to 8s per flat; cauliflowers, 4s 6d to 6s; cabbages, 4s to 5s 6d per tally; scarlet runners, 3s to 4s 6d per bushel; endive, 1s 6d to 1s 9d per dozen; celery, 7d to 1s per bundle; horseradish, 10s to 15s per dozen bundles; turnips, 1s 6d to 2s 6d; mint, 1s to 1s 6d; parsley, 1s 6d to 2s per dozen bunches; cos lettuce, 6d to 1s per score; garlic, 2s 6d to 3s per 12 lb; beetroot, 1s 6d per dozen bunches; potatoes, 60s to 80s per ton.

DAIRY PRODUCE.

London, Friday.—BUTTER.—The market for Colonial butter has been brisk, and prices for fresh landed newly-made butter have advanced fully 2s per cwt, and last year's stored butter 4s per cwt on the week. The market for foreign butter has been full of interest this week, the Siberian business has shown especial activity, and values have risen for this variety about 4s per cwt. Danish has advanced by 4s 6d per cwt and the market keeps firm. French salted butter has been advanced by 4s per cwt; "choicest" quality of salt is now selling at 116s to 120s per cwt. CHEESE.—The trade this week has been steady at last week's prices. It is believed that large stocks of English and Scotch cheese are now in farmers' hands, but must be placed on the market very shortly. The total imports of cheese from September 1 to October 12 were 3,500 tons less than in the same period of 1906.—W. WEDDEL AND CO.

TO-DAY'S MARKETS.

THE CORN TRADE.

MARK LANE, Monday, 3 P.M.

English wheat to-day was an irregular market, with good dry samples worth over 40s., and with damp stuff pressed in sale at 1s. decline from a week ago. Foreign wheat touched 48s. for the very finest, and nothing was to be had under 41s., so that the mean average of value was distinctly higher than for English; New York was cabled at 38s. 6d. for prompt shipment of new wheat, which, with 1s. 6d. freight and 1s. other charges, makes a price of 41s. This is 3s. lower than the spot value, and was therefore against the market.

Barley, both English and foreign, was a brisk market, and there were many visitors from the country attracted by the Brewers' and Barley Exhibition, and putting in a couple of hours at Mark Lane *en route*. Prices ranged from 32s. to 38s. for good English malting. Oats were rather in buyers' favour; 19s. 6d. accepted for Vologda, 19s. 3d. for White Sea oats. Maize was held for 29s. per qr., but sales were difficult to effect, in fact this market looks like going back. On the other hand beans, peas, rye, buckwheat, and tares all show a somewhat hardening tendency.

THE FLOUR TRADE.

MARK LANE, Monday, 3 P.M.

The flour market is dearer on the week, but since Friday it has tended to go back a little. Household grade has stopped at 33s. net, and though American sorts are all quoted at an advance, buyers thereat are comparative rarities. Many think that not only American but also Hungarian flour will go back a full shilling before November is with us.

The extreme firmness of wheat, middlings, bran, pollard, sharps, &c., is disconcerting to farmers, and makes the fattening of stock for the winter markets look as though it might be unprofitable. The large deliveries of new wheat into the mills, however, should tell on the prices of milling offals very shortly.

The prices quoted for maize and rice flour are moderate by the side of some of the other quotations, and as these two sorts tend to balance each other's effect in feeding, there may be an increased demand. Country flour is now arriving in London in good quantity, but there is great complaint concerning delays at the railway stations and the difficulty of getting country flour actually delivered into the bakery. This tends to keep up the favour with which bakers regard the produce of the town mills.

CLOSE OF THE MARKET.

THE MARKET CLOSED QUIETLY BUT FIRMLY FOR WHEAT. IN BARLEY A LARGE BUSINESS WAS DONE, BUT QUALITY WAS SOMEWHAT DISAPPOINTING, AND RATHER LOW PRICES WERE TAKEN FOR SAMPLES OUT OF CONDITION.

THE BALTIC.

Monday, 1 P.M.

State of Trade.

Russian wheat cargoes are very firm, Australian and Indian are steady, but both North and South American tend in buyers' favour. Maize cargoes are steady for Russian, but weaker for American. Barley cargoes are firm for Californian, but steady for Russian. Oat cargoes are in buyers' favour. Cotton-seed cargoes have recovered 2s. 6d. per ton from Saturday.

Business Done.

Wheat.—American Red Winter, 8s 5d per cental, November shipment; Argentine, new crop, 40s 6d per 480 lb, February shipment; No. 1 Northern Manitoba, 42s 6d per 480 lb, November shipment; Californian, 43s 6d per 500 lb, November shipment.

Barley.—Russian, 25s 6d. per 400 lb, December shipment; Persian, 23s 9d per 400 lb, December shipment.

Oats.—Russian, 17s 3d per 340 lb, November shipment; Argentine, 18s per 304 lb, February shipment.

Maize.—American, 6s per cental, November shipment; Argentine, 5s 9d per cental, November shipment; Odessa, 29s per 480 lb, November shipment; Galatz, 29s 3d per 480 lb, November shipment.

Linseed.—Argentine, 45s 3d per 416 lb, arrived; Riga, 43s 3d per 416 lb., prompt shipment; Bombay, 48s per 416 lb, prompt shipment; Calcutta, 46s 3d per 410 lb, prompt shipment.

Rapseed.—Calcutta, brown, 54s 9d per 416 lb, prompt shipment; Jamba, 44s 6d per 416 lb, prompt shipment; Ferozepore, 56s 9d per 416 lb, prompt shipment; Guzzrat, yellow, 61s per 416 lb, prompt shipment.

Cottonseed.—Egyptian, £7 8s 9d per ton, due; ditto, £7 6s 3d per ton, prompt shipment; ditto, £7 5s per ton, December shipment; Bombay, £6 2s 6d per ton, prompt shipment.

GRAIN AND FLOUR FACTORS REPORTS.

Flour.—There is no change to report in prices, though at the moment the tone of the market is somewhat quieter, and rather more in buyers' favour.—Greenhill Bros. (Belfast).

Offals.—The demand for bran continues active, and prices remain unchanged—Greenhill Bros. (Belfast).

Flour.—Prices are lower in consequence of he drop in America. Grain.—Round and flat corn in fair demand, but prices are easier in sympathy with America. Grinding beans steady and in good demand. Pease very scarce and dearer. Oatmeal in sellers' favour. Oilcake in better request. Oats are firm. Mill stuffs in good demand at full prices. winter wheat patents, 30s 6d to 31s 6d per 280 lb; spring wheat patents, 32s 6d to 34s 6d per 280 lb; American corn, 17s 9d to 18s per 280 lb; round corn, 16s 6d to 16s 9d per 280 lb; grinding beans, 19s per 280 lb; white pease, 22s 6d to 23s per 280 lb; broad bran, 117s 6d to £6 per ton; medium bran, 112s 6d per ton; fine thirds, 137s 6d to 140s per ton; common thirds, 120s per ton; American oilcake, 150s 6d to 152s 6d per ton.—McKinnon and McDonald (Glasgow).

Milling offals.—A further advance of 2s 6d ton must be written on all offal with the demand in excess of supply.—John Bawcomb and Co.

Flour. — Trade to-day has been quiet but steady at last Monday's prices, the depression of the latter part of the week having been fully recovered.—T. S. Medill and Sons, Ltd.

Wheat in moderate supply; a quiet trade, at prices of last Monday. Flour unchanged. Maize firm. Barley 6d. and 9d. lower. Oats dull.—Coventry, Sheppard, and Co.

TERM MARKET.

The past week has been one of very busy markets, and a large number of transactions has been registered. We can only chronicle the latest prices paid for future delivery.

American Red Winter wheat	8s. 5d.	Nov. delivery.

SEEDS.

Mark Lane, Monday.—With little improvement in the weather, the sowing demand drags. Rape dearer. Mustard unchanged. Rye in good demand at present high prices. Winter tares would seem an extraordinary fine crop, still offering freely in buyers' favour. Seed wheats in fair demand; prices unchanged. Peas, more inquiry, but backward supply. English trefoil, white Alsike, and reds are all dearer, with good business passing. In grasses, Perennials and Irish Italians rather easier after the stiff rise experienced.—John Pickard and Co.

THE MARK LANE EXPRESS SUPPLEMENT FOR THE HOME

Conducted by "PEPITA"

THE NEWEST FASHIONS.

Purple is one of the reigning autumn and winter colours. The most marvellous purple headgear for the autumn is now appearing in many of the smart shops, and ribbon counters, veil counters, even suit departments and dress goods emporiums are all filled with a wealth of the rich purple shadings. In the millinery shops the use of purple in both hat and trimmings is most striking. The material employed to make some of the hats is a heavy satin, which is to be used for many early autumn hats. One shape is that of a modified mushroom, the brim both on top and underneath being covered with the satin put on quite plain. The crown is made of the satin, very full and soft, the material being guaged and gathered most effectively. The hat noticed was trimmed with purple coque feathers in the same shade as the satin and chous of purple maline.

* * *

Purple felt hats with facings of grey, black, or a varying shade of purple are also seen, and when the hat is thus faced with a different colour the feathers show both shades. A mingling of tan and purple, grey and purple, or two shades of purple in this fashion is most effective. Purple feathers are also introduced on hats of other colours in a way that is most effective. A pale green hat, which had darker green velvet trimmings, was made quite a dream of colour by the addition of a delicate lavender wing.

* * *

Whether an effort is to be made to supplant the useful brown veil with a purple one has not yet been determined, but the great abundance of purple veiling would suggest such a possibility. Of course, the purple veil looks well enough with the purple suit and hat, but when it comes to combining this veil with a costume of another hue those of conservative taste hesitate. The brown lace veil, like the brown hat, is more harmonious with a greater number of costumes than any other hue could possibly be, and beautiful as purple is on the rare occasions on which it is used well, certainly even its most devoted admirers cannot maintain that it is as universally becoming as the brown, which it is perhaps destined by the arbiters of fashion to replace.

* * *

There are many varieties of materials that are suitable and attractive for cool autumn days. It is possible, of course, to make any fabric heavy enough if the lining be warm, and certainly most taffeta silks are heavy and warm enough as linings to make even chiffon or thin voile seem like a lightweight cloth. But to the fastidious minded there is nothing that takes the place of materials in which there is wool. The lightweight cloths, those exquisite fabrics that are now woven, are especially well suited to autumn, besides which they have the added advantage that they will hang well and drape well in accordance with the soft, graceful outlines that fashion at the moment is demanding.

* * *

Most effective, becoming, and harmonious is a gown of lightweight mauve cloth, the skirt of which has no trimming, excepting perhaps a plain or embroidered band just around the hem. This skirt is tremendously wide and at the same time is so gored or cut that while it is pleated around the hips the pleats take up little if any room, and do not in any way add to the width of the hips. The bodice is draped to match the skirt, and while it has the kimono effect of sleeves the effect is tremendously modified, and is far more graceful than the original idea. The only trimming is on the sleeves and where the folds cross in the front of the bodice. These are outlined with plain embroidered bands. At the throat there is a fitted yoke and collar or chemisette of fine lace, and under the kimono sleeves are lace or chiffon ones. Just a touch of colour can be introduced into the buckle at the belt or in the knots of ribbon in the sleeves, but these are by no means necessary to the finish or appearance of the gown.

* * *

If so desired this model of a cloth gown can also be utilised for crêpe de Chine of the more expensive quality. The cheaper qualities do not look well when made up plain. And the moment embroidery is used, or embroidered trimmings, that moment the gown itself is changed from one of harmonious simplicity to the elaborate style that is not nearly so smart. This style of gown is perfectly possible and extremely attractive made in the soft Liberty satins, and also is effective made in velvet of the chiffon or panne variety, both in dark or light colours—not in black, however. In black velvet it would be heavy and ineffective. Oddly enough, it does not look bad in black cloth.

* * *

In choosing material to copy any of the models that are exhibited this autumn the greatest amount of care should be taken, because sometimes a model that looks well in one material would look very bad in another, and the same as to colours. This of necessity means spending considerable time and thought upon the mundane matter of dress. But it will be found well spent in the results that are obtained, for certainly it pays to have a gown satisfactory, and it is attention to these little details that makes good results. For instance, sometimes a plain design would look well in one model when a figured would look very bad, and *vice versa*.

* * *

The graceful gown shown in the sketch is of grey cloth, made with a semi-Empire corsage. It is trimmed with a scarf of Russian embroidery. The yoke and sleeves are of white silk.

A GRACEFUL GOWN.
PAPER PATTERN 1/6½. POST FREE.

The Human Figure.

The proportions of the human figure are strictly mathematical. The whole figure is six times the length of the foot. Whether the form be slender or plump, the rule holds good; any deviation from it is a departure from the highest beauty in proportion. The Greeks made all their statues according to this rule. The face, from the highest point of the forehead, where the hair begins, to the chin, is one-tenth of the whole stature. The hand, from the wrist to the tip of the middle finger, is the same. From the top of the chest to the highest point in the forehead is a seventh. If the length of the face, from the roots of the hair to the chin, be divided into three equal parts, the first division determines the place where the eyebrows meet, and the second the place of the nostrils. The height from the feet to the top of the head is the same as the distance from the extremity of the fingers when the arms are extended.

To Clean Glass.

Remove the chill from some clean, soft water, put a small piece of soda into it. If decanters are to be cleansed pour the water into them, add a few small shot, or brown paper cut into small pieces; shake them well. A hair bottle-washer, or slip of whalebone with a piece of sponge attached, should be used. When the dirt and stains are loosened, rinse in cold spring water, then put the decanters to drain. When dry, use powdered rotten stone for the outside, and wipe with a clean cloth; they will have a brilliant polish. The same directions may be followed for all kinds of glass manufacture. Ornamental parts may be cleaned with a tooth-brush. Glass, being expensive, as well as brittle, requires that it should be washed as soon as done with, and put away at once.

Decorating and Furnishing the Hall.

Of all the rooms in the house, the hall should be the most inviting. The appearance of the hall generally is the keynote of the house, and a cheerful entranceway should always greet the visitor and occupant alike.

Halls are of such different shapes and sizes that it is hard to lay down any rules for the arrangement of them. From the very small hallway of the two-storey and basement town house to the grand foyer of the country mansions, there is a great scope and a vast field in the possibility of decoration and colour schemes.

For the house of medium size and where the purse is somewhat limited, the following ideas can be carried out successfully by the housewife, with the aid of a carpenter and painter, or perhaps the older boys in the house can help in procuring the desired results.

In some halls there is but little wall space, for windows, doors, and staircase take up much of the room, but where there is a reasonable amount of space the following scheme may be carried out to good advantage:—

The woodwork should be in light-coloured paint or ivory enamel, the frieze in pale green with a stencilled design, somewhat on the Empire style. This design can be painted on the tinted or flat-papered frieze with fresco colours or a solid tint of old-red.

A picture moulding should be dropped twelve or fifteen inches from the ceiling, according to the height of the room, and below this the walls may be covered with an ingrain paper in old-red. This paper can be plain or ornamented with a very small and inconspicuous pattern running all through it.

Four feet from the floor a rail of wood two inches wide should be made fast, and similar rails should be attached in a vertical position, forming panels. These strips are to be nailed or screwed fast to the wall and finished all around the edge with small mouldings.

The panels can be finished in old-green, golden-brown, or dark red; it may be applied to the wall with heavy paste.

It is best always to have the floor of a hall varnished and polished. There are several good wax preparations made for floors, and the latter can be always kept bright and attractive by applying the wax once a week, and rubbing the floor with a woollen cloth. One large or several small rugs can be thrown down, and if the room is large enough some chairs and a table can be accommodated.

Another pretty scheme for the side wall is to begin with a light apple-green at the frieze, using a darker green behind the pictures, and a still darker shade of green burlap in the panels. The woodwork can be in natural wood or cream-coloured enamel, and the floor stained and polished.

All-red, all-green, or a gradation of golden-browns are always pleasing to the eye, and make cheerful colourings for a hall.

The scheme of pictures and hangings is to have all the mountings in passe-partout, with green, black, or dark red bindings. Three-quarter-inch harness rings are attached to the back of the pictures, and these are hung over nails driven in the wall. The rings and nails are blacked with a dead black paint, and the iron work of the lamp and other metal work in the hall is treated in the same manner. The black can be purchased or made by adding dry lamp-black to thin shellac, and applying it with a soft brush.

Umbrella stands, hat and coat racks and settles are most useful pieces of furniture for halls, and if there is room, a table on which a lamp can rest is convenient.

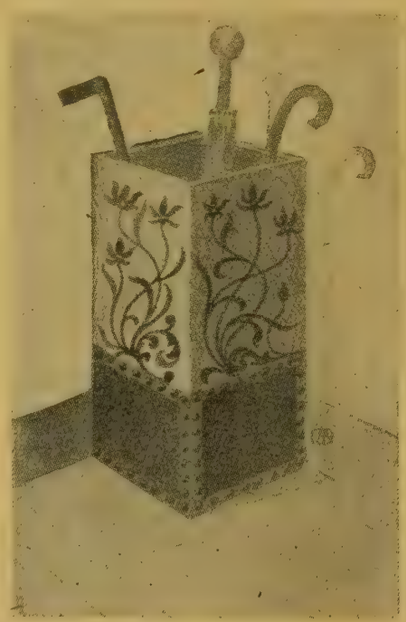
The umbrella stand shown in the drawing is made from four boards, each ten inches wide and thirty inches long. These boards are fastened together by lapping the edge of one over the end edge of another and making the joint fast with glue and screws. The boards are of pine, white wood, or other desirable woods, and are five-eighths of an inch thick. A bottom is made of wood seven-eighths of an inch thick, and a zinc tray two inches high is made by a tinsmith to fit in the bottom of the stand to catch the drippings from wet umbrellas.

The lower part of the stand is covered with dark green or red, and the edges bound with sheet lead painted black. It is held on with oval-headed upholsterer's tacks painted black and driven about one inch and a-half apart.

The ornament on the upper half of the sides is composed of parts cut from sheet lead and applied with slim, steel wire nails. The woodwork can be stained and varnished before the ornament is put on.

The hat and coat rack is an odd piece of furniture, constructed from pine or white wood rails two and three inches wide. It measures six feet and six inches high by twenty-four inches wide, and the base is fifteen inches out from the surbase.

The umbrella rail is thirty inches high from the floor, and projects out eight inches from the back. The side pieces that brace the base and back are cut from wood seven eighths of an inch in thickness with a compass-saw, and the projecting ends of uprights and cross pieces are cut with a compass-saw also. All the joints are lapped, half of the wood being cut



A COMMODIOUS HAT AND COAT RACK.

away in each strip, so when the parts are fitted together all surfaces will be flush.

This rack can be stained and varnished any colour to match the woodwork in the hall, or, if desired, it can be painted or enamelled.

A comfortable and convenient settle may be made by using as a foundation a box eighteen inches wide and high and forty inches long. The lid is arranged on hinges at the back so it can be raised, and divisions and pockets can

UMBRELLA STAND.

be made of holland and tacked at the inside to hold rubbers, dust-cloths, or other things of use on the lower floor.

If troubled with an excess of wax in the ears give them an occasional bath by dropping a little warm milk into them. The head must remain flat for about five minutes while the milk is allowed to rest in the cavity. Dry with a bit of absorbent cotton on the round end of a hairpin. Do not go out immediately after having given the ears this treatment.

ROUND-ABOUT NOTES.

The land of the Nile is beginning to educate its women, and has just welcomed its first girl graduate, the B.A. degree having been recently gained by a Moslem girl student. Within the last few years female education has made great strides in Egypt, which now boasts of seven Government schools for girls, the teachers of which have been trained in the Women's Normal School at Bonlak.

* * *

There are many anecdotes about Madame Adelina Patti, but one of the prettiest is the following:—She stopped one day at the door of a little cottage to drink a glass of milk, while the old lady of the house regaled her guest with fabulous stories of Madame Patti. Then the mistress of Craig-y-nos made herself known. "I am Madame Patti," she said. The rustic hostess was delighted, and with charming naiveté answered: "Oh, then, you will be kindly pleased to sing me a song?" "Very well," answered the other. "Shut the door, and I will sing." The door was shut, and Madame Patti sang "Home, Sweet Home." In other words, her glass of milk was paid for with notes to the value of about £100.

* * *

Mrs. William Astor has a wonderful snake ring which literally writhes in constant motion on her finger. It is constructed of flexible gold wire, each scale being represented by a loop of wire, in which a ruby, an emerald, or an amethyst is firmly set. The lightest movement of the fingers sets the wires quivering, and the ring scintillates and seems to go round and round the finger with a serpentine movement that has something weird about it. It was made in Egypt.

* * *

Sweden has doctors, but no doctors' bills If you have occasion to call in a physician, you will find him not only skilful, but a highly educated and most honourable gentleman. You will also have another proof of the honesty of the Swedes and their friendly confidence in each other. Swedish doctors send no bills to their patients. What you shall pay your physician is left entirely to your own choice. The rich pay him liberally, whether they have need of his services or not, if he has been once retained by them. The poor pay him a small sum, and the very poor pay him nothing. Yet he visits the poor as faithfully as he does the rich. On the last day of the year you put into an envelope, addressed to your physician, a sum of money which you think not only sufficient to compensate him, but in accordance with your position in life, and enclosing your card with the money, send the envelope by a servant to your doctor. The servant returns with the card of the doctor in a sealed envelope directed to you. This shows that he has received your money, and no word about the matter ever passes between you.

* * *

The ancient city of Rouen, France, owns the very earliest specimen of the larger varieties of the ancient clockmakers' triumphs. It was made by Johan de Felains, and was finished and set going in September, 1389. So perfect in construction is this ancient time-recording machine that, although it has been regularly striking the hours, halves, and quarters for more than a half-thousand years, it is still used as a regulator. The case of this early horological oddity is six feet eight inches in height by five inches broad. For 325 years it continued to run without a pendulum, being provided with what the old-time clockmakers called a "foliot."

* * *

When Americans visit Havana they are confronted with many peculiar customs. One of the most startling and revolting is that which prevails in regard to the dead. Colon Cemetery, a beautiful burial ground, laid out in romantic walks, arched with superb trees and adorned with costly monuments and classic cenotaphs, is the last home for all, grandee and peasant alike. The rainbow effects of the city's architecture are carried out here, as revealed in the various colours of the crosses which mark the graves; but suddenly, and without warning, the vision is astonished with a grotesque contrast truly a shocking commentary upon civilisation. It appears that the ground in this cemetery is leased, not sold, and if after a term of five years the renewal rent is not paid, the dead forfeit their resting-places. Their bodies are ruthlessly dug up and cast into a common heap, exposed to public view along with thousands of other skulls and bones of men, women, and children who can never be traced by posterity. "PEPITA."

NEEDLEWORK.

A New Method of Appliqué-work.

The artistic merit of appliqué-work is unquestioned, and the very satisfactory results that can be achieved with two or three simple colours will always make it a favourite means of refined feeling in the decoration of the home. The ordinary form of appliqué-work entails a considerable amount of somewhat tedious stitching, which, although it is time well spent on a piece of work which has to stand hard wear and frequent washing, yet will often deter us from executing many effective decorative articles which we should otherwise like to possess.

FIG. 1. DESIGN FOR CURTAIN BORDER.

This new form of the art is so simple and quickly done and the final effect so much more attractive than the old method, that although it will not allow of being washed, yet it will well repay the small amount of trouble expended, especially for such things as piano and mantel draperies, curtain borders, portieres and wall hangings.

The method of procedure is to affix the various pieces of coloured material forming the design to the background by means of an adhesive, such as corn-flour paste, and then to outline and complete the design with metallic paint.

Fig. 1 is a simple border design for curtains, which would be an excellent example for the beginner to attempt. It could be worked out in coloured linen, or art serge.

A complete drawing must first be made the full size required on heavy paper, and also a complete outline on the article to be decorated. In the case of a repeat-design such as this border, one drawing of the repeat will be sufficient on the paper, but the design must be drawn in its entirety on the fabric. The various parts of the design are now cut out of the paper and used as patterns to cut the coloured material to be applied. The cut paper patterns will also be found useful to trace the design on the background fabric. Ordinary coloured crayons will do excellently for this purpose, it being an easy matter to trace around the paper patterns with them. The curtain must be stretched on a flat table by means of thumb-tacks, a few old newspapers being spread beneath it to give a soft, even surface. The design being complete in outline and a sufficient number of the component parts being cut upon the contrasting material, all will be ready for making up the pattern. A paste is made from a teaspoonful of corn-flour wetted with water, to which is added a cupful of boiling water, it being used warm and applied with a stiff paste brush. The large heart-shaped pieces will be easiest to fix, so had better be done first. On the back of the first one spread an even, thin layer of paste with the brush and lay it in position on the background, and press it evenly and firmly with a warm iron to complete the adhesion. A piece of paper should be used between the iron and the fabric to prevent the latter taking a gloss, which is undesirable. The remaining pieces are all fixed in the same manner, and the design is then ready for outlining and completing with gold paint. Use a small, round, hog-hair brush for this purpose, and apply the paint evenly and with a bold touch. Other metallic colours can be used if desired, but the best effects seem always to be got with dull gold.

It will be found that the work can be done very quickly, and if a careful selection of harmonious colours is made the effect will be both artistic and pleasing.

The curtain border would look well on blue linen with the hearts and leaf-shaped pieces in dull green and the outlines in gold. This design has been also worked out in heavy art serge of a dull blue shade with the design in olive-green and gold. In such material the effect is somewhat rougher, but when done on a large scale is very rich in appearance.

Fig. 2 is a broad design suitable for a portiere border. Executed in coloured linen it would be excellent for a bedroom or dressing-room. A suitable scheme of colours would be pearl-grey for the background, with a pale neutral green for the circles, cream or pale pink for the blossoms, and a slightly darker shade of green than that used for the circles for the leaves, the whole being outlined with pale gold. The design should be placed about six inches from the bottom of the curtain and should be about eighteen inches in width.

Fig. 3 worked to a scale of about twenty inches square, would be suitable for a table centre, or about thirty or forty inches as a small table-cover. The *motif* of the design is the hydrangea, and a good background would be pale buff-coloured linen, with the trusses of blossom in pale pink, the leaves dull green, the outlining in gold. The bunches of blossom are to be cut out in one piece and the detail added after it is applied. As a table-cover it should be completed in somewhat thicker material, such as Roman satin or coloured felt, in which case darker shades for the whole thing would be more suitable.

Many uses for this work will suggest themselves to the reader, as it is adaptable to almost anything of a decorative nature. It would be a beautiful method for finishing a high four-fold screen in tones to harmonise with a room,

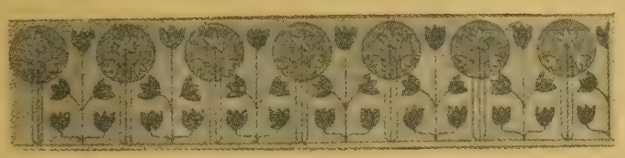


FIG. 2. DESIGN FOR PORTIÈRE BORDER.

in which case coarse canvas would be the best material to work with. Short lengths of canvas can often be bought very cheaply and of exquisite shades. These would be entirely suited for the purpose. Harmonious colouring and avoidance of any strong contrasts are the keynotes of success.

Wave Lace.

Cast on 26 stitches; knit across plain. 1st row: Slip 1, knit 5* (over, knit 2, narrow, over, narrow, over, knit 3, narrow, over, narrow, over, narrow, over, knit 5). 2nd row: Over, narrow, knit rest plain. 3rd row: Slip 1, knit 6, like first row from *. 4th row: Over, narrow, rest plain. 5th row: Slip 1, knit 7, like first from *. 6th row: Over, narrow, rest plain. 7th row: Slip 1, knit 8, like first from *. 8th row: Over, narrow, rest plain. 9th row: Slip 1, knit 9, like first from *. 10th row: Over, narrow, rest plain. 11th row: Slip 1, knit 10, like first from *. 12th row: Over, narrow, rest plain. 13th row: Slip 1, knit rest plain. 14th row: Over, narrow, knit 2, narrow, over, narrow, over, narrow, over, narrow, knit 3, over, narrow, over, narrow, knit 2, over, narrow, knit rest plain. 15th row: Slip 1, rest plain. 16th row: Like fourteenth. 17th row: Slip 1, rest plain. 18th row: Like fourteenth. 19th row: Slip 1, rest plain. 20th row: Like fourteenth. 21st row: Slip 1, rest plain. 22nd row: Like fourteenth. 23rd row: Slip 1, rest plain. 24th row: Like fourteenth. 25th row: Slip 1, rest plain. 26th row: Over, narrow, rest plain. Begin at first row.

Household Hints.

If ink is spilled on a carpet, pour milk over it immediately, without stopping to wipe up the ink. Then wipe up the whole thing, and the stain will almost disappear. The grease left by the milk may be removed by rubbing with soap and water.

Paraffin may be removed in an equally easy way by scattering oatmeal thickly over the spot and letting it remain overnight. It will entirely absorb the oil, and make the carpet even fresher and brighter.

Carafes of cut glass look best when cleaned with egg shells. Break up the shells, put a handful into hot soapsuds, and pour them into the carafe, shaking thoroughly. Use a second suds for rinsing, give them a final rinsing in clear water, and they will then look very bright and clean.

A Few Apple Recipes.

Baked Apples. The main point is the apple—the many variations in the baking being secondary. Lay it down as a fixed law in your kitchen that sour apples only are available for baking; the more sour the better. A tart apple will be passably good, but a downright sour one is better. To prepare apples for baking, wash, dry, and core them, or merely cut out the stem and blossom ends. Place them in a pie pan with a little water, and bake in a moderate oven. The core cavity may be filled with butter and sugar, if desired, or the apples basted with a light sugar syrup enriched with butter (brought to the boiling point) and flavoured with nutmeg or grated lemon peel.

Apple Sauce. Again use only tart or sour apples. No. 1. Pare, core, and quarter the apples, put them in an unburned granite saucepan, and less than half cover with water; cook, covered, until perfectly tender, remove without breaking, sprinkle well with sugar, sweeten the juice slightly, and pour over the sauce. Grate over the top a little nutmeg. No. 2. Pare, core, and quarter, sprinkle well with sugar, add a little water, and cook, covered, until tender. A little lemon peel is a nice addition. No. 3. Pare, core, and slice the apples; add a little water, cook until soft, sweeten to taste, and rub through a colander. Grate nutmeg over the top.

Scalloped Apples.—Cover the bottom of a baking dish with sliced sour apples, sprinkle well with sugar, grate over some nutmeg or dust with cinnamon, and cover with soft bread-crumbs moistened in melted butter; continue these layers until the dish is full, finishing with bread-crumbs; add half a cupful or less of water, and bake for half-an hour, covered; remove the cover, and bake until brown. Serve cold or hot, with cream.

Apple Pie.—If the apples are sufficiently sour there will be no question about their being perfectly soft when the pie is baked. Heap a pastry-lined pan well with apples, sprinkle heavily with sugar to which a teaspoonful of flour has been added and mixed through, dot with butter, dust well with allspice, add a little water, cover with a top crust, and bake.

Apple Souffle.—To a pint of apple sauce, unsweetened, made as in receipe No. 3, add two-thirds of a cupful of sugar, 3 beaten egg yolks, and the juice and grated peel of a small lemon. When cold add the beaten whites of the eggs, turn into a buttered baking dish, cover with soft bread-crumbs, moistened with melted butted, and bake 20 minutes. Serve with cream.

Apple Fritters.—Slice the apples very thin, not across, but lengthwise toward the core from the outside, and pour over them some brandy; there need not be enough to cover them, as they may be turned over from time to time. After soaking for 1 hour or longer, according to the degree of brandy flavour relished, add the apples to an equal bulk, or a little over, of batter. Sauté in a spider (2 tablespoonfuls to a fritter) or fry in deep fat. Lard and beef suet mixed make the best fat for frying.

FIG. 3. APPLIQUÉ CENTREPIECE.

Hard putty may be softened in a few minutes by a lye made of wood ashes.

POTATOES.

Borough, Saturday. — Fair supplies met a generally quiet demand. Epicures, 70s; Blacklands, 70s; Up-to-Dates, 80s; British Queens, 70s to 80s per ton; French, 3s 3d; Dutch, 3s 3d per bag.

Berwick, Saturday.—Owing to the unfavourable weather trade was sharper. Reports speak of disease in the Border crop.

Carlisle, Saturday.—The supply was small, and met a fairly brisk demand at 7d to 8d per stone.

Doncaster, Saturday. — Potatoes rather scarce owing to the heavy rain, but a fair trade. Prices advanced 1s, being 8s to 8s 6d per load of 18 stones.

Goole, Wednesday.—The attendance was very good, but few lots of potatoes changed hands. Retail price about 7d per stone.

Lancaster, Saturday.—Potatoes, 9d per stone.

Malton, Saturday.—The very wet weather is causing disease to spread in the late crop of potatoes. Wholesale prices were irregular at 65s to 75s per ton picked. Good lots, retail, 4s per bag of 8 stones. British Queens seem to be selling the best.

Manchester, Saturday.—Potatoes: Yorkshire, 10s; Cheshire, 7s to 7s 6d; Lincoln, 9s to 10s per 18st.

Preston, Saturday.—Potatoes: 8s to 9s per load of 240 lb.

Retford, Saturday.—A small supply. Best home-grown made 7s 6d to 8s, and other sorts 7s per load.

Spitalfields, Saturday.— A moderate demand prevailed for the moderate assortment. Epicures, 70s; British Queens, 70s to 80s; Up-to-dates, 80s; Blacklands, 70s per ton; French and Dutch, 3s 6d per bag.

Whitby, Saturday.—Potatoes, 8d per store.

Worksop, Wednesday.—Plentiful supply of locally grown potatoes, and trade very slow, best samples making 7s 6d to 7s 9d per load of 18 stones.

York, Saturday.—There was a steady trade for potatoes, though few were offered, farmers being busy "pieing," and in many cases farmers are holding back supplies for a rise. Prices ranged from 67s 6d to 72s 6d per ton.

WET AND DRIED GRAINS.

Mark Lane, Monday.—Wet Grains: With a steady trade prices have a firmer tendency, and business has been done during the week at 18s to 19s ale, 3s less for porter per ton on rail, London. Dried Grains.—Prices at home continue steady, lacking much upward tendency owing to slackness of Continental demand, 102s 6d ale and 97s 6d mixed are being paid ex factory, in buyers' bags. At these prices same compare favourably with millers' offals. American cane treacle, 95s per ton; and kiln-dried sea-damaged wheat from 22s per qr.—HAMLYN AND Co., 37 and 38, Mark Lane.

TO-DAY'S MARKETS.

CATTLE.

Metropolitan Market, Islington.

	Monday, Oct. 21, 1907. British.	Total.	Monday, Oct. 22, 1906.

Sheep and Lambs	4,490	4,490	4,730
Calves	10	10	10
Pigs	—	—	—
Milch Cows	40	40	50

Quotations per 8 lb. (sinking the offal).

ENGLISH.

	Inferior. s. d.	Second. s. d.	First. s. d.
Beasts	2 4	3 6	4 10
Sheep	4 8	5 6	6 0
Lambs	—	6 0	6 8
Calves	—	—	—
Pigs	—	—	—

Milch cows, per head, £16 to £23.

British arrivals include as follows:—Scotland, 10; Eastern Counties, 51; Midland, Home, and Western Counties, 974; Devon, 50; Ireland, 155.

We note to-day an increase of 190 head in the number of beasts offered for sale compared with Monday last, the arrivals including a larger number of Devons, and a few cross-bred Scotch, the former, however, made our top quotations. For all grades of English cattle a slow trade was experienced with a downward tendency in regard to value. The Irish arrivals consisted of 66 Dublins, 69 Waterfords, these sharing in the poor trade experienced, and being quoted 2d. per 8 lb. lower in value, and 20 stones (one and two year old heifers), these latter meeting with very little inquiry. Fat cows and bulls met with a very limited inquiry, late currencies being difficult to maintain. A clearance will not be made to-day.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day. s d	s d	Monday, Oct. 22, 1906. s d	s d
Scotch	—	—	—	—
Devons	4 8 to 4 10		—	—
Herefords	4 4 ex 4 6		4 4 ex 4 6	
Norfolks	—	—	—	—
Runts	4 2 to 4 4		4 2 to 4 4	
Lincolns	3 10 to 4 0		3 6 to 3 8	
Irish	4 0 to 4 2		3 10 to 4 0	
Canadian	—	—	—	—
Fat cows	3 4 ex 3 6		3 4 ex 3 6	

There was an increase of 280 in the number of sheep and lambs penned compared with Monday last. For all English descriptions of both wethers and ewes trade ruled of a very disappointing nature; however, late values governed all transactions. Scotch sheep were in average supply and sold well, sellers both asking and obtaining an advance of 2d per 8 lb in value, whilst Irish, on the other hand were in excess of the requirements and were difficult to vend. The few lambs that were offered for sale cleared early in the day at late values. The supply included 200 Scotch, 1,025 Irish, and 211 from the Eastern Counties.

Undermentioned quotations are at per 8 lb. (sinking the offal) and are for the best of each class penned:—

	To-day. s. d.	s. d.	Monday, Oct. 22, 1906. s. d.	s. d.
7½ to 8 st Downs	5 10 to 6	0	6 0 to 6	2
9 st. Downs	5 8 to 5	10	5 10 to 6	0
10 st Halfbreds	5 4 to 5	6	5 6 to 5	8
10 st Yorkshires	—		—	
12 st Lincolns	—		—	
10 st Irish	5 6 to 5	8	5 2 to 5	4
10 st Down Ewes	4 0 to 4	2	4 4 to 4	6
11 st Halfbred ditto	3 10 to 4	0	4 2 to 4	4
5 st Down Lambs	6 6 to 6	8	—	
6 st Halfbred ditto	—		—	

The few calves on offer met with a very slow trade at less money.

St. Ives (Hunts) Monday.—Beasts, 801; sheep and lambs, 1,601; pigs, 552; horses, 4. Fat cattle fair; stores in good demand; fat and sheep and pigs good trade. Prices: Beef, 7s to 7s 6d; mutton, 8s 2d to 10s 6d; lamb, 9d to 10d; pork, 6s 3d to 7s; milch cows, £14 to £22.

FOREIGN.

Deptford, Monday.—Beasts, 740. To-day's supply compared with Monday last showed an increase of 388 head, and consisted of 420 from the United States and 320 Canadian ranch cattle, these latter remained unsold. Trade ruled of a very slow nature, with a downward tendency in regard to value to the extent of 2d per 8 lb. The best States on offer were quoted at from 4s to 4s 2d; seconds, 3s 10d to 4s per per 8 lb (offal given in). On Saturday 2,000 beasts from the United States were offered for sale, and met with a slow trade, the best on offer being quoted at from 4s 2s to 4s 4d; seconds, 4s to 4s 2d per 8 lb (offal given in). Besides the above, 360 more were withheld from sale.

Liverpool, Monday.—The supply of cattle was larger than last week, demand fair for good quality at prices slightly in buyers favour; rough sorts unchanged. Sheep shown in reduced numberr, and trade good for handy finished weigots at about last week's quotations; middling and rough classes lower in value. Quotations:—Beef, 6½d to 4½d per lb; mutton, 9d to 6½d per lb. At market 1,687 cattle and 7,286 sheep.

FEEDING STUFFS.

Mark Lane, Monday. — Linseed Cake.—Trade is not yet up to general expectation, though principally owing to the position of seed in the oil crushers have advanced prices for home made fully 2s 6d per ton. Foreign makes continue to be sparingly offered. Cotton Cake. — A fair business is passing in Egyptian made, but with one or two heavy arrivals values remain unchanged. Linseed.—The market dropped during the week, but is now steadying up again, and closes 6d to 9d dearer.

LINSEED CAKES.	£ s. d.	Per ton. £ s. d.

HOPS.

Borough, Monday.—The demand for choice qualities of every description is good, and prices for such have a hardening tendency, and there is more doing in the good medium hops, which are being taken for copper purposes; and there are buyers for the very brownest, if free from disease, at their full comparative value. The Board of Agriculture gives the quantity of hops grown this year as 374,129 cwt. The last Government return of the weight of hops used by the brewers, October 1, 1905, to September 30, 1906, was 571,008, now it add to this 50,000 cwt required by exporters, manufacturers of non-alcoholic drinks, yeast making, home brewers, &c., we have a total of 621,008 cwt. This leaves a shortage of 246,879 cwt.—W. H. AND H. LE MAY.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

The trade for fat beasts at Islington, both in regard to prime and second quality, opened with a little more life, rates ruling slightly in favour of the seller. Our top quotation was commanded by a few Scotch beasts which were offered for sale, and cleared early in the day, these being the first consignment this season. The Irish arrivals consisted of 57 Dublins and 32 Waterfords, trade for which ruled of a slow but firm nature at late values. Fat butchering cows were in moderate supply, and met with very little inquiry from both town and country buyers; consequently a slight downward tendency was noticeable. Fat bulls were difficult to cash, and were quoted 2d. per 8 lb lower. On Thursday but few sales were recorded, and what business was transacted was governed by Monday's quotations.

At the Foreign Cattle Market, Deptford, trade opened on Monday of a slow nature, but became firmer as the week advanced, the consignment of States' cattle on Monday being of rather inferior quality. The total number on offer at both markets was 4,052, as against 3,658 during the previous week, consisting of 1,090 British (decrease 50) and 2,962 foreign (increase 444), these latter comprising 2,768 from the United States and 194 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal):—80 to 90 Scotch, 4s. 6d. to 4s. 8d.; 90 to 95 stone Herefords, 4s. 4d. to 4s. 6d.; 95 stone Runts, 4s. 2d. to 4s. 4d.; 100 stone Shorthorns, 4s. to 4s. 2d; 95 stone Irish, 4s. 2d. to 4s. 4d.; 90 stone States, 4s. 2d. to 4s. 4d.; 95 stone Canadian Ranchers, 3s. 4d. to 3s. 6d.; 90 stone fat cows, 3s. 4d. ex 3s. 6d.

The trade at Islington for small best quality sheep ruled of a slow but steady nature, heavy descriptions on the other hand were rather difficult to vend; the same remark applies to the ewe trade. Scotch descriptions were in average supply and were quoted at late values, whilst Irish sheep, being in smaller numbers and wanted, sellers were able to both ask and obtain 2d. per 8 lb. more money. A few choice small lambs were included in the supply on Monday and sold readily. On Thursday one of the markets was held here that has been known since the beginning of the year, however it was quite equal to the demand, the few sales recorded were based on Monday's prices. No sheep were offered for sale at Deptford. The total number penned at both markets was 4,240, as against 4,950 during the preceding week, showing a decrease of 710. Best pens made per 8 lb. as follows (sinking the offal):—7½ to 8 stone Downs, 5s. 10d. to 6s.; 8 stone Scotch, 5s. 10d. to 6s.; 9 stone ditto, 5s. 8d. to 5s. 10d.; 10 stone Irish, 5s. 6d. to 5s. 8d.; 10 stone Downs, 5s. 6d. to 5s. 8d.; 10 stone halfbreds, 5s. 4d. to 5s. 6d.; 10 stone Down ewes, 4s. to 4s. 2d.; 5 stone fat Down lambs, 6s. 6d. to 6s. 8d.

Calves numbered thirty, trade for which ruled of a slow but steady nature, the best on offer being quoted at from 5s. to 5s. 4d. per 8 lb. (offal given in).

Trade in the West.

With keep once more plentiful, stockowners are again holding over their supplies, which are by no means as plentiful as they were, and prices as a consequence are steadily hardening in value for all the more serviceable grades, fresh young barreners well on the road to beef finding a specially ready sale at good prices, ranging from £24 to £32 10s. per pair for the best, and from £18 to £22 or £23 for those showing less condition, the trade for these, however, being nothing like so fast. Stirks are also in more request at from £6 10s. to £10 per head. The milch beast trade has seldom, if ever, been better than at present, and as there is considerable difficulty in adequately meeting the requirements of buyers, exceptionally high prices are the rule, rather than the exception, this being due to the fact that there are many who just at present are bound to buy, no matter at what price demanded, to replace animals which are being weeded out, and, what is of still greater importance, to enable them to keep up their supplies, which in many instances it is incumbent upon them to do under the most stringent conditions. Therefore, it will be easily understood why buyers are giving from £18 to £23 10s. apiece for good heifers—the price many have been paying during the last few days at many of leading stock distributing centres; whilst even for the plainer grades of cows, &c., they are called upon to pay from £12 to £17 and over, simply for the reason that the supply is altogether, just for the present, inadequate to the demand.

In-calvers, especially those of early date, are equally dear, some of the cows selling up to £18 10s. apiece and over, ranging downwards to £9 or £10 for very old bullocks. The demand for store sheep shows no decline; on the contrary, business seems to improve as the season draws to a close, the past week having been quite a phenomenal one for the altogether exceptional prices that have ruled for flock sheep of good character. Of course £8 10s. apiece for Dorset Horn ewes can only be looked upon as a "fancy" price; but plenty of others have been fetching from 72s. up to 100s. apiece and over, and even the diminutive little Southdown has been commanding as much as 91s. and 102s., prices, of course, naturally suggesting a good time for the flockmaster. Of course, the more ordinary runs of sheep are scarcely fetching such figures as we have quoted above; but when ewes, as a general thing, sell from 56s. to 70s., and lambs from 40s. to 55s., things can hardly be otherwise than satisfactory for those who follow sheep culture as an occupation. And everything—what with the scarcity and the exceptional demand for sheep everywhere, despite the abnormal rains, which are causing much anxiety—points to a continuance of high prices for some time yet to come.

The fat stock trade has been characterised by a little less buoyancy than has prevailed for so long, and, though there has been no material drop in values, still we can hardly quote prices as high as they have been. Beef keeps fairly steady for steers and heifers at 11s. to 11s. 6d. per score, which is now an outside figure, but fat cows are distinctly easier, and cannot be quoted more than 9s. 6d. to 10s., except in the case of very young animals, which command another 6d. Veal remains one of the firmest things on the market at 8d. to 9d. per lb. Mutton is distinctly easier—ewes especially so—and we must now quote old to 8½d. as the top price for tegs and wethers, and 7d. to 7½d. for all classes of ewes. Mutton-lamb is not particularly brisk at 9½d. per lb.; but some lambs are much more saleable up to 10½d. for the choicest. Pigs are still firm, porkers especially, up to 10s. 6d. per score; baconers a fair trade at 9s. to 10s., and heavier pigs at their value according to quality and weight.

Trade in Scotland.

The number of fat cattle on offer has been a full average, but the general quality barely so good. A fair inquiry has been experienced, but prices on an average would suffer a fall of 10s. per head. A small supply of fat cows made rather more money. Sheep offered in full average numbers, and the general quality good. These met a rather slower trade, and in some case cases quite 1s. a head less had to be accepted. Lambs in smaller supply, and anything of good quality selling fairly well. Fat calves exceedingly dear, while pigs with difficulty maintained previous prices. There was a large supply of store sheep, generally of an inferior class. Owing to the bad change in the weather buyers acted with caution, and while lambs were in good demand, cheviot dinmonts, more especially those of secondary class, met a very bad trade. There was a good show of store cattle, the best class of which got well sold out at previous prices. Milch cows a small show, and they met a slow market. Quotations:—Top price of cattle per live cwt., 38s.; current, 34s. to 36s. 6d.; mutton, 6d. to 9d. per lb.—John Swan and Sons, Ltd.

Trade in Ireland

Dublin market on Thursday was very largely filled with cattle, there being 5,108, or an increase of nearly 1,000 head over the corresponding weeks of 1905 and 1906. In spite of this great increase of cattle the prices kept up well, and a good day's trading was well maintained. The Norwich contingent, of the Cross-Channel contingent, purchased very freely. Rough cattle were decidedly easier, the fall being from 10s. to 15s. per cwt. For the better descriptions of cattle there was very little difference in price. Sales of common and half-meated varieties were rather hard to make. The live weight prices for choice beef ranged from 30s. to 32s. 6d. per cwt. (live weight), and other good cattle in propoation; for half-finished beasts about from 1s. to 1s. 6d. would be the general reduction. The approximate dead weight prices would be:—Best heifer and bullock from 52s. to 52s. 6d. per cwt. for very choice; good medium beef, from 47s. 6d. to 50s.; and other sorts from 45s. to 46s. 6d. per cwt. The number of cattle offered at this market was the largest for a long time, but the large attendance of buyers kept buying all right.

Sheep numbered over 6,754, being a decrease of nearly 100 on the week. The best classes started well, and good sheep for home consumption (wethers), but ewes dropped 1s. to 2s. per head. Prime wether mutton, 7d. to 8d. per lb.; ewe mutton, 6d. to 6½d.; and inferior sheep, 5½d. to 6d. per lb. Large heavy hoggets sold at from 48s. to 60s. each, and small to medium hoggets from 36s. to 46s. each. The lamb trade was virtually over, but some large fat lambs were sold for from 34s. to 44s. each, and other sorts at 24s. to 30s. each. Choice veal sold freely at 7d. to 8d. per lb., and inferior calves from 4½d. per lb. The show of pigs in Dublin market on Thursday last was small; there was a good attendance of buyers. When the market opened prices quickly showed an improvement of from 1s. to 2s. over the previous Thursday's market. As the day advanced pigs began to come into the market, and prices went down somewhat. Best bacon pigs were worth from 47s. to 50s. per cwt.; heavy bacon pigs, 43s. to 47s.; and coarse bacon pigs from 32s. to 40s. per cwt.

LONDON.

Central Market, Friday.—Good supplies, and trade very slow, with drooping tendency in prices. English beef, 3s 6d to 3s 9d; Scotch sides, 4s to 4s 2d; shorts, 4s 2d to 4s 6d; Deptford and Liverpool killed, 3s 6d to 3s 9d; refrigerated hindquarters, best, 4s to 4s 3d; ditto seconds, 3s 8d to 3s 10d; ditto forequarters, 2s 2d to 2s 6d; inferior beef, 2s 2d to 2s 8d; mutton, Scotch wethers, 4s 8d to 5s; ditto tegs, 4s 8d to 5s; ditto ewes, 3s 4d to 3s 6d; English wethers, 4s 4d to 4s 8d; ditto ewes, 3s 4d to 3s 6d; Dutch sheep, 3s 8d to 4s; English lamb, 4s 4d to 5s; veal, 3s 8d to 4s 8d; English pork, 3s 8d to 4s 4d; Dutch ditto, 3s 8d to 4s 2d per 8 lb.

Islington, Thursday.—Supply of beasts consisted entirely of fat butchering cows and bulls, which met an extremely slow trade, and top prices paid per 8 lb. were as follow:—Fat cows, 3s 4d to to 3s 6d; fat bulls, 2s 6d to 3s. Decrease of 160 in number penned in sheep market compared with last Thursday, supply being smallest for years, notwithstanding which very few sales were recorded, though sellers were not willing to accept any decline on late rates. Best pens made per 8 lb as follows:—7½ to 8 stone Downs, 5s 10d to 6s; 9 stone ditto, 5s 8d to 5s 10d; 10 stone ditto, 5s 6d to 5s 8d; 10 stone half-breds, 5s 4d to 5s 6d; 10 stone Down ewes, 4s to 4s 2d. Calf trade nominal Quotations per 8 lb, sinking the offal:—Beasts, 2s 6d to 3s 6d; sheep, 4s to 6s.

COUNTRY.

Ashford, Tuesday.—With a good attendance trade was very fair. Best beef made 4s 4d to 4s 8d per stone, and secondary 4s to 4s 2d. Mutton slightly dearer, Down wethers making 5s 6d to 5s 10d; small Kents, 4s 4d to 5s 8d; large Kents, 4s 8d to 5s. Veal made 5s to 5s 6d. Pork over supplied, only best made 4s.

Aylesbury, Wednesday.—The stock on offer at this market consisted of about 450 sheep and 130 beasts. There was an improved demand for sheep and lambs, and, being only a short supply, practically all changed hands, wethers realising from 41s to 63s, ewes 42s to 54s, and tegs 33s to 43s. A smaller consignment of beasts met a better inquiry, prices ranging from 4s to 4s 4d per stone for best quality maiden heifers and bullocks, and 3s 8d to 4s for cows.

Bath, Wednesday.—There was a large attendance at the fortnightly market, and a good supply. Fat steers made £19 to £22 10s; fat heifers, £17 15s to £20 5s; fat cows, £16 10s to £17 5s; cows and calves, £12 5s to £16; fat tegs, 48s to 54s; fat lambs, 43s to 45s; fat calves, 80s to 114s; weaning calves, 30s to 55s.

Birmingham, Thursday.—Fair supply of pigs; small supply of beasts and sheep; fair trade for pigs; trade slow for beasts and sheep.

Quotations:—Beef, 5d to 6½d per lb; Hereford, 6½d per lb; mutton, 6½d to 8½d per lb; lamb, 8d to 9d per lb; bacon pigs, 9s 2d per score; cutting pigs, 9s 6d per score; porkers, 10s per score; sows, 7s 4d per score.

Bristol, Thursday.—Beef was plentiful and in fair demand, best qualities (last week 58s per cwt.) being quoted from 58s to 60s, and secondary remaining 55s. Mutton was in limited supply, and ewes slightly advanced to 6½d per lb. Pigs were not numerous, and values unchanged.

Calne, Friday.—Prices of pigs:—In lots of not less than ten, on rail within 100 miles, 1s. per pig extra for delivery by road. Prime stores, 6 sc. 10 lb to 8 sc. 10 lbs, 9s 0d per score, 8 sc. 11 lb to 9 sc. 10 lb,, 8s 6d per score; 9 sc. 11 lb to 10 sc. 10 lb, 8s 0d. Pigs outside these limits at their value.—C. AND T. HARRIS AND CO., LTD.

Canterbury, Saturday.—Not so sharp a demand for ram tegs, and prices lower. Good ewe lambs were selling to-day at from 26s 6d to 36s 6d; wether tegs, from 40s to 44s 6d; and ewe tegs, from 48s to 52s., with one extra good lot at 53s. Good-toothed three-lamb ewes are worth 34s to 44s 6d; two-lamb ewes, 46s to 48s 6d; and one-lamb ewes up to 54s.

Carlisle, Saturday.—Few buyers attended, and trade was quiet. Small wintering bullocks and heifers, £6 10s to £8 10s; better descriptions, £10 to £12 10s; stall-feeding cattle to £16; polled bullocks to £18 each.

Chester, Thursday.—A small supply owing to the inclement weather. Prices firm and unchanged from last week. There was a fair supply of Scotch and Irish wether lambs, for which the demand was slow, and many remained unsold. Milch cows, £17 to £22; calves, £15 to £20; barren cattle, £9 to £13; stirks, £6 to £10; lambs, 18s to 26s each

Derby, Tuesday.—A fairly busy market. Beasts and sheep unchanged. Beasts, 5½d to 6½d; calves, 7½d; sheep, 7½d to 9d.

Doncaster, Saturday.—Large supply of cattle, and a very large number of sheep, though less than usual at the time of the year. Moderate attendance of buyers, and a steady trade, especially for milch beasts, which were dearer, and made £18 to £23; bullocks, £14 to £18; heifers and drapes, £11 to £15; stirks, £9 to £11; young stores, £7 to £9 each; lambs, 40s to 44s; ewes, 50s to 53s; and shearlings, 50s to 56s each.

Dorchester, Saturday.—After a drenching wet week the weather to day was fine, and all traces of the torrential rains had quite disappeared on the roads, though the low-lying lands were flooded in every direction. Stock came to hand in better condition than of late, and this had the effect of strengthening the demands of sellers, grazing cattle, for one thing, improving by the favourable conditions prevailing, and though the trade has been rather easier, anything fresh brought a good return to-day at prices ranging from £22 to £28 per pair for fresh-condition bullocks, and plain cattle £18 to £21. Milch beasts a very strong trade, best heifers making £16 15s to £21 apiece as a general run, and seconds £14 to £16 5s. Young stock commanded considerable attention, and keep being plentiful, prices ruled firm. Fat bullocks made £15 to £20 10s (or 10s 6d to 11s 6d per score). Mutton little doing.

Dublin, Thursday.—The market opened with brisk inquiry for choice cattle, but later, when the larger numbers became apparent, demand slackened off, and prices moved in favour of buyers. Middling and inferior descriptions were too numerous, and lower rates had to be accepted in order to do business. Choice light and medium sheep in fair request at last week's rates, heavy qualities not so easily placed. Lambs out of season. Cattle—Live weight (best), 29s to 31s per cwt; exceptional for choice Angus crosses, 33s. 6d per cwt; inferior qualities, down to 25s per cwt. Mutton (dead weight), 6½d to 7¾d per lb. —GANLY, SONS AND CO.

Edinburgh, Wednesday.—Trade in all departments unusually dull, but supplies plentiful; half-bred sheep to 46s; half-bred lambs to 28s; cross lambs to 24s; Cheviot lambs to 31s; Cheviot Dinmonts to 36s; black-polled cattle £14 14s; coloured polled to £14 10s; cows, best Shorthorns, to £25 10s.

Glasgow, Wednesday.—There was a good show of cattle at the market. Prime sorts, being again scarce, made good prices; other sorts met a quick demand at late rates. Top 62s to 65s; secondary, 55s to 59s per cwt. Good supply of sheep penned, and demand for prime hogs and wethers was firm. Secondary met slow inquiry. Best mutton, 8¾d to 9¼d per lb; secondary, 8d to 8½d per lb

Gloucester, Saturday.—Messrs. Bruton, Knowles, and Co. report their sales as follows:—Cows and calves a large supply, with fairly good trade. Store cattle a fair supply, with a slight falling off in the demand.

Hereford, Wednesday.—The price of beef showed a recovery on last week for bullock and heifer, the best of which realised 6d to 6½d per lb. The four best averaged £23 10s each. Prices for store cattle were rather firmer. Milking cows sold very well. Calves were very few, both store and fat. Veal made 6½d to 7d. The best wether sheep were going well at 8d to 9d per lb; fat ewes 6½d to 7d. The pig trade was quite a drug.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report an average supply of fat cattle and a good attendanceof buyers. Yard-fed animals were sharply competed for, and made up to 9s. per stone. At the special sale of grazing cattle about 500 were penned, including about 250 North Country Shorthorn steers bred in Cumberland and Westmoreland, in nice condition and first class quality; also some good lots of polled two-year-olds. There was a moderate attendance of buyers, prices not being so good as last week. Shorthorn steers, two-and-a-half years old, to £14; polled, to £13 7s 6d; Shorthorns, two years old, £13 to £11 10s; polled, £12 5s to £11 5s; North Country steers, 20 to 18 months, £11 5s to £9 10s; 100 roan Westmoreland steers, from 18 to 12 months old, made from £10 5s to £6 5s. Cows and heifers met a brisk trade; Dutch fresh calved to £24; Shorthorns to £22 10s; polled, to £19 10s. Fat sheep were short and dear, the best shearlings making from 65s to 58s. Lambs were fairly represented; Suffolk ewe lambs sold well at 54s 6d, but wethers were slow, and somewhat cheaper. Fat swine in larger supply, which changed hands freely at the lower prices now current.

Leicester, Saturday.—Smaller supplies of home-bred stock. Buyers were not well represented, and trade was irregular. Choice milch cows, £20 to £22 10s; good lots, £17 to £19; secondary ditto, £14 to £15; Welsh cattle, £9 to £13 10s; young stock, £5 to £7; and calves, 25s to 40s each.

Lincoln, Friday.—A fair supply of horned stock and a moderate demand. Young beasts, £9 to £10; strong ditto, £14 to £16. Young ewes made 48s to 55s; gimmers, 48s to 55s; and lambs, 30s to 48s each.

Lynn, Tuesday.—Smaller show of fat beasts experienced late rates, viz., from 7s to 7s 9d; Stores in average supply at about late rates, making from £6 to £17 each; an average show of fat sheep met late rates, and made from 9s to 10s per stone Stores realised from 45s to 50s each. Store lambs from 38s to 45s each.

Manchester, Friday.—Beef: First-class, 5½d; second-class, 4d to 4½d; third-class, 3d to 3½d per lb. Mutton: First-class Cheviots, Scotch, 7¾d; Irish, and others, 7½d; second class, 6½d to 7d; third-class, 4½d to 5d per lb. Veal: First-class, 6½d; second-class, 5½d to 6d; third-class, 4½d to 5d per lb. Bacon pigs: First-class, 5½d; second-class, 4½d to 4¾d; third-class, 3½d to 3¾d. Porket pigs: First-class, 7d; second-class, 6½d to 6¾d; third-class, 6d to 6½d per lb

Newcastle, Tuesday.—Cattle were a good supply. Quotations:—Prime heifers and medium weights, 7s 3d to 7s 6d; second class, 6s 9d to 7s; prime steers, 7s to 7s 3d; second class, 6s 9d to 7s; coarse and inferior, 6s to 6s 6d per stone, sinking the offal. Trade for sheep was a shade easier. Quotations:—Shearling sheep, 8½d to 8¾d; strong heavy, 8d to 8¼d; choice lambs, 8¾d to 9d; second class, 8½d to 8¾d; ewes, 6d to 6¾d; rams, 5d to 6d per lb. Trade for calves was quiet at unchanged prices; veal, 5½d to 7½d per lb.

Newport, Wednesday.—Plentiful supply and a large attendance of buyers, and good demand all round. Best beef, 6½d; second, 6¼; cows, 4¾d to 5d; best wether mutton, 8½d to 8¾d; ewes, 6½d to 7d; lamb, 9d; calves, 7½d per lb; porker pigs, 10s 3d to 10s 9d per score.

Norwich, Saturday.—A rather larger supply of fat cattle, and the best sorts met a better trade, 8s being the average for prime beasts, while others made 7s 3d to 7s 6d per 14 lb stone. Fat cows were of very poor quality, and sold cheap. Sheep were an average show, and the demand was unchanged; small mutton made 9½d; large, 9d per lb; ewes, 6½d. Pigs were not quite so dear, baconers making 6s to 6s 6d, and porkers 9s 6d per 14 lb stone; sows, 5s. Veal calves sold at 9s per stone. Store cattle was a good lot, both as regards numbers and quality. Trade was slightly better. Two and three-year-olds made from £13 10s to £18 10s; yearlings, £8 to £11; smaller sorts, £4 10s to £7. Small show of sheep, chiefly hoggets, which met a good trade at from 34s to 46s each. Only a few ewes were offered; these sold at from 34s to 60s. Pigs were of secondary quality, and met a slow trade at from 10s to 17s per head. Rearing calves, although mostly of very poor quality, met a better trade, 15s to 50s being the general run of prices.

Nottingham, Saturday.—Fair show of dairy cows, with a good demand, especially for young cows; these made £18 to £23, while in-calf heifers realised £15 to £19. Small show of stores; strong heifers and steers, £1 to £14, and younger beasts £6 to £9. Calves, 25s to 40s. Sheep sold at late rates

Preston, Wednesday.—Trade was slow for good samples of stock, with beef prices a shade firmer for choice, but inferior difficult to sell. Quotations:—Local-fed heifers, 6½d; Irish ditto, 6d; choice cows and bulls, 5¾d; heavy ditto, 5d; hoggs, 8½d; prime lambs, 8¾d; coarse lambs, 8½d; choice ewes and tups, 6½d; calves, 6½d per lb.

Retford, Saturday.—An average attendance, and about the usual supply of store stock. Really good bullocks and milch cows were worth £20 apiece, and in some cases up to £22; secondary, £14 to £16; steers and heifers, £10 to £12; yearlings, £6 to £8; and calves 40s to 45s per head.

Romford, Wednesday.—Average supply of fat beasts, trade a little better. Best, 4s 4d to 4s 6d; middlings, 4s to 4s 2d per stone. Calves in shorter supply, trade about the same, 5s to 5s 2d per stone. Sheep in large supply, trade slow. Best small, 6s to 6s 2d; larger, 5s 6d to 5s 8d per stone. Ewes in average supply, trade lower, 4s 2d to 4s 4d per stone. A few store beats on offer, slow demand. Over 150 milch cows on offer, trade better. Average supply of pigs, trade about the same. Small porkers, 3s 10d to 4s; large hogs, 2s 8d to 3s per stone.

Sheffield, Tuesday.—More milch beasts shown than last week, and a good demand experienced for the best qualities, which made £20 to £24; secondary and Irish cattle, £16 to £18.

Stockton, Wednesday.—There was an average show of the best cattle, which met with a slow trade at 7s to 7s 6d per stone, whilst rougher kinds made 6s to 6s 6d per stone. Lambs and young sheep sold at 8½d per lb, ewes 7d, and tups 6d. The pig trade was of a similar character to that of last week, trade being slow. Small porkers made 7s 6d per stone, mediums 7s, and sows 6s to 6s 3d per stone.

Thame, Tuesday.—There was a considerable increase in the supply of stock, and cattle decidedly a better lot than previous weeks. Fat oxen made from £17 to £21 7s 6d; fat heifers, £16 to £20 7s 6d; fat wethers, up to 67s; fat ewes, 40s to 46s; fat calves, £3 11s; bacon hogs to £6 17s 6d; porkers, 25s to 29s; store pigs up to 17s 6d.

Truro, Wednesday.—Attendance very good, business fairly brisk. Fat bullocks, 54s to 58s; barreners, 40s to 45s per cwt; store bullocks, 40s to 45s; cows and calves, £12 to £17 each; rearing calves, 20s to 42s; ewes, 38s to 45s; wethers, 7d per lb; ewes, 5d to 5½d; lambs, 7d to 7½d; pigs, 6s to 42s each; beef, 6d to 8d per lb; mutton, 6d to 8d; lamb, 7d to 8½d; veal, 6d to 8d; pork, 6d to 8d; pork (carcasses), 4½d to 5d.

Wolverhampton, Wednesday.—Trade moderate, and fair supply of bests. Quotations:—Beef, 6d to 6½d per lb; mutton, 6½d to 9d per lb; lamb, 8¾d to 9½d per lb; veal, 6d to 7½d per lb.

Worksop, Wednesday.—Moderate supply of stock, and trade fairly good. Best beef, 7s 6d to 7s 9d; secondary qualities, 6s 9d to 7s 3d per stone, a decided improvement on late rates. Trade for sheep was good. Best Southdown wethers and cross-breds to 9d; lambs, 9d; ewes, 6d per lb.

York, Thursday.—Practically no English store cattle on offer, but a fair show of Irish beasts for the last market. A very slow trade, and what inquiry there was was chiefly for strong three-year-olds full of flesh, which made up to £15 10s for the best; two-year-olds, £13 10s. No demand for stirks, and no trade in dairy cattle. The best North-country ewes made up to 55s, ; others, 50s to 53s. : North-country lambs, 33s to 40s; Cheviot ewes, 22s to 28s; best twice-crossed lambs to 38s; others, 30s to 34s; Masham ewes, 42s to 48s; Masham lambs, 22s to 28s; A few South-country ewes made up to 45s.

WOOL.

London, Saturday.—English—per pk. of 240 lb.—Fleeces, South Down hoggs, £13 15s to £14 5s; half-bred hoggs, £13 to £13 10s; ditto wethers, £12 10s to £13; Kent fleeces, £12 5s to £12 10s; South Down ewes and wethers, £13 10s to £14; Leicester ewes and wethers, £12 to £12 10s. Colonial—per lb.—Vic., scoured super., 2s 3d to 2s 4d; scoured, good, 2s to 2s 2d; scoured, average, 1s 10½d to 1s 11½d; greasy, average to fair, 1s 2½d to 1s 3½d; N.S.W., scoured, average, 1s 10½d to 1s 11½d; greasy, average, 1s 1d. to 1s 2d; S. Aus., greasy, average, 11d to 1s; N.Z., scoured, average, 1s 11d to 2s; greasy, average, 1s to 1s 1d; Cape, scoured, super., 1s 10d to 1s 11d; fleece, average, 9½d to 10½d; greasy, average, 8½d to 9½d; Natal, scoured, 1s 6d to 1s 7d; greasy average, 8½d to 9d. Crossbreds—grs.—Vic., good to super., 1s 3d to 1s 4½d; New Zealand fine, 1s 3d to 1s 4d; medium, 1s to 1s 1d; coarse, 10d to 11d.

Canterbury, Saturday.—Elevenpence is freely offered for Kent fleeces, but this farmers decline to accept, and still hold out for 1s per lb.

Halifax, Saturday.—There is a lull in the market for wool, users abstaining from purchases in the expectation, apparently of securing more favourable terms later. At present there is no tendency in that direction, values being firm for all descriptions.

HAY AND STRAW.

Birmingham, Friday.—Small supply of hay; trade slow. Hay, £2 15s to £3 15s per ton. No quotations for straw.

Derby, Friday.—Best old clover, 90s to 100s; new, 80s to 90s; hay, best old, 90s to 100s; new, 80s to 90s; seconds, 65s to 70s; straw—wheat, 60s to 70s; pressed, 50s to 60s; chop, 55s to 65s; peat moss, 36s to 40s.

Hereford, Wednesday.—Trade quite lifeless, with prices nominally unchanged:—Hay, 50s to 60s per ton; straw, 20s to 25s.

Lancaster, Saturday.—Meadow hay, 6d; clover, 6½d to 7d; wheat straw, 4d; oat straw, 4d per stone.

Leeds, Tuesday.—The supply of old hay is rather restricted, and prices rule firm in the warehouses. The new crop is steady at the quoted prices. Old clover hay, 7½d; ditto meadow hay, 7d; best new clover hay, 7d; ditto meadow, 6½d; wheat straw 5d; oat straw, 5d; and rye straw (retail), 7d to 8½d per stone.

Lincoln, Friday.—A fair amount of hay and straw offering, and trade was moderate. Best hay, 55s to 60s; inferior ditto, 45s to 50s; straw, 30s per ton on the ground.

Manchester, Friday.—Hay, 4¾d to 5¼d; clover, 5½d to 6d per stone.

Newcastle, Tuesday.—Old land hay, from £3 12s 6d to £4 7s 6d per ton; new land hay, from £4 10s to £5 7s 6d; this year's growth from £4 to £4 10s. Wheat straw from £1 4s per load; barley straw from £1 1s to £1 3s; oat straw from £1 2s to £1 4s.

Nottingham, Wednesday.—Large supplies which met with a good demand for best qualities. Quotations:—Inferior to good hay, 50s to 65s; prime ditto, 80s to 90s; inferior to good clover, 60s to 70s; prime ditto, 85s to 95s; wheat straw, 45s to 55s; old hay, 90s to 100s; old seeds, 95s to 105s per ton.

Sheffield, Tuesday.—Moderate supplies, and a quiet trade passing. Choice old seeds, £5 to £5 5s; new ditto, £4 10s to £4 15s; prime old hay, £4 10s to £4 15s; new ditto, £4 5s to £4 10s; straw, £2 15s to £3 per ton.

Whitechapel, Saturday.—A small quantity available met a brisk demand at late prices: Best clover, 84s to 95s; inferior ditto, 72s to 80s; specially picked hay, 85s; good ditto, 68s to 78s; inferior ditto, 55s to 63s; mixture and sainfoin, 70s to 82s 6d; straw, 28s to 33s per load.

POULTRY AND GAME.

Smithfield, Saturday.—Fairly good supply and demand. Young grouse, 7s; old, 3s to 3s 6d; young partridges, 4s to 4s 6d; old, 1s 9d to 2s; pheasants, 8s; black game, 3s 6d per brace; geese, 5s to 6s 6d; country ducks, 2s 6d to 3s 3d; wild ducks, 1s 6d to 1s 0d; Surrey fowls, 3s to 5s; Sussex fowls, 2s 6d to 4s 6d; Lincolnshire fowls, 2s to 2s 6d; Essex fowls, 2s to 2s 6d; Irish fowls, 1s 8d to 2s 3d; quails, 8d to 1s; feathered pigeons, 7d to 8d; Bordeaux pigeons, 10d to 1s 1d; English hares, 2s 6d to 3s; Scottish hares, 1s 6d; tame rabbits, 1s 2d to 1s 6d; wild rabbits, 6d to 10d; live hens, 1s 6d to 1s 9d each; Australian rabbits, 5s to 6s 9d per dozen.

HOPS.

Canterbury, Saturday.—A steady business, though not on a large scale. Some growths of East and Mid Kents were sold at £4 15s to £5 per cwt all round. Selected parcels of choice hops are making £6.

Worcester, Saturday.—There was a decided falling off in the attendance of planters at market to-day and it is evident a large portion of the crop has passed out of growers hands. Trade was brisk for any hops with bright colour, and sound yellow hops keep moxing off steadily at late rates. 3,187 pockets have been weighed this week, making with those previously weighed 12,789 to date. —Charles Faram and Co.

CHEESE.

Newport, Wednesday.—There was an average attendance of buyers, and a good demand. Quotations:—Caerphillies, 46s to 54s per cwt; fancy dairies, 55s to 58s; Derbys, 63s to 66s; truckles, 58s to 63s; Cheddars, 60s to 63s.

Glasgow, Wednesday.—Arrivals of home cheese were very light. The trade passing was small, with prices unchanged. Cheddars, 60s to 64s per cwt; Dunlops, 58s to 62s; Canadian also dull of sale, price 62s to 63s.

Sale of Shires at Buxton.

On Friday at Hargate Hall, near Buxton, a number of rare good specimens of Shire horses, the property of Mr. R. Whitehead, who succeeded Mr. Joseph Wainwright in possession of one of the best appointed breeding and rearing spots in England, were offered for sale by auction in the presence of about 400, the fact that Peak Dolly appeared in the catalogue being a big attraction. It was a melancholy coincidence that only on the morning before the sale the death of Mr. Joseph Wainwright should occur at Buxton. He did more to encourage improvement in the breed of Shires than almost any other man. He gave no less a sum than 2,500 guineas for Bury Victory Chief in order that Peakland farmers might have at their disposal the best (at that time) animal that ever was foaled.

As regards Friday's sale, the outstanding feature was the competition for Peak Dolly, and it was not until he bid 260 guineas that Sir P. A. Muntz was enabled to obtain this splendid specimen of the breed. The only other big price was 190 guineas, and as will be seen from the following list of the chief lots this sum was paid by Mr. Smith Carrington, who took some of the other choicest lots. The principal sales were as follows:—

		Gs.
Peak Dolly	Sir A Muntz	260
Peak Topsy		41
